GORIHAR, or GOURIAR, in Bundelcund, the principal place of the jaghire or feudal grant of the same name, a small town or village 16 miles S.W. of Banda, 66 S.E. of Calpee. Lat. $25^{\circ} 16'$, long. $80^{\circ} 15'$. The jaghire is stated to comprise an area of seventy-six square miles, and to contain nineteen villages, with a population of 7,500 souls, and yielding a revenue of 65,000 rupees (6,500*l.*). It is held of the East-India Company, under grant dated November, 1807, and the jaghiredar maintains a force of thirty horse and one hundred foot.

GORKHA, in the native state of Nepaul, a town 53 miles W. by N. from Khatmandoo, and 104 miles N.E. from Goruckpoor, and formerly the principal place of the country of the reigning dynasty of Nepaul. Lat. $27^{\circ} 52'$, long. $84^{\circ} 28'$.

CORPOORE.—A town of Assam, in the British district of Luckimpoor, 40 miles S.W. of Luckimpoor. Lat. $26^{\circ} 53'$, long. $93^{\circ} 39'$.

GORUCKNATH, in Sirhind, a village on the route from Pinjor to Malown, and 12 miles N.W. of the former place. It is situate at the base of the Sub-Himalaya, near the right bank of the river Suras, and on the north-eastern border of the Pinjor Doon. Lat. $30^{\circ} 54'$, long. $76^{\circ} 54'$.

GORUCKPORE, a district under the lieutenant-gov. of the N.W. Provinces, is named from its

principal place. It is bounded on the north by the territory of Nepaul; on the east and south-east by the district Sarun; on the south by the British district of Azimgurh; on the south-west and west by the territory of Oude. It lies between lat. $26^{\circ} 7'$ — $27^{\circ} 30'$, long. $82^{\circ} 12'$ — $84^{\circ} 30'$, and includes an area of 7,346 square miles. The district is in general remarkably level, but at a few spots in the east and south-east, there are some ridges of slight elevation, seldom exceeding sixty feet in perpendicular height above the plain, with a breadth of from 100 to 300 yards. They consist of a light soil, well suited for the growth of trees, but are not cultivable, the steepness of their slopes precluding irrigation. The more southern are visible to those passing up and down the Ganges. Their crest has an uneven outline, and they are rendered the more remarkable by the fact that no similar elevations are visible in navigating the river from the vicinity of the Himalayas. From calculations founded on the slope of river-beds, the average elevation of the central part of the district of Goruckpoor above the sea is estimated at about 340 feet. The surface slopes with a general and very gentle declivity from north-west to south-east, as is indicated by the courses of the Ghaghra, Raptée, Gunduck, and divers other streams. The general descent probably does not on an average exceed eight inches per mile; and in consequence of the comparative flatness, many parts are laid under water during the rainy season. From many hollows the abundant rains never entirely evaporate, and hence the country abounds in jhils or shallow lakes. The most important are the Moti Jhil (Pearl of Lake), or jhil of Bakhira, twelve miles west of the town of Goruckpoor, in the dry season seven miles long and three broad; the Ramgarhital, close to the east of the same town, six long and three broad; and Bherital, in the south-east of the district, and near the left bank of the Ghaghra.

The climate of Goruckpoor is sultry in the southern parts, but is considered as healthy as any in India of the same average temperature. In the north, or towards the base of the Himalaya, the heat is not so great, but the air is less salubrious; fever, intermittents, and other complaints generated by malaria, being much more common. The easterly and westerly winds are the more prevalent; and the change to the opposite directions generally takes place after a short intervening calm, without veering through the intermediate points. The west winds prevail from the middle of February to the middle of June, when they are succeeded by those from the east. These continue until the middle of October, and during the remainder of the year the east and west winds blow for nearly equal periods, the north and south winds blowing only occasionally. In the immediate vicinity of the mountains, a current of air rushing down each considerable gorge, produces nearly every forenoon a wind from north to south. The westerly winds are not attended

by that searing and pernicious sultriness which causes them in tracts lying more to the westward and south-westward to be emphatically denominated "the hot winds." In winter, indeed, they are accompanied by such a degree of cold as produces thin ice. The periodical rains continue from the middle of June to the middle of October: they are less liable to failure than in places farther south or west, and are more abundant and certain in proportion to proximity to the mountains. The lands liable to inundation are cultivated with rice, which is the staple crop of most parts of this district, though in some, wheat is more extensively grown. A few years since, inquiries were made by the local government as to the probability of the latter becoming a profitable article of export to the United Kingdom, but the results were not such as to afford encouragement to the trial of the experiment. Other crops are barley, millet, maize, the opium poppy, arhar (*Cytisus cajanus*), gram (*Cicer arietinum*), peas, and various other kinds of pulse; some species of *amaranthus*, mustard, and other oil-plants; ginger, turmeric, and betel. Cotton is grown, though not to a sufficient extent for the home demand. In the experimental farms of the government, native sorts were found to succeed well, but the American kinds failed. Indigo is cultivated by grantees of the East-India Company. Tobacco is extensively grown, principally for home consumption. The sugarcane is well suited to the soil and climate, though more remote from the equator than the generality of tracts in which sugar is successfully cultivated. The attention of British capitalists has lately been directed to the planting of mulberry-trees. The population being very indigent, and in a low state of civilization, the manufactures are few and simple, being nearly restricted to coarse cottons, woollens, tanning, dyeing, rude workings in metals, sugar-boiling, and extraction of soda and nitre from soils impregnated with those substances. The exports are represented to be grain, pulse, oil-seeds, oil, sugar, melasses, ginger, turmeric, tobacco, lac, honey, wax, indigo, cotton cloth, nitre, ghee or clarified butter, elephants, kine, buffaloes, goats, fish, and timber. The imports are said to consist of cotton wool, thread, and cloth, chintzes, silks, broad-cloths, blankets of wool and cotton, hardware, and some other articles of less importance.

The principal routes are—1. from west to east, from Fyzabad, through the town of Goruckpore, to Betsiya; 2. from south-east to north-west, from Dinapoor to the town of Goruckpore, and thence continued in the same direction to Sekrora, in Oude; 3. in a direction nearly from north to south, from the town of Goruckpore to Azimgurb; 4. in a direction nearly from north to south, from the town of Goruckpore to Ghazepore; 5. from north-east to south-west, from the town of Goruckpore to Sultanpoor, in Oude. Great improvements calculated to develop the resources of

the country, have been effected in the district within the last few years, by the Road Fund Committee, resulting in an increase of the government rental, the amount of which was subsequently fixed for a series of years, and is not liable to a further increase until 1859. A plan adopted by the local government for bringing the waste lands into cultivation, which first came under the notice of the home authorities in 1836, did not, when the details came to be understood, secure their approbation. Vast grants of waste land at a progressive rental, increasing from the fourth to the twenty-fifth year, were made to various individuals, four-fifths of whom were Europeans, and the remainder Anglo-Indians. These grants were stated to have amounted to nearly 418,000 British statute acres, or 653 square miles; and it appeared that three individuals were concerned, either directly or indirectly, in no less than 208,480 acres, or 345 square miles; an area exceeding that of the county of Middlesex. These enormous allotments were judged by the home authorities to have been made without due regard either to the circumstances of the country transferred, or to the means possessed by the grantees for effecting the required improvement; and orders were given to cancel the grants as far as might be practicable. For the guidance of the local government in future, certain rules were enjoined, and others recommended, for the purpose of avoiding on future occasions the errors committed in regard to these grants. Among the objects proposed by these rules, were the prohibition of any grant of land without previous survey, the prohibition of any grant to a European, unless he engaged to reside on the land himself, and to bring it into cultivation within a specified period; the prohibition of sale or transfer until the land had been brought into cultivation; the limitation of the extent of grants made under general conditions, and the annexation of special conditions to additional grants; the resort to public competition, by inviting tenders for the purchase of waste land; the admission of natives to a share in the distribution; the preservation of all ancient rights; the maintenance of roads and drains, and the due apportionment of water for irrigation. Some of these points were enforced in orders issued in 1836, and final and peremptory orders on the subject were sent out in 1842.

The population, according to a census taken in 1853, amounts to 3,087,871. Of these, 2,267,513 are returned as Hindoos engaged in agriculture; 449,262 Hindoos employed in other occupations; 262,133 Mahomedans and others, not being Hindoos, agricultural; 108,966 non-agricultural. It will thus be seen that the great majority of the inhabitants of Goruckpore are Hindoos. The Mahomedans of course form the next largest number. There are, it is said, a few Sikhs; and a small number of the rich merchants and tradesmen profess the doctrine of the Jains. Men of all classes and descriptions formerly went armed for the

purpose either of outrage or defence; but since the country passed into the hands of the British government, all the strongholds of freebooters have been demolished, and no open resistance is now shown to the ruling authority. The tract constituting this district was formerly part of the possessions of Oude, and was comprised within the transfer of territory made under the treaty of the 10th November, 1801, by the nawaub vizier, to the East-India Company, in commutation of their claims for subsidy and other charges. The district contains four towns having more than 5,000 inhabitants but less than 10,000, and three (Goruckpore, Jungul Purwina, and Birdpore) having more than 10,000.

GORUCKPORE.—The principal place of the British district of the same name, within the limits of the lieut.-gov. of the N.W. Provinces. It is situate on the left bank of the Raptee, which is here a fine navigable river, with a channel about 200 yards wide, at all seasons containing deep water, and consequently passable only by ferry, there being no bridge. "Only a corner of the town is adjacent to the bank, the extent of high ground being there small, and widening farther back from the river. The situation, however, is good and healthy, and would be more agreeable were the forests and plantations cleared away, as they exclude ventilation, occasion many mosquitoes, and harbour great numbers of monkeys, which are exceedingly troublesome. But the natives object strongly to any such measure." This favourable report of the place must, however, be received with some qualification, as there is much marsh in the vicinity of the town, and in the rainy season the whole country southwards for six miles, as far as the river Ami, is often laid under water. Tieffenthaler estimates its circuit at three miles, but mentions that the natives reported it to be seven. A few of the houses are of brick, and tiled; the larger portion of the remainder have mud walls, but are tiled; but a small number are mere hovels of hurdle, and thatched. "When new, like others in this district, the tiled roofs are uncommonly neat, but they are very soon spoiled by the monkeys, who, from their insatiable curiosity and restless mischief, turn over the tiles, and render the roofs the most unseemly and useless in the world." There are two mosques; one completely ruinous; the other, which is in better preservation, and is still frequented, is built of brick, in a remarkably heavy, tasteless style. Both buildings are mentioned by Tieffenthaler, who describes the former as ancient a century ago. The Imam-barah, built by Shoojah-oo-Dowlah, nawaub of Oude, is handsome and spacious, and is kept in excellent repair by a person who has a large endowment. It would have a striking and fine effect, were it not surrounded by a chaos of filth and misery. The fort bears the name of Basantpore, and is situate close to the left bank of the Raptee.

The ground-plan given by Tieffenthaler is a regular square, with a bastion at each corner, and two intermediate, at regular intervals on each face; and consequently twelve altogether. When the English took possession, in 1802, the fortifications had become ruinous, and part of the fort was then demolished, and some rooms built in the European style. Buchanan adds—"But still it is a very sorry place, although it serves the collector as an office and treasury. Round the town the magistrates have made some good roads, and the houses of Europeans are scattered on the east, south, and west sides of the town, especially on the last, where the military cantonments and jail are situated. I have seen no station where the houses of the Europeans have so poor an appearance, or where the grounds about them are so destitute of ornament." The cantonment is at present on the east side of the town, on the highest ground that could be appropriated for the purpose; and from the sandiness of the soil, water seldom lodges on it for more than a day or two. But this high ground immediately rises from the Ramgarial, a jhil or shallow lake situate on its south-east side, which is six miles long and three broad, and from the channels by which this expanse of stagnant water receives the drainage of a great jungle lying on the north, and stretching eastward of the cantonment. When this jhil and the river Raptee rise to a certain height, a communication is formed between them, and the level of the stagnant water is regulated by that of the river. If, however, the communication be long interrupted during hot weather, the whole surface of the jhil becomes a mass of decayed vegetable matter. The cantonment affords accommodation for a detail of native artillery, a detachment of light cavalry, and a regiment of native infantry. The civil establishment consists of the usual European officers and native functionaries. The population of the town of Goruckpore, according to a census taken in 1852, amounted to 54,529. A short distance from the town is the sthan or place of Gorackhnath, near which is a tank intended for ritual ablutions, and said to have been miraculously formed. This town is mentioned in the Ayeen Akbery as having a brick fort. Elevation above the sea between 330 and 340 feet. Distance direct from Calcutta, N.W., 430 miles; from Hazareebagh, 230; from Dinapore, 130. Lat. 26° 42', long. 83° 23'.

GORUCKPORE, in the British district of Furruckabad, lieut.-gov. of the N.W. Provinces, a village on the route from the cantonment of Bareilly to that of Futtehghur, and eight miles N.E. of the latter. Lat. 27° 28', long. 79° 41'.

GORUH, in the British district of Meerut, lieut.-gov. of the N.W. Provinces, a town the principal place of the pergunnah of the same name. Lat. 28° 49', long. 77° 56'.

GORUH, in the British district of Budoon, lieut.-gov. of the N.W. Provinces, a village on

the route from Agra to Bareilly, and 66 miles N.E. of the former. Lat. $27^{\circ} 50'$, long. $78^{\circ} 45'$.

GOSAINGANJ, in the territory of Oude, a village on the route from Lucknow cantonment to Purtabgurrh, 20 miles S.E. of the former, 90 N.W. of the latter. It has a bazar, and is well supplied. Lat. $26^{\circ} 42'$, long. $81^{\circ} 8'$.

GOTEH.—A town in the Southern Mah-ratta jaghire of Jumnkundes, 86 miles N.E. from Belgaum, and 163 miles S.E. by S. from Poonah. Lat. $16^{\circ} 41'$, long. $75^{\circ} 30'$.

GOTELAEI, in the British district of Mynpooree, lieutenant-gov. of the N.W. Provinces, a village on the route from the cantonment of Alighurh to that of Mynpooree, and 29 miles N.W. of the latter. Lat. $27^{\circ} 30'$, long. $78^{\circ} 46'$.

GOTKEE, in Sind, a small town on the route from Subzulcote to Shikarpoor, and 34 miles W. of the former place. It is situate six miles from the left bank of the Indus, in a low, level, alluvial country, much overspread with jungle. Though the houses are meanly built of mud, there is a showy bazar, with numerous verandas, decorated with various fantastic devices. The town also possesses a mosque of considerable size, surmounted by a cupola covered with glazed tiles. The vicinity is infamous on account of the predatory and sanguinary character of its inhabitants. Lat. $28^{\circ} 2'$, long. $69^{\circ} 20'$.

GOTRA.—A town in the native state of Gwalior, or territory of Scindia's family, 83 miles S.W. by W. from Gwalior, and 99 miles W. by N. from Jhansee. Lat. $25^{\circ} 39'$, long. $77^{\circ} 5'$.

GOTTARAO, or **SURDHAR GHUR**, in Sind, a fort on the route from Roree to Jessulmair, and 50 miles N.W. of the latter place. It is situate near the eastern frontier, in the Thur or Sandy Desert, the surface of which undulates in a succession of sandhills, not totally barren, as they produce a spare vegetation of stunted bushes and tufted grass. Water in this district is scarcely to be had except during rains, and even then in small pools barely capable of supplying 100 men. The fort of Gottarao is built of brick, and forms a square of about 200 yards. The wall is from twenty to twenty-five feet high, and a keep in the interior is about ten feet higher. On the east and the greater part of the north side is an outer wall of about ten feet high. There are about a dozen round bastions in various parts of the walls. The fort is supplied with water from a depth of 150 feet by five wells. Two of these are within the walls; the remaining three without, but close to them. During the sway of the Talpoor dynasty, this place belonged to the ameer of Khyerpoor, and was defended by two guns and a garrison of 150 matchlock-men. An inconsiderable village is attached to the fort. It is frequently called Sirdar Ghur (the Sudur Ghur of Walker's map). Lat. $27^{\circ} 16'$, long. $70^{\circ} 4'$.

GOUHANEI, in the British district of

Banda, lieutenant-gov. of the N.W. Provinces, a town three miles left or S.E. of the route from Allahabad to Kallinger, 65 miles W. of the former, 57 N.E. of the latter. Lat. $25^{\circ} 18'$, long. $81^{\circ} 9'$.

GOULLY, in the British district of Bijnour, lieutenant-gov. of the N.W. Provinces, a village on the route from Moradabad to Mozuffernuggur, and 37 miles N.W. of the former place. It is situate in an open and partially-cultivated country, in which water and abundant supplies can be obtained. Distant N.W. from Calcutta, by Moradabad, 925 miles. Lat. $29^{\circ} 7'$, long. $78^{\circ} 23'$.

GOUNTIA, in the British district of Furruckabad, lieutenant-gov. of the N.W. Provinces, a village on the route from the cantonment of Shahjehanpoor to that of Futteghur, and five miles N.E. of the latter. Lat. $27^{\circ} 24'$, long. $79^{\circ} 41'$.

GOUR.—See GAUR.

GOURANGHEE.—A river rising in lat. $26^{\circ} 43'$, long. $90^{\circ} 7'$, on the southern slope of the Sub-Himalaya range of mountains, and in the native state of Bhotan, and, flowing south for thirty miles through Bhotan, and eighteen miles through the British district of Goalpara, falls into the Brahmapootra on the right side, in lat. $26^{\circ} 10'$, long. $90^{\circ} 13'$.

GOUREA, in the British district of Cawn-pore, lieutenant-gov. of the N.W. Provinces, a village on the route from Allahabad to Etawah, and 70 miles S.E. of the latter. Lat. $26^{\circ} 12'$, long. $79^{\circ} 55'$.

GOURIAR.—See GORHAR.

GOURJEANUH.—A town in the native state of Bhawalpoor, near the left bank of the river Ghara, and 130 miles E.N.E. from Bhawalpoor. Lat. $30^{\circ} 14'$, long. $73^{\circ} 39'$.

GOVARDANGERRY.—A town in the British district of North Canara, presidency of Madras, 93 miles N. by W. of Mangalore. Lat. $14^{\circ} 11'$, long. $74^{\circ} 42'$.

GOVERDHUN, in the British district of Muttra, lieutenant-gov. of the N.W. Provinces, a town on the route from the cantonment of Muttra to Deeg, and 15 miles W. of the former. Here, on the night previous to the battle of Deeg, were the head-quarters of General Fraser. It has a bazar, and water and supplies for troops are abundant. The road eastward, or towards the cantonment of Muttra, is generally indifferent, and heavy in parts; westward, towards Deeg, it is good. This vicinity is in the Hindoo mythological legends marked by the fabled miracles and exploits of the divinity Krishna, who at the age of eight years "took up Mount Govardhunu in his arms, and held it as an umbrella over the heads of the villagers and their cattle, during a dreadful storm, with which the angry king of heaven was overwhelming them." In the great Indian Atlas, published by authority, the site of the town is represented in an open-

ing in a range of mountains running north-east and south-west, on the western boundary of the district of Muttra; but Garden, in his remarks on the surrounding country, states it to be "flat and cultivated." That this, however, is a mistake, appears from the account of Sleeman, who lately visited this place, and states that "the town stands upon a narrow ridge of sandstone hills, about ten miles long, rising suddenly out of the alluvial plain, and running north-east and south-west." The extremities of this ridge slope gradually to the plain, from which the sides rise abruptly. The population is at present scanty, consisting in a great measure of Brahmins, supported on the endowments annexed to the tombs of the Jat rajahs of Bhurtpore and of Deeg, whose bodies are burned and their ashes inhumated at this town. The tomb of Suraj Mul, the eminent Jat ruler of Bhurtpore, is on the north-eastern extremity of the rocky ridge, about two miles from the town, and is a handsome building, tastefully designed, and elaborately executed in fine white sandstone, little inferior to marble. Connected with this principal building are various subordinate temples, and the whole group extending along one side of a fine tank, full of clear water, and on the other side overlooking a large and beautiful garden. In the middle of the town is the handsome tomb of Ranjit Singh, the rajah who successfully defended Bhurtpore against British assaults in 1805. On each side of the tomb is a tank, one being full; the other, though deeper, is dry, the contents having been drunk off by Krishna, when heated and thirsty, after dancing with his milkmaids; and never since has it had any water. Lat. $27^{\circ} 30'$, long. $77^{\circ} 32'$.

GOVINDAPOORAM.—A town in the British district of Rajahmundry, presidency of Madras, 82 miles S.W. of Vizagapatam. Lat. $17^{\circ} 14'$, long. $82^{\circ} 14'$.

GOVINDGURH, in the Baree Doaab division of the Punjab, a fortress, built in 1809, by Runjeet Singh, avowedly for the purpose of protecting the pilgrims resorting to Amritsar, but in reality to overawe the dangerous assemblage. Since its occupation by the British, measures have been taken for adding to its security. Lat. $31^{\circ} 40'$, long. $74^{\circ} 45'$.

GOVINDPOOR, in the Baree Doaab division of the Punjab, a town situated on the right bank of the river Beas, 85 miles E. by N. of the town of Lahore. Lat. $31^{\circ} 44'$, long. $75^{\circ} 33'$.

GOW GHAT, in the British district of Allahabad, lieutenant-gov. of the N.W. Provinces, a ferry across the Jumna, near the city of Allahabad, and on the south side of it. The bed of the river is here three-quarters of a mile wide, and the stream in the dry season occupies nearly the whole space. The left bank is rather steep, the right sloping. Lat. $25^{\circ} 25'$, long. $81^{\circ} 55'$.

GOWHA.—A town in the British province

of Nagpoor, three miles from the left bank of the Wein Gunga, and 38 miles E. from Nagpoor. Lat. $21^{\circ} 6'$, long. $79^{\circ} 43'$.

GOWHATTY.—A town in the British district of Camroop, lieutenant-gov. of Bengal, 69 miles E. of Goalpara. Its insalubrity has been brought to the notice of the government, and improvements have in consequence been carried on from time to time, with the view of remedying the unhealthiness of the station. Though much yet remains to be done in this respect, great benefit is stated to have resulted from the measures already adopted. Lat. $26^{\circ} 9'$, long. $91^{\circ} 45'$.

GOWNDUL, in the peninsula of Kattywar, province of Guzerat, a town in the district of Hallar. The talook attached to it contains 156 villages and towns, and has a population estimated at 84,700 persons. A tribute of 53,005 rupees is paid to the British government, and 74,400 rupees to the Guicowar. Distance from Ahmedabad, S.W., 135 miles; Baroda, W., 160. Lat. $21^{\circ} 57'$, long. $70^{\circ} 50'$.

GOWRA, in the British district of Goruckpoor, lieutenant-gov. of Agra, a small town on the right bank of the Chota Gunduk river, close to the south-east frontier, towards the British district of Sarun. According to Buchanan, it contains 250 houses; which amount would assign it a population of 1,500 persons. Distance S.E. from Goruckpoor cantonment 36 miles. Lat. $26^{\circ} 43'$, long. $83^{\circ} 20'$.

GOWRA, in Bussahir, a village on the route from Rampoor to Seran, and six miles N.E. of the former town. It is a neatly-built cleanly village, on the flank of a spur of the Himalaya, jutting into the Sutlej. The country in the vicinity is well tilled, and the views are fine. The rajah of Bussahir has here a neat residence; close to which is a handsome Hindoo temple, surrounded with an open trellis of wood, and ornamented with a profusion of carving, executed with much skill and taste. Elevation above the sea 6,042 feet. Lat. $31^{\circ} 28'$, long. $77^{\circ} 45'$.

GOWRA, in the British district of Futtehpoor, lieutenant-gov. of the N.W. Provinces, a town seven miles from the left bank of the Jumna, 26 miles W. of the town of Futtehpoor. Lat. $25^{\circ} 59'$, long. $80^{\circ} 29'$.

GRAM.—A town in the Mysore, 50 miles N.W. from Seringapatam, and 94 miles E. from Mangalore. Lat. $12^{\circ} 59'$, long. $76^{\circ} 17'$.

GRAMUNG, in Bussahir, a village of Koonawur, in the valley of Tidung, and near the right bank of the river of that name, here a violent torrent, rushing down a channel having in some places a descent of 300 feet, in others of double that quantity, in a mile. The village of Gramung is pleasantly situate on a slope towards the south, the houses rising above each other, in consequence of the inclination of the ground. There is a small extent of cultivated ground, producing thriving crops

of wheat, buckwheat, barley, turnips, and pulse. The whole is neatly laid out, and intersected by watercourses, the banks of which are adorned with walnut, apricot, apple, and poplar trees. The houses are well built, and roofed with birch bark overlaid with clay, and supported by timbers. Each has a pole, bearing a white flag or pennon, inscribed with the sacred sentence, "Um Mane pai me Um," and surmounted by the chouri or tail of a black yak; and the vicinity contains thousands of little temples, shrines, and other structures devoted to the ritual observances of the Lamaic monks and nuns, who inhabit the village. Elevation above the sea 9,174 feet. Lat. $31^{\circ} 33'$, long. $78^{\circ} 33'$.

GRINGAVARPUKOTA.—A town in the British district of Vizagapatam, presidency of Madras, 18 miles W. of Vizianagram. Lat. $18^{\circ} 6'$, long. $83^{\circ} 15'$.

GUASUBA.—The name of one of the channels by which the waters of the Ganges flow into the sea. Though of considerable size, it is "the most difficult to enter of any on the coast." Its mouth is in lat. $21^{\circ} 35'$, long. $88^{\circ} 55'$.

GUDDADA.—A river rising in lat. $27^{\circ} 52'$, long. $89^{\circ} 8'$, on the southern slope of the great Snowy Range of the Himalaya Mountains, and, flowing in a southerly direction for 120 miles through Bhotan, and forty miles through the British district of Gwalpara, falls into the Brahmapootra on the right side, in lat. $27^{\circ} 3'$, long. $89^{\circ} 57'$.

GUDDRA.—A town in the British district of Hydrabad, province of Scinde, presidency of Bombay, 139 miles E. by N. of Hydrabad. Lat. $25^{\circ} 40'$, long. $70^{\circ} 37'$.

GUDHEYREE, in the British district of Mynpooree, lieut.-gov. of the N.W. Provinces, a village on the route from the cantonment of Allypore to that of Mynpooree, and six miles N.W. of the latter. Lat. $27^{\circ} 15'$, long. $79^{\circ} 2'$.

GUDJUNTURGURH.—One of the Southern Mahratta jaghires. The town of the same name, and its principal place, is situate 98 miles E. of Belgaum, and 74 miles N.W. from Bellary. Lat. $15^{\circ} 43'$, long. $76^{\circ} 2'$.

GUDKA.—A town in the province of Guzerat, or territory of the Guicowar, 11 miles S. from the Gulf of Cutch, and 84 miles W. by S. from Rajkote. Lat. $22^{\circ} 9'$, long. $69^{\circ} 33'$.

GUDUK.—A town in the British district of Dharwar, presidency of Bombay, 43 miles E. of Dharwar. Lat. $15^{\circ} 25'$, long. $75^{\circ} 43'$.

GUDURPOOR, in the British district of Bareilly, division of Pilleebheet, lieut.-gov. of the N.W. Provinces, a town, the principal place of the pergunnah of the same name, on the route by Nanakinath and Roodeepoor from the town of Pilleebheet to Kashipore, 21 miles S.E. of the latter. Lat. $29^{\circ} 2'$, long. $79^{\circ} 17'$.

GUERMANDA, in the British district of Kumaon, lieut.-gov. of the N.W. Provinces, a halting-ground on the route from Almora to Sireenuggur, and 48 miles N.W. of the former. It is situate on a considerable stream, crossed here by a sangho or wooden bridge. Lat. $29^{\circ} 58'$, long. $79^{\circ} 9'$.

GUGGUR.—A river or great torrent of Sirhind, and the principal stream of that territory. It rises beyond the north-east frontier, in Pateela, about lat. $30^{\circ} 52'$, long. $77^{\circ} 7'$. In consequence of the extent of the hilly country which it drains, its volume of water in time of inundation is very considerable. After forming the boundary for a short distance between some of the hill districts and Sirhind, it finally enters the latter in lat. $30^{\circ} 43'$, long. $76^{\circ} 57'$, whence its course is mainly in a south-west direction through a shallow level valley, about twenty-nine miles wide. The Markunda and Sursooty, farther east, flow down the same valley, which, in time of inundation, is deluged with water, forming a close network of streams, and sometimes causing the three rivers to coalesce into one great stream. In the season when lowest, it becomes a "small thread of water." Jacquemont, who crossed it at that time, describes the channel as narrow, but very deep, being, in fact, a ravine scooped by the torrent out of the alluvial soil. The water was then about two feet deep, but appearances indicated that in time of inundation it might be eight or nine. Having received the Sursooty, and some streams of less importance, it, after a course of about 140 miles, generally in a south-west direction, passes into the British district of Hurreannah, and subsequently into that of Butteannah; its course through these two provinces measuring about 110 miles. It then crosses the Beekaneer frontier, close to which, near Badhopal, and twenty-two miles south-east of Bhatnir, in lat. $29^{\circ} 24'$, long. $74^{\circ} 14'$, it is joined by a watercourse, the continuation of the celebrated canal of Feroz Shah. Hereabouts it becomes totally exhausted by evaporation, absorption, and diversion for the purposes of irrigation, but formerly reached the Sutlej, about twenty miles north-east of the town of Bahawalpoor, by a channel which, though now devoid of water, can be traced to that extent. In the dry season, however, the water does not flow beyond Dundial. The country about the lower part of its course, though now quite barren and depopulated, abounds in ruins, the evidence of former prosperity. The river is mentioned by Baber, under the name of Kagur, and by Rennell, under that of Caggur or Kenker.

GUHMUR.—A town on the right bank of the river Ganges, in the British district of Ghaizeepoor, lieut.-gov. of the N.W. Provinces, containing a population of 7,420 inhabitants. The place is of comparative importance, there being few towns in the whole district of Ghaizeepoor containing a population exceeding that

of Guhmur. Distant S.E. from Ghazepoor 14 miles. Lat. 25° 28', long. 83° 51'.

GUJELHATTI, or **GAJELHATTI**, in the British district of Coimbatore, a fort in a pass between the territory of Mysore and the district of Coimbatore. This fort, formerly looked upon as of great importance, has of late years been much disregarded, and the pass is scarcely frequented, those farther north being preferred, as more convenient for the lines of communication with Madras and Tanjore. The valley through which the pass lies, is the great gorge down the bottom of which flows the Moyaar, a large torrent, and the sides of which are formed towards the south-west by the precipitous brow of the Neilgherries, having an elevation of from 3,000 to 4,000 feet above the torrent, and towards the north-east by the steep declivities of the mountains rising towards Mysore. The fort of Gujelhatti, situate on the left bank of the torrent Moyaar, was, in 1768, taken from Hyder Ali by a British force commanded by Colonel Wood, but was retaken in the same year. It is distant from Seringapatam, S.E., 63 miles; Coimbatore, N., 88 miles; Madras, S.W., 240. Lat. 11° 33', long. 77° 4'.

GUJERAT.—A considerable walled town of the Punjab, about eight miles from the right bank of the Chenaub, and on the great route from Attock to Lahore. It was invested by Maha Singh, who sickened and died in the course of the siege. It subsequently fell into the hands of his more fortunate son, Runjeet Singh, early in the course of his career. Near this place, on the 21st February, 1849, a battle was fought between a British force, under the command of Lord Gough, and a Sikh army, under two chieftains, described as Sirdar Chuttur Singh and Rajah Shere Singh, combined with some troops belonging to the ruler of Cabool, the entire number being estimated at 60,000. This apparently overwhelming force was vigorously attacked by the British, greatly inferior in point of numbers, and driven in succession from point to point, until, utterly defeated, the enemy took to disorderly flight, abandoning their camp, artillery, baggage, and magazines. In addition to their numerical strength, the Sikhs brought into the field a larger number of pieces of artillery, fifty-three of which became prize to the victors. Lat. 32° 35', long. 74° 8'.

GUJNAIR, in the British district of Cawnpore, lieutenant-gov. of the N.W. Provinces, a town on the route from Humeerpoor to Ruseoolabad, and 25 miles N. of the former. Lat. 26° 17', long. 80° 7'.

GUJNER, in the Rajpoot state of Bikaner, a village on the route from the town of Bikaner to that of Jessulmere, and 19 miles S.W. of the former. Here is a hunting-palace of the rajah of Bikaner. Lat. 27° 57', long. 73° 10'.

GUJNERA, in the British district of Bareilly, lieutenant-gov. of the N.W. Provinces, a

village on the route from the town of Bareilly to Setapoor, and 14 miles S.E. of the former. It is situate on the banks of the Punaili, a small stream passable by a good ford. Lat. 28° 20', long. 79° 41'.

GUJOWLEE, in the British district of Agra, lieutenant-gov. of the N.W. Provinces, a village on the left bank of the Jumna, seven miles N. of the city of Agra. Lat. 27° 15', long. 78° 8'.

GUJPOOR, in the British district of Goruckpoor, lieutenant-gov. of the N.W. Provinces, a small town on the right bank of the river Raptae, distant from Goruckpoor cantonnments, S.E., 18 miles. Lat. 26° 30', long. 83° 28'.

GUJROWLA, in the British district of Moradabad, lieutenant-gov. of the N.W. Provinces, a village on the route from the town of Meerut to Moradabad, and 40 miles S.E. of the former place. There is a small bazar. Distant N.W. from Calcutta 923 miles. Lat. 28° 51', long. 78° 19'.

GUJURU-WALLA, or **GOOJERA-WALA**, in the Punjab, a town on the route from Amritsir to Vazeerabad, and 20 miles S. of the latter place. Here is a large square fort with mud walls, surrounded by a ditch. It was the original residence of the family of Runjeet Singh, whose grandfather, born at this place, was a common soldier. The ashes of Runjeet Singh's father and mother are deposited here in tombs of plain appearance. It a few years ago was the residence of the celebrated Hari Singh, the most dauntless of all the Sikh chieftains. The interior of the fort is very highly decorated, and the garden is described by Baron Von Hügel as one of the finest he saw in India. Gujuru-Walla is in lat. 32° 10', long. 74° 13'.

GUJYNLEE, in Bussahir, a village on the route from Kothkae to the Burinda Pass, and eight miles E. of the former. It is inhabited by miners, who extract and smelt the iron-ore of the neighbouring hills. The elevation probably exceeds 6,000 feet. Lat. 31° 8', long. 77° 42'.

GULEE BUSSUR, in the British district of Kumaon, lieutenant-gov. of the N.W. Provinces, a village on the route from Almora to Sireenuggur, and 12 miles N.W. of the former. Lat. 29° 42', long. 79° 36'.

GULER, in the Barce Doaab division of the Punjab, a town situated on the right bank of the river Beas, 126 miles E. by N. of the town of Lahore. Lat. 31° 57', long. 76° 12'.

GULGAOM PIMPRALLA, in the British district of Candeish, presidency of Bombay, a town in which some very elegant and expensive houses have of late years been built by native bankers and the great exporters of cotton. Lat. 21°, long. 75° 37'.

GULLOO RIVER, in Scinde, one of the numerous channels by which the waters of the

Indus disembogue into the sea. It leaves the parent stream in lat. $24^{\circ} 23'$, long. $67^{\circ} 54'$, and, pursuing a south-westerly direction for fifty miles, reaches the sea, under the name of the Hujamri, in lat. $24^{\circ} 8'$, long. $67^{\circ} 26'$.

GULZARGANJ, in the British district of Jounpore, lieutenant-gov. of the N.W. Provinces, a town on the route from Allahabad to Jounpore cantonment, 53 miles N.E. of the former, $13^{\circ} 13' W.$ of the latter. It has a bazar. Lat. $25^{\circ} 44'$, long. $82^{\circ} 34'$.

GUMAR.—A small town in the north-east of the Punjab, and on the southern slope of the Himalaya. The houses are built of stones, cemented with mud, and strengthened with timbers of fir laid horizontally. The roofs are of fir spars, covered with slates; but as these are laid loose, they form a very imperfect protection against the weather. There is here a mine of rock-salt, which is worked to considerable extent, but in a very rude manner. The salt is of a reddish colour, and is very compact and heavy. The rajah of Mundi derives a considerable revenue by its sale. Lat. $31^{\circ} 57'$, long. $76^{\circ} 24'$.

GUMBADEE.—A town in the British district of Kurrachee, province of Scinde, presidency of Bombay, 14 miles S. of Tatta. Lat. $24^{\circ} 33'$, long. $67^{\circ} 57'$.

GUMBHERA, in the British district of Allahabad, lieutenant-gov. of the N.W. Provinces, a town on the route from Allahabad to Goruckpoor, 15 miles N.N.E. of the former. Lat. $25^{\circ} 39'$, long. $82^{\circ} 4'$.

GUMBHIR (EASTERN), a stream of Malwa, rises on the north side of the Vindhya range, seven miles S.E. of the British cantonment of Mow, and in lat. $22^{\circ} 30'$, long. $75^{\circ} 54'$. It holds a course generally northerly for about seventy-five miles, and falls into the Seepura on the right side, in lat. $23^{\circ} 26'$, long. $75^{\circ} 42'$. It is crossed about ten miles from its source, by the route from Mow to Indore, "by a good ford; bed forty yards wide, banks steep, and bottom gravelly; water throughout the year." About sixty-five miles from its source, and in lat. $23^{\circ} 18'$, long. $75^{\circ} 42'$, it is crossed, by means of a ford, by the route from Baitool to Neemuch. "The bed is fifty yards wide, stream fifteen, and one foot deep in fair season; bottom sand and rock; banks steep, and cut into ravines, through which the road passes for some distance."

GUMBHIR (WESTERN), or **WAG**, a river of Malwa, rises 22 miles S.W. of the town of Nimbera, in lat. $24^{\circ} 20'$, long. $74^{\circ} 40'$, and, holding a course of forty-five miles, in a direction generally north-westerly, falls into the river Beris on the right side, about half a mile west of Chittorgurh, and in lat. $24^{\circ} 53'$, long. $74^{\circ} 44'$. It is crossed, on the route from Neemuch to Nuserabad, by means of a stone bridge, close to Chittorgurh, and described by Heber as "the ruins of a long, lofty, and handsome bridge, of eight arches, and one

semicircular one in the centre, with a ruined tower and gateway at each end."

GUMHEERPOOR, in the British district of Azimgurh, lieutenant-gov. of the N.W. Provinces, a small town, with bazar, on the route from the town of Azimgurh to that of Jounpore, and 16 miles S.W. of the former, 26 N.E. of the latter. Distant N. from Benares 45 miles. Lat. $25^{\circ} 54'$, long. $83^{\circ} 3'$.

GUMNAIGPOLIAM.—A town in the Mysore, 123 miles N.E. from Seringapatam, and 117 miles N.W. by W. from Arcot. Lat. $13^{\circ} 50'$, long. $77^{\circ} 59'$.

GUMPAPOOL.—A town in the native state of Bhotan, two miles from the left bank of the Monas, and 95 miles N. by W. from Gowhaty. Lat. $27^{\circ} 30'$, long. $91^{\circ} 34'$.

GUMSALEE, in the British district of Kumaon, lieutenant-gov. of the N.W. Provinces, a village on the route from Joshimath to the Niti Pass, and 15 miles S. of the latter. It is situate on the right bank of the Doulee. Elevation above the sea 10,317 feet. Lat. $30^{\circ} 45'$, long. $79^{\circ} 52'$.

GUNAI, in the British district of Kumaon, lieutenant-gov. of the N.W. Provinces, a village on the route from Almora to Sireenuggur, and 36 miles N.W. of the former. It is situate near the river Ramgunga, which is fordable except in the rains, when it can be crossed, at about a mile from the village, by means of a sangha or wooden bridge. Lat. $29^{\circ} 50'$, long. $79^{\circ} 20'$.

GUNAISGURH.—A town in the Rajpoot state of Beekaneer, 119 miles N. by E. from Beekaneer, and 124 miles E. by N. from Bhawalpoor. Lat. $29^{\circ} 40'$, long. $73^{\circ} 48'$.

GUNBHUR.—A river rising in the south-western declivity of the Himalaya, in about lat. $30^{\circ} 52'$, long. $77^{\circ} 8'$. It takes a north-westerly course, and flows along the south-western base of the height on which Subathoo stands, and 1,300 feet below that station, about five miles beyond which it receives from the north-east its most considerable feeder. It continues its north-westerly course down the deep valley which separates the ridge of Ramgurh from that of Malown, and, after a course of about forty miles, falls into the Sutlej in lat. $31^{\circ} 17'$, long. $76^{\circ} 47'$.

GUNDEVEE, in the district of Broach, presidency of Bombay, a town and port situate on the estuary of the river Eeb, at which the British government possess the right of levying customs-duties. As the port, however, belongs in sovereignty to the Guicowar, the provisions of the British customs-laws have not been introduced therein. Lat. $20^{\circ} 46'$, long. $73^{\circ} 2'$.

GUNDLACAMA, a river of the Madras presidency, rising in lat. $15^{\circ} 40'$, long. $78^{\circ} 49'$, and, flowing in a very circuitous course for 155 miles, through the British collectorates Cud-dapah, Nellore, and Guntoor, falls into the

GUN.

Bay of Bengal thirteen miles west of the town of Ong le, and in lat. $15^{\circ} 33'$, long. $80^{\circ} 18'$.

GUNDLAPETTA.—A town in the Mysore, 42 miles S. from Seringapatam, and 89 miles E. from Cannanore. Lat. $11^{\circ} 50'$, long. $76^{\circ} 44'$.

GUNDOUS, or GOONDOSE, in the Rajpoot state of Joudpore, a town on the route from Nusseerabad to Deesa, and 120 miles S.W. of the former. It contains a good bazar. Lat. $25^{\circ} 39'$, long. $73^{\circ} 31'$.

GUNDUCK, SALAGRA, or NARA-YANI.—A large river, flowing from the Himalaya, and falling into the Ganges. The position of its remotest source has probably not yet been indubitably ascertained. Buchanan says: "This is a grand river, the most remote source of which, named Damodarkund, is beyond the Snowy Mountains, in the territories of a chief of Bhotan or Thibet, named the Mastang Raja, and now tributary to Gorkha." The position of the source thus assigned is lat. $29^{\circ} 40'$, long. $83^{\circ} 14'$. Colebrooke, however, expresses a wish "that some traveller may be induced to visit the Himalaya in that quarter, and explore the great Gandhaki river to its source at the foot of Dhaulagiri;" a position laid down from trigonometrical operations in lat. $29^{\circ} 11'$, long. $82^{\circ} 59'$, or about half a degree farther south. After a long and winding course through the immense chasms of the Himalaya and the hills of inferior height south of them, and during which it receives numerous tributary streams, it is joined, at Nayakot, in lat. $27^{\circ} 31'$, long. $84^{\circ} 5'$, by the Trisoolgunga, which comes from the higher parts of the Himalaya north of Kathmandoo, and is considered by Buchanan to have the greater volume of water, though its course is the shorter of the two. From this point downwards it is navigable for canoes; and at Bhelaunji, ten miles below the confluence last named, becomes so for boats of considerable burthen. The length of course from its remotest source down to this point will be 200 miles. A short distance below this, it sweeps round the base of Maddar Mountain, in the Sub-Himalayan range. Buchanan describes the scenery there, as not to be surpassed. "The utmost magnificence, however, of rude nature that I have ever seen, is the view from the Gandaki, in passing up that river by the foot of Maddar. The river is larger, I think, than the Thames at Chelsea, and much finer, being perfectly clear. Its banks are partly abrupt rocks, partly levels covered with very stately forests, while every turn opens a new view of the snowy peaks seen over an endless variety of dark shaggy mountains, which in most countries would be considered as stupendous." He adds, that upon reaching the plains, it appears in the dry season to have quite as much water as the Ganges after the junction of the Jumna at Allahabad. In consequence of the height of the banks, the breadth does

not much increase in the rainy season, but the current becomes so rapid as to give rise to danger. In the dry season the water is ten or twelve feet deep, and the current, although equable, is very strong, approaching near, but not reaching, that degree of rapidity which occasions a rippling noise; the water is perfectly clear, and the bottom consists chiefly of large water-worn pebbles. Though navigable continuously through its whole course downwards from Bhelaunji, there are in the part of its channel nearer that place many rapids and passes, where, the course being obstructed by rocks, navigation becomes difficult and dangerous. Near Bhelaunji it first touches the British territory, which for fifteen miles it divides from Nepal; thence taking a southeasterly direction, for as twenty miles the boundary between the districts of Gorruckpore and Sarun; then for forty miles flows through Sarun, and again for seventeen miles forms the boundary between the two before-mentioned districts, when it again enters Sarun, through which it holds a circuitous course, but generally in a south-easterly direction, for forty-five miles, to lat. $26^{\circ} 13'$, long. $84^{\circ} 55'$, where it touches on the British district of Tirhoot, and continuing its circuitous but generally southeasterly course for sixty miles, during which it forms the boundary between the districts of Sarun and Tirhoot, it falls into the Ganges on the left side, in lat. $25^{\circ} 39'$, long. $85^{\circ} 16'$, at the town of Hajeeepore, situate on the left bank, and opposite the city of Patna. According to the view of Buchanan, its length of course should be estimated at 407 miles. At its confluence with the Ganges, the latter is a wide expanse of water, probably not less than four miles in breadth, from Hajeeepore on the north bank to Patna on the south, and having two large shifting banks or islands, which much perplex the navigation. It does not appear that the Gunduck, after leaving the mountains, receives any feeder of importance; but during the rainy season it inosculates right and left with many watercourses then traversing that alluvial country. Buchanan, in his report, drawn up above forty years ago, adverts to the great changes which the river-channel had undergone in the thirty years which had then elapsed since Rennell laid down the survey of that part of the Ganges. "The island, when Major Rennell made his survey, which was opposite to the cantonment of Dunaipur, seems to have been carried away; and that which was then situate east from it, in the middle of the river, now, in a great measure, adheres to the southern bank. In the rainy season, a passage still continues open; but in the fair season, its upper end becomes perfectly dry, and boats can no longer reach the Company's cloth-factory, situated on the former bank of the river. This island is now about six miles long, and where largest, about one broad. The main channel, passing round the north side of the above-mentioned island, does not now receive the Gandaki at Hajipur; a long, wide,

and cultivated tongue of land projects from the west side of the Gandaki, and passing east about six miles from Hajipur, separates the stream of the Gandaki from the Ganges; but as in the rainy season a small channel separates this tongue from the northern shore, the union of the two rivers is still supposed to take place where it did formerly, and on the full moon of Kartik (seventh lunar month), the holy spot is frequented by immense multitudes; and at Hariharchhatra, on the west bank of the Gandaki, opposite to Hajipur, there is then held a very great fair, especially for horses." In Tassin's great map of Bengal and Behar (Calcutta, 1841), the tongue of land mentioned above is represented as severed from the northern bank by the main stream of the Ganges restored to its former channel. In lat. $27^{\circ} 9'$, long. $84^{\circ} 9'$, 160 miles above its mouth, the Gunduck is crossed, at the village of Butsura, by the route from Goruckpore to Mulley, the passage being made by ferry. The Gunduck is mentioned by Baber as a line of defence taken up by the Bengalese to resist his invasion.

GUNDUCK CHOTA, or LESSER GUNDUCK, so called in distinction from the greater Gunduck, flowing a little farther to the east. It is called Burha Gunduck, or Old Gunduck, from a notion of the natives that it at one time formed part of the course of the Great Gunduck, though, as Buchanan observes, it is impossible, in consequence of intervening mountains, that there could have been any communication between the streams. The Chota Gunduck rises from a fine perennial fountain at the base of a mountain, near the northern boundary of the district of Goruckpore, and about lat. $27^{\circ} 20'$, long. $83^{\circ} 50'$. It holds a sinuous course, but generally in a southerly direction, and, fifty-two miles from its source, according to Buchanan, is "little sunk below the surface, and towards the end of February (dry season) contained a pretty clear stream, about forty feet wide, and more than knee-deep;" and fifty-six miles lower down, or 108 from its source, "the Lesser Gunduck in some parts is a channel 100 yards wide, which in March contains a clear, gentle stream, thirty yards wide and two feet deep, running on pure sand; in other parts it is much narrower, the channel being clay; and there the water is deep, but even in November (close of the rainy season) nearly stagnant, and rather dirty." At about 150 miles from its source, and seventeen from its mouth, according to the same author, "this river may be 150 or 200 yards wide. At all seasons it may be navigated by canoes, although it has little current and is full of weeds; and in the rainy season boats of 1,000 maunds (thirty-six tons) burden could frequent it." It receives numerous small streams right and left, and communicates by lateral channels with several of the watercourses which abound in this level and alluvial tract, and, having flowed altogether

about 170 miles, falls into the Gogra on the left side, in lat. $26^{\circ} 1'$, long. $84^{\circ} 12'$.

GUNDUK (THE LITTLE).—A river rising on the northern boundary of the British district of Sarun, presidency of Bengal, near Fort Soomeysur, in lat. $27^{\circ} 22'$, long. $84^{\circ} 22'$. Flowing in a south-easterly direction for about 120 miles, it, in lat. $26^{\circ} 16'$, long. $85^{\circ} 18'$, leaves the district of Sarun and enters that of Tirhoot, which it traverses in the same direction for about seventy miles, to its junction with the Bagmuttee, in lat. $25^{\circ} 45'$, long. $86^{\circ} 2'$.

GUNGA.—A considerable watercourse of the Ganges, leaving that river in lat. $28^{\circ} 6'$, long. $78^{\circ} 34'$, and flowing in a south-easterly course for fifty miles, during which it divides the Budaon collectorate from those of Allygurh and Mynpoore, enters the district of Furruckabad, which it traverses for forty-five miles, and then rejoins the parent stream, in lat. $27^{\circ} 26'$, long. $79^{\circ} 39'$.

GUNGA BAL.—A small lake in Cashmere, on the Haramuk Mountain, on the north-eastern boundary of the valley. It is a mile and a half long, and two or three hundred yards wide. Its appearance presents nothing remarkable, and its dimensions, it has been seen, are inconsiderable; but it is regarded with a superstitious veneration of the deepest kind by the Hindoos. Pilgrims flock to its banks, and into its waters are thrown such fragments of bone as remain undestroyed by the fires lighted by Hindoo feeling to consume the fleshly habitation from which the spirit has departed. Lat. $34^{\circ} 27'$, long. $74^{\circ} 58'$.

GUNGAPERSAD.—A town in the British district of Purneah, lieut.-gov. of Bengal, 43 miles S. of Purneah. Lat. $25^{\circ} 10'$, long. $87^{\circ} 38'$.

GUNGAPOORA.—A town in the Rajpoot state of Oodeypoor, 92 miles S.S.W. from Ajmeer, and 106 miles S.E. from Jodhpoor. Lat. $25^{\circ} 13'$, long. $74^{\circ} 21'$.

GUNGAVULLY.—A river of Bombay, rising in lat. $15^{\circ} 45'$, long. $75^{\circ} 10'$, a few miles south-east from Dharwar, and, flowing in a south-westerly direction for thirty-five miles through Dharwar, and sixty-five miles through North Canara, falls into the Indian Ocean, in lat. $14^{\circ} 36'$, long. $74^{\circ} 23'$.

GUNGAWUTTEE.—A town in one of the recently sequestered districts of Hyderabad, or the dominions of the Nizam, situate on the left bank of the Toongabudra river, and 30 miles N.W. from Bellary. Lat. $15^{\circ} 26'$, long. $76^{\circ} 38'$.

GUNGE.—A town in the British district of Cuttack, lieut.-gov. of Bengal, 58 miles E.N.E. of Cuttack. Lat. $20^{\circ} 46'$, long. $86^{\circ} 46'$.

GUNGEEREE, in the British district of Allyghur, lieut.-gov. of the N.W. Provinces, a small town on the route, by Khasganj, from Bareilly to Allyghur cantonment, and 26 miles S.E. of the latter, 64 miles N.E. of Agra. It has a bazar and a market. Lat. $27^{\circ} 51'$, long. $78^{\circ} 31'$.

GUNGEROO, in the British district of Muzufurnugur, lieutenant-gov. of the N.W. Provinces, a village in the narrow tract between the Doab Canal on the east and the river Jumna on the west, and four miles W. of the former, three E. of the latter. Lat. $29^{\circ} 18'$, long. $77^{\circ} 17'$.

GUNGHUN.—A river rising in the British district of Bijnour, in lat. $29^{\circ} 39'$, long. $78^{\circ} 31'$, and, after a direct south-westerly course of about seventy miles, falls into the Uril on the left side, in lat. $28^{\circ} 25'$, long. $79^{\circ} 1'$. It has a considerable stream, running between steep banks, and is unfordable in the rains, but fordable in many places during the dry season.

GUNGOH, in the British district of Suharunpoor, lieutenant-gov. of the N.W. Provinces, a town, the principal place of the pergunnah of the same name, containing a population of 6,260 inhabitants, and situate in lat. $29^{\circ} 46'$, long. $77^{\circ} 20'$.

GUNGOLLE HATH, in the British district of Kumaon, lieutenant-gov. of the N.W. Provinces, a small market-town, or rather village, on the route from Almorah cantonment to Pitoragurh, 34 miles N.E. of the former. Water is obtained from a baoli or great well. Lat. $29^{\circ} 40'$, long. $80^{\circ} 5'$.

GUNGPOOR, in the British district of Cawnpore, lieutenant-gov. of the N.W. Provinces, a village on the route from Cawnpore to Futehgurh, and 39 miles S.E. of the latter. Lat. $26^{\circ} 57'$, long. $80^{\circ} 4'$.

GUNGRANA.—A town in the Rajpoot state of Jodhpoor, 57 miles E. by N. from Jodhpoor, and 46 miles W. from Ajmeer. Lat. $26^{\circ} 34'$, long. $73^{\circ} 59'$.

GUNGURAR.—A town in the Rajpoot state of Jhalawar, on the right bank of the Chota Kallee Sind river, and 122 miles W.N.W. from Bhopal. Lat. $23^{\circ} 54'$, long. $75^{\circ} 39'$.

GUNJOOLY, in Hyderabad, or territory of the Nizam, a town 60 miles W. of the town of Beeder, 128 N.W. of the city of Hyderabad. Lat. $17^{\circ} 55'$, long. $76^{\circ} 42'$.

GUNJUNSIR.—A town in the native state of Cutch, 45 miles N.W. from Bhoj, and 107 S.E. from Tatta. Lat. $23^{\circ} 39'$, long. $69^{\circ} 10'$.

GUNNAIRY.—A town in Hyderabad, or territory of the Nizam, on the left bank of the Payne Gunga river, and 177 miles N. from Hyderabad. Lat. $19^{\circ} 54'$, long. $78^{\circ} 33'$.

GUNNAPOOR.—A town in the territory of Oude, two miles from the right bank of the river Gogra, and 71 miles N. by E. from Lucknow. Lat. $27^{\circ} 50'$, long. $81^{\circ} 20'$.

GUNNEA GURH.—A town in one of the Cuttack Mehals of Orissa, situate 65 miles W. from Cuttack, on the right bank of the Mahanuddee river. Lat. $20^{\circ} 24'$, long. $85^{\circ} 6'$.

GUNNUPWARRUM.—A town in the British district of Rajahmundry, presidency of Madras, 40 miles W.N.W. of Rajahmundry. Lat. $17^{\circ} 11'$, long. $81^{\circ} 20'$.

GUNOOR GURH.—A town in the native state of Bhopal, 14 miles N.W. from Hooeungabad, and 30 miles S.S.E. from Bhopal. Lat. $22^{\circ} 50'$, long. $77^{\circ} 32'$.

GUNOUR, in the British district of Paneeput, lieutenant-gov. of the N.W. Provinces, a village or small town on the route from Delhi to Kurnoul, and 36 miles N. of the former. It is surrounded by a ruined wall, but otherwise has, according to Barr, a pleasing appearance:—"The approach to Gunnour, where we halted, is extremely picturesque; a few huts on a rising ground, overhung by some large and drooping trees, bounding one side of the prospect, the other being formed by a large and handsome caravanserai, with its embattled wall and towers reflected on the surface of a beautifully clear tank." Lat. $29^{\circ} 7'$, long. $77^{\circ} 3'$.

GUNRORA.—A small river, rising in the hill state of Hindoor, amidst the lower range of the Himalaya, about lat. $31^{\circ} 9'$, long. $76^{\circ} 54'$. It takes a north-westerly direction, along the north-eastern base of the high steep ridge of Malown, which separates it from the Guimbhur, holding a parallel course at a distance of about three miles. The Gunrora, after a course of about fifteen miles, falls into the Sutlej, in lat. $31^{\circ} 17'$, long. $76^{\circ} 48'$.

GUNTOOR, a collectorate under the presidency of Madras, is bounded on the north by the Kistna river, which separates it from the Nizam's dominions and the British district of Masulipatam; on the south by Nellore and the Bay of Bengal; on the east by Masulipatam; and on the west by the Cuddapah collectorate and the territory of the Nizam. It lies between lat. $15^{\circ} 37'$ and $16^{\circ} 50'$, and long. $79^{\circ} 15'$ — $80^{\circ} 59'$, and the area, according to official return, is 4,960 square miles. The seacoast of this district extends from Gollapalem, in a direction from south-west to north-east, for thirty miles, and subsequently in a direction, first eastward, and afterwards south-eastward, for about twenty-five miles more, to the principal mouth of the Kistna. This coast is generally called the Golconda coast, which is understood to commence at about lat. $15^{\circ} 20'$, and to proceed northwards, in contradistinction to the coast of Coronandel, which extends from the limit just named to the vicinity of Adam's Bridge. The coast is so low as not to be easily distinguished at a safe distance, and is, moreover, beset by an extensive and dangerous bank, called the Shoal of Motapilly. In consequence of these dangers and impediments to navigation, this coast, for an extent of fifty-four miles, is scarcely frequented by shipping, especially during the north-east monsoon, which prevails throughout October, November, and December. The principal river is the Kistna. This river, formerly little available for irrigation, has recently, through the liberal efforts of the government, become an important and valuable instrument for diffusing fertility over the adjacent country. To navigation, the violence of its current, and the varying, uncertain

depth of its stream, are great impediments. The other rivers are the Gundama, the Nullamuda, the Nagoler, and the Pillaur; but these are merely torrents, nearly or entirely dry during the hot season. Tanks, or artificial lakes, are not numerous, though of importance for irrigation. This district lies within the influence of the south-west and north-east monsoons. The former commences in May, and occasional rains continue till the month of August, moderating the heat of the land-winds, which blow sometimes with great force across this part of the country. A great quantity of rain also falls in the months of September, October, and November. The heat at Guntoor is greatest from the middle of March to the middle of June. The zoology of Guntoor is meagre, there being fewer wild animals in this part of India than in almost any other. Cholum (*Holcus sorghum*) is the staple alimentary crop of the district, and rice in considerable quantity is grown in the low tracts along the seashore and the courses of the river; bajra (*Holcus spicatus*) is also grown in considerable quantities; besides oil-seeds, turmeric, onions, capsicum, and various esculent vegetables. The principal commercial crops are betel, tobacco, and cotton. Cotton cloths are manufactured to a considerable extent, and exported to the territory of the Nizam, as well as to the British districts. The cattle of Guntoor are in great repute, and bullocks are exported in great numbers. The population is given under the article MADRAS PRESIDENCY.

Guntoor constitutes the southern portion of the maritime tract known as the Five Northern Circars, which were ceded to the East-India Company, in 1765, by the emperor of Delhi. The grant, however, was not rendered available in respect to Guntoor until 1783, when the Nizam surrendered the circar, and the British thus became possessed of the whole line of coast from Juggernaut to Comorin. The great northern route from Madras to Masulipatam and the Northern Circars passes through this district, and sends a branch to the left, or north-west, to Hyderabad. Guntoor, the principal place, Nizampatam, and Vinukonda, are described under their respective names in the alphabetical arrangement.

GUNTOOR, the principal place of the British district of the same name, in the territory subject to the presidency of Madras, is situated about 18 miles S.W. of the right bank of the great river Kistna, and 30 from the Coromandel coast, or western shore of the Bay of Bengal. The surrounding country is open and flat, but free from swamps or stagnant water; and to these circumstances is owing the salubrity by which it is characterized. The soil of the country around is black, and produces luxuriant crops of gram (*Cicer arietinum*), cholum (*Holcus sorghum*), and cotton. The place is divided into what are called the Old Town and New Town, both very irregularly built, and in general much overcrowded, especially in those parts inhabited by the poorer

classes. The population is estimated at 20,000. Distance from Bangalore, N.E., 300 miles; Masulipatam; W., 47; Ongole, N., 63; Nellore, N., 133; Madras, N., 225. Lat. $16^{\circ} 18'$, long. $80^{\circ} 30'$.

GUNWAN, in the British district of Budaon, lieut.-gov. of the N.W. Provinces, a village on the route from Allypore to Moradabad, and 40 miles S.W. of the latter. It has a few shops and a weekly market. Lat. $28^{\circ} 25'$, long. $78^{\circ} 25'$.

GUNYSH BUL, in Cashmere, a place of Hindoo devotion, at the eastern extremity of the valley, on the route to the celebrated cave of Amur Nath. According to Vigne, the name signifies "the place of Gunysh," or Ganesa, the only son of Siva. The object of superstition is a large fragment of rock lying in the Lidur river, and worn by the current into what the Hindoos fancy a representation of an elephant's head, to which a trunk, ears, and eyes have been added by human art. The superstitious feeling caused by this object results from the belief that Ganesa has the head of an elephant. Here, the pilgrims proceeding to Amur Nath make their preparatory ablutions and prostrations. Gunyeh Bul is in lat. $33^{\circ} 58'$, long. $75^{\circ} 31'$.

GUOCHNAUT.—A town in Guzerat, or territory of the Guicowar, on the left bank of the river Buanas, and 50 miles S.W. from Deesa. Lat. $25^{\circ} 45'$, long. $71^{\circ} 31'$.

GURANG, in the Daman division of the Punjab, a town situated on the right bank of the Indus, 74 miles N.W. by N. of the town of Mooltan. Lat. $31^{\circ} 11'$, long. $70^{\circ} 46'$.

GURDANGERRY.—A town in the Mysore, 80 miles N.N.W. from Seringapatam, and 104 miles E.N.E. from Mangalore. Lat. $13^{\circ} 29'$, long. $76^{\circ} 18'$.

CURDEGA.—A town in the native state of Bamra, on the south-west frontier of Bengal, 52 miles N.N.E. from Sumbulpoor, and 95 miles S.S.W. from Lohadugga. Lat. $22^{\circ} 7'$, long. $84^{\circ} 25'$.

GURGURREE.—A town in the British district of Bhagulpoor, lieut.-gov. of Bengal, 72 miles S.W. of Rajmahal. Lat. $24^{\circ} 23'$, long. $86^{\circ} 55'$.

GURGUZGUR.—A town in the British province of Nagpoor, 64 miles N.W. by N. from Nagpoor, and 48 miles E. by N. from Baitool. Lat. $21^{\circ} 59'$, long. $78^{\circ} 40'$.

GURH, in the province of Boghelcund, district of Rewa, a village on the direct route from Mirzapoor to the diamond-mines of Punna, and 65 miles S.W. of the former. Elevation above the sea 1,036 feet. Lat. $24^{\circ} 50'$, long. $81^{\circ} 42'$.

GURHEA.—A town in the British district of Beerbhoom, lieut.-gov. of Bengal, 138 miles N.W. of Calcutta. Lat. 24° , long. $86^{\circ} 59'$.

GURHEE DOODHLEE.—See DOODHLEE.

GURHOREE.—A town in the British pro-

vince of Nagpoor, late dominions of the rajah of Berar, 67 miles S.E. by S. from Nagpoor, and 149 miles E.S.E. from Ellichpoor. Lat. $20^{\circ} 19'$, long. $79^{\circ} 39'$.

GURKHOEEA.—A town in the territory of Oude, on the left bank of the river Gogra, and 44 miles E. from Lucknow. Lat. 27° , long. $81^{\circ} 41'$.

GURMUKTESAR, or **GURMUKTES-WAK**, in the British district of Meerut, the principal place of the pergunnah of the same name, on the route from the town of Meerut to Moradabad, and 31 miles S.E. of the former. The population is returned at 8,781 persons. It is situate on the right bank of the Ganges, four miles below the reunion of the Burha Ganga, or old course of the Ganges, with the present main channel, which, a mile and a half above the town is crossed by a much-frequented ferry, on which fifteen boats constantly ply. It may be regarded as the port of Meerut and the adjoining part of the Doab, as the Ganges is the channel of considerable inland navigation from the sea to this ferry, and in a less degree to Sukurtal, fifty miles higher up. Both banks of the river are for several miles in width overgrown with a thick grassy jungle, infested in the dry season with tigers and other wild beasts, and in the rainy season laid extensively under water by the swollen stream. Even in the dry season, when the larger craft cannot proceed higher than Furruckabad, about 150 miles lower down, Gurmuktesar can be reached by boats admitting of some comfortable accommodation to the traveller. That in which Lumsden proceeded in the dry season from this place to Calcutta, was of about twenty tons burthen, forty feet in length, ten in breadth, and navigated by a master and eight rowers. The road from Gurmuktesar westward towards Meerut is good. Distance N.W. from Calcutta 887 miles. Lat. $28^{\circ} 47'$, long. $78^{\circ} 10'$.

GURNADDEE.—A town in the British district of Bakergunj, lieutenant-gov. of Bengal, 120 miles E. by N. of Calcutta. Lat. $22^{\circ} 59'$, long. $90^{\circ} 15'$.

GUROWLEE.—See **GEROLI**.

GURRA.—A town in the Rajpoot state of Jodhpoor, on the right bank of the Loonee river, and 120 miles S.W. from Jodhpoor. Lat. $25^{\circ} 11'$, long. $71^{\circ} 42'$.

GURRAH, or **DEOHA.**—A river rising at the northern base of the Sub-Himalaya, in lat. $29^{\circ} 9'$, long. $79^{\circ} 49'$, in the British district of Kumaon, under the lieutenant-governorship of the North-Western Provinces. It takes a southerly course of 240 miles, passing by the towns of Pilibheet and Shahjehanpoor, and through the British districts of Bareilly and Shahjehanpoor, into the Oude territory, in which it falls into the Western Ramgunga, on the left side, in lat. $27^{\circ} 12'$, long. $79^{\circ} 58'$. At Pilibheet, sixty miles from the source, its bed is 250 yards wide, with a sandy bottom, and

the depth so inconsiderable, that it is fordable from December to June; but for the rest of the year it can be crossed only by ferry. Forty-five miles lower down, where crossed by the route from Bareilly to Mahomdy, its dimensions are the same as above mentioned. At Shahjehanpoor, forty-five miles farther, it is fordable at some seasons, but generally crossed by ferry. Fifty miles still lower down, where crossed by the route from Futteghur to Seetapore, in lat. $27^{\circ} 32'$, long. $79^{\circ} 55'$, it is sometimes forded, sometimes crossed by ferry.

GURRAH, in the British territory of Saugor and Nerbudda, a town situate on the right bank of the Nerbudda, near the town of Jubulpoor. Fitzclarence states that it "is built in a most singular pass, and extends through and along the face of a mountainous ridge about two miles." With the town of Mandla, farther to the south-east, it gave name to that portion of Gondwana once known by the name of Gurha Mandla. Abulfazl mentions, that in his time, about the middle of the sixteenth century, the adjacent country was under forest, harbouring great numbers of wild elephants, though at present in that region those creatures are not known in a state of nature. Elevation above the sea about 1,400 feet. Distant S.E. from Saugor 90 miles; S.W. from Allahabad 200; S. from Agra 303; N.E. from Nagpoor 145; W. from Mow 273. Lat. $23^{\circ} 7'$, long. $79^{\circ} 58'$.

GURRAWARRA.—See **BURRA GURRAWARA**.

GURREE, in Sind, a village on the route from Roree to Jessulmair, and 14 miles S.E. of the former place. It is situate on the northern boundary of the Thurr or Great Sandy Desert, and about three miles east of the left bank of the Eastern Narra, a great offset of the Indus. This stream in time of inundation is here fifty yards wide and twenty feet deep, but it becomes nearly dry at other times. Gurree has about a dozen shops, and is capable of furnishing supplies in moderate quantity. Lat. $27^{\circ} 31'$, long. $69^{\circ} 4'$.

GURREHOO, in the Saugor and Nerbudda territory, lieutenant-gov. of the N.W. Provinces, a village on the route from Mirzapoor to Saugor, 211 miles S.W. of former, 76 N.E. of latter. Elevation above the sea 1,131 feet. Lat. $24^{\circ} 14'$, long. $79^{\circ} 51'$.

GURR KOHOOREE.—A town in the British district of Ganjam, presidency of Madras, 38 miles N.E. by N. of Ganjam. Lat. $18^{\circ} 52'$, long. $85^{\circ} 25'$.

GURR KOOSPULLA.—A town in the British district of Pooree, lieutenant-gov. of Bengal, 36 miles W.S.W. of Cuttack. Lat. $20^{\circ} 13'$, long. $85^{\circ} 28'$.

GURR TAPPING.—A town in the British district of Pooree, lieutenant-gov. of Bengal, 32 miles S.W. of Cuttack. Lat. $20^{\circ} 5'$, long. $85^{\circ} 40'$.

GURRUMAREA.—A town in the British

District of Maldah, lieut.-gov. of Bengal, 14 miles S.E. of Maldah. Lat. $24^{\circ} 52'$, long. $88^{\circ} 18'$.

GURRUSGOAN.—A town in one of the recently sequestered districts of Hyderabad, or territory of the Nizam, 30 miles E. by S. from Ellichpoor, and 74 miles W. from Nagpoor. Lat. $21^{\circ} 4'$, long. 78° .

GURUDWARA, in the British district of Dehra Doon, a large village, agreeably situated, and having a pleasing appearance. Here is a handsome temple, founded by a Sikh devotee. During the festival of the Holi, an annual fair held here is numerously attended by pilgrims from the Punjaub and other Sikh countries. About half a mile north of the village, was fought, in 1803, the battle which decided the war between the Goorkha invaders and the rajah of Gurhwal, who was slain on the field, and whose death was immediately followed by the submission of the country. Lat. $30^{\circ} 20'$, long. $78^{\circ} 7'$.

GURWAH.—A town in the British district of Palamow, presidency of Bengal, 28 miles N.W. of Palamow. Lat. $24^{\circ} 10'$, long. $83^{\circ} 46'$.

GURWAR, in the British district of Ghazepoor, lieut.-gov. of the N.W. Provinces, a town on the route from Azimgurh to Dinapore, 57 miles E.S.E. of the former. Lat. $25^{\circ} 46'$, long. $84^{\circ} 5'$.

GURWHAL (BRITISH).—See KUMAON.

GURWHAL, a hill state under British protection, is bounded on the north by Bussahir and Hiundes, or South-western Tibet; on the east by British Gurhwal; on the south by British Gurhwal and the Dehra Doon; and on the west by the Dehra Doon, the pergunnah of Jaunsar, and Bussahir. It is about ninety-five miles in length from north to south, and seventy in breadth from east to west; contains about 4,500 square miles, and lies between lat. $30^{\circ} 2' - 31^{\circ} 20'$, long. $77^{\circ} 55' - 79^{\circ} 20'$. It extends over the south-western declivity of the Himalaya, and is throughout a vast range of mountains of enormous height, intermingled with several valleys, the drainage of the whole ultimately finding its way to the Ganges. The principal channels are those of the Tonse, of the Jumna, and of the Bhageerettee, one of the remote sources of the Ganges. The most elevated part of the country is the north and north-east, where the peaks about the Tonse, the Jumnotri peaks, and several others, are more than 20,000 feet above the sea. The highest summit is probably the peak of Kedarnath, having an elevation of 23,062 feet. Rikkee-Kasee, nearly parallel with the southern boundary, is the lowest spot in the territory, being only 1,377 feet above the sea. It is the point where the Ganges touches upon the Dehra Doon. The confluence of the Tonse and Jumna, which is the lowest point of the aggregate of valleys drained by those rivers, is rather higher than Rikkee-Kasee, being 1,686 feet above the sea. A few small tracts, extending along the

lower courses of the Bhageerettee and Aluknunda, and the Jumna previously to its confluence with the Tonse, have elevations less than 5,000 feet; but by much the greater part of the country lies considerably above that height. The rivers of Gurhwal—the Tonse, Jumna, Bhageerettee, Bhilung, Mandakini, Aluknunda, Aglar, Pabur, Rupin, Soong, Bediar, and Banal—are separately adverted to in the alphabetical arrangement. The climate of Gurhwal is hot in the low tracts along the banks of the Aluknunda, on the southern frontier, where Raper, in the beginning of May, found the thermometer to reach 101° in the shade. In the lower mountains, having an elevation of from 5,000 to 8,000 feet, the climate is moderate, the thermometer seldom exceeding 75° in the hottest part of the year. In midwinter, frosts are frequent, with occasional falls of snow. The periodical or monsoon rains are very heavy, commencing in the middle of June and ending towards the middle of September. The northern part of the territory, containing the lofty peaks of the Himalayas, rises beyond the limits of perpetual congelation. In the higher mountains bears are common; the lower are infested, in addition to these, by leopards and tigers. Monkeys are numerous, even as high as Sookhee, which has an elevation of 8,869 feet, and is in lat. 31° . According to Skinner, they are not venerated by the inhabitants of the mountains, as in some other parts of India.

The rural economy of the natives of Gurhwal varies with the nature of the soil and the degrees of elevation. Scarcely any fruit-trees are cultivated except the walnut, apricot, and mulberry; but the second is of very indifferent quality, and the last named is cultivated for the leaves, not with a view to the production of silk, but to be used as fodder for cattle. In the low ground, capable of irrigation and having a warm climate, rice is the principal crop. Besides small quantities of sugarcane and of cotton, there are raised ginger, turmeric, sweet potato, and hemp, the latter cultivated for the supply of bang, as well as for the fibre. In more elevated tracts, where the surface on the mountain-slopes is generally formed into artificial terraces by embankments, the crops are wheat, barley, buckwheat, baitsu or amaranthus, mundua or Eleusine coracana, a remarkably prolific plant; pulse of various sorts, and oil-seeds. The poppy is very generally cultivated, either for opium or the seed, which is a favourite food of the natives. The plough is no better than a forked log, drawn by oxen, guided by women; and the ground is rather scratched than ploughed. The ears of corn when ripe are cut off the stalks, which are then eaten down by kine, kept either for their milk or for labour, as the influence of Brahminical prejudices causes their slaughter to be regarded as impious. They are very small, of dark-brown colour, short-horned, and with a hump on the withers like those of Hindostan. The sheep, also small, are of a brown colour and coarse-

woolled; the goats large, and generally white. No family is without a dog, of dark-brown colour, middle size, well covered with strong hair, and of a mongrel aspect. Horses are rare,—even the ghunt or mountain pony; and asses are unknown. The houses are substantially built of layers of stone and squared beams placed alternately. They have generally three stories, each from six to seven feet high. The lowest shelters the cattle, the middle is used as a granary, and the family resides in the upper story, the accommodation of which is enlarged by a strongly-constructed gallery all round. The roof, nearly flat, is generally of slabs or coarse slate laid on thick beams, and projects over both walls and gallery. The communication between the floors is by steep stairs, or rather ladders.

The natives of Gurwhal are in general below the middle size, their stature (according to one traveller) rarely exceeding five feet. Their complexions are less dark than those of the Hindoos of the plains: on the other hand, while red or brown hair may sometimes be observed among the latter, the hue of the hair and beard in Gurwhal is almost invariably dark. The beard is scanty, especially on the cheeks, not strong on the upper lip, fullest on the chin. It is most deficient in men having the Mongolian aspect, who in some instances show no trace of this appendage of the male. On the contrary, those who have long narrow faces, prominent aquiline noses, and fully-developed foreheads, are best provided with beards. They are, according to Jacquemont, a mild, peaceable, timid race, remarkably devoid of mental energy, and living tranquilly, without any control from fixed law, and very little from authority of any kind. Others, however, do not represent them as so strongly marked with those features of the golden age. Frazer relates, that coming to a village where only women, children, and decrepit men were found, on asking them what had become of the able-bodied part of the population, he received for answer, "that they had gone to buy corn or steal sheep," with a tone and manner indicating that they spoke of nothing extraordinary or requiring apology. Hodgson also states that they plunder their eastern neighbours of the Kedarnath districts, and pride themselves on such exploits. This writer reports them to have neither fire-arms swords, nor war-hatchets; their only weapons being bows and arrows.

According to the traditional account given to Frazer, Gurwhal was originally divided into above twenty petty states, which, about 500 years ago, were consolidated into one by a bold and rapacious adventurer from the plains. Previously to the Goorkha invasion in 1803, the dominions of the rajah of Gurwhal comprised, in addition to his present territory, the fertile district of Dehra Doon, and the western portion (being about one-half) of the present British province of Kumaon. The Goorkha force which invaded the country, conducted by several veteran commanders, was very inade-

quately opposed by Purdumin Sah, the rajah, an indolent and unwarlike prince, who, at the head of 12,000 men, was defeated and slain at Gurudwara, in the Dehra Doon. On the occurrence of this event, the inhabitants of Gurwhal discontinued all resistance to the Goorkhas, who made ruthless use of their victory. According to Frazer, they in the course of about twelve years sold 200,000 of the people into slavery; but this is palpably an exaggeration, as a population not exceeding 300,000 could scarcely have been capable of supplying two-thirds of that number of saleable slaves in twelve years. The number, however, of the unhappy victims of the cupidity of the conquerors was no doubt very great, as Moorcroft found the fertile tract about the Terai quite depopulated, in consequence of the deportation and sale of the natives as slaves by the Goorkhas. Sheo Dursun Shah, the son of the slain rajah, had fled the country after the fatal battle which had given it to the Goorkhas. In 1815, when the success of the East-India Company's army had put an end to the Goorkha dominion, this prince was restored to the western portion of the territory formerly enjoyed by his family. The Dehra Doon, on the south, was reserved to the East-India Company, as was also Eastern Gurwhal. The portion of Gurwhal restored to the rajah is divided from the remainder, on the east, by a line which, commencing in lat. 31° 5', long. 79° 20', with a south-westerly direction, skirts the great glacier giving rise to the Bhageerettee, and thence continued southward to the source of the Mardakini, follows the course of that river to its confluence with the Aluknunda, along the line of which it proceeds to its junction with the Bhageerettee, and in a westerly direction down the last-mentioned river to Rikkee-Kasee, where it touches upon the Dehra-Doon. The rajah holds his territory subordinate to the East-India Company. The amount of the population of native states can rarely be ascertained with any approach to precision: that of the rajah's portion of Gurwhal probably does not much exceed 100,000. This, however, is an estimate based on grounds purely conjectural; but if near the truth, it will give a proportion of about twenty-two to the square mile. The annual income is stated by Prinsep at 40,000 rupees (4,000*l.*); by Moorcroft, at 60,000 (6,000*l.*); by De Cruz, at a lac (10,000*l.*).

GURYS, in Bultistan or Little Thibet, is situate close to the northern boundary of Kashmir: it is an elevated valley, five miles long and one mile wide. The upper part of the Kishengunga flows in a direction from east to west along the bottom of the valley, which, though 7,200 feet above the sea, is surrounded by lofty and very abrupt peaks, chiefly of limestone. Lat. 34° 35', long. 74° 50'.

GUTNI, in the territory of Oude, a town on the left bank of the Ganges, here crossed

by ferry, on route from Banda to Pertaubgurh, 92 miles N.E. of the former, 44 W. of the latter. It is perhaps the Gotini of Butler. Lat. $25^{\circ} 42'$, long. $81^{\circ} 27'$.

GUTPURBA.—A river rising in lat. $15^{\circ} 50'$, long. $74^{\circ} 8'$, on the eastern slope of the Western Ghats, and, flowing in a north-easterly direction for 160 miles through the British district of Belgaum, and intersecting the Southern Mahratta jaghire of Moodhul, falls into the Kistnah, in lat. $16^{\circ} 20'$, long. $75^{\circ} 52'$. The material for a wire-rope bridge, proposed to be thrown across this river, at Sootguttee, by a native gentleman, named Sirdar Sukum Gourah Wunkmoonka, was shipped from England in 1850.

GUZERAT.—This large province, inclusive of the peninsula of Kattywar, and comprehending within its limits, together with several petty independent states, the whole dominions of the Guicowar, and those of his tributaries, is bounded on the north by the Gulf of Cutch and Rajpootana; on the south by the Indian Ocean, the Gulf of Cambay, and sundry collectorates of the Bombay presidency; on the east by Candeish and Malwa; and on the west by Cutch and the sea. It extends from lat. 20° to $24^{\circ} 45'$, and from long. 69° to $74^{\circ} 20'$, and contains an area of 41,536 square miles, as will be seen from the following table:—

	Sq. Miles.
Guicowar's territory, and Kattywar	24,249
Myhee Caunta	3,400
Rewa Caunta	4,879
Pahlunpore	1,850
Radbunpore	850
Balasinore	258
Cambay	500
The Daung	950
Chourar	225
Bansda	325
Peint and Hursool	750
Dhurrunpore	225
Thurraud and other petty states	
N.W. frontier	2,325
Sucheen	300
Wusravee, and adjacent territory	450
	41,536

Of the extensive region marked out by those boundaries, a considerable portion is occupied by the Gulf of Cambay, and by the British district of Ahmedabad, which, extending about the gulf, is on all sides, except seaward, inclosed by the territory of the Guicowar. Of the whole territory, 19,850 square miles are stated to be comprised within the peninsula, or that part which may be marked off from the continent by a line drawn from the head of the Gulf of Cutch to the head of the Gulf of Cambay. The mainland of Guzerat, as contradistinguished from the peninsula, has some considerable rivers, which intersect or skirt the country. Among them may be enume-

rated the Saburmuttee, the Bunass, the Myhee, the Nerbudda, and the Taptee.

Of the mountains, the most important are the Western Ghauts, which, running in a direction from south to north, constitute the eastern boundary of the territory, from its southern limit, in lat. 20° , to lat. $21^{\circ} 28'$, where, turning eastward, they form the lofty brow inclosing the valley of the Taptee on the south. The average elevation of these mountains is about 1,200 feet, though the height of some summits is probably not less than 2,000 feet. From the western face of the Ghauts proceed numerous spurs or ridges of inferior elevation, a few of them reaching to the sea; and in some parts they are replaced by isolated hills or rocks, such as those of Parnera, Rola, and several others, the elevation of which seldom exceeds 300 or 400 feet. North of the Taptee, the Satpoora range, dividing the valley of that river from the valley of the Nerbudda, extends for some distance into this territory, terminating to the westward near Rajpeepla. North of the valley of the Nerbudda, is the western extremity of the Vindhya Mountains, expanding into the Barreea Hills, low and irregularly grouped; and still farther north, into those of Loonawara. Beyond these, in the same direction, are those of Dongurpore, becoming ultimately united to Mount Aboo. The overlying formation of the northern section of the Ghauts is volcanic, as is also that of the Satpoora range, and consists for the most part of trap. The trappean formation extends into the peninsula of Kattywar, where it forms the bold mountain of Palithana, celebrated for its numerous Jain temples. Farther westward, granite is met with, rising to an elevation of 2,500 feet, in the celebrated Girnar Mountain, "an immense bare and isolated granite rock, presenting all the gigantic masses peculiar to that formation." The lower parts of the mountain, as well as the vicinity, are overlaid with soft limestone. The island of Perim, in the Gulf of Cambay, formed of sandstone, is remarkable for containing numerous organic remains. The mineral wealth of this extensive tract is but scanty, and calls for little notice; the most important production is iron-ore, raised in the peninsula. The mouth of the Taptee, and probably the whole bed of the Gulf of Cambay, abounds in a black sand, very rich in iron, and containing some platina. At Rajpeepla, the finest cornelians are obtained in great abundance. In the southern districts, the proximity of the sea, and the mountains covered with jungle or forests, moderate and equalize the temperature. The most disagreeable season is during the south-west monsoon, when the atmosphere, loaded with moisture, causes very distressing sensations and maladies, the effects being most severely felt during the night. In the inland districts, in the north of the territory, between the rivers Nerbudda and Saburmuttee, the average temperature is greater than in the southern

districts. In this sultry tract, the hot winds blow from about the 20th of March to the 20th of May, and at this time the thermometer in a double-walled tent rises often to 115°, and in the house to 103°. Many, as well natives as Europeans, suffer from coup de soleil, and in parts where the soil is loose, the heat is rendered more annoying by the profusion of fine sand borne along by the wind. Throughout the district, the weather becomes cooler towards the end of October, and in the cold season hoar frosts are not uncommon. The climate of the peninsula, particularly in the Geer, is marked by insalubrity to such an extent as almost inevitably to cause death to those who are so rash as to expose themselves to it in the season following the autumnal monsoon. The shores of the Gulf of Cambay are also generally malarious.

The zoology of Guzerat is varied and interesting. The lion is not uncommon, and equals in size and strength the same description of animal in Africa. It is observed to have a less mane; but this circumstance is considered to result from its frequenting the thick jungles instead of the open desert, the usual resort of his African fellow. Tigers and leopards are very numerous, and destructive of both men and cattle. There are also the wolf, hyæna, antelope, and deer in great number and variety. The nylgau (*Antelope picta*) is common in the northern parts, where there are large herds of them. Of birds, there are the flamingo, argala or adjutant-bird, sarus or gigantic crane, and a great variety of aquatic birds. Of domestic animals, the principal are the camel, most common north of the Sabarmuttee and in the plains in the vicinity of the deserts of Rajpootana. It is also met with in the western part of the peninsula. The buffalo is everywhere to be met, but in greater abundance and excellence in the south. Kine are numerous, but in the southern part are of inferior quality, while in the northern the breed is very fine, not being excelled by any in Britain. The ass is small and weak; but in the wilds of the north-west, the wild ass is a creature of great speed, as well as of considerable beauty, and is sometimes tamed for purposes of show and pomp. The horse of Kattywar was formerly highly prized; but the breed has degenerated, and the Guzerat horse at present bred by the natives is in no esteem, being small, weak, and ugly. In some of the jungly valleys and wilds, there is a breed of wild cattle, different from the bison, and far less fierce.

The crops, alimentary as well as commercial, grown in this territory, are very important. Of the alimentary, rice is more or less common in all districts under the hills, and in the alluvial soil along the seacoast throughout the whole extent of the province. It is also much cultivated about the river Sabarmuttee. Wheat is very extensively grown, especially in the northern part, and in the country between the Taptee and the Ner-

budda. Barley thrives in many parts, jowar (*Holcus sorghum*), in the light lands in the north; bajra (*Holcus spicatus*) is cultivated on inferior lands throughout the whole territory, and is the staple article of food for the poorer classes of the people. In the peninsula of Kattywar, jowar and bajra are the chief alimentary crops, but wheat is also cultivated to considerable extent; as are kodra (*Paspalum scrobiculatum*) and gram (*Cicer arietinum*). Sugarcane flourishes in every part of the territory: it is one of the principal products in the south, and the quality is considered fine; but cotton may be regarded as the staple commercial crop. The date-palm (*Phoenix dactylifera*) and palmyra (*Borassus flabelliformis*) are extensively planted in the vicinity of the sea, on account of the sap, from which, when fermented, the ardent spirit toddy is drawn by distillation. The mhowa (*Bassia latifolia*) grows in great abundance, and its flowers are in great request, as the petals when dried afford a pleasant food, resembling raisins, and by distillation yield an ardent spirit, which, though nauseous to Europeans, is consumed largely by the lower classes of the native population. Mango-trees are in great abundance, and produce fine fruit. Towards the coast are many fine specimens of *Adansonia*, with its grotesque and huge stem, large white flower, enormous fruit, valuable to fishermen, for whom it serves as floats for their nets; while the wood is so light that a man often carries on his shoulder a large log of it, to be used as a raft in fishing, or in taking water-fowl. The pulp of the fruit also yields a pleasant acid, which is used in medicine and in making sherbet. The jak (*Artocarpus integrifolia*), with its huge fruit, the tamarind, and the *Buchanania latifolia*, yielding fruit resembling an almond in taste, abound in this well-wooded country. The great wonder, however, of the vegetable creation is the cubbeer-bur, or great banian-tree (*Ficus indica*), situate on an island in the Nerbudda, covering an area estimated at from three to four acres. So great is its height, that at a distance it resembles a hill, and so numerous, large, and close its branches, that in the season of inundation, the population dwell amidst them, until the subsidence of the river leaves their usual homes free from water. Esculent products are numerous and excellent, especially the water-melon, considered the best in India; but the plantain is not abundant, and the produce is of no great excellence. The manufacturing industry for which this territory was formerly noted, has much decayed, and in general has nearly disappeared, from the greater cheapness of the wares thrown into the market by British competition.

Of the population inhabiting these extensive dominions, there are no means of ascertaining the precise numbers. Nothing exists beyond mere estimates, and those estimates probably rest but on vague grounds. According to the best information available, the population may

be considered as something less than 3,000,000. They are of various lineage and characters, but no census having been made, the comparative numbers of the respective castes, classes, and tribes, could be assigned only conjecturally. Though the Mahrattas are the ruling race, they appear to be surpassed in number by other tribes, especially in the peninsula. The Rajpoots are very numerous; Brahmins abound, and are mostly landed proprietors or village officers. Mussulmans are to be found principally in the towns, and the Bora sectarians of that faith are in general industrious, wealthy, and influential members of society. The Parsees, though a few are engaged in agriculture, in general resort to the larger towns, where they are distinguished by their industry, quiet demeanor, and commercial sagacity. Coolies, a race settled here from remote antiquity, are especially numerous in the districts north of the river Myhee, and of the tracts about the upper parts of the various rivers in the north. Along the north-west frontier of the territory, they constitute the bulk of the population. They are in general a robust race, and, though professing the Brahminical faith, eat flesh, particularly that of the buffalo, and are much addicted to intoxication, as well by opium and bang, as by ardent spirits. Many of them are depredators of various classes, some secret plunderers, others highway robbers; yet they are said to be trustworthy when expressly hired, either as guards of property, or to convey money to some destined place. The Koonbies are an agricultural tribe, who exist in great numbers in the south and midland parts of the territory, but to a less extent in the north. Besides those just enumerated, are some anomalous tribes of less importance; such as Dunjas, a small, well-knit, active race, engaged to some extent in cultivation, but by choice deriving their subsistence as far as practicable from the chase, fishing, or the collecting of wild fruits and the marketable produce of the jungles for sale. Their peculiar pursuits, little relished or shared in by the rest of the community, cause them to be viewed with dislike and dread; and the reputation of possessing great power in sorcery subjects them to much cruel treatment. Sometimes, in the true spirit of native barbarity, they are punished for such imputed delinquency by having their noses cut off, or by other mutilations. The Katties, who at a rather remote period emigrated from the banks of the Indus to the peninsula, form a majority of the inhabitants in a considerable prant or district to which they have given their name. They are considered to have been originally from Central Asia, and their northern origin is believed to be evidenced by their fair hair and complexions, blue eyes, tall stature, and athletic frame. Over the population in general, but especially over the Rajpoots, two classes of men, Bhats and Charuns, exercise wonderful influence. The Charuns, who, as well as the Bhats, boast of celestial origin, are divided into two tribes,—the Machiloe being merchants, and the Maroo

bards; and these two have in the aggregate 120 subdivisions. The men of those numerous subdivisions profess to understand the rites and observances which propitiate Siva and his consort Parvati, the favourite deities of the Rajpoots; and as few of the population except these pretenders to sanctity can read or write, they add to their other means of influence acquaintance with the genealogies of chiefs and tribes, and with laudatory legends, which they chant in their honour. It is represented, that amongst the Rajpoots there is a deep impression that certain destruction results from being instrumental in shedding the blood of a Charun, or of any member of his family. In reference to this impression, one of the class intent on attaining an object which he cannot otherwise bring about, will not scruple to murder a relative; and instances have not been wanting in which, in extreme cases, a Charun has destroyed himself. The aged and the young among the Charuns are taught, not merely to be ready to part with life whenever the honour of their family or the class to which they belong calls for the sacrifice, but it is said that, "from the feeble female of four-score to the child of five years of age, they are eager to be the first to die;" and this, it is added, "is no rare feeling, but one which appears to belong to every individual of this singular community." Under influence, acquired from the dread of the consequences of urging the Charun to such frightful extremities, the members of this community guarantee the performance of contracts entered into by the most faithless freebooters, and also become security for the payment of sums sometimes of very large amount. They also attend travellers as safeguards, and hesitate not to inflict on themselves wounds, or even death, should they fail in insuring protection to those whom they escort. Their influence, however, on such points has latterly been on the wane; probably because it has become less requisite since the establishment of greater security to life and property, by the advance of British power and influence in the dominions of the Guicowar. The Bhats, according to the imperfect information which we have concerning them, appear to differ little from the Charuns, except that they have less influence and fame. The portion of either which they possess results from their officiating as chroniclers, bards, flatterers, or lampooners. "They give praise and fame in their songs to those who are liberal to them, while they visit those who neglect or injure them, with satires, in which they usually reproach them with spurious birth and inherent meanness. Sometimes the Bhat, if very seriously offended, fixes the figure of the person he desires to degrade on a long pole, and appends to it a slipper, as a mark of disgrace. In such case the song of the Bhat records the infamy of the object of his revenge. This image usually travels the country, till the party or his friends purchase the cessation of the ridicule and curses thus entailed." Those singular religionists, the Jains, are rather numerous, especially in

the peninsula, where there is scarcely a village of any size which has not several of their families; and their innumerable beautiful temples, shrines, and monastic establishments on the mountains of Geernar and Palithana, are amongst the most interesting architectural works in India. The Bheel tribe exist in considerable numbers in the wilder tracts of the eastern and north-eastern part of the territory, especially about the river Myhee. They are considered a people of remote origin, and formerly possessed of power, and of a considerable degree of civilization, until subjugated and oppressed by both Rajpoots and Mussulmans. At present some of them have settled into habits of fixed residence, and are engaged in agriculture; thus being raised above the savage state of the majority of their fellows.

Hereditary slavery is not uncommon in parts of Guzerat; and those claiming ownership over the unfortunate beings reduced to this state, not only avail themselves of the advantage of their services, but hire them out to others. In deference to the philanthropic views of the British government, the Guicowar has lately, indeed, issued a proclamation, prohibiting, under penalties, the future sale or purchase of children within his dominions, except under express permission of the durbur. This, however, is a very imperfect and unsatisfactory measure, perhaps a merely colourable one; and the home authorities have justly expressed regret that the prohibition was not made absolute. The vernacular language, denominated Guzerattee, is an offshoot from the great Sanskrit stock, and closely resembles the Hindee. The principal towns—Baroda the capital, Pahlunpore, Cambay, Radhunpore, Chowwar, Baunsda, Peint, Hursool, Dhurrumpore, Thurraud, Sucheem, Wusravee, Deesa, Rajkote, Poorbunder, Dwaraka, Loonawarra, Barreah, Daunta, Dongurpore, Banswarra, Jabbooa, Oodepore, Rajpeepala, Saunte, and Beyt—are noticed under their respective names in the alphabetical arrangement. There are scarcely any made roads in this territory; but most parts of the country are very level; so that communication for half the year is easy, and wheeled carriages traverse it in all directions. The country will be traversed by the line of the Bombay and Baroda Railway Company. A railway is also projected from Baroda to Tunkaria.

The early history of Guzerat presents no features of greater interest than those which usually occur in the records of the eastern nations of the like periods. It formed part of the Mahomedan empire of Delhi; but in the reign of Mahmood Toghluk, was separated from it by Mozuffer Khan, previously governor, but thenceforward king. About the year 1572 it was the seat of great confusion, and was re-annexed to the empire by Akbar. When the Mahratta fortune prevailed, the chief officer of the confederacy, the Peishwa, secured a large amount of tribute from it; while another chief, called the Guicowar, became the ruler of the principal state in Guze-

rat, called Baroda, to the article on which the reader is referred for information on its history.

GUZZLEHUTTY.—See GUJELHATTI.

GWALIOR TERRITORIES, the possessions of the family of Scindia, have a singularly irregular outline, and consist of several detached districts, the principal of which is bounded on the north-east by the Chumbul, dividing it from the British districts of Agra and Etawah; on the east, in a very tortuous direction, by Bundelcund and the British districts of Sangor and Nerbudda; on the south by the native states of Bhopal and Dhar; on the west by those of Rajgurb, Jhalawur, and Kotah; and on the north-west by the Chumbul, separating it from Dholpore and Rajpootana. The extreme points of the Gwalior territory are in lat. $21^{\circ} 8' - 26^{\circ} 50'$, long. $74^{\circ} 45' - 79^{\circ} 21'$. The length of the principal portion above described is 246 miles from north to south, and 170 in breadth. The area of the whole comprises 33,119 square miles, and comprehends part of the ancient province of Agra, most of Malwa, and part of the Deccan. The rivers of the Gwalior country are numerous. The Taptee, flowing west, traverses the most southern part of the territory; and parallel to this, but about forty miles farther north, the Nerbudda flows in a similar direction; but by far the greater portion of the drainage of the territory is discharged into the river Chumbul, which, receiving the waters of the Chumbula, Seepira, Chota Kallee Sind, Newuj, Parbutty, and some others of less importance, flows along the north-west frontier of the country, separating it from the Jeypoor, Kerowly, and Dholpore territories; subsequently turning south-east, it forms the north-eastern boundary, towards the British districts of Agra and Etawa, and joins the Jumna in the latter district, twenty miles distant from the north-eastern corner of the Gwalior territory. The Sinde, a considerable river, but less than the Chumbul, flows in some measure parallel to it, but farther to the east, and after forming for a considerable extent the south-eastern boundary towards Bundelcund, intersects for thirty miles the north-eastern corner of Gwalior, and finally falls into the Jumna, a short distance below the confluence of the Chumbul with that river. In the northern part of the territory, forming a tract extending between the Chumbul and the Sinde, rise the Kooaree, Asun, Sank, and some other torrents of less importance, which, flowing east or north-east, fall into the Sinde on the left side.

The northern part of the country, of moderate elevation, and in most places either rocky or sandy, has a climate partaking of the torrid character of the neighbouring tracts of Agra or Rajpootana. In these parts the climate, during the rainy season, and for a short time afterwards, is exceedingly unhealthy, fevers being then very rife, in consequence, according

to an intelligent writer, of the moisture imbibed by the superficial diluvial soil being prevented from passing off by an impermeable substratum of sandstone. Hence results great damp, indicated by mouldiness on all substances susceptible of it. During the dry and hot seasons, the climate is not unhealthy. The middle, the southern, and the western parts, or those comprised within Malwa, with little exception, have a mild and rather equable climate, resulting from the elevation of the surface. The range of the thermometer is unusually small, except during the latter part of the year, when great and sudden changes often take place. The cool season comprises the period between the beginning of November and the end of February; the hot season succeeds, and continues to the middle of June, when the periodical rains set in, and last to the close of September, the average fall being about fifty inches. During this season the thermometer has a very moderate range, rarely more than from 72° to 78°. The climate becomes cooler after the rains, and in proportion to the approach towards the winter solstice, when the coldest weather commences, and continues through January and the early part of February, the thermometer sometimes falling three or four degrees below the freezing-point. During the sultry season the hot winds are comparatively mild and of short duration, though the thermometer sometimes rises to nearly 100° during the day; but the nights are invariably cool and refreshing.

The population of the north-eastern part of this territory is of a mixed kind, comprising, besides Mahrattas (the ruling order), Boondelas, Jauts, Rajpoots, with some less distinctly defined divisions of Hindoos, and Mussulmans. Until the Mahratta inroads in the last century, the country was from an early period a possession of the Mahomedan rulers of Delhi; and in no part of the territory, except the small tract south of the Nerbudda, do the Mahrattas form any large proportion of the people. In the greater part of the southern and south-western parts, comprising a portion of Malwa, a very considerable section of the population is Brahminical; and Malcolm remarks: "There is perhaps no part of India where the tribes of Brahmins are so various, and their numbers so great." He however adds, "but there is certainly none where there are so few of them either wealthy, learned, or where there is less attention paid to the religious rites of the Hindoo faith, or to its priests, by the rest of the population." Rajpoots exist in large numbers, and pay little regard to the Brahmins, whose place as to moral and religious influence is supplied by the cognate tribes of Bhats and Charuns. There are many petty Rajpoot rajahs, who yield ostensibly fealty and tribute to the family of Scindia, but display from time to time evidence of a refractory disposition, which would render them perilous subordinates in case of any reverse happening to the para-

mount power. They are described by Malcolm as an indolent, sensual race, living habitually under the besotting influence of opium; while the atrocious practices of infanticide and suttee find toleration. The Mussulman population is estimated at about a twentieth of the whole. The relative density of the population assumed by Malcolm for Central India is ninety-eight to the square mile; and this ratio, compared with the area, would make the amount 3,228,512. The present military force consists, first, of the contingent, paid by the British government from funds derived from territorial assignments, and numbering 8,400, forty-five of whom are European officers, selected from the Bengal army; and, secondly, of the troops maintained by the Gwalior government, and at its disposal, amounting (cavalry, infantry, and artillery) to upwards of 9,622; thus rather exceeding the maximum fixed by the treaty of 1844, which (exclusively of the contingent) was 9,000.

The founder of the Scindia dynasty was Ranojee Scindia, a Soodra, of the Koombi or cultivator tribe, and hereditary potail or headman of a small rural district. He appears to have first come into notice as a domestic of Balaji Wiswanath, who was Peishwa from 1714 to 1720. Ranojee Scindia, being considered by his master trustworthy in his humble avocation, was advanced to a station in the body-guard; subsequently rising rapidly, he became a chief of considerable importance, and on his death, about 1750, was succeeded in his position as head of the Scindia family, by Madhaji Scindia, one of his natural sons, who was present at the great battle of Paniput, in 1761, in which Ahmed Shah Durranee defeated the confederated Mahrattas. Madhaji escaped the carnage with difficulty, and not without a desperate wound, which rendered him lame for life. This great national disaster of the Mahrattas did not, however, operate unfavourably for Scindia; for the shock given to the power of the Peishwa actually removed a principal obstacle out of his way. He recovered some possessions in Malwa, which had been wrested from him after the battle of Paniput, levied contributions very extensively, enforced tribute from the chiefs of Rajpootana and others in the vicinity of his dominions, and maintained a large and effective force in the Deccan, to control the Peishwa and other parties opposed to the growth of his power. He seems to have first come into serious collision with the British forces in 1779, when, in concert with the troops of the Peishwa and of Holkar, he baffled the Bombay army in an attempt to march to Poona, and subsequently, in a convention with the managers of the expedition, exacted a cession of a portion of Broach. The growth of Scindia's power up to this period is thus described by Malcolm:—"Madhaji Scindia took full advantage of the dissensions that occurred at Poona, after the death of B. Ijjes (1761), to usurp, as far as he could, the rights and lands of the head of the empire to the north of the

Nerbudda. The detail of the progress of this system of spoliation of both friend and foe, is not necessary; suffice it to say, this able chief was the principal opposer of the English in the war they carried on in favour of Ragobah. He was the nominal slave, but the rigid master, of the unfortunate Shah Allum, emperor of Delhi; the pretended friend, but the designing rival, of the house of Holkar; the professed inferior in all matters of form, but the real superior and oppressor, of the Rajpoot princes of Central India; and the proclaimed soldier, but the actual plunderer, of the family of the Peishwa." His extensive possessions in Malwa, however, formed the main basis of his power. Mohammed, the weak emperor of Delhi, having, in 1741, granted the province of Malwa in jaghire to the Peishwa, who intrusted its management to Ranojee Scindia, that chief, and subsequently, still more effectually, Madhaji, succeeded, by constantly-repeated encroachments, in acquiring complete dominion over the greater part of the province. Madhaji Scindia having succeeded in making himself master of the strong hill-fort of Gwalior, about 1779, lost it in 1780, when it was surprised in a night attack by a British force under Major Popham, assisted by Captain Bruce. In the following year, Colonel Camac, in command of a British force, having invaded Malwa, and penetrated as far as Seronje, was so beset by Madhaji Scindia, as to be compelled to make a precipitate retreat, in the course of which, however, he succeeded in surprising and defeating his pursuer. Consequent on this defeat, a treaty was concluded, by which the British authorities agreed to evacuate all the territory claimed by Madhaji Scindia to the right of the Jumna, he also engaging to leave the rana of Gohud in unmolested possession of Gwalior and of the adjoining country. By the treaty of Salbye, concluded between the East-India Company and the Peishwa, in 1782, Madhaji Scindia was recognised as a sovereign prince, and declared the guarantee of its conditions. The fort of Gwalior was, in 1784, invested by him, at the head of 70,000 men, and ultimately fell into his hands by surrender. In the succeeding year he entered Delhi, and was, by Shah Allum, made minister, but soon after expelled by a hostile confederacy. In 1788, however, he vigorously pushed his fortune, and, among other successes, acquired Agra. His most formidable force at this time was that commanded by De Boigne, a Savoyard by birth, but trained in the Irish brigade in the service of the king of France. This able soldier, by means of funds supplied by Scindia, kept on foot an army of 18,000 regular, and 6,000 irregular infantry, 2,000 irregular horse, and 600 Persian cavalry, with 200 cannon. By these means, in 1790, were gained, within a few weeks of each other, the battle of Patun, and that of Mairta, in Joudpore, by which its rajah was effectually humbled. Delhi, and its immediate dependencies, had, in 1788, been occupied by Scindia, who expelled and punished

with tortures, ending in death, Ghulam Kadir, the brutal oppressor and mutilator of Shah Allum. Madhaji Scindia at the same time maintained a preponderance at the court of the Peishwa at Poona, and at the time of his death, in 1794, his dominions extended from the river Taptee south, to the northern limit of the district of Delhi, and from the Gulf of Cambay on the west, to the Ganges in the east; including Candeish, a portion of the Deccan, the greatest part of Malwa, the districts of Agra and Delhi, and the central and finest part of the Doab. He was succeeded in his possessions by his grand-nephew Dowlut Rao Scindia, then in the fifteenth year of his age. The early years and efforts of Dowlut Rao were expended principally in contests at Poona and its vicinity, for obtaining influence over the Peishwa, or the means for overawing him, with the view of wielding the power derived from his ostensible protection and countenance; thus playing a chief part in "a scene of intrigue, art, and treachery, which is perhaps unparalleled." Dowlut Rao, joining his forces with those of Ragoji Bhonsla, rajah of Berar, the allied chiefs, in 1803, invaded the territory of the Nizam, protected by the East-India Company, and on the 23rd of September in that year, the Mahratta army, unskillfully encamped, was surprised at Assye by a British force of about an eighth of its number, commanded by General Sir Arthur Wellesley, subsequently the illustrious duke of Wellington, and, after a prolonged and fiercely-contested battle, was totally defeated. The overthrow of Scindia's military resources in the Deccan was completed by the defeat which the confederated Mahattas received from Sir Arthur Wellesley at Argaum, in Berar, on the 28th of November following.

The destruction of the Mahratta power in Hindoostan north of the Nerbudda had, in the mean time, been not less signally effected by General, afterwards Lord Lake, the British commander-in-chief, who having, in the beginning of September, 1803, stormed Allygurh, a few days afterwards, at Patperganj, on the left bank of the Jumna, nearly opposite Delhi, totally defeated Scindia's disciplined army, commanded by the Frenchman Bourquien, and effectually cleared the Doab of the Mahrattas. Delhi was immediately occupied by the victorious army, to which, before the close of the same year, Agra yielded, after a brief attempt at defence. General Lake, indefatigably following up his advantages, destroyed at Laswaree, a few weeks afterwards, the remnant of Scindia's disciplined force. To avert impending ruin, Doulut Rao, at the close of the year 1803, acceded to the treaty of Serji Anjengaum, dictated by the British government, ceding on the left bank of the Jumna "all his forts, territories, and rights in the Doab;" and on the right bank of the river, "all his forts, territories, rights, and interests in the countries which are to the northward of those of the rajahs of Jeypore and Jodepore;" or, sub-

stantially, all tracts which, eastward of long. 76°, are situate north of the Chumbul. Ambajee, a feudatory of Doulut Rao, had at his ostensible instance engaged to yield to the British the fort of Gwalior; but it was found necessary to commence military operations against the place, and the Mahratta garrison, rendered tractable by this measure, consented to receive a bribe, and depart. The fort was by the British government transferred to the rana of Gohud; but some difficulties arising, the grant was revoked, and the place, "from considerations of friendship"—such was the phrase—was in 1805 ceded to Doulut Rao Scindia by the second article of the treaty of Mustafapore. The Mahratta prince so highly appreciated the advantages resulting from the strength of the place, that he regarded it as his capital, and fixed his residence in a permanent camp at the base of the rock. In 1817, when the Peishwa confederated with Appa Sahib Bhonsla, of Nagpore, and Holkar, for the overthrow of the British power, the marquis of Hastings, governor-general, took the command of a formidable army, and advancing to the river Chumbul, so far overawed Scindia that on November 5th, 1817, a treaty was executed, binding this chief, among other conditions, to concur with the British in effectually quelling the Pindarries and other freebooters, and for this purpose to furnish a body of 5,000 horse, to act under the control of British officers. Doulut Rao Scindia died in 1827, and as he had no male issue, Mugut Rao, a boy eleven years old, and nearest relation of the late maharajah who could from his age be adopted, was declared sovereign by the name of Ali Jah Junkojee Scindia. This youth displayed a trait of character of no common atrocity on occasion of his marriage, when he discharged arrows among the assembled people, one of whom was killed. He died childless in 1843, when Bhagerut Rao, his nearest male relative, eight years of age, was declared successor, and proclaimed under the title of Ali Jah Jyajee Scindia. The maternal uncle of the deceased maharajah became regent, under the title of the Mama Sahib, but was quickly displaced by court intrigue and military violence, and the reins of government were thrown ostensibly into the hands of the maharanees, widow of the late maharajah, "a passionate girl of twelve years of age." Her ignorance, caprice, and froward petulance accelerated the progress of anarchy inevitable in such a juncture, and the more alarming, as the most active promoters of the turmoil were numerous and determined, well trained to arms, amply equipped with them, and actuated by a Mahratta love of violence and spoil. This state of things naturally and justly excited the apprehension of the government of British India, Scindia's dominions being extensively conterminous with those of the East-India Company, and likely, in case of outbreak, to share in the calamities and suffer from the deeds of rapine and blood sure to be perpetrated by a lawless soldiery,

associated with freebooters more lawless than themselves. The actual minister was the Dada Khasji Wala, who was seized by the soldiery, probably less from any hostile feeling than a desire to employ him as the tool of their rapacity. Hence ensued a military conflict between those who seized the minister and those supporting the maharanees and her party; but after a brief and feeble engagement, the soldiers agreed to make common cause, intelligence having arrived that a large British force had been concentrated at Agra. Reinforcements were thereupon called in from every side, ammunition in large quantity was served to the troops of all arms, and extensive preparations of every kind made for war. The Dada Khasji Wala was given up to the British authorities; but all order had now ceased in Scindia's territories; the zemindars refused to pay in the rents, and any semblance of rule that remained, depended altogether upon the will of the soldiery. The British government then resolved upon advancing, for the purpose of obtaining full security for the future tranquillity of the common frontier, for the maintenance of order within the territories of Scindia, and for the conducting of the government of those territories in accordance with the established relations of amity towards the British government. It was required that the army of Gwalior should be reduced within reasonable limits. These objects were avowed in the proclamations issued by the Governor-General on the entrance of the British forces into the Gwalior territory, towards the close of the month of December, 1843. On the 21st December, the British army, led by Sir Hugh Gough, commander-in-chief, accompanied by Lord Ellenborough, governor-general, commenced crossing the Chumbul near the town of Dholpore, and by the 26th of the same month the whole had passed to the right side, and encamped at Hingona, twenty-three miles north-west of the fort of Gwalior. This force advancing on the 29th, came in front of the Mahratta army about fifteen miles north-east of Gwalior, and in a position supported by the neighbouring villages of Maharajpore and Chonda. After an obstinate engagement, in which the British suffered very severe loss from the well-served artillery directed against them, the Mahrattas were dislodged from all points of their position, and the survivors of the carnage retreated to Gwalior, having lost fifty-six pieces of artillery and all their ammunition-waggons. The total loss on the side of the British was 106 killed, 684 wounded, and seven missing. The numbers engaged were probably nearly equal,—about 14,000 on each side. Simultaneous with the march of the commander-in-chief from Dholpore was that of Major-General Grey, with an army probably of about 8,000 or 9,000 men, from Bundelcund. Crossing the river Sinde at Chandpore, this force marched to Puniaur, twelve miles south-west of Gwalior, and there, on the 29th December, encountered a Mahratta army, despatched

from the capital, and estimated at 12,000 strong, with twenty-four guns. The Mahratas, after a severe struggle, were defeated, with the loss of all their artillery and a great number of men. The loss on the part of the British was twenty-five killed, and 189 wounded. On the 4th of January, 1844, the fort of Gwalior was occupied by the contingent force, commanded by British officers; and thus passed into the power of the East-India Company this celebrated stronghold, which effectually commanded the Lashkar, or stationary camp, at its base, where 5,000 refractory troops, amply supplied with artillery, still held out; but all hope of successful resistance having ceased, they accepted the offer made to them of full liquidation of all arrears, with the addition of a gratuity of three months' pay, and, surrendering their artillery and small arms, they quietly dispersed. It has been recently determined that no further repairs shall be made to the fort. On the 18th January, 1844, was concluded a treaty, by which various previously existing treaties were confirmed, except so far as they might be affected by the stipulations of the new one. The contingent force for the protection of Scindia's territory, originally provided for in the treaty of Serjee Anjengaum (1803), by the assignment of certain districts for its maintenance, was to be increased, and the revenues of other districts, in addition to the former, were, by a schedule to the new treaty, appropriated to that purpose, as well as, it would appear, to defray the charges of the civil administration of such districts, which was to be conducted by the British government for Scindia. To meet sundry debts due to the British government, and to cover various charges incurred by the misconduct of that of Scindia, a sum of twenty-six lacs was to be paid within fourteen days from the date of the treaty; in default of which, territory described in another schedule was to be assigned as provision for the payment of the principal debt, and the interest accruing thereon, together with the charges of the civil administration. The military force maintained by Scindia beyond the contingent was not to exceed 9,000 men, of whom not more than one-third were to be infantry. During the minority of the maharajah, all acts of government were to be under the control of the British resident, the administration being vested in a council of regency. Three lacs of rupees were set apart as a provision for the maharanees. Such was the position of the relations under the treaty between Gwalior and the British government. The exemplary character, however, of the young maharajah, and his high promise of qualifications for government, led to his being intrusted with the administration of his dominions before the expiration of his minority. The formal act of coronation was postponed until the attainment of his majority in 1853, when, by its performance, the young rajah was solemnly confirmed in the authority which he had previously exercised.

GWALIOR.—A celebrated hill-fort, the capital of the possessions of Scindia's family. The rock on which it is situate, is completely isolated, though 700 yards to the north is a conical hill, surmounted by a remarkable building of stone; and on the south-east, the south, and the south-west, are similar hills, which form a sort of amphitheatre, at the distance of from one to four miles. Near the place, and on the east of it, runs the small river Soowunreeka, nearly dry, except during the rains. The rock of Gwalior, and the ranges in its vicinity, are of ochreous sandstone, capped in some places with basalt, which appears to have formerly universally overspread them, and the fragments of which lying at their bases, form slopes for a considerable distance up their sides. The sandstone of the hill-fort is arranged in horizontal strata, and its face presents so steep a fracture, as to form a perpendicular precipice, rising above the upper limit of the slope. Where the rock was naturally less precipitous, it has been so scarped as to be rendered perpendicular; and in some places the upper part considerably overhangs the lower. The greatest length of the rock, which is from north-east to south-west, is a mile and a half, the greatest breadth 300 yards. The height at the north end, where it is greatest, is 342 feet. On the eastern face of the rock, several colossal figures are sculptured in bold relief. A rampart runs round the edge of the rock, conforming to the outline of its summit; and as its height is uniform above the verge, its top has an irregular appearance. The entrance within the inclosure of the rampart is towards the north end of the east side; first, by means of a steep road, and higher up by steps cut in the face of the rock, of such a size and of so moderate a degree of acclivity, that elephants easily make their way up. This huge staircase is protected on the outer side by a high and massive stone wall, and is swept by several traversing-guns pointing down it; the passage up to the interior being through a succession of seven gates. The principal gate is called Hatipul, or the elephant's gate, from the figure of that animal sculptured over it. The citadel is at the north-eastern extremity of the inclosure, and has a very striking appearance. The outline of the great masses of the antique palace surmounted by kiosks, is strongly marked against the sky, and adjoining is a series of six lofty round towers or bastions, connected by curtains of great height and thickness. Along the eastern side of those buildings extends horizontally, in the upper part, a course of bricks or tiles of brilliant blue colour, like coarse porcelain; and the effect produced by this great vivid streak is singular, but not unpleasing. There are within the inclosure of the rampart several spacious tanks, capable of supplying an adequate garrison, though, according to a military author, 15,000 men would be required fully to man the defences. The old town of Gwalior is situate along the eastern base of the rock. It is of

considerable size, having a street a mile long, and has many good houses of stone; but is very irregularly built, and extremely filthy. It contains a very beautiful building of white sandstone, with a cupola covered with blue porcelain tiles, beneath which lie the remains of Muhammad Ghous, a famous sage, celebrated for his sanctity in the time of Akbar. The Lashkar, or stationary camp of the maharajah, is represented as extending several miles from the south-west end of the rock, and as being a place of considerable traffic and wealth; but the great reduction of the military force of the state must cause a diminution of the prosperity of this establishment. It has been described as a very filthy collection of rude buildings, even the residence of the maharajah being of mean exterior, and those of the rest, in appearance little better than hovels, though much wealth, the proceeds of a long course of rapine, was stored within them. There are scarcely any manufactures in Gwalior, except artillery-founding, and the making of gunpowder and fireworks for the prince and court.

According to the researches of Wilford, the fort of Gwalior was built in 773, by Surya-Sena, rajah of a small territory lying about the rock. Ferishta, however, assigns it a date antecedent to the commencement of the Christian era. In 1023, it was besieged by the celebrated Mahmood of Ghuznee, who found the attempt to capture it hopeless, and marched away, taking a present. After a long siege in 1196, it was taken by Bahauddin, or Kutbuddin Eibak, lieutenants of Shahabuddin, or Muhammad, of Ghor. In 1211, it was lost by the Mussulmans, but recovered in 1231, after a blockade for a year, by Shamsuddin Altamsh, the slave king of Delhi. Narsingh Rae, a Hindoo chief, taking advantage of the troubles produced by the invasion of Tamerlane in 1398, took Gwalior, which was not recovered by the Mussulmans until 1519, when it was retaken by Ibrahim Lodi, the Patan sovereign of Delhi; after whose defeat and death in battle against Baber, it was seized by a Patan adventurer. In 1526, Baber gained it by stratagem, and in 1543, after the expulsion of his son Humayun, it fell into the hands of his successful rival Sher Shah; but, after the return and re-establishment of Humayun, it was, in 1556, recovered by his successor Akbar, who made it the state prison for captives of importance. Here he confined, and subsequently put to death, his first cousin, Abulkasim, son of the ill-fated Kamran. Here also Aurungzebe confined his brother Morad, and shortly after put him to death. The same suspicious and cruel sovereign consigned to this prison the son of Morad, and his nephews Soliman and Sepehr Sheko, the sons of Dara, who here quickly found a grave. In the dismemberment of the empire of Delhi, Gwalior was seized by the Jat rana of Gohud. It subsequently changed hands, and in 1779 was garrisoned by Scindia, from whom it was taken by the forces of the East-India Company, on

the 3rd August, with little trouble and small loss. At midnight, ladders and all other auxiliaries for scaling having been prepared, the party for the attack was formed. Two companies of grenadiers and light infantry led the van, under Captain Bruce; Major Popham followed with twenty Europeans and two battalions of sepoy. A battalion, two guns, and a small body of cavalry, were ordered to march at two o'clock, to cover the retreat of the English party, in case of premature discovery, or, in the event of success, to prevent the garrison from escaping. At break of day, the van arrived at the foot of the scarped rock, the spies ascended by wooden ladders, and having made fast ladders of ropes, the troops followed. Some resistance was offered, but the garrison was intimidated by the unexpected attack, and the assailants were soon masters of the place. Transferred by the British government to the rana of Gohud, it was in 1784 recovered by Madhjee Scindia, from whom it was again taken in 1803, but restored in 1805, "from considerations [it was said] of friendship." Finally, in January, 1844, subsequently to the battle of Maharajpore, it was occupied by the Gwalior contingent, commanded by British officers; and thus has virtually been placed within the power of the British government. It has been determined that no further repairs shall be made to the fort. Distant S. from Agra 65 miles, S. from Delhi 175, W. of Calpee 100, N.W. of Allahabad 277, N.W. of Calcutta, by Allahabad, 772. Lat. 26° 18', long. 78° 15'.

GYA.—A town in the native state of Cashmere, or dominions of Gholab Singh, 128 miles N.E. from Chamba, and 144 miles N.E. from Kangra. Lat. 33° 39', long. 77° 50'.

GYCHAN, in native Gurhwal, a hamlet at the confluence of the two great torrents Roopin and Soopin, the united stream of which from this point bears the name of Tons. It is elevated 456 feet above the bed of the Tons, and 5,756 above the level of the sea. Lat. 31° 4', long. 78° 10'.

GYDER KHAIL, in the Daman division of the Punjab, a town situated 32 miles from the right bank of the Indus, 24 miles S.S.W. of the town of Peshawur. Lat. 33° 40', long. 71° 32'.

GYNDAJOOR, in the British district of Bijnour, lieut.-gov. of the N.W. Provinces, a village on the route from Moradabad to Hurdwar, and 25 miles N.W. of the former. Lat. 29° 10', long. 78° 40'.

H.

HACKNITWARRA.—A town in one of the recently sequestered districts of Hyderabad, or territory of the Nizam, 47 miles S. from Ellichpore, and 111 miles W.S.W. from Nagpore. Lat. 20° 30', long. 77° 38'.

HADJEE.—See A.JI.

HAFIZGANJ, in the British district of Bareilly, lieut.-gov. of the N.W. Provinces, a small town on the route from the town of Bareilly to Pillebheet, 16 miles N.E. of the former. There is a bazar, and also a weekly market. Lat. $23^{\circ} 30'$, long. $79^{\circ} 37'$.

HAGLEWADDY.—A town in the Mysore, 75 miles N. from Seringapatam, and 137 miles E.N.E. from Mangalore. Lat. $13^{\circ} 30'$, long. $76^{\circ} 49'$.

HAJEEGUNJE.—A town in the British district of Tipperah, lieut.-gov. of Bengal, 24 miles S.W. of Tipperah. Lat. $23^{\circ} 16'$, long. $90^{\circ} 52'$.

HAJEEOOR, in the Daman division of the Punjab, a town situated 27 miles from the right bank of the Indus, 98 miles S.W. by W. of the town of Mooltan. Lat. $29^{\circ} 20'$, long. $70^{\circ} 18'$.

HAJEEOOR.—A town in the British district of Mymensing, lieut.-gov. of Bengal, 36 miles W. by N. of Nusseerabad. Lat. $24^{\circ} 50'$, long. $89^{\circ} 51'$.

HAJEEOOR, in the British district of Allyghur, lieut.-gov. of the N.W. Provinces, a village on the route from the cantonment of Allyghur to that of Etawa, and 22 miles S.E. of the former. Lat. $27^{\circ} 37'$, long. $78^{\circ} 14'$.

HAJEEOOR, in the British district of Tirhoot, lieut.-gov. of Bengal, a town at the confluence of the Gunduck with the Ganges, and on the left bank of both rivers. It is on the route from Dinapore to Khatmandoo, 15 miles N.E. of former, 182 S. of latter. The Ganges is here crossed by ferry from Patna, which is immediately opposite. The place is much frequented by pilgrims, and from that circumstance has doubtless received the name, signifying pilgrim's town. Lat. $25^{\circ} 40'$, long. $85^{\circ} 17'$.

HAJIGUNJE, in the British district of Fureedpore, lieut.-gov. of Bengal, a town on the right or south-west bank of the Ganges, described by Heber as here six miles wide during the rainy season. Distance from the town of Fureedpore E. five miles. Lat. $23^{\circ} 36'$, long. $89^{\circ} 56'$.

HALABAK.—A town in the principality of Cashmere, or dominions of Gbolab Singh, 163 miles E. from Si.inagur, and 158 miles N.E. by N. from Kangra. Lat. $33^{\circ} 55'$, long. $77^{\circ} 46'$.

HALAN SYUDS, in Sind, a village on the route from Hyderabad to Sehwan, by way of Kotree, and 32 miles N. of the last-mentioned place. It is situate about a mile and a half from the right bank of the Indus. Lat. $25^{\circ} 54'$, long. $68^{\circ} 18'$.

HALEESHUR, in the British district of Baraset, lieut.-gov. of Bengal, a populous town situate on the left bank of the Hooghly river, and celebrated for the number of Sanscrit colleges, founded by a former rajah of Nuddea. Lat. $22^{\circ} 55'$, long. $88^{\circ} 23'$.

HALIPOOTRA, in Sind, a village on the route from Sehwan to Larkhana, and four miles N. of the former place. It is embosomed in high trees, and is situate two miles from the right bank of the Indus. Lat. $26^{\circ} 27'$, long. $67^{\circ} 54'$.

HALLA, in Sind, near the left or eastern bank of the Indus, is situate in a tract of no great fertility, the soil being impregnated with salt. The new town is larger and more wealthy than the old one, which is contiguous to it. There is here a much-frequented shrine of a reputed Mahometan saint. The bazar, which is partially roofed over, is well supplied, and considerable business is transacted there. Sindian caps, the general head-dress of all in the country except the Hindoos, are made here in great numbers, and of excellent quality. Halla new town is celebrated for its earthenware, the coarser kinds of which are manufactured from clay taken from the bed of the Indus. In the finer kinds, this material is mixed in a large proportion with ground flints: the decorations are very showy, and sometimes tasteful; the colours, which are obtained from the oxydes of copper, lead, or iron, being remarkable for brilliancy and richness. A sort of unctuous earth, called "chunniah," is obtained from lakes near the town, and is eaten in considerable quantities, especially by the women. Estimates of the population differ widely, and Burnes upon this point is not consistent with himself. In one place (vol. iii. 264), he states it at 2,000, and in the same volume (p. 227) at 10,000. The latter seems the more probable amount. Lat. $25^{\circ} 39'$, long. $68^{\circ} 24'$.

HALLAR, or **HALLAWAR**, in the peninsula of Kattywar, province of Guzerat, a district named from the Halla tribe of Rajpoots. It is bounded on the north by the Gulf of Cutch; on the north-east by the districts of Machoo-Kanta and Jhallawar; on the east by the district of Kattywar; on the south by the districts of Kattywar and Soruth; on the south-west by the district of Burda and the Arabian Sea; and on the west by the district of Okamundal, from which it is divided by a small runn or salt-marsh. It lies between lat. $21^{\circ} 39'$ — $22^{\circ} 50'$, long. $69^{\circ} 9'$ — $71^{\circ} 3'$; is about 130 miles in length from east to west, and 75 in extreme breadth. Its area may be stated at about 4,960 square miles. The greater part of this district belongs to the thakoors or chiefs of Naunagar, Gondul, Rajkot, Dhurul, and Kotra Sangani. The total population is estimated at 358,560; an amount which, compared with the area, indicates a relative density of seventy-two to the square mile. The annual tribute by the various chiefs and landholders is stated to be 345,778 rupees; of which the sum of 161,598 rupees is paid to the British government, 167,495 to the Guicowar, and 16,685 to the nawab of Joonaghur.

HALLOWAL, in the Reechna Doob division of the Punjab, a town situated nine miles from the right bank of the Ravee, 53

miles N.E. of the town of Lahore. Lat. 32° 10', long. 74° 45'.

HALLWY.—A town in the British district of Bellary, presidency of Madras, 53 miles N. by E. of Bellary. Lat. 15° 52', long. 77° 10'.

HAMEEDNUGGUR.—A town in the British district of Behar, lieutenant-gov. of Bengal, 34 miles N. by W. of Sherghotty. Lat. 25° 2', long. 84° 43'.

HAMEERGURH.—A town in the Rajpoot state of Oodeypoor, 91 miles S. from Ajmeer, and 73 miles W. from Kotah. Lat. 25° 10', long. 74° 43'.

HANAGHAT.—A town in the British district of Nuddea, lieutenant-gov. of Bengal, 44 miles N. by E. of Calcutta. Lat. 23° 11', long. 88° 33'.

HANGO, or HUNG, in Bussahir, a village of Koonawur, in the Tartar division called Hungrung, is situated near the north-eastern base of the Hungrung Mountains. It consists of three or four hamlets or small subdivisions, and is situated at the head of a fertile and cultivated dell, a mile long, and about half that breadth, bearing luxuriant crops of corn and pulse, and watered by three never-failing streams, which flow down it to the river Li. Hango is noted for a temple, of high repute among the natives, and apparently devoted to a mongrel superstition, half Brahminical and half Lamaic. It is a large building, crowded inside with grotesque idols, the principal of which is a large earthenware figure of a hideous man, wearing a diadem of human skulls, and an enormous necklace of the same, reaching down to the ground, and in his right hand the hilt of a sword, in his left a human skull, cut down to the form of a drinking-cup. An enormous serpent, with protruded tongue, is twined round his neck, and is of such a length as to reach the ground with its head. The idol holds in its arms a woman, whose head is also crowned with a chaplet of skulls, and who bears in her hand a skull, formed into a drinking-cup, the group being apparently intended to represent incarnations of the deities in a state of wrath. The village contains thirty families of Tartars and a few nuns, and, according to Herbert, gives name to the surrounding district of Hungrung. Elevation above the sea 11,400 feet. Lat. 31° 49', long. 78° 34'.

HANLE.—A town in the native state of Cashmere, or dominions of Gholab Singh, 154 miles N.E. from Simla, and 166 miles E. by N. from Chamba. Lat. 32° 43', long. 78° 56'.

HANSEER.—A town in the British district of Hurreesnah, lieutenant-gov. of the N.W. Provinces. It is situated on the watercourse made, in 1856, by Feroz Toghluq, king of Delhi, who, in some places clearing and deepening the bed of the Chitang torrent, and in others excavating a channel, conducted a branch from the Delhi Canal westward beyond Hissar, until it either disembogued into the Gagur, or was lost by

evaporation or absorption in the arid waste. Hansee appears to have been an important place as early as 1036, when Massaoud, the son of the renowned Mahmud of Ghuznee, invaded India; as, according to Ferishta, "the Hindoos reckoned it impregnable, and were taught to believe that it could never fall into the hands of the Mahomedans. On this occasion, the India soothsayers, like those of other nations, deceived their followers, for, in the space of six days, the king escalated the place, and took it by storm. Herein he found immense treasure." Tieffenthaler, writing about the middle of the last century, describes it as having a ruinous brick-built fort, situate on a hill. The canal must also, at that time, have been in a ruinous state, as the place suffered from want of water insomuch that there was only one crop in the year, and that dependent on the periodical rains. In 1798, when for a short period it was the capital of the adventurer George Thomas, it was supplied with water from wells, none other being procurable for above a dozen miles. "Here," says Thomas, "I established my capital, rebuilt the walls of the city, which had long since fallen to decay, and repaired the fortification. As it has been long deserted, at first I found difficulty in procuring inhabitants, but by degrees, and gentle treatment, I selected between five and six thousand persons, to whom I allowed every lawful indulgence. I established a mint, and coined my own rupees, which I made current in my army and country; cast my own artillery, commenced making muskets, matchlocks, and powder." In 1801, Thomas, being besieged here by a vastly superior force of Maharrattas, under the French adventurer Perron, evacuated the place, and took refuge in the territory of the East-India Company. The population has been recently returned at 9,112. The road to the south-east of the town, or in the direction of Delhi, is good; to the west it is also good, running the whole way to Hissar along the bank of the canal. Hansee is distant N.W. from Delhi 89 miles, N.W. from Calcutta 989 miles. Lat. 29° 6', long. 78° 3'.

HANSOTE, in the British district of Broach, presidency of Bombay, a town near the south-eastern bank of the estuary of the river Nerbudda. Population 5,000. Distance from Surat, N., 28 miles. Lat. 21° 32', long. 72° 50'.

HANSOUTEE.—A river rising in lat. 27° 58', long. 76° 7', in the native state of Jhujhur, a few miles south of the town of Narnol, and flowing in a north-easterly direction for seventy-five miles, alternately through Jhujhur and the British territory of Goorgaon, and for twenty-two miles through that of Delhi, falls into the Delhi Canal a few miles north of the town of Delhi, in lat. 28° 40', long. 77° 15'.

HAPOTE.—See HAUPUR.

HARAMUK.—A lofty summit in the range bounding Cashmere on the north. In a depression on the northern declivity is a small

lake, called Gunga Bul,—“the place of the Ganges,” which, like many other reservoirs of water, is held in high veneration by the Hindoos. The elevation of Haramuk above the level of the sea is estimated by Vigne at 13,000 feet. Lat. $34^{\circ} 26'$, long. 75° .

HARAPA.—A village of the Punjab, close to the left bank of the Ravee, and seated amid very extensive ruins, the most striking being the relics of a large brick fortress. This is considered by Masson to be the site of the Sangala of Arrian, where the Indians made such an obstinate defence against Alexander; but this opinion is regarded by eminent authority as open to question. Professor Wilson observes, “Whether they [the Macedonians] followed the course of the Iravati [Ravee] to Harapa, may be reasonably doubted.” Harapa is in lat. $30^{\circ} 40'$, long. $72^{\circ} 53'$.

HARAWUG.—A castle in the north of the Punjab, on the route from Lahore to Cashmere by the Banihal Pass, and 28 miles S. of the last-mentioned place. It is built of wood, in a ravine on the right bank of a stream which, at a short distance below, falls into the Chenaub. Harawug is in lat. $33^{\circ} 12'$, long. $75^{\circ} 3'$.

HARIHARPOOR, in the British district of Goruckpore, lieut.-gov. of the N.W. Provinces, a petty market-town on the Jamura, a small river, a feeder of the Rapti. According to Buchanan's report, thirty years ago, it contained 150 houses; and allowing six persons to each, consequently a population of 900. Distant S.W. from Goruckpore cantonment 22 miles. Lat. $26^{\circ} 45'$, long. $83^{\circ} 2'$.

HARIKE, in the Punjab, a village situate on the right bank of the Ghara river, three miles below the confluence of the Sutluj and Beas. The name Ghara is in this instance given to the river with some latitude, as it is not usually so called above a spot twelve miles below Harike. The site of the village is on the high bank of the river, and, when the water is low, distant a mile and a half from the ferry. Though a small place, the trade is important, and twenty years ago, nearly the whole traffic with Hindostan, from Afghanistan, Kashmir, and the Punjab, passed through it. There is besides great local traffic between the districts in its immediate vicinity on both sides of the river. Harike is in lat. $31^{\circ} 10'$, long. $74^{\circ} 59'$.

HARIPOOR, in the Punjab, a town on the great route by the Dub Pass into Cashmere, is a populous and thriving place, with a handsome and well-supplied bazar. Von Hügel considers it one of the wealthiest places in the Punjab, the streets being thronged with a busy and cheerful crowd, exhibiting evident indications of prosperity, and the shops supplied with all that can contribute to the gratification of Indian taste. It is situate on the river Dor, which, about ten miles westward, falls into the Indus near Torbela. Lat. $34^{\circ} 14'$, long. $72^{\circ} 57'$.

HARIPOOR, in the north-east of the

Punjab, among the lower mountains of the Himalaya, is a fort, surrounded by a small town, which contains a good and well-supplied bazar. The name signifies the town of Hari, one of the incarnations of Vishnu, and Hindoo superstition here flourishes in the highest degree of vigour. Haripoor is in lat. $31^{\circ} 56'$, long. $76^{\circ} 11'$.

HARIPOOR, in the British district of Jaunsar, at the southern frontier, where it joins the Dehra Doon, a village in the bifurcation at the confluence of the Tons and Jumna. Though the Tons loses its name, and the united stream continues to be called the Jumna, the former is the larger, its discharge per second, when surveyed by Hodgson, being 2,827 cubic feet, and that of the latter 1,045. Elevation above the sea 1,686 feet. Lat. $30^{\circ} 30'$, long. $77^{\circ} 54'$.

HARIPOOR, in Cashmere, a small town situate in the Punch Pass from the Punjab into that valley, and near the spot where the pass opens into the low ground of Cashmere. It is close to the right bank of the Rembeera, a considerable feeder of the Veyut or Jhelum. Hence the Rembeera is sometimes called the River of Haripoor. The town is small and mean, remarkable only for its picturesque site beneath the Pir Panjal mountain, which on the south rears its towering summit, covered with snow during the greater part of the year. Lat. $33^{\circ} 40'$, long. $74^{\circ} 51'$.

HARNHULLY.—A town in the Mysore, 64 miles N.W. by N. from Seringapatam, and 96 miles E.N.E. from Mangalore. Lat. $13^{\circ} 14'$, long. $76^{\circ} 16'$.

HAROWTEE.—See KOTAH.

HARREEPOOR.—See AREEPOOR.

HARRIORPOOR.—A town in the Cuttack mehal of Mohurbunge, 30 miles N.W. from Balasore, and 56 miles S.W. from Midnapoor. Lat. $21^{\circ} 51'$, long. $86^{\circ} 46'$.

HARRISON'S ISLAND.—A small island lying off the coast of Arracan, situate about ten miles from the shore, and among the cluster of islands to the south of Ramree. Lat. $18^{\circ} 40'$, long. $94^{\circ} 2'$.

HARU, a small river of the Punjab, rises at the base of the Himalaya, and receiving the Nilab from the north-east, and several smaller streams, flows into the Indus on the eastern side, a few miles below Attock, after a course of about sixty miles. This confluence is in lat. $33^{\circ} 49'$, long. $72^{\circ} 16'$.

HASHTNUGGUR, in the Daman division of the Punjab, a town situated on the left bank of the Lundye, 20 miles N. of the town of Peshawur. Lat. $34^{\circ} 15'$, long. $71^{\circ} 45'$.

HASSAN, in the territory of Mysore, a town on the route from Bangalore to Mangalore. In 1690 it was conquered by Chikka Deo, rajah of Mysore, and incorporated with his dominions. Distant from Bangalore, W.,

102 miles; from Mangalore, E., 88. Lat. 13°, long. 76° 9'.

HASSAN ABDAL, in the Punjab, so called from containing the tomb of a reputed Mahometan saint of that name. It is situate in a delightful valley, watered by numerous springs, which gush from among the rocks. Here are the ruins of a pleasure-ground and small palace, tastefully formed by the Mogul emperor Akbar, and though much decayed, displaying yet an exquisite combination of elegance and refined luxury. Lat. 33° 48', long. 72° 45'.

HASSAN KE GHURREE.—A town in the British district of Shikarpoor, province of Sind, presidency of Bombay, 47 miles N. of Sukkur. Lat. 28° 20', long. 68° 44'.

HASTINGS (FORT), in the British district of Kumaon, lieutenant-gov. of the N.W. Provinces. It is a small well-built fort, on the summit of a conical hill, three miles and a half W. of Lohughat or Rikhesur. Water can be obtained only from the bottom of the hill, at a distance of half a mile of steep descent, so that the post, if regularly invested, must speedily fall. The artillery attached to Fort Hastings consists of two field howitzers, two brass six-pounders, four iron twelve-pounders, with an ample supply of ammunition. Elevation above the sea 6,240 feet. Lat. 29° 25', long. 80° 5'.

HATEE, in Baghelcund, a town in the native state of Rewah, on the route from Mirzapoor to Lohogaon, 110 miles direct S.W. of Mirzapoor, 58 S.E. of Banda. Elevation above the sea 1,070 feet. Lat. 24° 42', long. 80° 53'.

HATEE OOSTEE.—A town in the British district of Bhagulpoor, lieutenant-gov. of Bengal, 63 miles N.N.W. of Bhagulpoor. Lat. 26°, long. 86° 31'.

HATH KA PEEPLEA.—A town of Malwa, in the native state of Dewas, 28 miles E. from Indore, and 95 miles W. from Hoosungabad. Lat. 22° 45', long. 76° 17'.

HATIMABAD, in the British district of Bolundabuhur, lieutenant-gov. of the N.W. Provinces, a village on the route from Muttra to Meerut, and 48 miles S. of the latter. Lat. 28° 21', long. 77° 56'.

HATIYA.—A town in the native state of Nepal, on the right bank of the river Arun, and 97 miles E. by N. from Khatmandoo. Lat. 27° 58', long. 86° 50'.

HAT RAS, in the district of Allypore, lieutenant-gov. of the N.W. Provinces, lies on the route from the cantonment of Agra to that of Allypore, 33 miles N. of the former. It is built in the form of a square of about 500 yards, and is surrounded by a mud wall and a very deep dry ditch. The old fort is situate half a mile due east of the town, and though now a heap of ruins, was once regarded as formidable. When approached by the British troops in 1804, while in pursuit of Holkar's army in the Doab, Thorn describes it as built on a small hill, with a gradual ascent; and he continues: "In the

centre of it stands a very high brick building, considerably overtopping the surrounding bastions. The glacis is about 100 yards wide; and a renny-wall (*fausse-braye*), with a deep, dry, and broad ditch behind it, surrounds the fort." The owner, a talookdar or renter of the surrounding district, on the occasion of Holkar's invasion, as well as at other times, acted with hostility towards the British; and at length his assumption of independence was found so mischievous and alarming, especially in the threatening state of affairs at the commencement of the Mahratta war in 1817, that it was found necessary to dislodge him. Dya Ram, who held the place at that time, was accordingly summoned to surrender the fort, and allow measures to be taken for its being dismantled. Trusting in the defences, which had been strengthened in imitation of those of the neighbouring British fort of Allypore, by preparing a covered way, raising a glacis, and diminishing the height of the ramparts, the occupant refused compliance; whereupon, on the 23rd February, 1817, the town was breached and evacuated; and on the 1st of March fire was opened on the fort from forty-five mortars and three breaching-batteries of heavy guns. At the close of the same day, a magazine in the fort exploded, and caused such destruction of the garrison and buildings, that Dya Ram, terror-struck, abandoned the place in the course of the night, and it was forthwith dismantled, as well as the neighbouring fortress of Mursan, and some others. The population of this town, always considerable, has much increased since its direct subjection to British sway, the number of its inhabitants in 1853 being returned at 20,504. It is the chief mart for the cotton of the neighbouring tracts, which is forwarded by easy land-carriage to Furruckabad, on the Ganges, and conveyed by that river to the lower provinces. Distance S.E. from Delhi, by Allypore, 106 miles; N.W. from Calcutta 815. Lat. 27° 36', long. 78° 9'.

HATTIA RIVER.—One of the principal mouths of the river Megna.—See GANGES RIVER.

HATTIA.—An island lying at the mouth of the Megna river, and comprised within the jurisdiction of the British district of Bulloah, lieutenant-gov. of Bengal. Its centre is in lat. 22° 35', long. 91° 8'.

HATTOD.—A town in the native state of Indore, or territory of Holkar, 10 miles N.W. from Indore, and 129 miles W. from Hoosungabad. Lat. 22° 47', long. 75° 44'.

HATTUH.—A town in the British province of Nagpoor, 88 miles N.E. from Nagpoor, and 49 miles E.S.E. from Seuni. Lat. 21° 46', long. 80° 20'.

HAULKOORKY.—A town in the Mysore, 65 miles N. by W. from Seringapatam, and 109 miles E.N.E. from Mangalore. Lat. 13° 19', long. 76° 26'.

HAUMP, in the Rewa Caunta division of Guzerat, presidency of Bombay, a town situate on the left bank of the Nerbudda river, and 73 miles E. by N. from Broach. Lat. 22°, long. 74° 6'.

HAUNSEE, in the Reechna Dooab division of the Punjab, a town situated on the left bank of the Chenaub, 70 miles W.N.W. of the town of Lahore. Lat. 32° 3', long. 73° 6'.

HAUPUR, in the British district of Meerut, lieut.-gov. of the N.W. Provinces, a town situate on the route from the town of Meerut to Muttra, and 20 miles S. of the former. It is of considerable size, and has a population of 13,598. The place has been selected as the locality of one of the government studs, which has obtained celebrity for the character of the horses passed into the different branches of the service. Lat. 28° 44', long. 77° 51'.

HAVALEE, in the Baree Dooab division of the Punjab, a town situated 10 miles from the right bank of the Sutlej, 90 miles S.W. of the town of Lahore. Lat. 30° 26', long. 73° 34'.

HAVEYLEE, in the Jetch Dooab division of the Punjab, a town situated on the left bank of the Jhelum, 107 miles W. by N. of the town of Lahore. Lat. 31° 48', long. 72° 23'.

HAWULBAGH, in the British district of Kumaon, lieut.-gov. of the N.W. Provinces. It is situate five miles north of Almora, and on the left bank of the Kosilla, running at a considerable depth below, with a deep, black, and violent current. The site is picturesque and fine, and as the climate is warmer than that of Almora, in consequence of an elevation less by 1,900 feet, it is generally the residence of the civil officers in charge of that town and of the district of Kumaon. There is also here a cantonment for the provincial battalion. Elevation above the sea 3,889 feet. Distance N.W. from Calcutta 963 miles. Lat. 29° 38', long. 79° 40'.

HAYATNUGAR, in the district of Sultanpoor, territory of Oude, 80 miles S.E. of Lucknow. Butter estimates the population at 100, half of whom are Mussulmans. Lat. 26° 15', long. 82° 13'.

HAYCOCK ROCK, situate off the shore of Arracah, in lat. 17° 10', long. 94° 31'.

HAYES ISLAND, off the coast of Tenasserim, 93 miles from Tenasserim: length four, and breadth two miles. Lat. 11° 52', long. 97° 45'.

HAZAREEBAGH.—A British district subject to the political agent for the south-west frontier, called also Ramgurh, *which see*.

HAZAREEBAGH, the principal place of the district of Hazareebagh or Ramgurh, a town on the route from Calcutta to Benares, 239 miles N.W. of the former, 189 S.E. of the latter. Jacquemont, who visited it in 1829, styles it a large village. Its principal bazar is regularly built, and some of the shops and

houses, which are all of mud, are two stories high. It was formerly a place of more importance than at present, having been for some time the head-quarters for a regiment of the Queen's infantry, when a church was built, on the supposition of the permanent cantonment at that place, of an European regiment. In 1845, the station ceased to be a cantonment for European troops, and now is occupied by a detachment of the Ramgurh native battalion. It is also the station of a principal assistant to the Governor-General's agent for the south-west frontier, and contains a jail for civil and criminal prisoners. Hazareebagh is situate in an extensive and elevated plateau, overspread with forest and jungle, and having in many places the remains of mango-groves and other regular plantations, indicating the country to have been formerly much better peopled and cultivated. Its present desolate state is probably attributable to the devastations of the Mahrattas in the middle of the eighteenth century. Hazareebagh was selected as the residence of the ex-ameers of Sinde. Subsequent arrangements were made, under which two of the four brothers were permitted to remove to Lahore. Elevation above the sea 1,750 feet. Lat. 24°, long. 85° 24'.

HAZOO.—A town in the British district of Camroop, province of Assam, 15 miles W.N.W. of Gowhaty. Lat. 26° 15', long. 91° 31'.

HAZRUTGUNJ, in the British district of Furruckabad, lieut.-gov. of the N.W. Provinces, a town near the northern frontier, towards Mynpooree, and 30 miles N.W. of the city of Furruckabad. Lat. 27° 39', long. 79° 16'.

HEEAT.—A town in the Rajpoot state of Jodhpoor, on the left bank of one of the branches of the Rairee river, and 52 miles S.E. from Jodhpoor. Lat. 25° 53', long. 73° 50'.

HEEPURGEH.—A town in the British district of Sholapoor, presidency of Bombay, 23 miles E. of Beejapoor. Lat. 16° 48', long. 76° 8'.

HEERAPOOR, in the British territory of Saugur and Nerbudda, lieut.-gov. of the N.W. Provinces, a town on the route from Ramgurh to Baitool, 47 miles S.W. of the former. Lat. 22° 30', long. 80° 21'.

HEERAPOOR, in the British district of Mynpooree, lieut.-gov. of the N.W. Provinces, a village between the cantonment of Allygurh and that of Mynpooree, and 32 miles N.W. of the latter. Lat. 27° 33', long. 78° 44'.

HEERAPORE, in Bundelcund, a small town in a district of the native state of Churkharee, on the route from Banda to Saugor, 120 miles S.W. of the former, 52 N.E. of the latter. It has a bazar, and water from wells and a tank. By the Hirapur Pass, half a mile S.W. of the town, the route from Banda to Saugor ascends from the plains of Bundelcund to the plateau on the range styled by Franklin

the Pauna Hills. The pass "is about a mile in length, and easy." Lat. $24^{\circ} 23'$, long. $79^{\circ} 16'$.

HEERIOOR, in the Mysore, a town situate on the right bank of the small river Vedavati, a perennial current of fine water. It once possessed 2,000 houses, an outer and inner fort, and several temples; but the place was ruined by the Mahrattas, and the calamities inflicted by them were completed by a dreadful famine which succeeded, and which swept away nearly all the inhabitants, the small remainder flying, and leaving the town in desolate waste. It recovered very slowly, and has never attained a degree of prosperity at all to be compared with its former state. Distance from Seringapatam, N., 100 miles; Bangalore, N.W., 94. Lat. $13^{\circ} 57'$, long. $76^{\circ} 41'$.

HEGGADVENCOTTA.—A town in the Mysore, 33 miles S.W. from Seringapatam, and 56 miles E. by N. from Cannanore. Lat. $12^{\circ} 7'$, long. $76^{\circ} 23'$.

HELUJA-KA-GOTE, in Sind, a small town on the route from Tatta to Hyderabad, by Kotree, and 32 miles S. of the last-mentioned place. It is situate near the eastern extremity of the Kunjur Dund, a considerable expanse of brackish water, abounding in fish, and surrounded by low sandstone hills. Close *Shikarghas*, or "hunting-preserves," intervene between the town and the right bank of the Indus, distant about a mile and a half to the east. Plenty of forage may be obtained, and water is supplied from a small pond near the town. Lat. $24^{\circ} 54'$, long. $68^{\circ} 8'$.

HELWANK.—A town in the British territory of Sattara, presidency of Bombay, 30 miles S.W. of Sattara. Lat. $17^{\circ} 20'$, long. $73^{\circ} 47'$.

HEMMAUDY.—A town in the British district of South Canara, presidency of Madras, 56 miles N. by W. of Mangalore. Lat. $13^{\circ} 41'$, long. $74^{\circ} 46'$.

HEMTABAD, in the British district of Dinajpore, lieut.-gov. of Bengal, a town on the left bank of the river Coolick, 25 miles W. of the town of Dinajpore. That it was formerly a place of importance, appears as well from tradition as from numerous ruins existing in its vicinity. Those of more remote date are considered to be of an era anterior to Mussulman sway. One of the most entire architectural relics of the latter period is a mosque, surmounted by seven small cupolas; the whole building, though of ungraceful construction, manifesting elaborate and costly workmanship. Contiguous is another building, denominated *Takhti Husayn Padshah*, or "Throne of King Hoseyn," formerly monarch of Bengal. It consists of a truncated pyramid, twenty feet high, having on its summit a considerable area, in the centre of which is a square, on which Husayn sat to witness public spectacles. Several tombs and shrines of deceased persons, regarded by Mussulmans as saints, are dispersed over the area. *Hemtabad* is in lat. $25^{\circ} 38'$, long. $88^{\circ} 12'$.

HENERY ISLAND.—See **ONDAREE**.

HENNAVUTTY, in the Mysore, a river rising near the western frontier, on the eastern declivity of the Western Ghats, and in lat. $13^{\circ} 12'$, long. $75^{\circ} 44'$. It flows for thirty-five miles south-eastward, to Santapoor, where it turns eastward, and thence holds a tortuous course, but generally in the direction last mentioned, for fifty miles, to Sagra. At that place it turns south-eastward, and continues to flow in that direction for thirty-five miles, to its fall into the Cauvery, on the left side of the latter river, near Kistnaraajpore; its total length of course being 120 miles. It is officially described as a valuable stream, never quite dry.

HENZADA.—A town of Eastern India, in the British province of Pegu, on the right bank of the Iraddy, and 65 miles W. from Pegu. Lat. $17^{\circ} 40'$, long. $95^{\circ} 18'$.

HEONLA, a river in the British district of Kumaon, lieut.-gov. of the N.W. Provinces, rises in the most southerly range of mountains of the Himalaya system, and in lat. $29^{\circ} 55'$, long. $78^{\circ} 40'$. Its direction is generally north-westerly, and after a course of about twenty-five miles it falls into the Ganges, on the left side, in lat. $30^{\circ} 6'$, long. $78^{\circ} 26'$. Webb forded it in April, five miles above its mouth, and found it forty yards wide and sixteen inches deep, with a moderately rapid current.

HERDOSE.—A town in the Southern Mahratta jaghire of Bore, situate on the right bank of one of the branches of the Neera river, and 26 miles S. from Poonah. Lat. $18^{\circ} 4'$, long. $73^{\circ} 42'$.

HERRINKAIRO, in the British territory of Saugur and Nerbudda, lieut.-gov. of the N.W. Provinces, a town on the route from Hoesungabad to Ellichpore, 17 miles S.S.W. of the former. Lat. $22^{\circ} 30'$, long. $77^{\circ} 40'$.

HERRUN, a small river, rises in the British territory of Saugur and Nerbudda, and in lat. $23^{\circ} 30'$, long. $80^{\circ} 26'$. It holds a sinuous course, but generally south-west, of about ninety miles, and falls into the Nerbudda, on the right side, at Sacar, in lat. $23^{\circ} 4'$, long. $79^{\circ} 26'$. At the confluence, the Nerbudda has already attained such magnitude as to be 600 yards in width.

HETTOURA.—See **ETOUNDA**.

HEWEEKEIR.—A town in one of the recently sequestered districts of Hyderabad, or dominions of the Nizam, 42 miles W. from Ellichpore, and 164 miles E. by N. from Malligaum. Lat. $21^{\circ} 7'$, long. $76^{\circ} 57'$.

HEWERKAIR, in the British territory of Saugur and Nerbudda, lieut.-gov. of the N.W. Provinces, a town on the route from Gawilgurg to Nagpore, 70 miles W. by N. of the latter. Lat. $21^{\circ} 22'$, long. $78^{\circ} 6'$.

HEWRA, or **UHEERA**, in the British district of Poona, presidency of Bombay, a village the vicinity of which has been selected for the site of one of the government botanical gardens.

Distant 27 miles N. from Poona. Lat. $18^{\circ} 52'$, long. $73^{\circ} 45'$.

HIDDAGOTE.—A village of Sindé, on the route from Sehwan to Larkhana, and nine miles N. of the former place. The road north and south is rendered inconvenient by numerous watercourses, which aid the cultivation of this fertile and populous tract. The village is situated about a mile from the right bank of the Indus. Lat. $26^{\circ} 32'$, long. $67^{\circ} 53'$.

HIDGELLEE.—A British district situate within the jurisdiction of the presidency of Bengal. It is bounded on the north-east by the Hoogly river, separating it from the British districts of Hoogly and the Twenty-four Pergunnahs; on the south-east by the river Hoogly and the Bay of Bengal; on the west by the Balasore division of Cuttack, and by the British district of Midnapore. It lies between lat. $21^{\circ} 36'$ — $22^{\circ} 22'$, long. $87^{\circ} 22'$ — $88^{\circ} 12'$, and has an area of 1,014 square miles. It has a considerable length of coast, commencing at its south-western extremity, in lat. $21^{\circ} 36'$, long. $87^{\circ} 26'$, and washed by the Bay of Bengal for twenty miles, as far as the mouth of the small river Mahona, where the estuary of the Hoogly may be considered to commence. The shore of this estuary continues to form the boundary of the district for eleven miles in a direction north-east, to the mouth of the Russoolpoor river; and, in the same direction, for seventeen miles, to the mouth of the Huldee; thence, still north-east, for twelve miles, to Diamond Point, where it turns north-westward for eighteen miles, to Tumlook. The inside channel, giving access from the Bay of Bengal to the Hoogly, extends along the whole of this coast as far as the mouth of the Roopnarain. This was formerly the deepest and most-frequented channel; and Kedgerree, about eight miles above, or north-east of the Russoolpoor river, was much used as an anchorage for the largest ships; but of late years the channel has become silted up, so as to have not more than two or three fathoms water, and is now frequented only by country vessels. The Roopnarain does not appear to be navigable for large ships, and the flood-tide setting strongly up into it, many vessels making for the Hoogly, on their way to Calcutta, have been swept up the shallow estuary and lost. Besides the Hoogly, the Roopnarain, and the Russoolpoor river, the only stream of importance belonging to the district is the Huldee, which, rising in Midnapore, crosses the north-western frontier of this district, and, holding a course easterly for about thirty-five miles, falls into the estuary of the Hoogly. The streams above mentioned, though nearly dry during the greater part of the year, contribute largely to swell the Hoogly during the periodical rains. A considerable quantity of fine salt is manufactured by a rude but effective process. The sea along the coast is remarkably productive, and the fisheries are pursued with eagerness and success. The climate, especially in the more depressed and

moist parts, is very unhealthy even to the natives, who are greatly affected by elephantiasis, dysentery, agues, and fevers. Rice is the principal crop, and is produced of a large size, and in great luxuriance and abundance, but is considered inferior to the average produce of Bengal and Behar. The other crops are sugarcane, tobacco, pulse, cucurbitaceous plants, millet, mustard, castor-oil plant, and other oil-yielding productions, hemp, safflower (*Carthamus tinctorius*), sweet potatoes, capsicum, and various potherbs. The cocoanut-palm and the toddy-palm (*Borassus flabelliformis*), from the fermented juice of which an ardent spirit is distilled, grow in the maritime tracts. There are no manufactures of any importance, unless that of salt be considered as such. The population is given under the article BENGAL. The only routes are—1. From north-east to south-west, from Calcutta to the town of Contai or Hidgellee; 2. from south-east to north-west, from the town of Hidgellee to that of Midnapore. This district was included in the grant of the dewanny of Bengal, Behar, and Orissa, made to the East-India Company by the emperor of Delhi, in August, 1765.

HIDGELLE.—A town in the British district of the same name, under the presidency of Bengal. It is situate on the right or western shore of one of the entrances of the Hoogly, called the Inner Channel, and at the mouth of a small river falling into it. The civil establishment of the district appears to have been removed to the town of Contai. Distance from Calcutta, S.W., 48 miles; from Midnapore, S.E., 82. Lat. $21^{\circ} 49'$, long. $87^{\circ} 50'$.

HIGH ISLAND.—A small island about five miles from the mainland of Arracan, in lat. 17° , long. $94^{\circ} 30'$. There is another of the same name in lat. $16^{\circ} 38'$, long. $94^{\circ} 20'$.

HILSAH.—A town in the British district of Patna, lieut. gov. of Bengal, 21 miles S.S.E. of Patna. Lat. $25^{\circ} 17'$, long. $85^{\circ} 22'$.

HILL STATES.—Under this name are included a number of small sovereignties or chieftainships in the Cis-Sutlej territory, all of which appear to have possessed some degree at least of independence, till overrun and subjugated by the encroaching power of the Goorkhas. On the breaking out of the war with Nepal in 1814, Sir David Ochterlony issued a proclamation inviting the various chiefs to co-operate with the British, and promising to such as should satisfactorily comply with the call, confirmation in their hereditary possessions, and protection from future attempts at aggression. A few only entitled themselves to the benefits held out: some had fled from the oppression of their invaders, some kept back from fear, and probably some distrusted the promises of the British government, and were apprehensive that by compliance with the required conditions, they should but exchange one tyranny for another. The success of the British army removed all ground for hesitation,

and put an end to the opportunity of choosing between the Goorkhas and their conquerors. All the chieftains now became candidates for the exercise of either the justice or the clemency of the triumphant power, and the liberality of the British government was manifested in admitting claims which had been justly forfeited, and restoring possessions which the fortune of war had placed at its disposal. A part of Gurwhal was restored to its fugitive rajah; the remainder, consisting of the districts situate to the eastward, above the confluence of the Mandakini and the Aluknunda, together with the Dehra Dhoon, the pergunnah of Raeengurh, Subathoo, and Sewah, were retained by the victors, as was also the pergunnah of Sundock, in which is a cantonment for British troops. Burrowlee passed to the rajah of Nalagurh or Hindoor, in exchange for Malown, occupied as a British post. Bughat was dismembered, and a portion disposed of to the rajah of Patteeala; the remainder has since lapsed to the paramount power, from failure of heirs. A claim, however, to the succession has been recently preferred by a first cousin of the last two chiefs. The claim was not allowed, but a discretionary authority was given to the local government either to retain the estate, or, if more expedient, to bestow it on the claimant by a new sunnud: this was in 1849. The former alternative was adopted, and Bughat is now a British possession. Keyonthul, like Bughat, was subjected to the process of dismemberment, and the excised part was transferred to the rajah of Patteeala. In consideration of this alienation, the remainder of the Keyonthul state is excused the payment of tribute. At a later period, Raeengurh, which had been reserved by the British government as a military post, was made over to the ruler of Keyonthul, in exchange for Simla. Kothkai, in consequence of long and irreclaimable misgovernment, was in 1828 annexed to the British dominions. The ruler of Ootrach or Turoch, from the like cause, but more than ten years later, incurred the penalty of confiscation, and the territory was incorporated with Joobul. The states now recognised as having a distinct existence are the following:—Bhagul, Beejah, Beejee, Bulsun, Bussahir, Dhamie, Dhorcatee, Ghurwal, Hindoor or Nalagurh, Joobul, Keyonthul, Koomharsin, Koonyhar, Kothar, Kuhlloor or Belaspore, Maneo-Majra, Mangul, Muhlog, and Sirmoor Nahun. The area of the whole is 10,054 square miles; the entire population about 531,020. Each will be found noticed in its respective place under the alphabetical arrangement, as will also the portions of territory in these districts originally retained, or subsequently acquired by the British government.

HIMALAYA.—A vast assemblage of mountains, stretching in an irregularly curved line from the defile above Cashmere, on the north-west, through which the Indus penetrates into the plains of the Punjab, and separates the

range from the mountains of Hindoo Koosh, to the southern bend of the Sampo or Dihong on the east, previous to its junction with the Brahmapootra. This stupendous mass extends over 22° of longitude, its western extremity lying in long. 73° 23', and its eastern in long. 95° 23'.

In so brief a sketch as necessity compels, it is impracticable to go beyond an outline of the more noticeable facts of this remarkable region; and it is necessary to premise, that the view must be restricted in a great degree to the southern slope of the mountains, as that which constitutes the limit of India on the north. To extend inquiry to the Tibetan side, would exceed the proper bounds of the work; while, to carry research into the wide variety of subjects which might be introduced, as into the various branches of natural history, or into the habits, languages, history, and present circumstances of the inhabitants, would swell the article to a length disproportioned to the place which it should occupy in a book embracing so wide a field. Some information on these points will, moreover, be found under other heads; among which, the reader may be referred to the articles Kumaon, Gurwhal, and Bussahir. It would, however, be unjust to refrain in this place from noticing a very admirable, though short tract, by Dr. Hooker, "On the Climate and Vegetation of the temperate and cold regions of East Nepal, and the Sikkim and Himalaya Mountains;" in regard to meteorology and plants of the parts proposed to be illustrated, it is most valuable, and the more so, as it is the result of the personal observations of the learned author.

About midway between the limits above defined, and in the vicinity of Lake Manasarowar, is the southern extremity of the mountain-range, which, extending from the north-west into Thibet, separates the drainage system of the Indus from that of the Sampo (afterwards the Brahmapootra), and is by some regarded as the grand central axis of Asia. From this centre the chain of the Himalayas stretches to nearly an equal distance in a north-westerly direction on the one hand, and a south-easterly on the other, throwing off at right angles lateral ranges sloping southward to the plains of India. Deep narrow valleys, separated from each other by these meridional ranges, contain the sources of the numerous rivers which constitute the drainage system of the Indus, the Ganges, and the Brahmapootra. Among the tributaries of the Indus, may be enumerated the Jhelum, Chenab, Beas, Ravee, and Sutlej; the principal feeders of the Ganges are the Jumna, Gogra, Gunduck, and Coosy; the Teesta and some others fall into the Brahmapootra. The elevation of the culminating range of the Himalaya, observes Dr. Thomson, "is probably at a mean about 18,000 or 20,000 feet; it is nearly uniform at about these elevations throughout a great part of the chain, but gradually diminishes towards both ends. Like all mountain-chains, it presents alternations of

high and low portions, the lower parts or passes, as they are called, from their affording the means of passage to travellers from one side to the other, being at the upper extremities of the river-basins. These passes are, with a few exceptions, rarely under 17,000 or 18,000 feet. The lateral chains, starting from the more elevated portions of the central axis between the passes, gradually diminish in elevation as they approach the plains of India, not, however, with any exact uniformity of progression; for it is not unfrequent to find them rise into lofty peaks, considerably more elevated than any known part of the central axis. The greater part of the giant peaks, which rise to an elevation of 26,000 or 28,000 feet, are situated in this manner, not on the central axis, but to the south of it."

The distribution of the Himalayas, by the authority just quoted, into two grand sections (the eastern and western), is calculated to exhibit with greater perspicuity the leading characteristics of each, and is obviously preferable to the distribution of Herbert, under which the chain is divided into three separate portions; the section designated the "Indo-Gangetic range," and stretching from the source of the Sutlej, in Lake Manasarowar, to the vicinity of Ropur, on that river, in long. 76° 40', occupying the central position. A more recent traveller, whose researches extended to those regions, adopts the less complicated of the two arrangements, and in so doing advances additional arguments in its favour. The two sections, he contends, furnish points of resemblance, in presenting almost insurmountable obstacles to communication between the countries which they divide, and both marking the boundaries of nations, by separating the Botis of Thibet from the Hindoo family of India. The distinction of climate he considers not less positively marked than that of nations; both ranges forming the "lines of demarcation between the cold and dry climate of Thibet, with its dearth of trees, and the warm and humid climate of India, with its luxuriance of vegetable productions." Some analogy, moreover, may be traced between the drainage systems of the two sections; the one separating the waters of the Sampo from those of the Ganges and its affluents, and the other intervening between the Indus, flowing at its northern base, and the subsequent tributaries of that river rising on its southern slope.

Major Cunningham, however, appears to be in error in supposing that the two divisions present points of contrast as well as of resemblance. "There is," he observes, "one marked difference between the eastern and western ranges, which can scarcely fail in striking the most casual observer. The inferior mountains of the eastern chain generally run at right angles to its axis; whereas those of the western chain are mostly disposed in subordinate parallel ranges." This marked difference, however, is not between the eastern and western divisions, but between two separate portions of the latter.

The ramifications running "at right angles" to the axis, and the "parallel ranges," are both comprised within the limits assigned by Major Cunningham to his western division; viz. from the sources of the Sutlej to the banks of the Indus. In allusion to a portion of this division, Captain Strachey observes: "If we examine the structure of the mountains more closely, we shall find that from the sources of the Tonse to those of the Kali, a space which includes the provinces of Gurwhal and Kumaon, all the great rivers, the Bhagerati, Vishnugunga, Douli of Niti, Gori, Douli of Darma, and Kali, run in directions not far from perpendicular to the general direction of the Himalaya. Further, that they are separated one from another by great transverse ranges, on which all the highest of the measured peaks of this region are to be found." From these, moreover, proceeds an intricate ramification of subordinate ridges, giving to the whole area a most irregular and confused appearance. "Even the Snowy chain," says Herbert, speaking of the Indo-Gangetic chain, "though defined to a certain degree by a phenomenon so singular on a first view to the inhabitant of the plain country, loses on a nearer approach all character of continuity and regularity, and appears under the same confused and irregular aspect which the lower elevations are observed to bear."

The length of the western division of the culminating range of the Himalayas, from the source of the Sutlej to the peaks of Dayamur on the Indus (within which limits are comprised the Indo-Gangetic and the Bara Lacha ranges), is nearly 700 miles. The elevations of its summits are as under:—

Peaks.	Height.

49. Dayamur	20,000
50. Peak N. of Peshawur.....	20,493

The mean elevation, as already observed, is about 20,000 feet, the limits of the snow-line on the southern slope having a height of about 18,500 feet. According to Herbert, the geological structure of these mountains consists of gneiss and a schistose formation, comprising micaceous, chloritic, and talcose schists. Captain Strachey, describing the character of the Indo-Gangetic chain, observes: "Along the lines on which the points of greatest elevation are found in this part of the range, we invariably see, for a breadth of several miles, veins of granite in great abundance penetrating the schists, often cutting through them, but perhaps most frequently following the bedding of the strata, between which they seem to have been forced. The great peaks are, I think, in almost every case, composed of schistose rock, but the granite veins may be most clearly seen on the faces of the mountains to very great elevations. Kamet, one of the highest of the peaks in this region, seems, however, to be among the exceptions to this rule; its summit, which is upwards of 25,500 feet above the sea, appearing to consist of granite alone. This line of granite seems to be subdivided into several branches, distributed generally along the strike, but otherwise not very regularly. In immediate succession to the crystalline schists penetrated by granite veins, we here come at once upon slaty beds overlying them, along the bottom of which, near the mica schists and gneiss, is a line of granite veins, differing somewhat in appearance from those of the larger eruption, and not producing any great alteration in the slaty beds themselves, as is shown by the occurrence of a coarse conglomerate, the component parts of which are perfectly distinct only a few feet above the granite. Above these are slaty beds, in all perhaps 9,000 feet in thickness, consisting of coarse slates, grits, and limestones, all more or less affected by slaty cleavage, and all

devoid of fossil remains. It is after reaching the top of these strata, which is rarely done at a less elevation than 14,000 feet above the sea, that we at length enter again a region of fossiliferous rocks, which extends as far as my examinations have been carried. And it is not a little wonderful to find at this immense elevation a regular succession of most of the more important formations, from the silurian to the tertiary periods."

The length of the eastern section of the culminating range of the Himalayas, from the confluence of the Dihong with the Brahmapootra in the east, to the river Kalee, forming the boundary of Nepal on the west, is about 800 miles. This portion supports the lofty peaks of Kinchinjunga and Dhwalagiri. Seen from Patna, observes Dr. Royle, "at a distance of about 150 miles, these stupendous mountains present a long line of snow-white pinnacles, which, on a nearer approach, are seen towering above the dark line of lower but still lofty mountains." Dhwalagiri, having an elevation of 23,000 feet, is in lat. $29^{\circ} 10'$, long. 83° . Two hundred miles eastward of this, and in lat. $28^{\circ} 20'$, long. 86° , is situated the mountain of Gossainthan, attaining the height of 24,740 feet. After another interval of 140 miles in the same direction, the lofty peak of Kinchinjunga rises to the height of 28,176 feet. This last-named mountain is in the north-east angle of Nepal. Between Kinchinjunga and the city of Katmandoo another mountain is reported to have been recently discovered, having an elevation of 29,002 feet. It has been named Mount Everest. This is probably the highest mountain in the world, its summit overtopping the principal peak of the Andes by above half a mile of perpendicular altitude. Contiguous to Nepal on the east, is the petty territory of Sikkim, speaking of which Dr. Hooker says:—"Viewed from a distance on the plains of India, Sikkim presents the appearance—common to all mountainous countries—of consecutive parallel (wooded) ridges, running east and west, backed by a beautiful line of snowy peaks, with occasional breaks in the foremost ranges, through which the rivers debouch. Any view of the Himalaya, especially at a sufficient distance for the distant snowy peaks to be seen overtopping the outer ridges, is very rare, from the constant deposition of vapours over the forest-clad ranges during the greater part of the year, and the haziness of the dry atmosphere of the plains in the winter months. At the end of the rains, when the south-east monsoon has ceased to blow with constancy, views are obtained, sometimes from a distance of nearly 200 miles. The angle subtended by the giant peaks is so low (not a degree), that they appear like white specks very low on the horizon, tipping the black lower and outer wooded ranges, which always rest on a belt of haze, and from the density, probably, of the lower strata of atmosphere, are never seen to rest on the visible horizon. The remarkable lowness on the horizon of the whole stupendous

mass is always a disappointing feature to the new comer, who expects to see dazzling peaks towering in the air. Approaching nearer, the snowy mountains sink behind the wooded ones long before the latter have assumed gigantic proportions, and when they increase in size, they appear a sombre, lurid grey-green mass of vegetation, with no brightness or variation of colour. There is no break in this forest caused by rock, precipice, or cultivation; some spurs project nearer, and some valleys appear to retire further into the heart of the first great chain that shuts out all the country beyond. No pines whatever are seen on the outer range of Sikkim, both soil and climate being far too damp in the rainy season; nor are the colours of the foliage so varied and bright as the more perennially humid forests of tropical shores, from the want of any abundance of such palms as caryotas, tall arecs, and of artocarp, or of orange-groves." Beyond this, extensive tracts of the Himalayas remain unexplored, though it is known that a considerable portion of the Bootan territory, extending to long. 95°, presents a succession of lofty and rugged mountains, frequently rising to an altitude of 20,000 feet above the level of the sea, and covered with snow throughout the year.

Thus it will be seen that the great Himalaya range, from its north-western extremity, where its continuity with the Hindoo-Koosh is broken by the Indus, takes a south-easterly direction, giving rise in its course to the Jhelum, Chenab, Ravee, and Beas rivers, after which it is penetrated by the Sutlej, previous to its debouch into the plains near Roopur. Further east, it continues its original direction, throwing off in its progress the feeders of the Ganges, and also of the Brahmapootra subsequently to its confluence with the Sanpoo or Dihong. The entire chain may be said to have an average breadth of 150 miles; its length is computed at about 1,500. "The noblest scenery in India," says Elphinstone, "is under the Himalaya, where the ridges are broken into every form of the picturesque, with abrupt rocks, and slopes covered with gigantic pines and other trees, on the same vast scale, mixed with the most beautiful of our flowering shrubs, and the best of our fruits in a state of nature. Over the whole towers the majestic chain of the Himalayas, covered with eternal snow, a sight which the soberest traveller has never described without kindling into enthusiasm, and which, if once seen, leaves an impression that can never be equalled or effaced."

HIMMUTGUNGE, in the British district of Allahabad, lieutenant-gov. of the N.W. Provinces, a village on the route from the cantonment of Allahabad to Jubbulpore, and four miles S. of the former. It is situate on the left bank of the Jumna, at the Gawghat ferry, and has a small space suited for encamping. Lat. 25° 26', long. 81° 55'.

HIMUTGARH, in the territory of Gwalior, or possessions of Scindia, a small town 10 miles

S.W. of the fort of Gwalior. It is situate at the north extremity of a narrow pass, extending from north to south, through a range of rocky sandstone hills, to the town of Puniar. Close to it was fought, on 29th December, 1843, an engagement, styled the battle of Puniar, between the British detachment led from Bundelcund by General Grey and the Mahrattas. The British lost thirty-six men killed, and 180 wounded; the Mahrattas lost all their artillery, amounting to twenty-four pieces, all their ammunition, some treasure, and a great number of men. Lat. 26° 6', long. 78° 3'.

HINDIA, or **HANDIYA**, in the territory of Gwalior, or possessions of Scindia's family, a town on the route from Baitool to Mow, 90 miles N.W. of former, 96 S.E. of latter. It is situate on the left or south bank of the Nerbudda, here a great river, 1,000 yards wide. It is of considerable size, and has a large bazar, and a fort commanding several ghats or passes over the river. This place was, in 1820, occupied by a British force, and by the treaty of 1844, was, with its pergunnah, and that of Hurda, yielding together an annual revenue of 140,000 rupees, placed under British management, the revenue being appropriated to the maintenance of the augmented Gwalior contingent. Distant S. from Gwalior fort 280 miles, S.E. from Oojein 90. Lat. 22° 26', long. 76° 59'.

HINDOLEE.—A town in the Rajpoot state of Boondee, three miles from the left bank of the Nej Nuddée, and 13 miles N.W. from Boondee. Lat. 25° 35', long. 75° 34'.

HINDON a river of Hindustan, rises at the south-west base of the Sewalik range, in lat. 30° 15', long. 77° 53'. Its course is southerly, and divided from that of the Jumna by a slight elevation of the surface, along which the Doab Canal extends. In the rainy season it communicates by cross channels and branches with various torrents, which then traverse the country. After a course generally southerly of about 160 miles, it falls into the Jumna on the left side, in lat. 28° 27', long. 77° 30'. It is crossed by the route from Dehra to Saharanpore, in lat. 29° 58', long. 77° 43', and is there fordable during the dry season. It is also crossed by the route from Kurnoul to Mozuffernuggur, in lat. 29° 22', long. 77° 33', and is there fordable, except when swollen during the rains; by the route from Kurnoul to Meerut, in lat. 29° 12', long. 77° 34', and is there fordable, with a depth of from two to two and a half feet; and by the route from Meerut to Saharanpore, in lat. 29° 53', long. 77° 40', and is there crossed by a bridge and long causeway.

HINDOOR, or **NALAGURH**.—A hill state at the south-western declivity of the Himalaya Mountains. It is bounded on the north by Kuhlloor; on the east by Bhagul and Muhlog; on the south and west by Sirhind. It contains an area of 233 square miles, the centre being in lat. 31° 7', long. 76° 50'. It is

traversed throughout its whole extent by a steep range of hills, which, rising over the left bank of the Sutlej, continues in a south-easterly direction until joining the Sub-Himalaya near Subathoo. Parts of this ridge attain a considerable height; Chumbagarh being 4,400, and Rangarh 4,054 feet above the sea. The drainage is either by the rivers Gumbur and Gunrora, which flow in a north westerly direction to the Sutlej, or by the Sarsa, which, rising in the Pinjor Doon, takes also a north-westerly direction, and falls into the Sutlej near Kanoli, after a course of about thirty miles. Moorcroft speaks of part of the country thus traversed in favourable terms:—"The valley of the Gamrora is populous and well cultivated. Along the courses of the different small streams by which it is intersected are rows of pear-trees, which, at the time we passed them, were in full blossom. Villages occurred repeatedly on either side of the road." The Sarsa receives several small streams from the north and north-east: of these the most worth notice are the Baladh and the Ruta. The Lohund and the Kalakund, two small rivers, flow down the mountain-tract sloping to the north-west, and fall into the Sutlej. The low grounds on the banks of the Sarsa and Sutlej are alluvial, fertile, and, being little more than 1,000 feet above the sea, have a climate and produce resembling those of intertropical regions. The crops are generally maize, rice, wheat, barley, various kinds of millet, cotton, opium, ginger, turmeric, hemp, tobacco, oil-seeds, and esculent vegetables. The fruits are pomegranates, peaches, apricots, plums, apples, pears, walnuts, raspberries, strawberries, and melons. The pulp of the pomegranates is eaten; the husks are dried, and exported for the purposes of dyeing and tanning. The acacia, Indian fig, pine, elm, willow, gentian, geranium, rose, and other shrubs familiar in Europe, adorn the hills. The country is altogether picturesque, beautiful, fertile, well watered, and highly cultivated. The only places of importance are Nalagarh, Rangarh, and Plassi or Palasi. Nalagarh is at present the residence of the rajah, in place of Plassi, at which he formerly dwelt. The population of the raj is estimated by Moorcroft at 20,000. It is represented to contain 136 villages, and to yield an annual revenue of 10,000*l.*; but according to official report of a recent date (1848), the revenue does not exceed 8,000*l.* The thakooroo of Burrowlee, with the exception of a small part, was conferred on the rajah of Hindoor, in November, 1815, in lieu of the fort of Malown, with six villages, retained as a post for British troops. The rajah holds under the East-India Company, from whom he received his raj on the expulsion of the Goorkhas in 1815; and in troublous times his conduct has been characterized by his devotion to British interests.

HINDOSTAN.—See **INDIA.**

HINDOUL, in the British district of Muttra, lieut.-gov. of the N.W. Provinces, a village on

the route from the cantonment of Meerut to that of Muttra, and 17 miles N.E. of the latter. Lat. 27° 42', long. 77° 49'.

HINDOWN, in the Rajpoot state of Jeypore, a town on the route from Agra to Malwa, 71 miles S.W. of former, 344 N.E. of latter. It was formerly a large city, with several extensive buildings, but suffered so much from the devastations of the Mahrattas, that it is much decayed, though still populous. The rampart which once surrounded it is now quite in ruins, but it has a good bazar. Lat. 26° 41', long. 77° 10'.

HINGLAJGARH, or **HINGLAISGARH**, in Malwa, a hill fort in the possession of Holkar's family, long deemed impregnable by the natives. It is surrounded by a deep ravine 200 feet deep, 250 wide, and with perpendicular sides, from the edge of which the walls rise, and is accessible only by three causeways, made to form communications across the chasm, with three gates respectively. It was, however, stormed July 3rd, 1804, by a British detachment sent by Colonel Monson, stationed at Sunara, ten miles farther east. The detachment, commanded by Major Sinclair, consisted of a battalion of a native regiment, with six six-pounders and a party of irregular horse. After battering for an hour, the British escaladed the walls, and took the place with little loss, not a British officer being either killed or wounded. It was subsequently restored to Holkar, apparently in conformity to the declaratory article annexed to the treaty of Rajpurgat, 1805. Distant from Indor, N., 136 miles; from Oojein, N., 100. Lat. 24° 49', long. 75° 50'.

HINGMEE.—A town in Hyderabad, or dominions of the Nizam, on the right bank of the Payne Gunga river, and 168 miles N. by W. from Hyderabad. Lat. 19° 43', long. 77° 57'.

HINGNAH.—A town in the British province of Nagpoor, 12 miles S.W. from Nagpoor, and 96 miles E. by S. from Ellichpoor. Lat. 21° 2', long. 79° 2'.

HINGOLEE, in Hyderabad, or territory of the Nizam, a town on the route from the city of Hyderabad to Akola, 185 miles N.W. of former, 72 S. of latter. It is one of the stations of the force denominated the Nizam's contingent, but actually a British force, officered by British, and under the direction and control of the British government. Distance from Madras, N.W., 500 miles; Bangalore, N., 465; Secunderabad, N.W., 190; Bombay, E., 296; Kampti, S.W., 167. Lat. 19° 42', long. 77° 11'.

HINGONA, in the territory of Gwalior, a village on the route from Agra to the fort of Gwalior, 47 miles S. of former, 23 N.W. of latter. It is situate on the left bank of the small river Kohari, and has a bazar. Here, in the end of December, 1843, the British army under Sir Hugh Gough, commander-in-chief, accompanied by Lord Ellenborough, remained encamped some days during the abortive nego-

station previous to the battle of Maharajpore and Chouda. Lat. $26^{\circ} 34'$, long. $77^{\circ} 57'$.

HINGUNGHAT, in the territory of Nagpore, a town on the river Wunna, a tributary of the Wurda. It is a place of considerable trade, and is interesting to the geologist, from containing numerous specimens of organized substances in the Vulcanian formation, general in this part of India. They are principally portions of fossilized palm-trees. During the Mahratta war in 1818, it was occupied by a British force, to cut off the communication of the flying Peishwa from the city of Nagpore. Distance from Nagpore, S., 45 miles. Lat. $20^{\circ} 34'$, long. $78^{\circ} 53'$.

HINWA, a river of Nepal, rising in lat. $27^{\circ} 20'$, long. $88^{\circ} 4'$, on the western slope of a spur of the Himalayas which connects the main or Snowy range with that known as the Sub-Himalaya, and, flowing through the district of Chyapoor, in a westerly direction, for forty-five miles, falls into the Tambur on the left side, in lat. $27^{\circ} 9'$, long. $87^{\circ} 24'$.

HINWA, or **FINWAH**, in the district of Aldemau, territory of Oude, a village two miles from the right bank of the river Ghaghra, 28 miles S.E. of Fyzabad, 100 E. of Lucknow. Butter estimates its population at 500, all Hindoos. Lat. $26^{\circ} 37'$, long. $82^{\circ} 25'$.

HINWA.—A river of Nepal, rising in lat. $27^{\circ} 20'$, long. $88^{\circ} 8'$, on the western face of an extensive spur of the Himalayas, separating Sikkim from Nepal. It flows in a direction westerly for fifty miles, to its junction with the Tambur, in lat. $27^{\circ} 8'$, long. $87^{\circ} 27'$.

HINDOEE, in Bundelkund, a town in the British district of Jaloun, on the route by Koonch from Gwalior to Calpee, 32 miles W. of the latter. It has a bazar, and is well supplied with water. Lat. $25^{\circ} 59'$, long. $79^{\circ} 20'$.

HIRNEE.—A town in the British district of Tirhoot, lieutenant-gov. of Bengal, 81 miles E. by N. of Dinapoor. Lat. $25^{\circ} 47'$, long. $86^{\circ} 24'$.

HISSAMPOOR.—A town in the territory of Oude, five miles from the left bank of the Gogra river, and 48 miles N.E. by E. from Lucknow. Lat. $27^{\circ} 13'$, long. $81^{\circ} 39'$.

HISSAR, in the British district of Haryana, lieutenant-gov. of the N.W. Provinces, a town on the route from the city of Delhi to Bhutneer. It is situate on the branch made by Feroz Shah from the Delhi Canal to supply water for irrigation, as well as for the use of the numerous host of followers brought by him into this arid tract, which was his favourite hunting-ground, the neighbouring wastes harboured lions and tigers, besides other wild beasts less formidable. This watercourse appeared to have been partly made by excavation, partly by clearing the channel of the Chitang, or one of its branches. In 1825 it was, by order of the British government, cleared out as far as Darbah, twenty-five miles north-west of Hissar, to which last place it is navigable for timber-rafts. Previously to this renovation,

the town and its vicinity suffered much from want of water, being supplied merely from tanks or from wells, of which last it had 300 in the time of George Thomas. There is a well-supplied bazar, and formerly the East-India Company had here a stud, to furnish a supply of horses for the army; but in 1844 the establishment ceased. The place was likewise selected as the site of a farm for rearing cattle for the ordnance department; but this establishment also has been recently abolished. In the time of Akbar, Hissar had two forts, one of stone, the other of brick. The circar, of which it was the principal place, was rated to furnish 6,875 cavalry, 55,700 infantry, and an annual revenue of 13,75,022 rupees. The road to the east is good; to the west it is in many places good, but occasionally heavy. Distant N.W. from Delhi 104 miles; N.W. from Calcutta 991 miles. Lat. $29^{\circ} 8'$, long. $75^{\circ} 50'$.

HISSULLOOR.—A town in the British district of North Canara, presidency of Madras, 126 miles N. by E. of Mangalore. Lat. $14^{\circ} 42'$, long. $74^{\circ} 59'$.

HOBIGUNJE.—A town in the British district of Dacca Jelalpoore, lieutenant-gov. of Bengal, 40 miles S. by W. of Dacca. Lat. $23^{\circ} 11'$, long. $90^{\circ} 11'$.

HOBRA, in the British district of Baraset, lieutenant-gov. of Bengal, a town lying on the route from Calcutta to Dacca. It has a small bazar. The road in this part of the route is in general good, though in some places not free from swamps, the country being low and marshy. Distance from Calcutta, N.E., 28 miles; from Dacca, S.W., 158. Lat. $22^{\circ} 52'$, long. $88^{\circ} 41'$.

HOCCHO, or **HOPCHO**, in Bussahir, a stream of Koonawur, rises near the north-eastern frontier, in lat. $31^{\circ} 38'$, long. $78^{\circ} 48'$, on the western declivity of the Gantung Pass, from the melted snows of which it is supplied. Even near the source, it in some places spreads to a width of 100 yards, and in one part to 200, in another to 300; but is so shallow as scarcely to cover the pebbles in its bed. In other places it is arched over with snow, or buried under the ruins of cliffs, from which it again bursts out and expands over the plain. The fall, which in the upper part of its course is very gentle, lower down is very rapid, as from its source to the confluence with the Sutluj, a distance of less than twelve miles, in a westerly direction, it descends 10,000 feet, and is in general one broken sheet of foam. The mountains bounding its course on each side are precipitous, lofty, and covered with perpetual snow, avalanches of which frequently descend, and, damming the stream, form deep lakes, over the icy embankments of which the river is precipitated with a loud noise.

HODUL, in the British district of Goorgaon, lieutenant-gov. of the N.W. Provinces, a town on the route from Delhi to Muttra, and 60 miles S. of the former. Though now a small decayed town, containing a population of only 5,840 persons, the ruins observable prove it to have

been once extensive and important. It has a bazar, and there is a large and very fine tank, with water between twenty and thirty feet deep, and accessible by means of a range of stone steps extending all round it. The road in this part of the route is good. Lat. $27^{\circ} 53'$, long. $77^{\circ} 26'$.

HOOJENO, in the jaghire of Jujhur, lieutenant-gov. of the N.W. Provinces, a village on the route from Rohtuk to Narnol, and six miles N. of the latter. Lat. $28^{\circ} 8'$, long. $76^{\circ} 12'$.

HOKYE.—A town in the British district of Northern Cachar, lieutenant-gov. of Bengal, 110 miles S.E. of Gowhatty. Lat. $25^{\circ} 6'$, long. $92^{\circ} 57'$.

HOLCAR'S DOMINIONS.—See **INDORE**.

HOLLA HONOR, in the territory of Mysore, a town situate on the right bank of the river Bhadra, which, a few miles below, uniting with the Tunga, forms the Tungabhadra or Tumbudra. The Bhadra is 250 yards wide, yet fordable except during the monsoon rains. The fort is described, in 1790, as "large, of a square form, with towers at the angles, and two in each face, between the angular ones;" the town as "extensive, tolerably well built, and inclosed by a bad wall and ditch." The fort, in 1791, yielded to a British detachment, acting in junction with the Mahrattas against Tippoo Sultan. Distance from Seringapatam, N.W., 127 miles. Lat. $13^{\circ} 58'$, long. $75^{\circ} 44'$.

HOLLAL.—A town in the British district of Dharwar, presidency of Bombay, 150 miles N.N.E. of Mangalore. Lat. $14^{\circ} 51'$, long. $75^{\circ} 47'$.

HOLLALGOONDY.—A town in the British district of Bellary, presidency of Madras, 27 miles N.N.E. of Bellary. Lat. $15^{\circ} 30'$, long. $77^{\circ} 9'$.

HOLLALKAIRA.—A town in the Mysore, 116 miles N. by W. from Seringapatam, and 122 miles N.E. from Mangalore. Lat. $14^{\circ} 3'$, long. $76^{\circ} 14'$.

HONAHWAR, in the British district of North Canara, presidency of Madras, a seaport and town, the principal place of a talook or subdivision of the same name. It is situate on the north side of an extensive estuary, or rather inlet of the sea, forming an expanse of salt-water, which at its south-eastern extremity receives the Gairsoppa or Sherravutty, a considerable river flowing from the Western Ghats, further eastward.

Of this place there is but little notice before 1569, when it was a rich and beautiful city, with a fort, belonging to the queen of Gairsoppa, a city now in ruins, about fifteen miles farther east, on the river Sheravutty, and was plundered and burned by the Portuguese, who shortly after fortified and garrisoned it. On the decay of the Portuguese power in India, it was acquired by the sovereigns of Bednore, on the conquest of which place by Hyder Ali, this town also submitted to him. It 1783 it

was taken by assault by a British force, despatched from Bombay under the command of General Matthews; and, in 1784, obstinately and successfully defended by Captain Torriano, against Tippoo Sultan; to whom, however, in the same year, it was ceded by the treaty of Mangalore. On the overthrow of that prince in 1798, it again came into the possession of the East-India Company. Distance direct from Bombay, S.E., 340 miles; from Mangalore, N.W., 110; from Seringapatam, N.W., 200; from Madras, N.W., 410. Lat. $14^{\circ} 17'$, long. $74^{\circ} 30'$.

HONHULLY.—A town in the Mysore, on the right bank of the Tongabudra river, and 144 miles N.W. by N. from Seringapatam. Lat. $14^{\circ} 15'$, long. $75^{\circ} 45'$.

HONWAR.—A town in the British district of Belgaum, presidency of Bombay, 20 miles W. of Beejapore. Lat. $16^{\circ} 49'$, long. $75^{\circ} 30'$.

HOOBLEE, in the British collectorate of Dharwar, presidency of Bombay, a town situate about 12 miles S.E. of the town of Dharwar. Though ill-built, it is a thriving place, and has some considerable trade, being one of the principal cotton marts of the Southern Mahratta country. In this respect its importance will probably increase, from the improved means of communication with the coast. A cart-road from Dharwar to Hooblee was completed some years ago. In 1847 a further continuation of this road was authorized to Wuddeguttee, on the Canara frontier, there to meet the road constructed by the Madras government for facilitating the inland trade between Dharwar and the port of Coompta.

Hooblee was formerly the seat of an English factory, which, in 1673, was, with the rest of the town, plundered by Sevajee, the Mahratta leader, to the amount of 7,894 pagodas. Moazzim, son of Aurungezebe, sent by his father into this country at the head of an army, took Hooblee. During the decline of the kingdom of Delhi, the town fell into the hands of the Mahrattas, and on the overthrow of the Peishwa, in 1818, was, with the rest of that prince's dominions, taken possession of by the government of the East-India Company. Its population is estimated at 15,000. Distance from Bombay, S.E., 290 miles; from Poona, S.E., 230 miles. Lat. $15^{\circ} 20'$, long. $75^{\circ} 13'$.

HOODESARA.—A town in the British district of Camroop, province of Assam, 47 miles N.W. of Gowhatty. Lat. $26^{\circ} 34'$, long. $91^{\circ} 10'$.

HOOGHLY.—A British district subject to the lieutenant-gov. of Bengal, and named after its principal place. It is bounded on the north by the British district of Burdwan; on the east by the river Hooghly, separating it from the British districts of Nuddea, Baraset, and the Twenty-four Pergunnahs; on the south by the river Roopnahan, separating it from the British districts of Midnapore and Hidjeelee; and on the west by the British districts Midnapore and Burdwan. It lies between lat.

22° 13'—23° 13', long. 87° 34'—88° 30'; is seventy-two miles in length from north to south, and fifty-two in breadth. The area, according to official return, is 2,089 square miles. In its general aspect, the district is low and level in the eastern part, but more hilly in the western and north-western, where it runs towards the high lands of Burdwan. The principal rivers which traverse or skirt the district are the Hooghly, the Damoodah, and the Dalkissore.

The periodical rains set in at the end of June, and last until the end of September or the early part of October. During this period the country is very unhealthy, fevers and agues being especially rife. The cool season lasts from the beginning of November to the end of January, and in the nights ice is sometimes formed to such an extent, that masses may, with due precautions, be preserved to be used during the hot season. February is cool and very pleasant, and is hailed with as high feelings of gratification by the natives, as the finest part of spring is welcomed in Europe. The soil in the south, in some places, is much impregnated with common culinary salt, which was formerly extracted on account of government. Along the courses of the rivers, and generally in the low grounds, it is very fertile, and as irrigation is easily practised, it produces abundant crops. Besides rice, the principal objects of cultivation are the sugarcane, indigo, the mulberry-tree (for the sake of its leaves to feed silkworms), cotton, tobacco, mustard and other oil-seeds, ginger, hemp, potatoes, cucurbitaceous plants of various kinds, peas, onions, cabbages, and various other esculent vegetables. The principal exports are raw silk, indigo, and sugar. A large quantity of plantains is also sent to the Calcutta market, and distillation of rum is greatly increasing, in consequence of the brisk demand for it in the British market. Spirits are distilled in considerable quantities from the sap of the date-palm, and palmyra or toddy-palm. Large quantities of bamboos find a ready sale in the Calcutta market. Hemp is made into ropes, sacking, and coarse canvas. Formerly there was a considerable manufacture of cotton cloths, but the greater cheapness of the fabrics brought from Great Britain has nearly put an end to that branch of industry in this district, as well as in other parts of India. The population is given under the article BENGAL.

The French settlement of Chandernagore is situate within the limits of this district, as are also Chinsura and Serampore, now British possessions, but originally belonging, the one to the Dutch, and the other to the Danes. Hooghly, the principal place, Ampata or Omptah, Boenchie, Jehanabad, Shahbazzar, Ghotal, Keerpoy, and the places just mentioned as now or lately held by foreign powers, are described under their respective names in the alphabetical arrangement. The principal routes are,—1. From south-east to north-west, from Calcutta through the town of Hooghly to

Burdwan; 2. from south-east to north-west, from Calcutta through Jehanabad to Bancoora; 3. from north to south, along the right side of the river Hooghly; 4. from north-east to south-west, from Burdwan to Midnapore; 5. from east to west, from Calcutta to Midnapore. The tract comprised within the present district of Hooghly appears, according to the remotest historical records, to have formed part of a considerable realm, called Tamara-lipta, from its capital of that name, identical with the modern Tumlook. It is reputed to have maintained, or aspired to maintain, extensive foreign relations, and it is said, that in the year 1001, the king despatched an ambassador to the monarch of China. At the time of the invasion of Bengal by the Mussulmans, at the commencement of the thirteenth century, the tract was comprised within the dominions of a rajah residing at Nuddea, on the Bhagirathi, north of the present district of Hooghly. This feeble chief, without an attempt at resistance, deserted his dominions, which were seized by Bukhtyar Khulijy, the Mussulman general, and subsequently incorporated with the state which he founded, and styled the kingdom of Bengal. It was probably united to the kingdom of Delhi by the renowned Sher Shah, when, in 1542, he took the city of Gour, and overthrew the kingdom of Bengal. Wrested from Delhi during the troubles ensuing on the death of Sher Shah, it was reunited to it in 1576, by Khan Jehan, an officer of Akbar. At the commencement of the eighteenth century, it became part of the virtually independent state which, under the denomination of the soobah of Bengal, was founded by Murshid Kuli Khan, during the weakness and distractions of the kingdom of Delhi, ensuing on the death of Aurungebe. The right of the East-India Company to this tract originated in the treaty concluded with Meer Cossim in 1760, and was confirmed in 1765, by the emperor Shah Allum.

HOOGLY.—The principal place of the British district of the same name, a town on the line of railroad now under construction from Calcutta to Benares. It is situate on the right bank of the great offset of the Ganges, from it denominated the Hooghly. The river in this part is much contracted in breadth. The civil establishment of the district located here is accommodated in several buildings, of striking appearance, in the Grecian style of architecture, but of frail beauty, being merely overlaid with chunan or stucco. The church, built by the Jesuits, according to the inscribed date, 1599, is a large fine structure, of such durable materials as to appear to have been but recently erected. Here is a college, erected in 1836, upon a site granted for the purpose by the government, and supported by funds derived from the estate of Haji Muhammad Mo'sin. Instruction is given both in English and Oriental literature. Connected with this institution are several branch schools.

The civil establishment, of which Hooghly is the chief station, comprises the following European officers:—A civil and sessions judge, a collector, a magistrate, a joint magistrate, and deputy collector; two assistants to the above, an assistant-surgeon, a superintendent of abkharree, an assistant to that officer. Besides these, there is a considerable number of native functionaries, of various grades and denominations. This town is conjectured to have been founded by the Portuguese in 1537. In 1632, it was, after an obstinate defence of three months, stormed by the troops of Shah-jehan, 1,000 Portuguese being slaughtered, and 4,400 taken prisoners. Sixty-four large vessels, and 254 of smaller dimensions, were burned, three only escaping to Goa. The place, thus possessed by the Moguls, became the royal port of Bengal. In 1676, the English established a factory here, and about the same time Tavernier mentions a similar establishment belonging to the Dutch. In 1681, the English factory was fortified, and provided with a small guard, consisting of twenty Europeans, which was the first military establishment of the Company in Bengal. Subsequently wrested from the Company by Sooraj-oodowah, it was, in 1757, retaken by Clive, and has from that time been retained. The population of the town is estimated at about 12,000. Distance N. from Calcutta 27 miles; from Benares, S.E., 301. Lat. $22^{\circ} 54'$, long. $88^{\circ} 22'$.

HOOGHLY.—A large river of Bengal, formed by the junction of two great branches of the Ganges, the Bhagruttee and the Jellinghee, the confluence of which is in lat. $23^{\circ} 25'$, long. $88^{\circ} 22'$, and 125 miles from the sea, reckoned by the windings of the stream to Diamond Point, or, if the estuary be included as far as Saugor Roads, 160 miles. Its mean breadth above Calcutta is three-quarters of a mile, and it was formerly navigable for ships of the line as high as Chandernagore, 115 miles from Saugor Roads, and seventeen above Calcutta. There is indeed a rumour, pretty generally credited, that the river is gradually silting up, and will at some future time cease to afford adequate accommodation to the trade of the capital of British India. This would be a fearful blow to the prosperity of the "City of Palaces," unless a suitable remedy should be provided. Towards this end, it has been suggested that either a ship canal or a railway might be constructed from Calcutta to the Mutwal, a river some distance to the eastward, not unfitted to become the successor of the Hooghly, should it be necessary to abandon that channel; and thus the commerce of the maritime emporium of Bengal be retained. However, "the draught of water for ships departing from Calcutta to proceed down the river, is usually limited to seventeen feet, but the pilots will, for a gratuity presented to them, sometimes take charge of vessels drawing seventeen and a half or eighteen feet; and

if a powerful steam-tug be employed, they may be taken from Calcutta drawing nineteen or even twenty feet, when the tides and weather are favourable." When the river is not affected by the annual periodical inundations, which take place at the close of summer, the water is slightly salt at Calcutta, but "in September the freshes are at their height; there is then no visible tide off Calcutta, the ships do not swing up, and the river-water is perfectly sweet, far beyond Saugor, in the open sea." The following general summary of the variations of the tides of the Hooghly is given by the writer just quoted:—"From the point of lowest low water in the dry season, to that of the highest high water in the freshes, is twenty feet ten inches. The greatest mean rise of tide from low to high water-mark takes place in March, April, and May, and is fifteen feet ten inches. The greatest mean rise of tide from low to high water-mark in the freshes is ten feet. The smallest mean rise of tide takes place in the freshes, and is at neap tides only three feet six inches. The smallest mean rise of the tide in the dry season, neap tides, is four feet. From the lowest fall of the river to high-water mark, neap tides, in February, is eight feet. From the lowest fall of the river to low water in the freshes, neap tides, is twelve feet. The river is at its lowest in the beginning of March. The river is swollen by the freshes in July, August, and September, and part of October. The freshes take off about the middle of September, and are generally out of the river by the end of October. At the beginning of November, although the freshes are out of the river, it is upwards of three feet higher at low water than in March. The river is in the most quiescent state during the months of November, December, January, and February. During these months, the night tides are higher and more rapid than the day tides; and there are, on some occasions, bores at night. The strongest flood tides, and the greatest mean rise of the tides, are in March, April, May, and June. The day tides in these months are higher than the night tides. The strongest freshes are in September. In July, the strength of the flood tides is counteracted by the freshes, and this, therefore, is a moderate month as regards tides. The bores also are moderated, as a consequence. In August, the flood tides are overcome by the freshes, and the bores are moderate: should there be a high parallax of the moon, however, the great height of the sea in this month will cause a considerable bore." Though not a mile wide at Calcutta, the river does not at all times afford perfect security to ships, as there have been instances of their being blown ashore there in violent storms. The river has little increase of breadth until after it has received the waters of the Dammoohah and Rupnarain, and passed Diamond Point, fifty miles from Calcutta. Below that point, it rapidly expands, and at Saugor Roads, where the estuary terminates in the open sea, is about fifty a

miles wide. The tides, under circumstances calculated to favour their action, are violent and rapid, running sometimes at the rate of seven miles an hour near Calcutta; and in the south-west monsoon, when a great current is driven into the river from the Bay of Bengal, the extraordinary phenomenon denominated the Bore, which sometimes rises on the sands contiguous to the banks in waves twelve or fifteen feet perpendicular, rushes on at the rate of twenty miles an hour, carrying every floating body along with it. The Hooghly, though the only channel of the Ganges frequented by large ships, is at its mouth much encumbered by shoals, amidst which ships can be steered safely only by much skill and attention. Of the channels between those shoals, the principal are—1. The Inside Channel, farthest west, stretching from Balasor close along the shore inside, or to the north-westward of all the shoals, with depths generally of from two to three fathoms at low water. This is used only by the small coasting vessels navigated by the natives. 2. Fairway, or the Western Channel, suitable only for ships drawing not more than fourteen or fifteen feet of water. 3. Middle Channel, which is narrow, has not more than three fathoms of water, and is little used. 4. Sagar Channel, or Eastern Channel: this is represented as at present the channel in general use by ships entering or departing from the Hooghly. 5. Thornhill Channel, which has two fathoms and three-quarters at low tide, but commonly three, three and a quarter, or three and a half. 6. The Old Channel, having from three to four fathoms at low water. 7. Lacam Channel, or Channels Creek, called by the natives Barattula, separates Sagar Island and Clive's Island from the low land of the Sunderbunds. It has a good depth of water, but is rendered somewhat intricate by sands projecting from the land. If these, however, were marked by buoys or beacons, the navigation would not be difficult. Several ships at different times have entered it by mistake, and passed in safety.

The Hooghly is considered by the Brahminists as the real and much-venerated Ganges, having its source at Gangoutri; and the Podda, which takes its course farther east, though having a much larger volume of water, is regarded as a mere branch. The banks of the Hooghly are studded with numerous towns and villages, many of which possess an interest, "from old associations, or have been rendered memorable by historical recollections." A project is under consideration, to connect the city of Calcutta with the suburb of Howrah, by means of a bridge thrown over the Hooghly, in the immediate vicinity of the terminus of the East-Indian Railway.

HOOKEO.—A pass over a lofty range of mountains on the north-eastern frontier of Koonawur, and bounding the table-land of Chinese Tartary westward, and which here has

a surface of reddish gravel, swelling into gentle slopes. The rock is calcareous, with occasional quartzose veins, and abounds in shells. Here is a Chinese watch-tower, to exclude obnoxious intruders on the Celestial empire. Elevation above the sea 15,786 feet. Lat. $31^{\circ} 36'$, long. 79° .

HOOKEREE.—A town in the British district of Belgaum, presidency of Bombay, 28 miles N. by E. of Belgaum. Lat. $16^{\circ} 12'$, long. $74^{\circ} 40'$.

HOOLEH, in the Daman division of the Punjab, a town situated 10 miles from the right bank of the Indus, 45 miles W. by S. of the town of Mooltan. Lat. $29^{\circ} 59'$, long. $70^{\circ} 49'$.

HOOLIGEYRI.—A town in one of the recently sequestered districts of Hyderabad, or dominions of the Nizam, 28 miles W. by S. from Moodgul, and 78 miles E.N.E. from Dharwar. Lat. $15^{\circ} 57'$, long. $76^{\circ} 8'$.

HOOLIORDROOG, in the Mysore, a town, with the ruins of a fort, situate on a rock deemed impregnable except by blockade, and hence formerly regarded as a place of importance. In 1659 it was acquired by Dud Deo Raj, ruler of Mysore; it subsequently passed into the power of Hyder Ali, and in 1791 was surrendered to the British army under Lord Cornwallis, by whom it was dismantled and relinquished. It was subsequently repaired and reoccupied by Tippoo Sultan, but was retaken by the British before the termination of the war. Distant from Seringapatam, N.E., 48 miles. Lat. $12^{\circ} 50'$, long. $76^{\circ} 5'$.

HOOLOOGOREE NUGUR.—A town in the British district of Seebpoor, province of Assam, 30 miles N.E. of Seebpoor. Lat. $27^{\circ} 16'$, long. $95^{\circ} 3'$.

HOOLSOOR.—A town in one of the recently sequestered districts of Hyderabad, or dominions of the Nizam, 106 miles N.W. of Hyderabad. Lat. 18° , long. $77^{\circ} 6'$.

HOOLY ONORE.—See HOLLA HONOR.

HOOMNABAD.—A town in Hyderabad, or dominions of the Nizam, 92 miles W.N.W. from Hyderabad, and 109 miles N. from Raichoor. Lat. $17^{\circ} 45'$, long. $77^{\circ} 13'$.

HOONOOMANGUNGE, in the British district of Allahabad, lieutenant-gov. of the N.W. Provinces, a village on the route from the cantonment of Allahabad to Benares, and 12 miles S.E. of the former. Lat. $25^{\circ} 25'$, long. $82^{\circ} 5'$.

HOONSOOR.—A town in the Mysore, 13 miles S.W. from Seringapatam, and 114 miles E.S.E. from Mangalore. The place is noted for its manufactures of flannel, blankets, and buff accoutrements. Lat. $12^{\circ} 15'$, long. $76^{\circ} 28'$.

HOONUGONDA.—A town in the British district of Belgaum, presidency of Bombay, 105 miles E. by N. of Belgaum. Lat. $16^{\circ} 3'$, long. $76^{\circ} 9'$.

HOORHOOREE, in the British district of

Bareilly, lieut.-gov. of the N.W. Provinces, a village on the route from the town of Bareilly to Moradabad, and 19 miles N.W. of the former. Lat. 28° 30', long. 79° 15'.

HOORINGOTTAH RIVER.—One of the principal mouths by which the Ganges discharges its waters into the Bay of Bengal, in lat. 21° 51', long. 90°. The entrance is spacious, being about three leagues wide, between the two great banks or shoals which form it, and the depth of water in the great channel is sufficient for the passage of large ships.

HOOSAINPOOR.—A town situate on the right bank of the river Ganges, in the British district of Furruckabad, lieut.-gov. of the N.W. Provinces, contiguous to the military station of Futtygurh. Distant three miles E. from Furruckabad. The population is stated to be 11,698. Lat. 27° 22', long. 79° 42'.

HOOSHUNGABAD.—See HOSHUNGABAD.

HOOSSEIN BELA, in Sind, a village on the route from Subzulcote to Shikarpoor, and 15 miles E. of the latter place. It is situate on the left bank of the Indus, here crossed by a much-frequented ferry, generally called the ferry of Azeezpoor, which place, however, is above a mile north-east. The Indus is here divided into two branches: the eastern, called the *Dund*, is about 150 feet broad and twenty-four feet deep; the western branch is very wide, between thirty and forty feet deep, and is separated from the eastern by an island a mile and a half in breadth. At a short distance higher up, there is a good ferry over the undivided stream of the river; and that would be a preferable place for the passage of any considerable number of persons, but the boatmen prefer the lower ferry, as nearer their village. This latter ferry is sometimes called *Amil Got*, from the village of *Amil*, on the western side. (See *AMIL GOT*.) Hoossein Bela is in lat. 27° 52', long. 69°.

HOOSUNABAD.—A town in Hyderabad, or dominions of the Nizam, 60 miles W.S.W. from Hyderabad, and 62 miles N. by E. from Raichoor. Lat. 17° 3', long. 77° 42'.

HOOTEECHENEE.—A town in the principality of Cashmere, or dominions of Gholab Singh, 55 miles S.W. by S. from Sirinagar, and 72 miles N.N.E. from Wazeerabad. Lat. 33° 20', long. 74° 40'.

HOOVIN HUDDAGULLY.—A town in the British district of Bellary, presidency of Madras, 165 miles N.N.E. of Mangalore. Lat. 15°, long. 75° 59'.

HORTEE.—A town in the British territory of Sattara, presidency of Bombay, 20 miles N. by E. of Bejapoor. Lat. 17° 6', long. 75° 51'.

HOSANG HAJOO.—A town of Eastern India, in the British district of Cachar, 116 miles S.E. of Gowhatty. Lat. 25° 7', long. 93° 6'.

HOSHIARPUR, in the Punjab, a small

town near the southern base of the Himalaya Mountains, and on the route from Lahore to Nadaun. Lat. 31° 33', long. 75° 57'.

HOSHUNGABAD, a district or subdivision of that portion of the British possessions known as the Saugor and Nerbudda territory, and now placed under the jurisdiction of the lieutenant-governor of the North-West Provinces. No regular survey has been made, but its area is estimated at 1,916 square miles. The total amount of the population, according to a recent census, is 242,641; but no distinctions of creed, caste, or occupation, were noticed. An attempt was made to supply this deficiency by conjectural means; under which operation the people were thus distributed:—Hindoos, agricultural, 108,468; non-agricultural, 122,685; Mahomedans and others, not Hindoos, agricultural, 654; non-agricultural, 10,834. These proportions derive plausibility from the results of a former census, which probably furnished the chief ground for their assumption, but the total only can be entirely relied on. This district is so remarkable for fertility, as to be commonly styled the garden of Central India. It possesses also one of the elements of mineral wealth, in coal of excellent quality, and it is believed in abundant quantity. On a comparison with some of the coal imported from the northern part of Great Britain, that of Hoshungabad was found to merit a preference. The great distance of the beds from the coast is, however, at present a serious impediment to its being brought extensively into use.

HOSHUNGABAD.—The principal place of the British district of the same name. It is situate on the left or south bank of the river Nerbudda, stated to be here 900 yards wide, and subject, during the periodical rains, to rise to such an extent as to cause very considerable inundations. Here is a fort, of quadrangular ground-plan, and having high walls. The town is irregularly built, and the houses being much dispersed, the population is not dense. The river is not fordable opposite the town, the water at the shallowest part, even in the season when lowest, being between five and six feet deep, and flowing over an irregular rocky bottom. It is infested with alligators, both of the long-snouted and bull-mouthed kinds. There are thirteen ghats or fords over the river, within twelve or fourteen miles of Hoshungabad, becoming passable in the beginning of winter, and continuing so until spring advances. That nearest the town was found, when the water was lowest, to be covered three feet deep. East of the town is a small cantonment of British troops belonging to the Saugor division, and the town itself is the seat of a political agency subsidiary to that of Saugor.

Hoshungabad was founded about the year 1433, by Hoshung Shah, sovereign of Malwa, whose remains were deposited there, but subsequently removed to Mandoo. In 1562 it was, with the rest of Malwa, conquered by Akbar. On the dismemberment of the empire

of Delhi, Hoshungabad was appropriated by the nawaub of Bhopal, from whom it was taken by storm by the rajah of Nagpore or Berar, in 1796. It was, however, soon after retaken by the ruler of Bhopal, and again, in 1807, taken by the rajah of Nagpore, by whom it was ceded, in 1818, to the British government. Distant S.W. from Saugor, by Searmow, 114 miles; S. from Agra, by Saugor, 388; S.W. from Allahabad 428; N.W. from Calcutta, by Allahabad, 924; E. from Mhow 144. Lat. 22° 44', long. 77° 44'.

HOSKOTE, or **OOSCOTTA**, in the territory of Mysore, a town. It is a considerable place, and has a mud fort, which, in 1761, was besieged by Basalut Jung, of Hyderabad, who, after ineffectually attempting to reduce, received the surrender of it from Hyder Ali, together with three lacs of rupees, in consideration of his investing that adventurer with the title and office of nawaub of Sera, a dignity and country which Basalut Jung had no claim either *de jure* or *de facto* to dispose of. Distant from Bangalore, N.E., 16 miles. Lat. 13° 5', long. 77° 52'.

HOSPETT.—A town in the British district of Bellary, presidency of Madras, 35 miles W.N.W. of Bellary. Lat. 15° 16', long. 76° 29'.

HOSSANPOOR.—A town in the Mysore, on the right bank of one of the branches of the Cauvery river, and 18 miles W. from Seringapatam. Lat. 12° 24', long. 76° 29'.

HOSS DROOG.—A town in the Mysore, 100 miles N. by W. from Seringapatam, and 117 miles N.E. from Mangalore. Lat. 13° 49', long. 76° 20'.

HOSSDURG, in the British district of South Canara, within the territory subject to the presidency of Madras, a town on the route from Cananore to Mangalore. It has a large fort, well built of laterite, which material abounds throughout the country. It is on a fine rising ground, and, viewed from afar, looks well. Here is a temple, established by the rajah of Ikeri, who built the fort. Lat. 12° 18', long. 75° 10'.

HOSUNPOOR.—A town in the British district of Mymensing, lieut.-gov. of Bengal, 31 miles S.E. of Nusseerabad. Lat. 24° 23', long. 90° 40'.

HOSURU.—A fortified town, formerly within the territory of Mysore, now within the British dominions. Its position has often rendered it the object of obstinate contention between the powers of Mysore and the Carnatic. In 1654, it was taken by the rajah of Mysore; in 1768, it fell into the hands of the British: after various vicissitudes, it returned to the possession of Mysore, but was occupied by the British in 1791, on the advance of Lord Cornwallis against Seringapatam. In the arrangements consequent on the wars with Tipoo Sultan, it was finally annexed to the British possessions, being included in North Arcot. Distance from Seringapatam, E., 80 miles;

Bangalore, S.E., 23; Madras, W., 200. Lat. 12° 45', long. 78° 54'.

HOWRA, in the British district of the Twenty-four Pargunnahs, forming part of the lower provinces of Bengal, a town on the right bank of the river Hooghly, opposite Calcutta, of which place, indeed, it may be considered a suburb, and with which it is about to be more closely connected by means of a bridge over the Hooghly. It is described by Heber as a considerable place, chiefly inhabited by ship-builders, but containing some pretty villas. The Hooghly, nearly a mile wide, is covered with large ships and craft of all kinds. The town has been selected as the site for the terminus of the railroad from Calcutta to the North-West Provinces. Lat. 22° 36', long. 88° 23'.

HUBB.—A river forming for a considerable distance the western frontier of Sind, and dividing it from Beloochistan. It has been traced downwards from Hoja Jamote, on the northern boundary of Lus, in lat. 26° 12', long. 66° 51', and is supposed to rise near that place. For about twenty-five miles in the upper part of its course, it flows south-easterly, and then turning due south, holds its way for about fifty miles in that direction. It then turns to the south-west, and, after a total length of 100 miles, falls into the Arabian Sea, on the north side of Cape Monze, in lat. 24° 54', long. 66° 43'. De la Hoste states, that for a distance of fourteen miles from the mouth, water was in the end of summer found to the depth of eight inches, and that in some places deep pools exist, abounding in fish and alligators. He adds, that the river is said never to fail in the driest seasons. Maason, however, states, that it is only on extraordinary occasions that the water of the Hubb reaches the sea; and in this he is supported by Hart, who crossed it about fifteen miles above the mouth, where the channel was 100 yards wide. Though, in consequence of heavy rains, there was then a large body of running water, he found but a small stream on his return a short time after, and was informed it would soon cease to flow, and that water would then be found only in detached pools. The whole course is described as a succession of rocky or gravelly gorges in the rugged and barren Pubb Mountains.

HUBBEEGUJE.—A town in the British district of Silhet, lieut.-gov. of Bengal, 50 miles S.W. of Silhet. Lat. 24° 19', long. 91° 23'.

HUBRA.—A town in the British district of Dinajepoor, lieut.-gov. of Bengal, 20 miles E. of Dinajepoor. Lat. 25° 31', long. 88° 58'.

HUBSHEE.—See **JINJEERA**.

HUBUNNAGAR, in the British district of Allahabad, lieut.-gov. of the N.W. Provinces, a village on the route from the cantonment of Allahabad to Futtehpore, and 37 miles N.W. of the former. Lat. 25° 40', long. 81° 26'.

HUDEEALF, in Gurwhal, a village on the left bank of the Bhagereetee, as the

Ganges is called in the upper part of its course. Raper describes it as "a very pretty village, with fine cultivation." It is situate opposite the mouth of the Nagur, a torrent which falls into the Bhageerettee on the right side. Hudealee is in lat. 30° 33', long. 78° 24'.

HUGRY.—A river rising in the Mysore, in lat. 13° 28', long. 75° 55', and, flowing first in a north-easterly, and subsequently in a northerly direction for 125 miles, it passes into the British collectorate of Bellary, through which, maintaining its northerly course, it flows for 100 miles, to its junction with the Toongabudra, on the right side, in lat. 15° 44', long. 76° 58'.

HUJAMREE, in Sind, is an offset of the Sata, or great eastern channel of the Indus, and is called in the upper part of its course the Seeahn. The Hujamree mouth is wide, but rapidly narrows inland to about 500 yards: at Vikkur, twenty miles from the sea, it is only about 170 yards wide; and still higher up, near its junction with the Sata, its breadth is found not to exceed fifty yards. In 1831 it was navigable for boats from the sea to the entrance into the Sata, as the small flotilla which conveyed Captain Burnes and his party in that year passed this way. According to the statement of that officer, there were then fifteen feet of water on the bar at high tide, and a depth of four fathoms all the way to Vikkur. He observes, however, adverting to the changing character of the river, "The next season perhaps Vikkur will be deserted." The anticipated change occurred, though not so early as suggested. In 1839, the British troops marching from Bombay to Afghanistan, ascended the Hujamree and landed at Vikkur; and in the course of the same year this branch was closed by a change in its channel, caused by the violence of the current. The Hujamree mouth is in lat. 24° 16', long. 67° 18'.

HUKUMUTWALA, in Sirhind, a village on the route from Ferozpur to Simla, and 12 miles S.E. of the former town. Distant N.W. from Calcutta 1,159 miles. Lat. 30° 52', long. 74° 35'.

HULDI, in the British district of Ghazee-pore, lieutenant-gov. of the N.W. Provinces, a village on the route from Ghazee-pore cantonment to Chupra, 52 miles E. of the former. Lat. 25° 45', long. 84° 15'.

HULDOOG GHAT.—A ferry near the village of Surian, in the British district of Kumaon, lieutenant-gov. of the N.W. Provinces, and forming a communication between the East-India Company's territories and Nepal: S.E. of Potoraghar cantonment 11 miles. Lat. 29° 28', long. 80° 21'.

HULDOUR, in the British district of Bijnour, lieutenant-gov. of the N.W. Provinces, a town on the route from Bijnour to Moradabad, 10 miles S.E. of the former. Lat. 29° 17', long. 78° 21'.

HULDYPOOKRE.—A town in the British

district of Pooralia, lieutenant-gov. of Bengal, 143 miles W. of Calcutta. Lat. 22° 37', long. 86° 8'.

HULHALLI.—A town in the Mysore, on the right bank of one of the branches of the Cauvery river, and 25 miles S.S.W. from Seringapatam. Lat. 12° 6', long. 76° 37'.

HULKANT, in the British district of Agra, lieutenant-gov. of the N.W. Provinces, a town on the south-eastern frontier towards Gwalior, and 50 miles S.E. of the city of Agra. Lat. 26° 47', long. 78° 46'.

HULLAGOOR.—A town in the Mysore, on the left bank of one of the branches of the Cauvery, and 33 miles E. from Seringapatam. Lat. 12° 27', long. 77° 14'.

HULLEE.—A town in the British province of Nagpoor, 133 miles S.E. from Nagpoor, and 135 miles E. by S. from Chanda. Lat. 19° 38', long. 81° 25'.

HULLEEA, in the British district of Mirzapoor, lieutenant-gov. of the N.W. Provinces, a town on the route from Rewah to Benares, 53 miles S.W. of the latter. Lat. 24° 50', long. 82° 24'.

HULLEEJEH, in Sind, a village on the route from Kurrachee to Jurrak, and 50 miles E. of the former place. It is situate among the low hills north-west of Tatta, and near the western shore of a considerable *dund* or piece of water, communicating with the Indus by the Ghara watercourse. Lat. 24° 47', long. 67° 46'.

HULLEHNOH.—A town in the native state of Bhurtpoor, 51 miles W. from Agra, and 86 miles E. from Jeypoor. Lat. 27° 7', long. 77° 17'.

HULLIAL.—A town in the British district of North Canara, presidency of Madras, 19 miles W.S.W. of Dhawar. Lat. 15° 21', long. 74° 50'.

HULLOLE, in Guzerat, or territory of the Guicowar, a town at the north-western base of the mountain of Pawangarh. Distance from Ahmedabad, S.E., 65 miles. Lat. 22° 32', long. 73° 28'.

HULSUNGEE.—A town in the British territory of Sattara, presidency of Bombay, 36 miles N. by E. of Beejapoor. Lat. 17° 19', long. 75° 56'.

HULWUD, in the peninsula of Kattywar, province of Guzerat, a town in the prant or district of Jhalawar, near the northern frontier, towards the Runn or Salt-marsh. It was formerly of much importance, but is now rather decayed, yet has eight villages dependent on it. In its relations with the British government, it is considered united with the tallook of Drangdra, and they are officially returned as conjointly having a population of 51,709, and paying an annual tribute of 43,909 rupees. Distance from Ahmedabad, W., 85 miles. Lat. 23°, long. 71° 10'.

HUMAPUKHUR.—A town in the native state of Nepal, 71 miles N.W. from Khatmandoo, and 135 miles N.E. by N. from Goruckpoor. Lat. 28° 24', long. 81° 28'.

HUMBER, in Sirhind, a village on the route from Lodiana to Ferozepoor, and 10½ miles W. of the former town. It contains a few shops, and is supplied with water from two wells. The road in this part of the route is good, passing through an open and partially-cultivated country. Population about 600. Distant N.W. from Calcutta 1,099 miles. Lat. 30° 57', long. 75° 46'.

HUMEERPOOR.—A British district under the lieut.-gov. of the N.W. Provinces, deriving its name from its principal town, and forming, with Calpee, a collectorate. The united territory is bounded on the north-east by the river Jumna, dividing it from the British districts Etawa, Cawnpore, and Futtehpoor; on the east and south-east by the British district of Banda; on the south by the native states of Churkaree and Chutterpoor; and on the west by the territories of Jhansi and the British district of Jaloun. It lies between lat. 25° 7'—26° 26', long. 79° 20'—80° 25', and has an area of about 2,340 square miles. The principal rivers are the Jumna, the Betwa, the Dassaun, and the Cane. The average elevation above the sea, of the waterway of the Jumna, at the northern extremity of the district, is probably about 550 feet, and perhaps no point within it is 300 feet above that height. The soil is favourable to the growth of sugarcane, cotton, indigo, the aal-plant (*Morinda multiflora*), wheat, barley, *Holcus sorghum*, *Holcus spicatus*, and every species of the pulse and lentil tribe. In the more sterile parts are grown several species of grain of the millet kind. The cotton, which is produced on the better soil in great abundance and of good quality, is largely transmitted from Calpee and other places on the Jumna, to the lower provinces. Under the last revenue settlement of the N.W. Provinces, the government demand upon the land of this district was fixed for a term of years, and is not liable to increase till the year 1872.

The climate is not favourable to the European constitution, having a tendency to occasion intermitting fevers; but the natives appear to enjoy a full average share of health. During the latter part of spring and commencement of summer the heat is very great. The population consists generally of Boondelas, a spurious tribe of Rajpoots. There are several other tribes of less importance. The number of inhabitants, as ascertained by actual enumeration in 1853, is stated to be, Hindoo agricultural, 380,104; Hindoo non-agricultural, 128,481; Mahomedans and others, agricultural, 14,679; same classes, non-agricultural, 25,340; total, 548,604. The number of towns or villages containing less than 1,000 inhabitants is returned at 663; those containing more than 1,000 and less than 5,000, at 164; those containing more than 5,000 and less than 10,000, at five; and those containing more than 10,000, at two. The principal military routes are—1. From north to south, from Cawnpore to Banda, by Humeerpoor; 2. from north to south, a little east of

the last-named, from Cawnpore to Banda, by Chilah Tarah ferry; 3. from south-east to north-west, from Banda to Calpee; 4. from north to south, from Calpee to Kitha, and thence to Chutterpoor and Saugor; 5. from south-east to north-west, from Banda to Gwalior.

The tract of which this district forms part, seems to have been always of some importance in India, and Ferishta relates that Vasdev, king of Kunouj, about the year 350, founded the fort of Calpee. It was amongst the earliest of the Mussulman conquests in India, having been taken in 1196 by Kutbuddin, viceroy of Muhammed of Ghor. It submitted to the Timurian invader Baber in 1527, and was frequently the scene of his military operations. A British force invaded it in 1778, crossing over the Jumna from the Doab, and taking the fort of Calpee. In the same year, General Goddard led his army from that place on the celebrated march which he performed across India to Surat. Towards the close of the last century, it was overrun by the Mahrattas, and subsequently transferred by Hummat Bahadur, one of their chiefs, to the East-India Company, to whom it was guaranteed by the Peishwa, in 1802, by Art. IV. of the treaty of Bassein; and in the following year the British troops took Calpee and occupied the country.

HUMEERPORE, the principal place of the British district, and also of the pergunnah of the same name, a town situate on the tongue of land or doab at the confluence of the Betwa and Jumna, on the right bank of the latter. The Jumna, according to Jacquemont, in February, has a stream of 1,000 feet wide, running in a channel half a mile in breadth, with a rapidity of three or four miles an hour. The town is considerable, consisting originally of several villages grouped together. It is a civil station; the European establishment consists of one magistrate and collector, one joint magistrate and deputy collector, and one assistant to the magistrate and collector. It is on the route from Banda to Cawnpore, 36 miles N. of the former, 39 S. of the latter, 28 S.E. of Calpee, 155 S.E. of Agra, 110 N.W. of Allahabad, 575 N.W. of Calcutta. Lat. 25° 58', long. 80° 14'.

HUMPASAGRA.—A town in the British district of Bellary, presidency of Madras, 59 miles W. of Bellary. Lat. 15° 9', long. 76° 8'.

HUNDIA, HINDIA, or HUNDERAH, in the British district of Allahabad, lieut.-gov. of the N.W. Provinces, a small town on the route from the city of Allahabad to that of Benares, and 23 miles S.E. of the former. Lat. 25° 22', long. 82° 16'.

HUNDOUR, in the district of Pertabgurb, territory of Oude, a town two miles from the right bank of the river Sai, 85 S.E. of Lucknow. Butter estimates the population at 3,000, all Hindoos, except about twenty Mussulman agriculturists. Lat. 25° 55', long. 81° 52'.

HUNDRY.—A river rising in lat. 15° 16', long. 77° 25', in the British collectorate of

Bellary, and, flowing in a circuitous but generally north-easterly direction for fifty miles through that district, and for twenty-eight miles through Kurnool, it falls into the Toongabudra on the right side, near the town of Kurnool, in lat. $15^{\circ} 49'$, long. $78^{\circ} 6'$.

HUNDY ANNANTPOOR.—A town in the British district of Bellary, presidency of Madras, 59 miles N.W. of Bellary. Lat. $14^{\circ} 41'$, long. $77^{\circ} 41'$.

HUNGOO, in the Daman division of the Punjab, a town situated 30 miles from the right bank of the Indus, 36 miles S.S.W. of the town of Peshawur. Lat. $33^{\circ} 31'$, long. $71^{\circ} 25'$.

HUNGRUNG, in Bussahir, a subdivision of the district of Koonawur, is a very elevated region, bounded on the south and west by the lofty limestone range of Hungrung, on the north by Ladakh, and on the east by Chinese Tartary. It lies between lat. $31^{\circ} 48'$ — $32^{\circ} 8'$, long. $78^{\circ} 25'$ — $78^{\circ} 45'$.

HUNGRUNG, in Bussahir, a pass in the district of Koonawur, over a range of limestone mountains bounding the district of Hungrung on the south-west. The route from the south-west proceeds up a dell to the crest, which commands an extensive view in both directions; the southern, or Koonawur, side, and the northern, or Tartarian. **Hulton**, who crossed the pass in June, found furze and junipers growing on the south-western side as far as the summit; but on the northern side, the snow reached continuously several hundred yards from the crest. Several travellers have mentioned the strongly-marked change which takes place in the aspect of the country in proceeding northward across this range. "The change in the nature of the country is most sudden: looking from the summit of the range in a northerly direction over Hungrung, the country is seen to wear a sad and sombre air of cheerless desolation; not a tree is to be seen, and the black and crumbling hills are either wholly barren, or clothed with nothing of larger growth than the dwarf willow and the dog-rose. The hills are chiefly of the secondary class, and being more rounded in their outline, want the grand and almost terrific beauty of the towering granitic peaks which so strongly characterize the scenery of Koonawur." "On the southern side of this range lies the thickly-wooded district of Koonawur, where cultivation is often carried in steps nearly to the summits of the mountains, and presenting a rich and cheerful picture, which delights the eye, and imparts a feeling of joyousness and security to the traveller as he wanders on through forests of majestic pines." The adventurous and hardy Gerard, who ascended the pass in August, found it then free from snow, but the cold so intense, that he became quite benumbed; the blood forsook the surface of his body, and he travelled three miles, half-torpid and congealed. The elevation of the crest above the sea is 14,800 feet. Lat. $31^{\circ} 48'$, long. $78^{\circ} 35'$.

HUNNOOMANA, in Baghelbund, or the territory of Rewa, a village on the route by the Kutra Pass, from the cantonment of Allahabad to the town of Rewa, and 74 miles S.W. of the former. It is situate on an elevated table-land, where the prevailing formation of red sandstone is continually exposed to view. Cultivation is consequently scanty, and supplies are scarce at the village. Water is obtained from tanks. Elevation above the sea 1,219 feet. Lat. $24^{\circ} 47'$, long. $82^{\circ} 9'$.

HUNSASIR.—A town in the Rajpoot state of Jodhpoor, 80 miles N. by E. from Jodhpoor, and 42 miles S. from Beekaneer. Lat. $27^{\circ} 25'$, long. $73^{\circ} 20'$.

HUNSGUNJ, in the British district of Muttra, lieut.-gov. of the N.W. Provinces, a village on the left bank of the Jumna, opposite the city of Muttra. Here, on the route from Allygurh to Muttra, is a ferry over the river during the rainy season, and for the rest of the year a bridge of boats. Lat. $27^{\circ} 31'$, long. $77^{\circ} 45'$.

HUNTER'S ISLAND.—A small island near the coast of Arracan, and situate just outside of Andrew's Bay. Lat. $18^{\circ} 16'$, long. $94^{\circ} 25'$.

HURAGAON.—A town in the native state of Gwalior, or dominions of Scindia, 52 miles W. from Hoesungabad, and 70 miles E. from Indore. Lat. $22^{\circ} 43'$, long. $76^{\circ} 58'$.

HURAH, in the territory of Oude, a small town on the route from the cantonment of Cawnpore to that of Pertaubgurh, 10 miles S.E. of the former, and situate close to the left bank of the Ganges. It is styled Harba by Butter, who estimates the population at 6,000. The inhabitants, according to the same authority, are money-changers, dealers in cloth, in grain, and fermented liquors, weavers, pandits or professors of learning, medical men, servants, bird-catchers, raiyats or cultivators, and labourers. Garden, however, merely styles it a small village, affording no supplies. The road is bad to the north-west, or towards Cawnpore; better to the south-east, or towards Pertaubgurh. Lat. $26^{\circ} 22'$, long. $80^{\circ} 32'$.

HURAWUL, in Sirhind, a town fifty miles from the left bank of the Sutlej. It is comprised within the possessions of a Sikh chief under the protection and control of the British. Distant N.W. from Calcutta, by way of Delhi and Munuk, 1,043 miles. Lat. $30^{\circ} 17'$, long. $75^{\circ} 20'$.

HURDA, in the territory of Gwalior, or possessions of Scindia's family, a town on the route from Baitool to Mow, 76 miles N.W. of former, 109 E. of latter. It is the principal place of a pergunnah of the same name, has a bazar, and is well supplied with water from a stream. Its pergunnah, united with that of Handya, adjacent, yields an annual revenue of 140,000 rupees, and, by the peace of 1844, was with it placed under British management for the maintenance of the augmented Gwalior contingent. Lat. $22^{\circ} 18'$, long. $77^{\circ} 7'$.

HURDAGUR.—A town in the British province of Nagpore, 23 miles N.W. from Deogur, and 42 miles E.N.E. from Baitool. Lat. $22^{\circ} 7'$, long. $78^{\circ} 31'$.

HURDANHALLI, in the Mysore, a small fortified town, the principal place of a tallook or subdivision of the same name. It is situate in the immediate vicinity of three considerable tanks. Distant from Seringapatam, S.E., 50 miles. Lat. $11^{\circ} 52'$, long. $77^{\circ} 1'$.

HURDOKE.—A town in the territory of Oude, 38 miles S.S.E. from Lucknow, and 54 miles E. from Cawnpore. Lat. $26^{\circ} 23'$, long. $81^{\circ} 17'$.

HURDOOAGUNJ.—A town in the British district of Allyghur, lieut.-gov. of the N.W. Provinces, situate six miles E. from Allyghur. The population is stated to be 8,292. Lat. $27^{\circ} 56'$, long. $78^{\circ} 13'$.

HURDWAR.—A town in the British district of Saharanpore, lieut.-gov. of the N.W. Provinces. It is called sometimes Gangadwara, or the "Gate of the Ganges," being situate on its western or right bank, at the southern base of the Sewalik range, here intersected by a ravine or gorge, by which the river, finally leaving the mountainous region, commences its course over the plain of Hindostan. The stream here is divided by islands into three channels, the principal one being on the eastern side. They are all so shallow in places, that the passage of large unloaded boats through them is not practicable without difficulty. The breadth of the river in the rainy season, from the extreme eastern to the extreme western bank, is represented to be "a full mile." The town, which has an appearance of great antiquity, is situate close to the western bank, and the foundations of many of the houses are in the bed of the river. Raper, who visited it in 1808, describes it, at that time, as very inconsiderable, having only one street, about fifteen feet in breadth and a furlong and a half in length. Most of the houses have the upper part of brick, the lower of stone, which is of good quality. Chiefly, perhaps, from this town being situate close to the point at which the Ganges enters Hindostan, it is beyond all others visited in pilgrimage; the multitudes which throng to it being, however, beyond doubt, increased by the facility of access to it from various parts. Ablution in the river is the great rite practised here by the Hindoo pilgrims, their belief being, that purgation from sin is thus obtained. According to their notions, the orthodox place for bathing is at the ghat or stairs leading down to the river, and called Harika Pauri, or "the stairs of Vishnu." Priority in ablution at the propitious moment is considered to be of great importance in a spiritual point of view, and many persons have formerly perished in the attempt to secure the advantage, being either crushed to death in the rushing crowd, or precipitated into the river, and there drowned. In 1819, "in consequence of a desperate rush made by the infatuated

pilgrims to gain a precedence in bathing, 430 persons were squeezed to death; among whom were several British sepoy, placed as guards to prevent this very catastrophe." The propitious moment is laid down by astrologers, according to their alleged calculations and observations, and sometimes happens at midnight. Since the occurrence of the accident above mentioned, the East-India Company's government has caused the old ghat to be replaced by one of sixty steps, and 100 feet wide. The rigidly pious, and those who dread to enter the water unassisted, are supported by a Brahmin on each side. As, however, the depth close to the ghat is not above four feet, the majority plunge in unassisted, men and women bathing together indiscriminately.

The assemblage of pilgrims, which is annual, is attended by people from all parts of India, and from many places far beyond its bounds. "The bathing commences in the month of Chaitra, when the sun is in Mina or Pisces, and concludes on the day he enters Mesha or Aries, agreeably to the solar computation of the Hindoos, and corresponding with the 10th April, on which day the sun has actually advanced 204° in that sign. Every twelfth year is celebrated with greater rejoicing, and is called the Cumbh-mela, so denoted from the planet Jupiter being then in the sign of Aquarius. Whether this sign be symbolical of the purpose for which they meet, or whether the conjunction be arbitrary or accidental, is not ascertained; but a pilgrimage at those duodecennial periods is considered the most fortunate and efficacious." The 10th of April is the Purbi, or last day of bathing. The Mela or fair, held on this occasion for commercial purposes, is the means of very extensive traffic. From the Punjab, and from the countries west of the Indus, are brought camels, horses, mules, salt, antimony, fine woollens and piece-goods, tobacco, asafoetida, dried fruits (such as apricots, figs, prunes, raisins), almonds, pistachio-nuts, and pomegranates; from Cashmere, shawls and other fine woollen fabrics; from Rajpootana, various fancy-goods, such as chiras or spotted turbans, toys, and other wares in metals and ivory, besides inferior woollens, and a great number of camels; from the British provinces, cotton and silk fabrics, and European goods. There are besides less-important articles of commerce in great quantity and variety; and the food required for the vast assembled multitude constitutes an extensive and lucrative subject of traffic. The number of those who on these occasions resort to Hurdwar from various motives is enormous. Hardwicke, who visited the Cumbh-mela in 1796, and paid much attention to the subject, estimated the number at two millions and a half; and Raper, at the following Cumbh-mela, in 1808, says, "If we estimate the number at two millions of souls, we shall probably fall short rather than exceed the reality." No such number is, however, at any one time assembled; as those who visit the place for the purpose of

bathing, arrive in the morning and depart in the evening, or on the next day; so that there is a constant succession of strangers. Such a collection of people, under the influences which bring them together, and rule them, may readily be imagined ripe for any acts which their spiritual leaders may suggest; and the rivalry of conflicting parties has often led to sanguinary conflicts. In 1760, on the Purbi, two rival sects,—the Gosains and the Bairagis, met in battle, which terminated in the defeat of the latter, of whom, according to report, 18,000 were slain. At the time of Hardwicke's visit, in 1796, the Gosains, venturing to resist the better-organized Sikh pilgrims, were defeated with the loss of about 500 men. The latest of the great duodecennial gatherings took place in 1844, and passed off without disturbance.

Hurdwar formerly bore the name of Koupela or Goupela. According to Wilford, it was so named from an ancient ascetic. "Capila, a most religious man, performed for a long time religious austerities near Hurdwar, where they show to this day the place where he lived, under the name of Capila-Sthan; hence the pass of Hurdwar is sometimes called the pass of Capila or Kupeleh." Tamerlane, marching to this place after taking Delhi, massacred a multitude of Hindoos here assembled, and carried off a rich booty. The elevation of Hurdwar above the sea is 1,024 feet; and a little below the town is the head of the great canal of irrigation for the North-Western Provinces, for an account of which see GANGES RIVER. Distant N.W. from Calcutta, by Lucknow and Moradabad, 924 miles. Lat. 29° 57', long. 78° 14'.

HUREAWALA, in Sirhind, a village on the route from Ferozapore to Simla, and 24 miles S.E. of the former town. Distant N.W. from Calcutta 1,100 miles. Lat. 30° 42', long. 74° 40'.

HUREERAMPOOR.—A town in the British district of Dacca Jelalpoor, lieutenant-gov. of Bengal, 121 miles N.E. of Calcutta. Lat. 23° 39', long. 89° 58'.

HURNAL, in the Sinds Sagur Doab division of the Punjab, a town situated 26 miles from the right bank of the Jhelum, 96 miles S.E. by E. of the town of Peshawur. Lat. 33° 19', long. 73° 8'.

HUROOKEE THAN, in the British district of Kumaon, lieutenant-gov. of the N.W. Provinces, a town situated 31 miles N.E. of Almora. Lat. 29° 54', long. 80° 4'.

HUROONUCLA, in the British district of Bareilly, lieutenant-gov. of the N.W. Provinces, a village on the route from the town of Bareilly to Seetapoor, and four miles S.E. of the former. Lat. 28° 22', long. 79° 31'.

HUROOR.—A town in the British district of Salem, presidency of Madras, 34 miles N.E. of Salem. Lat. 12° 4', long. 78° 30'.

HUROWRAH, in the British district of

Saharanpoor, lieutenant-gov. of the N.W. Provinces, a village on the route from the town of Saharanpoor to Dehra, and eight miles E. of the former place. It is situate in a productive and well-cultivated country, on the river Hindon, so that water and other supplies are abundant. Distant N.W. from Calcutta 1,015 miles. Lat. 30°, long. 77° 45'.

HURPUNHULLY, in the British district of Bellary, presidency of Madras, a considerable town, situate amidst tanks discharging their redundant water into a tributary of the Tumbudra. The surrounding country is fertile and highly cultivated. Distance from Bangalore, N.W., 165 miles; Bellary, S.W., 65; Madras, N.W., 380. Lat. 14° 48', long. 76° 2'.

HURRAH.—A town in the British district of Nuddea, lieutenant-gov. of Bengal, 72 miles N. of Calcutta. Lat. 23° 36', long. 88° 31'.

HUREAH, in the Punjab, a village on the route from Ramnuggur to Pind Dadun Khan, and 14 miles E. of the latter place. It is situate near the left bank of the river Jhelum, in a country described by Burnes as a sterile waste of underwood. Lat. 32° 37', long. 73° 20'.

HURERANAH, a British district under the lieutenant-gov. of the N.W. Provinces, is bounded on the north-west, north, and north-east by Sirhind; on the east by the British district of Rohtuk and by Dadree; on the south by Dadree and Loharoo; and on the west by the state of Bikaner and the British district of Bhutteana. It lies between lat. 28° 33'—29° 49', long. 75° 20'—76° 22', and comprehends an area of 3,300 square miles. Its soil appears to be for the most part formed of alluvial matter swept down by the Gagur, the Chitang, and other streams flowing from the Sub-Himalaya, and is, as might be expected, very fertile, producing, where duly watered, large crops of rice, wheat, barley, millet, pulse, and various other productions. Their luxuriance, however, depends on the periodical rains falling at the close of summer and early part of autumn, when the inhabitants partially provide for their future wants by preserving the water in numerous tanks lined with masonry. These supplies fail, however, as the hot season advances, and then recourse must be had to wells, of which some are 100 feet in depth, some 120, and some even more. The necessity for this is imposed by the fact of the land-springs lying very far beneath the surface, and the mountain-torrents being lost by absorption or evaporation farther north, in Sirhind. The country is consequently for great part of the year extensively arid; the few springs to be met with are for the most part brackish; and the want of water is a source of distress. This tract was a favourite hunting-ground of Feroz Toghluq, the renowned king of Delhi, the ruins of whose buildings still occupy several square miles, and who, in the year 1356, to obtain a supply of water, as well for his numerous followers as

for the purposes of irrigation, made a canal from the Jumna, which, passing by Hansi and Hissar, proceeded westward until it joined the river Gagur. This canal, which had been nearly obliterated, was cleared out in 1825; and by this process, the extension of the main line, and the construction of additional branches, was made largely available for the purposes of irrigation, as well as for rafting timber and navigating small barges.

The jungles and wastes of Hurreeanah still harbour many wild beasts. Tigers are common, and lions are sometimes met with, though generally thought to infest no part of Hindostan, except Guzerat and its immediate vicinity. The population is scanty in comparison with the extent of the district, amounting only to 330,852; of whom 207,144 are Hindoos engaged in agriculture, 40,762 Hindoos non-agricultural, 61,827 Mahomedans and others agricultural, and 21,119 of the like description non-agricultural. The excess in the number of Hindoos over the Mahomedans is, as thus appears, very much greater than in some other districts of this part of India. Hansee and Hissar are the only towns in the district which contain more than 10,000 inhabitants.

Hurreeanah was, at the close of the eighteenth century, the scene of a bold but abortive attempt by George Thomas, an Irish adventurer, to found an independent state under his own rule. He fortified Hurreeanah, and collected there about 6,000 persons, cast cannon, made muskets and other arms, and coined rupees in his own name. He was, however, attacked by a vastly superior force of Maharrattas, commanded by the French adventurer Perron, and being overpowered after a gallant resistance, took refuge in Bengal, where, in 1802, he died on his journey towards Calcutta.

HURREEHURPOOR.—A town in the native state of Nepal, 29 miles S. by E. from Khatmandoo, and 62 miles S.W. from Bettiah. Lat. 27° 18', long. 85° 23'.

HURREEPOOR, in an outlying district of Puteeala, a village with a fort, on the route from Subathoo to Simla, and five miles N. of the former post. It is situate on a principal feeder of the Gunbur, and is the property of the rajah of Puteeala. Elevation above the sea 3,147 feet. Lat. 31° 1', long. 77° 8'.

HURRIANA.—See **HURREKANAH.**

HURRICKPOOGUR.—A town in the British district of Cuttack, lieutenant-gov. of Bengal, 49 miles S.E. of Cuttack. Lat. 20° 4', long. 83° 31'.

HURRIORPOOR.—A town in the native state of Sirgoojah, on the south-west frontier of Bengal, 136 miles S.W. from Sherghotty, and 108 miles W. from Lohadugga. Lat. 28° 30', long. 83° 5'.

HURRISUNKRA, in the British district of Nuddes, lieutenant-gov. of Bengal, a town on the route from Berhampore to Pubna, 35 miles E. of former, 25 W. of latter. The Pudda,

or great eastern branch of the Ganges, which formerly flowed through this town, has now deserted its old channel, and flows two miles more to the north. Hurrisunkra is 102 miles N. of Calcutta. Lat. 24° 2', long. 88° 50'.

HURRUND, or **HURBOOND.**—A small and hilly district, with a town of the same name, in the Daman division of the Punjab, south-westward of the Derajat. The town of Hurrund is situated within the British dominions, on the route from Dera Ghazee Khan to Cutch Gundava. It has a fort and a considerable number of houses. Lat. 29° 28', long. 70° 1'.

HURRYAL.—A town in the British district of Pubna, lieutenant-gov. of Bengal, 133 miles N.N.E. of Calcutta. Lat. 24° 19', long. 89° 22'.

HURRYE, in the British district of Allahabad, lieutenant-gov. of the N.W. Provinces, a village on the route from the cantonment of Allahabad to Rewa, and 17 miles S.E. of the former. It has a few shops, and is supplied with water from wells and a tank; the country is fertile. Lat. 25° 18', long. 82° 2'.

HURRYE, in the British province of Nagpore, a town on the route from Gurrawarra to Nagpore, 33 miles S.E. of the former, 122 N. of the latter. It has a bazar, and is supplied with water from wells. Lat. 22° 36', long. 79° 14'.

HURRYHUR, in the Mysore, a town with a fort, on the right bank of the river Tungabudra or Tumbudra, which, during the periodical rains, washes the western wall of the fort, but at other times flows 300 yards from it, and is not more than mid-deep, though the bed is 700 yards wide. Having been a place of considerable trade, it was repeatedly plundered by the Maharrattas, though rather well fortified. In the fort is a temple dedicated to Harihara, an idol representing a union of Hari or Vishnu and Hara or Siva; and hence was derived the name of the place. The British cantonment here is situate on an extensive plain, 1,500 yards from the river, towards which the ground gently slopes. The water of the river is good, but the distance renders it inconvenient to resort to it for a supply, so that it is generally obtained from wells, being usually found at a depth of about forty feet. The climate is in general exempt from great heat at any season, and during the south-west monsoon is pleasantly cool. The hot season occurs during the months of May and June. The elevation of the cantonment above the sea is said to be about 1,900 feet. Distance from Bangalore, N.W., 160 miles; from Seringapatam, N.W., 132; from Mangalore, N.E., 181; Bellary, S.W., 85; Chitteldroog, N.W., 45; Madras, N.W., 320. Lat. 14° 31', long. 75° 51'.

HURSANEE.—A town in the Rajpoot state of Jodhpoor, 65 miles S. from Jessulmeer, and 150 miles W. from Jodhpoor. Lat. 26°, long. 70° 49'.

HUR—HUT.

HURSOLE.—A town in the British district of Kaira, presidency of Bombay, 38 miles N.E. of Ahmedabad. Lat. $23^{\circ} 20'$, long. $73^{\circ} 2'$.

HURSOLEE.—A town in the Rajpoot state of Ulwar, situate on the right bank of a branch of the Saubie Nulla, and 20 miles N. from Ulwar. Lat. $27^{\circ} 50'$, long. $76^{\circ} 40'$.

HURSOOL.—A town in the petty native district of the same name, presidency of Bombay, 10 miles S. from Peint, and 93 miles N.E. from Bombay. Lat. $20^{\circ} 9'$, long. $73^{\circ} 30'$.

HURSUK GURHEE, or **GURHEE HURSEORO**, in the British district of Goorgaon, lieutenant-gov. of the N.W. Provinces, a town on the route from Delhi to Rewari, and 27 miles S.W. of the former. It has a bazar. Lat. $28^{\circ} 25'$, long. 77° .

HURSUR.—A town in the British province of Nagpore, 153 miles E.S.E. from Nagpore, and 52 miles S. by W. from Ryepoor. Lat. $20^{\circ} 31'$, long. $81^{\circ} 28'$.

HUSESMOW.—See **ABAMOW**.

HUSHTNUGGUR (or "the Eight Towns").—A town and fortress of the province of Peshawur, situate north of the Kabool river, and 20 miles N. of the city of Peshawur. The surrounding country is very fertile, beautiful, and well watered, but much exposed to the attacks of the restless and fierce tribes to the northward. Lat. $34^{\circ} 16'$, long. $71^{\circ} 45'$.

HUSSEINGUNJ, in the territory of Oude, a village or small decayed town on the route by Nanaman ghat or ferry from Futtehghurh to Lucknow, 17 miles S.W. of the latter. Tenant styles it a poor village. Lat. $26^{\circ} 45'$, long. $80^{\circ} 42'$.

HUSSEINPOOR GHAT, in the British district of Furruckabad, lieutenant-gov. of the N.W. Provinces, a village or station on the left bank of the Ganges, on the route from Bareilly to Futtehghurh, and just below the fort. Here is a ferry over the Ganges, the principal stream of which is stated to be 150 yards wide in the dry season. The passage over the rest of the bed of the river is, during the dry season, intricate, from channels, pools, and quicksands; but during the periodical rains in the latter part of summer, the stream is between three and four miles wide. Lat. $27^{\circ} 22'$, long. $79^{\circ} 42'$.

HUSSUNGURH, in the British district of Allyghurh, lieutenant-gov. of the N.W. Provinces, a town on the route from Boolundshuhur to Agra, 44 miles N. by W. of the latter. Lat. $27^{\circ} 48'$, long. $77^{\circ} 57'$.

HUSUNPOOR, in the British district of Moradabad, lieutenant-gov. of the N.W. Provinces, a town on the route from Moradabad to Boolundshuhur, 32 miles W. by S. of the former. Population 7,569. Lat. $28^{\circ} 48'$, long. $78^{\circ} 22'$.

HUSUNPOORA.—A town in the British district of Sarun, lieutenant-gov. of Bengal, 37 miles N.W. of Chupra. Lat. $26^{\circ} 2'$, long. $84^{\circ} 27'$.

HUSTINASSORE, the principal place of a pergunnah of the same name, in the British district of Meerut, lieutenant-gov. of the N.W. Provinces, is situate close to the right bank of the Boorea Ganges, or old channel of the Ganges, 24 miles W. of the present stream, and on the border of the Kadir or marsh-land. It is now an insignificant, obscure place, but much celebrated in the mythological lore of the Hindoos, as the capital of the Panchala, an ancient race, and the residence of King Bharata, the fifth in descent from Swayambhuva or Adam, and the ancestor of the renowned rival families the Kuroos and Pandoos. According to the legend, it received its name from Hasti, its founder; but it is perhaps more probable, as the name means "elephant's town," and those animals still abound in the forest about fifty miles north, at the south-western base of the Sewalik range, that this circumstance affords the true derivation. It is also called Hastinagara, a word of similar import to its more usual name. In the Ayeen Akbery, it is mentioned under the name of Hustnapoor, and stated to be "an ancient Hindoo place of worship, on the banks of the Ganges," and to yield a revenue of 1,11,672 rupees. It appears to have been the Bastinora of the Greek geographers, and is by Ritter styled (with no great perspicuity) "the Babylon of ancient India." Of its present condition scarcely anything appears to be known; and as it is but twenty miles northeast of the town of Meerut, in an open country, frequented by Europeans, the silence of travellers on the subject seems to indicate that it now contains nothing worth notice. The account given of it by Hamilton, Ritter, and some others, is little more than a repetition of Wilford, who states that there "remains only a small place of worship, and the extensive site of that ancient city is entirely covered with large ant-hills, which have induced the inhabitants of the adjacent country to suppose that it had been overturned or destroyed by the Termites." Lat. $29^{\circ} 10'$, long. $78^{\circ} 3'$.

HUSTNAPOOR.—A town in the British district of Cuddapah, presidency of Madras, 126 miles N.W. by W. of Madras. Lat. $14^{\circ} 10'$, long. $78^{\circ} 50'$.

HUSUNPOOR, in the British district of Meerut, lieutenant-gov. of the N.W. Provinces, a village on the route from the town of Meerut to Moradabad, and 13 miles S.E. of the former. Lat. $28^{\circ} 54'$, long. $77^{\circ} 56'$.

HUSWA.—A town in the British district of Behar, lieutenant-gov. of Bengal, 44 miles N.E. of Sherghotty. Lat. $24^{\circ} 50'$, long. $85^{\circ} 30'$.

HUSWA, in the British district of Futteh-pore, lieutenant-gov. of the N.W. Provinces, a town close to the route from Allahabad to the town of Futteh-pore, and seven miles S.E. of the latter. Baber mentions it under the name of Aswah. Lat. $25^{\circ} 51'$, long. $80^{\circ} 58'$.

HUTEOUT.—A town in the native state of

Nepal, 54 miles S. from Khatmandoo, and 50 miles W. by S. from Bettiah. Lat. 26° 55', long. 85° 21'.

HUTGAON, the principal place of the pergunnah of the same name, a town with a bazar, on the route from Allahabad to the town of Futtehpore, and 19 miles S.E. of the latter. Lat. 25° 52', long. 81° 11'.

HUTGIA, in the British district of Allahabad, lieut.-gov. of the N.W. Provinces, a village on the route from the city of Allahabad to Lucknow, and eight miles N.W. of the former. Lat. 25° 34', long. 81° 53'.

HUTNER.—A town in the British district of Belgaum, presidency of Bombay, 72 miles N.E. of Belgaum. Lat. 16° 43', long. 75° 8'.

HUTNOOR.—A town in Hyderabad, or dominions of the Nizam, 150 miles N. from Hyderabad, and 120 miles S.S.W. from Nagpore. Lat. 19° 30', long. 78° 38'.

HUTSOO.—A river rising in the petty native state of Korea, on the south-west frontier of Bengal, in lat. 23° 18', long. 82° 32', and, flowing in a southerly direction for forty-five miles, passes into the Buttanpore district of the rajah of Berar's dominions, which it traverses for sixty miles. Subsequently separating for twenty-five miles a detached portion of the Sambulpoor British territory and the native state of Bootea from Berar, it falls into the Mahanuddy river, in lat. 21° 50', long. 82° 46'.

HUTTAH.—A town in Hyderabad, or dominions of the Nizam, 170 miles N.W. by N. from Hyderabad, and 80 miles S.E. from Jaulnah. Lat. 19° 20', long. 77°.

HUTTAH, in the British territory of Saugor and Nerbudda, lieut.-gov. of the N.W. Provinces, a town on the route from Allahabad to Saugor, 170 miles S.W. of the former, 61 N.E. of the latter. It is situated on the right bank of the river Sonar, has a bazar, and is the residence of a principal assistant to the commissioner in the Saugor and Nerbudda district. Elevation above the sea 1,183 feet. Lat. 24° 8', long. 79° 40'.

HUTTALER, in the Daman division of the Punjab, a town situated thirty miles from the right bank of the Indus, 133 miles N.N.W. of the town of Moodtan. Lat. 31° 55', long. 70° 28'.

HUTTEEN, in the British district of Goorgaon, lieut.-gov. of the N.W. Provinces, a town on the route from Delhi to Muttra, 47 miles N.W. of the latter. Lat. 28° 2', long. 77° 19'.

HUTTIPOOR, in the British district of Furruckabad, lieut.-gov. of the N.W. Provinces, a village on the route from Allypore cantonment to that of Futtehpore, and seven miles N.W. of the latter. Lat. 27° 25', long. 79° 35'.

HUTWASS, in the British territory of Saugor and Nerbudda, lieut.-gov. of the N.W. Provinces, a town on the route from Baitool to Saugor, 70 miles N.N.E. of the former. Lat. 22° 46', long. 78° 25'.

HUZARA, one of the subdivisions of the Punjab, situate at the north-eastern extremity, between Peshawur and Gholab Singh's dominions, and lately placed under the jurisdiction of the commissioner of Peshawur.—See **PUNJAB**.

HYATNUGGUR.—A town in Hyderabad, or dominions of the Nizam, 10 miles S.E. by E. from Hyderabad, and 110 miles N. by E. from Kurnool. Lat. 17° 19', long. 78° 40'.

HYBUTPOOR, in Sirhind, a village on the route from Hansi to Lodiana, and 54 miles N. of the former town. It is situate in a level country, liable to be overflowed during inundations of the river Gagur; and at that time the road in this part of the route is impracticable for carriages or artillery, though at other times good. Distant N.W. from Calcutta 1,030 miles. Lat. 29° 51', long. 76° 2'.

HYDASPES.—See **JHELM**.

HYDERABAD, or the territory of the Nizam, an extensive realm of Southern India, the name by which it is thus distinguished being that of the city which is its capital. The territory lies between lat. 15° 10'—21° 42', long. 74° 40'—81° 32'; is 475 miles in length from south-west to north-east, and about the same distance in breadth. The area is estimated at 95,337 square miles. It is bounded on the north-east by the territory of Nagpore; on the south-east by territory subject to the presidency of Madras, and the territory lately belonging to the nawab of Kurnool; on the west by territory subject to the presidency of Bombay; on the north-west by territory belonging to the presidency last named, by the territory of Gwalior, or of the family of Scindia, and by the British districts of Saugor and Nerbudda. The principal rivers which skirt or traverse the territory are the Godavery, with its tributaries the Doodna, Manjera, Pranheeta; the Wurda, with its tributaries; and the Kistna, with its feeders the Beema and Toongabudra.

The climate may be considered in general good, and as there are no arid, bare deserts, similar to those of Rajpootana and some other tracts of Northern India, the hot winds are less felt. In the vicinity of the city of Hyderabad, the mean temperature in the house, according to observations made at sunrise, at two o'clock in the afternoon, and at sunset, for one year, "was, in January, 74½°; February, 76½°; March, 84°; April, 91½°; May, 93°; June, 88°; July, 81°; August, 80½°; September, 79°; October, 80°; November, 76½°; December, 74½°; giving as an annual mean 81½°." The south-west monsoon commences about the beginning of June, and ends about the beginning of October, and, as is usually the case, brings heavy rains. After it has ceased, variable weather continues for a few weeks; and this is followed by the north-east monsoon, bringing rains, though less heavy than those accompanying the former. At midwinter the variation of temperature in the northern part of the territory is very great and sudden. The mornings

are very cold, and ice is formed ; but the days are hot, the thermometer sometimes reaching 80° in the shade. The closing monsoons are considered the most unhealthy periods of the year, producing fevers and agues, but in general not of formidable types, except in the vicinity of extensive marshy jungles. Diseases of the spleen are common in the vicinity of the Godavary. Cholera is not a prevalent disease, and when it does occur, is consequent on famine. Diseases of the eyes are prevalent in the sandstone districts. The wells in general yield impure, unpalatable water, productive of disease, especially the dracunculus or guinea-worm, from which those who use the water from tanks or streams are exempt. There are no returns of the amount of population, but its relative density is probably not very low, as the soil is on an average fertile, the climate good. If the relative density be assumed at 120 to the square mile, the aggregate will be 10,666,080 persons. The revenue of the Nizam is stated at 1,550,000*l*. The cities and places of chief note, viz., Hyderabad the capital, Secunderabad, Jaulna, Jaffarabad, Beder, Janur or Chinur, Ellichpoor, Doulatabad, Golconda, Nirmal, Nander, Palensha, and Warangol, are described under their respective names in the alphabetical arrangement. The military roads are in general good, especially in the granitic tracts, where the prevailing material is easily beaten into a smooth, sound, durable surface. The principal routes are,—1. From north to south, from Nagpore, through the city of Hyderabad, to Bangalore ; 2. from south-east to north-west, from Madras and Masulipatam, through the city of Hyderabad, to Poona, and thence to Bombay ; 3. from south-east to north-west, from the city of Hyderabad to Aurungabad. A large subsidiary force is maintained by the British government under the terms of the treaty with the Nizam, concluded in the year 1800. The Nizam's military force consists of four separate descriptions of troops :—1. The auxiliary force, organized under British officers, which is composed of regular troops, officered from the Company's army, and paid by the Nizam's government. 2. The irregular troops, consisting of cavalry, infantry, and artillery. 3. A miscellaneous irregular force, composed of Arabs, Scindees, Moguls, and Seiks ; and, 4. the troops maintained by ameeris and others from revenues assigned by government for their support.

To deduce from the earliest available sources the history of the countries which constitute the dominions of the Nizam, would require more space than could be spared for the purpose in such a compilation as the present. The Nizam himself derives his authority from a chief named Azof Jah, who held high command under Aurungzebe, and who, while nominally bearing allegiance to that sovereign, and administering the government of the Deccan as his viceroy, actually established himself there as an independent prince. This chief, known as Nizam-ool-Moolk (Regulator of the

State), died in 1748, at the age of upwards of 100 years, and the right of succession to his power and authority was fiercely contested among his descendants. The claimants most favoured were two. One of these, Nazir Jung, the second son of the deceased ruler, being on the spot when his father died, had seized the treasure, and obtained the support of the army ; and, moreover, fortified his claim by an alleged renunciation of the right of succession on the part of his elder brother. The other, named Mozuffer Jung, was a grandson of Nizam-ool-Moolk, by a favourite daughter ; and to him it was said the succession was conveyed by testamentary bequest. Each of these two candidates had the good fortune to secure the countenance and support of one of the great European powers then commencing their career of contention for supremacy in the East ; the English espousing the cause of Nazir Jung, the French, that of his rival Mozuffer Jung ; but after a very brief period, dissensions between the commander, and his officers caused the retirement of the French force from the field ; and Mozuffer Jung, deprived of its support, became the prisoner of Nazir Jung. Differences now arose between the latter and his English allies, and their assistance was withdrawn. Nazir Jung subsequently gave himself up to idleness and sensual pleasure ; a majority of the officers of his army, seduced by the French, fell from their allegiance, and by the hand of one of them, he perished in a conflict with a body of French troops, which had mustered to attack his camp. Mozuffer Jung was now undisputed viceroy of the Deccan, exercising his authority, however, under the control of the French commander Duplex, whose will was supreme. But Mozuffer Jung was not destined long to enjoy even the appearance of power. He fell in an affray with some Patan chiefs, who, having been instrumental in placing him on the throne, were disappointed in the amount of reward to which they thought their services entitled. A new occupant of the seat of power was now to be sought ; and the French, passing over an infant son of Mozuffer Jung, selected Salabut Jung, a brother of Nazir Jung, to be ruler of the Deccan. A new claimant for the dignity, however, shortly afterwards appeared, in the person of Ghasee-ood-deen, the eldest son of Nizam-ool-Moolk, who advanced to Aurungabad at the head of a large army, to assert the right which Nazir Jung alleged to have been renounced. Salabut Jung, aided by the French, prepared for resistance ; but the impending contest between the brothers was averted by the sudden death of the elder, Ghasee-ood-deen, brought about, it has been said, by poison ; and though the Mahrattas by whom he was supported, continued for their own purposes to maintain hostilities, their unvarying ill-success disposed them to listen to proposals for procuring their absence on the usual terms. The English and French, however, continued to struggle for power and influence in the Deccan ; but the

latter were compelled, after a while, by the danger of their own possessions, to withdraw from the support of Salabut Jung, who, thus weakened, and apprehensive, moreover, of the designs of a younger brother, Nizam Ali, entered into an engagement by which he promised to dismiss the French from his country and service, and renounce all connection with them. In 1761, this weak prince was de-throned by his youngest brother, Nizam Ali, whom, contrary to the advice of the most judicious of his French counsellors, he had intrusted with power, which was used to supplant the donor. Two years afterwards, the usurper made further acknowledgment of his brother's favour, by putting him to death. In 1765, he ravaged the Carnatic, exercising in his course a measure of cruelty far beyond what was necessary to his purpose; but he retired on the approach of a British force. Still, the British government was anxious to be on better terms with him, partly from apprehension of his future hostility in alliance with other powers as unscrupulous as himself, and partly from a desire to obtain his concurrence to their retention of a maritime district known by the name of the Northern Circars, formerly possessed by the French, but now occupied by the English, who had fortified their right by the firm of the emperor.

Nizam Ali was straitened for money (an infirmity which has clung to the Hyderabad state to the present time), and, in 1766, a new treaty was concluded, not unacceptable to either party, under which the East-India Company engaged to "have a body of their troops ready to settle the affairs of his highness's government, in everything that is right and proper," subject, however, to withdrawal when their own possessions, or the peace and tranquillity of the Carnatic, might be in danger, and to pay, as a consideration for the free gift of the Circars, a sum of five lacs every year in which the assistance of their troops should not be required. There were other stipulations; and among them one reserving the life-right of Basmint Jung, a brother of Nizam Ali, in one of the circars, subject to his good behaviour. The aid of British troops was afforded, as provided by the treaty, to enable Nizam Ali to proceed against Hyder Ali Khan, then rapidly rising into power; but, after a good deal of vacillation, Nizam Ali preferred to unite with that adventurer. The allies, however, were unsuccessfull, and the Nizam was compelled to sue for peace, which was concluded by a new treaty in 1768. By the sixth article, the East-India Company and the nabob of the Carnatic (who was a party to the treaty) were to be always ready to send two battalions of sepoye, and six pieces of artillery manned by Europeans, whenever the Nizam should require them, and the situation of affairs would allow of such assistance being rendered, the Nizam paying the expense during the time such force should be employed in this service. In 1782, Basmint Jung died; but the Company did not

obtain possession of the circar held by him till 1783. The peishcush, or payment to be made to the Nizam on account of the Circars, had fallen into arrear, and was not adjusted till even a later period. These matters, however, having been at length arranged, the British Governor-General, Lord Cornwallis, in 1789, addressed a letter to the Nizam, explaining and interpreting the treaty of 1768, but declining to enter into any new treaty, as had been suggested. This letter of the Governor-General's was subsequently declared, by a resolution of the House of Commons, to have been meant, and to have had the full force of a treaty executed in due form. In this letter, the Governor-General agreed that the force stipulated for in the sixth article of the treaty of 1768 should be granted whenever applied for, provided it was not to be employed against any power in alliance with the Company. In the following year, on the breaking out of the war with Tippoo, son of Hyder Ali, a treaty of offensive and defensive alliance was concluded between the Nizam, the Peishwa, and the British government. Tippoo purchased peace at the sacrifice of half his dominions, and the Nizam had no reason to be dissatisfied with his share of the spoil. At a later period, the Nizam, being engaged in war with the Mahrattas, claimed the assistance of the British government under the subsisting relations between them; but the Governor-General, Sir John Shore, refused to afford it, and the Nizam was consequently obliged to conclude an ignominious peace with his enemy. This refusal, and its results, so incensed the Nizam, that he requested that two battalions, stationed at his capital as a subsidiary force, should be withdrawn. The Nizam now sought safety in the entertainment of a party of Frenchmen, who, however, were dismissed, in accordance with the provisions of a treaty concluded in 1793, under the administration of the earl of Mornington, afterwards Marquis Wellesley, who was most anxious to rid India of all French influence. By this treaty, a subsidiary force, augmented to 8,000 sepoye, with a due proportion of field-pieces, was assigned to the service of the Nizam. On the fall of Tippoo Sultan, and the annihilation of the state of Seringapatam, the Nizam participated largely in the division of its territory, under the partition treaty of 1799, and his share was increased on the Peishwa's withdrawal from the treaty. In 1800, the subsidiary force with the Nizam was further augmented, and the pecuniary payment for its maintenance was commuted for a cession of territory. The territory ceded for this purpose consisted of the acquisitions made from Tippoo allotted to the Nizam, under the treaty of Seringapatam in 1792, and the treaty of Mysore, concluded in 1799, after the destruction of Tippoo's power and government. Thus the Nizam secured the future defence of his person and state, without any sacrifice either of money, or of any portion of his original dominions, the territory assigned for payment of the subsidiary

force having been acquired under the protection and influence of the power which now undertook to maintain his authority by means which itself had placed at his disposal. In 1804, on the conclusion of the first Mahratta war, the Nizam obtained further territorial advantages, and at the termination of the second, in 1817, certain exchanges between the Company and himself took place, some of them made for mutual convenience, others to gratify the Nizam's wishes. The precise position of the Nizam, in regard to the British government, is determined by the treaties above referred to, and it does not materially differ from that of other states with which that government maintains subsidiary alliances. Nizam Ali, of whom mention by no means to his honour has been made in the course of this narrative, closed a long and guilty life in 1803. He was succeeded by his son Secunder Jah, with whom the Company confirmed all existing treaties. His feeble and unprosperous rule was terminated by his death in 1829, when he was succeeded by his eldest but illegitimate son, to whom the existing engagements were again confirmed. Under this prince the misgovernment of the country has continued and increased. A host of mercenary troops, entertained by him, so far from contributing to the purpose of defence, have been a terror both to government and people; the administration of justice, or even the semblance of it, was almost unknown, while debt, public and private, was allowed to accumulate to an enormous extent. The British government was at one time creditor for arrears of payments due to it, to the amount of between five and six hundred thousand pounds. This claim, to the continued increase of which there seemed no probable limit, was strongly pressed on the notice of the Nizam's government, and its arrangement was at length effected by a territorial cession, the revenue of the districts thus sequestered being applicable both to the reduction of the debt and to the maintenance of the Nizam's military contingent.

HYDERABAD, the principal place in the territory of the Nizam, is situate on the river Musli, here between 400 and 500 feet wide. The environs have a wild but highly picturesque appearance, being overspread with granite hills and isolated rocks, some of hemispherical form, others of cubical or columnar. Approached from the west, the appearance of Hyderabad is very striking: "The palace and numerous mosques rising above the surrounding buildings, give it an air of grandeur, which is much strengthened by the very superb pile of buildings erected as the British Residency." The town is feebly fortified by a wall of stone, too weak to stand a moment against battering-guns, though adequate for protection against predatory attacks. The ground-plan inclosed by the wall is a trapezoid, the longest or north-western side of which, extending along the right bank of the river Musli, is about

two miles and three-quarters in length; the south-eastern, two miles; the southern, one mile; the south-western, one and three-quarters. There is a considerable suburb on the left side of the river, and in this quarter is situate the British Residency, the communication between it and the city and palace being maintained by a handsome stone bridge. This fine structure, planned and executed by a British officer in 1831, is built of squared granite stone, and has eight arches, semi-elliptical, each of fifty-six feet span and eighteen feet rise, with piers ten feet wide; the breadth of the bridge being twenty-four feet. There is, besides, on the left or northern side, a land-arch of seventy-seven feet span and sixteen feet rise. The total cost was 10,200*l*. "The city is crowded with buildings of all descriptions, from the stately and stupendous palaces of the nobility and other men of rank and wealth, to the low and dirty hovels of the poor. The construction of the houses of the great is entirely native, displaying little or no taste. They are erected too close to each other, rendering their situations unpleasantly confined, if not unhealthy." The streets, some of which are paved with stone, are in general narrow. In addition to the water of the Musli, the place is abundantly supplied from numerous wells, in various parts of the town. Besides the palace of the Nizam (a large building in the usual style of native grandeur), the most remarkable structures are the principal mosque and the British Residency. In the environs of the city are many fine gardens, containing gorgeous pavilions. Among them, that of the minister of the Nizam is reputed as marvellously beautiful. "It is inclosed, after the Asiatic manner, by high walls, the centre containing a large marble basin filled with water, and fed by numerous fountains, their silvery columns being mingled with stately cypress-trees. The pavilions, galleries, and terraces around are built and ornamented in the richest style of Oriental architecture, that beautiful carved trellis-work, which always produces so exquisite an effect, frequently intervening, while the painting and gilding are equally profuse and striking." The country about Hyderabad abounds with fine tanks or artificial pieces of water of great dimensions. One, called Husain Sagur, four miles north of the city, and close to the British cantonment of Secunderabad, is about three miles in length and two in breadth; another, a few miles to the south, is stated to be twenty miles in circuit. There is no tolerable approximation to a trustworthy estimate of the population, which probably does not exceed 200,000, of whom a large proportion are Mussulmans. Elevation above the sea 1,800 feet. Distance from Mangalore, N.E., 498 miles; Bangalore, N., 378; Bellary, N.E., 229; Madras, N.W., 389; Bombay, S.E., 449; Nagpore, S., 314; Calcutta, S.W., 962. Lat. 17° 22', long. 78° 32'.

HYDERGURH, in the territory of Oude,
405

a small town on the route from Lucknow cantonment to that of Pertabgurh, 40 miles S.E. of the former, 70 N.W. of the latter. It has a bazar, and is well supplied with good water. Lat. 26° 37', long. 81° 17'.

HYDERNUGUR.—A town in the British district of Behar, lieutenant-gov. of Bengal, 56 miles W. of Sherghotty. Lat. 24° 30', long. 83° 59'.

HYDRABAD, in Sind, was formerly considered the principal town of that country, in consequence of its having been selected as the residence of the chief ameer, or those ruling the southern and principal part of the country. It is situated four miles E. of the eastern bank of the Indus, on an eminence of the low rocky range called the Gunjah Hills, and in an island inclosed between the Indus and the Fulailee, a branch which, leaving the main stream about twelve miles above the town, communicates with it about fifteen miles below. The Fulailee flows about 1,000 yards east of the town, the base of the rampart being washed by a creek from it in the season of inundation, though the whole branch is dry when the river is low. This fortress, which was esteemed very strong by the Sindians, and would no doubt prove so in their mode of warfare, was built nearly on the site of the ancient Nerunkot, by Futeh Ali, the first ameer. The outline is irregular, corresponding with the winding shape of the hill's brow, on the very edge of which the walls, for the greater part of their extent, rise to the height of from fifteen to thirty feet. They are built of burnt bricks, and are thick and solid at the base, but taper so much, and are so greatly weakened by embrasures and loopholes with which they are pierced, that a few well-directed shot would demolish any part, and expose the defenders to the fire of the assailants. The ramparts are flanked by round towers or lofty bastions, at intervals of 300 or 400 paces, which, combined with the height of the hill, give the place an imposing appearance. Where the walls do not rise immediately from the edge of the declivity, the defence is strengthened by a ditch of ten feet wide and eight deep. The rock is too soft to admit of being scarped, and slopes so gently, that if the wall were breached, the rubbish would rest on the face of the hill, and afford footing for a storming-party. The plateau of the hill on which Hyderabad is built is a mile and a half long and 700 yards broad; the height is about eighty feet, and on the southern part are the fortress and the suburbs or pettah. There are about 5,000 houses, meanly constructed of mud one-half of that number being within the fortress, the rest in the pettah. The fortress contained the residence of the ameer, and a massive tower built as the repository of their treasures. The bazar is extensive, forming one street the entire length of the town; and it displays considerable bustle and appearance of business. The most important manufacture of Hyderabad is

that of arms of various kinds,—matchlocks, swords, spears, and shields; and the skill of the workmen is said to be scarcely inferior to that attained in Europe. There is also a considerable manufacture of ornamental silks and cottons. A cemetery, which overtops the northern part of the eminence, contains the tombs of the deceased members of the Talpoor dynasty, and of the preceding one of the Kaloras. That of Gholam Shah Kalora is a beautiful quadrangular building, with a handsome central dome. It is lined with fine marble, is highly ornamented with mosaic, and inscribed with sentences from the Koran. The tomb of the late Ameer Kurum Ali is also a handsome quadrangular building, surmounted by a dome, and having a turret on each corner. When the Belooches, under the conduct of Futeh Ali, of the Talpoor tribe, overthrew the Kalora dynasty, that successful chieftain gave to one branch of his relatives Khyerpore, with a considerable district attached; to another, Meerpoor, and allowed his three brothers to share with himself the government of Hyderabad and its dependent territory, comprehending the greater part of the country. Sir C. Napier entered this place on the 20th February, 1843, having previously received the submission of six of the ameer's of Sind. On the 24th he marched out to give battle to Sheer Mahomed of Meerpoor, who yet remained in arms, and was posted in great force behind a neighbouring nullah, which had been partially fortified. The ameer was, however, attacked and defeated; the British force being thus enabled to advance upon Meerpoor. Hyderabad is supposed to have a population of 24,000. Lat. 25° 22', long. 68° 28'.—See **SINDH**.

HYDRAMEYEE, in the British district of Allgurh, lieutenant-gov. of the N.W. Provinces, a village on the route, by Khasganj, from Bareilly to Allgurh cantonment, and 23 miles S.E. of the latter, 49 N.E. of Agra. Lat. 27° 51', long. 78° 28'.

I.

IBRAHEEMPORE, or **IBRAHIM-ABAD**.—A town in the British district of Ghazee-pore, lieutenant-gov. of the N.W. Provinces. It has a population of 26,582. Distant E. from Ghazee-pore town 60 miles. Lat. 25° 48', long. 84° 38'.

IBRAMPUTNA.—A town in Hyderabad, or the dominions of the Nizam, 16 miles S.E. from Hyderabad, and 103 N.E. by N. from Kurnool. Lat. 17° 14', long. 78° 42'.

IDDOOR CONCAUDY.—A town in the British district of North Canara, presidency of Madras, 61 miles N. of Mangalore. Lat. 13° 46', long. 74° 50'.

IDULABAD.—A town in Hyderabad, or dominions of the Nizam, 11 miles from the right bank of the Payne Gunga river, and 130

IDU—IND.

miles S.E. by S. from Ellichpoor. Lat. $19^{\circ} 39'$, long. $78^{\circ} 41'$.

IDULABAD.—A town in one of the recently sequestrated districts of Hyderabad, or dominions of the Nizam, 95 miles W. by S. of Ellichpoor. Lat. $21^{\circ} 1'$, long. $76^{\circ} 8'$.

IEEJ.—A town in one of the recently sequestrated districts of Hyderabad, or dominions of the Nizam, 29 miles W.N.W. of Kurnoul. Lat. 16° , long. $77^{\circ} 43'$.

IHUBHER, in the Reechna Doab division of the Punjab, a town situated 34 miles from the right bank of the Ravee, 83 miles N.W. of the town of Lahore. Lat. $31^{\circ} 58'$, long. $73^{\circ} 40'$.

IHUNG, in the Jetch Doab division of the Punjab, a town situated on the left bank of the Chenaub, 104 miles W. by S. of the town of Lahore. Lat. $31^{\circ} 19'$, long. $72^{\circ} 28'$.

IKERI, in the British district of Allygurh, lieut.-gov. of the N.W. Provinces, a village on the route, by Khaasganj, from Bareilly to Allygurh cantonment, and seven miles S.E. of the latter. Lat. $27^{\circ} 53'$, long. $78^{\circ} 14'$.

IKERY.—See **EERKAIBER.**

IKOUNA, or **EKOWNA.**—A town in the British district of Ghazeeপুর, lieut.-gov. of the N.W. Provinces, situate three miles from the left bank of the Ganges river. Ikouna has a population of 7,005 inhabitants. Distant E. from Ghazeeপুর town 43 miles. Lat. $25^{\circ} 43'$, long. $84^{\circ} 20'$.

ILLPOOR.—A town in the British district of Madura, presidency of Madras, situate 20 miles S. from Trichinopoly, and 48 miles E. by N. from Dindigul. Lat. $10^{\circ} 32'$, long. $78^{\circ} 43'$.

IMJONG.—A town of Eastern India, in the British district of Sudiya, province of Assam, 59 miles E.S.E. of Sudiya. Lat. $27^{\circ} 28'$, long. $96^{\circ} 32'$.

IMLAK, in the territory of Oude, a village on the route from the cantonment of Goruckpoor to that of Sultanpoor, and 15 miles N.E. of the latter. The road in this part of the route is good. Lat. $26^{\circ} 15'$, long. $82^{\circ} 21'$.

IMLEA.—See **AMILEA.**

IMRUTPOOR, in the British district of Furruckabad, lieut.-gov. of the N.W. Provinces, the principal place of the pergunnah of Ialungunge. It is a small town on the route from Shahjehanpore to Futtehgurh, 12 miles N. of the latter, and is situate less than a mile from the left bank of the Ganges, in a country extensively laid under water during the periodical rains in the latter part of summer, but at other times displaying a scene of great fertility, high cultivation, and luxuriant vegetation, interspersed with ancient and fine groves of mangoes. Indigo is the chief crop. There is a bazar in the town, and during the dry season

the road is good. It is called Hemratpur by Tieffenthaler. Lat. $27^{\circ} 32'$, long. $79^{\circ} 40'$.

INCHULKURUNJEE, or **EENCHULKURUNJEE.**—A jaghire or feudal dependency of Colapore, in the territory of Bombay. These possessions, however, are held in enam, and not on suringam tenure; and the Colapore state has consequently no right to claim military service from their chief. The centre of the jaghire is in lat. $16^{\circ} 41'$, long. $74^{\circ} 2'$. A part of the country, stretching to the Ghauts bordering on the Concan, is rugged and jungly, but the greater portion lies on the plains, and is very productive. The revenue is 75,000 rupees. A late chief was greatly burthened with debt, and his jaghire had become a prey to usurers. He died in 1852, without leaving male issue, when his widow was permitted to adopt a successor, subject to certain conditions; among which was the abolition of transit-duties and other objectionable taxes. The adopted ruler died childless in 1854, and the question whether the estate shall be resumed by the Colapore government has been made dependent on the non-existence of any male relative of the founder of the ruling family. Should the resumption be sanctioned, the estate of Inchulkurunjee will probably be transferred to the British government in liquidation of the debt incurred by the Colapore state for the suppression of the insurrection in the year 1844.

INDAPOOR.—A town in the British district of Poonah, presidency of Bombay, 84 miles E.S.E. of Poonah. Lat. $18^{\circ} 8'$, long. $75^{\circ} 5'$.

INDARUM.—A town in the British province of Nagpoor, situate three miles from the left bank of the Wein Gunga, and 138 miles S.E. by S. from Nagpoor. Lat. $19^{\circ} 25'$, long. $80^{\circ} 6'$.

INDEE.—A town in the British district of Sholapoor, presidency of Bombay, 136 miles N.E. by E. of Belgaum. Lat. $17^{\circ} 10'$, long. $76^{\circ} 1'$.

INDERAOOTEE.—A river rising in lat. $19^{\circ} 56'$, long. $81^{\circ} 50'$, in Bustar, one of the districts of Nagpoor, or the rajah of Berar's dominions, and, flowing in a south-westerly direction, falls into the Godavery river on the left side, in lat. $18^{\circ} 40'$, long. $80^{\circ} 20'$.

INDERGARH, in the British district of Furruckabad, lieut.-gov. of the N.W. Provinces, a small town on the route from Calpee to Futtehgurh, and 34 miles S. of the latter. It has a bazar. Lat. $26^{\circ} 56'$, long. $79^{\circ} 45'$.

INDERGURH.—A town of Bundelcund, in the native state of Dutteah, 32 miles N. from Jhansee, and 32 miles S.E. from Gwalior. Lat. $25^{\circ} 55'$, long. $78^{\circ} 40'$.

INDGURH, in Sirhind, a town on the route from Lodiana to Ferozpoor, and 83 miles W. of the former place. It contains several shops, and is abundantly supplied with water

IND.

from twelve brick-lined walls, each about twenty feet deep. The surrounding country, though partaking of the nature of a deep sand, is well cultivated. Lat. 30° 55', long. 75° 20'.

INDIA, an extensive region of Asia, the main divisions of which, together with the several subdivisions, their towns and villages, lakes and rivers, will be found more particularly described under their respective names in the alphabetical arrangement of this work. India is bounded on the north by the Himalaya Mountains, dividing it from Thibet. The Suliman range, a continuation of the Sufeid Koh Mountains, separates it from Afghanistan and Beloochistan on the west; and parallel offshoots from the opposite extremity of the Himalaya Mountains form its frontier on the east. On all other sides, from the port of Kurrachee on the west, to the southern extremity of the Tenasserim provinces on the east, it has a maritime coast, bordered by the Bay of Bengal on the one hand, and by the Arabian Sea, or North Indian Ocean, on the other. Its greatest length, measured from Cape Comorin in the south, to the extremity of the Punjaub in the north, may be estimated at 1,830 miles, a distance which closely corresponds with its breadth, measured from Kurrachee in the west, to the extremity of Assam in the east. It lies between lat. 8° 4'—36°, long. 66° 44'—99° 30'. Within these limits is comprised an area of 1,339,443 square miles, with a population of 172,399,235. Another chain of mountains, termed the Vindhya range, crosses the continent of India at a lower latitude, from east to west. This range unites at one of its extremities with the Eastern, and at the other with the Western Ghauts, and thus forms the base of the triangle upon which rests the table-land of the Deccan. Such is a general outline of the mountain system of India. Extensive means of inland navigation are presented in the noble rivers by which the country is traversed. These may be conveniently distributed into two classes; the one deriving their chief supplies from the melted snows of the Himalayas, and the other being mainly fed by the rains of the south-west and north-east monsoons. In the one class may be ranked,—1. The Indus and its tributaries, consisting of the Sutlej, Beas, Ravee, Chenab, and Jhelum; 2. the Ganges and its tributaries, the chief of which are the Jumna, Gogra, Gunduck, and Cosy; 3. the Brahmapootra, with its principal feeders the Sanpoo and the Teesta; and, 4. the Irawaddy, traversing Burmah and the recently-acquired province of Pegu. In the second class are ranged the great rivers of the Deccan; among which may be enumerated the Godavery, Kistnah, and Cauvery, together with the Nerbudda, Taptee, Mahanuddee, and various others intersecting Southern and Central India.

For political objects, as well as for administrative purposes, the British possessions in India have been distributed into several prin-

cipal divisions, which, with their respective areas and population, are stated below:—

	Area. Sq. Miles.	Population.
Bengal, including Assam and the Tenasserim Provinces.....	235,646	41,186,833
North-Western Provinces..	85,681	36,873,766
Saugor and Nerbudda territory.....	17,543	2,143,599
Punjaub.....	78,447	9,153,309
Cis-Sutlej territory.....	4,589	2,311,969
Nagpore.....	76,433	4,650,000
Pegu.....	32,350	546,180
Madras.....	132,090	22,301,697
Bombay.....	120,065	11,109,067
Total, exclusive of the Eastern Straits settlements, the area of which is 1,575 square miles, population 203,540.....	782,683	124,269,009

It will thus be seen that more than one-half of the superficial extent of India is strictly British, the remainder, comprising an area of 616,760 square miles, and a population of 48,130,226, is occupied by native states. In some of these, as in Oude and the Mysore, the administration of public affairs has been altogether assumed by the British government; in others the native ruler exercises sovereign power with more or less restriction within his dominions. Among the states of the latter class are included Hyderabad or the dominions of the Nizam, Guzerat or the territory of the Guicowar, Gwalior or Scindia's territory, Indore or Holcar's possessions, Mysore, Travancore, Cochin and Cutch, Nepaul, Bhopal, Cashmere or Gholab Singh's dominions, the Rajpoot states, and a variety of others, forming in the aggregate a number falling little short of 200. If to these be added the petty chieftainships of Kattywar, the number of native states will be more than doubled.

With the exception of Nepaul, and one or two petty governments, the whole of these states have entered into treaties and engagements with the British government, involving the obligation of protection on the part of the paramount power, and allegiance on that of the subordinate. In some instances, the dependent state is subject to the payment of tribute; in others, it is exempt from any pecuniary claim. All have relinquished the right of self-defence, as well as that of maintaining diplomatic relations with each other; and the British government, which guarantees external protection and internal tranquillity, has been constituted the arbiter of all disputes arising between native rulers. But though debarred from the exercise of military power in regard to external aggression, the native governments are not prohibited from maintaining a separate military force; in some cases, they are required to provide such a force, which, in the event of war, is to be available to the British government against the common enemy. In some instances, the number of troops to be maintained is restricted. Under these arrangements, the existing military re-

sources of the native princes comprise a force of little less than 400,000 men. It may be observed, however, that considerable portions of the regular troops of native states are described in the official returns as fitted rather for police purposes than for regular military duties. It will be evident from this view, that the British authority in India is paramount. That of the French is almost annihilated: they still occupy Pondicherry, and one or two other places of small importance; but they no longer dispute with the English the dominion of the East. The Portuguese linger in a few spots, the scenes of their former commercial grandeur; but from neither of these powers has Britain at this time anything to fear. Her rivals have fallen before her, and left her in possession of the most gigantic dominion that ever was appended to a foreign state.

So vast a region, varying, in respect to latitude and elevation, from the sea-level of the lower provinces of Bengal to the lofty summits of the Himalayas, must necessarily embrace various degrees of temperature; and in a general description of the climate of India, it is only the leading characteristics that can be noticed. The year admits of a division into three seasons,—the hot, the rainy, and the temperate. The hot season commences in March, and continues till the beginning of June, when the rains, brought from the Indian Ocean by the south-west monsoon, set in, and last with occasional intermission till October, at which period the temperate weather commences, and continues till the end of February. “In a great part of the country,” says Elphinstone, “the sun is scorching for three months in the year; even the wind is hot, the land is brown and parched, dust flies in whirlwinds, all brooks become dry, small rivers scarcely keep up a stream, and the largest are reduced to comparatively narrow channels, in the midst of vast sandy beds. In winter, slight frost sometimes takes place for about an hour or two about sunrise.” “At a low level, if towards the south, the greatest cold in winter is only moderate heat.”

Considerable interest is attached to the zoology of India. The forests contain a variety of wild animals, the most remarkable of which is the elephant. These animals associate in herds, which, emerging from the jungles, frequently occasion serious injury to the crops. They are often destroyed by parties of hunters, or caught in pits and tamed. The elephant of the Deccan is considered inferior to that of Bengal. The rhinoceros, wild buffalo, and bear, are also inhabitants of the forest. Tigers, leopards, panthers, wild boars, hyenas, wolves, and jackals, pervade both forest and jungle, and sometimes infest patches of underwood in the immediate vicinity of cultivated lands. Lions are met with only in particular tracts, and more especially in the western part of Rajpootana, the province of Guzerat, and its vicinities. Among the remainder of wild animals may be enumerated deer, antelopes, and monkeys.

Crocodiles, serpents, and other reptiles are most numerous. The domestic animals are buffaloes, camels, horses, sheep, swine, oxen, and goats. Game and fish are found in abundance, as are also birds of splendid plumage.

Among the principal trees are the teak, considered superior to the oak for purposes of ship-building, the sal, the simsoo, and the babul. There is also the cocoanut-tree, every portion of which is rendered available to the wants of man; the fruit being serviceable as food, the husk which envelops the nut affording a fibre from which cordage is manufactured, while the wood is peculiarly adapted to the construction of water-pipes, and also of beams and rafters. Another valuable tree, yielding a fleshy flower, which is important as an article of food, and from which spirit is moreover distilled, is the mahua. Besides the above, may be enumerated the bamboo, largely employed in scaffolding, and also in the manufacture of baskets and mats; the banyan, the tamarind, and the mango, the palmyra and other palms. Sandal and ebony are found in many parts. In the Himalayas, pines abound, including the magnificent deodar; together with oaks and other forest-trees indigenous in Europe, or capable of being naturalized there. On the banks of the Lower Ganges, and all round the seacoast of the peninsula, rice constitutes the staple food of the inhabitants. Wheat is largely consumed in the north-west provinces of Bengal. The peasantry of the Deccan depend for subsistence upon jowar and bajra, or upon a small and poor grain called raggi. The last-named grains are sown at the commencement of the rains, and reaped in autumn. Wheat ripens during winter, and forms a spring crop. But, though there are thus two distinct cultivations, the tropical and temperate crops are seldom sown on the same ground in the same year, except in the rich soil of the lower provinces of Bengal, and in some other irrigated tracts, where the rice crop requires only three months to arrive at maturity. Extensive tracts of land are appropriated to the production of the staple articles of export, consisting chiefly of cotton, sugar-cane, indigo, rice, opium, tobacco, and oil-seeds; pepper and cardamums are largely cultivated on the western coast, and ginger, capsicum, cummin, coriander, and turmeric, are a common field-produce. Among the vegetables, indigenous or exotic, are yams, potatoes, carrots, onions, spinach, radishes, gourds, and cucumbers. The fruits consist of plantains or bananas, mangoes, tamarinds, guavas, jacks, melons, grapes, pine-apples, peaches, strawberries, oranges, &c.; figs are not very general; apples are devoid of flavour; pears and plums do not succeed.

Numerous as are the towns and cities of India, none are remarkable for the amount of their population. That of Calcutta, independently of its suburbs, has been recently returned at 413,182. No census has been yet taken of the population of the city of Madras; but Bombay, with its suburbs, and including also the floating popu-

lation in its harbour, contains only 566,199 inhabitants. Throughout the whole extent of the North-West Provinces no one city, including its suburbs and cantonment, can boast a population of 200,000; Delhi has only 152,424, Cawnpore 118,000, Benares 171,668, Bareilly 111,352, Agra 125,262, Furruckabad 132,513. The towns are usually composed of high brick houses, and, with some exceptions, the streets are narrow, and badly paved. Many of these are walled, and capable of some defence. Villages vary according to locality; some being defended by walls, others open, or surrounded only by a fence. Each village has its temple and bazar, its annual fair and festivals. In the North-Western Provinces, the houses of the peasantry are usually built of unburnt brick, and are tiled; in Bengal the cottage has its thatched roof and cane walls; and in the Deccan the huts are either of mud or stone, with terraced roofs. Throughout India the dwelling of the peasant is scantily furnished; the principal articles consisting of a few earthen pots and brass vessels, a hand-mill, pestle and mortar, and an iron plate, on which cakes are baked. A mat is the substitute for a chair, and tables are dispensed with.

The enormous population of India is composed chiefly of two leading races,—Hindoos and Mahomedans. The Hindoos, though resembling each other in their religion and in the observances and habits which it involves, are at the same time distinguished by many points of difference. Diversity in appearance, in dress, in the staple articles of food, in the mode of building, and in many other respects, is occasioned partly by local peculiarities, and partly by the nature of their institutions. The natives of Northern India are tall and fair; those of Bengal and the Deccan, small and dark: the former are manly and warlike, the latter timid and superstitious. There are also the aborigines of India, the Bheels and Coles. Some account of the former will be found under the article CANDEISH, and of the latter under ORISSA. Bhats and Charuns, and some other tribes, are noticed under the head of GUZERAT.

According to the latest returns which are available, the gross revenues of the British government in India amount to about 27,000,000*l.*, more than one-half of which is derived from the land. The other principal sources of revenue are customs, stamps, excise, salt, and opium. The revenue from salt is secured by a duty charged upon the prime cost of the home manufacture, and by a customs duty upon the foreign supply; the rate being the same in both cases, and amounting to about three farthings per pound. The annual revenue contributed by this article may be estimated at two millions sterling. Opium, from the poppy cultivated in the British provinces, is manufactured solely on account of government: that produced in native states is subject to a transit-duty on its passage through British territory to the coast. In both cases the tax may be regarded as being paid wholly by foreigners. The annual revenue

from opium exceeds three millions sterling: from land, the chief source of revenue, the amount derived is more than fifteen millions sterling.

In so vast an extent of country, it might be presumed that wide diversity of language prevails; and such is the fact. In Upper India, the chief dialects are Hindoe, Bengalee, Punjabee, Mahratta, Guzerattee, Cutchee, Boondela, Brig Bhakhur, Ooriya, and Asamese. These are all derivatives from the Sanscrit. The languages of Southern India, Telooogo, Tamul, Canarese, Malayala, and Cingalese, are also closely dependent upon Sanscrit, the storehouse of the religious ceremonies of the Brahmin, and the language of the laws of Menu, which may be regarded as the basis of the actual civil law of the Hindoo, and the mainspring of his daily avocations. Oordoo, or Hindostanee, is the common language of Mahomedans throughout India, and is in fact Hindoe, the primitive tongue of the Hindoos, modified by the chief languages of their Mahomedan conquerors, Arabic and Persian. Pushtoo and Sindhee are also derived from Arabic, the language which is the depositary of the Mahomedan faith, and of the laws and civil regulations of those who profess it. Persian was formerly the language of the law courts of the East-India Company; but, in 1837, its use was abolished, and the vernacular of each district substituted.

Little or nothing deserving the name of education existed in India till a comparatively recent period. Near the end of the last century, the British government established a Mahomedan college at Calcutta, and a Sanscrit college at Benares; but these foundations, however well intended, did little either to inform or to enlarge the minds of those admitted to them, and taught at least as much of error as of truth. Bishop Heber says:—"The Mussulman literature very nearly resembles what the literature of Europe was before the time of Copernicus, Galileo, and Bacon. The Mussulmans take their logic from Aristotle, filtered through many successive translations and commentaries; and their metaphysical system is professedly derived from Plato. Both Mahomedans and Hindoos have the same natural philosophy, which is also that of Aristotle in zoology and botany, and Ptolemy in astronomy, for which the Hindoos have forsaken their more ancient notions of the seven seas and the six earths." From this state of mental thralldom, the native mind could never be expected to emancipate itself without assistance. Early in the present century, more serious and more useful exertions in the cause of education began to be made. The literature and science of the western world were introduced to a great extent; and there can be no doubt that gradually, though perhaps slowly, these will supersede the trifling and deadening studies which for ages have added to the darkness of India, in place of tending to dispel it. The

seminaries wherein the higher studies are pursued, may be pronounced to have been generally successful. In the attempt to improve and extend vernacular instruction, the British government, though equally zealous, has not been equally successful. The best results attained have been in the North-Western Provinces, where the new revenue settlement, under which the rights of every individual interested in the land became matter of record, has afforded precisely the stimulus required. The desire to ascertain and to preserve their recognised rights, induces in the people a desire for the acquisition of the arts of reading, writing, arithmetic, and mensuration. A few other of the simpler elements of knowledge are found to be easily added; and perhaps no great number of years will elapse before the mass of the people in the provinces above named will be well instructed in those branches of knowledge which are more immediately necessary; while those who have advanced somewhat farther, will not be few.

Among the great public works which have more recently been undertaken in India, may be mentioned the Ganges Canal, full particulars of which are given under the article GANGES RIVER. Measures are likewise in progress for establishing a comprehensive scheme of railway lines, to constitute the main arteries of communication throughout the country. Commencing at Calcutta, a railroad is now under construction, *vid* Rajmahal and the valley of the Ganges, to Delhi; to be thence extended to the north-west frontier. A line, from Bombay in a north-easterly direction, will form a junction with the Calcutta line in the vicinity of Mirzapore; while the cotton districts of Berar will be connected with the western coast by a branch from the Bombay line. It is further proposed to connect by railway the presidency towns of Bombay and Madras, in the direction of Poona and Bellary, while the eastern and western coasts of the more southern part of the peninsula will be linked together by a line from Madras to Pondicherry. Electric telegraph lines have also been constructed, whereby the means of instantaneous communication have been secured, not only between the presidency towns, but between all the principal military and civil stations of the country, from the Punjab to Pegu.

The early history of India is involved in extreme obscurity, and fable has in consequence usurped the place of fact. Our best information is derived from the Greeks; and until the conquests of Alexander, they were acquainted with India only through vague and meagre reports obtained from the Persians. Alexander passed the different rivers of the Punjab, and advanced towards the Ganges, which, however, he was not destined to reach. The narratives of his followers are admitted to be, in some respects, discordant; and though, previous to the time of Ptolemy, the spirit of

commercial adventure had added something to the stock of information, the knowledge of India possessed by the Greeks must be regarded as both scanty and inaccurate; but though unsatisfactory, it is sufficient to show that the people to whom it relates are almost unchanged by the lapse of centuries. Even the minute features of the national character are at this time the same that they were two thousand years ago.

Previously to the invasion of the Moguls, the Mahometan history of India possesses slender interest, and is, perhaps, little to be relied on. For a considerable time after that event, it offers but a picture of those commotions and crimes which characterize a state of society in which conflicting parties are struggling for the sovereignty. The most remarkable person of this period was Timur or Tamerlane. His conquests extended from the Irtisch and Volga to the Persian Gulf, and from the Ganges to the Archipelago. The death of Timur took place about ninety years before the arrival of the Portuguese in India by the south-east passage, the discovery of which was to effect a revolution in the destinies of the country, compared with which all previous changes were unimportant. The great mass of commerce between India and Europe was carried on by the route of the Red Sea, until the seventh century, when the conquest of Egypt by the Saracens transferred it by the Black Sea to Constantinople. When, however, the Mamelukes became masters of Egypt, they permitted the Venetians to resume the ancient route; and Alexandria was thenceforward the sole entrepôt of Indian trade. The spirit of Portuguese discovery received its impulse from the genius of Prince Henry, youngest son of John I. of Portugal. Under his countenance, naval adventure became popular; but the progress of discovery was greatly impeded by the imperfect state of navigation. The first acquisition was but of small importance, consisting only of the little island of Puerto Santo. It was sufficient, however, to encourage confidence, and stimulate to further exertions, and a subsequent expedition was rewarded by the discovery of the rich and beautiful island of Madeira. After a tedious succession of voyages continued for nearly half a century, Vasco di Gama, an active and enterprising Portuguese admiral, doubled the Cape of Good Hope, and, coasting along the eastern shore of the continent of Africa, sailed from thence across the Indian Ocean, and landed at Calicut, on the coast of Malabar. At the period of his arrival, the west coast of Hindostan was divided between two great sovereigns, the king of Cambay and the Zamorin, each of whom had under him numerous petty princes. The dominions of the Zamorin included the whole coast from Bombay to Cape Comorin; but the attempts of Di Gama to conclude a commercial treaty with this power were frustrated by the jealousy of the Mahometan merchants, and he returned to

Lisbon. His successor, Cabral, was not more fortunate; and in consequence he proceeded to Cochin and Cananore. The kings of these places were dependants upon the Zamorin: a dependency from which they were anxious to be emancipated. By them Cabral was very favourably received; and in an incredibly short time, the Portuguese acquired a paramount influence over the whole coast. Previously, however, to the arrival of Albuquerque in 1508, they were not possessed of a good port. After a violent struggle, they secured and fortified Goa, which from thenceforth became the capital of the Portuguese settlements, and the point from whence they spread their conquests and their commerce over the Eastern seas. Of all their mighty dominion, a miserable remnant is all that now exists, and that remnant depressed, impoverished, and almost in a state of estrangement from the mother country.

The annexation of Portugal to the crown of Spain was fatal to the colonial dominion of the former country, and the Dutch occupy the next conspicuous place in the commercial history of India. In the year 1594 they despatched four ships to India, under the command of Hautman, and a sanguinary war with the Portuguese soon followed. Success was long doubtful; but the Dutch ultimately triumphed. The Portuguese at first lost Malacca and Ceylon; they were subsequently driven from various settlements on the coast of Malabar; and not long afterwards the native princes permitted the Dutch to establish factories at Negapatam, Sadras, Pulicat, and Bimlipatam, on the east coast. From this period the power of Portugal in the East was rapidly approaching to extinction. The spirit of rivalry to the Portuguese was not confined to the Dutch. The splendid results which had followed the discovery of the south-east passage could scarcely fail to excite the emulation of a maritime and enterprising nation like the English. An association was formed and a fund subscribed for the purpose of obtaining a participation in the Indian trade, and a memorial presented to the government, setting forth the places with which the Spanish and Portuguese had established intercourse, and pointing out others to which the English might resort without affording ground of complaint to their predecessors. Some difficulties were interposed by the government on account of a treaty then pending with Spain, but permission was given to make preparations for a voyage, while the patent of incorporation was under consideration, and on the last day of the year 1600, the adventurers were by letters-patent from the queen constituted a body politic and corporate, by the title of "The Governor and Company of Merchants of London trading to the East-Indies." The government of the Company was vested in a committee of twenty-four and a chairman. It was empowered to trade to all places beyond the Cape of Good Hope and the Straits of Magellan for

fifteen years, with the exception of places in possession of princes in amity with the queen, whose objection should be publicly declared. From James I. a renewal of the charter was obtained, by which all preceding privileges of the Company were confirmed, and they were constituted a body corporate for ever. The early voyages of the Company were confined to the islands of the Indian Ocean; but after the confirmation and extension of their charter by James, they proceeded to establish a commercial intercourse with the Asiatic continent. Their endeavours were of course opposed by the Portuguese; but the English Company finally succeeded in establishing factories on various parts of the coast. One of their earliest settlements was at Surat, and this factory, with that at Bantam, remained for a long period their principal stations. In the Dutch, the English Company found enemies more formidable than the Portuguese. The Dutch were bent on securing a monopoly of the spice-trade, and they enforced it in the most unscrupulous and vindictive spirit. After a long course of hostility, relieved by some weak and inefficient attempts at pacification, the spirit of the whole British people, with the exception of their sovereign, was roused to the highest pitch of indignation by the atrocious proceedings at Amboyna. The Dutch, having determined on obtaining the exclusive possession of the island, fabricated a plot, to afford them a pretext for effecting their purpose. The plot, it was pretended, was confessed by two soldiers in the Dutch service, one a Japanese, the other a Portuguese, who had been put to the torture. Upon this evidence the English were apprehended, imprisoned, loaded with irons, and their books and property seized. A mock trial followed, in the course of which the prisoners were subjected to the most varied and horrible tortures, for the purpose of extorting confession. It is unnecessary to say that this mode of examination was successful. Confession was of course followed by conviction—conviction by execution; and the commercial interests of the Dutch were cemented by the blood of the accused persons. The pretence of a conspiracy was too absurd to deceive even the most credulous. When the bureaux of the factors were opened and their papers rifled, no traces of such conspiracy were discovered. The number of English on the island did not exceed twenty, while the Dutch had a garrison of three hundred men in the fort, and several other garrisons in the island. The English were not only few in number, but they were unprovided with arms and ammunition. They had not a single ship, whereas the Dutch had eight lying off the town of Amboyna. A conspiracy against the Dutch authorities, under such circumstances, could have been formed only by men labouring under insanity; and those who professed to believe in its existence, had they been sincere, would have justly fallen under the same imputation. It would be idle to say a word in refutation of a mode of trial from which common sense and

humanity alike recoil. The torture procured for the Dutch authorities that which they wanted—a legal excuse for the condemnation of their victims; but the courage of the sufferers revived as they approached a more righteous tribunal, and on the awful verge of eternity they solemnly protested their innocence. Those who will deliberately commit the graver crime of murder, will of course not hesitate at the comparatively light one of robbery. Massacre was not unnaturally followed by confiscation, and the Dutch retained English property to an immense amount. Its value has been stated at 400,000*l*. The truckling policy of James deterred him from seeking reparation of this great national wrong, and the disturbed reign of Charles allowed the Dutch a prolonged period of impunity; but the honour of the country was in some degree vindicated by Oliver Cromwell, who required and obtained payment of a large sum in satisfaction of the pecuniary injury inflicted.

At this time all the factories in the tract extending from Cape Comorin to the Persian and Arabian Gulfs were controlled by the presidency of Surat. On the coast of Coromandel the Company had established themselves in the first instance at Masulipatam. Subsequently they left that place for Arnegum. Finally they settled at Madraspatam, where, by permission of the native government, they erected Fort St. George, now the seat of one of the British presidencies. The connections of the Company with Bengal were formed gradually. The first privilege which they obtained from the court of Delhi was that of free resort to the port of Piple, a privilege afterwards much extended, through the intervention of a surgeon named Boughton, who acquired influence at the imperial court by the exercise of his professional skill. Factories were accordingly established at Hooghley, Cossimbazar, Balasore, Patna, and Malda. Of these Hooghley was chief; but the whole of them were subordinate to Fort St. George. The accession of Charles II. to the throne was followed by a renewal of the charter of the Company, by which their former privileges were confirmed, and authority conveyed to them to make peace and war with any people, not being Christians, and to seize unlicensed persons within their limits, and send them to England. From the same prince they obtained a grant of the island of Bombay, which he had received as part of the marriage portion of Catherine of Portugal. This island, now the seat of a presidency, was on its first acquisition subordinate to Surat.

Though the British interest in India was on the whole progressive, its advance was not uninterrupted. A civil war in Bantam was the means of excluding the English from Java, while the factories of Surat and Bombay were disturbed by unremitting war between the Mogul and the Mahrattas. The Mogul empire was established by Baber, a descendant of Timur, already mentioned, and sultan of the

Mogul Tartara. Having lost the northern part of his own dominions by the hostilities of the Usbeck Tartara, he attempted the conquest of Hindostan with such success, that, putting an end to the dynasty of Lodi at Delhi, he established an empire, which was raised to the greatest splendour and authority under Aurungzebe towards the end of the seventeenth century. The Mahrattas were a native Hindoo race, little known till the middle of that century, when, under a chief named Sevagee, they became successful rivals to the Moguls. The conflict between these two great powers was necessarily injurious to the English. Both the belligerents had fleets of gallies on the coast; these repeatedly skirmished in the very harbour of Bombay, and the factory was, in self-defence, occasionally driven into hostilities with each party. Surat suffered even more severely, the Mahrattas ravaging up to its very gates. In Bengal, the English, thinking they had reason to be dissatisfied with the conduct of the native powers, resolved to seek redress by arms; but the attempt was unfortunate, and they were obliged to retire from Hooghley and take refuge at Chutanuttee, contiguous to Calcutta. After a succession of hostilities, in which the factories at Patna and Cossimbazar were taken and plundered, an accommodation was effected, and the English were allowed to return to Hooghley. Negotiations for regaining their ancient privileges were commenced, but were interrupted by fresh hostilities. The contest between the Moguls and the Mahrattas had taken a decided turn in favour of the former; and Aurungzebe threatened to drive the English from his dominions. But the revenue derived from the trade was too valuable to be relinquished, and a fresh negotiation for peace terminated favourably. Tegnapatam, on the coast of Coromandel, had been ceded to the English by the rajah of Gingee, while besieged in his capital by Aurungzebe; and on the defeat of the rajah the grant was confirmed by the Mogul chief: the English fortified the station, and it has since been known as Fort St. David. The peace was followed by an event which deserves notice, as having laid the foundation of the future capital of British India. This was the transfer of the agency to Chutanuttee, to which place the British had retired when expelled from Hooghley. It was subsequently fortified, and in 1698, a grant was obtained from Prince Azim, one of the grandsons of Aurungzebe, of the three connected villages of Chutanuttee, Govindpore, and Calcutta, with the justiciary power over the inhabitants. These new possessions were forthwith fortified, and received the name of Fort William; and about the same time Bengal was elevated to the rank of a presidency. For some years the position and relative constitution of the British presidencies had fluctuated considerably; but Bombay at last completely superseded Surat: and from the building of Fort William the established presidencies were those of Madras, Bombay, and Bengal.

From its commencement the Company had been occasionally exposed to the competition of rivals. In the reign of James I. Sir Edward Mitchelbourne, for whose employment the government had vainly interceded, obtained a licence to engage in the eastern trade, which was an evident violation of the charter of the Company; he however made but one voyage, and it appears rather for plunder than for traffic or discovery. By Charles I. Sir William Courten was invested with similar privileges, and formed an association which assumed the name of the *Assayda Merchants*: with this body, after some years of competition, the Company coalesced. In the reign of William III. another company was formed under a charter from the king, which was termed the *English Company*, the old one being designated the *London Company*. The rivalry of these two bodies was soon found to be productive of mischievous consequences to both, and the expediency of a union became apparent. This was ultimately effected, and in 1708 the companies were consolidated by Act of Parliament, under the name of the *United Company of Merchants of England trading to the East Indies*. From this period the British interests in India may be considered as steadily advancing; the amount of trade and shipping increased, and the intercourse and influence of the Company were extended.

A period of quiet prosperity affords slender materials for history; and till the breaking out of the war between England and France, in 1745, nothing occurs worthy of notice. The first appearance of the French in India was nearly 150 years before this period, when a company which had been formed in Brittany sent out two ships; but the voyage was attended with so little success, that on their return the company was dissolved. At later periods the French made some further attempts to trade and establish factories: their chief rendezvous was at Surat; but the Dutch and English uniting against them, they were compelled to abandon it. They next attempted to seize on Trincomalee, but in this also they were unsuccessful. They were more fortunate in an attempt upon St. Thomé, a seaport contiguous to Madras, which they carried by assault. They retained it, however, only two years; but from the wreck of this establishment was formed their celebrated settlement of Pondicherry, where a small district was ceded to them by the native prince. In 1746 Madras was besieged by a French armament, and compelled to capitulate. Admiral Boscawen made an attempt to retaliate upon Pondicherry, which was unsuccessful; but the peace of Aix-la-Chapelle restored Madras to the English.

From this time the history of India rises in interest and importance. We have no longer to detail the advantages of commercial speculation, but to record the transfer of a magnificent empire into the hands of strangers, who, a short time previously, were supplicants for the privilege of defending themselves. The

territory of the Carnatic was one of the subordinate principalities immediately governed by nabobs, but subject to the soubahdar of the Deccan, who was himself a feudatory under the Mogul emperor. Nizam ul Mulk, soubahdar of the Deccan, dying in 1748, the succession to the vacant province was disputed between his son Nazir and his grandson Murzafa; at the same time the nabob of the Carnatic was opposed by a rival claimant. The pretender to the province and the pretender to the nabobship made common cause, and succeeded in attaching to their interests M. Dupleix, governor of Pondicherry, a man of great talent, and of still greater ambition and capacity for intrigue. The combined forces of these allies were successful in a battle, in which the lawful nabob of the Carnatic was killed, and his eldest son taken prisoner. His second son, Mahomet Ali Khan, having escaped, implored and obtained the aid of the English. Such was the origin of the Carnatic war between the English and the French; and it is remarkable that these two nations should have been engaged in hostile operations against each other in India at a time when no war existed between them in Europe. As soon as intelligence of these extraordinary events reached the courts of the two countries, orders were sent out to put an end to the contest, and a treaty was entered into, by which the two nations were to possess equal dominion, military force, and advantages of commerce on the east coast of the peninsula. The breaking out of the seven years' war in 1756 prevented the execution of this treaty, and the French and English became principals instead of auxiliaries. The French at first met with some partial success; but the tide of fortune turned in favour of their rivals, who acquired, partly by conquest and partly by negotiation, a considerable increase of dominion as well as of influence. The English were at the same time obliged to have recourse to arms to defend their interests in another part of India. The nabob of Bengal, Surajah Dowlah, attacked, and after a brief resistance, took Calcutta. The event has attained an infamous celebrity by the cruelty which accompanied it. The European inhabitants, 146 in number, were, in the most sultry season of the year, confined for twelve hours within the too-memorable Black Hole, a cube of eighteen feet, having no outlets except two small windows, strongly barred. In this miserable den, all, except twenty-three, perished. The city was in a short time retaken by Colonel Clive, afterwards Lord Clive, who had already exhibited proofs of that talent which raised him to eminence. Peace with the nabob followed; but it was subsequently proved that he was in correspondence with the French. The English resolved to punish his faithlessness, by supporting the pretensions of a rival. This led to the famous battle of Plassey, by which Meer Jaffer obtained the nabobship, and his English allies considerable treasure and accession of territory.

Meer Jaffier, however, became unwilling to fulfil the conditions of his elevation, and he was in consequence deposed. His successor, who was raised by the same influence, was his son-in-law Meer Cossim, and it was stipulated that he should grant to the English, for the pay of their army, the districts of Burdwan, Midnapore, and Chittagong. But he, too, became hostile to the power which had raised him, and it was deemed expedient to restore Meer Jaffier. A war ensued with Cossim, in which the English were completely victorious, and Cossim escaped into the dominions of the vizier of Oude. The same year which witnessed the expulsion of Cossim was signalized by the conclusion of a peace between France and England. The former country was reinstated in the factories which she possessed in 1749; but the latter, in addition to her old settlements, retained the circar of Masulipatam and its dependent districts, acquired from the French, as well as the castle of Surat, the jaghire round Madras, the Calcutta zemindary, and the districts of Burdwan, Midnapore, and Chittagong. The vizier of Oude, Suja Dowlah, with whom Cossim had taken refuge, encouraged by some discontents which existed in the British army, decided on hostilities, and war commenced. The discipline of the British army having been restored, Suja Dowlah was twice defeated; first by Major Carnac, secondly by Major Munro, and was compelled to throw himself upon the generosity of the victors. Such was also the fortune of a more elevated individual, the emperor of Delhi, who had been recently engaged in hostilities with the British, but was now a fugitive and a temporary sojourner with his nominal vassal, the ruler of Oude. Terms were granted to both, and in regard to the vizier, they were certainly not hard ones. The entire territories which the vizier had previously governed were restored to him, with the exception of certain districts reserved to the Mogul emperor, who, in return for the consideration shown for him, conferred upon the British the dewanny of the three provinces of Bengal, Bahar, and Orissa. The word dewanny is derived from dewan, which was the appellation of the officers appointed by the Mogul government for the collection and disbursement of the provincial revenues, and for the administration of civil justice. These officers held their stations during pleasure, and were only stewards for the emperor; but the grant to the Company was in perpetuity, and assigned to them the whole provincial revenue, subject only to the payment of certain specific sums. In addition to this, the emperor granted to the English the maritime districts known by the name of the Northern Circars, though over them his authority was but nominal. They fell within the government of the soubahdar of the Deccan; but having been the seat of hostilities between the English and French, the soubahdar's authority was not well established. By negotiation with him, the Company obtained

possession of this disputed territory, with the exception of a small part which became theirs in reversion. This cession, however, involved the British in new wars. It was a condition of their treaty with the soubahdar, that they should assist him with troops when he might stand in need of them; and in 1760 he applied for this assistance against Hyder Ali Khan, the sovereign of Mysore. The required aid was granted; but Hyder Ali, not less skilful as a diplomatist than as a warrior, succeeded in detaching the soubahdar from his English connection, and prevailed upon him not only to conclude a separate peace, but even to enter into an alliance offensive and defensive, for the purpose of extinguishing the British power in the Deccan. Their combined operations were frustrated, and the soubahdar deserting Hyder as he had done his former ally, made peace with the British, and retired to his own dominions. Hyder Ali then prosecuted the war alone, and, entering the Carnatic, committed dreadful ravages. Having diverted the British forces to a distance from Madras, he suddenly appeared before that place with 6,000 cavalry, having accomplished a march of 120 miles in three days. His further progress was arrested by negotiation, and a treaty was concluded on the principle of a mutual restitution of conquests.

Our arms were next directed against the Mahrattas, who had invaded the Rohilla country. The British, acting as the allies of Suja Dowlah, drove them beyond the Garoas. For this service the Rohilla chiefs had agreed to pay Suja Dowlah forty lacs of rupees; but failing in the performance of their contract, the Rohilla country was added to the British conquests. A considerable tract of land was also conquered from the Jants and other adventurers, by which the boundaries of the province of Oude were considerably advanced. On the death of Suja Dowlah, which took place soon afterwards, the province of Benares was ceded to the Company. A subsequent war with the Mahrattas was distinguished by some movements of uncommon brilliancy. A body of native troops, commanded by British officers, but whose number did not exceed 7,000, traversed with success almost the entire Mahratta territory. Several fine provinces were subdued, and important fortresses taken; but war breaking out with Hyder Ali, peace was made with the Mahrattas, and all the acquisitions given up, except Salsette, and the small islands situate within the gulf formed by Bombay, Salsette, and the continent. The war with Hyder Ali raged until his death, and was continued by his son Tippoo Sultan; but the conclusion of a peace between the English and French depriving Tippoo of the hope of assistance from the latter power, hostilities were terminated by a treaty, which left the affairs of both the belligerents nearly in the same condition as before the commencement of the war. But Tippoo Sultan's restless character would not suffer him to remain at peace, and

his invasion of the possessions of the rajah of Travancore, who was under the protection of the English, involved that power in a fresh quarrel with this turbulent prince. The result to him was humiliating. After two years' war, he was compelled by Lord Cornwallis to purchase peace by the payment of a large sum of money, the sacrifice of half his dominions, and the delivery of two of his sons as hostages for the due performance of the conditions of the treaty.

The memorable campaign which terminated in the discomfiture of Tippoo Sultan, was succeeded by seven years of tranquillity. The enemies of British interests were not, however, inactive, but were employed in sowing the seeds of future wars. Among the most insidious and dangerous of these enemies may be reckoned the French, ever on the watch for an opportunity of diminishing the power of the English, and now intoxicated with the doctrines of liberty and equality which they had undertaken to disseminate throughout the earth. Even regions which for ages had patiently submitted to despotic power, were not exempt from the intrusion of these opinions. The French ventured to establish a society in Mysore for the diffusion of the knowledge of the rights of man, and met with very different success to that which awaited the unfortunate Jean Bon St. André in the kindred region of Africa. They received from the sovereign patronage and protection. He even condescended to become an honorary member of the society, and was enrolled among its associates by the incongruous name of *Citizen Tippoo*. The result of these machinations was another war, which terminated with the storming of Seringapatam, the death of Tippoo, and the partition of his dominions. In the division, the English retained the districts of Canara, including all the seacoast of the Mysore, the provinces immediately adjoining the possessions of the British on the coast of Malabar, and the Carnatic; the forts and posts of the passes into the Mysore, and the island and fortress of Seringapatam. Certain districts were given to the Nizam, which, however, were afterwards surrendered by that power to the English, together with other territories which had been acquired by a former treaty. A third portion was reserved to be given, upon certain conditions, to the Peishwa, the actual, though not the nominal, head of the Mahrattas; but he having refused to accede, the reserved territory was divided between the British and the Nizam. The Peishwa, however, was forced ultimately to claim the assistance of the British to deliver him from the state of anarchy by which he was surrounded. A treaty was in consequence concluded, by which the British consented to furnish the Peishwa with a certain number of troops, and he to assign a portion of territory for their payment.

The war which ensued for the protection of the Peishwa was distinguished by the brilliant services of Lord Lake, and of another commander, who in the East commenced that

illustrious career which he terminated by the liberation of Europe. The splendour of his Indian campaigns is indeed obscured by the surpassing glory that encircles the head of the conqueror of Napoleon; but no one who adverts to this period of the history of India, however briefly, can be excused if he pass by the name of Wellington without bestowing the tribute of admiration. Space will not permit a detailed recital of the achievements of the British army in these wars: it must suffice to record the results. In a comparatively short space of time, a formidable confederation of French and Mahratta power was broken, and an immense accession of territory gained.

From this period the history of India presents little of importance until 1814, when the British became involved in a war with the Nepaules, a people of aggressive habits, occupying a mountain country. The nature of the country, the imperfect knowledge which the British possessed of it, the courage of the enemy, and the fortifications by which they were defended, were obstacles to the success of the British, and continued for some time to impede it. Military skill ultimately overcame these difficulties, and the Nepaules, being subdued, agreed to a treaty, by which the British became possessed of certain districts deemed necessary to the security of their frontier; but endeavouring, in the true spirit of Indian policy, to evade ratification of the treaty, a renewal of hostilities became unavoidable. A war of very brief duration was sufficient to accomplish its object. The constant wars and commotions prevailing among the native powers of India produced in great numbers men trained in habits of rapine and disorder. Gathering strength by degrees, these lawless ruffians became at length associated in bands under recognised leaders, and on the arrival of the marquis of Hastings in India, they mustered a force of not less than 40,000 cavalry. They were termed Pindarries, and in their predatory excursions committed the most shocking excesses. The irruptions of these bandits into the Company's territories compelled the government to take up arms, and they were preparing to take vigorous measures for their expulsion, when the Peishwa, an ally and dependant of the British, revolted against their authority. The rajah of Nagpore, who stood in the same relation to the British, pursued a similar course. Both these powers were subdued, while the war with the Pindarries was prosecuted with vigour. In the mean time the British government became involved in disputes with Scindia and Holkar, two independent chiefs. With the former they made terms; but the treaty forced upon him was executed with extreme reluctance. Holkar resolved to have recourse to war. It ended in his entire defeat; his power was completely broken, and he was compelled to sue for peace. The army being now at liberty to act against the Pindarries, the dispersion of that lawless body was at length effected.

Not many years elapsed between this and the war with the Burmese. That war, like most of those in which the English have been engaged, was occasioned by the aggression of the power with whom it was waged. During the Pindarrie war, the Burmese were in communication with several of the belligerent native chiefs, and were even prepared for an invasion of the frontier of Bengal. This was averted by a stratagem. The marquis of Hastings had received a rescript from the Burmese monarch, requiring the surrender of all provinces east of the Baugrutty. The projected hostility was evidently a measure concerted with the Mahrattas. Lord Hastings sent back the envoy with an intimation that the answer should be conveyed through another channel. It declared that the Governor-General was too well acquainted with his majesty's wisdom to be the dupe of the gross forgery attempted to be palmed upon him, and he therefore transmitted to the king the document fabricated in his august name, and trusted that he would submit to condign punishment the persons who had endeavoured to sow dissension between two powers, whose reciprocal interest it was to cultivate relations of amity. By this proceeding the necessity of noticing the insolent step of the Burmese monarch was evaded, and that sovereign, on hearing of the defeat of his Mahratta allies, was content to remain at peace. But though the expression of hostile feeling was for a while suppressed, the feeling itself was not removed, and the Burmese monarch now gained courage to attack, where before he had been satisfied to threaten. War commenced, and the successes of the British led to the conclusion of an armistice, which was employed in negotiations. These negotiations being unsuccessful, hostilities were resumed. The march of the English, as in Nepal, was in some degree retarded by the nature of the country; but this obstacle being overcome, the Burmese were completely defeated, and the British advanced towards the capital, when negotiations were recommenced, and a treaty concluded, by which the Burmese secured their existence as a nation, and the English obtained an extension of territory, valuable as affording a secure frontier. During the progress of the Burmese war, the British obtained from the king of the Netherlands, Malacca, Singapore, and the Dutch possessions which remained to that nation on the continent of India, in exchange for the settlement of Bencoolen and other possessions in Sumatra; an event deserving notice, and rendered important from the position subsequently attained by Singapore, as a vast *entrepôt* of commerce. Some years later, the misconduct of the rajah of Coorg, a small principality in Southern India, rendered necessary his deposal from sovereignty, and his removal from the country which he had misgoverned; and there being no one entitled to succeed him, Coorg was unavoidably annexed to the British dominions, of which it has since formed part.

The Affghan war, commenced in 1839, with a view to raising a barrier against the aggressive power of Russia, brought to the British no accession of territory, of power, or, taken on the whole, of glory. It was ostensibly undertaken to restore to the throne a former Affghan ruler, Shah Shoojah, supposed at least to be actuated by friendly feelings towards the British, though doubts on that point may well be entertained. The advance of the forces destined for the conquest of Affghanistan was attended by much difficulty and dreadful suffering; but at length a part of the invading army reached the chief city, Cabool. Here it was thought the object of the expedition was gained; but the commencement of a new and frightful series of calamities was at hand. Insurrection broke out, the British envoy was treacherously murdered, a large part of the British force was destroyed, and the remainder compelled to retire under the most disastrous circumstances, incessant annoyance and fearful slaughter marking its progress. Many deeds of heroism, never surpassed, tended indeed to add fresh lustre to the British name; and, among others, the noble defence of Jelalabad by Sir Robert Sale can never be forgotten so long as Affghanistan is remembered. But the war and its consequences contribute to furnish an awful page in the history of British enterprise in India. Ultimately the country was avenged, and its reputation vindicated, through the vigorous counsels and vigorous acts of Generals Pollock and Nott. The former arrived first at Cabool, and replanted the British colours there: the latter arrived shortly afterwards. The British could now withdraw without discredit, from a country where, for the first time, the *prestige* of their national character seemed endangered. That at least was vindicated and upheld; though, looking at the expenditure of blood and treasure, at the mass of suffering, and the imminent danger of irreparable disgrace which must have followed a premature retirement, every Englishman must wish that the war had never been undertaken.

The chapter in the history of British India which records the annexation of Sind, is little more consolatory to a sound-hearted Englishman than that on the war in Affghanistan. The amers or rulers of Sind were ever opposed to any close connection with foreigners. Various attempts had at different times been made to establish such connection, but they had been met reluctantly and unfavourably. Two or three treaties had been entered into; but they were brief, dry, and to neither party satisfactory. The amers of Sind hated the alliance, which the British were anxious to establish, at first for commercial, latterly for political purposes. When the British commenced the march to Affghanistan, a treaty was forced upon the rulers of Sind, which was more distasteful than any former one. Under this treaty, a British military force was to be permanently stationed in Sind; and, after some

considerable time, Sir Charles Napier, whose career in Sind has given rise to such a mass of controversy, was appointed to the chief command there. He commenced his course certainly with vigour, but as certainly with little consideration of the existing rulers. Treaties were proposed, which, though rejection must have been looked for, were accepted, whether with sincerity or not;—probably there was little of that quality on either side. But, notwithstanding the acceptance of the treaties, Sir Charles Napier continued to advance. During his progress the British Residency was attacked. It was gallantly defended, but weakness of numbers and deficiency of ammunition soon rendered retreat necessary. This was effected in good order, but at the sacrifice of the greater part of the property within the Residence. The battle of Meeanee followed, in which the British gained a brilliant victory. Another battle, fought near Hyderabad, the capital, may be said to have terminated the contest; and Sind, in 1843, became a British possession. The conclusion of the contest in Sind found the British government involved in difficulties in Gwalior, or the dominions of Scindia. The death of the representative of that house without heirs rendered an arrangement for the appointment of a successor necessary. A child, said to be the nearest relative of the deceased prince, was selected, and the British government approved. But every Indian court is a locus of intrigue, and that of Gwalior formed no exception. A rabble army of 30,000 men was a source of weakness, not of strength; and through the influence of a profligate and reckless court, combined with that of a disorganised army, the state appeared rapidly tending to dissolution. Internal war had in fact commenced, when the British government, somewhat tardily, though at the last rather hastily, put in motion a military force towards the disturbed country. It soon came into hostile collision with the enemy; and two victories in one day, gained by two separate portions of the British force, decided the questions at issue. A new treaty followed, dated January, 1844, in which a variety of arrangements for the safety of Scindia's territories and the security of those adjacent were embodied.

By this time a new cause for apprehension had arisen in the north-western part of India. The death of Runjeet Singh, the "Lion of the Punjab," had been followed by a series of excesses, terminating in a state of things in which the army was triumphant over the government, and was an object of its dread rather than of its dependence. At length a portion of it crossed the Sutlej, and invaded the British territories. This course was repelled; and, first at Moodkee, subsequently at Ferozshah, in December, 1845, the Sikhs were defeated. At Aliwal, and at Sobraon, fresh triumphs attended the British forces, who finally crossed the river, and dictated the terms of submission at Lahore, the Sikh capital. Here a treaty was concluded, under

which the British obtained a cession of all the territory between the Beas and the Sutlej; the native government of Lahore being retained, with some requisite modifications. But this arrangement proved of short duration. The atrocious conduct of a chief, holding the fortress of Mooltan, where two British officers were murdered, the generally distracted state of the country, the open violation by the government and people of the treaty so recently concluded, and the actual levying of war against their peaceful neighbour, demanded further intervention of a hostile character. One step only remained to be taken, and the success which again attended the British enabled the Governor-General to take it. The Punjab was annexed, and was thenceforward a part of the vast empire of India. In this instance, as in so many others which occur in the history of that empire, the cause of Great Britain was the cause of general humanity.

Another Burmese war followed; rendered necessary by the wrongs, public and private, inflicted by the Burmese government. It was neither long in duration nor brilliant in events; and concluded with the annexation, in December, 1852, of the extensive province of Pegu, in satisfaction to some degree of the injuries sustained, and in aid of the means of defending British territory and property from further aggression.

After all the declamation that has been expended upon the means by which the British dominions have been acquired, probably no conquests were ever made more righteously. This is certainly true with regard to the greater portion of them. Strangers were forced to become conquerors in self-defence. During a considerable part of the last century, the question was, whether India should be subjugated by France or by England. To this question but one answer could be given. The perfidy of the native princes was another source of war, and of British aggrandisement. But the crimes of these rulers have in this respect been beneficial to their subjects, by transferring them to the care of a better and a milder government. No friend to mankind can wish that the natives had remained under their old masters, and none but the most prejudiced can believe that their lot would have been improved by transferring them to the French.

INDMEYEE.—See EDMY.

INDOOR.—A town in Hyderabad, or the dominions of the Nizam, 94 miles N. by W. from Hyderabad, and 162 miles E.N.E. from Sholapoor. Lat. 18° 40', long. 78° 10'.

INDOORTY.—A town in Hyderabad, or the dominions of the Nizam, situate on the left bank of one of the branches of the Kistna river, and 38 miles S.E. from Hyderabad. Lat. 17°, long. 78° 59'.

INDORE TERRITORY.—From the capital, the name of Indore is extended to the aggregate of the possessions of the Holcar

family. These consist of several isolated tracts, some of them lying very remote from others. The area of the whole is estimated at 8,318 square miles. Of these districts, those situate to the north are drained by the river Chumbul and its feeders; those to the south, by the Nerbudda, flowing east and west. Like the rest of Malwa, these districts are fertile, producing in abundance and excellence, wheat and other grain, pulse, sugar-cane, cotton, and especially opium, the poppy producing it being so generally cultivated, that, when in bloom, it gives the country the appearance of a vast garden. Tobacco is also much cultivated, and is of excellent quality. The great Vindhya range traverses the southern or Indore division of Holcar's dominions, in a direction nearly from east to west, a small portion of the territory lying to the north of the mountains, but by much the larger part to the south of them. The part lying south is a portion of the valley of the Nerbudda, bounded on the south by the Satpura Mountains. The summits of the Vindhya vary in height, probably from 1,500 to 2,000 feet; and at one place the crest of the Jam Ghat, lat. 22° 23', long. 75° 49', rises to the elevation of 2,328 feet above the sea. The elevation of the Satpura range is somewhat greater, one summit being 2,500 feet above the level of the sea.

Besides the ruling tribe of Mahrattas, the population comprises many other classes of Hindoos, a few Mahomedans, and a considerable number of Gonds and Bheels. It is peculiarly the country of the Bheels, who are considered to have been the earliest occupiers of the soil. This race is one of the most wild and savage found in India, its people living for the most part on wild vegetables and game, the latter the produce of their bows and arrows, or on the plunder of their more civilized neighbours. They are, however, not entirely irreclaimable, but have in some instances been converted into useful and trustworthy soldiers. The population of the whole of Holcar's dominions is estimated at 815,164, which yields an average of 98 to the square mile. The revenue in 1848 was estimated at 22,17,210 rupees, or 221,721*l*. The armed force, including the contingent of cavalry, amounted to about 7,000 men. The principal towns,—Indore, Mundlairs, Rampoorra, Bhanpoora, and others, are described under their respective names in the alphabetical arrangement.

The founder of the family of Holcar was Mulhar Rao, a ryot or cultivator of Hul, a village of the Deccan. His birth is said to have taken place in the year 1693. First a shepherd, and subsequently a soldier, he obtained distinction and promotion in hostilities against Nizam ool Mulk, and being received into the service of the Peishwa, was appointed to the command of 500 horse. In 1728, he received a jaghire of twelve districts north of the Nerbudda; in 1731, he obtained seventy more, being at the same time appointed to

the general management of the Mahratta interests in Malwa; and in 1733, Indore was granted to him, with the district appertaining to it. From that time until his death in 1767, he was the most distinguished of the military commanders of the Mahratta race. In addition to the possessions above referred to, he was appointed deshmook or feudatory of Chandore, in Khandsaish; while his revenues were further increased by the levy of fixed tributes on several states. He was among the Mahratta leaders at the battle of Paniput in 1761, but fled when it became apparent that the defeat of the Mahrattas was inevitable. Mulhar Rao Holcar had only one son, Koondi Rao, who was killed during his father's lifetime. On the death of Mulhar Rao, the succession devolved on Malli Rao, the son of Koondi Rao. Malli Rao died insane after a few months, and the sovereignty of Indore fell into the hands of his mother Alia Bacc, who committed the charge of the military force of her dominions to Tookajee Holcar, a member of the same tribe, but not otherwise related to the family with which the Bacc was allied. He appears to have acted strictly in conformity with her wishes during his long command, which was terminated by his death in 1797. This harmony of action and the abilities of both parties brought Indore to a state of high prosperity. Succession to the power of Tookajee was disputed by his two legitimate sons Kasi Rao and Mulhar Rao, the latter of whom was cut off by assassination, through the treachery of his brother, a person weak in intellect, deformed in body, and, as his actions showed, not less deformed in his moral constitution. Tookajee left also two illegitimate sons, Etojee and Jeswunt Rao. Etojee attempted to maintain himself by a course of freebooting, but being seized, was put to a very cruel death by the Peishwa, who looked on unmoved, whilst the wretched man, tied to the leg of an elephant, implored mercy, or shrieked in agony, as he was dragged along until torn in pieces. Jeswunt Rao, who, on the murder of his brother Mulhar Rao, had fled to Nagpore, and besought the rajah's protection, received it in the shape of imprisonment; from which, however, he contrived to escape. He thereupon, like his brother Etojee, commenced a predatory career, and soon assembled an army of about 30,000 men, with above 100 pieces of artillery. But this large force received a signal defeat from the army of Scindia, when Jeswunt Rao Holcar lost nearly all his artillery, and the disaster was followed by the plunder of the capital. He rapidly recovered from the effects of this mischance, and employed European officers to introduce their discipline into his army. In October, 1802, at the battle of Poona, which he gained over the combined forces of Dowlut Rao Scindia and the Peishwa, he had fourteen regular battalions, 5,000 irregular infantry, and 25,000 horse. The distinguished state of Indore at the commencement of the present

century, when the British government was engaged in arduous conflict with various enemies, gave opportunity for Jeswunt Rao Holcar to indulge in devastation and plunder to an enormous extent. General Lake despatched against him five battalions of sepoys and 3,000 irregular horse, under Colonel Monson, an officer of extraordinary bravery, but unfortunately destitute of a corresponding degree of judgment. The expedition accordingly terminated disastrously, and the unhappy retreat of this force is characterized as one of the most lamentable events in the history of the British career in India. The apparent success of Holcar caused great numbers of freebooters to join him, and at the end of August, 1804, he advanced at the head of 60,000 horse to the Jumna, and took the city of Muttra. Marching thence, he commenced the siege of Delhi on the 8th of October, but retreated baffled on the 14th; the British under General Lake marching to its relief. Holcar then, at the head of his cavalry, suddenly crossed the Jumna near Paniput, and laid waste the Doab with fire and sword, closely pursued by General Lake, who, on the morning of November 17th, surprised him in his bivouac at Furruckabad, where he was totally routed, leaving about 3,000 dead; and so rapidly did his predatory followers fall off, that it is stated, that of the 60,000 cavalry which he led across the Jumna, less than half that number recrossed it. His infantry, which had been intrenched under the walls of Deeg, had previously been attacked and defeated by a British force under General Frazer, on whose fall, before the fate of the day was determined, the command devolved upon Colonel Monson, who had then the satisfaction of frustrating in some degree the disastrous consequences of his retreat. According to an authority whose means of information were great, Holcar entered Hindostan (or Northern India) with "92,000 men, of whom 66,000 were cavalry, 7,000 artillery, and 19,000 infantry, and 190 pieces of ordnance; and he left it with his whole force diminished to 35,000 horse, 7,000 infantry and artillery, and thirty-five guns." In October, 1805, Holcar, encouraged no doubt by the wavering and imbecile policy of Lord Cornwallis, and subsequently of Sir George Barlow, successively Governors-General, marched from Ajmeer, where he had remained during the rains, and with 12,000 cavalry, 2,500 infantry, and thirty guns, advanced to the Punjab, pursued by the British under Lord Lake, who came up with him at the city of Amritsar, where, in December, 1805, a treaty was concluded, by which Holcar relinquished any claim on Tonk, Rampoor, Bhoondee, and all places north of the Bhoondee Hills, and in possession of the British government; but was confirmed in nearly all his other possessions. In the following year he married Kasi Rao, the legitimate son of Tookajee Holcar, and Kundi Rao, the infant son of Mulhar Rao, another legitimate son of Tookajee, assassinated at an earlier

period, while contending with his brother Kasi Rao. These atrocities were closely followed by the insanity of the perpetrator, who ultimately sank into a state of utter fatuity, in which he died in the year 1811. A stormy regency succeeded, ostensibly administered by Toolsee Bye, mistress of the deceased Jeswunt Rao, but actually, at many periods of its continuance, by her various paramours. Before the death of Jeswunt Rao Holcar, she had adopted an infant, Mulhar Rao Holcar, an illegitimate son of her protector, and by general consent he was recognised as his father's successor. In 1817, the intrigues and disturbances fomented by the different factions which disturbed the state, came to a crisis. The army seized Toolsee Bye and the young Mulhar Rao, and having murdered the former, commenced hostilities under the ostensible command of the latter; a result long before indicated. These were, however, brought to a speedy termination by the decisive victory which, on December 21st, 1817, was gained at Mahidpore, by the British army over that of Holcar. On January 18th, 1818, a treaty was concluded at Mundesore, with the British government, that power engaging to extend the same protection to the territory of Holcar as to its own, and to maintain a field-force for the preservation of internal tranquillity, and for defence against foreign aggression; disclaiming all concern with Holcar's relatives or subjects, and entering into a stipulation not to permit the Peishwa or any of his heirs or descendants to claim or exercise any sovereign rights over the dominions of Holcar, and to restore to the latter chief the possessions lately conquered from him. On the other part, Holcar engaged to renounce all claims to the possessions guaranteed to Ameer Khan by the British government; to cede certain pergunnahs to Zalim Singh, of Kota; to confirm to Ghuffoor Khan his jaiabad or grant of various districts in Malwa; to renounce all claim to any places north of the Bhoondee Hills; to cede to the British government all claims of revenues and tributes from the Rajpoot states, and all the Mahratta chieftain's territories within and south of the Satpura range, including the fort of Sindwa, as well as all his possessions in the province of Khandeish, and others intermixed with the territories of the Nizam and the Peishwa; to abstain from diplomatic intercourse with other states, except with the knowledge and consent of the British resident; to entertain in his service no Europeans or Americans without similar permission; to permit an accredited minister from the British government to reside with the maharajah; to discharge his superfluous troops, and not to keep a larger force than 3,000 horse, for whose regular payment a suitable arrangement was to be made. Of the effect of this arrangement, Malcolm observes, "This was in fact a new condition to the Holcar state; for twenty years had elapsed since it had enjoyed any regular resources or government, and its

same during the greater part of that period had only served as a pretext to plunderers for committing every species of excess and crime."

Mulhar Rao Holcar died in 1833. His mother, known by the title of the Mahjee, thereupon assumed the reins of government; and an adoption took place by Mulhar Rao's widow, of an infant son of Bapoo Holcar, a distant relative of the family. The pregnancy of one of the females in the deceased maharajah's zenana (who subsequently gave birth to a son) having been concealed, the succession of the adopted son, under the title of Martund Rao Holcar, was recognised by the British government, and the birth of the posthumous child was not allowed to disturb the arrangement. Subsequently, public feeling appeared to be decidedly in favour of the superior claims of Hurree Rao Holcar, a former competitor for the guddee, and the nearest male relative of the late maharajah, by whom he had been kept for many years a prisoner in the fort of Maheyscer. An insurrection broke out in favour of the prisoner; the troops sent against him espoused his cause, and the existing government found it necessary to submit. Neutrality was observed by the British government during the contest, and amicable relations were maintained with the new ruler. Hurree Rao Holcar appears to have manifested the full amount of incapacity for government which is ordinarily exhibited by Indian princes. Under his sway the state of the country was so wretched, that it was rapidly deserted by the inhabitants, especially the more respectable and wealthy portion of them. On the death of this imbecile specimen of oriental chieftainship, he was succeeded by a youth named Kumdee Rao Holcar, whom he had adopted with the sanction of the British government. The career of this adopted successor was, however, terminated by an early death, when it appears no person possessed any hereditary claim to the guddee, neither had any one valid title to adopt, and the continuance of the Holcar possessions under a separate form of government became a question for consideration. It being determined that it should be so continued, the choice of a ruler was to be made; and, after weighing the competing claims of various candidates, the guddee was bestowed upon a youth named Mulkerjee, whose elevation it was avowed was not in virtue of either adoption or hereditary claim, but of the express nomination of the British government. The opportunity was taken to limit the succession to lineal heirs, to the exclusion of adoption. The new chief being a minor, the government was carried on, during his legal infancy, under the superintendence of the resident, by a council of regency, composed of the Mae Sahiba (widow of Jeswunt Rao Holcar) and three principal officers of state. Under this arrangement the administration and state of the country greatly improved. The young chief, educated under the auspices of the British government,

displayed at an early age great capacity for public business, and drew forth, by his exemplary conduct, the approbation of the Governor-General. In February, 1852, upon the attainment of his majority, the young rajah assumed the reins of government.

INDORE, the capital of the possessions of Holcar's family, a town situate in a plain of no great extent on the left bank of the small river Kutki. It is an ill-built place, the houses, which are disposed in irregular winding streets, being constructed with sundried bricks, and covered with clumsy tiles laid on bamboos. It contains a few mosques, of no architectural pretensions, and numerous Brahminical temples, built of basalt, and white-washed with lime. Jacquemont, who visited the place in 1832, describes the palace of Holcar as having no claims to notice, but mentions that he was building another, which would be much superior. The house of the British resident is situate east of the town; and as this, as well as the dwellings of his assistants, are well built, surrounded with groves and gardens, and judiciously disposed in a fine park-like expanse, the whole forms a pleasing scene. A strong escort of cavalry and infantry attend the resident, but the principal British force for this part of India is cantoned at Mhow, thirteen miles more to the south-east. The resident at Indore, in addition to his duties connected with that state, is the immediate representative of the British government in regard to various petty states under its protection, but in other respects differing greatly in their circumstances. The Bhopal subordinate agency is also subject to his control.

Jemnah, or old Indore, is situate on the right side of the stream. The present Indore, on the left bank, was built by order of Alia Bace, widow of Mulhar Rao Holcar, immediately after his death, in 1767. The outline of the city is nearly square, each side being about 1,000 yards in length; the area is about 216 acres, or a third of a square mile, and its population may be conjectured not to exceed 15,000. Its elevation, according to Malcolm and Dangerfield, is 1,998 feet above the sea; but Jacquemont, who, however, did not make any barometrical observations on the subject, is of opinion that this estimate errs in excess. Indore was plundered in 1801 by the army of Doulut Rao Scindia, which had previously defeated Holcar, at the head of above 30,000 men. In 1804, it was occupied, without resistance, by a British force under Colonel Murray; but was restored on the subsequent pacification, in 1805. Distance south-west from Agra 402 miles; S.W. from Delhi 494; S. from Neemuch 142; S. from Nusseerabad, by Neemuch, 285; S.W. from Saugor 224; S.W. from Allahabad, by Saugor, 537; W. from Calcutta, by Allahabad, 1,030; N.E. from Bombay, *via* Maligaum and Nassick, 377. Lat. 22° 42', long. 75° 50'.

INDOS.—A town in the British district of

Burdwan, lieut.-gov. of Bengal, 62 miles N.W. of Calcutta. Lat. $23^{\circ} 9'$, long. $87^{\circ} 41'$.

INDRAL.—A town in Hyderabad, or dominions of the Nizam, three miles from the left bank of the Manjara river, and 111 miles W.N.W. from Hyderabad. Lat. $18^{\circ} 12'$, long. $77^{\circ} 6'$.

INDREE, in Sirhind, a town on the right bank of the Delhi Canal, and on the route from Kurnal to Boorea, being 15 miles N. of the former. A little above this town it has been proposed to commence a watercourse from the Delhi Canal, to feed the canal in contemplation for uniting the waters of the Jumna and of the Sutlej. Distant N.W. from Calcutta 980 miles. Lat. $29^{\circ} 52'$, long. $77^{\circ} 8'$.

INDURGURH, in the Rajpoot state of Boondee, a fort and town held by a petty tributary rajah, 45 miles N.E. of the town of Kotah. Lat. $25^{\circ} 41'$, long. $76^{\circ} 19'$.

INDURPUR, in the fief or jaghire of Rampore, under the jurisdiction of the lieut.-gov. of the N.W. Provinces, a village on the route from Bareilly to Almora, and 51 miles N. of the former. Lat. $28^{\circ} 57'$, long. $79^{\circ} 26'$.

INDUS.—A great river of Asia. Though the vigilant jealousy of the Chinese, who rule Tibet, has excluded Europeans from that country, the inquiries of Moorcroft, Trebeck, and Gerard, have established, beyond any reasonable ground of doubt, that the source of the longest and principal stream of the Indus is at the north of the Kailas Mountain, regarded in Hindoo mythology as the mansion of the gods, and Siva's paradise; and though over-estimated by Gerard in respect to its altitude, still having an elevation of 22,000 feet above the level of the sea. The locality of the source of the Indus may be stated with some probability to be in lat. 32° , long. $81^{\circ} 30'$. Near its source, it bears the name of *Sinh-kha-bab*, or "lion's mouth," from a superstitious belief that it flows from one. It first takes a north-westerly direction to Tagle, about 160 miles from the place of its reputed source. It is there joined on its left, or south-western side, by the Eekung Choo, or "river of Gartope," which rises on the western base of the Kailas Mountain. The united stream bears the name of the northern confluent, *Sinh-kha-bab*; and, near the La Ganskiel Pass, about fifty miles below the junction, the river leaves the table-land through which it had previously flowed, and enters the deep gorges of the great depression dividing the Koenenlun or Mooz Taugh from the Himalaya. To this point, five miles from the Chinese frontier, and having an elevation of 14,000 or 15,000 feet, its course has been explored by Trebeck, the companion of Moorcroft. It is situate in lat. $32^{\circ} 56'$, long. $79^{\circ} 22'$, on the border of a sandy plain, or rather wide valley, studded with small lakes, having their edges incrustured with soda. The river was here found to be about sixty yards wide, apparently deep, and in the middle of November frozen over in most parts. Thirty miles below this, the river

turns nearly south-west for a short distance, and then takes the direction of north-west. At Ugshi, which is about 330 miles from the source, it was surveyed by Moorcroft, and found to be about fifty yards wide. Close to Le, the capital of Ladakh, and thirty miles below Ugshi, the elevation of its bed is not less than 10,000 feet; and if that of its source be assumed at 18,000, and its length, so far, at 360 miles, its fall will be found to be twenty-two feet per mile. Yet the descent of the bed of the *Sinh-kha-bab* is far less rapid than that of the Sutluj, which in thirty miles descends 2,300 feet, or about seventy-six feet in the mile. Holding its course in a direction approaching to north-west, the *Sinh-kha-bab*, about eighteen miles below Le, is joined, opposite to Niemo, by the river of Zanskar, flowing from the district of the same name, and in a direction from south-west to north-east. The Zanskar is a very rapid, turbid river; the *Sinh-kha-bab*, a clear and placid stream. About thirty miles below this, and 408 from its source, Vigne found the river, at Kulutzi, crossed by a wooden bridge, and only twenty-five yards wide. The small size of the river, after a course of more than 400 miles, can only be accounted for by the excessive aridity of the elevated tract through which it has held its way. Moorcroft estimates the breadth of the river at this place at only twenty yards; but he found that it rose nearly forty feet during the season of inundation. Having flowed about fifty-five miles below this place, in a north-west direction, it receives from the south the river of Dras, which, rising in the mountains forming the north-eastern frontier of Kashmir, holds a north-easterly course of about ninety miles, and, receiving several streams both from the east and west, discharges a considerable volume of water at its confluence. From this confluence the *Sinh-kha-bab* takes a more northerly direction, for about forty-seven miles, to the fort of Karis, in lat. $35^{\circ} 11'$, long. $75^{\circ} 57'$, where it receives, from the north, the water of the Shy-yok, by far its most important tributary above the river of Kabool. At the confluence of the two rivers, the Shy-yok is about 150 yards broad, the *Sinh-kha-bab* not more than eighty; but the latter is the deeper, and has a greater body of water. Below the confluence, the river is known by the name *Aba Sind* (Indus Proper). About twenty-five miles below the point of junction, and westward of it, the Indus, opposite Iskardoh, receives from the north the river of Shyghur. The downward course of the Indus between Iskardoh and Makpon-i-Shagaron, in which interval it runs a distance of about ninety miles, is in a direction west-north-west. At Makpon-i-Shagaron, in lat. $35^{\circ} 48'$, long. $74^{\circ} 30'$, according to Vigne, who viewed the place at the distance of eighteen miles, the river emerges from the mountainous region, and, turning south, a course which it thenceforth continues to keep generally to the sea, takes its way through the unexplored country north of

Attock. Vigne caused the part intervening between Iskardoh and Makpon-i-Shagaron to be explored by his native servants, who found it to flow through a succession of rocky gorges and deep and narrow valleys, rugged and difficult, but presenting nothing else remarkable: more recently this section has been examined by Europeans. About three miles south of Makpon-i-Shagaron, it receives, from the north-west, a considerable stream, called the river of Gilghit. Vigne, who viewed the Indus at Achio, about twenty-five miles below this confluence, describes it there as a vast torrent rushing through a valley six or seven miles wide, and holding a south-westerly course, which might be traced downwards for at least forty-five miles. From thence to Derbend, a distance of about 114 miles, its course lies through countries inhabited by barbarous and fanatical tribes of Mussulmans, and which does not appear to have ever been explored by Europeans. At Derbend, on the northern boundary of the British territory of the Punjab, it was in 1837 surveyed by Lieutenant Leech, of the Bengal Engineers, and there, in the middle of August, about which time it is fullest, he found it 100 yards wide. From this place, about 812 miles from its source, and in lat. $34^{\circ} 18'$, long. $72^{\circ} 54'$, he descended the river on a raft to Attock, a distance of about sixty miles. In this interval, the river, flowing through a plain, has a broad channel of no great depth, containing many islands, and is fordable in five places.

The fords are only available in winter, when the river is lowest, and even then the attempt is perilous, from the rapidity of the current and the benumbing coldness of the water. If the account given by Masson be correct, 1,200 horsemen were swept away and drowned on one occasion when the Indus was crossed by Runjeet Singh at one of these fords. Hough states the number lost at 7,000. Shah Shooja forded the Indus in 1809 above Attock, but his success was considered to be almost a miracle. Where crossed by Forster, about twenty miles above Attock, in the middle of July, and consequently when fullest, it was three-quarters of a mile or a mile in breadth, with a rough and rapid current, endangering the ferry-boat, though large enough to contain seventy persons, together with much merchandise and some horses. Close above Attock, the Indus receives, on the western side, the great river of Kabool, which drains the extensive basin of Kabool, the northern declivity of Sufeid Koh, the southern declivity of Hindoo Koosh and Chitral, and the other extensive valleys which furrow this last great range on the south. Both rivers have large volumes of water, and are very rapid; and as they meet amidst numerous rocks, the confluence is turbulent, and attended with great noise. The Kabool river appears to have nearly as much water as the Indus, and in one respect has an advantage over it, being navigable for forty miles above the confluence, while the upward navigation of the

Indus is rendered impracticable by a very violent rapid, immediately above the junction. Both rivers have gold in their sands, in the vicinity of Attock. It is obtained in various places along the upper course of the Indus, or its tributaries; as at Gartope, in Hundes, and also near the confluence of the Shy-yok, and near Iskardoh. Attock, just below the confluence of the Kabool river, about 872 miles from the supposed source of the Indus, and in lat. $33^{\circ} 54'$, long. $72^{\circ} 16'$, is remarkable, as being the limit of the upward navigation of the latter river, and the place most frequented for passage over it from Hindostan to Afghanistan.

The passage is, for the greater part of the year, made by bridges of boats, of which there are two: one is above the fort of Attock, where the river is 800 feet wide; the other below, where it is above 540 feet wide. Wood found the depth at Attock, in August, to be sixty feet; the rate of the current six miles an hour; the breadth, where he measured it above the place of the bridge, 858 feet. The inundation affects the depth and speed of the current, rather than the breadth, at Attock. This remarkable point is about 1,000 feet above the sea, and consequently about 17,000 feet below the source of the Indus, which falls, therefore, to that extent in 872 miles. This is at the average rate of about twenty feet per mile. The length of its channel from Attock to the sea is 942 miles, and consequently, in that lower part of its course, it falls little more than a foot per mile. At Attock, the river, flowing generally south-south-west, as it does below Derbend, enters a deep rocky channel in the Salt range, or secondary mountains, which connect the eastern extremity of Sufeid Koh with the base of the Himalaya, in the Punjab. In this part of its course, the river, as well as the fort on its left or eastern bank, is known by the name of Attock, in consequence, as is generally supposed, of the prohibition under which the Hindoos originally lay of passing it westward. For about ten miles below Attock, the river, though in general rolling between high cliffs of slate rock, has a calm, deep, and rapid current; but for above 100 miles farther down, to Kala-Bagh, it becomes an enormous torrent, whirling and rolling among huge boulders and ledges of rock, and between precipices rising nearly perpendicularly several hundred feet from the water's edge. The water here is a dark lead-colour, and hence the name *Nilah*, or "blue river," given as well to the Indus as to a town on its banks, about twelve miles below Attock. At Ghora Trup, about twenty miles below Attock, the immense body of water passes through a channel only 250 feet wide, but having a depth of 180 feet, the velocity being about ten miles an hour.

Wood, describing the course of the river from Attock to Kala-Bagh, says, "It here rushes down a valley varying from 100 to 400 yards wide, between precipitous banks from 70 to 700 feet high." During inundation, the river rises in this part about fifty feet. As the river

approaches the plain country below Kala-Bagh, the channel expands nearly to the breadth of 500 yards; just above that town the width is 481 yards. Below Kala-Bagh, in lat. $32^{\circ} 57'$, long. $71^{\circ} 36'$, and about 830 miles from the mouth, the river enters the plain, the east or left bank here becoming low, while on the right the Khussoree Hills rise abruptly from the water, having, as Burnes observes, "the appearance of a vast fortress, formed by nature, with the Indus as its ditch." Along the base of these hills, which stretch south-south-west for about seventy miles, the channel is deep, generally having soundings about sixty feet. On entering the plain, the water loses its clearness, and becomes loaded with mud. In inundation, the depth of the stream is not so much affected in this part of its course as are the breadth and velocity; and here, as well as in the Delta, the river, when swollen, overflows the adjacent country to a great extent. From Kala-Bagh, southwards, to Mittunkote, distant about 350 miles, the banks, either right or left, or both, are in several places so low, that the first rise of the river covers the country around with water, extending, as the inundation advances, as far as the eye can reach. As the inundation originates in the melting of the snows in the Hindoo Koosh and the Himalaya, it commences with spring, and retrogrades as autumn advances; and so regular is this process, that, according to Wood, it begins to rise on the 23rd of March, and to subside on the 23rd of September, its maximum being about the 6th or 7th of August. The average rise of the inundation between Kala-Bagh and Mittunkote is eight feet and a half; the declivity of the water's edge is eight inches per mile. In this part of its course, with the exception of the Koorum, the Indus receives scarcely any accession to its water. Higher up it has a few tributaries, though of no great importance. Thus, on the right, or west bank, in lat. $33^{\circ} 25'$, long. $71^{\circ} 52'$, the Toe, described by Elphinstone as a deep and clear stream, falls into it. On the left, or east side, in lat. $33^{\circ} 47'$, long. $72^{\circ} 16'$, the Indus receives the Hurroo, a small stream; and on the same side, lower down, in lat. $33^{\circ} 1'$, long. $71^{\circ} 46'$, the Swan, also an inconsiderable stream. The Indus, between Kala-Bagh and Mittunkote, in consequence of the great breadth of its channel, is scarcely affected by rain; but in the narrow part, above Kala-Bagh, it sometimes rises eight or nine feet in a short time from this cause. In many places where the river flows through the plain, there is an inner and an outer bank. The outer banks run at a great distance from each other, and between them, during inundation, the vast body of water rolls often in several channels, separated by shifting islands: when the river is low, this great course becomes a shallow valley of very irregular breadth, and the shrunken river meanders along its bottom. If the outer banks were continuous, the river would roll along in a stream varying in breadth according to the

greater or less degree of inundation; but at all times, even when fullest, in a defined channel of moderate breadth, though varying greatly in different parts. In many places, however, the outer bank is wanting, and, during inundation, the river expands over the country, converting it into an extensive lake. Between Mittunkote and Bukkur, the inundation extends sometimes twenty miles from the western side of the river, in its low state, and ten or twelve from the eastern side. Wood gives the width of the shrunken river as varying from 480 to 1,600 yards, and the average width at about 680 yards; its usual maxima of depth, at nine, twelve, or fifteen feet: but its bed is so irregular, and so liable to be obstructed by shifting shoals, that though it cannot be regularly and safely forded in any part, except that intervening between Torbela and Attock, its navigation, even below the confluence of the Kabool, cannot be effected at all times, and continuously throughout its whole course, by boats drawing more than thirty inches water. The general velocity of the stream in its shrunken state is estimated by Wood at three miles an hour; but he observes, "it is scarcely necessary to remark, that the three last items (breadth, depth, velocity) are very inconstant. At no two places are the measurements exactly alike, nor do they continue the same at one place for a single week." In fact, the breadth, during inundation, is only 250 feet at Ghora Trup; and below Mittunkote, it in one place amounts to thirty miles; the depth at the same time and place is 186 feet, and in other places only twelve feet: the velocity at Ghora Trup, during the inundation, is ten miles an hour; at other places, not half that, and when the river is low, often not more than two miles an hour.

The general course of the river is a little west of south from Attock to the confluence of the Punjnd, the channel which conveys the collected streams of the Punjab. This confluence is on the left or eastern side of the Indus, two or three miles below Mittunkote, in lat. $28^{\circ} 55'$, long. $70^{\circ} 28'$, and about 490 miles from the sea. Above the confluence, the breadth of the Indus is less than that of the other river, but, in consequence of the greater depth and velocity, the former has the greater volume of water. Wood found the Indus having a breadth of 608 yards, a velocity of about five miles an hour, a depth of twelve or fifteen feet, and discharging 91,719 cubic feet per second. The Punjnd had a breadth of 1,766 yards, a velocity of about two miles an hour, a depth of twelve or fifteen feet, and discharged 68,955 cubic feet per second. Below the confluence, the Indus is in its lowest state 2,000 yards wide. Its aspect in this part is well described by Boileau. "At the place where we crossed the Indus, almost immediately below its junction with the Punjnd, its stream is 2,047 yards, or nearly a mile and a quarter, in breadth, at a place where its width was unbroken either by islands or sandbanks. The

banks are very low, and the water very muddy, having just begun to rise, from the melting of the snows at its sources; nor is the stream of very great depth, except in the main channel; but with all these drawbacks, it is a magnificent sheet of water—a very prince of rivers." For a considerable distance above and below Mittunkote, the country is low, and the inundation extensive, reaching to Shikarpoor, and even to some places distant from the river twenty miles to the west, and extending eight or ten miles to the east. Lower down, at Roree, the stream makes its way through a low ridge of limestone and flint, which stretches from the mountains of Cutch Gundava, eastward, to Jessulmair. There are strong indications that the stream, in remote ages, swept far eastward along their northern base, and irrigated the level tract at present desert, but exhibiting numerous proofs that it once was traversed by large streams, and was both fertile and populous. At present, this ridge is cut, not only by the Indus, but, a few miles farther east, by the Eastern Narra, which diverges from the main stream, on the eastern side, a short distance above Roree, and takes a south-easterly course through the desert, in which it is usually lost, though in violent inundations it rolls onward to the sea in a great volume of water, discharging itself through the Koriee, or most eastern mouth, which is in general quite deserted by the fresh water. At Roree, there are four rocky islets, the largest of which, that of Bukkur, contains an extensive fort, and divides the river into two channels. Fifty miles below this place, the Western Narra, a great and permanent branch, divaricates from the Indus on the western side, and, after a tortuous course of nearly 120 miles, rejoins the main stream about four miles south-east of Sehwan. A little above that town, the Narra has a large but shallow expansion, called Lake Manchur, varying in circuit from thirty to fifty miles, according to the greater or less degree of inundation. This great watercourse, in the part intervening between Lake Manchur and the Indus, has a name distinct from that of the Narra, being called the Arul. From Sehwan, downwards, to the efflux of the Fulailee, a distance of about eighty miles, the bed of the river is much depressed below the level of the adjacent country, and the banks are elevated from sixteen to twenty feet above the surface in the low season: in this part of the course, inundations rarely overspread the country, and irrigation is effected by raising the water with the Persian wheel. The Fulailee, a large branch, though yearly diminishing, leaves the Indus, on the eastern side, about twelve miles north of Hyderabad, and, flowing south-east, insulates the Gunjah Hills, on which that town is built, as, about fifteen miles below it, an offset running westward rejoins the main stream. At Trical, where is the point of reunion, in lat. 25° 9', long. 68° 21', the Delta commences; all below it, and contained be-

tween the Fulailee on the east, and the extreme western branch of the Indus, being, with little exception, alluvial, and obviously deposited by the river. The Fulailee holds a south-easterly course, in the lower part of which it bears the name of the Gonnee, which, communicating, during high inundations, with the Phurraun, is thereby discharged into the sea through the Koriee mouth. The Koriee mouth may more properly be termed an arm of the sea, as the water is salt, and it receives a current from the Indus only during inundations of unusual height. Burnes found it seven miles wide and twenty feet deep at Cotasir, about twenty miles from the open sea. Some suppose it to have once been the principal mouth of the Indus, constantly discharging the water of the Narra, which they consider to have been the chief branch. It is at present the most eastern of the estuaries connected with the Indus. The Pinyaree, a wide branch, which diverges from the Indus at Bonna, about forty miles below Hyderabad, is navigable, downwards, to within fifty miles of the sea: at that distance the navigation is closed by a bund or dam, thrown across it at Maghreebe; but as the water makes its way through small creeks in time of inundation, the navigation recommences below the bund, and continues to the sea. The Pinyaree discharges itself through the Sir estuary, two miles wide at its mouth, with a depth on the bar of one fathom, and of from four to six inside: it is next, westward, to the Koriee mouth. At about six miles above Tatta, the Kulairee, a small branch, leaves the Indus on the right or western side, and may be considered to mark the commencement of the Delta on that side. Were not its water lost by absorption and evaporation, it would generally insulate Tatta, as it now does occasionally. At about five miles below Tatta, and sixty miles from the sea, the Indus is divided into two great branches,—the Buggaur, which flows westward, and the Sata, which maintains the previous course of the Indus southward, and is in strictness the continuation of that river. The Mull and the Moutnee, formerly great branches, leaving the left or eastern side of the Sata, are now so diminished as to be almost dry. The estuaries, however, remain: that of the Mull is navigable for boats; it is the mouth next westward of the Sir; and beyond this, in the same direction, is the Kaha, or estuary of the Moutnee, at present unnavigable. A few miles further west is the Kookywarree mouth, now blocked up by a sandbank, but forming, in 1837, when Carless published his account, "the grand embouchure of the Indus," having a breadth of 1,100 yards. Even then, however, the navigation was rendered difficult by an enormous bank stretching across it, and extending five miles out to sea. The Sata now discharges the great bulk of its waters through the Kedewarree, the next mouth proceeding westward, the embouchure of which was considerably diverted during the inundation of

1848. Its channel is well defined, having no less than from seven to eight feet water at low spring tides. Following the line of coast in a north-westerly direction, the next estuary is that of the Hujamree, where the English force, advancing in 1838 on Afghanistan, were landed. Next in succession, in the same direction, is the Jooa mouth, leading by the river of the same name to the Buggaur, and practicable to the junction for river steamers during the floods. During the low season, the estuaries of both the Jooa and Hujamree are safe roads for ingress or egress, independent of fresh-water discharge. The Dubbar and Gorabee, now united, form the next mouth, which has five feet on the bar at low water; beyond which is the Pityanee, also communicating with the Buggaur, by which it was for a time deserted. Further on is the Cooddee mouth, having five feet at low water; and this is succeeded by the Pitty, one of the largest, deepest, and best-defined of the mouths of the Indus, and much frequented by steamers to and from Kurrachee. Next and last is the Gizree, the estuary of a branch of the Indus formerly obliterated, but again rendered navigable for boats, though having but two feet water at its mouth at low tide.

The distance from the Koree estuary, in the south-east, to the mouth of Gizree creek, in the north-west, is about 130 miles, and such is, consequently, the length of the seacoast of the Delta. There are several mouths of less importance, and the enumeration of which is unnecessary. There are also numerous intricate cross-channels, allowing an inland navigation for small vessels between the various creeks and branches. To sum up briefly this involved subject—during the season of low water, the Indus falls into the sea by only one channel of any importance: this, called the Sata, Munnejah, or Wanyanee, has its efflux by the Kedewarree mouth, the entrance of which is very unsafe, and consequently avoided by coasting craft. "Impetuous currents and shifting sands are dangers they are not disposed to encounter. Sharp vessels grounding on such a locality seldom escape serious disaster, a few hours being sufficient to engulf them in a bed of sand, from which no human aid or skill can extricate them." The other mouths, with the exception of the Pitty, are, in the season of low water, little more than creeks silted up and closed at various distances from the sea. The number of these creeks or estuaries at present at all worth noticing, is thirteen, occurring in the following order in proceeding from south-east to north-west: the Koree, Seer, Mull, Kaha, Kookewarree, Kedywarree, Hujamree, Jooa, Durbar, Pittecanee, Cooddee, Pitty, and Gizree. The tide influences the Indus nearly up to Tatta, a distance of about seventy miles. The spring tide rises nine feet.

The description above given of the mouths and lower branches of the Indus is mainly applicable to their state when the river is lowest. When the river is at its height, as

Burnes observes, "the great branches of this river are of themselves so numerous, and throw off such an incredible number of arms, that the inundation is general; and in those places which are denied this advantage by fortuitous circumstances, artificial drains, about four feet wide and three deep, conduct the water through the fields." For about twenty miles from the sea, the whole country is nearly submerged. At this season, the water of the sea is fresh for some distance from the land, and discoloured for a still greater. The quantity of water discharged by the Indus is by no means proportionate to the enormous supplies derived from its numerous tributaries: the larger portion seems lost by evaporation, absorption, and employment for irrigation in a sultry climate where rain seldom falls. Wood and Lord state the *maximum* discharge in August, at 446,080 cubic feet per second, and in December, at 40,857 cubic feet per second. The water in the early part of the season of inundation is very unwholesome, in consequence of the great quantity of decayed vegetable and animal matter held in suspension by it. Lord, who made experiments by desiccating the water and weighing the residuum, computes that the quantity of silt annually discharged by the river, during the seven months of inundation, would suffice to form an island or bank forty-two miles long, twenty-seven miles broad, and forty feet deep; but it is clear, that this computation must be received with great allowances, as, according to it, the land of Sinde must have been much farther advanced into the Indian Ocean than it is found to be. After the early part of the season of inundation, if the water be preserved until the earthy admixture has subsided, it is both palatable and wholesome.

The Indus is infested by alligators: they are of the *guryial* or long-snouted kind, the common kind being unknown in the river, though numerous in lagoons near Kurrachee. The *bolun*, a cetaceous animal, the size of a porpoise, is common. Nowhere are fish finer or more abundant, and they form a large portion of the sustenance of the population of the adjacent country. Westmacott enumerates sixteen kinds, some as long as six or seven feet. The *pulla*, a species of carp, is a rich and delicious fish, though bony to a degree dangerous to an incautious eater. It is largely consumed on the spot, and also dried for exportation, forming an important article in the scanty trade of Sinde. The fisherman of the *pulla* floats, with his breast downwards, on an oblong earthen vessel, closed in all parts except an orifice, which he covers by applying his stomach to it. In this position, he passes along, taking the fish with a net at the end of a long bamboo, and depositing it in the vessel.

Wood observes, that "the population of the banks of the Indus are almost amphibious. The boatmen of Lower Sinde, for example, live, like the Chinese, in their bonts. If a native of the Lower Indus has occasion to cross

the stream, a pulla-jar wafts him to the opposite shore. At Bukkur, the *masruk* (inflated hide) supercedes the pulla-jar; and from Mittunkote upwards, every man living near the river has one. *Kossids* (couriers) so mounted make surprising journeys, and the soldier, with sword and matchlock secured across his shoulders, thus avoids the fatigue of a long march." The leisure time of every description of persons is spent in the water, or floating on it. Such familiarity with the water naturally inclines the population to regard it as the great medium of commercial intercourse, and Hamilton, who visited Sindé at the close of the seventeenth century, found the traffic considerable. Until within the last few years, the trade of the Indus was obstructed, and in many places destroyed, by the oppression and vexatious rapacity of the various petty powers and tribes claiming sovereignty over divers parts of its course. The success of the British arms has led to the restoration of a better state of things. The *doondak*, or boat generally used in Lower Sindé, is a clumsy vehicle, flat-bottomed, of capacity varying from thirty to fifty tons, with bow and stern, each forming a broad inclined plane, having, the former, an angle with the surface of the water of about twenty, the latter of about forty degrees. The *jumptees*, or state barges of the *ameers*, were of considerable dimensions. Wood measured one 120 feet long, eighteen and a half broad, and drawing two feet six inches water. In the upper part of the Indus, the boat chiefly used is the *zokruk*, in most respects resembling the *doondak*, except that it is smaller, lighter, and more manageable. The *duggak*, used only in the boisterous part of the current above Kala-Bagh, is very strongly built, with stern and bow greatly projecting, to keep away the hull from the bank, in case of collision with it. It is so heavy and unmanageable, that if brought far down the river, it is usually disposed of there, to save the labour and expense of tracking it back. In proceeding up the stream when the wind is unfavourable, as is generally the case during the half-year between the autumnal and vernal equinoxes, way must be made exclusively by tracking. During the other half-year southerly winds prevail, and the boats run up under sail before it, except where the use of sails becomes dangerous from peculiar circumstances. Steam will doubtless be found highly efficient in navigating the Indus. Communication by its means has indeed been already established between Kurrachee and Mooltan, by government vessels, for goods and passengers; an advantage which it is confidently believed will shortly be extended to Kala-Bagh, on the Indus, and to the town of Jhelum, on the tributary of that name. The principal obstacle to its general employment is the dearth and inferior quality of the firewood of Sindé; but coal has been discovered near the Indus, both in the Punjab and on the western bank of the river, though further investigation is required as to its quality and quantity.

In estimating the advantages to be drawn from the navigation of the Indus, reference should be had, not only to the home consumption of Sindé and the Punjab, but also to the demand of the various marts of those countries through which Afghanistan, Khorasan, and Central Asia are largely supplied; and the best means of advancing this most important branch of trade have been deemed to be the establishment of grand periodical fairs at suitable points on the banks of the Indus, and in affording facilities of communication and protection to the commercial classes. Kurrachee and Sukkur have been selected as sites for this purpose. Communication between Kurrachee and the higher parts of the river is carried on by means of government steam-vessels.

Although some of the particulars following have been already noticed, it may be convenient, in conclusion, to bring them into one view. The length of the navigable part of the river from the sea to Attock has been ascertained, by measurement, to be 942 miles; that of the upper part is about 860 miles; making a total length, in round numbers, of 1,800 miles. The average declivity of the watercourse from the supposed locality of the source to Attock is, per mile, twenty-four feet; from Attock downwards to Kala-Bagh, a distance of about 110 miles, it is twenty inches; from this last place to Mittunkote, a distance of about 350 miles, it is eight inches; and thence to the sea, six inches. The Indus is probably destined to be an important channel of political and commercial communication.

INGEMOOR.—A town in the British district of Nellore, presidency of Madras, 129 miles N.N.W. of Madras. Lat. 14° 49', long. 79° 39'.

INHOWNA, in the territory of Oude, a small town on the route from Lucknow cantonment to Pertaubgurh, 51 miles S.E. of the former, 59 N.W. of the latter. It has a small bazar, and is well supplied with water. Lat. 26° 33', long. 81° 25'.

INGLEGHEE.—A town in Hyderabad, or dominions of the Nizam, 104 miles W.S.W. from Hyderabad, and 84 miles E. by N. from Beejapoor. Lat. 17° 2', long. 77° 1'.

INJADRI.—See SAUTPOORA MOUNTAINS.

INJILLY.—A town in the British district of Ganjam, presidency of Madras, 20 miles W.N.W. of Ganjam. Lat. 19° 29', long. 84° 50'.

INNACONDA, or **VINUKONDA**, in the British district of Guntoor, presidency of Madras, a town, the principal place of the talook or subdivision of the same name. Shocks of earthquake have been occasionally felt at this place. Lat. 16° 8', long. 79° 48'.

INTGAON, in the British district of Bareilly, lieutenant-gov. of the N.W. Provinces, a village on the route from the town of Bareilly to Seetapoor, and 29 miles S.E. of the former. Lat. 28° 16', long. 79° 56'.

IRADUTNUGUR, in the British district of Agra, lieut.-gov. of the N.W. Provinces, a town on the route from Dholpoor to Agra, 15 miles S. of the latter. Lat. $26^{\circ} 59'$, long. $78^{\circ} 9'$.

IRAK RIVER, in Sind, rises at the base of the Bhool Hills, in the mountainous tract between Kurrachee and Sehwan, and in about lat. $25^{\circ} 20'$, long. $67^{\circ} 45'$. It holds a course of about forty miles in a south-easterly direction, and empties itself, in lat. $24^{\circ} 53'$, long. $68^{\circ} 6'$, into the dund or lake of Kunjur, a considerable body of brackish water, abounding in fish. Though the stream fails in time of drought, water may always be obtained by digging in the bed.

IREJ.—See ERICH.

IRLAPAU.—A town in the British district of Nellore, presidency of Madras, 37 miles S.W. of Ongole. Lat. $15^{\circ} 12'$, long. $79^{\circ} 40'$.

IRON ISLAND, off the coast of the Tenasserim provinces, measuring twenty miles in length from north to south, and two in breadth. The north part of the island terminates in a point with rocks, having close to them from twenty-five to thirty fathoms water. Lat. $12^{\circ} 45'$, long. $98^{\circ} 28'$.

IRRAWADDY.—A river rising at the eastern extremity of the Snowy range of the Himalayas, the source of its principal tributary being in lat. $28^{\circ} 5'$, long. $97^{\circ} 58'$. It flows in a direction from north to south, traversing the heart of the Burmese territories, which it separates into two nearly equal divisions. After a course of 790 miles, it reaches the southern frontier of Burmah, and crossing over into the British province of Pegu, pursues its way for a further distance of 270 miles, reaching the Bay of Bengal by several mouths, which form the delta of the Irrawaddy. At the distance of 540 miles from its source, it passes the Burmese town of Umnerapoor; and a few miles farther, it flows past the capital of the empire, sixty-five miles beyond which it receives, on the right side, its great confluent the Khyendwen, flowing also from the north. The course of the united stream through the Burmese territory continues for the further distance of 180 miles. Fifty miles below the southern frontier of Burmah, as at present defined, it passes the British town of Prome; ninety miles below which it diverges into two principal branches, each measuring about 130 miles in length. The more easterly of these branches is designated the Rangoon or Siriam river, from the cities of those names built upon its banks; and it falls into the Gulf of Martaban, in lat. $16^{\circ} 28'$, long. $96^{\circ} 24'$. The other main branch, intersecting the province in a south-westerly direction, is known as the river of Bassein, and discharges itself into the Bay of Bengal, in lat. $15^{\circ} 50'$, long. $94^{\circ} 26'$. Innumerable watercourses, forming the delta, are thrown off from these two rivers.

From experiments instituted in 1852 across

the river at Prome, to ascertain the velocity of the current, it appeared that the fall of the stream from October to February amounted to about twenty feet; the mean depth on the 25th April was found to range from twelve to thirteen feet; and its mean speed was computed at about two miles per hour. The Bassein branch affords a passage for the largest ships for sixty miles from its mouth, and for forty miles further for vessels of 300 tons. No river of similar magnitude, it is stated, presents so few obstructions. According to the theory of M. Klaproth and the Chinese geographers, the Irrawaddy is a continuation of the Sanpo of Thibet; but though absolute proof be yet wanting of the identity of the latter with the Brahmapootra, little doubt appears to be now entertained on this point. A high authority, exploring the Irrawaddy at a spot obviously at no great distance from its source, observes: "The Irrawaddy we were surprised to find but a small river, smaller even than we anticipated, though aware of the proximity of its sources. It was not more than eighty yards broad, and still fordable, though considerably swollen by the melting snows; the bed was of rounded stones, and both above and below where we stood, we could see numerous shallow rapids. As to the origin of the river, I felt perfectly satisfied from the moment I made inquiries at Sadiya; but since further evidence, founded on the report of the natives, might not have satisfied those who had adopted M. Klaproth's opinion, that the waters of the Sanpo find an outlet through the channel of the Irrawaddy, I had resolved, if possible, to have ocular and incontrovertible demonstration; and I could not help exulting, when standing on the edge of the clear stream, at the successful result of our toils and fatigues. Before us, to the north, rose a towering wall, stretching from west to east, offering an awkward impediment to the passage of a river in a cross direction; and we agreed on the spot, that if M. Klaproth proved determined to make his Sanpo pass by Ava, he must find a river for his purpose considerably removed towards or into China." A chart of the Irrawaddy from Rangoon to Yandaboo has been published, and further attempts to explore this river have, it is believed, been successful in adding somewhat to the stock of knowledge on the subject. But at present their results are not available for general use, as no public communication, either official or otherwise, has yet been made of them. A short time will probably throw open the discoveries to all who may take an interest in the matter.

ISAKHANKAKOT, in Sirhind, a village with a small fort, on the route from Loodianah to Ferozpoor, and 46 miles W. of the former town. It is situate in an open, level country, partially cultivated, and capable of yielding supplies for a moderate number of troops. Water is abundant, and the road in this part of the route generally good, though in some

places sanely, yet not so much so as to present serious difficulties for guns or carriages. Distance N.W. from Calcutta 1,134 miles. Lat. 30° 57', long. 75° 16'.

ISHAMUTTEE.—The name of one of the numerous watercourses of the Ganges which intersect the lower provinces of Bengal: it divaricates from the Martabhangha in lat. 23° 24', long. 88° 42', and flowing in a southerly direction for seventy miles through the British districts of Nuddea and Barasut, falls into the Bay of Bengal through the Soonderbunda.

ISHAPORE.—A village on the left bank of the Hooghly river, in the British district of Barasut, lieut.-gov. of Bengal. At this place are the powder-works of the government. The manufacture of gunpowder at Ishapore was, however, directed to be suspended in 1852; and though renewed at a later period under a temporary emergency, a desire was expressed by the home government that the future manufacture of this article should be transferred to a station in the upper provinces. Distant N. from Calcutta 13 miles. Lat. 22° 36', long. 88° 23'.

ISKARDOH, the capital of Bultistan, is situate in an elevated plain, forming the bottom of a valley embosomed in stupendous ranges of mountains. The plain or valley of Iskardoh is nineteen miles long and seven broad. Its soil is formed of the detritus brought down and deposited by the Indus, and by its great tributary the Shighur river; the confluence being at the northern base of the rock on which the fort is built. The killah or rock, the site of the fort, is on the left bank of the Indus, here a deep and rapid torrent, above 150 yards wide. It is two miles long, and at the eastern end, where it is highest, rises nearly perpendicularly 800 feet above the river, from a buttress of sand, loose stones, and broken rocks. The killah has this mural face on every side, except the west, where it slopes steeply to the plain. Vigne considers that it could be rendered as strong as Gibraltar, to which, in appearance, it bears much resemblance. The castle of the former sovereigns of Bultistan stands on a small natural platform about 300 feet above the bed of the river, and is built of stone, with a framework of timber, and numerous strong defences against musketry. It is approached by a steep zigzag path, traversed by gateways and wooden defences, several of which are also disposed in such parts of the sides of the rock as require to be strengthened. There is a look-out house on a peak a little above the castle, and another on the summit above that. Everything in the interior of this stronghold is constructed for defence rather than comfort, the place "being a confusion of break-neck stairs, low doors, and dark passages." There is a splendid view of the valley and the river from the windows. The highest summit of the rock is a small level space of a triangular shape, and here are piled stones, ready to be

rolled down for the destruction of assailants. It is scarcely accessible, except on the western side; and there, at a height of about 200 feet, the acclivity is strongly fortified by walls and square towers. The formation of the rock is gneiss. There is no water in the upper part of the killah, but below the castle is a fine spring. The residence of the population attached to the seat of government of this fallen state is on the plain at the base of the rock, and can, according to Vigne, "hardly be called a town, being a straggling collection of houses." The number of these houses is estimated by Moorcroft at 150. Vigne displays the enthusiasm of an ardent admirer of the picturesque in describing the appearance of this singular and secluded place, as viewed by him on his first visit to it from the direction of Cashmere. "I, the first European who had ever beheld them (so I believe), gazed downwards from a height of 6,000 or 7,000 feet upon the sandy plains and green orchards of the valley of the Indus at Iskardo." "The rock, of the same name itself with the rajah's stronghold on the east end of it, was a very conspicuous object. The stream from the valley of Shighur, which joins the Indus, as it washes its foot, was visible from the spot where I stood, but the latter river was hidden by the height of its left bank, whilst on the north, and wherever the eye could rove, arose with surpassing grandeur a vast assemblage of the enormous summits that compose the Tibetan Himalaya." Respecting the origin of Iskardoh, Wade mentions an absurd tradition, which at least has the interest of novelty for those whose knowledge of the exploits of "the great Emathian conqueror" is derived from classical sources. It is, "that Alexander the Great came here on an expedition towards Khata, or Scythia (modern China), and that the Koteli Mustak, or the Mustak Mountains, which lie between Yargand and Khata, being at that time impassable on account of the depth and severity of the snow, the Macedonian halted on the present site of the capital until a road could be cleared for his passage; when, leaving every part of his superfluous baggage, together with the sick, old, and infirm of his troops, behind in a fort which he erected while there, he advanced against Khata. These relics of the army founded a city, which they named Iskandaria, or Alexandria, now pronounced Iskardoh." The tradition received no countenance from Ahmed Shah, the intelligent gylfo or sovereign of the country, to whom Moorcroft applied for information on this curious subject. Neither the gylfo, nor any other inquirer, had been able to find any trace of Greek colonists. Vigne, who at one time maintained the fabulous Greek origin of Iskardoh, in retraction states that "Iskardo, Skardo, or Kardo, as it is sometimes called, is obviously only an abbreviation of Sagara Do, the two floods or rivers." He then mentions, that the people of Ladakh called it Sagar Khood, and adds, "Sagara is

an old Sanskrit word for the ocean; and in this case Sagar Khed may signify the valley of the great flood or river: *de*, signifying two in Persian and its cognates, is added to the name Sagar, because the open space is formed by the junction of two streams, the Indus and the Sagar river." The plain or bottom of the valley of Iskardah is 6,300 feet above the sea, and the summit of the rock is 7,200 above the same level. Ahmed Shah, the late native sovereign, had ruled the country with a ———— and paternal regard for his people little known among Asiatic despots. He made some unsuccessful efforts to become a protected vassal of our Indian government, as he justly divided the power, rapacity, and cruelty of the Sikhs. His aims proved true, as, a short time since, Iskardah, notwithstanding its great natural strength, was seized by Ghulam Singh, the present ruler of Cashmere. Iskardah is in lat. 35° 12', long. 75° 35'.

ISLAMABAD, in Cashmere, a town situate on the north side of the Behat or Jhelum, here navigable, and running with a gentle current. The river is about eighty yards wide, and is crossed by a wooden bridge. Islamabad is built at the extremity of a long, low eminence, extending from the mountains eastward. At the foot of this eminence is a spacious reservoir, of a triangular shape, supplied by a copious spring of clear water, slightly sulphureous, and from which gas is continually evolved. This spring, called Anut Nag, is supposed to have been produced by Vishnu. The gas does not prevent the water from swarming with fish, which are considered sacred. There are about 300 shops of shawl-weavers at Islamabad, and a considerable quantity of chintzes, coarse cottons, and woollens is also manufactured here. Its name was originally Anut Nag, which, in the fifteenth century, was changed to that which it now bears. Lat. 33° 45', long. 75° 17'.

ISLAMABAD.—See CHITTAGOON.

ISLANGURH, or **NOHUR**.—A fort of Bhavpoor, on the route from Khanpoor to Jemshere, and 65 miles N. of the latter place. It is a recent acquisition of the khan of Bhavpoor, who made himself master of it at the expense of Jemshere. The fort is a very ancient structure of small bricks, and has an area of about eighty yards square, with very lofty ramparts, varying in height from thirty to fifty feet. At the north-east angle is a high gateway, covered by an outwork. There are numerous bastions on the north and east faces, but few on the others. There is no ditch, and the situation is unfavourable for defence, as it is commanded on every side by sand-hills eighty feet high, and less than a quarter of a mile distant. There are a few buildings in the interior, and some straggling houses outside. Water is supplied from two wells. Islangurh is in lat. 27° 50', long. 76° 52'.

ISLAMKOTE.—A fort and village of Sinde,

in the Eastern Desert, near the frontier of Cutch. The fort, 350 yards from the village, is seventy yards square, with walls of burnt brick thirty feet high, having a tower at each angle. There is but one gateway, which is on the eastern side. Lat. 24° 42', long. 70° 10'.

ISLAMNUGGUR, in the British district of Budaon, lieut.-gov. of the N.W. Provinces, a town, the chief place of the pergunnah of the same name, situate on the route from Suhuswan to Moradabad, 18 miles N. of the former, and in lat. 28° 19', long. 78° 47'.

ISLAMNUGUR, **ISLAMGARH**, or **ISLAMABAD**, in the territory of Bhopal, a town on the route from Seronj to the town of Bhopal, 55 miles S. of former, five N. of latter. It is situate at the confluence of the rivers Bes and Patra, the waters of which supply a ditch, extending from one to the other; so that the town, and a fort of masonry within, are by this means completely insulated. It was originally called Jugdiapur, and received its present name from Dost Muhammad Khan, the founder of the state of Bhopal, who took it by surprise from a Hindoo zemindar, its previous holder. Lat. 23° 20', long. 77° 25'.

ISLAMNUGUR.—A town in the British district of Mongheer, lieut.-gov. of Bengal, 32 miles S.S.W. of Mongheer. Lat. 25°, long. 85° 58'.

ISLAMPOOR.—A town in the British district of Dacca, lieut.-gov. of Bengal, 18 miles N. by E. of Dacca. Lat. 23° 59', long. 90° 21'.

ISLAMPOOR.—A town in the British territory of Sattara, presidency of Bombay, 48 miles S.S.E. of Sattara. Lat. 17° 1', long. 74° 20'.

ISRANA, in the British district of Paneeput, lieut.-gov. of the N.W. Provinces, a village on the route from Kurnoul to Rewaree, and 34 miles S.W. of the former. Water and supplies are abundant. Lat. 29° 16', long. 76° 55'.

ITAPALLI, in the territory of Cochin, presidency of Madras, a town situate on a stream flowing from the Western Ghats. Distance from the city of Cochin, N.E., six miles; Bangalore, S.W., 292. Lat. 10° 2', long. 76° 22'.

ITKHAPOOR.—A town in the British district of Ganjam, presidency of Madras, 32 miles S.W. of Ganjam. Lat. 19° 7', long. 84° 44'.

ITUHLEK.—See ETABOLI.

IVIKER, or **AIBIKA**, in the territory of Travancore, a town on the seacoast, at the mouth of a channel by which the sea communicates with the extensive estuary or shallow expanse called by the British the Backwater. The channel or river of Aibika is wide, but admits small craft only, having at its entrance a bar, with only five or six feet of water when highest. A large ship, taking in cargo here, must anchor in the open sea, in six or seven fathoms of water, a considerable distance from

the shore. There is here some export trade of timber, pepper, ginger, cardamums, lac, and turmeric. Distance from the city of Quilon, N.W., five miles. Lat. $8^{\circ} 57'$, long. $76^{\circ} 37'$.

IYLOOR.—A town in the British district of Madura, presidency of Madras, 44 miles N. of Madura. Lat. $10^{\circ} 33'$, long. $78^{\circ} 13'$.

J.

JAALPOOR, in the British district of Moradabad, lieut.-gov. of the N.W. Provinces, a village on the route from the town of Moradabad to Almora, and 13 miles N. of the former. Lat. $28^{\circ} 59'$, long. $78^{\circ} 54'$.

JABOOAH, in Malwa, a town, the chief place of a small territory of the same name, lies on the route from Mhow to Deesa, 92 miles W. of the former, 234 S. of the latter. It is inclosed by a wall of mud, with circular bastions of masonry, and is beautifully situated in a valley lying at the eastern base of a ridge of hills. On the north bank of a fine lake, south of the town, is the fortified palace of the petty rajah or chief. The boundaries of his small territory are as follow:—On the north, Banswarra; north-east, a portion of Holcar's territory; south-east, Amjherra; south, Alee Rajpore; and west, a portion of Scindia's territory, and Dohud. The area contains 1,348 square miles. The population consists principally of Bheels, of the more civilized classes, and is returned at 132,104. The annual revenue of the territory, in 1840, was stated at 144,536 rupees, or 14,453*l*. This is inclusive of the income derived from certain territories farmed from Holcar, which is said to amount to about 35,000 rupees (3,500*l*). It is believed that the Jabooah state derives no pecuniary benefit from this farm, but, on the contrary, sustains some loss; but the districts of which it consists lying intermingled with the territory of Jabooah, the administration of them is a desirable object, with a view to security and the maintenance of order. A small military force appears to be maintained by this state, but, in order that its contribution in aid of the Malwa Bheel corps might be less onerous, it was proposed to incorporate in that corps such of the troops as were disposed to enlist into it.

The rajahs of Jabooah claim descent from the Rhatore princes of Joudpore. Bhunjee, one of their ancestors, commanded 400 horse at Delhi, and his son, Kishen Doss, was placed in attendance on the prince Allah-oo-Deem, to whom, subsequently to his accession to the throne, he rendered considerable service by regaining possession of Dacca, which had been withheld by a rebellious governor. For this service, he was requited by liberal grants of territory. Jabooah was at that time subject to Suka Naiga, a Bheel ruler and notorious freebooter, who, in conjunction with a Rajpoot chief named Chunderbahn, ruler of Dholitah, had plundered and murdered the family and

followers of the governor of Guzerat. Kishen Doss was ordered to revenge this wrong, and set about the task in the only way probably in which he was likely to succeed. Disguising himself as a horsedealer, he proceeded to Jabooah with some remarkably fine specimens of the animal in which he professed to deal, and having won the favour and confidence of the Bheel chief, by allowing him to obtain the horses at very low prices, he lured him to a carousal, and taking advantage of the moment when excess had wrought its work, put him and his principal adherents to the sword. The zeal and success with which he had executed his instructions, procured him a grant of the dominions of the slaughtered chief, and henceforth Kishen Doss took a high place among the Hindoo dependants of the throne of Delhi. From this period, the history of the chiefs of Jabooah is not more interesting than that of the petty states around. Their territorial acquisitions were diminished by successive alienations in favour of younger branches of the family; and they shared in the common ruin which the Mahrattas spread over the face of that part of India, until the supremacy of British power and influence restored peace, and led to the introduction of a higher measure of civilization. The means taken by this state, as well as by others, to defend itself from Mahratta domination by the employment of foreign mercenary troops, increased its calamities, and extended their duration; for long after the Mahratta power had ceased to be formidable, the mercenaries, originally called in to assist it, remained a source of danger and alarm. For upwards of three years, down to 1836, the country was kept by them in a state of anarchy, which was finally suppressed only by the armed interference of the British government. Tranquillity was thereby restored, and by the deportation of the foreign troops, the country was freed from the main cause of disturbance. The rajah being a minor, the management of the country was, at the request of the rancee, temporarily assumed by the British, under whose administration it greatly improved. Distance of the town from Neemuch, S., 120 miles; from Oojein, S.W., 80; from Bombay, N.E., 285. Lat. $22^{\circ} 45'$, long. $74^{\circ} 36'$.

JADUN, in the Rajpoot state of Joudpore, a village on the route from Numsarabad to Deesa, and 97 miles S.W. of the former. It contains a dozen shops, and is supplied with water from a tank and thirteen wells. Lat. $25^{\circ} 50'$, long. $73^{\circ} 37'$.

JAEESEA.—A town in the native state of Bhotan, 91 miles N. by W. from Goalpara, and 128 miles E. by N. from Darjeeling. Lat. $27^{\circ} 25'$, long. $90^{\circ} 20'$.

JAFARGANJ, in the British district of Futtehpore, lieut.-gov. of the N.W. Provinces, a town situated one mile from the left bank of the Jumna, and 16 miles W. of the town of Futtehpore. Lat. $25^{\circ} 55'$, long. $80^{\circ} 34'$.

JAFFERABAD, in Hyderabad, or territory of the Nizam, a town near the north-west frontier, towards the British district of Ahmednuggur. It is situate on the river Gurkpoornah, a tributary of the Godavery, and here a large stream. The town is of considerable size, but there does not appear to have been any further information made public concerning it. Distance from Hydrabad, N.W., 260 miles; from Aurungabad, N.E., 45; from Bombay, N.E., 230. Lat. $20^{\circ} 14'$, long. $76^{\circ} 5'$.

JAFFERABAD, in the peninsula of Kattywar, province of Guzerat, a town and seaport in the district of Babriawar, situate on the estuary of the small stream Ranuy. It is "the best river on the coast, there being no bar, and the entrance easy. Although shoal, vessels will receive no damage by lying on the soft mud at low water, as they are well sheltered. The town is about a mile up the river, surrounded by a wall: next to Diu, it is the most considerable place for trade on the coast of Guzerat." It belongs to the Seedee or Abyssinian chief of Jinjira, on the coast of the southern Concan, and is governed by an officer holding under him. Jafferabad, with eleven villages annexed to it, possesses a population estimated at 5,680. Distance from Ahmedabad, S.W., 170 miles; Baroda, S.W., 150; Bombay, N.W., 165. Lat. $20^{\circ} 53'$, long. $71^{\circ} 21'$.

JAFURABAD, in the British district of Bijpore, lieutenant-gov. of the N.W. Provinces, a town situate on the route from Sireenuggur to Moradabad, and 70 miles N.W. of the latter. Elevation above the sea 1,041 feet. Lat. $29^{\circ} 41'$, long. $78^{\circ} 30'$.

JAGEPETTAH.—A town in Hyderabad, or dominions of the Nizam, three miles from the left bank of the Manjira river, and 44 miles N.W. from Hyderabad. Lat. $17^{\circ} 50'$, long. $78^{\circ} 6'$.

JAGGEE.—A town in the British district of Nowgong, province of Assam, 33 miles E. of Gowhatti. Lat. $26^{\circ} 10'$, long. $92^{\circ} 17'$.

JAGHESUR, in the British district of Kumaon, lieutenant-gov. of the N.W. Provinces, a village situate on a nullah or rivulet of the same name, in the Sub-Himalaya, or mountain system south of the great range, 20 miles N.E. of Almora cantonment. It has a Hindoo temple, and is supplied with water from a baoli or large well. Close to the temple is a confined encamping-ground. Lat. $29^{\circ} 39'$, long. $79^{\circ} 53'$.

JAGNOR, in the British district of Agra, lieutenant-gov. of the N.W. Provinces, a small town near the southern frontier, towards Dholpoor, is situate in the pergunnah or subdivision of Sarbendi, among the sandstone hills extending southwards from Futtehpore Sikri. It is 35 miles S.W. from the city of Agra. Lat. $26^{\circ} 52'$, long. $77^{\circ} 40'$.

JAGUN.—A place in Sinde, 10 miles N.W. of Bhikarpoor. It consists of a fort and village, with some lofty square fortified buildings

outside. It has a small, but rather well-furnished bazar. Supplies may be procured in moderate quantities, and forage, both for camels and horses, is plentiful. Jagun is eleven miles and a half from Janehdurra, from which place the road lies over a level country with much wood. There is an encamping-ground on the south-east of the village. Lat. $28^{\circ} 8'$, long. $68^{\circ} 33'$.

JAHANPOOR, in the British district of Agra, a village on the route from the city of Agra to Jeypoor, and 24 miles W. of the former. Lat. $27^{\circ} 5'$, long. $77^{\circ} 42'$.

JAHAUTOO.—A town in the British district of Chota Nagpoor, lieutenant-gov. of Bengal, 182 miles W. by N. of Calcutta. Lat. $23^{\circ} 7'$, long. $85^{\circ} 40'$.

JAHJUR, in the British district of Agra, lieutenant-gov. of the N.W. Provinces, a village on the southern frontier, towards Dholpoor, and 17 miles S. of the city of Agra. It is situate on the north or left bank of the Bangunga, in this part of its course called the Ootunghun, and which in the dry season is here only a small rill of clear water. In the rainy season, however, the stream becomes considerable, running in a sandy bed 130 yards wide, with steep banks cut into deep ravines. Lat. $26^{\circ} 55'$, long. $77^{\circ} 59'$.

JAHNUVI.—A feeder of the Ganges, in the upper part of the course of the latter, where it bears the name of the Bhageerettee. The Jahnvi has been supposed to derive its origin from the north of the culminating range of the Himalayas, within the limits of Chinese authority; but this conjecture is without foundation, it being now ascertained that the remotest source of this river is situate in British territory, on the southern base of the before-mentioned range. The Jahnvi rises in Gurwial, in lat. $30^{\circ} 55'$, long. $79^{\circ} 14'$, and, holding first a northerly, then a westerly course, joins the Bhageerettee near the Sanga of Bhairogathi. At this point the Jahnvi is from eighty to 100 feet wide, and superior in volume to the Bhageerettee, though the latter was long considered the origin of the holy and celebrated Ganges. The Jahnvi flowing for the distance of thirty miles from its source, to the point of confluence, is evidently the most distantly derived of all the branches of the Ganges; for if the course of the latter be measured upwards from Deoprag to the source of the Jahnvi, its length will be found to exceed the distance from the same point to the source of the Doulee. It must, therefore, be admitted that the Jahnvi is the real origin of that great river, notwithstanding the rival claims of the Doulee.

JAINKEEPOOR, in the British district of Allahabad, lieutenant-gov. of the N.W. Provinces, a village on the route by the Rajpoor ferry from the cantonment of Allahabad to Banda, and 21 miles W. of the former. Lat. $25^{\circ} 24'$, long. $81^{\circ} 38'$.

JAIPPOOR.—See **JETPORE**.

JAIRULA, in the Reechna Doab division of the Punjab, a town situated 12 miles N. of the Ravee river, and 139 miles S.W. by W. of the town of Lahore. Lat. $30^{\circ} 40'$, long. $72^{\circ} 10'$.

JAITANU, in the Sinde Sagur Doab division of the Punjab, a town situated on the right bank of the Jhelum, 100 miles N.W. of the town of Lahore. Lat. $32^{\circ} 40'$, long. $72^{\circ} 59'$.

JAITPOOR.—A town in the provinces of Guzerat, or the dominions of the Guicowar, 40 miles S. by W. from Rajkote, and 63 miles E. by N. from Poorbunder. Lat. $21^{\circ} 45'$, long. $70^{\circ} 44'$.

JAJARCOTE.—A town in the native state of Nepal, 148 miles N. by E. from Lucknow, and 105 miles E. by N. from Pilleebheet. Lat. $28^{\circ} 56'$, long. $81^{\circ} 33'$.

JAJMOW, in the British district of Cawnpore, lieutenant-gov. of the N.W. Provinces, a town in the pergunnah of the same name, is situated on the right bank of the Ganges, six miles S.E. of the cantonment of Cawnpore by land, and five by water. It has a bazar, but does not seem of any great importance, not being mentioned by Lord Valentia, Skinner, or Lumaden, in their voyages down the river. In the time of Baber, it was perhaps more considerable: that sovereign, in his Memoirs, mentions that in one of his campaigns against the Afghans, they attempted to make a stand here, but were routed by his son Humayun. It is the Jajmow of Rennell's Index. Distant N.W. from Calcutta 620 miles by land, and by water 949, or, going by the Sunderbund passage, 1,125. Lat. $26^{\circ} 26'$, long. $80^{\circ} 28'$.

JAJOO.—A village in the jaghire of Jujhur, lieutenant-gov. of the N.W. Provinces. Lat. $28^{\circ} 29'$, long. $76^{\circ} 14'$.

JAKO, in Bussahir, a village on the southern declivity of the outer or most southern Himalaya, and the last inhabited place on that side of the range in the route northwards by the Gunas Pass. It is of no great size, and the inhabitants, who bear the marks of poverty, are supported principally by the carrying-business across the mountains. Elevation above the sea 9,188 feet. Lat. $31^{\circ} 15'$, long. $78^{\circ} 9'$.

JAKO, in Keonthul, a high peak of the Simla range, and overtopping on the east the Simla station. The summit is of clay-slate. It is remarkably bare of trees to the south, though its declivity on the north side is well clothed with oaks, pine-trees, and rhododendrons. It was one of the stations in the great trigonometrical survey of the Himalaya. Elevation above the sea 8,120 feet. Lat. $31^{\circ} 5'$, long. $77^{\circ} 15'$.

JAKODA, in the British district of Rhotuk, lieutenant-gov. of the N.W. Provinces, a village on the route from Delhi to Hansee, and 22 miles

N.W. of the former place. Lat. $28^{\circ} 48'$, long. $76^{\circ} 55'$.

JALA, in the British district of Kumaon, lieutenant-gov. of the N.W. Provinces, a town on the route from Almora to Sircenuggur, 28 miles N.W. of the former. Lat. $29^{\circ} 52'$, long. $79^{\circ} 21'$.

JALALABAD, in the British district of Shahjehanpore, lieutenant-gov. of the N.W. Provinces, a small town on the route from Bareilly to the cantonment of Futtchegurh, and 52 miles S.E. of the former. It has a bazar and a ruined fortress "of inconsiderable extent but surrounded by a lofty mud parapet, formidable bastions, and a deep fosse." It was probably built by Hafiz Rahmat Khan, the chief who commanded the Rohilla Pathans at the battle of Tessonah, where he fell. Lat. $27^{\circ} 48'$, long. $79^{\circ} 43'$.

JALALUDDINNAGAR, in the district of Aldeman, territory of Oude, a small town on the right bank of the Ghaghra, 10 miles S.E. of Fyzabad, 78 E. of Lucknow. Butler estimates the population at 1,500, including 500 Mussulmans. Lat. $26^{\circ} 44'$, long. $82^{\circ} 12'$.

JALEEA.—A town in the British district of Belgaum, presidency of Bombay, 84 miles E. of Belgaum. Lat. $15^{\circ} 50'$, long. $75^{\circ} 50'$.

JALHOTRER, in the territory of Oude, a small town on the route from Cawnpore to Lucknow, 25 miles N.E. of the former, 26 S.W. of the latter. It is situated close to a fine circular lake a mile in diameter. Lat. $26^{\circ} 42'$, long. $80^{\circ} 42'$.

JALHPOOR, in the British district of Benares, lieutenant-gov. of the N.W. Provinces, a town on the route from Benares to Ghazee-poor, nine miles N.E. of the former. Lat. $25^{\circ} 21'$, long. $83^{\circ} 10'$.

JALHU, or **JALHUPUR**, the principal place of the pergunnah of Jalhu, a town a mile N.W. of the left bank of the Ganges, and 12 miles N.E. of Benares. Lat. $25^{\circ} 22'$, long. $83^{\circ} 10'$.

JALIHAL.—A town in one of the recently sequestered districts of Hyderabad, or dominions of the Nizam, 133 miles S.W. by W. of Hyderabad. Lat. $16^{\circ} 22'$, long. $76^{\circ} 50'$.

JALIAPULLUNG.—A village in Arracan, situated on the south bank of the river Raveezoo, and forming the termination of the first division of the great route from Chittagong to Akyab, from the former of which places it is distant about 105 miles. The country in the vicinity is well cultivated and populous. Lat. $21^{\circ} 17'$, long. $92^{\circ} 10'$.

JALLOR.—A town in the Rajpoot state of Jodhpoor, on the left bank of the Soekree river, and 71 miles S.W. by S. from Jodhpoor. Lat. $25^{\circ} 23'$, long. $72^{\circ} 40'$.

JALNA, or **GALNA**, in the British district of Candesh, presidency of Bombay, a small town with a fort, on an isolated hill, not high, but steep and rocky. The summit is fortified all round, and on the side towards

the town, where it is least steep, has in some parts two, in others three walls of good masonry. In October, 1804, it belonged to Holkar, and was invested by a British force under Wallace, who, having breached the defences in two places, prepared for an assault, the necessity for which, however, was superseded by the garrison, amounting to 700 men, evacuating the place. On the subsequent pacification, it was restored to Holkar. It was ceded in 1818, by Mulhar Rao Holkar, to the British government, by the sixth article of the treaty of Mundeesor, and surrendered to a detachment sent by Sir Thomas Hielop to take possession. Distance direct from Mow, S.W., 150 miles; from Bombay, N.E., 165. Lat. $20^{\circ} 46'$, long. $74^{\circ} 30'$.

JALOUN.—A district of Bundelcund, and now a British possession. It is bounded on the west and north-west by the territories of Duttes, Sumpter, and of Gwalior; on the north by Gwalior and the British district of Etawah; on the north-east by Cawnpore; on the south-east by Hummerpore; and on the south by Jhansee and Tehree. It lies between lat. $25^{\circ} 32'$ and $26^{\circ} 26'$, long. $78^{\circ} 45'$ and $79^{\circ} 55'$; its greatest length from north to south is, about seventy miles, and its breadth from east to west sixty miles. It was estimated in 1832 to have an area of 1,480 square miles, and to comprise 518 villages. Since that period, the limits of the district have been extended, by the addition of some pergunnahs from the adjacent state of Jhansee, ceded to the British government, and also of a confiscated jaghire called Chirgong. According to more recent returns, the area of the district thus increased is 1,873 square miles, supporting a population of 246,297 persons.

The district of Jaloun came into the possession of the Peishwa early in the eighteenth century, and the management of it was committed to one of his servants. Under the series of arrangements effected with the Peishwa in 1802 and 1803, the sovereign rights of that prince over Jaloun were transferred to the East-India Company. The administrator, Nana Govind Rao, of Calpee, subsequently took up arms against his new lords; but the dispute was brought to an immediate conclusion. In 1817, the British government, by a new engagement, constituted the Nana "hereditary ruler of the lands then in his actual possession." In 1832 the principality passed to a child only six years of age, who was placed under the guardianship of the widow of the former chief. The regent, however, who was herself but a child, being at the time not more than thirteen or fourteen years of age, proved quite unequal to the duty of controlling the refractory spirits in the district. A strong party was formed adverse to her authority; the country became disorganized, the government was involved in debt, and portion after portion of the territory mortgaged to talookars, until at length the regent

and her minister, finding the credit of the government at an end, applied to the British agent for his guarantee of a further loan, declaring their inability to carry on the government without it, and exhibiting a statement of revenues and expenses, which showed an annual deficit of two and a half lacs of rupees. In these circumstances, it was deemed necessary that the British government should assume the temporary management of the country, for the purpose of reducing the expenditure, paying off the debt, resuming the mortgaged territory, and restoring order. This step was accordingly taken in 1838. The organization of a local military force being indispensable, to supersede the undisciplined and disorderly troops previously retained, the formation of a legion was authorized, composed of cavalry, infantry, and a gun establishment, with two European officers, as commanding officer and adjutant. Under the British administration, many beneficial changes were effected; cultivation was extended, and the country manifested unequivocal proofs of being in a state of gradual improvement. The infant chief did not live to the period when the propriety of committing the administration of the country to his charge could become a subject of discussion. He died during his minority, and no one surviving of the family of Nana Govind Rao entitled to claim the succession under the engagement by which that chief was constituted hereditary ruler of the district, it lapsed, as a matter of course, to the East-India Company as paramount lord. Since the lapse, the indications of progressive improvement have continued to be satisfactory. A revenue settlement for a term of years was made in 1849.

JALOUN.—A town of Bundelcund, situate 15 miles S.W. of the right bank of the Jumna. It is the chief place of the territory bearing the same name, and is distant W. from Calpee 28 miles, S.E. from Agra 110, N.W. from Calcutta 675. Lat. $26^{\circ} 9'$, long. $79^{\circ} 24'$.

JAM.—A town in the territory of Hyderabad, or dominions of the Nizam, situate 62 miles S.W. by S. of Ellichpoor. Lat. $20^{\circ} 24'$, long. $77^{\circ} 7'$.

JAMALGARHI, in the Daman division of the Punjab, a town situated 40 miles N.N.E. of Peshawur, and 42 miles N.N.W. of the town of Attock. Lat. $34^{\circ} 29'$, long. $72^{\circ} 1'$.

JAMALLABAD, in the British district of South Canara, presidency of Madras, a town founded by Tippoo on the site of a ruined city called Narasingha Angady. Tippoo at the same time built a fort, on a huge rock, westward of the town, and wholly inaccessible except by one narrow way; so that it is totally impregnable by assault. It is, however, exposed to the effects of bombardment, by which it was attacked by a British force in 1799, after the fall of Seringapatam. The soldiers of the garrison made their escape; the commandant poisoned himself, and the

other officers of the garrison, who submitted to be taken, were hanged. It was shortly after surprised by a freebooter, but retaken, after a blockade of three months, and permanently occupied by a British garrison. Distant from Mangalore, N.E., 34 miles. Lat. $13^{\circ} 2'$, long. $75^{\circ} 22'$.

JAMBO, in the district of Salon, territory of Oude, a town 26 miles W. of Sultanpoor cantonment, 50 S.E. of Lucknow. It has a fort, in which resides a Hindu chief of the Khatri (military) caste, who, according to Butler, is a descendant of the ancient Hindoo sovereigns of Oude, and who maintains 400 armed followers. According to the same authority, the population is 7,000, of whom half are Mussulmans. Lat. $26^{\circ} 21'$, long. $81^{\circ} 44'$.

JAMBOOLPATA.—A town in the British district of Tannah, presidency of Bombay, 37 miles S.E. of Bombay. Lat. $18^{\circ} 40'$, long. $73^{\circ} 22'$.

JAMBOTEE.—A town in the British district of Belgaum, presidency of Bombay, 18 miles S.W. of Belgaum. Lat. $15^{\circ} 40'$, long. $74^{\circ} 22'$.

JAMERAPAL.—A town in the British district of Midnapoor, lieut.-gov. of Bengal, 85 miles S.W. by W. of Calcutta. Lat. $21^{\circ} 59'$, long. $87^{\circ} 16'$.

JAMGAUM.—A town in the British district of Ahmednuggur, presidency of Bombay, 108 miles E. of Bombay. Lat. $19^{\circ} 4'$, long. $74^{\circ} 31'$.

JAMGONG.—A town in the British province of Nagpoor, late the dominions of the rajah of Berar, situate 16 miles from the left bank of the Mahanuddy river, and 184 miles E. from Nagpoor. Lat. $21^{\circ} 7'$, long. $81^{\circ} 42'$.

JAMGURH.—A town of Malwa, in the native state of Bhopal, 59 miles E. from Bhopal, and 60 miles S.W. by S. from Saugur. Lat. $23^{\circ} 8'$, long. $78^{\circ} 18'$.

JAMIDPOOR, or **JUMDOA**, in the British district of Allahabad, lieut.-gov. of the N.W. Provinces, a village on the route, by Rajapoor ferry, from the cantonment of Allahabad to Banda, and 34 miles W. of the latter. Lat. $25^{\circ} 27'$, long. $81^{\circ} 28'$.

JAMJOONGGA.—A town in the native state of Bhotan, 66 miles N.N.W. from Goalpara, and 122 miles E. from Darjeeling. Lat. $27^{\circ} 1'$, long. $90^{\circ} 16'$.

JAMKA.—A town in the British district of Kurrachee, province of Scinde, presidency of Bombay, 21 miles W. by S. of Tatta. Lat. $24^{\circ} 40'$, long. $67^{\circ} 40'$.

JAMKHER.—A town in the British district of Ahmednuggur, presidency of Bombay, 48 miles S.E. of Ahmednuggur. Lat. $18^{\circ} 44'$, long. $75^{\circ} 22'$.

JAMNER.—A town in the British district of Candeish, presidency of Bombay, containing a population of 4,000 inhabitants. Distant

83 miles E. by N. of Malligama. Lat. $20^{\circ} 48'$, long. $75^{\circ} 44'$.

JAMNI.—A river rising in the British territory of Saugor and Nerbudda, and probably about lat. $24^{\circ} 8'$, long. $78^{\circ} 42'$. After a course north of a few miles, it passes the northern frontier, into the Shahgurh district of Bundelcund, through which it flows north twenty miles, and crosses into the Gwalior territory, which it traverses for about fifteen miles, and subsequently, still flowing north, forms the western boundary between Bundelcund and the territory of Gwalior, to its junction with the Betwa, on the right side; in lat. $25^{\circ} 15'$, long. $78^{\circ} 40'$; its total length of course being about ninety miles.

JAMOO, in Sirmor, a limestone peak about four miles from the left bank of the Giri. It was a station of the series of small triangles in the great trigonometrical survey of the Himalayas. Elevation above the sea 6,852 feet. Lat. $30^{\circ} 37'$, long. $77^{\circ} 34'$.

JAMOO, a considerable town in the north of the Punjab, and among the mountains forming the southern range of the Himalaya, is situate on a small river, which, rising about forty miles to the north, takes its course below the town for about twenty miles, in a south-westerly direction, and falls into the Chenab. The town and palace are built on the right or western bank of the river; on the east is the fort, elevated about 150 feet above the stream, which is here fordable when lowest. The place, with the lofty and whitened palace and fort, has a striking and pleasing appearance when viewed from without. The bazar is large, well built, and well supplied; the streets are extensive, and the population considerable, amounting, according to Vigne, to about 8,000. The palace is a spacious and handsome building. The fort, though built with great cost and labour, is untenable against a regular attack, being commanded by an adjacent height of easy access. There is an extensive and beautiful pleasure-ground, belonging to the rajah. About the town are numerous ruins of great size, the evidence of its prosperity under its hereditary rajahs, before the expulsion of their family by the Sikhs. It is still held by Gholab Singh as part of his dominions, although the position of this prince has been greatly altered by the transfer to him of Cashmere and the adjacent hill country, a consequence of the success of the British arms in the Punjab in 1845. Jamoo is in lat. $32^{\circ} 44'$, long. $74^{\circ} 54'$.

JANEEDERA, in Sinde, a village on the route from Shikarpoor to Bagh, and 18 miles N.W. of the former town. It is situate near the border of the Pat, or desert of Shikarpoor, yet the immediate vicinity is fertile, and was well cultivated before it suffered from the devastations of the marauding Belooches, who some years ago laid the village in ruins. There is a fort of considerable size, containing a good well. There are three other wells outside the fort. Lat. $28^{\circ} 16'$, long. $65^{\circ} 23'$.

JANGI, in Bussahir, a village in the district of Koonawur, is situate on the right bank of the Sutlej, and at the eastern base of a high mountain, the cliffs of which being soft and fissile, are shattered by the expansive force of frost; from which cause vast masses continually tumble down, forming a sloping surface, composed of sand, fragments of mica-slate, and spar, with an admixture of earth, and capable of cultivation wherever a stream from the snows above can be directed over it. By such management those accumulations of apparent rubbish become soon covered with crops of grain and fine vineyards. Jangi is at the elevation of 8,905 feet above the sea. Lat. $31^{\circ} 36'$, long. $78^{\circ} 29'$.

JANJPAT.—A town in the British district of Tirhoot, lieutenant-gov. of Bengal, 105 miles N.E. of Dinapoor. Lat. $26^{\circ} 27'$, long. $86^{\circ} 31'$.

JANSUTH, in the British district of Muzaffurnuggur, lieutenant-gov. of the N.W. Provinces, a town on the route from Hurdwar to Meerut, 28 miles N. by E. of the latter. Its population is returned at 5,559. Lat. $29^{\circ} 18'$, long. $77^{\circ} 55'$.

JAOLI, in the British district of Moznfur-nuggur, lieutenant-gov. of the N.W. Provinces, a town, the principal place of the pergunnah of the same name, is situate in lat. $29^{\circ} 25'$, long. $77^{\circ} 55'$.

JAOLI, in the Rajpoot territory of Alwur, a village on the route from the town of Alwur to Muttra, and 51 miles W. of the latter. Lat. $27^{\circ} 33'$, long. $76^{\circ} 56'$.

JARAILLAH.—A town in the Rajpoot state of Jessulmer, 29 miles S.W. from Jessulmore, and 156 miles W. by N. from Jodhpoor. Lat. $26^{\circ} 37'$, long. $70^{\circ} 40'$.

JARESANG.—A town in the native state of Nepal, situate on the left bank of the Arun river, and 110 miles S.E. by E. from Khatmandhoo. Lat. $27^{\circ} 9'$, long. $86^{\circ} 57'$.

JAR KHAAS, in the British district of Futtelipoor, lieutenant-gov. of the N.W. Provinces, a town on the route from Futtelipoor to Hummeerpoor, 20 miles W. of the former. Lat. $25^{\circ} 57'$, long. $80^{\circ} 34'$.

JARPURRAH.—A town in the British district of Cuttack, lieutenant-gov. of Bengal, 14 miles S.E. of Cuttack. Lat. $20^{\circ} 20'$, long. $86^{\circ} 4'$.

JARRAH.—A town in the British province of Nagpore, 140 miles S.E. from Nagpore, and 90 miles E. from Chanda. Lat. $19^{\circ} 50'$, long. $80^{\circ} 45'$.

JASROTA.—A small raj and town in the north-east of the Punjab, among the mountains of the southern range of the Himalaya, within the dominions of Gholab Singh. The residence of the rajah (the last occupant of which fell a victim to the rapacity of Runjeet Singh) is a stately mansion, with four towers. The town has a bazar of small size and inconsiderable business. Lat. $32^{\circ} 29'$, long. $75^{\circ} 27'$.

JATEEA DEEBEE, in one of the hill districts of the rajah of Paternal, a small temple of the Hindoo goddess Kali, on a ridge between Subathoo and Simla, and five miles S.W. of the latter post. Elevation above the sea 5,031 feet. Lat. $31^{\circ} 6'$, long. $77^{\circ} 9'$.

JATEEARA, or **JULEEARA**, in the Rajpoot state of Joudpore, a village on the route from the town of Joudpore to that of Ajmere, and 35 miles E. of the former. It contains 100 houses, three shops, and nine wells. Lat. $26^{\circ} 25'$, long. $73^{\circ} 44'$.

JATWALA, in the Rajpoot state of Joudpore, a village on the route from the town of Joudpore to that of Ajmere, and 40 miles N.E. of the former. Lat. $26^{\circ} 25'$, long. $73^{\circ} 40'$.

JAULDOE, in the British district of Pachete, lieutenant-gov. of Bengal, a small town on the route from Rurdwan to Dorunda, in Chota Nagpore, 125 miles W. of former, 45 E. of latter. Lat. $23^{\circ} 22'$, long. 86° .

JAULNA, in the territory of the Nizam, a British cantonment on the route from the city of Hyderabad to Aurungabad. It is located in a very dreary, barren country, having a surface rendered uneven and rugged by numerous ravines and hills of trap or other volcanic formation, overlaid in many places with laterite. The immediate site of the cantonment is a gently-sloping declivity, in front of which a small range of hills, from one to two miles distant, form a sort of amphitheatre. The lines extend from south-east to north-west, the cavalry lines being at the south-eastern extremity, those of the infantry in the middle, and those of the horse and foot artillery at the north-west. Behind those lines are the officers' quarters, well built, and situate within spacious compounds or inclosures, having good gardens, outhouses, and stabling attached to them. The cantonment is capable of affording accommodation for one troop of horse-artillery, one regiment of native cavalry, and three regiments of native infantry; having barracks, hospitals, and storerooms. They were built in 1827. A place of worship has also been erected for the Roman Catholic soldiers at this station. The climate is admirably adapted for the purposes of horticulture; in the cool season, abundance of excellent European vegetables are raised: pease, beans, cabbages, carrots, parsnips, turnips, celery, cauliflowers, and potatoes; besides many common in India. Figs, grapes, peaches, and strawberries, are also produced; the latter of extraordinary size, but somewhat deficient in flavour. South-west of the cantonment two miles, and on the left bank of the small river Kuadulka, is the town of Khaderabad. It is surrounded by a high stone wall, and has about 7,000 inhabitants. On the opposite bank is the old town of Janina, formerly large and flourishing, having enjoyed an extensive trade in grain and silks. It yet possesses to some extent a manufacture of silks for native use. The place, however, is much decayed, though having a population estimated at 10,000, of

whom about a fifth are Mussulmans. Many of the houses are substantially built of stone, and a fort, well planned and strongly constructed, indicates the former importance of the place. Distance from Secunderabad and Hyderabad, N.W., 240 miles; Nagpore, S.W., 235; Aurungabad, E., 38; Bombay, N.E., 210. Lat. $19^{\circ} 50'$, long. $75^{\circ} 56'$.

JAUM, in territory of Indore, or possessions of Holkar's family, a village with a fort on the route from Mhow to Aseergurh, 14 miles S. of the former, 100 N.W. of the latter. It is situate on the crest of a pass through a ravine of the Vindhya range, descending from Malwa to the valley of the Nerbudda. The ghat or pass is a mile and a half in length, and is so steep, narrow, and zigzag, that, according to Malcolm, it is impassable for wheeled carriages of any sort; but Garden states that six-pounders have been lowered down it. Notwithstanding its great difficulty, it is much frequented by foot-travellers, being the most direct route from Malwa southwards. Elevation above the sea 2,328 feet. Lat. $22^{\circ} 23'$, long. $75^{\circ} 49'$.

JAUMGONG.—A town in the petty native territory of Peint, presidency of Bombay, 100 miles N. by E. from Bombay, and 97 miles S. by E. from Broach. Lat. $20^{\circ} 20'$, long. $73^{\circ} 15'$.

JAUNJMEER.—A town in the peninsula of Kattywar, province of Guzerat, situate on the west coast of the Gulf of Cambay. Lat. $21^{\circ} 10'$, long. $72^{\circ} 4'$.

JAUNPORE.—See JOUNPORE.

JAUNSAR.—A British hill district officially connected with the Dehra Doon, and which, stretching northward from it, is as it were indented between Gurwhal and Sirmor. It is bounded on the west by Sirmor, from which it is separated by the river Tons; on the north and east by Gurwhal, from which it is for a considerable distance separated by the river Jumna, which river also, on the south, divides it from the Dehra Doon. Jaunsar is about thirty-three miles long in a direction from north to south; its breadth from east to west is twenty-three; and it has an area of 579 square miles. It lies between lat. $30^{\circ} 30'$ and $30^{\circ} 57'$, long. $77^{\circ} 46'$ and $78^{\circ} 9'$. The surface throughout is rugged and mountainous, rising to the middle from the Tons on the west, and the Jumna on the east, and discharging from the elevated and central part numerous small streams into those rivers. Some of the summits are lofty; as Bairat, having an elevation of 7,559 feet; Bhadraraj, of 6,023; and Baila, 6,518. The elevation diminishes generally, though irregularly, to the southern frontier, where, at Haripur, at the confluence of the Tons and Jumna, it is reduced to 1,686 feet above the sea. The number of townships within this district is 414. The population, according to official return, amounts to 24,684 persons. Jaunsar was formerly part of the raj of Sirmor, but on the expulsion of the Ghoorkas in 1815, it became subject to the British government.

JAUT, in the British district of Goorgaon, lieut.-gov. of the N.W. Provinces, a village on the route from Delhi to Rewaree, and 48 miles S.W. of the former. It is situate near the left bank of the Sabi, the bed of which is dry from November to July, but for the rest of the year is the course of a torrent discharging water into the jhil or lake of Najafgarh, or of Furrucknuggur, whence it passes ultimately into the Jumna at Delhi. Lat. $28^{\circ} 15'$, long. $76^{\circ} 44'$.

JAVANAGOONDENHULLY.—A town in the Mysore, on the left bank of the Hurry river, and 99 miles N. from Seringapatam. Lat. $13^{\circ} 51'$, long. $76^{\circ} 48'$.

JAWUD, in the territory of Gwalior, or possessions of Scindia's family, a town, the principal place of a pergunnah containing 133 villages. It is surrounded by a stone wall, and has good gateways, but the defences are of no strength. In 1818, it was held by a refractory retainer of Doulat Rao Scindia, and being stormed by a British detachment, was made over to that prince. Population 30,000. Elevation above the sea 1,400 feet. Lat. $24^{\circ} 35'$, long. $74^{\circ} 55'$.

JAYBHOM.—A town of North-eastern India, in the British district of Goalpara, presidency of Bengal, 26 miles W. by S. of Goalpara. Lat. $26^{\circ} 4'$, long. $90^{\circ} 14'$.

JAYES, in the district of Salon, territory of Oude, a decaying town, 35 miles W. of Sultanpore, 55 S.E. of Lucknow. It is situate on the left bank of the Naia Nuddy or stream, a tributary to the river Sai, and contains many large brick-built houses, constructed by Mussulmans of former times. According to Butler, the population is 9,000, of whom three-fourths are Mussulmans. Lat. $26^{\circ} 14'$, long. $81^{\circ} 37'$.

JEEAGAON, in the territory of Gwalior, or possessions of Scindia's family, a town on the route from Hoshungabad to Mow, 54 miles W. of former, 90 E. of latter. It is situate on the small river Jamnair, a tributary of the Nerbudda. Supplies are plentiful. Population about 1,800. Lat. $22^{\circ} 37'$, long. $76^{\circ} 59'$.

JEEKA MOUNTAIN, in the island of Ramree, off the coast of Arracan. Its elevation is about 3,000 feet above the sea, and it rises in a very abrupt manner from the range with which it is connected. With the exception of the summit, it is covered with a dense forest. A brown ferruginous sandstone, regularly stratified, with an inclination to the south-west, is the only rock visible on the surface.

JEELAIKE.—A town in the native state of Bhawalpore, on the left bank of the Sutlej river, and 103 miles N.E. by E. from Bhawalpore. Lat. $30^{\circ} 6'$, long. $73^{\circ} 15'$.

JEELOO.—A town in Tourwutte, a dependency of the Rajpoot state of Jeypore, situate 63 miles N. from Jeypore, and 100 miles S.W. by W. from Delhi. Lat. $27^{\circ} 50'$, long. 76° .

JEENJUNEE.—A town in the native state of Gwalior, or the territory of Sindhia's family, situate on the right bank of the Kooree river, and 24 miles N. by W. from Gwalior. Lat. 26° 33', long. 78° 10'.

JEETEE. in the British district of Mynpooree, lieut.-gov. of the N.W. Provinces, a village on the route from the cantonment of Allypore to that of Mynpooree, and 10 miles N.W. of the latter. There is water from wells. Lat. 27° 18', long. 79°.

JEERA.—A town in Guzerat, or the dominions of the Guicowar, 71 miles S. by E. from Rajkote, and 132 miles W. by S. from Broach. Lat. 21° 16', long. 71° 4'.

JEERA.—A town of Baghelcund, in the native state of Rewah, 129 miles S.W. from Sasseram, and 101 miles W. from Palamow. Lat. 23° 50', long. 82° 27'.

JEEREE.—A river rising in lat. 25° 8', long. 93° 28', and, flowing in a south-west direction for forty miles, during which it forms the boundary between Southern Cachar and Munnepoor, falls into the Barak river, in lat. 24° 43', long. 93° 12'.

JEERUN. in the territory of Gwalior, or possessions of Scindia's family, a town on the route from Neemuch to Baroda, 12 miles S. of the former, 227 N.E. of the latter. It has a bazar, and supplies and water are abundant. The surrounding district, which is of considerable size, bears its name. Elevation above the sea 1,590 feet. Lat. 24° 18', long. 74° 58'.

JEETEE.—A town in the British district of Ahmednuggur, presidency of Bombay, 54 miles S. by E. of Ahmednuggur. Lat. 18° 20', long. 74° 56'.

JEHANABAD. in the British district of Shahabad, lieut.-gov. of Bengal, a town on the route from Hazareebagh to Benares, 118 miles N.W. of former, 50 S.E. of latter. It has a bazar, and supplies and water are abundant. According to Buchanan, there are 200 houses; so that, if the usual average be assumed, the population appears to be about 1,000. Lat. 25° 3', long. 83° 52'.

JEHANABAD. in the British district of Bareilly, lieut.-gov. of the N.W. Provinces, a town on the route from Shahjehanpore to Almorah, 52 miles N. of the former. Lat. 28° 38', long. 79° 47'.

JEHANABAD. in the British district of Hooghly, lieut.-gov. of Bengal, a town on the route from Calcutta to Bankoorah. Distance 45 miles N.W. of the former, 56 W. of the latter. Lat. 22° 52', long. 87° 50'.

JEHANGEERPOOR.—A town in the native state of Gwalior, or the territory of Sindhia's family, situate on the right bank of the river Chumbul, and 16 miles W. from Oojein. Lat. 23° 11', long. 75° 32'.

JEHANGEERPOOR.—A town of Malwa, in the native state of Dhar, 61 miles S. by W.

from Oojein, and 22 miles S.E. from Dhar. Lat. 22° 19', long. 75° 33'.

JEHANGEERUH.—A town in the British district of Bhagulpore, lieut.-gov. of Bengal, 16 miles W. of Bhagulpore. Lat. 25° 11', long. 86° 44'.

JEHAUJPOOR.—A town in the British district of Cuttack, lieut.-gov. of Bengal, 42 miles N.E. of Cuttack. Lat. 20° 51', long. 86° 24'.

JEHWOR.—A town in the British district of Ahmednuggur, presidency of Bombay, nine miles N.E. of Ahmednuggur. Lat. 19° 11', long. 74° 50'.

JEITPORE. in Bundelcund, a town, the principal place of a small raj or principality of the same name. It lies on the route from Calpee to Jubbulpore, 72 miles S. of the former, 197 N. of the latter, and is situate on the western side of an extensive jhil or mere. Here is a bazar. The territory of which this town is the principal place "comprises 165 square miles, and is stated to contain 150 villages, with a population of 16,000 souls, and to yield a revenue of 60,000 rupees: it maintains a force of sixty horse and 300 foot." In 1812, the British government granted the state to Rajah Kesree Singh, a descendant of Chuttur Sal, the founder of the independence of Bundelcund. In 1842, the rajah, becoming refractory and committing depredations against the British possessions, was deposed, and the raj was granted to another descendant of Chuttur Sal, named Khet Singh, who had a few years before submitted a claim, apparently well grounded, to the raj of Chirkaree, which, however, he had ceased to press, on stipendiary provision being made for him. On the death of Khet Singh, in 1849, the raj lapsed to the British government. The town of Jeitpore is situated in lat. 25° 16', long. 79° 38'.

JEJOOREE.—A town in the British district of Poonah, presidency of Bombay, 28 miles S.E. of Poonah. Lat. 18° 16', long. 74° 12'.

JELALABAD. or **JULLALABAD.**—A town in the British district of Shahjehanpore, lieut.-gov. of the N.W. Provinces. It contains a population of 6,629. Distant 11 miles S.W. from Shahjehanpore. Lat. 27° 46', long. 79° 50'.

JELALPOOR.—A town in the Punjab, on the right or western bank of the Jhelum, situate in a narrow valley of great fertility, extending between the river and the eastern extremity of the Kala or Salt range. According to Elphinstone, this was the scene of Alexander's battle with Porus; but Burnes thinks it must have been at Jhelum, higher up, where the river, according to him, is fordable at all times except in the monsoon, but where Hügel found it, at the beginning of January, when lowest, a great stream, larger than the Indus at Attock, and bridged with twenty large boats. It is therefore doubtful whether the river could at that point be forded

at the season of inundation (when, as Arrian informs us, it was crossed by Alexander); and where, indeed, the British army lost eleven men in fording it in December, which is the low season. It is, however, said that all the fords in the Punjab are more or less zigzag, and are also subject to variations, not only from season to season, but even from day to day. Jelapoor is one of the great passages over the Jhelum, on the route from Hindostan to Afghanistan. Lat. $32^{\circ} 40'$, long. $73^{\circ} 26'$.

JELALPORE, in the British district of Jounpore, lieutenant-gov. of the N.W. Provinces, a town on the route from Benares to Jounpore, 26 miles N.W. of the former. Lat. $25^{\circ} 35'$, long. $82^{\circ} 51'$.

JELGOON.—A town of Malwa, in the native state of Burwanee, situate on the right bank of one of the branches of the Taptee river, and 111 miles E.S.E. from Baroda. Lat. $21^{\circ} 43'$, long. $74^{\circ} 52'$.

JELLALABAD, in the territory of Oude, a town on the route from Cawnpore cantonment to that of Sooltanpore, 48 miles N.E. of the former, 87 N.W. of the latter, five S. of Lucknow. It has a bazar. Lat. $26^{\circ} 45'$, long. $80^{\circ} 57'$.

JELLASORE, or **JALLESUR**, in the British district of Midnapore, lieutenant-gov. of Bengal, a town on the route from the town of Cuttack to that of Midnapore, 130 miles N.E. of the former, 49 S. of the latter. It is situate on the left or east bank of the Soobaureka river, here a considerable stream, yet fordable during spring, but at other seasons crossed by ferry. Here is an antique mosque, and on the opposite bank of the river is a ruined fortress of great extent, but very rude construction, being merely an inclosure, formed by a ditch and mud rampart, surmounted formerly by a dense prickly hedge, scarcely passable, except during the dry season in spring, when it could be easily fired. Jallesur is in lat. $21^{\circ} 46'$, long. $87^{\circ} 14'$.

JELLINGHEE, in the British district of Moorshedabad, lieutenant-gov. of Bengal, a town situate at the point where the river Jellinghee parts from the Podda, or great eastern branch of the Ganges. Elevation above the sea seventy-five feet. Distance E. from Berhampore 25 miles, N. from Calcutta 105. Lat. $24^{\circ} 8'$, long. $88^{\circ} 40'$.

JELLINGHEE.—A river parting from the Podda, or great eastern branch of the Ganges, at the town of Jellinghee, in lat. $24^{\circ} 8'$, long. $88^{\circ} 40'$. It holds a course very sinuous, but generally S.W., for about ninety-five miles, and, at the town of Nuddea, in lat. $23^{\circ} 25'$, long. $88^{\circ} 22'$, joins the Bhagruttee, another great offset of the Ganges, the united stream being designated the Hooghly. Of the three rivers, the Bhagruttee, the Martabhangha, and the Jellinghee, forming the direct channels of navigation between Calcutta and the North-West Provinces, the last is by much the deep-

est and most important, retaining two feet of water during the dry season in spring, when the others have an average depth of about one foot. Still it cannot at that period be navigated by the craft usual in the Ganges, and they must then proceed through the Soonderbund passage, and thus incur a delay of a week in reaching their destination.

JELLY PUTTY.—A town in the British district of Coimbatore, presidency of Madras, 38 miles E. by N. of Darapooram. Lat. $10^{\circ} 49'$, long. $78^{\circ} 8'$.

JELLOOR, in Sirhind, a village on the direct route from Hansee to Lodiana, and 62 miles N. of the former town. The river Guggur is subject to sudden and great inundations, which sometimes for a considerable distance render the road in this vicinity impracticable. Distant N.W. from Calcutta 1,037 miles. Lat. $29^{\circ} 56'$, long. 76° .

JELPESH.—A town in the British district of Dinajepore, lieutenant-gov. of Bengal, 63 miles N. by E. of Dinajepore. Lat. $26^{\circ} 23'$, long. $88^{\circ} 53'$.

JELPIGOREE.—A town in the British district of Dinajepore, lieutenant-gov. of Bengal, 62 miles N. of Dinajepore. Lat. $26^{\circ} 29'$, long. $88^{\circ} 42'$.

JELUNGA.—A town in the British district of Chota Nagpore, lieutenant-gov. of Bengal, 62 miles S. by W. of Hazareebagh. Lat. $23^{\circ} 7'$, long. $85^{\circ} 10'$.

JEMDAH.—A town in the British district of Jessore, lieutenant-gov. of Bengal, 80 miles N.E. of Calcutta. Lat. $23^{\circ} 31'$, long. $89^{\circ} 10'$.

JEMLAH.—A town in the native state of Nepal, situate on the right bank of the Kurnalli river, and 123 miles E. by S. from Almora. Lat. $29^{\circ} 19'$, long. $81^{\circ} 41'$.

JENJAPPOOR.—A town in the British district of Tirhoot, lieutenant-gov. of Bengal, 89 miles E.N.E. of Dinapore. Lat. $26^{\circ} 13'$, long. $86^{\circ} 22'$.

JEURUHA, in Bundelcund, town of Mahoba, an outlying portion of the British province of Jaloun, situate on the route from Calpee to Ajeegurh, 70 miles S.E. of the former. It has a large Hindoo temple in good repair, and once containing much wealth, which was some years ago carried off by dacoits or gang-robbers, who murdered the officiating priest. Lat. $25^{\circ} 13'$, long. $80^{\circ} 3'$.

JERA, in the British district of Allahabad, lieutenant-gov. of the N.W. Provinces, a village on the right bank of the Ganges, N.W. of Calcutta, by the river route, 769 miles; 39 S.E. of the city of Allahabad, by the same. Lat. $25^{\circ} 13'$, long. $82^{\circ} 15'$.

JERDEEKER, a river rising in lat. 27° , long. $88^{\circ} 53'$, on the southern slope of the Sub-Himalaya Mountains, and, flowing through Bhotan in a southerly direction for forty miles, and south-east through Coosh Behar for forty-five miles, falls into the Toresha river, feeder

of the Brahmapootra, in lat. 26° 15', long. 89° 26'.

JEROULEE, in the British district of Futtehpoor, lieut.-gov. of Agra, a town on the left bank of the Jumna, 14 miles S. of the town of Futtehpoor. Lat. 25° 44', long. 80° 55'.

JERRAMULLA.—A town in the British district of Bellary, presidency of Madras, 34 miles S.W. of Bellary. Lat. 14° 48', long. 76° 35'.

JERRODE.—A town in Guzerat, or dominions of the Guicowar, 14 miles N.E. from Baroda, and 49 miles W. by S. from Cambay. Lat. 22° 24', long. 73° 22'.

JESARA, in the British district of Gurhwal, lieut.-gov. of the N.W. Provinces, a town on the route from Hurdwar to Hiandres or South-west Thibet, 71 miles E. by N. of the former. Lat. 30° 12', long. 79° 22'.

JESOOI, in the Punjab, a small town on the route from Mooltan to Leia, and 10 miles S. of the latter place. It is situate near the left bank of the Indus, the water of which of late years has in this part of the course been directed to the right or west side, so that the former bank on the east side now bears the appearance of a low brow or continuous eminence, running in some degree parallel to the main channel, and seven or eight miles distant from it. Jesool is in lat. 30° 49', long. 71° 2'.

JESSORE.—A British district under the lieut.-gov. of Bengal, named from its principal place. It is bounded on the north-east by the British district of Pubna; on the east by those of Dacca-Jelalpoore and Backergunge; on the south by the Sconderbunds; and on the west by the British districts of Baraset and Nuddea. It lies between lat. 22° 28'—23° 46', long. 88° 44'—89° 55'; is 105 miles in length from south-east to north-west, and forty-eight in breadth. The area, according to official statement, is 3,512 square miles. The surface is, with scarcely any exception, level and depressed, and its appearance tame, uninteresting, and unvaried, except by the interchange of dry ground and swamp; this district having redundant moisture, being traversed by numerous streams, and many offsets from the Ganges, in their course from north to south, from the great parent stream to various estuaries in the Sconderbunds. Of these the Koomar and Barashee are navigable throughout the year, the others only during the inundations caused by the periodical rains of closing summer and autumn, when innumerable cross-streams cause communications between the larger channels, intersecting the country in every direction, and in many parts laying it extensively under water. The climate is bad, the air being tainted with pestilential exhalations from the muddy and weedy tanks and watercourses: hence fevers and ague, severe and often fatal, are rife at all times of the year, but especially in autumn and the close of summer, when the

temperature is sometimes above 100°. In December and January it is sometimes at night as low as 55°. So fatal are the epidemics in the season during which they prevail, that whole villages are often depopulated. The zoology of the district, though very inadequately explored or described, is rich and interesting. It comprises, of wild beasts, the tiger, leopard, panther, bear, jackal, fox, ichneumon, wild deer, swine, and porcupine. The botany is very comprehensive and varied, but has received little attention. From the exclusively alluvial character of the country, it contains no minerals; but salt is obtained from the southern frontier. The soil is generally very fertile; in the northern part, however, having considerable admixture of sand and clay. In the south, it comprises a larger proportion of rich alluvial earth or vegetable mould, abundantly productive of rice, indigo, oil-seeds of various kinds, sugar, tobacco, coconuts, araca-nuts, gram (*Cicer arietinum*), rye, pulse, hemp, turmeric, and fruits of various kinds. Mulberry-trees have latterly been planted in great numbers, for feeding silkworms. Indigo is largely exported, as also is rice. The production and export of sugar and rum have latterly been greatly on the increase, large quantities being prepared by inspissating the sap of the palm-tree. The population is given under the article **BENGAL**. Jessore, the principal place, and the other towns, Khulna and Muhommudpur, are noticed under their respective names in the alphabetical arrangement.

JESSORE.—The principal place of the British district of the same name, on the route by Baraset from Calcutta to Dacca, 77 miles N.E. of Calcutta, 103 S.W. of Dacca. The civil establishment of the district is located here. The jail at this place is a spacious building, capable of holding in safe custody 1,000 persons. The school is a fine building, the cost of erecting it having been defrayed by subscription of the zemindars of the district. The establishment consists of five members, a secretary, a head-master, an assistant, and two pundits or native teachers. The pupils are instructed in English, Persian, and Bengalee. The school was first opened in 1838. This place was formerly reputed an unhealthy station; but within the last few years considerable pains have been taken, and expense incurred, with a view to sanitary improvement; and happily with success. Jessore is in lat. 23° 10', long. 89° 10'.

JESSULMERE, the most western of the fourteen states of Rajwara or Rajpootana, is bounded on the north by the territory of Bahawalpoore; on the north-east by the territory of Bikaner; on the south-east and south by that of Joudpore; and on the west by Sinde. This state was formerly much larger, extending to the Indus and Ghara, till the territory of Bahawalpoore was wrested from it by the Daudpootras. It now contains an area

of 12,252 square miles. It lies between lat. $26^{\circ} 8' - 28^{\circ} 28'$, long. $70^{\circ} 3' - 72^{\circ} 51'$. According to Tod, a line drawn in a north-west direction from Lowarki, in lat. $27^{\circ} 5'$, long. $71^{\circ} 50'$, to Kharreh, lat. $27^{\circ} 27'$, long. $70^{\circ} 14'$, would divide the territory of Jessulmere into two nearly equal parts, the southern of which is in many places rocky, being traversed by a ridge of hills, which may be considered continuous with the high lands of Cutch. "These barren hills are the only objects which diversify the almost uniform sterility of these regions. No trees interpose their verdant foliage to relieve the eye or shelter the exhausted frame of the traveller. It is nearly a boundless waste, varied only by a few stunted shrubs of acacia or mimosa family, some succulent plants or prickly grapes, as the bhoorut or burr." Macmurdo, however, draws a less repulsive picture of this tract, representing it as abounding with patches of good pasture among the rocks and sandhills, and feeding great herds of cattle. There are no running streams in the territory of Jessulmere, the periodical rains producing merely temporary sars or lakes of salt-water, formed by damming up the streams running down from the sandhills and intervening gulleys. The sars in general last but a few months, though, after very heavy monsoons, some have been known to continue through the year. The largest is the Kanod Sar, so called from the town of Kanod, on its southern border. It is about eighteen miles in length when fullest, and retains some water throughout the whole year. When filled to the greatest extent, a small stream proceeds from its eastern side, and, after a course of about thirty miles in an easterly direction, is lost in the sands of Joudpore. Salt is obtained from the ground left dry in the shrunken state of the lake; and this is a source of revenue to the Rawul or sovereign. Water in Jessulmere is at so great a depth below the surface, that wells in some places must be dug above 300 feet before a steady supply can be obtained. Thus, at Dihatra, on the north-west frontier, the wells are 309 feet deep; at the town of Jessulmere, 304 feet. To provide a sufficiency of that which is everywhere one of the first necessities of life, but in warm countries pre-eminently so, the natives dig extensive tanks, which, being filled by the periodical rains, supply water during the greater part of the year; but when those supplies fail, which sometimes occurs, many human beings and cattle perish from thirst. Jessulmere is devoid of valuable minerals, but limestone is abundant, and of good quality. The zoology of Jessulmere appears to be neither varied nor important. A few lions are said to haunt the wilds about the southern frontier, and wild hogs are numerous in the same region. Tigers and leopards occur but rarely; wolves and jackals are more common. There are a few antelopes, deer, and nygtaus (*Antelope picta*). Snakes are so numerous that the people wear leggings of leather as a defence against them. But, in general,

little amount or variety of animal life could be expected in a country so barren and of such limited extent. Domestic cattle are numerous and valuable. They consist principally of dromedaries, horses, kine, and sheep; of which last large flocks are kept. The trees are generally stunted: they are the babul (*Mimosa*), janth, the kurit (*Capparis aphylla*), the pilu. But one crop is raised in the year, the cultivation consisting in little else than scratching the ground with a small light plough, and scattering the seed in the way of broadcast. As, from the want of streams or large bodies of water, and the depth of the wells, artificial irrigation is impracticable, the weight of the crop depends entirely on adequate falls of rain. The principal crop is bajra or millet; in the more fertile parts, various sorts of pulse are cultivated. The only manufacture of any importance in Jessulmere is that of woollens, of both coarse and fine fabrics, made from the produce of the numerous native flocks. The coarsest part of the wool is made into cordage of various kinds; the next quality into blankets, and the finest into excellent woollen cloths and fabrics.

The ruler, and the influential portion of the population, are of the Bhatti tribe of Rajpoots, according to Tod originally from Zabulistan. They are a dissipated race, debasing and destroying their moral, intellectual, and physical powers by the excessive use of opium, which they imbibe sometimes in an infusion, sometimes by smoking, and not unfrequently till they become quite insensible. The dress and accoutrements of a Bhatti in easy circumstances consist of a tunic of white cloth or chintz, reaching to the knee, trousers loose, and of many folds in the upper part, but tight round the ankles; round the waist a scarf, in which a dagger is stuck; a shield, suspended from the left shoulder by a strap of deer-skin, and a sword, girt on with a belt of the same material. The head is covered by a turban, generally of a red colour, and terminated above by a high peak. The dress of females is of red woollen cloth, very full below; and a scarf is generally worn, which is more or less costly, according to the circumstances of the wearer. All wear rings of ivory or bone on the arms, in such numbers as nearly to cover them from the shoulders to the wrists. The legs above the ankles are also adorned with silver rings; and women will deny themselves the necessities of life to obtain the means of purchasing these ornaments. The religious strictness of the Bhatti Rajpoots is rather relaxed, in consequence of their continual intercourse with the Mussulmans to the westward. The next class in number and importance to the Rajpoots are the Palliwals, a Brahminical tribe, who nearly engross the commercial business of the community, and the Pokurna tribe, also Brahminical, and exclusively devoted to rural pursuits, which are also followed by the Jat tribe, who constitute a considerable portion of the population. There are also a few Jains.

The population is estimated at 74,400. Unlike many other dialects of India, that of the Bhattis of Jessulmere has no admixture of Persian, that language being nearly unknown there. Their language closely resembles the Marwari, a dialect spoken in Joudpore, Bikaner, and the neighbouring parts of Rajpootana. The Rawul, and principal people, write in a kind of Nagari character, which, though in some degree differing from the Devanagari, could, with little practice, be fluently read by a Hindee scholar. The citizens of Jessulmere appear to favour learning, and about 1,000 young persons are in course of education there, some by Brahmins, some by other instructors. A short time since, an English schoolmaster formed part of the domestic establishment of the Rawul. The sovereign has an annual revenue of about 8,500*l.*, of which about one-half is from transit-duties, the remainder from khalsa or crown lands, and miscellaneous sources. The military force maintained by the state does not exceed 1,000 men; but Tod states that, if on good terms with his thakoors or vassals, the chief could muster 5,000 infantry, 1,000 horse, and a camel corps. The history of Jessulmere is little else than an apocryphal subject for antiquarian research, previously to 1808, when the Rawul, probably alarmed at the encroachments of the khan of Bahawalpore, made advances to an amicable understanding with the British government. This relation matured in 1818 into an alliance, by which Jessulmere became entitled to British protection, and engaged to act in subordinate co-operation with the British government, and with submission to its supremacy. The principal places are noticed separately in the alphabetical arrangement. Boundary disputes had sprung up from time to time between this state and those of Bahawalpore and Khyrpore; the differences with the latter originating in the cession to Jessulmere, after the conquest of Sind, of a portion of the desert originally belonging to Jessulmere. Under the auspices of the British government, these differences have been now adjusted, and the boundaries of Jessulmere defined both towards Khyrpore and Bahawalpore.

JESSULMERE.—The capital of the Rajpoot state of the same name. It is situate in a rocky tract, described by Boileau as "a succession of valleys, or inclined planes, several miles long, and three or four miles broad, formed by low ridges of yellow limestone, the strata of which are not quite horizontal, but dip gently to the westward, and crop out on the eastern side, with a tolerably bold profile of ninety or 100 feet in height." The city is built at the base of the south end of one of these ranges, and has ramparts of uncemented stone, with bastions constructed in the same way, and generally much higher than the intermediate curtains. Many of these bastions are, however, in ruins. Inclosed within the ramparts, and in the south part of the town, is

the citadel, situate on an insulated eminence, three-quarters of a mile in circumference, and with steep sides, scarped all round, and faced with masonry to the height of about twenty feet, above which distance the surface of the hill recedes, at an elevation of about 40°, to the foot of the renee, which, with a width of six feet, runs quite round the fort. The ramparts of the fort vary in height from fifteen to thirty feet, the top of the parapet being about 130 feet above the town. The palace of the Maha Rawul or sovereign, within the citadel, is a great pile of building, surmounted by a huge umbrella, made of metal, and supported by a stone shaft. This is considered an emblem of high dignity, to which no other Rajpoot prince is entitled, except the chief of Oodeypoor. There are in the citadel, besides the palace, six temples, three for those of the Jain persuasion, and three for the Brahminists. The Jain temples are of great antiquity, built of stone, elaborately carved, and surmounted by gilt spires, towering over the adjacent buildings. Within the citadel, there are eight wells, above 300 feet deep. The water which they furnish is brackish, but not to such an extent as to be undrinkable. Progress has been made in sinking a well close to the gate. The work, at the time of Boileau's visit, had proceeded to the depth of 120 feet; but a much greater depth had still to be attained before reaching the main spring. The city contains about 8,000 houses, including those within the citadel. The domestic architecture is in many instances elaborate and solid. The house of a citizen in moderate circumstances has usually a frontage of about twenty-five feet. The basement story is painted red on the outside, and is quite plain, having one door giving access to the interior, and two or three slits instead of windows, to give light to the lumber-room, which occupies that part of the house. The upper or principal story is very neat, the front having a small projecting balcony, constructed of stone well carved, though rather in a heavy style. On each side is a latticed window about four feet square, and ornamented with framework of limestone, curiously carved. The balcony is surmounted by a massive canopy, the top of which is level with the flat roof, and being, like it, provided with a balustrade or battlement of cut stone, serves as a place for the inmates of the dwelling to enjoy the fresh air and prospect. Each house is raised above the street by a terrace about four feet high and six or seven wide, and has in front of every story a stone spout, to carry off the water into the street below. In the fronts of the terrace, long blocks of stone are bedded, so as to project some distance, and these have knobs at the ends, to which cattle may be tied. The interior of the house has a court a few feet square, into which various water-spouts are discharged, and the drainage passed off into the street by the subterraneous channel. On one side of the court is the cistern, on the other, the rusora or kitchen. One or two

narrow and steep staircases of stone lead from the corners of the area to the upper story and roof, where the females of the family take the air. The principal sleeping-room occupies the front side of the square. The back part of the house is laid out in store-rooms, and the two sides of the square are formed into numerous small chambers, with a profusion of odd but convenient little nooks, and cupboards built into the thickness of the wall. Pretty cradles and beds are provided for the children; long wooden pegs neatly painted, project from the wall for the purpose of hanging up clothes, and, in short, everything wears an appearance of comfort, the more pleasing, as it is quite unexpected. The most remarkable building in the town is the house of the ex-minister, a very costly structure of five stories of cut stone, with a sixth of timber, surmounted by five cupolas. There is scarcely anything like a bazar, and the only appearance of traffic is at the custom-house, near the gate of the citadel. The inhabitants of the town are supplied with water from a large tank, 300 yards south-east of the city; and near its banks are several small pits, which collect water from the drainage of the surface, but are not sufficiently deep to reach the springs. Close outside the western gate of the city are two wells, 241 feet deep, with water slightly brackish. They are protected from falling into the hands of an enemy by parapets with loopholes.

According to Tod, Jessulmere was founded in 1156, by Jeshu, a Bhatti prince, to replace the more ancient capital, Lodorva, situate 10 miles N.W. of the present. The site of Lodorva had no natural difficulties which might aid its defence, and in consequence of its exposed situation, was sacked by a hostile force; whereupon the surviving inhabitants settled at Jessulmere. The population of Jessulmere is probably about 35,000. It is distant N.W. from Calcutta, by Allahabad, Calpee, Gwalior, and Nusseerabad, 1,290 miles. Lat. 26° 56', long. 70° 58'.

JETCH DOOAB.—One of the natural divisions of the Punjab, formed by the two rivers Jhelum and Chenaub. It is the smallest of the four dooabs bounded by the Indus and its tributaries, and lies between lat. 31° 10'—33° 2', long. 72° 13'—74° 48'. Its length from north-east to south-west is 165 miles, and its breadth 33.

JETTOE, in the Sinde Sagur Dooab division of the Punjab, a town situated on the left bank of the Indus, 54 miles S.W. of the town of Mooltan. Lat. 29° 31', long. 70° 56'.

JEWAHIRGURH, in the British district of Muttra, lieut.-gov. of the N.W. Provinces, a village on the route from the city of Agra to Allygurh, and 20 miles N. of the former. The road in this part of the route is very good, the country well cultivated. Lat. 27° 25', long. 78° 7'.

JEWALA MUKI, in the north-east of the Punjab, a celebrated Hindoo place of pilgrim-

age, 10 miles N.W. of Nidaon, situate in an elevated nook, immediately under the mountains of Changa, is frequented by votaries from all parts of Hindostan, anxious to worship the mythological personage called Devi, wife of Mahadeo, her presence being indicated, as they believe, by some inflammable gases which issue from fissures in the rock. The name Jewala Muki is composed of two Sanscrit words,—*Jewala*, flame, and *Muki*, mouth. The flame, according to the legend, proceeds from the fire which Sati, the bride of Siva, created, and in which she burned herself. Siva, finding that this flame was about to consume the world, buried it in the hollow of the mountain. The temple is about twenty feet square, and the principal place of flame is a shallow trough, excavated in the floor, where it blazes without intermission. There are several jets of less importance. The gas also lies on the surface of some small reservoirs of water, and, when ignited, continues to burn for a short time. The roof of the temple is richly gilt, but the interior is blackened by the smoke of burned butter, sugar, and other gross offerings. In 1839, Runjeet Singh, when ill, made an offering of butter to the amount of 1,500*l.*, hoping the renovation of his health from the favour of the deity. The weight of the offering was probably about sixty or seventy tons; and Vigne, who was at the place while the burning was going forward, found "the stench similar to that of a candlemaker's shop." Near the principal temple is one smaller, called Gogranath, and hence concluded by Von Hügel to be of Buddhist origin. The ground adjoining to the group of sacred buildings is crowded with cows, Brahmans, pilgrims, and mendicants, and loaded with filth. The pilgrims, most of whom are paupers, are supported for one day from the funds of the temple. The town is dirty and neglected, but has an extensive bazar, containing great quantities of idols, votive garlands, rosaries, and other trumpery of the like description. The population is about 3,000. Near the town is a mineral spring, the water of which is found to be singularly efficacious in discussing bronchocoele. Moorcroft was unable to analyze this water; but it probably contains some form of iodine, now known to possess much efficacy in resolving glandular tumours. Lat. 31° 53', long. 76° 22'.

JEWUNPOOR, in the British district of Azimgurh, lieut.-gov. of the N.W. Provinces, a village on the eastern route from the town of Azimgurh to that of Goruckpoor, and 12 miles N.E. of the former, 60 miles N.E. of Benares. Lat. 26° 9', long. 83° 24'.

JEWUR, or **JEWAR**, in the British district of Boolundshuhur, lieut.-gov. of the N.W. Provinces, a town on the route from Coel to Delhi, 36 miles N.W. of the former. The population is returned at 6,056. Lat. 28° 7', long. 77° 39'.

JEYPOOR.—A considerable raj or territory of Rajpootana, named from its principal place.

This state, called anciently Amber, lies between lat. $25^{\circ} 40' - 27^{\circ} 37'$, long. $75^{\circ} 8' - 77^{\circ} 20'$; is about 150 miles in length from east to west, and 140 in breadth; having an area of 15,251 square miles. It in general is an extensive plain, though in the northern and north-western parts are insulated peaks, and clusters of dentated hills, here and there rising above the general level. They may be regarded as connected with a similar formation in the vicinity of Delhi. Jacquemont estimates their average elevation above the plain at about 300 feet. Their geological formation is quartz and granitoid rock, intermixed with white calcareous rock or marble, and occasionally mica. The country extending south of those hills is generally a level expanse of fine white sand, nearly devoid of vegetation, except where moistened by a spring or perennial rill, either of which is of very rare occurrence. A large portion of the soil is employed in grazing, and cattle are very numerous. Those parts of the territory which admit of cultivation, produce great crops of grain, pulse, cotton, and tobacco. The periodical rains are light, and confined to the close of summer, and there are few perennial streams. The Banganga, the most considerable of the transient torrents which traverse the country, is in winter and spring devoid of water. There are a few springs, but the water which they afford is soon absorbed by the sands. Water, however, may be obtained at all times by digging in the beds of torrents, and in most places is met with near the surface; so that wells need not be sunk to any great depth. From the naked, arid character of the soil, the temperature, during the prevalence of the hot winds, in the latter part of spring and beginning of summer, is dreadful, the thermometer frequently rising to 130° in the shade, and the heat proving fatal to men and beasts. In winter, however, the temperature is sometimes so low as to produce hoar frost. The population is a collection of various races, of which the most numerous are the Minas, supposed to be the aboriginal possessors of the country. Next, and nearly equal in number, are the Jats, who are extensive holders of land, and the most industrious and skilful agriculturists. Brahmins are numerous, being in greater proportion to the rest of the population than in any other state of Rajwara. Rajpoots, the ruling class, though inferior in number to the Minas and Jats, are conjectured to be still capable of mustering 30,000 men in arms. They are of the Kachwaha or Kashwaha tribe, according to tradition descended from Kash or Kasha, the son of Rama, and supposed to have originally come from Mount Abo, but they are not considered equal in prowess to the Rahtors, the Haras, or some other Rajpoot tribes. Of less important tribes, the chief are the Banias, Dhakurs, and Gujurs. Tod estimates the relative density of the population of Shekawutti at 80, and the remainder of Jeypoor at 150 to the square mile, giving an average of 124 to the united area; and assum-

ing this, the area being 15,251 miles, 1,891,124 would be the aggregate number of the inhabitants. Of the accuracy of the assumption on which this calculation is based, there are no sufficient means of judging; but it differs considerably from the view of Malcolm, who estimates the relative density of the population of Central India at ninety-eight to the square mile; which would yield an aggregate of only 1,494,598.

The revenue of Jeypoor has greatly fluctuated. It was estimated in round numbers at a crore of rupees, or a million sterling, during the most flourishing condition of the state. This was probably an exaggeration; but, however that may be, various causes combined to reduce the amount in 1802 to 81,83,000 rupees; a sum differing widely from that now realized, which, independent of feudal jaghires and charitable endowments, is returned at 45,83,950 rupees. Under a treaty concluded in April, 1818, Jeypoor became tributary to the East-India Company. For the first year no demand was to be made; for the second year the amount was fixed at four lacs of Delhi rupees; the third year at five lacs; the fourth year at six lacs; the fifth year at seven lacs. Thenceforward the annual tribute was to be eight lacs, until the revenues of the state should exceed forty lacs, when five-sixteenths of the excess was to be paid in addition to the eight lacs. In 1842, however, an arrear had accumulated amounting to no less than forty-six lacs. The whole of this was remitted, and the annual tribute fixed at four lacs. The military strength of Jeypoor and its dependencies comprises 2,096 cavalry, 18,377 infantry, 692 artillery, with 126 police; and with the addition of forces maintained by feudatories, 5,690, and of troops in garrison, 5,267, the total amounts to 32,248. The government is vested in an hereditary rajah; and when that dignity is held by an adult of firm character and talent, he engrosses nearly all power; but, as in most Eastern states, during a minority, or the reign of an imbecile prince, the country may be regarded as partitioned among the thakooris; each then becoming nearly, if not quite, independent in his estate and fort. The principal towns are noticed under their respective names in the alphabetical arrangement. The principal military routes are—1. From north-east to south-west, from Delhi to the city of Jeypoor, and thence to Mhow; 2. from east to west, from Agra to the city of Jeypoor, and thence to Ajmere; 3. from north-east to south-west, from Agra to Neemuch; 4. from east to west, from Calpee to Neemuch.

The Kachwaha Rajpoots, who founded the state of Jeypoor, claim descent from Kush, second son of Rama, king of Ayoda or Oude, whose reign is fixed at a very early period. After many centuries of wars and migrations, they overran the tract at present forming the state of Jeypoor, and, expelling or subjugating the Minas and Bingogurs, founded the kingdom of Dhoondar or Amber, in 967, under the

conduct of Dhola Rae, the first rajah. In the year 1200, Alaaddin, the Patan king of Delhi, stormed the celebrated fortress of Rantambor, and put its defenders to the sword. At a later period, the rajah attached himself to the fortunes of Baber, and afterwards, as rajah of Amber, received from Humayon, about the year 1532, a munsab or commission of command over 5,000 men. A subsequent rajah gave his daughter in marriage to Selim, the son of Akbar, and afterwards padshah under the name of Jehangir. The alliance, however, proved unfortunate. Prince Khusrroo, the offspring of the marriage, was hated by his father; and some circumstances in their disputes so affected the princess his mother, that she destroyed herself by poison. Khusrroo aspired to succeed Akbar, in supersession of his father, but the attempt was unsuccessful, and he passed the rest of his days in captivity. Latterly he was intrusted to the charge of his brother Shah Jehan, another son of Jehangir, and afterwards padshah, in whose custody he died, not without suspicion of having been cut off by order of his brother. Under the reign of Arungzebe, Jey Singh, the rajah of Amber, was one of the most powerful and assiduous courtiers of that monarch, from whom he received a munsab or command of 7,000 men; and, amongst other services, he betrayed to his patron his rival brother, the rightful heir, Prince Dara. He also contrived to place in captivity Sevajee, the celebrated founder of the Mahratta sway, whom, however, he in some degree compensated by subsequently aiding in his escape. Aurungzebe becoming jealous of Jey Singh, caused him, it is said, to be poisoned. The munsab was reduced to Jey Singh's successor to 4,000 men, and to the third in succession to 3,000 men. The next prince, Jey Singh the Second, entered into the contest for the succession, which, on the death of Aurungzebe, arose among his sons. He supported the cause of Azim against his brother Moazzim; and, after the defeat and death of the former, was by the victor subjected to terms much more rigorous than were enforced on other Rajpoot princes. The course of events, however, favoured Jey Singh, and he was subsequently, it is believed, admitted to conditions not inferior to those granted to his most favoured brethren. At a later date, when Ferokhsere was raised to the throne of Delhi, Jey Singh held a high command under him. When a powerful conspiracy threatened the ruin of that feeble-minded monarch the Rajpoot steadily supported him; and having in vain urged him to resistance, on his murder retired to Amber. Jey Singh was high in favour with Mohammed Shah, successor of Ferokhsere, and, on account of his great scientific attainments, was by that monarch intrusted with the reformation of the calendar; for which purpose he drew up astronomical tables, which, in honour of the Padshah, he named *Zij Mohammadshahi*, or "*Tables of Mohanunad Shah.*" For furthering astrono-

mical pursuits, he erected observatories, and provided them with scientific apparatus of enormous magnitude, at Jeypoor, Benares, Muttra, Oojein, and Delhi. He also founded the city of Jeypoor, which remains a monument of his architectural skill. The career of Mahratta conquest towards the north and north-east appears to have been at first favourable to the aggrandizement of Jeypoor, which for a time made common cause with the new race of marauders, in seizing the fragments of the falling realm of Delhi, but itself soon became a sufferer from them. Scindia demanded heavy contributions, which being resisted, that chieftain marched with a large army to enforce them. He was, however, signally defeated. The defection and subsequent independence of the chief of Macherry or Alwar, about the year 1790, rent away a large portion of the territory of Jeypoor; and Tukajee Holkar, the Mahratta chief, invading the remainder, extorted an engagement for the payment of a large annual tribute, which was afterwards transferred to Ameer Khan. From this period the country was overrun and desolated by different parties of freebooters, who often fought among themselves for the spoil, till, in 1803, a treaty was concluded between Juggut Singh, rajah of Jeypoor, and the British government, but annulled by Sir George Barlow, governor-general, in 1805, contrary to the earnest remonstrances of Lord Lake. On this occasion, the Jeypoor agent observed to the British general, that this was the first time the English government had been known to make its faith subservient to its convenience. Jeypoor was now left to the mercy of the Mahrattas, whose desolating ravages reduced the finest tracts to the state of deserts. In 1818 another treaty was concluded, by which the British government agreed to protect Jeypoor, that state engaging to acknowledge its supremacy, to yield subordinate co-operation, and to pay tribute. Some hesitation was manifested by the durbar of the Jeypoor state in receiving the overtures of the British; the existence of which was ascribed, and probably with justice, to a fear that the stronger power might, as before, break the engagement when deemed inconvenient, leaving the weaker to the vengeance of the Mahrattas. But though saved from outrages of this kind, the country prospered not. Juggut Singh, the prince with whom the treaty was concluded, died in the same year in which it was executed. After a short interval, a posthumous son of the deceased rajah was acknowledged as his successor; and during his minority his mother assumed the regency. This authority she continued to exercise till her death, which occurred in 1831. Throughout this period, the most scandalous corruption, intrigue, and misgovernment prevailed, and shortly after the queen's death, the British government found it necessary to move a force into Jeypoor for the purpose of redressing the wrongs and correcting the abuses which had brought the country to a state which led to its being de-

scribed by a traveller in 1835, as exhibiting "an empty treasury, desolate palaces, stagnating commerce, a ferocious populace, and a rabble army." The greater part of the country was in the hands of the thakoors or subordinate chiefs, each of whom possessed a military force, and as many retainers as he could keep together, exercising all the powers of government within his own district. These thakoors were in general engaged in quarrels and wars with each other, and frequently in combinations and contests against the ruling powers of the state, while marauders from neighbouring districts ravaged the country, sometimes even with the connivance of the rajah's minister, who closed his eyes to these outrages, and participated in the plunder. This man consummated his villainies by poisoning his master. He followed up the atrocity by attempts on the life of Major Alves, the Governor-General's agent, and his assistant, Mr. M. Blake, and against the latter was unhappily successful. It remains to be added, that the convicted contriver of these vile deeds was permitted to end his days in the fortress of Chunar, an example of lenity ill merited. The measures of the British government speedily introduced a better state of things; a regency during the minority of the infant successor of the murdered prince was appointed; financial reforms were commenced, and an approximation to at least something like the administration of justice made. The effect of the pervading influence of the British government is thus stated by Colonel Sutherland:—"A visible improvement has taken place in the condition of the fine and modern city of Jeypore itself, and generally throughout the country, while everywhere, there is a sense of security and the prevalence of order, which, the people say, have been unknown during either of the last two reigns, and which they compare with what existed in the days of Jey Sing, the founder of the city of Jeypore." Subsequently, opportunity was found for the exercise of the charities of life; hospitals and dispensaries were established, of the benefits of which nearly 2,000 patients availed themselves within eight months. Of this number nearly seven-eighths were discharged cured, and only five persons died under treatment. The financial results under the influence of English authority were not less happy. The government, it is needless to add, was in debt; for all Indian governments, however hopeless their credit, contrive to accumulate debt. In 1843-44, 9,39,587 rupees of the public debt was paid off; and only 3,59,545 rupees remained due. Towards this reduction, 7,32,414 rupees, derived from the discovery of treasure formerly concealed by the infamous minister of Jeypoor, was made available. In 1844-45 the revenues exceeded the disbursements by 3,38,138 rupees, and the amount of debt was reduced by 49,777 rupees, leaving a balance of 3,09,768 rupees. In 1845-46 the receipts exceeded the disbursements by 5,14,012 rupees, and the state was

free from debt. In 1851 the young chief completed his eighteenth year. He had in some degree been initiated into public business, and the British authorities entertaining a favourable opinion of his general fitness for the duties of his station, he was allowed to assume the reins of government, and exhorted to continue the beneficent system of administration under which his dominions during his minority had attained so high a degree of prosperity.

JEYPOOR.—A large city, the principal place of the territory of Jeypoor or Amber. It is situate in a small plain, or rather basin, conjectured to be the bed of a dried-up lake, having on all sides, except the south, barren stony hills, crowned in many places with forts. On the north, the hill rises above the town several hundred feet, and on this is built the citadel, which "has a very bold appearance when viewed from the town, the south face of the rocks being very precipitous, and totally inaccessible." It is approachable, however, on the north, where the rock slopes gradually towards the antique town of Amber. The town of Jeypoor is about two miles in length from east to west, the breadth about one mile. It "is entirely surrounded by a wall of masonry, with lofty towers and well-protected gateways, but the ramparts are too thin to offer an effectual resistance even to field artillery, and they are so low, that the shifting sands have in some places drifted against the outside of the wall nearly as high as the parapet, totally obliterating the ditch, if ever there was one." There are seven gateways, in no manner differing from each other. Outside the rampart, another wall runs parallel to it, embattled at the top, and having numerous loopholes for musketry. It is considered to be the most handsome and regularly built of the cities laid down by native Indians. A main street, two miles in length, and forty yards in breadth, extends from east to west. This is intersected by several streets of about forty yards in width, and at each point of intersection is a *chauk* or market-square. "The cross-streets are in their turn intersected at right angles by narrower streets, and the latter are again subdivided in a similar manner by lanes, which are aligned with equal accuracy; so that nearly the whole city is portioned out into rectangular blocks." "The palace, gardens, and royal premises, occupy the whole of the central block, being half a mile long." The front of the royal residence is extremely high, having seven or eight stories, and is flanked at each extremity by a lofty tower, surmounted by a cupola. Within are two spacious courts, and several of smaller dimensions, surrounded by cloisters, with stone pillars. The garden, which is surrounded by a high embattled wall, terraced at top, and cloistered below, is "extremely beautiful, full of fountains, cypresses, palm, and flowering shrubs, with a succession of terraces and alcoves, none of them, singly taken, in good taste, but, all together, ex-

tre mely rich and striking." Jacquemont states that there are in this vast residence fully a dozen palaces, communicating either by galleries or gardens. The most remarkable apartment is the Diwani Khas, or hall of audience, a splendid oblong room, entirely built of white marble, which material is also profusely employed throughout in the construction of the palaces. The houses in the principal streets are in general finely built of stone; and numerous mosques and temples add to the architectural splendour of the town. The arsenal contains a furnace for casting, and machinery for boring guns; but none have lately been made here. There are some antique cannon of enormous dimensions, constructed of wrought-iron bars, laid longitudinally, and kept together by a coat of gun-metal founded around them; but they are totally unserviceable. The huge observatory, erected here by Jai Singh, is in good preservation, but no pundit of the place has skill to make use of it. Besides the huge dials, azimuth-circles, altitude-pillars, and such other bulky instruments, of masonry, there are some brazen altitude-circles of enormous size and great weight. Jeypoor was built in the early part of the eighteenth century, by the celebrated Sewae Jai Singh, rajah of Dhoondar or Amber, and, having named it after himself, he hither removed his residence and court from the adjacent city of Amber, now desolate. Distant direct from Agra, W., 140 miles; from Delhi, S.W., 150; Allahabad, N.W., 400; Calcutta, N.W., 850. Lat. $26^{\circ} 56'$, long. $75^{\circ} 55'$.

JEYPOOR.—A town in the British district of Seebpoor, province of Assam, 43 miles E.N.E. of Seebpoor. The place some years ago had been selected as a military station, but, in consequence of its insalubrity, the home authorities suggested the removal of the troops. Coalfields abound in the vicinity. Lat. $27^{\circ} 14'$, long. $95^{\circ} 19'$.

JEYPOOR, in Orissa, a town in the native zemindarry of the same name, on the south-west frontier of Bengal, situate 111 miles N.W. from Vizagapatani, and 69 miles W. by S. from Ryaguddah. The territory of which this town is the principal place is bounded on the north by the petty state of Calahandy and the Koond tribes; on the east by the British collectorate of Vizagapatani; on the south by the river Godavery; and on the west by the territory of Nagpore. It lies between lat. $17^{\circ} 15'$ — $19^{\circ} 45'$, long. $81^{\circ} 28'$ — $83^{\circ} 53'$. Its length from north-east to south-west is 212 miles, and its breadth 100. The area is computed at 13,041 square miles, and the population at 391,230. The tract is held by a number of chiefs, styled hill zemindars, who collectively pay an annual tribute of 16,000 rupees, or 1,600*l.*, to the British government. The tribute has occasionally fallen into arrear, owing to internal dissensions, in which the British government have declined to interfere. Indeed, from the wild state of the country, access to the interior is scarcely practicable, and a further barrier is

imposed, in the pestilential nature of the climate. An alleged instance of human sacrifice in this territory was some time since brought to the notice of the British government, and measures were instantly adopted for the suppression of the barbarous practice. The town of Jeypoor is in lat. $19^{\circ} 1'$, long. $82^{\circ} 27'$.

JEYPOOR.—A town in one of the recently sequestered districts of Hyderabad, or dominions of the Nizam, 68 miles W.S.W. of Ellichpoor. Lat. $20^{\circ} 45'$, long. $76^{\circ} 39'$.

JEYT, or **JYNT**, in the British district of Muttra, lieut.-gov. of the N.W. Provinces, a small town or village on the route from the cantonment of Muttra to Ferozpur, and 10 miles N.W. of the former. It has water from wells, and also from a tank. Lat. $27^{\circ} 35'$, long. $77^{\circ} 40'$.

JEYTPOOR, in the British district of Sohagpoor, territory of Saugor and Nerbudda, lieut.-gov. of the N.W. Provinces, a town on the route from Sohagpoor to Sasseram, 25 miles N.E. of the former. Lat. $23^{\circ} 30'$, long. $81^{\circ} 49'$.

JHAJPOOR, in the Rajpoot state of Oodeypoor or Mewar, a town on the route from Nusseerabad to Saugor, 63 miles S.E. of former, 287 N.W. of latter. It has a good bazar, and supplies and water are abundant. Here is a fortress on an isolated oblong hill, guarding the eastern entrance of an important pass from the lowlands of Boondee into the territory of Oodeypoor or Mewar. It is large and strong, and consists of two similar ramparts, one within the other, a considerable space intervening. Each has a good ditch and numerous round bastions. The town lies north-west of the fort, at the foot of the hill, and is large, well built, and fortified. The pergunnah of Jhajpoor, of which it is the principal place, contains 100 townships, inhabited by the indigenous tribe Mina, who muster 4,000 bowmen. Lat. $25^{\circ} 40'$, long. $75^{\circ} 21'$.

JHALLAWAR, in the peninsula of Kattywar, province of Guzerat, a district named from the Jhalla tribe of Rajpoots, who are the principal part of the population. It extends over the north-eastern part of the peninsula, and is bounded on the north by the Runn or Salt-marsh, connected with the eastern extremity of the Gulf of Cutch; on the east by the British district of Ahmedabad; on the south by the British district of Ahmedabad and the prant or district of Kattywar; on the south-west by the prant of Hallar; on the west by the prant of Muchockants; and lies between lat. $2^{\circ} 18'$ — $23^{\circ} 8'$, long. $70^{\circ} 50'$ — $72^{\circ} 10'$. No official return has been made of the area; but, by a probable approximation, it may be stated at 3,000 square miles.

JHALLODE, in the territory of Scindia, a town on the route from Neemuch to Baroda, 131 miles S.W. of former, 103 N.E. of latter. It was formerly of importance, being the principal place of a pergunnah of the kingdom of Guzerat, containing seventeen towns, and it is

still a considerable place. It has a bazar, a mosque, a small temple, a large and fine tank, and some well-built houses of brick, two stories high, and covered with tiles. Lat. $23^{\circ} 7'$, long. $74^{\circ} 9'$.

JHALLOWA.—A small raj, formed in the year 1838 by a division of the Rajpoot state of Kota. The circumstances which led to this division (which are of singular character) will be found detailed in the article KOTA. It is divided into three separate portions, the largest of which extends from lat. $24^{\circ} 6'$ to $24^{\circ} 40'$, and from long. $76^{\circ} 30'$ to $76^{\circ} 58'$. The area a little exceeds 2,200 square miles, and the population, according to the rate of estimate usually adopted for this part of India, would be upwards of 220,000. Upon the death of the late chief of Jhallowa, in 1848, a suttee took place; and in consequence of this violation of existing engagements, the British government withheld for a time their formal recognition of the present ruler. Precautions were subsequently taken to prevent a recurrence of the atrocious practice, and friendly intercourse between the two governments was re-established.

JHALOO, in the British district of Bij-nour, lieut.-gov. of the N.W. Provinces, a town, the principal place of the pergunnah of the same name. It has a population of 6,551, and is situate in lat. $29^{\circ} 20'$, long. $78^{\circ} 17'$.

JHALRA PATUN, in Rajpootana, a town in the Jhallowa division of the state of Kota, situate on the route from Neemuch to Saugor, 90 miles E. of the former, 216 N.W. of the latter. It is a handsome and well-built town, the modern part of which was laid down by Zalim Singh, the regent of Kota, on the model of Jeypoor. Distant from Oogain, N., 100 miles; from Kotah, S.E., 50; from Agra, S.W., 215. Lat. $24^{\circ} 32'$, long. $76^{\circ} 13'$.

JHANDINOOR, or **JENDIPOOR**, in the British district of Agra, lieut.-gov. of the N.W. Provinces, a village on the route from the city of Agra to that of Muttra, and 25 miles N.W. of the former. Lat. $27^{\circ} 22'$, long. $77^{\circ} 49'$.

JHANSI.—A British province in Bundelcund. It consists of two parts, lying nearly contiguous to each other, being separated only by a narrow slip of territory belonging to the native raj of Tehree. The western division is bounded on the north by Gwalior and Duttah; on the east by Tehree; on the south and west by Gwalior. The eastern portion is bounded on the north-west by the British district of Jaloun; on the east by that of Hummeerpoor; on the south and south-west by Tehree. The combined territory lies between lat. $24^{\circ} 55'$ and $25^{\circ} 48'$, long. $77^{\circ} 53'$ and $79^{\circ} 31'$, and extends from east to west about 100 miles, and from north to south about 60. In 1832 it was estimated to have an area of 2,902 square miles, 956 villages, and a population of 286,000. Since that period, however, the limits of the district have been contracted by alienation,

and consequently the above-quoted estimates do not, in respect either of extent or population, represent its present condition. Probably 390 miles should be subtracted from the area as above stated, and 86,000 persons from the population.

The tract was formerly part of the possessions of the Boondela rajah of Oorcha. Subsequently, it fell into the hands of the Peishwa, and was assigned to the administration of one of his officers in the character of soubahdar. In 1804 a treaty of defensive alliance was concluded by the British with the then soubahdar, as a tributary of the Peishwa. In 1817, consequent on the cession to the East-India Company of the Peishwa's rights in Bundelcund, a second treaty was concluded by the British government with the soubahdar of Jhansi, by which he was acknowledged "hereditary ruler" of the territory, subject to the payment of an annual tribute of 74,000 rupees (Jhansi currency). In 1832 he was permitted to assume the title of rajah. Ram Ramchund Rao, the ruler on whom this dignity was conferred, died in 1835, without issue. Various claimants to the succession thereupon appeared, but the British government decreed in favour of Rao Rugonath Rao, the uncle and next of kin of the deceased rajah. He died about three years after his accession; his brief period of rule having been rendered unquiet by opposition to his claim, professedly grounded on the fact of his being a leper, which was asserted to be a disqualification for the occupation of the seat of power. Rugonath Rao left no legitimate issue, and the succession became again the subject of contending claims. Some of these were obviously inadmissible, and the propriety of at once sanctioning any of them appeared very questionable, regard being had to the distracted state of the country, which had greatly deteriorated in condition, from continued misgovernment; the revenue (which is said at one period to have been eighteen lacs of rupees) having fallen from twelve lacs, its amount in 1832, to three lacs. Under these circumstances, it was deemed advisable that the Governor-General's agent in Bundelcund should assume the administration, the various claims to the raj being reserved for future adjudication. This step was accordingly taken, though not without opposition; the mother of Ramchund Rao, who espoused the cause of one of the claimants to the succession, having compelled the British government to make military demonstration before she would quit the fort of Jhansi. A commission appointed to investigate the different claims, unanimously rejected all except that of Baba Gunghadar Rao, brother of the late chief, and the only surviving male descendant of Sheo Rao I., with whom, as soubahdar, the first engagement of the East-India Company with Jhansi was concluded. The selection was approved by the home authorities; but the new rajah was not of strong intellect, and was therefore thought unequal

to the task of retrieving the principality from the state of disorder into which it had fallen. It was thereupon determined to carry on the administration by British agency, giving the rajah a fixed allowance, with the understanding that the administration should be made over to him partially, or entirely, when it should be deemed safe to trust it to his hands. This plan, thus dictated by temporary necessity, was attended with such success, that the revenue, which, as already mentioned, had fallen so disastrously, was in one year considerably more than doubled. To provide for defence, and to maintain tranquillity, the Jaloun force (afterwards called the Bundelcund legion) was increased, and made available for the service of this state, as well as of that for the protection of which it had originally been raised. After a few years of British management, the country having attained that state in which it appeared safe to make the transfer always contemplated, it was given up to the management of its native chief, subject to a cession of territory, in commutation of the annual payment previously made towards the support of the Bundelcund legion, and to other necessary conditions. This took place in 1843. Baba Gunghadar Rao dying in 1854 without lineal heirs, the territory of Jhansi lapsed to the British government.

JHANSI, in Bundelcund, a town, the principal place of the small territory of the same name, lies on the route from Agra to Saugor. Hunter, who visited the place in 1792, says, "It is frequented by the caravans from the Deccan, which go to Furruckabad and the other cities of the Doab. Hence, an afflux of wealth, which is augmented by a considerable trade in the cloths of Clanderi, and by the manufacture of bows, arrows, and spears, the principal weapons of the Boondela tribe." The town is situate amidst tanks and groves of fine timber-trees, and is surrounded by a good wall. On a rock overlooking the town, is a fortress, or castellated residence of the former rajahs, a lofty mass of building, of stone, more striking from being surmounted by a huge round tower. This fort is said to have between thirty and forty pieces of cannon. It was built by the Maharrattas, from whom it was wrested in 1761, and for some time detained by the nawab of Oude, who reduced it almost to ruins. The streets and bazars are clean and orderly, great attention having been paid to their due regulation. There is another hill 600 yards south-east of that on which the fort is situate, and of nearly equal elevation to it. Jhansi is 142 miles S. of Agra, 130 miles N. of Saugor, 245 miles W. of Allahabad by Banda, and 740 N.W. of Calcutta by Allahabad. Lat. 25° 28', long. 78° 38'.

JHARI.—A town in the native state of Nepal, situate on the right bank of the San Coos river, and 20 miles N.E. from Khatmandoo. Lat. 27° 50', long. 85° 34'.

JHAROWLEE.—A town in the Rajpoot

state of Seerooce, 51 miles W.N.W. from Oodeypoor, and 10 miles E.S.E. from Seerooce. Lat. 24° 55', long. 73° 4'.

JHARSAINTULEE, or **JHARSOUTLI**, in the jaghire of Bullabgurh, lieutenant-gov. of the N.W. Provinces, a village on the route from Delhi to Muttra, and 29 miles S. of the former. Lat. 28° 18', long. 77° 21'.

JHARSUH, in the British district of Goorgaon, lieutenant-gov. of the N.W. Provinces, a town on the route from Rewaree to Delhi, 20 miles S.W. of the latter. It is situate to the south of a rocky range of quartzose formation, and contains a bazar, with a good supply of water. Lat. 28° 24', long. 77° 6'.

JHEEND.—A small native territory within the limits of the tract of country over which the British government maintains a controlling power, through the commissioner and superintendent of the Cis-Sutlej states. Some years since, the territory lapsed, from failure of direct heirs, and possession was taken of it; but, in 1837, the larger portion was granted to a collateral heir. In 1842, the revenue of the state thus constituted was estimated at three lacs of rupees, or 30,000*l.*; but this estimate is inapplicable to the present condition of the state, as, on the conclusion of the war with Lahore, an accession of territory was bestowed on the rajah, in consideration of his fidelity during that contest. The possessions of this state being made up of scattered portions of territory, there is much difficulty in dealing with them as a whole; but they are returned as having an area of 376 square miles, and a population of about 56,000 persons. The British government, in granting to the rajah an extension of dominion, took advantage of the opportunity furnished by the act of favour, to promote the cause of public improvement, and advance the interests of humanity, by binding the rajah to abolish transit-duties, to make and keep in repair a military road, and to suppress suttee, infanticide, and slave-dealing.

JHEEND, in Sirhind, a town situate on Feroz Shah's canal, in a naturally fertile country, but which, in consequence of deficient cultivation, is extensively overrun with jungle, especially of dakh (*Butea frondosa*). It is a considerable town, and is the chief place of the native state bearing the same name: there is a good bazar, and a palace, the residence of the rajah. The road in this part of the route, which is in general good, crosses the canal by a bridge. Supplies are abundant. Jheend is distant N.W. from Calcutta 979 miles. Lat. 29° 19', long. 76° 23'.

JHELUM, or **BEHUT**.—A river of the Punjab, and the most western of the five great rivers which intersect that region east of the Indus. It rises in Cashmere, the whole valley of which it drains, making its way to the Punjab, through the Pass of Baramula, in the lofty range of Pir Panjal. Its most remote source is the head of what is regarded by some

as its principal feeder, the Lidur, which rises in the mountain-range bounding the valley on the north-east, and in lat. $34^{\circ} 8'$, long. $75^{\circ} 48'$; and, having drained the small mountain-lake called Shesha Nag, takes a south-westerly course of about fifty miles, to its confluence with the Breng, flowing from the south-east. About ten miles to the north-west, this united stream forms a junction with a large feeder flowing from the south, and itself formed by the junction of the Sandren, the Veshau, the Huripur, and some other streams of less importance, none having a length of course exceeding forty miles. Of these, the Veshau is the principal, and, according to Vigne, so far exceeds in size the other upper feeders of the Jhelum, that its fountain-head should be regarded as properly the source of that great river. The Veshau flows by a subterranean passage from Kosah Nag, a small but deep lake, situate near the top of the Pir Panjal Mountain, and at an elevation of about 12,000 feet above the level of the sea. Here, Vigne states, "its full strong torrent is suddenly seen gushing out from the foot of the last and lofty eminence that forms the dam on the western end of the lake, whose waters thus find an outlet, not over, but through, the rocky barrier with which it is surrounded." This remarkable spot is in lat. $33^{\circ} 35'$, long. $74^{\circ} 43'$. The stream thus produced and reinforced, subsequently receives numerous small feeders; passes through the City Lake, the Manasa Lake, and the Wulur or Great Lake, and sweeps through the country, confined by embankments, which prevent it from overflowing the lower part of the valley. Previously to entering the Wulur, it receives a considerable tributary named the Sind, which rises in the lofty range bounding the valley on the north. The whole course of the Jhelum through the valley, before it finds an outlet through the Pass of Baramula into the lower ground of the Punjab, is about 130 miles, for seventy of which it is navigable. It is the opinion of Vigne, that the river made its way gradually through this pass, and thus drained the lake, which, according to tradition, formerly occupied the site of the valley. At Baramula, where the stream is 420 feet broad, is a bridge of seven arches. At Mozafarabad, about 205 miles from its source, it is joined by the Kishengunga, a stream of nearly equal volume, which rises in Little Tibet, receives a considerable tributary from the valley of Gury, and subsequently makes its way through the mountains stretching from Cashmere to the vicinity of Attock. The united stream takes a course nearly due south, from Mozafarabad, and about 255 miles from its source, leaves the mountains, and enters on the plain of the Punjab, near the town of Ohind, whence it is navigable to the Indus. It is here a very great stream, though considered by Burnes less than the Chenaub. Von Hügel at the commencement of January, when the rivers of the Punjab are lowest, crossed it at the

town of Jhelum, sixty-five miles lower down, on a bridge of twenty large boats, and estimated it to have a greater volume of water than the Indus at Attock. Moorcroft, at the same place, found it in the middle of October 150 yards wide, and from twelve to sixteen feet deep, but 600 yards wide at a short distance both above and below that point, and flowing at the rate of about a mile an hour. At this place the direction of the Jhelum changes from southerly to south-westerly. At Jelalpoor, from which point Burnes descended by a boat to Pind Dadun Khan, the stream was muddy but rapid, with a current of three or four miles an hour. Elphinstone crossed the river at Jelalpoor, in July, when he found it one mile, one furlong, and thirty-five perches wide, with a depth of from nine to fourteen feet, and a current running four miles an hour. It abounds in fish, and is infested by great numbers of crocodiles. Below Jelalpoor, it takes a direction nearly southerly, and joins the Chenaub a little above the ferry of Trim, in lat. $31^{\circ} 10'$, long. $72^{\circ} 9'$, after a course of about 490 miles. The Jhelum was, at the confluence, when observed by Burnes at the end of June, about 500 yards wide. After the union, the channel of the united waters was a mile broad and twelve feet deep. The Jhelum was unquestionably the Hydaspes of the Greeks. It is still known to the Hindoos of the vicinity by the name of *Betusta*, corrupted by the Greeks, according to their usage with respect to foreign names. The scene of the battle between Porus and Alexander is generally placed at Jelalpoor.

JHELM.—A town of the Punjab, on the right bank of the river of the same name. Jhelum is a town of considerable extent, with a population mostly Mahomedan. It is, however, rendered unhealthy by the inundation, which extends widely over the eastern bank of the river. The principal crops in the vicinity are wheat, barley, and cotton. During the season when the river is lowest, there is a ford nearly a mile above the town. The passable part of the bed describes two sides of a triangle, the vertex of which is down the river. By this ford the British army crossed in the middle of December, 1839, in its return from Afghanistan; and though this is the low season, several were swept down the stream, and eleven persons, including an officer, drowned. Hough, who was present on the occasion, states, "the ford extended over a line of about 500 yards, and had more than three feet water, and a strong current near the south bank." It is obvious that, for the greater part of the year, the ford must be totally impassable. The elevation of Jhelum above the sea is estimated at 1,620 feet. It is expected that steam communication between Kurrachee and this town will shortly be established by means of government vessels. Lat. $32^{\circ} 56'$, long. $73^{\circ} 47'$.

JHINJANUH, in the British district of Mozuffurnuggur, lieut.-gov. of the N.W. Pro-

vinces, a town on the route from Kurnal to Meerut, and 21 miles S.E. of the former. Lat. $29^{\circ} 31'$, long. $77^{\circ} 17'$.

JHIRREE, in the territory of Gwalior, or possessions of Scindia's family, a town on the route from Calpee to Kotah, 187 miles S.W. of former, 134 E. of latter. It has a bazar, and is supplied with water from a jhil or small lake. Lat. $25^{\circ} 33'$, long. $77^{\circ} 28'$.

JHOK, in Sinde, a village on the route from Hydrabad to Meerpoor, and 35 miles S. of the former town. It is situate in the fertile alluvial tract insulated by the Indus and its great offsets the Fulailee and Pinyaree. The adjacent country is described by Pottinger as very fine, and capable of producing rich crops. Lat. $24^{\circ} 47'$, long. $68^{\circ} 25'$.

JHOONEE, in the British district of Kumaon, lieut.-gov. of the N.W. Provinces, a village on the route, up the course of the river Surjoo, from Almorah to the Unta Dura Pass, 40 miles N.E. of Almorah fort. It is situate on the right bank of the Surjoo, five miles below its source. Lat. $30^{\circ} 7'$, long. $80^{\circ} 3'$.

JHOONJHNOO, in the Rajpoot state of Shekawuttee, a town on the route from Delhi to Bikaner, 120 miles S.W. of former, 130 E. of latter. It is a handsome town, with trees and gardens, the appearance of which is the more agreeable, as they occur in the midst of a dreary sandy desert. Here, during the existence of the Shekawuttee confederacy, each of its five chiefs had a stronghold; but these were subsequently occupied by British garrisons. Lat. $28^{\circ} 5'$, long. $75^{\circ} 32'$.

JHOORH.—A town in the Rajpoot state of Jodhpoor, 18 miles N.N.E. from Jodhpoor, and 103 miles S. from Beekaneer. Lat. $26^{\circ} 32'$, long. $73^{\circ} 13'$.

JHOOSSEE, or **JHOUSEE**.—The principal place of the pergunnah of the same name, a town on the left bank of the Ganges, close to the confluence of the Jumna. It is opposite the city of Allahabad, with which it communicates by a ferry across the Ganges. A more frequented communication between the left bank of the river and the British cantonments, which adjoin the city on the north, is at Daraganj, two miles higher up. The bed of the river is there a mile in width, but in the dry season the stream occupies only a third of it, the remainder being used as a road. It is always heavy, either from sand or mud. This ferry has thirty boats, and troops and stores are passed free of charge. In some seasons the Ganges is impassable here by ferry, in consequence of shifting sands, and the passage must then be made at Papanow, five miles higher up. These sands form a great obstruction to the navigation of the Ganges below Cawnpore. It flows "in a race" over a shifting channel in the dry season, and has a very strong current (in some places seven miles an hour) during the rains. Distant N.W. from Calcutta, by water, 810 miles; by land, 503. Lat. $25^{\circ} 26'$, long. $81^{\circ} 58'$.

JHOOSHARA JHOLE, in Gurhwal, a village on the left bank of the Bhagerottee, as the Ganges is called in the upper part of its course. The river, here about thirty yards wide, is traversed by a bridge made of ropes, with a footway of rude wicker-work. Jhooshara is in lat. $30^{\circ} 43'$, long. $78^{\circ} 29'$.

JHOREGA.—A town in the British district of Candehi, presidency of Bombay, 12 miles N.E. of Malligaum. Lat. $20^{\circ} 40'$, long. $74^{\circ} 40'$.

JHOWANU, in the Rajpoot territory of Alwur, under the political superintendence of the Governor-General's agent for Rajpootana, a village 40 miles S.W. of Delhi. Lat. $28^{\circ} 10'$, long. $76^{\circ} 54'$.

JHOWLYE.—A town in the Rajpoot state of Jeypoor, situate on the left bank of the Bangunga river, and 20 miles E. by N. from Jeypoor. Lat. 27° , long. $76^{\circ} 15'$.

JHUGERPOOR.—A town in the native state of Rygurb, on the south-west frontier of Bengal, 62 miles N.W. from Sumbulpoor, and 124 miles S.W. from Lohadugga. Lat. $22^{\circ} 10'$, long. $83^{\circ} 25'$.

JHUGGEE.—A town of Sinde, in the British district of Hydrabad, presidency of Bombay, 58 miles S.E. of Tatta. Lat. 24° , long. $68^{\circ} 25'$.

JHUJHUR, with **DADREE**.—A native state within the Delhi agency, and subject to the jurisdiction of the lieut.-gov. of the N.W. Provinces. It is bounded on the north by the British districts of Hurriana and Rohtak; on the east by Delhi, Goorgaon, and Alwur; on the south by Goorgaon and the territory of the Alwur rajah; and on the west by Shekawutty and the pergunnah of Loharoo. It lies between lat. $27^{\circ} 55'$ — $28^{\circ} 55'$, long. $75^{\circ} 55'$ — $76^{\circ} 58'$, and has an area of about 1,230 square miles. The general elevation of the country may be estimated at 820 to 840 feet above the level of the sea, as, in the rainy season, it is pervaded by numerous watercourses having a very slight declivity, and which, about thirty miles to the eastward of the territory, discharge themselves into the Jumna, by a channel close to the north side of the city of Delhi, at an elevation of 800 feet. The south-western part is intersected by numerous low rocky ranges, like those of the adjacent territory of Patun. The jaghire is traversed from north to south by the military route from Hansee to Nusseerabad and Neemuch, and from west to east by the route leading from the town of Dadree to that of Jhujhur. The principal places are Jhujhur, Narot, Dojana, Dadree, and Kanound. The annual revenue is estimated at 60,000*l*. The nawwab maintains a military force of about 3,000 men, and is bound to furnish 400 cavalry when demanded by the British government. The jaghire being well managed, is in a prosperous condition. If the population be estimated at ninety to the square mile, the average of the adjacent district of Hurriana, it will amount to 110,700. This jaghire was assigned by Lord

Lake to Nijabut Ally Khan, of the Bburaites family, in consequence of his services against the Mahrattas, from whom it was taken; and in 1806 the grant was confirmed in perpetuity by the Governor-General. Fyze Ally Khan, the present nawaub, grandson of the original grantee, succeeded in 1835.

JHUJHUR, the principal place of the jaghire of the same name, and the residence of the nawaub, lies on the route from Hansee to Muttra, by Goorgaon, and 60 miles S.E. of the former place. At the close of the last century, it was by the Mahrattas assigned, with some other places, to the adventurer George Thomas, in reward of his services, and was for some time the capital of his short-lived state. Distant W. from Delhi 35 miles. Lat. $28^{\circ} 37'$, long. $76^{\circ} 43'$.

JHULLAEE, or **JELLAH**, in the native state of Jeypore, in Rajpootana, a town on the route from Nusserabad to Gwalior, 82 miles E. of former, 160 W. of latter. It is of considerable size, is fortified, and water and supplies are abundant. Lat. $26^{\circ} 8'$, long. $76^{\circ} 10'$.

JHUPHAR.—A town in the British district of Tirhoot, lieutenant-gov. of Bengal, 47 miles N.N.E. of Dinapore. Lat. $26^{\circ} 12'$, long. $85^{\circ} 29'$.

JHURRIE.—A river rising in the British district of Goruckpoor, lieutenant-gov. of the N.W. Provinces, about 18 miles N. of the town of Pudrownan, and in about lat. $27^{\circ} 5'$, long. $84^{\circ} 3'$. "Its source is a channel about thirty yards wide, and sunk very deep. In February the stream might be twenty feet wide, knee-deep, and not rapid." After a course of about six miles, it joins a branch of the Gunduk, and the united streams flow southerly for thirty miles, when, below and east of Pudrownan, they again separate. The Jhurrie takes a southerly course for thirty-six miles, when it crosses over into the British district Sarun, through which it flows in the same direction for about twenty miles. It then forms for ten miles the boundary between the two districts of Goruckpoor and Sarun, after which, passing into the latter, and continuing to flow southward through it for twenty-eight miles, it falls into the Ghaghra on the left side, in lat. 26° , long. $84^{\circ} 11'$, having a total course of 130 miles. At Hosipoor, in lat. $26^{\circ} 24'$, long. $84^{\circ} 12'$, it is crossed by the route from Dinapore to Goruckpoor, and is there so considerable that the passage must be made by a temporary bridge.

JHUSDUM.—A town in Guzerat, or the dominions of the Guicowar, situate on the right bank of the Bhader river, and 30 miles E.S.E. from Rajkote. Lat. $22^{\circ} 5'$, long. $71^{\circ} 15'$.

JIGAT.—See **DWARKA**.

JIGNEE, in Bundelcund, a town near the right bank of the river Dassaun, is the principal place of the jaghire or feudal grant of the same name, held from the East-India Company, under the political superintendence of the lieutenant-governor of the N.W. Provinces. The

jaghire is estimated to contain twenty-seven square miles, with a population of 2,800. Its revenue is estimated at 1,500*l.* per annum. The jaghiendar maintains nineteen horse and fifty-one foot. In 1840, the mal-administration of the jaghire having become intolerable, managers responsible to the British authorities were appointed. Jignee is 33 miles S.W. of Calpee. Lat. $25^{\circ} 45'$, long. $79^{\circ} 28'$.

JILLBERAH, in Sirhind, a village on the route from Kurnal to Patiala, and 45 miles N.W. of the former town. It is situate in a level country, which, though fertile, is imperfectly cultivated and overrun with jungle. The road lies westward of the trunk line from Calcutta, and notwithstanding the even surface of the country, is bad, and scarcely practicable for guns or carriages. Distant N.W. from Calcutta 1,010 miles. Lat. $30^{\circ} 12'$, long. $76^{\circ} 40'$.

JILLING SIRRING.—A town in the British district of Chota Nagpoor, lieutenant-gov. of Bengal, 71 miles E. by S. of Lohadugga. Lat. $23^{\circ} 11'$, long. $85^{\circ} 51'$.

JIMPOOR, in Sinde, a village near the route from Kurrachee to Hyderabad, and 32 miles S.W. of the latter place. It is situate in the Doab, or tract between the Irak and Rodh rivers, and five miles N.W. of the *Dund*, or small lake of Kunjur, into which they discharge themselves. Lat. $24^{\circ} 57'$, long. $68^{\circ} 4'$.

JIMRU RIVER.—The name of a considerable feeder of the Raptée river, rising in lat. $28^{\circ} 46'$, long. $82^{\circ} 10'$, and, flowing through Nepal in a southerly direction for eighty miles, falls into the Raptée, in lat. $28^{\circ} 2'$, long. $81^{\circ} 54'$.

JINDALA, in the Reechna Doob division of the Punjab, a town situated twenty-two miles from the right bank of the Ravee, and 26 miles N.W. of the town of Lahore. Lat. $31^{\circ} 49'$, long. $73^{\circ} 46'$.

JINGERGATCHEA.—A town in the British district of Jessore, lieutenant-gov. of Bengal, 54 miles N.E. of Calcutta. Lat. $23^{\circ} 4'$, long. $89^{\circ} 6'$.

JINJEERA, on the coast of Bombay, a district and harbour, sometimes called the Harbour of Rajapoor, from the town of that name situate on the northern point of land forming the entrance of the harbour. "This is an excellent harbour, without any bar, having from four to five fathoms in the entrance, and the same depths inside, at low water, where there is shelter from all winds." Off the mainland is the fortified island of Jinjeera, formerly regarded as a place of high importance. During the existence of the Mussulman monarchy of Beejapoor, it was the principal depot of the maritime force of the Seedee or African admiral of that state, who held his dignity on condition of maintaining a fleet for the protection of commerce, and conveying pilgrims to the Red Sea. After the rise of the power of the Mahrattas, it was attacked repeatedly, but in vain,

by Sevajee. On one occasion, the garrison revolted, and placed the fort in the hands of Aurungzebe. Rajapoor, on the mainland, had previously been taken by the Mahrattas. In 1682, Sambajee, son of Sevajee, besieged the island, which he attempted to connect by means of a mole with the mainland; but the project failed, and in other attempted modes of attack, the assailants were repulsed with great loss. On the decline of the realm of Delhi, the Seedee or chief of Jinjeera assumed independence, which he and his successors maintained more or less effectually, and the petty power still exists, under the protection of the East-India Company. The Jinjeera principality lies between lat. 18° and $18^{\circ} 32'$, and its revenues are computed at 17,500*l*. The title Seedee or Hubshee is one given in India to Abyssinians, and hence the territory is designated that of the "Hubsies."

JINJINEALLA.—A town in the Rajpoot native state of Jessulmeer, 43 miles S. by W. from Jessulmeer, and 148 miles W. from Jodhpoor. Lat. $26^{\circ} 16'$, long. $70^{\circ} 48'$.

JINKIPUDDA.—A town in the Cuttack mahal of Mohurbunge, 84 miles N.E. by N. from Cuttack, and 30 miles W. from Balasore. Lat. $21^{\circ} 32'$, long. $86^{\circ} 33'$.

JINSI, in the territory of Gwalior, a village on the route from Gwalior to Saugor, six miles S.E. of the Residency. Here, before the reduction of the military force of Gwalior, was located the Mahratta artillery, well known for the number and excellence of their guns and the skill with which they were served. Lat. $26^{\circ} 11'$, long. $78^{\circ} 10'$.

JINTEA.—A town in the British district of Dinajepoor, lieut.-gov. of Bengal, 17 miles N. by E. of Dinajepoor. Lat. $25^{\circ} 48'$, long. $88^{\circ} 42'$.

JINTOOR.—A town in Hyderabad, or dominions of the Nizam, situate 135 miles E. by N. from Ahmednuggur, and 121 miles S.W. by S. from Ellichpoo. Lat. $19^{\circ} 39'$, long. $76^{\circ} 43'$.

JIRAMEYEE, in the British district of Mynpooree, lieut.-gov. of the N.W. Provinces, a village on the route from the city of Agra to the cantonment of Mynpooree, and seven miles W. of the latter. Lat. $27^{\circ} 14'$, long. $79^{\circ} 1'$.

JITHAREE.—A town of Bhopal, 82 miles E. from Bhopal, and 87 miles W. from Jubbulpoor. Lat. $23^{\circ} 14'$, long. $78^{\circ} 40'$.

JOA, in the Punjab, a large and flourishing town in the Salt range, about 50 miles E. of the Indus. Here are said to be satisfactory indications of the existence of good coal. Lat. $32^{\circ} 50'$, long. $72^{\circ} 33'$.

JOAGUR.—A town in Hyderabad, or dominions of the Nizam, 81 miles W. from Hyderabad, and 111 miles E.N.E. from Beekaneer. Lat. $17^{\circ} 23'$, long. $77^{\circ} 20'$.

JOAR, or **JUWAR**, in the British district

of Allygurb, lieut.-gov. of the N.W. Provinces, a town on the route from the cantonment of Allygurb to that of Muttra, and 24 miles S.W. of the former. It has a bazar. Joar was plundered in 1805, by the Patan freebooter Ameer Khan, during his inroad into the Doab. Lat. $27^{\circ} 36'$, long. $77^{\circ} 58'$.

JOBNEER, in the Rajpoot state of Jey-poor, a town on the route from Delhi to Nusseerabad, 177 miles S.W. of former, 66 N.E. of latter. It has a bazar, and supplies and water are abundant. Lat. $26^{\circ} 56'$, long. $75^{\circ} 28'$.

JOBUT.—A town of Malwa, situate under the Vindhya Mountains, 23 miles S. from Jabboah. Lat. $22^{\circ} 25'$, long. $74^{\circ} 40'$. The petty Bheel state of which this town is the principal place yields a revenue of about 10,000 rupees, or 1,000*l*., per annum. Upon the demise of its chief, a few years since, without direct heirs, it was proposed that the state should lapse to the paramount power. Subsequently, however, a new grant was issued by the British government, recognising a native successor to the vacant throne.

JODHPOOR.—See **JOUDPORE**.

JODKA, in the British district of Bhutteeana, lieut.-gov. of the N.W. Provinces, a village on the route from Hansee to Bhutnee, and 57 miles N.W. of the former. It is a poor place, being ill supplied in every respect, not excepting even water. Lat. $29^{\circ} 30'$, long. $75^{\circ} 12'$.

JOGHEEGURH, or **JOOGA**, in the territory of Gwalior, or possessions of Scindia's family, a fort on a small island in the river Nerbudda. Here is a rapid, precluding navigation during the season of low water, but allowing the passage of boats during the periodical rains. Lat. $22^{\circ} 20'$, long. $76^{\circ} 46'$.

JOGIGOPA.—A town of Eastern India, in the British district of Goalpara, lieut.-gov. of Bengal, six miles N.W. of Goalpara. Lat. $26^{\circ} 13'$, long. $90^{\circ} 35'$.

JOGI RIDAN, in the Daman division of the Punjab, a town situated 33 miles from the right bank of the Indus, 110 miles N.W. of the town of Mooltan. Lat. $31^{\circ} 19'$, long. $70^{\circ} 14'$.

JOGLIO.—A town in the Rajpoot state of Beekaneer, 72 miles E. from Beekaneer, and 100 miles N. from Ajmeer. Lat. $27^{\circ} 54'$, long. $74^{\circ} 32'$.

JOHANABAD, in the native state of Gwalior, or possessions of Scindia's family, a town situate on the left bank of the Taptee, and 79 miles W. from Ellichpoo. Lat. $21^{\circ} 16'$, long. $76^{\circ} 22'$.

JOHILA, a river a tributary of the Sone, rises, according to native accounts, from a swampy, jungly tract near the famous shrine of Ummurkuntuk, and about lat. $22^{\circ} 45'$, long. $81^{\circ} 50'$. According to report, the Nerbudda, Sone, and Johila rise near each other; the Nor-

budda from the kund or pool of Ummurkuntuk, the Sone three or four miles further east, and the Johila about the same distance north. The Hindoo story runs, that the titular deity of the Sone, a male divinity, became enamoured of the Nerbudda, a female, whose handmaiden Johila attempting to personate her mistress in an interview with the lover, was so severely chastised by the enraged Naiad, that she melted into tears, whence ever since the stream Johila has continued to flow. It holds a course north-west for ninety miles, to the northern frontier of the district, towards the territory of Rewa, in lat. $23^{\circ} 20'$, long. $81^{\circ} 4'$, and a few miles further turns north-east, and falls into the Sone on the left side, in lat. $23^{\circ} 39'$, long. $81^{\circ} 19'$.

JOMBEE.—A town in the hill zemindarry of Jeypoor, territory of Madras, 24 miles E.N.E. from Jeypoor, and 86 miles N.W. by N. from Vizianagrum. Lat. $19^{\circ} 9'$, long. $82^{\circ} 47'$.

JONGAR.—A town in the native state of Bhotan, 70 miles N. from Goalpara, and 91 miles N.W. from Gowhatty. Lat. $27^{\circ} 8'$, long. $90^{\circ} 50'$.

JONKUR. in the territory of Gwalior, or possessions of Scindia, a town of Malwa, on the route from Goonah to Mow, 129 miles S.W. of former, 56 N.E. of latter. It has a bazar, and water is plentiful. It is the principal place of a small pergunnah of the Oojein district. Population about 3,000. Lat. $23^{\circ} 14'$, long. $76^{\circ} 13'$.

JOOLAPOOR. in the British district of Saharunpoor, lieut.-gov. of the N.W. Provinces, a town with a population of 12,162, and the chief place of the pergunnah of the same name, situate in lat. $29^{\circ} 55'$, long. $78^{\circ} 19'$.

JOOBUL.—A protected hill state in the southern or lower Himalayas. Inclusive of Ootrah or Turoch, with which it has been incorporated, this state is bounded on the north by Poondur, a detached district of Keonthul, and Bussahir; on the east by Bussahir and Gurwhal, the Pabur separating it from the former, and the Tonse from the latter; on the south by Sirmour; and on the west by Sirmour and Bulsun. It lies between lat. $30^{\circ} 48'$ — $31^{\circ} 6'$, long. $77^{\circ} 32'$ — $77^{\circ} 54'$: it is stated to have an area of 330 square miles. Its northern part lies in the extensive valley of the Pabur, along the right bank of that river; its southern is comprised within the valley of the Shalwee, a tributary of the Tonse. The valley of the Pabur is described by Jacquemont as one of the most delightful tracts he had ever seen, especially that subdivision in which Deohra, the residence of the rana, is situate. The elevation of Joobul in general is very considerable. That of the great peak of Chur, at the south-western frontier, is 12,149 feet; that of Urrukta, in the north, above 10,000. The elevation of the bed of the Pabur at Raingarh, on the north-eastern frontier, is 4,932 feet.

The people of Joobul are said to be distinguished by beauty of person, and some of the natives are nearly as fair as Europeans. The dress of the men consists of a pair of loose trousers, of thick striped woollen stuff; a sort of capote of similar stuff, reaching to the knees, and girt tight round the waist, but having many folds from the hip downwards; a cotton scarf, a shaggy flat woollen cap, and shoes of a sort of close network or twill of woollen thread, with a leather sole. Women appear in public without reserve, but are treated with little kindness or delicacy by their male relatives, who make no scruple in selling them. Mundy relates, that at Deohra "an instance of this was afforded to Lord Combermere's party, a very pretty girl being brought to the camp, and offered for sale, at the moderate price of 150 rupees; more than which sum," adds the writer, "I have seen given for a Scotch terrier at Calcutta." The religion of the people is Brahminism; the language a dialect of the Hindes. The population is believed to amount to about 15,000. The revenue is estimated at 14,136 rupees, or 1,413*l*. The military force consists of 300 infantry. The rana, or ruler, a descendant of a Rajpoot family, was restored to power by the British on the expulsion of the Goorkhas, in 1815. By the same authority, he was excluded in 1833, and an annual pecuniary provision assigned to him, which he, however, pertinaciously refused to accept. On his death in 1840, the raj was restored to his son, an infant. During his minority the territory continued under British management, but upon attaining mature age in 1854, the young chief was placed in possession of his estate. The only places of importance in Joobul are the fort of Chepal and Deohra, the residence of the rana.

JOOGA.—See JOGHEEGURU.

JOOGUL.—A town in the Southern Marhatta jaghiredaree of Sberbal, 58 miles N. by E. from Belgaum, and 84 miles S.E. by S. from Sattera. Lat. $16^{\circ} 39'$, long. $74^{\circ} 45'$.

JOOLKAPOOR.—A town in the British district of Midnapoor, lieut.-gov. of Bengal, 58 miles W.S.W. of Calcutta. Lat. $22^{\circ} 12'$, long. $87^{\circ} 29'$.

JOONAGHUR. in the peninsula of Kattywar, province of Guzerat, a town in the district of Sorath, surrounded by a rampart about five miles in circumference, with numerous massive square towers and crenellated parapet, and is situate advantageously on a ridge of sandstone. Within the rampart, and in the north-east of the area inclosed by it, is the citadel, the ground-plan of which is an irregular trapezium of very great size. The huge rampart of hewn stone is on the outside, strengthened by a deep and wide ditch, hewn in the solid rock. The town is ill built, with narrow filthy streets; and not more than half of the space inclosed within the walls is occupied. There is no appearance of commerce,

or of the prosperity resulting therefrom. The palace of the nawaub is an insignificant building, situate in one of the bazars. The population of the town is variously estimated at 5,000, 20,000, and 30,000. The chief, a Musulman, styled the Nawaub of Joonaghur, holds territory comprising 506 villages, and is joint proprietor of thirty-nine more; the whole estimated to contain a population of about 284,300. He pays annually a tribute of 3,065*l.* to the East-India Company, and 3,700*l.* to the Guicowar. Distance from Ahmedabad, S.W., 170 miles; Baroda, S.W., 180; Surat, W., 150; Bombay, N.W., 235. Lat. 21° 31', long. 70° 31'.

JOONA NUGGUR.—A name sometimes given to the town of Sirgogah, which see.

JOONEER.—A town in the British district of Poonah, presidency of Bombay, 70 miles E. by N. of Bombay. Considerable improvements were effected in the streets and approaches of this place, by means of a grant of money sanctioned by the government for the purpose in 1841. Lat. 19° 14', long. 73° 56'.

JOONGAR, on the south-west frontier of Bengal, a town in the native state of Nowagudda, 143 miles S.W. from Sumbulpoor, and 77 miles N. from Jeypoor. Lat. 20° 9', long. 82° 20'.

JOONJOOWARRA.—A town in Guzerat, or the dominions of the Guicowar, situate on the Runn of Cutch, and 73 miles S.W. by S. from Deesa. Lat. 23° 20', long. 71° 32'.

JOONNAGUDDA, on the south-west frontier of Bengal, a town in the native state of Calahandy, 125 miles N. by W. from Vizianagrum, and 144 miles W. by N. from Ganjam. Lat. 19° 51', long. 83°.

JOONUNGHEE.—A town in the native state of Cutch, situate 15 miles S. from the Great Western Runn of Cutch, and 59 miles W.N.W. from Bhooj. Lat. 23° 33', long. 68° 51'.

JOORA, in the British district of Furruckabad, lieut.-gov. of the N.W. Provinces, a village on the route from the cantonment of Allygurh to that of Futteghurh, and 38 miles W. of the latter. Lat. 27° 30', long. 79° 7'.

JOORIA, in the peninsula of Kattywar, province of Guzerat, a seaport on the south-eastern coast of the Gulf of Cutch. Opposite are several sandbanks, and the water off this part of the coast is too shoaly for ships of any considerable burthen. There is a tradition, most probably little trustworthy, that, not much more than 200 years ago, a footpath at low water completely crossed the gulf from this place to the opposite coast of Cutch. Though not admitting large vessels, this place has a considerable trade. Distance from Ahmedabad, W., 145 miles; Baroda, W., 180; Surat, N.W., 190; Bombay, N.W., 300. Lat. 22° 40', long. 70° 22'.

JOOTA, in the Rajpoot state of Joudpore, a village on the route from Nusseerabad to

Deesa, and 60 miles S.W. of the former. It has a bazar, and is abundantly supplied with water from a tank and wells. Lat. 26°; long. 74° 8'.

JOOTAH, in the British district of Futtehpore, lieut.-gov. of the N.W. Provinces, a village on the route from Allahabad to the town of Futtehpore, and 35 miles S.E. of the latter. Lat. 25° 45', long. 81° 20'.

JORAEI, in the Rajpoot state of Joudpore, a village on the route from Balmer to the town of Joudpore, and 12 miles N.E. of the former. It contains sixty houses. Lat. 25° 54', long. 71° 39'.

JOREHAUT.—A town in the British district of Seebpoor, province of Assam, 31 miles S.W. by W. of Seebpoor. Lat. 26° 47', long. 94° 12'.

JOSHIMATH, in Kumaon, a town a mile below the confluence of the Bishenganga and Doules or Leti, which united, form the Aluknunda. The town is situate on the left bank of the Aluknunda, in a hollow recess, and on a declivity, being sheltered on every side by a circular ridge, and especially to the north, where a high mountain intercepts the cold blasts rushing from the Himalaya, rising in that direction. The entrance to the town is up a bank cut into steps faced with slate or stone, with both which materials the streets also are paved, but very irregularly. The houses are neatly built of grey stone, and roofed with shingles. Amongst them is the residence of the rawal or high-priest of Bhadrinath, who lives here for the six months during which the approaches to the elevated temple that he serves are buried under snow. The building containing the idol Nara Singha is more like a private residence than a Hindoo temple. It is built with gable-ends, and covered in with a sloping roof of plates of copper. Pilgrims halting here, put up in a large square, having a stone cistern, supplied by two brazen spouts, which yield a never-failing flow of water, derived from a stream descending from the Himalaya. A collection of temples, bearing marks of great antiquity, extend along one side of the square, being ranged along a terrace about ten feet high. In the centre of the area is a temple sacred to Vishnu, surrounded by a wall thirty feet square. Several of those temples are much dilapidated, having been partially overthrown by earthquakes. The temples of Vishnu, Ganesa, Surya or the Sun, and the Nadevi, have suffered least. The statue of Vishnu is of black stone, in a very superior style of workmanship. It is about seven feet high, and is supported by four female figures, standing on a flat pedestal. The image of Ganesa is two feet high, well carved, and polished. In the town is a line of water-mills, placed one below the other, at intervals of fifteen or twenty yards, and turned by one stream, which, flowing from the mountain above, is supplied to them in succession by a communication through troughs of hollowed

trunks of firs. Joshimath is situate on the route from Hindoostan to Chinese Tartary, through the Niti Pass, and also on that by the Mana Pass. The town contains 119 houses, of which twenty-one belong to Brahmins, fourteen to merchants, sixty-eight to cultivators, and the rest to other classes. Elevation above the sea 6,185 feet. Lat. $30^{\circ} 33'$, long. $79^{\circ} 37'$.

JOTEPOOR, on the south-west frontier of Bengal, a town in the Cuttack mehal of Keunjur, situate on the left bank of the Byeturnee river, and 95 miles N. from Cuttack. Lat. $21^{\circ} 49'$, long. $85^{\circ} 48'$.

JOUDPOOR.—A town of Bundelcund, in the native state of Punnah, 50 miles S.S.W. from Punnah, and 64 miles N. from Jubbulpore. Lat. $24^{\circ} 5'$, long. $79^{\circ} 58'$.

JOUDPORE, or **MARWAR**, the most extensive of the Rajpoot states, is bounded on the north-west by Jessulnere; on the north by Bikanere and Shikhawuttee; on the east by Jeypore, Kishengurh, Ajmeer, and Mewar; on the south by Oodeypoor and Serohee, and the Guicowar's dominions; and on the west by the Runn of Cutch and Sind. It is 330 miles in length from south-west to north-east, and 160 in breadth in the direction of the opposite angles. It lies between lat. $24^{\circ} 36'$ — $27^{\circ} 40'$, long. $70^{\circ} 4'$ — $75^{\circ} 23'$, and has an area of 35,672 square miles. The most marked feature in the physical aspect of the country is the river Lonce, which, rising on the eastern frontier near Pokur, takes a south-westerly course, nearly bisecting the territory, and forming the boundary between the fertile and sterile tracts; the former lying along the south-eastern or left bank, the latter along the north-western. The western part, bordering on the great desert of Scinde, is, throughout, a mere desolate waste. Eastward of this are numerous long ranges of rocky hills, dividing the Great from the Little Desert, which occupies the right bank of the Lonce, and runs up north-eastward between the city of Joudpore and Pokhurn. The Little Desert appears to be covered with sandhills nearly throughout, though low rocks show themselves on each flank towards Joudpore and Mundor on the east, and Pokhurn and Phulodi on the west. On the eastern frontier, the country swells upwards to the Aravulli range, which rises boldly to the height of between 3,000 and 4,000 feet above the level of the sea. The whole of the south part of Joudpore, about Sachor, Jalor, and Siwana, exhibits a succession of rocky hills; the eastern parts, about Pali Ninaj and Merta, are less stony, and there is much arable ground between Balotra and the capital, as well as on the north-east frontier. On the southern frontier are occasional appearances of rocks, generally regarded as volcanic by geologists. Stewart states porphyry to be the prevailing, if not the only rock in that region; "which near the town of Nuggur Parkur rises in a range of lofty hills to the

height of 1,000 feet, assuming, in its rugged features, a regularity equally singular as picturesque."

The climate is very hot in summer, but cold, healthy, and bracing in winter, when severe frosts sometimes occur. Throughout the western part, the generally sandy nature of the country renders the air dry and healthy at all times, so that it is a common native proverb, that neither mud, mosquitoes, nor malaria are to be found in those regions. The case is different towards the south-east, where the Lonce occasionally rolls along with a great body of water, and the country is cut up by numerous torrents, which eventually discharge themselves into that river. There is consequently much swamp in that region during the rains, and Joudpore, the capital, itself is then considered unhealthy. Salt abounds in this territory, large quantities being extracted from the waters of the Sambhur Lake, about twelve miles long and five broad, situate on the north-east frontier. Salt is also extracted at Deedwana, 110 miles north-east of Joudpore; at Puchibudra, sixty miles south-west of that place; and at Phulowdee, seventy miles north-west of it. Boileau considers that the numerous rocky hills in the east and south of this country contain various metals, as the range which passes into Ajmeer from the northward contains lead, iron, copper, and silver; but these promising deposits do not appear to have been worked in Joudpore. There are very fine quarries of white marble at Mukrana, 120 miles north-east of the town of Joudpore, which is itself built on a hill of a hard red freestone, of excellent quality as a building material. The calcareous conglomerate called kankar is abundant in many districts, and burned to make lime for mortar; tin and lead are found at Sojot, alum about Pali, and iron is obtained from the districts adjoining Guzerat. Cotton is cultivated to a considerable extent, but is a precarious crop, being sometimes totally destroyed by frost, as happened during Tod's visit, when every pod was nipped, the cold being so severe as partially to freeze the water in his bags. The districts along the base of the Aravulli being watered by the numerous small streams which flow down from that range, produce every kind of grain except bajra, which thrives best in a sandy soil. On an average for the whole country, the majority of the inhabitants are supported on bajra or moth. The emperor Shir Shah meeting with some reverses during his invasion of the country in the year 1544, declared that he had nearly lost the empire of India for a handful of millet, alluding to the poverty and low produce of Joudpore.

The zoology is neither rich nor varied. The banks of the Lonce are in places infested by lions and leopards, and tigers have been discovered in some dense and secluded jungles; there are, towards Cutch, wolves, hyænas, jackals, and three kinds of foxes: nylgauas, antelopes, and wild asses roam about the southern frontier towards Sind. According

to the account given by Macmurdo, who shot several, the wild ass "is an inhabitant of the salt wastes, so common in the desert, but frequents the cultivated country in the cold season, and does considerable damage to the crops. The wild ass is thirteen hands high; has a back, neck, and body of a light-brown colour, with a belly approximating to white. He has the dark stripe down the back in common with all dun animals. His ears are long, like those of the domestic ass; but his limbs are strong and well formed. His voice is a bray, but is so fine as to resemble that of a frightened deer. The animal is gregarious, being generally seen in herds, from ten to fifty; he is, however, occasionally found singly and in pairs." His food consists of the saline grasses and shrubs of the desert, and he is never seen in bad condition: he prefers brackish water to fresh. The flesh of this animal is said to afford tolerable food. Snakes are so common, that in some places the people are obliged to protect themselves against them by means of thick leggings or gaiters. Camels and horses are bred in great numbers, and fetch good prices. The kine of Nagor are highly celebrated; a pair broken in for draught are worth from sixty to ninety rupees. Great numbers of sheep graze in the wilder tracts of the country, and their fleeces are in large quantities converted into coarse cloths and blankets. Coarse cottons are also manufactured for home consumption. Matchlocks, swords, and other warlike instruments, are fabricated at Joudpore, at Nagor, and at Pali; at which latter places are made tuned boxes of iron, resembling those of Europe. Joudpore is famous for ivory-turning, as well as for ornamental manufactures in leather and glass; and all ordinary works in iron and brass are produced at Nagor. Iron platters, especially, are made in great numbers.

The Jats, a very ancient race, scattered over the great tract extending on the east of the Indus, from the Himalaya to the ocean, were probably the aboriginal population of this country, and still constitute five-eighths of the number of its inhabitants; two eighths more being Rajpoots of the Rahtor tribe, and the remainder Brahmins or Jains. The Charuns, a tribe of Rajpoots, have among their countrymen unbounded influence, discharging the sacerdotal office, as well as the duties of chroniclers. There is a general impression, that certain and sweeping ruin results from shedding their blood or that of their families, or in being instrumental to its being shed. Hence their influence; and they lose no opportunity of warning their children not to scruple sacrificing their lives, should the measure be necessary for maintaining the claims of their order. Trusting to such influence, one of this class generally becomes the safeguard of travellers dreading the attacks of Rajpoot freebooters. Should robbers approach, he warns them off by holding a dagger in his hand, and if they disregard him, he wounds himself, and throws his blood to-

wards them, denouncing woe and ruin in the most terrific language which he can command. If this have not the desired effect, the operation of wounding himself is repeated with increased severity. In extreme cases, one of the Charun's relatives, often either an aged or an infant female, is put to death, and sometimes the principal actor himself commits suicide, in which he is imitated by his wives and children. Something of similar character to the Charuns, but inferior in pretension and influence, are the Bhats, or bards of the community, whose power is exercised by means of satirical songs, pictures, and effigies. The population, estimated at the rate of fifty to the square mile, which is believed to be tolerably correct, would amount to 1,783,600. All classes in Joudpore are inordinately addicted to opium. They are fit for nothing until they take it, and after its effects have passed, are little better than idiots, until the dose be repeated. Indulgence in this baneful habit is more necessary to the Rajpoot than his food, and to eat opium together is the most inviolable pledge. The burning of women on the funeral-pile of their deceased husbands was formerly frightfully prevalent. In 1728, six queens, and fifty-eight women of inferior position, were burned with the dead body of Maharaja Ajit Sinb. Even at a very recent period, the atrocious practice had not become extinct, as, in 1844, the efforts of the British government to prevent the sacrifice in this way of six lives, on occasion of a deceased rajah's funeral, were unavailing. Happily, however, by the perseverance and well-timed suggestions of the British resident, the maharaja has at length been prevailed upon to prohibit the barbarous rite, and the necessary proclamation has been issued. The language spoken in Joudpore is a peculiar patois, called Marwari, considered to have an affinity to Hinduee. Some attention appears to be paid to education, there being, it is said, in the town of Joudpore, above 100 schools for the children of the humbler orders.

The ruler of Joudpore is styled Maharaja. The constitution, if the name can well be given to such an irregular political machine, is feudal, and the authority of the maharaja is checked by the counteracting power of a number of refractory thakors or chiefs, by whom the greater part of the country is held, on condition of military service, the feudatory being bound to furnish troops in proportion to his estate; but as some of the estates have been exempted from this burden, and the value of others falls greatly below the sums at which they have been estimated, the number of troops has diminished; and it is believed that the maharaja cannot rely upon mustering more than 2,000 men from this source, instead of upwards of 4,000, which the estimates would seem to warrant. The present military establishment consists, first, of the Joudpore legion, in lieu of the Joudpore contingent, amounting to 254 cavalry, 739 infantry, thirty one artillery and Bheel companies, 222 strong, in all

1,246; and, secondly, of about 5,850 infantry and 2,680 cavalry, at the disposal of the Joudpore state; in addition to what the feudatories maintain. The present amount of revenue is 175,252*l*. Salt is a fertile source of income. According to Tod's account, "this productive branch of industry still employs thousands of hands, and hundreds of thousands of oxen, and is almost entirely in the hands of that singular race of beings called Brinjarries, some of whose tandas or caravans amount to 40,000 head of oxen. The salt is exported to every region of Hindostan, from the Indus to the Ganges, and is universally known and sold under the title of Sambhur Loon, or salt of Sambhur; notwithstanding the quality of the different lakes varies, that of Pachbadra, beyond the Loni, being the most esteemed. It is produced by natural evaporation, expedited by dividing the surface into pans, by means of mats of the sirkunda grass, which lessens the superficial agitation. It is then gathered and heaped up into immense masses, on whose summit they burn a variety of alkaline plants, by which it becomes impervious to the weather." By the author just quoted, the other sources of revenue are stated to be buttae, or corn-rent; angah, or poll-tax; gasmali, or tax on cattle; kewari, or tax on doors; saycr, or commercial imposts. The state pays to the British government an annual tribute of 108,000 rupees, and a contribution towards the expense of the Joudpore legion, amounting to 115,000 rupees. The former payment was originally made to Scindia, on whose account it is still collected by the British government, and applied by that government to the maintenance of Scindia's contingent. The Rajpoot dynasty of Joudpore is supposed to have been established about the year 1212, by Seoji or Sivaji, son of the last Hindoo king of Kannouj, who perished in 1194, on the conquest of his capital by Shahab-ud-din, or Mohammed of Ghor, the subverter of the Ghaznevide empire in India. In 1459, Jodha, the maharaja of Marwar, removed the seat of government from Mundor to Joudpore, a fort and residence which he had built a few miles to the south. About 1569, Akber made himself master of the greater part of the state of Joudpore, which he conferred on Udi Sinh, the son of the late maharaja, whom he had expelled. The power of Udi Sinh was subsequently strengthened by the marriage of his sister to Akber. About the year 1680, Aurungzebe, in one of his ineffectual attempts to enforce the observances of Mahomedanism, attacked and pillaged Joudpore, and most of the other towns in Marwar; defaced and desecrated the Hindoo temples, many of which were totally demolished; erected mosques on their sites, and compulsorily inflicted the outward mark of Islam on such Rajpoots as fell into his power. The yoke of the emperor of Delhi was, however, soon thrown off; but, for upwards of a century, the country was distracted by anarchy and a series of petty wars, till the conclusion of a treaty, ratified in the

beginning of 1818, between the maharaja of Joudpore and the British government. For several years subsequently to the conclusion of the treaty, there was little communication between the British government and Joudpore; but a series of disturbances commenced in 1824, which called for interposition, and the unsatisfactory nature of the arrangement then made, having led to their revival in 1828, when a pretender to the throne received the support of a large body of chiefs, eventually led to further interference, to the extent of a requisition from the British government to the pretender for the withdrawal of his claims. In 1829, Appa Sahib, the perfidious ex-rajah of Nagpore, having been expelled from Bikanere, sought refuge in Joudpore, the ruler of which country was required by the British government to give him up, or at least to cause his departure in a given direction. Great reluctance was manifested towards complying with this demand, and it was withdrawn, on condition that the rajah of Joudpore should be responsible for the safe custody and peaceable conduct of Appa Sahib, so long as he should remain in the country. This act of considerate regard to the alleged feelings of Rajpoot hospitality was, as usual, very indifferently requited. The chief of Joudpore suffered his tribute to fall into arrear; supplied the stipulated military assistance reluctantly and tardily, protected plunderers, and was believed to have entered into political correspondence having objects hostile to British interests and influence in India. These acts of misconduct were submitted to with great forbearance for a long period, during which the misgovernment and distraction of the country were extreme; and at length, from all these causes, it was deemed necessary to instruct Colonel Sutherland to proceed to Joudpore and demand reparation. His mission proving ineffectual, a body of troops was moved to enforce that which negotiation had failed to achieve. Their approach alarmed the rajah, who forthwith displayed tokens of submission. The immediate consequences were, the establishment of a council of regency, with a British agent at its head, to carry on the government in conjunction with the rajah, and the reception of a British garrison within his fortress. A variety of useful reforms followed. The rajah died a few years after the commencement of the system which led to these beneficial steps, but they were pursued under his successor Tukht Singh, of Admednuggur, who was elected to the vacant throne by the thakooras. Under the administration of this prince, various reforms have been effected; among the chief of which must be reckoned, as already noticed, the abolition of suttee.

JOUPORE, the capital of the Rajpoot state of the same name, is situate at the north-eastern edge of a cultivated but woody plain, which, farther south, passes into the low tract fertilized by the river Loni and its feeders. Its site is striking, being at the southern extremity

of a ridge or rock twenty-five miles in length, between two and three in breadth, and rising between 300 and 400 feet above the average level of the plain. The city, inclosed by a rampart five miles in circuit, is built on an irregular surface, sloping upwards towards the base of the rock surmounted by the citadel, the view from which is thus described by Boileau :—"A bird's-eye view of the city from the summit of the upper fort is really magnificent. Perched upon a parapet of the bastion, encircling the pointed pagoda at the southern extremity of the citadel, we gazed with delight upon the fair scene at our feet. The whole of the city lies close to the rock on which the palace stands, surrounding its east, south, and west sides, the north side being occupied by a hilly neck, connecting the citadel with the Mundor range, and too much broken to afford good building-ground. The lively green of the trees, and the quantity of fine white plaster applied to the red stone houses, afforded a pleasing variety of colours, and gave the city a gay look. The numerous tanks, now filled with water; the white ramparts, running along the higher parts of the city; the piles of buildings crowded upon each other, and rising tier above tier to the Chandpol gate; and the confused mass of outworks on the west side of the citadel, formed a scene that will not soon be forgotten." On a closer inspection, however, the streets are said by this writer to have been found irregular and ill laid out, the houses mean and badly constructed, the place being inferior in this respect to the other capitals of Rajpootana, but containing some fine temples, especially the Pasbunka Mandir. Tod gives a different and more favourable account. "The streets," he says, "are very regular, and adorned with many handsome edifices of free-stone." There are several tanks within the walls. The Pudum Sagur, in the north-western part of the city, is excavated in rock, but is of small dimensions; the Rani Sagur, in the same quarter, is at the foot of the western entrance into the citadel, with which it is connected by low outworks, placing it under the thorough command of the garrison, for whose exclusive use it is reserved, except an extreme emergency requires it to be thrown open to the citizens. The Goolab Sagur, on the east, is of great extent, and finely built of stone throughout. The Bai-ka-talao, recently built, is also extensive, and receives several conduits, conveying the water of many distant torrents. Yet, in long-continued droughts, all fail, except the Rani Sagur. There are above thirty wells of the kind called baoli, in which access is obtained to the water by means of steps: in some of these, the water is carried up to the surface by human labour or by the Persian wheel, though the depth in many instances exceeds forty feet. The Persian wheel is even used in the Tonr-jee-ka-Jhabra, where the depth, from the mouth above to the surface of the water, exceeds ninety feet, the depth of the water itself being also ninety feet. This fine well is

cut in the solid rock, and, by the time-worn appearance of the carving in the interior, bears evidence of great antiquity. It is of immense size at the surface of the ground, and of square shape. On three sides, flights of steps lead down to the water, but the fourth side is perpendicular, to allow the working of the Persian wheel. The water is good, and never fails.

The wall about the town was, at Boileau's visit, in 1835, in a very bad state, and in many places some yards of the parapet, and even of the rampart, had fallen down so completely as to allow free passage between the interior and exterior; and on the south side, the sand had in one place drifted to within a few inches of the crest of the parapet. Two steeply-scarped masses of rock, 80 or 100 feet high, form part of the line of defence on the east side of the city, and are crowned with walls and towers on their outer faces. In the whole circuit there are 101 bastions and 70 gates, each bearing the name of the place to which it leads. The fortifications of the town are continuous with those of the citadel, which is, however, divided from it by a rampart on the brow of the ascent, and generally 370 feet above the plain. The elevation at the north-east angle is 382 feet; and the scarp wall, which covers the great gate there, has a sheer face of hewn stone 109 feet high. Other parts of the wall appear to be still higher. These defences are well built of stone quarried from the subjacent rock. In some places, however, the ramparts and bastions are weak and ill-constructed, and would be almost contemptible, but for the stiff section of the rocks on which they are erected. The main entrance is on the north. The road passing through it is practicable for heavy guns; and the access covered by six successive gateways, besides the inner one, opening immediately into the maharaja's palace. The road over the hilly ridge extending northward from the citadel, is practicable for heavy artillery; and the place could not long hold out against an attack conducted according to the rules of European warfare. The whole citadel is 500 yards long, and about half that breadth. The royal palace and buildings attached are situate at the north end, and occupy two-fifths of the area; an equal space is occupied by magazines, granaries, and other public buildings, and the remainder is empty. There are five reservoirs of water within the citadel, but in ordinary times the principal supply is derived from the Rani Sagur. The palace overtops all other buildings, and its highest part is 454 feet above the plain. The state apartments present little to excite admiration, being inferior to those of the humbler ruler of Bikaner. The most remarkable is the chamber of audience, styled "the thousand-columned hall," a vast apartment, the ceiling of which is supported by a great number of massive columns of no great height, arranged in parallel rows, about twelve feet asunder.

Outside the city, and distant a cannon-shot from the north-east angle, is the large suburb,

deriving its name of Mahamandir, or "the great temple," from a building within it, which confers the right of sanctuary on its inclosure and environs. It constitutes a distinct town of 1,000 houses, with 112 shops, inclosed by a thin stone wall a mile and a quarter in circuit, having a few weak bastions, but without any parapet, unless that name can be given to battlements three feet high and five or six inches thick. The area is an irregular quadrangle, having a gateway in each of its faces. The temple above mentioned is surmounted by a spire, conspicuous from afar by the brilliant lime-wash with which it is covered. The interior is richly decorated, and the sacred shrine of the tutelary saint is placed under a canopy of silver, in the form of an umbrella. There is a tank, supplied with water brought from a distance by conduits. A baoli, eighty feet deep, has an inexhaustible supply of good water. A flight of steps reaches to the water's edge, and three Persian wheels raise and discharge no inconsiderable stream for irrigation and domestic purposes. The inclosure of the Mahamandir contains two palaces, one of which is inhabited by the maharaja's gooroo or spiritual adviser, who lives in great state; the other palace has no living occupant, being reserved by native superstition as the residence of the spirit of the last deceased gooroo, whose bed is laid out in one of the state-chambers, with a small golden canopy over the pillow. Five miles north of Joudpore are the striking ruins of Mandor, which was the capital of Marwar previously to the foundation of the present capital by Maharaja Jodha or Joda, in 1459. Hence the name of the town, and also of the eminence of its site, which is called Jodhagir, or "the warrior's hill." A mile and a quarter west of the town are handsome gardens, with a fine tank named Ukhe Rajka Talao, described by Boileau as "a magnificent sheet of water, clear, deep, and extensive, resembling rather a natural lake than an artificial tank." Two or three miles north of this, is Bal Sumundur, a small but beautiful lake, half a mile long and about 200 yards wide, with craggy banks of red sandstone, feathered with picturesque shrubs, and bordered by a fine pleasure-ground, abounding in towering palm-trees. Two miles north of the city, and between the two last-mentioned pieces of water, is the Sur-Sagor, an immense tank, on the southern embankment of which stands the Motimahall, or Pearl Palace, a beautiful building of white marble, from the flat roof of which is a fine view of the citadel. According to the estimate of Boileau, Joudpore city, citadel, and suburbs, contain 30,000 houses, which, at the usually-received average of five persons to each house, makes the population 150,000; an amount scarcely credible. Boileau elsewhere states the amount of the population at 129,150, which reduced number is, however, probably excessive. Tod says, "The number of families some years ago, stated to be 20,000, probably 80,000" — an estimate far too great for the

present day." Joudpore is distant W. from Calcutta 1,128 miles; S.W. from Delhi, by Nusseerabad, 358 miles. Lat. $26^{\circ} 19'$, long. $73^{\circ} 8'$.

JOUNPOOR, under the Lieut.-gov. of the N.W. Provinces, a British district, named from its principal town. It is bounded on the north-west by the territory of Oude; on the north-east by the British district Azimgurh; on the east by the British district Ghazee-pore; and on the south by the British districts Benares and Allahabad. It lies between lat. $25^{\circ} 22'$ — $26^{\circ} 12'$, long. $82^{\circ} 12'$ — $83^{\circ} 10'$; is sixty miles in length from east to west, fifty-five in breadth, and embraces an area of 1,552 square miles. It is a remarkably level tract, with a gentle declivity, probably not exceeding on the average, six inches per mile, from north-west to south-east, as indicated by the course of its numerous streams flowing in that direction. The south-eastern extremity is about 260 feet above the sea; and probably the elevation of no part exceeds 300 feet. The principal rivers are the Goomtee and the Sai. The population was ascertained by census in 1853 to amount to 1,143,749, being at the rate of 737 to the square mile—a high average. Of the above number, 821,163 were returned as Hindoos and agricultural, 210,425 Hindoos non-agricultural, 43,348 Mahomedans and others not Hindoos, but employed in agricultural pursuits, and 68,813 persons not being Hindoos, devoted to other occupations. It thus appears that the preponderance of Hindoos in this district is overwhelming, the disciples of that creed being more than fifteen times as numerous as the followers of all other religions. The numbers of the agricultural class exceed those of the non-agricultural in the proportion of nearly three to one. The townships, villages, &c., are thus arranged according to population:—

Number of towns and villages containing less than 1,000 inhabitants.....	2,861
Ditto more than 1,000 and less than 5,000....	178
Ditto " 5,000 " 10,000....	2
Ditto " 10,000 " 50,000....	1
Total.....	3,042

With the exception of Jounpore, the towns are unimportant; those most requiring notice,—Singra or Sangrampur, Mureahu, Muchlishahr, Badshahpur, Zafarabad, and Ghissooa, as well as the capital,—will be found in their proper places in the alphabetical arrangement.

The tract comprised within this district was probably first reduced under Mussulman sway by Muhammad Shahabuddin, the Patan ruler of Ghor, who is recorded to have, at the close of the twelfth century, conquered Eastern India as far as the confines of China. During the confusion caused by the invasion of India by Timur, near the end of the fourteenth century, or perhaps something earlier, Jounpore, with some adjacent tracts, was acquired by an officer of the padshah of Delhi. The Purebi Sherki, or Eastern dynasty, thus

founded, was of no long duration, being overthrown in 1478, by Behlul Lodi, the Afghan padshah of Delhi, who reannexed Jounpoor to the empire, and made it an appanage of his son Barbik Khan. In 1527, it passed from the Afghans to the victorious Baber, being conquered by his son Humayon, acting under his orders. On the dissolution of the Timurian empire of Delhi, consequent on the invasion by Ahmed Shah Durani in 1760, it formed part of the spoil seized and retained by the nawaub vizier of Oude. In 1764, a firman or grant of this, among other districts, was made by Shah Alum, titular padshah of Delhi, to the East-India Company, who, by the treaty of Allahabad, relinquished to the nawaub vizier the claim thus founded, as well as the military occupancy established by the victory gained at Buxar in the preceding year. In 1775, it was ceded by the nawaub vizier to the East-India Company, and embodied with the dominions of that power. In the Ayeeen Akbery, its military contingent is stated at about 915 cavalry and 36,000 infantry, and its revenue at 14,09,853 rupees.

JOUNPOOR.—The principal place of the British district of the same name, a city on the banks of the river Goomtee, here navigable, and generally unfordable. The river divides the city into two unequal parts, the greater on the left, the less on the right bank; and the communication is by means of an antique bridge, considered one of the finest specimens of architectural skill in India, but which, from the diminutive span of its arches, would scarcely be noticed in Europe. The roadway passes from the left or north-eastern bank, over ten arches, called, collectively, the great bridge, to an island in the channel, and, proceeding over it, is thence continued by the lesser bridge of five arches and a land arch, to the right side. A native writer enumerates the spans of the arches and the breadth of the piers of the greater bridge. It is constructed of stone, so well cemented, that it is comparatively unimpaired, though nearly three centuries old, during which period it has resisted the floods, which sometimes sweep over it in such volume, that, in 1774, a fleet of boats conveying a British army, with a numerous train of baggage, camp-followers, and attendant animals, were borne down the stream, right across the line of roadway, without any impediment from the submerged structure. The building is said to have been commenced in the year 1564, and completed in three years, by Fahim, a freed man of Munim Khan, an officer high in the confidence of Akbar: the cost is reported to have amounted to 300,000*l*. The fort, situate on the bank of the river, is a vast massive stone structure, the ground-plan of which is an oblong quadrangle, half a mile in circuit. It is said to have been built A.D. 1370, by Feroz Shah Toghluk, Patan sovereign of Delhi, who named it after his cousin and predecessor on the throne. According to Lord

Valentia, there is a gateway in the wall of the castle, "ornamented with mosaic-work of different-coloured varnished tiles. It has been beautiful. The courts are extensive and the verandas on the walls command a very pleasing prospect, particularly on one side, which overhangs the river and the bridge; beyond which are the ruins of the different tombs, raising their cupolas among palms and tamarind-trees. The distant country is rich in cultivation, and well clothed with wood.' The fort has been used as a prison. On the east of the town is a large mosque, in very bad repair, but noble even in ruin. It is described by Tieffenthaler as a splendid structure of red stone, with three lofty domes, and a fore-court, surrounded by colonnades. It is stated to be fifty ells high, and adorned with elaborate and tasteful workmanship. A view given of it by Daniell confirms this favourable description. Adjoining it is another mosque of similar character; and the whole town and its vicinity abound in striking ruins of mosques, palaces, and other memorials of its ancient magnificence, confirmatory of the account given by Khairuddin of the grandeur of this capital. The military cantonment is at the eastern extremity of the town, and on the left bank of the river. The civil establishment here consists of the usual European and native functionaries. The population of the town is returned at 27,160. Distant N.W. from Benares 35 miles, N.E. from Allahabad 36*½*. Lat. 25° 44', long. 82° 44'.

JOUNT GURHEE, in native Gurwhal, a fort on a summit three miles east of the river Jumna. It was formerly occupied by the Goorkhas, and hither, in 1814, during the Nepal war, Bhulbudur Singh, one of their commanders, retreated, after having evacuated Kalunja, and subsequently been put to flight by Major Ludlow. He was attacked here by Major Baldock, in command of 600 regular and 400 irregular troops, whom, however, he repulsed, and then succeeded in making good his passage across the Jumna to Jaitak. Lat. 30° 36', long. 78° 9'.

JOURASEE, in the British district of Saharunpore, lieutenant-gov. of the N.W. Provinces, the principal place in the pergunnah so called, and from which its name is derived. Lat. 29° 49', long. 78°.

JOWAH.—A village of the British district of Hurreana, lieutenant-gov. of the N.W. Provinces. Lat. 29° 26', long. 75° 50'.

JOWAUR.—A town in the British district of Tannah, presidency of Bombay, 63 miles N.N.E. of Bombay. Lat. 19° 51', long. 73° 14'.

JOWLA.—A town in Hyderabad, or dominions of the Nizam, 94 miles E. of Poonah. Lat. 18° 33', long. 75° 20'.

JOWNSAR.—See JAUNSAR.

JOWRA, in Malwa, a town on the route from N. much to Mhow, 61 miles S. of the

former, and 94 N.W. of the latter. It is situate on the small river Piria, and has abundant supplies for troops. The river is unfordable during the rains, and is traversed by a bridge handsomely and solidly built of a porphyritic stone. The territory of which this town is the principal place lies between lat. $23^{\circ} 32' - 24^{\circ} 10'$, long. $74^{\circ} 53' - 75^{\circ} 35'$. It has an area of 872 square miles, and belongs to a Patan chief, styled Nawaub of Jowra, the representative of Ghuffoor Khan, to whom, in 1818, the jaghire was secured by the British government, under the treaty of Mondesoor, concluded with Holkar, on condition that the nawaub and his heirs should maintain, independent of the sebundy (armed police) for his pergunnahs, and his personal attendants, in constant readiness for service, a body of 600 select horse; and further, that this quota of troops should be thereafter increased, in proportion to the increasing revenue of the districts granted him. The number of troops, inclusive of the sebundy, in the service of the nawaub, is 850; his annual revenue, in 1848, was 8,00,000 rupees; the population of the territory, including the jaghires of dependants, 85,456. The town, according to Malcolm, in 1820, contained 3,551 inhabitants; but Jacquemont, in 1832, estimated their number at 10,000 or 12,000. It is distant N.W. from Oojain 53 miles, S.W. from Gwalior 260. Elevation above the sea 1,437 feet. Lat. $23^{\circ} 38'$, long. $75^{\circ} 5'$.

JOYNUGGUR.—A town in the British district of Dacca - Jelalpoor, lieutenant-gov. of Bengal, 101 miles N.E. of Calcutta. Lat. $23^{\circ} 29'$, long. $89^{\circ} 41'$.

JUALDINNE.—A town in the British district of Nellore, presidency of Madras, 117 miles N. by W. of Madras. Lat. $14^{\circ} 47'$, long. $80^{\circ} 8'$.

JUBBOOGAUM.—A town in the native state of Rajppeepla, territory of Bombay, 36 miles N.E. from Surat, and 115 miles S.S.E. from Ahmedabad. Lat. $21^{\circ} 28'$, long. $73^{\circ} 18'$.

JUBBULPOOR, within the British territory of Saugor and Nerbudda, a town on the route from Allahabad to Nagpore, 222 miles S.W. of the former, 156 N.E. of the latter. It is the principal place of the district of the same name, and is situate at the base of a rocky hill, about a mile from the right bank of the Nerbudda, fordable in that place in the season of low water, when it is three feet deep, with a width of about 300. It is a large, well-built, and thriving place, in consequence of its favourable position in a populous and highly-cultivated country. Around it are several small lakes and tanks, which in the rainy season are so swollen as greatly to strengthen it as a military position. Here is a small cantonment of British troops, belonging to the Saugor division, also a political agency subsidiary to that of Saugor. The small collegiate establishment formerly existing in the town was abolished in 1850. It has been succeeded

by a school of industry, which has been brought to a state of great efficiency, and the advantages of which have been extended beyond the classes for whose benefit it was originally established. Here, on December 19th, 1817, a British force of 1,100 men, commanded by General Hardyman, defeated 5,000 Mahrattas, the troops of the rajah of Nagpore. The Mahrattas suffered severe loss, and the survivors fled precipitately, abandoning the town, nine pieces of ordnance, and a large quantity of military stores. The loss on the side of the British was only two killed and ten wounded.

The country in the vicinity of Jubbulpoor is highly interesting to the geologist, on account of the variety of its formations. The range of hills overlooking the town is granite, of several kinds; and every formation subordinate to granite is to be found in this neighbourhood, including gneiss, hornblende, schistose rock, dolomite. In a limestone range near the town of Jubbulpoor, are deposits of fossil bones, and about fifteen miles farther west are others still more extensive, including remains of the elephant, or other gigantic quadrupeds. Excellent coal is found in some parts of the pergunnah. The district, of which this town is the chief place, contains an area of 6,237 square miles, and a population of 442,771, which affords an average density of seventy-one to the square mile. Elevation above the sea 1,458 feet. Distant S.E. from Saugor 111 miles; S.W. from Allahabad 222; W. from Calcutta, by Allahabad, 718; S.E. from Agra, by Saugor, 383; N.E. from Nagpore 156. Lat. $23^{\circ} 10'$, long. $80^{\circ} 1'$.

JUBLING.—A town in the native state of Nepal, situate three miles from the left bank of the Dud Coosy river, and 72 miles E. from Khatmandoo. Lat. $27^{\circ} 40'$, long. $86^{\circ} 28'$.

JUCKOO.—A town in the native state of Cutch, 62 miles W. from Bhooj, and 113 miles S.S.E. from Tatta. Lat. $23^{\circ} 15'$, long. $68^{\circ} 46'$.

JUDDENGY.—A town in the British district of Rajahmundry, presidency of Madras, 32 miles N. of Samulkottah. Lat. $17^{\circ} 30'$, long. $82^{\circ} 12'$.

JUFFERGUNJE, in the British district of Dacca-Jelalpoor, lieutenant-gov. of Bengal, a town at the confluence of the Jubuna with the Ganges, forming a stream described by Heber as not less than four miles wide during the rainy season. Distance from the town of Furreedpore, N., 20 miles; Calcutta, N.E., 120. Lat. $23^{\circ} 52'$, long. $89^{\circ} 48'$.

JUGADREE, in Sirhind, a town on the route from Saharunpoor to Loodiana, and 24 miles N.W. of the former place. It is a populous, thriving town, with a good bazar and a plentiful supply of water. Distance N.W. of Calcutta 983 miles. Lat. $30^{\circ} 10'$, long. $77^{\circ} 22'$.

JUGDEESPORE, in the British district of Shahabad, lieutenant-gov. of Bengal, a town 17 miles N.W. of the north-west or left bank of the

river Son. It is the principal place of the pergunnah of Belowtee. The number of houses in Jugdespoor is estimated at 1,000, an amount which, according to the usual average of the number of inmates, would assign it a population of 5,000. Lat. $25^{\circ} 27'$, long. $84^{\circ} 28'$.

JUGDESPORE.—See JUSHPORE.

JUGDISPOOR, in the territory of Oude, a town on the route from Lucknow cantonment to Pertabgurh, 60 miles S.E. of the former, 45 N.W. of the latter. It has a large bazar, and is well supplied with water. The road in this part of the route is good, and passes through a jungly country, with occasional patches of cultivation. Lat. $26^{\circ} 29'$, long. $81^{\circ} 40'$.

JUGDISPOOR.—See ISLAMNUGUR.

JUGDULAPOUR.—See JUGDULAPOOR.

JUGDULAPOOR, or **BUSTUR**.—A town in the British district of Nagpoor, late dominions of the rajah of Berar, situate in the district of Bustur, 35 miles W.N.W. from the hill zemindary of Jeypoor, and 230 miles S.E. from Nagpoor. Lat. $19^{\circ} 13'$, long. $81^{\circ} 58'$.

JUGGANA.—A town in the hill zemindary of Jeypoor, 21 miles N.E. by N. from Jeypoor, and 97 miles N.W. by N. from Vizianagram. Lat. $19^{\circ} 16'$, long. $82^{\circ} 39'$.

JUGGERNATH DIGGY.—A town in the British district of Bulloah, lieutenant-gov. of Bengal, 192 miles E. by N. of Calcutta. Lat. $23^{\circ} 9'$, long. $91^{\circ} 21'$.

JUGGOO.—See AMHERST ISLAND.

JUGGURNATH, or **POOREE**, in the British district of Cuttack, presidency of Bengal, a town distinguished in India as one of the strongholds of Hindoo superstition, and deriving its celebrity from its connection with the famous temple of the same name. The town is situate on the north-western shore of the Bay of Bengal, in that part called the Coast of Orissa. The surf here is very violent, so that landing can be effected only by means of Masula boats, similar to those used on the Coromandel coast. During the south-west monsoon, a refreshing sea-breeze blows with little intermission, rendering the climate in the hot season one of the most agreeable and healthful in India. The beach has been selected as the site for the British military station. The town itself is to the south-west of the station, and on a low ridge of sandhills, to which an attempt has been made to give a factitious grandeur, by styling it Neilgherry, or Blue Mountain. "Every span of it is holy ground; and the whole of the land is held free of rent, on the tenure of performing certain services in and about the temple. The principal street is composed almost entirely of the religious establishments called Maths, built of masonry, having low pillared verandas in front, and plantations of trees interspersed. Being very wide, with the temple rising majestically at the southern end, it presents by no means

an unpicturesque appearance; but the filth and stench, the swarms of religious mendicants, and other nauseous objects which offend one's senses in every part of the town, quite dispel any illusion which the scene might otherwise possess. Fine luxuriant groves and gardens inclose the town on the land side, and produce the best fruit in the province." In the vicinity are many fine tanks, considered of great antiquity; and among the sands, between the sea and the south-west face of the town, are numerous ancient and curious-looking edifices, now nearly overwhelmed with sand. The temple of Juggurnauth stands within a square area, inclosed by a lofty stone wall, measuring 650 feet on a side. The inclosure is entered on the east by a grand gateway, from which a broad flight of steps gives access to a terrace twenty feet in height, inclosed by a second wall, 445 feet square. From this platform the great pagoda rises, from a base thirty feet square, to the height of about 180 feet from the platform, or 200 from the ground, tapering from bottom to top, not in the form of a cone, but rounded off in the upper part with an outline approaching to the parabola. The present edifice appears to have been completed in the year 1198, at a cost of nearly half a million sterling. Most of the Hindoo deities have temples within the inclosure; and of those, two, besides the great pagoda, are peculiarly remarkable when viewed from sea, being described as "three large circular buildings, surrounded by several smaller ones: they are of a conical form, decreasing in diameter from their bases to their summits, which are crowned with white domes, and an ornamental globe or urn and wind-vane. The westernmost pagoda is the largest, and the eastern one the smallest of the three." The eastern gate is flanked by griffins and other mythological figures, and in front stands a column of dark-coloured basalt, and of very light and elegant proportions, surmounted by a figure of the monkey-god Hanuman. This temple is dedicated to Krishna, considered as an avatar or incarnation of Vishnu, but is also held in joint tenancy by Balarama, identified with Siva or Mahadeo, and Subhadra, regarded as his sister and also his consort in Hindoo mythology. Krishna is, however, the principal object of worship, and from his title Juggurnauth the great temple is denominated. The three idols, intended to represent those three characters respectively, are three blocks of wood, each surmounted by a frightfully grim representation of the human countenance, the block, with the head, measuring about six feet in height. The block representing Krishna is painted dark blue, that representing Siva white, and Subhadra's yellow. Each is provided with a rath or rude chariot, being a sort of lofty platform mounted on wheels. That of Juggurnauth is $43\frac{1}{2}$ feet high, $34\frac{1}{2}$ feet square, and is mounted on sixteen wheels, each $6\frac{1}{2}$ feet in diameter. The raths of the two other idols are of dimensions somewhat less. "The grand

festival occurs in the month of March, when the moon is of a certain age, after the sun has entered Aries;" and at the *Rath Jatra*, as this festival is denominated, the idols are taken on their raths to visit their country-house, about a mile and half distant. Thousands of men, women, and children, draw them along by means of cables fastened to the raths, and Brahmins stationed on the platforms sing and repeat obscene stories, accompanied by appropriately foul gestures, hailed by the multitudes with sounds and movements expressive of applause. Formerly, wretched fanatics offered up their lives in honour of the idols, by throwing themselves down before the moving wheels, which of course crushed them to death; but those horrible deeds have for some time ceased.

The British obtained possession of the place and temple in October, 1803; previously to which occupation, a tax had been levied by the *Mahrattas* upon the pilgrims resorting thither. This produced a very large sum, out of which a small one was assigned to defray the expenses of the temple. The priests made application to the British commissioner for the usual donation, which was at once granted; but the continuance of the pilgrim-tax was not contemplated. The priests, however, were anxious that the tax should be continued, inasmuch as the government might become tired of making a considerable donation at its own cost, while an accession of revenue from the temple would, it was thought, render the contribution to the priests more secure. The wish of these holy persons was complied with; the government donation was withdrawn, and the collection of money for the support of the temple permitted in substitution. In 1806 a change took place. The government took the superintendence of the temple upon itself, and laid down the most minute arrangements for its management. The pilgrim-tax thus became a regular source of revenue to the state. The measure was proposed before the retirement of the Marquis Wellesley, but he refused it his sanction. Sir George Barlow had no scruple on the subject, and under him the proposal became law; not, however, without a strong protest against it from one member of council, Mr. Udney. At home it was disapproved by the Court of Directors; but the president of the Board, Mr. Dundas, took a different view, and through his influence a despatch was framed, to the effect, that as the tax on pilgrims had been levied under *Mahomedan* and *Mahratta* governments, there did not appear any objection to its continuance under the British government. In 1839, under the administration of Lord Auckland, the subject came again under notice, when the tax was abolished, the expenses of the temple fixed at a certain sum, and a donation ordered to be paid from the public treasury, to make up the amount supposed to be required, and for which no other available means of providing existed. This donation somewhat exceeded \$0,000 rupees. Subsequently, more careful

inquiry was made, and the allowance was fixed at 23,000 rupees. This arrangement, however, was deemed objectionable, inasmuch as it did not disconnect the government from idolatrous worship. To effect this object, orders were recently sent out directing, as a final measure, that government should withdraw altogether from the temple, leaving it to be supported by its own resources, but making such compensation, if necessary, as should suffice to place the establishment in as good a pecuniary position as it enjoyed when the country passed into the hands of the British. According to a statement published a short time since, its condition in this respect is indeed much better. The pilgrim-tax, it may be mentioned, has never ceased, it having been collected by the native authorities after it was relinquished by the government. It is a circumstance for congratulation, that the government has thus purged itself from a foul scandal, which lowered its character and impaired its usefulness.

Here, over a branch of the *Mahanuddy*, is an antique stone bridge, having eighteen waterways, not arched above, but traversed by "laying horizontal tiers of stone on the piers, the one projecting slightly beyond the other, in the manner of inverted stairs, until they approach near enough at top to sustain a key-stone or cross-beam." According to official report, the town of *Juggurnauth* or *Pooree* contains 5,741 houses, which, if the usually-received ratio of five inmates to each house be applicable, would indicate a population of 29,705. Distance from Madras, N.E., 595 miles; Cuttack, S., 47; Nagpore, E., 450; Calcutta, S.W., 250. Lat. 19° 49', long. 85° 53'.

JUGGUTPOOR, in the British district of *Etawa*, lieutenant-gov. of the N.W. Provinces, a village on the route from the cantonment of *Etawa* to *Calpee*, and 30 miles S.E. of the former. Lat. 26° 31', long. 79° 28'.

JUGRAON, in *Sirhind*, a town eleven miles from the left bank of the *Sutlej*. It is situate in the British district of *Loodiana*. Distance N.W. from *Calcutta*, by *Loodiana*, 1,124 miles. Lat. 30° 47', long. 75° 31'.

JUGUR.—A town in the native state of *Bhotan*, 96 miles N. from *Goalpara*, and 138 miles E. by N. from *Darjeeling*. Lat. 27° 31', long. 90° 28'.

JUGURNATHPOOR.—A town in the British district of *Behar*, lieutenant-gov. of *Bengal*, 23 miles E. of *Sherghotty*. Lat. 24° 36', long. 85° 12'.

JUGUTPOOR.—A town in the territory of *Oude*, 60 miles S.S.E. from *Lucknow*, and 80 miles E. by N. from *Futteeipoor*. Lat. 26° 4', long. 81° 20'.

JUHANABAD.—A town on the left bank of the *Ganges*, in the British district *Bijnour*, lieutenant-gov. of the N.W. Provinces. Lat. 29° 15', long. 78° 11'.

JUHANABAD, in the British district of

Allahabad, lieut.-gov. of the N.W. Provinces, a town on the left bank of the Ganges, 839 miles from Calcutta by the river, and 30 miles above the town of Allahabad. Lat. 25° 36', long. 81° 40'.

JUHANABAD, the principal place of the pergunnah Juhanabad, in the British district Bareilly, and from the pergunnah deriving its name, is situate in lat. 28° 38', long. 79° 47'.

JUHANGIRABAD, in the British district of Boolundshuhur, lieut.-gov. of the N.W. Provinces, on the route from Bareilly to Delhi, and 63 miles S.E. of the latter, is described by Thörn as an extensive town, surrounded by a high wall. Its population is returned at 10,247. Supplies and water are abundant. Lat. 28° 24', long. 78° 10'.

JUHANGIRPUR, in the British district of Boolundshuhur, lieut.-gov. of the N.W. Provinces, a town on the route, by way of Chandaos, from Allygurh to Delhi, and 45 miles S.E. of the latter. Lat. 28° 11', long. 77° 46'.

JUJJA, in Bhawalpoor, a town on the route from Khanpoor to Mittunkote, and 10 miles N.W. of the former place. It is situate about ten miles from the left bank of the Indus, in the alluvial tract extensively laid under water during the inundation of that river. It contains forty shops, a number which, according to the proportion usually found in such Indian towns, would indicate a population of about 600. Lat. 28° 46', long. 70° 39'.

JUJURI, or **JUGROG**, in Hindoor, a fort on the lofty and steep ridge bearing in a south-easterly direction from the left bank of the Sutlej to the base of the Himalaya. At the commencement of the Goorkha war, it was, in the course of the operations preparatory to the investment of Malown, surrendered to the British, by whom it was subsequently dismantled. Lat. 31° 7', long. 76° 51'.

JUKTIAL.—A town in Hyderabad, or dominions of the Nizam, situate 108 miles N. by E. from Hyderabad, and 160 miles S. by W. from Nagpoor. Lat. 18° 52', long. 78° 58'.

JULAL, a river of Sirmour, rises near the south-western frontier, about lat. 30° 45', long. 77° 16'. It is a clear and brisk stream, holding its way through a picturesque country of hill and dale, displaying occasionally considerable cultivation. After a course of about twenty miles in a south-easterly direction, the Julal falls into the Girree, on the right side, in lat. 30° 38', long. 77° 30'.

JULALABAD, in the British district of Furruckabad, lieut.-gov. of the N.W. Provinces, a town on the route from Cawnpoor to Futtehgurh, and 23 miles S. of the latter. It has a small bazar. Lat. 27° 6', long. 79° 51'.

JULALABAD.—The principal place of a pergunnah of the same name, in the British

district of Meerut, lieut.-gov. of the N.W. Provinces, a town on the route from Paneeput to Boolundshuhur, 32 miles N.W. by N. of the latter. Lat. 28° 46', long. 77° 38'.

JULALÉE, the principal place of the pergunnah of the same name, lies on the route from Allyghur cantonment to Bareilly, by Khasgurj, and is 13 miles S.E. of the former. It has a bazar, with a market, and is abundantly supplied with water from wells. Lat. 27° 52', long. 78° 19'.

JULALPOOR, in the Jetch Doaab division of the Punjab, a town situated six miles from the right bank of the Chenaub, 73 N. of the town of Lahore. Lat. 32° 40', long. 74° 10'.

JULALPOOR.—See **JETALPOOR**.

JULALPOOR.—The principal place of the pergunnah of the same name, a town on the route from Banda to Calpee, 48 miles N.W. of the former. It is situate on the right or south-east bank of the river Betwa, which here has "bed 550, and stream in the dry season 180 yards; bottom, sand and gravel; usual depth of water, two and a half feet; right bank steep. Some small ferry-boats at this ghat in the rains." It is probably a place of some importance, represented to have "some hundred large brick houses," and a population estimated by intelligent natives at 10,000. The neighbouring country, to the south, is rather wild and sterile, being much cut up by ravines. Lat. 25° 52', long. 79° 52'.

JULDROOG.—A town in Hyderabad, or dominions of the Nizam, situate 133 miles E. by N. of Belgaum. Lat. 16° 14', long. 76° 30'.

JULEYSUR, in the British district of Muttra, lieut.-gov. of the N.W. Provinces, a town on the route from Muttra to Furruckabad, 39 miles E. of the former. Its population amounts to 15,613 inhabitants. Lat. 27° 29', long. 78° 23'.

JULGAUM.—A town in the British district of Candeish, presidency of Bombay, 147 miles N.E. of Bombay. Lat. 20° 24', long. 74° 30'.

JULINDER DOOAB.—A tract of country in Upper India, lying, as the word Doaab implies, between two rivers, which, in this case, are the Beas and the Sutlej. It is situate between lat. 30° 57'—32° 5', long. 75° 4'—76° 38', and contains an area of about 374 square miles. It came into British possession during the earlier operations against the Seikhs, and was permanently retained as a portion of the British territory, under the third article of the treaty of Lahore, concluded on the 9th March, 1846, whereby the maharaja of the Punjab ceded to the East-India Company, "in perpetual sovereignty, all his forts, territories and rights in the dooab or country, hill and plain, situate between the rivers Beas and Sutlej." The tract is fertile, and the climate agreeable. Soon after this district came into the hands of the English, some disturbances occurred between the beef-

consuming part of the population and those who adhered to a simpler diet, caused by the opening of shops for the gratification of the former. They were, however, speedily suppressed, and quiet restored.

JULINDER, in the Punjab, the chief place of the Doaab, a considerable town near the right bank of the Sutluj, was once the residence of the Lodi-Afghan dynasty. It is situate in a tract of great richness, amidst flourishing orchards of mangoes and other trees. The vast number of large and finely-built mausoleums which are around, bear evidence of its former greatness. It has still a population of about 40,000. Lat. 31° 21', long. 75° 31'.

JULKAR, in Gurwhal, a feeder of the Bhagerettee river. It rises in lat. 30° 35', long. 78° 38', and, flowing southerly for about twenty miles, falls into the Bhagerettee, in lat. 30° 28', long. 78° 29'.

JULLAH, in the Jetch Doaab division of the Punjab, a town situated nine miles from the right bank of the Chenaub river, 81 N.W. by W. of the town of Lahore. Lat. 32° 12', long. 72° 59'.

JULLALPOOR, in the British district of Banda, lieutenant-gov. of the N.W. Provinces, a town on the right bank of the Jumna, 27 miles N.E. of the town of Banda, 55 W. of Allahabad. Lat. 25° 40', long. 80° 45'.

JULLALPOOR, in the Baree Doaab division of the Punjab, a town situated seven miles from the right bank of the Ghara river, 43 miles S. by W. of the town of Mooltan. Lat. 29° 31', long. 71° 22'.

JULLAREE, in the Baree Doaab division of the Punjab, a town situated on the left bank of the Ravee river, 39 miles N.E. of the town of Mooltan. Lat. 30° 29', long. 71° 59'.

JULLAWGOTE, in Sinde, a village on the route from Sehwan to Larkhana, and 14 miles N. of the former town. It is situate on the right bank of a great watercourse filled by the inundation of the Indus, and a mile and a quarter from the main channel. Lat. 26° 37', long. 67° 55'.

JULLMOOR.—A town in the British district of Ganjam, presidency of Madras, 92 miles S.W. of Ganjam. Lat. 18° 31', long. 84° 4'.

JULLUT, in the British district of Kumaon, lieutenant-gov. of the N.W. Provinces, a village on the route up the course on the river Goree, and by the Unta Dhura Pass, from Almora fort to Hiundes or South-western Tibet, 93 miles S.E. of Almora. It is situate near the right bank of the river Goree. Lat. 30° 5', long. 80° 17'.

JULOWLEE, in the British district of Furruckabad, lieutenant-gov. of the N.W. Provinces, a village on the route from the cantonment of Cawnpore to that of Futtehgurh, and 85 miles S. of the latter. Lat. 27°, long. 80°.

JULUPGURH, in the British district of Mozuffernuggur, lieutenant-gov. of the N.W. Provinces, a village on the route from Kurnal to

Meerut, and 15 miles S.E. of the former. Lat. 29° 34', long. 77° 13'.

JUMALGURH, in the British district of Saharanpoor, lieutenant-gov. of the N.W. Provinces, a town the chief place of the pergunnah bearing the same name, is situate in lat. 29° 54', long. 77° 20'.

JUMALPOOR, in the British district of Allyghur, lieutenant-gov. of the N.W. Provinces, a village on the route from the cantonment of Allyghur to that of Moradabad, and one and a quarter mile N.E. of the former. Lat. 27° 57', long. 78° 6'.

JUMALPOOR, in the British district of Allyghur, lieutenant-gov. of the N.W. Provinces, a village on the route by Khasgani from Bareilly to Allyghur cantonment, and 10 miles S.E. of the latter. Lat. 27° 52', long. 78° 16'.

JUMALPOOR.—A British military cantonment in the district of Mymensing, lieutenant-gov. of Bengal, at the point where the Konaic diverges from the river Brahmapootra. Distance from Mymensing or Nussarabad, N.W., 25 miles; Burhanpoor, N.E., 123; Dacca, N.W., 86; Calcutta, N.E., 190. Lat. 24° 56', long. 90° 3'.

JUMARRA.—A town in the British district of Bhagulpore, lieutenant-gov. of Bengal, 27 miles S.W. by W. of Rajmahal. Lat. 24° 50', long. 87° 28'.

JUMBOO.—A town in the native state of Bhotan, three miles from the left bank of the Monas river, and 124 miles N.E. by N. from Goalpara. Lat. 27° 46', long. 91° 38'.

JUMBOOSEER, in the British district of Broach, presidency of Bombay, a town situate on the headland projecting between the estuaries of the rivers Nerbudda and Muhi or Mbye. It is the principal place of a pergunnah of the same name. In the vicinity are numerous large tanks, and the soil being of redundant fertility, and teeming with rank vegetation, malaria for a part of the year prevails, diffusing the seeds of disease and death. Tunkaria, a village on the seacoast, 10 miles S.W. of Jumbooseer, is its seaport, through which considerable quantities of cotton, grain, coarse cloths, and the produce of the mowa (*Bassia latifolia*), are exported. The population of Jumbooseer is estimated at 10,000. Distance from Surat, N., 60 miles; Bombay, N., 212. Lat. 22° 2', long. 72° 50'.

JUMKUNDEE.—A town in the Southern Mahratta jaghire of Jumkundee, 69 miles N.E. from Belgaum, and 167 miles S.E. by S. from Poonah. The jaghiredar was bound to furnish a military contingent to his feudal superior, the British government, an obligation which has now been commuted for a pecuniary payment. His revenues amount to 2,70,246 rupees, or 27,024*l.*, per annum. Lat. 16° 30', long. 75° 20'.

JUMLAH.—A town in Guzerat, or the dominions of the Guicowar, situate on the left

bank of the Bhader river, and 80 miles S.W. from Rajkote. Lat. $21^{\circ} 30'$, long. $70^{\circ} 1'$.

JUMMULMUDGO.—A town in the British district of Cuddapah, presidency of Madras, 177 miles N.W. of Madras. Lat. $14^{\circ} 51'$, long. $78^{\circ} 27'$.

JUMNA.—The name of a great river of India, and the most important feeder of the Ganges. It rises at the south-western base of the group called the Jumnotri Peaks, at an elevation of 10,849 feet, and in lat. 31° , long. $78^{\circ} 32'$. About 500 feet to the north-west of the hot spring of Jumnotri, the face of the mountain rises very steeply, and is entirely cased in snow and ice. From a rock which projects from the snow, a small rill descends during the daytime. It is about three feet wide, and very shallow, being only a shower of spray produced by the snow melted by the sun's rays, and is, according to Hodgson, the most remote source of the Jumna. This point was found inaccessible by that observer, the snow-bed being intersected by rents and chasms, caused by the falling in of the snow as it became melted by the steam of the boiling springs below it. The rill finds its way through chasms formed in the snow-bed to the ground beneath, out of which gush numerous springs of water of nearly boiling heat, and the steam from those, melting the mass of ice and snow above them, causes a copious shower, which affords the principal supply to the nascent Jumna. The stream holds a course generally south-westerly for about eight miles, when the Beraí-Ganga, a stream which down to this point surpasses the Jumna in length and volume of water, joins it on the left side, in lat. $30^{\circ} 56'$, long. $78^{\circ} 27'$. The declivity of the bed of the stream in this part of its course is enormous, as in a distance of sixteen miles, between its source and Kotnur, the fall is 5,036 feet, being at the rate of 314 feet to the mile. About five miles below this, and in lat. $30^{\circ} 49'$, long. $78^{\circ} 19'$, it receives on the right the Budecar, a great torrent, descending from the mountain Kedar-Kanta. On the same side, about three miles farther, the Bunal joins it, and, eight miles beyond, it is increased by the accession (also on the right side) of the Comalda, the largest of its tributaries above the Tonse. About four miles lower down, it receives the Rickna, and ten miles farther, the Khootnee, both on the right side. At the confluence with this last stream, and in lat. $30^{\circ} 39'$, long. $78^{\circ} 5'$, Hodgson found the Jumna, at the end of March, to be ninety feet wide, from three to five feet deep, rapid, and not fordable. About fifteen miles below this, it is joined on the left side by the Aglar or Agilwar, a considerable torrent. In addition to those above enumerated, numerous streams of less importance flow into the Jumna on both sides, between the source and this confluence. At the latter point, in lat. $30^{\circ} 31'$, long. $78^{\circ} 3'$, the course of the river, previously for the most part south-westerly, turns due west, which

direction it keeps for thirteen miles, to the confluence of the Tonse, in lat. $30^{\circ} 30'$, long. $77^{\circ} 53'$, and at an elevation of 1,686 feet above the sea. The Tonse is by far the more considerable stream, its discharge being found, when surveyed by Hodgson and Herbert, to amount to 2,827 cubic feet in a second of time, whilst that of the Jumna was only 1,045. About ten miles farther down, on the same side, the Jumna receives the Girree, a small river, discharging 100 cubic feet in a second. At Raj Ghat, immediately below this confluence, Moorcroft describes the river as being 100 feet wide in the middle of February. Garden, however, assigns it greater dimensions here: according to that authority, the channel of the river is 600 yards wide, and the stream usually about 100 during the dry season, clear, deep, and rapid. A mile below this place, it receives on the left side, and at an elevation of 1,470 feet, the Asun, flowing from the south-east, and draining or irrigating the western part of the Dehra Doon. Taking from this point a direction first westerly, then southerly, it flows through a ravine in the Sewalik Mountains, and about twelve miles below the confluence of the Asun, at Badshamahal, in lat. $30^{\circ} 20'$, long. $77^{\circ} 38'$, enters the plain of Hindostan. Herbert estimates the length of course, from the source of the Jumna to this place, at 123 miles, its elevation here at 1,276 feet, its discharge, at the beginning of March, at the rate of 4,000 cubic feet in a second. This assigned length of course, however, appears too great, the actual course being only about ninety-seven miles. Thus the fall from the source to this place is about 100 feet per mile. In the vicinity of Badshamahal, the Jumna divides into several branches, and on its right side a canal was, in the year 1356, dug by Feroz Toghluk, king of Delhi. At about eighty miles from the commencement of this canal, the canal of Ali Mardan Khan parted from it, and, taking a southerly direction, made its way to Delhi. This work appears to have been maintained in a state of efficiency till 1760; but in the canal of Feroz Shah the water ceased to flow at Suffeedon in 1740. The restoration of the Delhi Canal engaged at an early period the attention of the marquis of Hastings. In 1817, operations were commenced, and by the end of May, 1820, the water was brought to the city of Delhi, and, passing through the main conduit in the palace, rejoined its parent stream. The supply is drawn from a point in the vicinity of Chooarpore, and conducted along a natural channel to Jhyadri, thence by a new cut into the river Outralla, which it follows to its junction with the river Somb; and, passing through this last-named river, is carried on, *vid Dadoooper*, Kurnaul, Rair, and Boanuh, to Delhi; its total length being 185 miles. In 1823, the restoration of the Feroz Shah Canal, passing by Hansi and Hissar, was commenced. The two canals having one common head, the work consisted in the clearance of the old line from

Rair to Bahaderah, 151 miles; the construction of a branch to Rohtuk, forty-five miles long; of another in the direction of Darbah, thirty-two miles; and of the new supply-head, twelve miles: making a total of 240 miles. The water was turned down the canal in 1825. The restoration of the Dooab Canal, parting from the eastern bank of the Jumna near the village of Fyzabad, and rejoining the parent stream opposite the city of Delhi, was commenced in 1824, and the works were completed in 1830. "The original and almost sole object of the government in undertaking these works, appears to have been to convey a large supply of water from the Jumna for the purposes of irrigation of the crops—1st, on lines of country where the natural depth of wells was so great as to render the cost of irrigation from them so heavy as to impede the improvement of the districts, as on the Delhi Canal; 2nd, to supply the means of cheap and easy irrigation to the districts, as on the Dooab Canal, where, although the wells are not so deep, the irrigation from the canal would be comparatively cheap and easy; and, 3rd, as on Feroz's canal, to confer the means of irrigation on districts where, from the excessive depth of the wells, none was heretofore in use, and to convey a supply of wholesome water to a country where generally it is brackish or salt."

From Badshahmahal to the point of reunion with the Delhi Canal, a distance of 145 miles, generally in a southerly direction, the Jumna is occasionally available for floating rafts of timber cut in the Sewalik Mountains, though even that rude kind of navigation is attended with danger during inundation, and in hot weather with delay. In addition to the works above enumerated, the construction of a canal from the Jumna, at a point about five miles east of Kurnaul, to the Sutlej at Ludiana, has been suggested, and a survey of the line of level made, the result of which appears favourable to the plan. At Delhi, the river is crossed during the dry season by a bridge of boats, constructed every year at the cessation of the rains. From that city, the course turns a little to the east; but though in many places extraordinarily circuitous, it holds generally a south-easterly direction to its confluence with the Ganges at Allahabad, a distance from Delhi, by the river's course, of 619 miles. Between Delhi and Allahabad, the Jumna receives on the right side the following rivers:—The Baun or Ootunghun, in lat. 26° 59', long. 78° 31'; the Chumbul, in lat. 26° 30', long. 79° 19'; the Sind, eight miles below; the Betwa, in lat. 25° 55', long. 80° 17'; the Cane, in lat. 25° 47', long. 80° 35', all considerable streams; besides some others of less importance. The chief streams which fall in on the left side are, the Hindon, in lat. 28° 28', long. 77° 30'; the Seengoor, in lat. 26° 9', long. 79° 59'; the Rhind, in lat. 25° 53', long. 80° 37'. Jacquemont styles the Jumna in the lower part of its course an enormous river; in the rainy season, it is in some places a mile, in others several miles, in width, and with a

very rapid current. In consequence, however, of its bed being obstructed by shoals and rocks, navigation was not practicable for craft above Delhi, except by means of the canal. Prinsep thus speaks of the Jumna:—"That river, although of greater length than the Ganges above their confluence, yet much inferior to it in the average volume of its discharge, is the line of communication with some of the principal commercial marts and military stations in India,—Calpee, Etawah, Muttra, and the cities of Agra and Delhi, all situated upon its banks, and with the distant post of Kurnaul, by the ancient canal branching off at Delhi, which has been lately repaired and re-opened. Its banks are lofty and precipitous, and ridges of rock in many places advance into the stream, combining with its general shallowness and strong current to render navigation extremely difficult and dangerous." Much has, however, been done to remedy this inconvenience. At Kurinkhan, near Oryah, lat. 26° 26', long. 79° 35', the whole bed was formerly interspersed with kankar rocks, abounding with organic remains and huge blocks of sandstone, which rendered the navigation so intricate and dangerous, that great numbers of boats were lost, and others delayed for several weeks; but those obstacles have, for the most part, been removed by blasting or other means, and a dam made to deepen and give permanence to the channel; other improvements have been effected, and the practicability of navigating by steam the river below Calpee has been established. The Jumna contains crocodiles or alligators in the lower part of its course. The total length of the river, from its source to its confluence with the Ganges at Allahabad, is 860 miles. On the rocky point where the waters meet, stands the fort of Allahabad. The streams at the junction are nearly equal in volume; the Ganges, the deeper, with yellow water; the Jumna, the more rapid, with water as clear as crystal, but considered less palatable and wholesome than that of its fellow. The Jumna or Yamuna is by the Hindoos considered sacred, and its confluence with the still more sacred Ganges is dignified by a legend, according to which the Sarasvati or Sursuti, a stream that is lost in the wilds of Sirhind, flows underground to Allahabad, where it oozes from under one of the towers, and mingles its water with those of the other two rivers. Hence this confluence is called *Tri-veni*, or "three-plaited locks."

JUMNOTRI, a collection of hot springs near the source of the Jumna, is situate at the western base of the most western of three closely adjoining mountains, styled in the trigonometrical survey the Jumnotri Peaks. The mountain-mass formed by this collection of peaks bears the common name of Banderpuch. Fraser, who viewed it from the south-west, says: "Two lofty and massy peaks rise high above the rest, deep in snow, from which all the inferior ridges appear to take their rise: they are connected low down by a sharp neck;

JUM—JUR.

their south and south-east exposure is the least steep, and bears a great depth of pure unbroken snow. Little or no rock is seen, except at a few points in the ridge connecting the peaks, where it is too sharp and steep for snow to lie; and here it appears of a red colour. Here and there lofty precipices are observed in the snow itself, where the lower parts have melted, and the upper masses have given way, sliding down the ravines below, leaving a face of snow of several hundred feet high, and showing the depth of that which has accumulated for ages."

According to native report, Banderpuch has four peaks, situate around a lake, in which Hanuman, the monkey-god, extinguished his flaming tail. In the trigonometrical survey, three peaks are laid down, having the respective heights and technical names,—Black E. 21,155 feet, Great E. 20,916, Lower E. 20,122. The group of hot springs is about 500 yards from the spot where the first water of the Jumna, a small rill, shoots over the brow of a rock projecting from the perennial and unexplored snows which overspread the summit of Banderpuch. The stream quickly finds its way through the mass of snow lying beneath the precipice, and having a thickness of forty feet, and runs beneath it close to the hot springs, receiving the water flowing from them. The steam of the springs melts the lower part of the mass of snow, so as to form a number of excavations, resembling vaulted roofs of marble; and from these incessant showers fall, which yield the principal supply to the nascent Jumna. The hot springs are numerous and extensive, and the water bursts up in them with great ebullition through a granite rock, and deposits a ferruginous sediment. It is devoid of taste and smell, and has a temperature of 194° 7', nearly that of boiling water at that elevation, which is 10,849 feet above the sea. Lat. 30° 59', long. 78° 35'.

JUMROOD.—A fort and small village, the former now in ruins, the latter scarcely traceable, in the province of Peshawar, 10 miles, or according to some 14 miles, W. of the city of that name, and a short distance from the eastern entrance into the Khyber Pass. The fort was seized by the Sikhs in 1837, and an attempt of the Afghans to retake it led to a battle, in which the Sikhs were defeated, and their general, Hari Singh, an officer of high reputation, slain. Previous to the acquisition of the Punjab by the British, the Sikhs strengthened their position by building the fort of Futighur, on the east side of Jumrood. The place is 1,670 feet above the sea. Jumrood is described by Forster under the name of Timrood. Lat. 34°, long. 71° 24'.

JUMTHUR, in the British district of Kumaon, lieutenant-gov. of the N.W. Provinces, a village on the route, by the course of the Ramganga, from Potoragurh to the Unta Dura Pass, 10 miles N. of Potoragurh. Lat. 29° 44', long. 80° 16'.

JUMUNEE BHOJPOOR.—A town in the

territory of Oude, 90 miles N.E. from Lucknow, and 120 miles E. from Shahjehanpore. Lat. 27° 52', long. 81° 54'.

JUNANABAD, or **JEHANABAD**, in the British district of Behar, lieutenant-gov. of Bengal, a town on the route from Dinapore to Hazareebagh by Gaya, 37 miles S. of Dinapore, 30 N. of Gaya. It has a bazar, and is noted for the manufacture of good cotton cloth. The soil is fertile and highly cultivated, the main crop being rice. The town contains 887 houses, and, according to the usually admitted ratio of inmates to houses, a population of 4,435. Lat. 25° 12', long. 85° 3'.

JUNGALKEE, in the Punjab, a village on the route from Lahore to Ramnuggur, and 50 miles N.W. of the former place. The adjacent country is described by Burnes as sandy, yet rather productive, being irrigated from innumerable wells, which yield water at a depth seldom exceeding twenty-five feet. Lat. 32° 6', long. 73° 55'.

JUNGLEG, in Bussahir, is the last and highest village in the valley of the river Pabur, on the route from Sirmoor to Koonawur, by the Burenda or Broang Pass. It is situate on the right bank of the Pabur, which holds its course down a valley formed by two spurs of mountain running south-westward from the Himalaya. Elevation above the sea 9,257 feet. Lat. 31° 18', long. 78° 4'.

JUNGROWLEE, in the British district of Bareilly, lieutenant-gov. of the N.W. Provinces, a village on the route from Bareilly to Potoragurh, and 38 miles N.E. of the former. Lat. 28° 42', long. 79° 52'.

JUNGUMCOTTA.—A town in the Mysore, 98 miles N.E. by E. from Seringapatam, and 164 miles W. from Madras. Lat. 13° 16', long. 77° 55'.

JUNJEERA.—A town in the British district of Rutnageriah, presidency of Bombay, 80 miles S. by E. of Bombay. Lat. 17° 49', long. 73° 10'.

JUNOH.—A town in the British district of Chota Nagpoor, presidency of Bengal, 191 miles W.N.W. of Calcutta. Lat. 23° 25', long. 85° 38'.

JUPHA.—A town in the native state of Nepal, on the left bank of the Arun river, and 99 miles E. from Khatmandoo. Lat. 27° 37', long. 86° 52'.

JUPLA.—A town in the British district of Behar, lieutenant-gov. of Bengal, 51 miles W. of Sherghotty. Lat. 24° 33', long. 84° 3'.

JURAJPOOR.—A town in the territory of Oude, on the right bank of the Goomtee river, and 50 miles N.W. from Lucknow. Lat. 27° 25', long. 80° 29'.

JUROUNDA.—A town in the British province of Nagpoor, situate 138 miles S.E. from Jubbulpore, and 187 miles E.N.E. from Nagpoor. Lat. 22° 6', long. 81° 50'.

JUROWLY, in the British district of

Bolundshuhur, lieutenant-gov. of the N.W. Provinces, a village on the route from Allyghur cantonment to that of Moradabad, and 28 miles N.E. of the former. Lat. $28^{\circ} 17'$, long. $78^{\circ} 17'$.

JURRAH, in the British district of Futtehpore, lieutenant-gov. of the N.W. Provinces, a town on the right bank of the Ganges, 874 miles from Calcutta by way of the river, 66 miles above Allahabad, and 28 miles by land S.E. of the town of Futtehpore. Lat. $25^{\circ} 50'$, long. $81^{\circ} 19'$.

JURROW, or **JHUROW**, in the Rajpoot state of Joudpore, a village containing 125 houses, on the route from the town of Joudpore to that of Ajmeer, and 32 miles N.W. of the latter. The road in this part of the route is indifferent. Lat. $26^{\circ} 33'$, long. $74^{\circ} 18'$.

JURRUK, a town of Sind, is situated on an eminence of small elevation, which forms a headland projecting into the Indus on the western side, and rising about thirty feet above the water. The principal manufacture is turnery of a very tasteful and highly-finished kind. Its population is probably about 1,500 or 2,000. Lat. $25^{\circ} 3'$, long. $68^{\circ} 20'$.

JUSHPORE, or **JUGDESPORE**.—A small raj included within the territory superintended by the Governor-General's political agent for the south-west frontier of Bengal. It extends from lat. $22^{\circ} 4'$ to lat. $22^{\circ} 50'$, and from long. $83^{\circ} 24'$ to long. $84^{\circ} 10'$, and has an area of 617 square miles. The country is a high table-land, much overrun with jungle, but was recently found by the British agent to be improving under the government of the native chief, represented as far surpassing the majority of his class in intelligence and attention. The people appear happier than in many other parts of the political agency. Rice, grain, and oil, are the staple productions. Lak and wild silk are abundant where cultivation has not subjugated the jungle. The country is computed to yield a revenue of 10,000 rupees. The population is estimated at upwards of 27,000.

JUSHPOOR.—A town in the native state of Jushpoor, on the south-west frontier of Bengal, 93 miles N. from Sumbulpoor, and 73 miles S.W. from Lohadugga. Lat. $22^{\circ} 43'$, long. $83^{\circ} 56'$.

JUSHPOOR, on the south-west frontier of Bengal, a town in the Cuttack mehal of Mohurbunge, 153 miles W. by S. from Calcutta, and 67 miles W.N.W. from Balasore. Lat. 22° , long. $86^{\circ} 8'$.

JUSOL, in the Rajpoot state of Joudpore, a ruined town near the left bank of the Loonee, between Balmeer and the town of Joudpore, and 60 miles S.W. of the latter. It is situated at the northern base of a small conical hill about 200 feet high, on the upper part of the rocky side of which was the residence of the thakoor or chief. The river Loonee, abreast of this place, was, when ferried over by Boileau in the rainy season, at the beginning of July,

700 yards wide, and running with a very violent current. The town in the time of its prosperity contained 3,000 houses; but not a tenth of that number are now inhabited. The road in this part of the route between Balmeer and the town of Joudpore is under water during the rainy season, and unsafe. Lat. $25^{\circ} 47'$, long. $72^{\circ} 23'$.

JUSPOOR, in the British district of Moradabad, lieutenant-gov. of the N.W. Provinces, a town on the route from Pilleebheet to Suhaarunpoor, and 100 miles S.W. of the former. It is situated near the southern boundary of the Terai or marshy forest extending along the base of the mountain, and in lat. $29^{\circ} 17'$, long. $78^{\circ} 53'$.

JUSSO, in Bundelcund, a town, the principal place of a jaghire or feudal possession of the same name, containing an area of 180 square miles, with a population of 24,000. The revenue of the raj is returned at 1,300*l.* per annum, and the chief maintains a small military force. The town is distant 26 miles S.E. of Punnah. Lat. $24^{\circ} 27'$, long. $80^{\circ} 35'$.

JUSTWUNTUGUR, in the British district of Etawa, lieutenant-gov. of the N.W. Provinces, a small town on the route from the cantonment of Agra to that of Etawa, and nine miles N.W. of the latter. It has a mosque and a small bazar. The population of the town is returned at 5,239. Lat. $26^{\circ} 53'$, long. $78^{\circ} 58'$.

JUTEEPOOR, in the British district of Bareilly, lieutenant-gov. of the N.W. Provinces, a village on the route from Bareilly to Petorgarh, and 26 miles N.E. of the former. Lat. $28^{\circ} 37'$, long. $79^{\circ} 47'$.

JUTPOOL.—A town in Hyderabad, or dominions of the Nizam, 94 miles S. by W. from Hyderabad, and 18 miles N.E. from Kurnool. Lat. $16^{\circ} 1'$, long. $78^{\circ} 16'$.

JUTPOORA, in the British district of Moradabad, lieutenant-gov. of the N.W. Provinces, a village on the route from Allyghur to the town of Moradabad, and six miles S.W. of the latter. Lat. $28^{\circ} 46'$, long. $78^{\circ} 47'$.

JUTT.—A town in the Sattara jaghire of Jutt, 95 miles N.E. from Belgaum, and 136 miles S.E. by S. from Poonah. The jaghiredar is bound to furnish a contingent of cavalry to its feudal superior, the British government. A proposal made by the latter for a commutation of the obligation by a pecuniary payment, was met by refusal on the part of the chief. Lat. $17^{\circ} 1'$, long. $75^{\circ} 16'$.

JUTTA KA GOTE, in Sind, a village on the route from Tatta to Hyderabad, by way of Kotree, and 17 miles N.E. of Tatta. It is situated a mile and a half from the right bank of the Indus, and half-way between that river and the brackish *Dund*, or lake of Kunjur. The adjacent country is plain, and occupied principally by a shikargah or hunting-ground, lately belonging to one of the amera of Hyderabad. Lat. $24^{\circ} 56'$, long. $68^{\circ} 12'$.

JUTTEEL MOUNTAINS, in Sinde, form a portion of that mountain system which, stretching eastward from the great Hala range, terminates abruptly on the right bank of the Indus, near Sehwan. The Jutteel Mountains run south-west from Sehwan to Dooba, a distance of between sixty and seventy miles. They are steep and of considerable height, probably in few places less than 2,000 feet. The direct road from Sehwan to Kurrachee lies between them and the Keertar range, which is equally high, and holds a parallel course, but more to the west. The Jutteel range extends between lat. $25^{\circ} 32' - 26^{\circ} 20'$, and long. $67^{\circ} 48' - 68^{\circ} 8'$.

JUTTOO, in the Punjab, a village on the route from Mooltan to Dera Ismael Khan, and 18 miles N.W. of the former town. It is situate 10 miles from the right bank of the Chenaub river, in what Elphinstone calls the Little Desert, extending between the Chenaub and the Indus, and which he describes as having a length of 250 miles from north to south, and, in the latitude of Juttoo, a breadth of two days' march, or about forty miles. Lat. $30^{\circ} 20'$, long. $71^{\circ} 17'$.

JUWAHIR, or **JUWAR**, in the British district of Kumaon, lieut.-gov. of the N.W. Provinces, the most considerable of the Bhotia melals or subdivisions north of the culminating ridge of the Himalaya. It comprises the upper part of the valley drained by the river Gorie, together with the lofty mountains rising on each side, and ranges between lat. $30^{\circ} 10' - 30^{\circ} 35'$, long. $79^{\circ} 50' - 80^{\circ} 20'$. The surface throughout has great elevation, the lowest part affording passage to the river Gorie, over the southern frontier, at Leepooke Than, in lat. $30^{\circ} 10'$, long. $80^{\circ} 17'$, at an elevation of 9,152 feet above the sea; the head of the Goonka, its remotest feeder, being at the Oota Dhoora Pass into Hiundes, and at an elevation probably of not less than 15,000 feet. The valley drained by the river, extending between these places, is the habitable part of Juwahir; the more elevated tracts, rising on the east and west, being unexplored wastes of perennial snow. Therein are summits of extraordinary height, some rising 22,000, some 23,000, feet above the level of the sea; and one, called Nanda Devi, reaching 25,749. At the fall of the year, the whole surface of the country becomes covered with deep snow, which commences early in October, when the inhabitants migrate to the more southern, lower, and warmer parts of Kumaon. The accumulation is progressive to the beginning of April, and snow continues to fall until late in May. The depth, in open and level situations, varies in different years from six to twelve feet, and is wholly dissipated by the first week in June; but in confined and much-depressed places, successive avalanches sometimes cause accumulations several hundred feet thick, and in many deep valleys and ravines the whole is not melted until late in July. Goats and sheep are the most general

beasts of burthen, the former carrying from twelve to twenty-four pounds, the latter from ten to sixteen. These animals journey on an average a distance of five miles daily, being allowed to remain stationary for the greater part of the day for pasture, which affords their only means of subsistence. The inhabitants of Juwahir are supported by the traffic between Hiundes and the countries to the south. The more wealthy, having command of capital, combine commercial speculations in both quarters with the carrying-business, which forms the main resource of the less opulent. The inhabitants of Juwahir are favoured by the Tibetan authorities, in being allowed access to all parts of Tibet, while the other Bhotias of Kumaon are restricted to particular places for trade. They take into Hiundes grain, cottons, broadcloths, hardware, glassware, wooden vessels, coral, pearls, dye-stuffs, spices, sugar, sugarcandy, and timber; and bring back gold-dust, salt, borax, sheep's-wool, goat's-wool or shawl-wool, chauries or yak-tails, coarse shawls, inferior silks, leather tanned in a similar manner to the Russian, dried fruits, and drugs. The Juwaharis are of Tibetan descent, and exhibit the singular anomaly of yielding allegiance both to the mother country and to the government of Kumaon; the latter enforced by military power, the former by the influence resulting from commercial relations. Their religion is a medley of Lamaism and of Brahminism, administered indifferently, according to exigency, by the priests of either faith. They affect the same scruples as the Brahmins with respect to food, and have assumed the designation of Sinh (lion), but are regarded by the Brahminists with abhorrence, as the descendants of a kine-killing race. The Tibetan language has died away and been replaced by the Hindoostanee, now universally used in Juwahir. The people are represented by Traill as an honest, industrious, orderly race, patient and good-humoured, but very filthy in their habits, using the skirts of their dress to scrub both their persons and cooking-utensils. Under the Goorkha sway, the tribute levied was oppressively large. This arose not entirely from fiscal, but partly from vindictive motives, the Juwahirs having frequently baffled the military efforts made to reduce them to submission. Juwahir comprises thirteen villages and 455 houses; and it is taken as the average for the number of inmates of each, the result would be a population of 2,730.

JWALA MUKHI.—See **JEWALA MUKI**.

JWITEE.—A town in the hill zemindary of Jeypoor, presidency of Madras, four miles E.N.E. from Jeypoor, and 91 miles N.W. from Vizianagrum. Lat. $19^{\circ} 3'$, long. $82^{\circ} 30'$.

JYE BOORDEE.—A town in the British district of Tannah, presidency of Bombay, 81 miles N. of Bombay. Lat. $20^{\circ} 7'$, long. $72^{\circ} 45'$.

JYGURH.—A town in the British district of Rutnagherry, presidency of Bombay, 118

miles S. by E. of Bombay. Lat. 17° 17', long. 73° 19'.

JYNTEEA.—A district of Eastern India, situate in the Cossya Hills, and extending from lat. 24° 55' to 26° 7', and from long. 91° 53' to 92° 48'. It is eighty miles in length from north to south, and forty in breadth. The tract formerly constituted the northern division of the possessions of a native prince, styled the rajah of Jyntee, between whom and the British government political relations appear to have been first established during the Burmese war in 1824, when the territory of the rajah was secured to him by treaty. This treaty, however, was regarded merely in the light of a personal engagement with the reigning prince, and its conditions were not considered binding on his successor. In 1835, it being proved that the new rajah, while heir-apparent, had ordered or connived at the kidnapping of four British subjects for the purpose of human sacrifice, the British government confiscated his possessions in the plains, upon which the rajah voluntarily relinquished his districts in the hills. A pension of 50*l.* a month was assigned for his support, and he retired to Dacca. The forfeited possessions were annexed to the British dominions; those situated in the plains being incorporated with the district of Sylhet, and the remainder (forming the subject of this article) being placed under the jurisdiction of the political agent in the Cossya Hills. Coal is stated to abound in the hills of Jyntee.

JYNTEEAHPORE.—A town of Eastern India, in the British district of Jyntee, 77 miles S.S.E. of Gowhatty. Lat. 25° 7', long. 92° 5'.

JYNUGUR.—A town in the British district of Tirhoot, lieut.-gov. of Bengal, 58 miles N.E. of Mozuffarpore. Lat. 26° 31', long. 86° 15'.

JYRUNG.—A town of Eastern India, in the Cossya Hills, situate in the native state of Osimlee, 21 miles S.W. by S. from Gowhatty, and 63 miles E.S.E. from Goalpara. Lat. 25° 52', long. 91° 36'.

JYSINUGUR, in the British territory of Saugor and Nerbudda, lieut.-gov. of the N.W. Provinces, a town on the route from Saugor to Hoosungabad, 19 miles S.W. of the former. Lat. 23° 37', long. 78° 38'.

JYTO.—A town in one of the petty Cis-Sutlej jaghires, 77 miles S.W. from Loodianah, and 38 miles S.E. by S. from Ferozepore. Lat. 30° 28', long. 74° 55'.

JYTPORE.—See JEITPORE.

JYTUK, or JAITAK, in Sirmor, a very steep ridge of clay-slate, rising over the north-western extremity of the Kyarda Doon. A peak of this ridge is surmounted by a stone fort, about seventy feet long and fifty wide, having a small round tower or bastion at each corner, the whole, however, constructed in an unsubstantial manner. During the

war with the Goorkhas in 1814, it was occupied by them with a garrison of about 2,200 men, who, on the 27th of December, were attacked by two separate British detachments, one of about 1,000 strong, the other of about 700. The former meeting with a well-conducted resistance, and suffering severe loss, fled panic-struck to camp; the other made good a lodgment in an important position near the fort; but being called off by General Martindell, who commanded the army of which the detachment formed part, it was harassed greatly on its retreat, and narrowly escaped total destruction. The loss to both detachments amounted to four officers killed, and five wounded; seventy-nine non-commissioned officers and privates killed, and 281 wounded and missing. On the 13th of March following, two eighteen-pounder battering-guns were with great difficulty hauled by hand up the nearly perpendicular side of the ridge, and placed in battery against the fort, besides two six-pounders, two eight-and-half-inch mortars, and two five-and-half-inch howitzers. The defences of the Goorkhas were in consequence much damaged, and in a short time the British posts were so arranged as completely to blockade the fort, which, early in May, was surrendered, but not till the stock of provisions for the use of the garrison was reduced to one day's rations. Nearly 1,500 armed men marched out, besides about 1,000 women and children. Jytuk is 4,854 feet above the sea. Distant N.W. from Calcutta 1,014 miles, by Dehra. Lat. 30° 36', long. 77° 24'.

K.

KABILPOOR, in the British district of Shahjehaupoor, lieut.-gov. of the N.W. Provinces, a village on the route from Bareilly to the cantonment of Futtehghurh, and 35 miles S.E. of the former. The road in this part of the route is good; the country open, level, and cultivated. Lat. 27° 55', long. 79° 44'.

KABO.—A town in the British district of Chota Nagpoor, lieut.-gov. of Bengal, 186 miles W. by N. of Calcutta. Lat. 22° 58', long. 85° 35'.

KABOOL RIVER, or JUI SHIR.—The only great tributary of the Indus from the west. It is generally supposed to rise at Sir-i-Chushmuh, in lat. 34° 17', long. 68° 14', where at a height of 8,400 feet above the sea, a very copious spring bursts from the ground, and forms the chief source of the principal stream. But the extreme head is about twelve miles farther west, on the eastern declivity of the Oonna ridge. It is at first an inconsiderable stream, everywhere fordable for sixty miles, as far as Kabool; at a short distance beyond which place it receives the river of Logurh, and thenceforward is a rapid river. About forty miles below Kabool, it receives the Punchshir river, which has a course of 120 miles. About fifteen

miles below this, it receives the Tagoa river, having a course of about eighty miles. The united streams of the Alishang and Alingar join the Kabool river about twenty miles farther down, after a course each of about 120 miles. At the distance of about twenty miles more, the Soorkh Rood, or Red River, so called from the colour which its water derives from the earth suspended in it, falls into the Kabool river after a course of seventy miles. Twenty miles farther east, the Kabool river receives the river Kama, called also the river of Kooner, which rising in Chitral, flows through Kafirstan. Such is the course of the Kabool river, and thus does it acquire force and volume. Flowing easterly, it drains the valley of Kabool, the Sufeid Koh, and the southern slope of the Hindoo Koosh; and after receiving on both sides several considerable streams, becomes a large river, sweeping with prodigious rapidity and violence along the northern base of the Khyber Mountains, and, in consequence of its boiling eddies and furious surges, not navigable, except on rafts of hides. Eastward of these hills, and in lat. $34^{\circ} 10'$, long. $71^{\circ} 27'$, it enters the British territory of the Punjab, and divides into three branches, which, at Dobundee, twelve miles lower down, reunite, and thence the river is navigable for boats of forty or fifty tons to Attock, near which it joins the Indus. Just below Dobundee it is joined from the north by the Lundye, or river of Panjkora, which, rising in that unexplored region of the Hindoo Koosh lying east of Chitral, passes south-west by Panjkora, receives the river of Sewat from the north-east, and some tributaries of less importance from the west, and has a total course of above 200 miles. After this confluence, the Kabool river continues to flow eastward for forty miles, and falls into the Indus on the western side, nearly opposite Attock, and in lat. $33^{\circ} 54'$, long. $72^{\circ} 16'$, having a total course of about 320 miles. As both rivers are very rapid, and have great bodies of water, the confluence produces turbulent eddies and violent surges.

KACHAURA, in the British district of Agra, lieutenant-gov. of the N.W. Provinces, a town on the south-eastern frontier, towards the British district of Etawah. It is situate on the right bank of the Jumna, 55 miles S.E. of the city of Agra. Lat. $26^{\circ} 50'$, long. $78^{\circ} 48'$.

KADASUR, in the British district of Ghazeepeer, lieutenant-gov. of the N.W. Provinces, a town on the route from Ghazeepeer cantonment to Hazareebagh, 21 miles S. of the former, 171 N.E. of the latter, is situate on the river **Karamnasa**. Lat. $25^{\circ} 19'$, long. $83^{\circ} 32'$.

KADIPOOR, in the district of Aldeman, territory of Oude, a village two miles from the left bank of the river Tons (eastern), 42 miles S.E. of Faizabad, 108 E. of Lucknow. The population is estimated by Butter at 1,000. Lat. $26^{\circ} 22'$, long. $82^{\circ} 43'$.

KADIRPOOR.—A village in Sind, between Subzulcote and Shikarpoor, and 24 miles W. of the former place. It is situate near the

left bank of the Indus, in a level country, in some places overrun with jungle, but capable of successful cultivation, in consequence of the facility of irrigation by means of watercourses from the river. Lat. $28^{\circ} 10'$, long. $69^{\circ} 20'$.

KADLOOR.—A town in one of the recently-sequestered districts of Hyderabad, or dominions of the Nizam, 60 miles N.W. of Kurnool. Lat. $16^{\circ} 22'$, long. $77^{\circ} 28'$.

KADMUH, in the jaghire of Jujhur, lieutenant-gov. of the N.W. Provinces, a village near the western frontier towards Loharoo. Lat. $28^{\circ} 24'$, long. $76^{\circ} 4'$.

KADURGUNGE, in the British district of Buddaon, lieutenant-gov. of the N.W. Provinces, a town on the route from Futtehghur to Buddaon, 16 miles S.S.W. of the latter. Lat. $27^{\circ} 49'$, long. $79^{\circ} 9'$.

KAEELAUN, or **KYLAWUN**, in the British district of Boolundshuhur, lieutenant-gov. of the N.W. Provinces, a village on the route from Khasgunj to Meerut, and 53 miles S. of the latter. Lat. $28^{\circ} 18'$, long. $78^{\circ} 2'$.

KAENG, in the island of Ramree (Arracan), a village prettily situated near the sea, at the mouth of a small creek. The neighbourhood consists of extensive plains, which are exceedingly fertile, and rice and indigo are cultivated to a great extent. In the opinion of Lieutenant Foley, who visited it in 1834, "this village is superior to any in the island, both with respect to situation and the general appearance of neatness and comfort that prevails." Lat. $19^{\circ} 5'$, long. $93^{\circ} 45'$.

KAFR, KOT, or THE INFIDELS' FORT.—A huge, lofty, and massive ruin near the west bank of the Indus, and between that river and the Largee valley. It consists of a number of towers bearing every mark of extreme antiquity, rising on the very summit of the mountain-chain. These are connected with the Indus by a dilapidated wall extending from them to the edge of the water. Wood, who surveyed the spot, expresses his astonishment at the toil and skill which must have been directed to the construction of this stupendous edifice, singularly contrasting with the mean mud hovels which, with this exception, are the only buildings to be found throughout this region. The time and circumstances of its erection are totally unknown. Lat. $32^{\circ} 30'$, long. $71^{\circ} 22'$.

KAGAKAT.—A town in the native state of Nepal, on the left bank of the Gunduck river, and 163 miles N.W. by W. from Khatmandoo. Lat. $28^{\circ} 57'$, long. $83^{\circ} 3'$.

KAGUL.—A jaghire or feudal dependency of Kolapore, of which it forms part, and situate within the jurisdiction of the political agency of the Bombay government. The inhabitants, always engaged in feuds with Kolapore under the native government, yield ready obedience to the British authority, which has assumed the temporary management of the Kolapore territories. The revenue amounts to something

KAH—KAI.

more than 70,000 rupees, and the military force to about 700 men. Kagul, the chief town, is in lat. $16^{\circ} 32'$, long. $74^{\circ} 28'$.

KAHA, in Sind, is a mouth of the Indus, by which the Moutnee, formerly a large offset of the Sata, or great eastern branch of that river, discharged its water into the sea. In consequence of the channel of the Moutnee having been almost entirely deserted by the stream, the Kaha mouth has become little more than a salt-water creek. Lat. $23^{\circ} 56'$, long. $67^{\circ} 35'$.

KAHEREE.—A village of the Daman division of the Punjab, situate on the right bank of the Indus. Here is one of the principal ferries on that river. It is on the route from Hindostan to Afghanistan, by Dera Ismael Khan and the Gomul or Goolairee Pass. Elphinstone, who crossed here at the beginning of January, when the water is lowest, found the main channel 1,010 yards wide; and it is known to be much broader during the swell. Lat. $31^{\circ} 25'$, long. $70^{\circ} 47'$.

KAHGUDIPOOR, in the British district of Ghazeepeer, lieutenant-gov. of the N.W. Provinces, a village on the route from Ghazeepeer cantonment to that of Goruckpeer, 15 miles N. of the former, 76 S. of the latter. Lat. $25^{\circ} 44'$, long. $83^{\circ} 45'$.

KAHSEHS.—A town in the native state of Nepal, three miles from the right bank of the Kurnalli river, and 90 miles E.S.E. from Almora. Lat. $29^{\circ} 12'$, long. $81^{\circ} 8'$.

KAILAS.—See KOONLUS.

KAIMGUNJ, in the British district of Furruckabad, lieutenant-gov. of the N.W. Provinces, a town on the route from Futtehghurh to Budaon, 20 miles N.W. of the former. Population 8,983. Lat. $27^{\circ} 34'$, long. $79^{\circ} 25'$.

KAIMUR.—A mountain-range in the territory of Rewa or Baghelcund, extending S.W. from about lat. $24^{\circ} 40'$, long. 82° , for about 70 or 80 miles, and dividing the valley of the Tons from that of the Son. It has in one part a remarkable conical shape, and an elevation probably exceeding 2,000 feet above the sea. The formation, according to Franklin, is primitive sandstone, intermixed with schistose limestone. This range is a section of the Vindhya Mountains.

KAIR.—A town in Hyderabad, or dominions of the Nizam, situate three miles from the left bank of the Payne Gunga river, and 176 miles N. by E. from Hyderabad. Lat. $19^{\circ} 50'$, long. $79^{\circ} 9'$.

KAIRA, a British collectorate in the presidency of Bombay, is bounded on the north by the Myhee Caunta division of Guzerat; on the east and south by the river Myhee; and on the west by the collectorate of Ahmedabad and the dominions of the Guicowar. It extends from lat. $22^{\circ} 12'$ to $23^{\circ} 38'$, and from long. $72^{\circ} 30'$ to $73^{\circ} 27'$. The greatest length from north to south is ninety-four miles, and its greatest

breadth fifty miles. The area is 1,869 square miles. The principal staple articles of cultivation are tobacco, sugar, indigo, cotton, opium, poppy, and cumin. The district is traversed by the Bombay and Baroda railway; but there are no metalled or macadamized roads in this collectorate, with the exception of the line extending from the southern gate of the town of Kaira to the Sereer river, near the village of Ruttunpoor. The highways and crossways throughout the collectorate are for the most part formed by the tracks of carts, and though uneven and narrow, they are generally in other respects pretty good. Among the principal highways which traverse the collectorate, is one from Baroda *via* Kaira to Ahmedabad, which crosses the river Myhee northward of the town of Wasud, and another from Malwa and Loonawarra to Ballasore, Kupperwung, and Ahmedabad. The country being sandy, the roads are somewhat heavy for wheeled carts, and in the rainy season some of them are partially flooded; but a few days' fine weather is sufficient to render them again passable. The population is given under the article BOMBAY.

The implements used in husbandry by the agricultural classes are of the same description as those employed by their forefathers. No improvements have taken place. A few American ploughs were introduced by the government in 1843, two of which were given to the cultivators for trial. They complained that they were clumsy and unsuited to native management, that the furrows formed by them were too wide, and that additional labour was required to level the surface. It was objected, moreover, that it would cost as much to repair one of these ploughs as to make a new one on the old plan. The cultivators are extremely averse to innovation, and the attempt to introduce these ploughs proved a failure. The principal towns are ten in number,—Kaira, Kupperwung, Borsud, Nerriad, Mehmoodabad, Mahtur, Tansra, Mahoonda, Nepar, and Oomrut, which will be found described in their proper places. Government vernacular schools have been established in various parts of the district. The tract forming the district of Kaira was ceded to the East-India Company by the Guicowar, under different treaties and engagements, commencing with the grant or sunnud dated 3rd May, 1803, under which the British were put in possession of the fort of Kaira.

KAIRA, in the presidency of Bombay, a town, the principal place of the British collectorate of the same name. It is situate near the confluence of two small rivers, the Watruk and Sereer, over the latter of which a bridge has been recently erected. The surrounding country is fertile and beautiful, and overspread by fine orchards, or, where those are not to be met with, by thickets of wild fig-trees and other wild-fruitbearers. The town is of considerable size, and is surrounded by a wall with bastions. The streets within are uneven and narrow.

KAI—KAL.

The houses, however, are solid and lofty, with sloping tiled roofs, and a good deal of carving about the woodwork of their gables and verandas. Near the centre of the town are a large Jain temple and school, the former consisting of many apartments, some of them raised, and approachable only by ascending flights of stairs; some on the ground-floor, and some underground. In this building is some fine carving in dark-coloured wood. There is also a subterranean Jain temple, containing, seated on an altar, four white marble statues of characters considered by the worshippers as sacred. Near the temple is the Adawlut, or court of justice, a handsome building, with pillars in the Grecian style, having its attic story raised high above the town, and containing very convenient apartments for the judge and his family. Contiguous is the prison, a large strong building. There is in the town a church, a large clumsy building. There is also a government vernacular school. The military cantonments are about a mile and a half from the city, and separated from it by a small river. They are extensive, and in most respects well laid out, except that, being built in the form of a square, a large portion is deprived of the benefit of free ventilation. The climate is very hot and unhealthy, producing fever, ague, and other diseases resulting from malaria. The town is distant from Bombay, N., 265 miles; from Ahmedabad, S., 20 miles. Lat. $22^{\circ} 45'$, long. $72^{\circ} 41'$.

KAISLA, in the British territory of Saugor and Nerbudda, lieutenant-gov. of the N.W. Provinces, a town on the route from Hoosungabad to Baitool, 42 miles N. of the latter. Lat. $22^{\circ} 26'$, long. $77^{\circ} 54'$.

KAITHAULA, in the district of Salon, territory of Oude, a town 70 miles S.E. of Lucknow, 40 S.W. of Sultanpore cantonment. It is situated on the right bank of the river Sae, which nearly surrounds the town by its windings. The population is estimated by Butter at 8,000, all Hindoos. Lat. 26° , long. $81^{\circ} 37'$.

KAITI, or **KYTEE**, in the British district of Benares, lieutenant-gov. of the N.W. Provinces, a town on the left bank of the Ganges, just above the confluence of the Goomtee, 645 miles N.W. of Calcutta by water, 24 N.E. of Benares. Lat. $25^{\circ} 30'$, long. $83^{\circ} 13'$.

KAITI, in the British district of Benares, lieutenant-gov. of the N.W. Provinces, a village on the right bank of the Ganges, 662 miles N.W. of Calcutta by water, seven miles N.E. of Benares. Lat. $25^{\circ} 20'$, long. $83^{\circ} 12'$.

KAITRI, in territory of Gwalior, or possessions of Scindia's family, a small fort and village on the route from Agra to Gwalior fort, 38 miles S. of former, 31 N.W. of latter. It is situated on the south or right side of the river Chumbul. The bank is bold and lofty, and the channel, three-quarters of a mile wide, is filled by a deep and rapid torrent. In the dry season it is crossed by ford, much fre-

quented, as, opposite Dholpore, four miles lower down the stream, the passage must be made by ferry or bridge of boats. Lat. $26^{\circ} 37'$, long. $77^{\circ} 57'$.

KAKA.—A town in the native state of Nepal, situated under the mountain Dhoulagiri, and 169 miles N.W. by W. from Khatmandoo. Lat. $29^{\circ} 8'$, long. $83^{\circ} 4'$.

KAKADU, in the British district of Cawnpore, lieutenant-gov. of the N.W. Provinces, a village on the route from Calpee to the cantonment of Cawnpore, and five miles S.W. of the latter. The road in this part of the route is metalled or macadamized; the country is well cultivated. Lat. $26^{\circ} 28'$, long. $80^{\circ} 21'$.

KAKEENADA.—A town in the British district of Rajahmundry, presidency of Madras, nine miles S.E. of Samulkottah. Lat. $16^{\circ} 58'$, long. $82^{\circ} 19'$.

KAKHUNDKEE.—A town in the British district of Sattara, presidency of Bombay, 89 miles N.E. of Belgaum. Lat. $16^{\circ} 37'$, long. $75^{\circ} 37'$.

KAKITA.—A town in the British district of Vizagapatam, presidency of Madras, 48 miles W.S.W. of Vizagapatam. Lat. $17^{\circ} 24'$, long. $82^{\circ} 44'$.

KAKRAJEET.—A town in the British district of Midnapore, lieutenant-gov. of Bengal, 78 miles S.W. by W. of Calcutta. Lat. $21^{\circ} 58'$, long. $87^{\circ} 22'$.

KAKTEE.—A town in the Mahratta jaghire of Sanglee, territory of Bombay, nine miles N. from Belgaum, and 56 miles S.S.E. from Kolapoor. Lat. $15^{\circ} 57'$, long. $74^{\circ} 37'$.

KAKUBA, or **KAKOOA**, in the British district of Agra, lieutenant-gov. of the N.W. Provinces, a village on the route from the city of Agra to Gwalior, seven miles S. of former. Here, in December, 1843, the British army, under command of Sir Hugh Gough, accompanied by Lord Ellenborough, governor-general, encamped, in the advance against Gwalior. Lat. $27^{\circ} 4'$, long. $78^{\circ} 3'$.

KALA BAGH.—A town on the right or west bank of the Indus, where it finds a passage through the Salt range, which stretches from Afghanistan into the Punjab. The breadth of the stream, bounded by very lofty and steep banks, is here about 350 yards. The road, a gallery cut in the side of the cliff, and about 100 feet above the edge of the water, is so narrow as not to allow a laden camel to pass. A great part of this excavation is through rock-salt, extremely hard, pellucid, clear, and nearly colourless as crystal. Some specimens are so hard that they are worked into platters. The town rises as though it were stuck against the precipitous eminence overhanging the road and river, and, together with the salt-rock, the stream, and the prospect over the country to the east, forms a striking scene. The heat in summer is here excessive, and the air unwholesome, as well

naturally as from the effluvia of alum-works. The alum is obtained from a sort of slate, which is found in vast quantities in the neighbouring mountains. This is placed in layers between wood, and the pile thus formed set on fire; the residuum is then boiled in iron pans, filtered, and, by means of evaporation, rendered solid alum. There are fourteen manufactories for the purification of the mineral. Great quantities of salt are extracted here, for the supply of Western India and Afghanistan. There is also coal in its vicinity, but of poor quality, and in inconsiderable seams. The Indus is navigable to Kala Bagh at all seasons, and it is expected that the communication by government steam-vessels, which has been established between Kurrachee and Mooltan, will be shortly extended to this town. The population probably does not exceed 2,000. Lat. 32° 57', long. 71° 35'.

KALAISUR.—A town in Hyderabad, or dominions of the Nizam, situate on the right bank of the Godavery, 139 miles N.E. of Hyderabad. Lat. 18° 51', long. 79° 53'.

KALAPYNDONG KEON, in Arracan, a small river taking its rise in the Wyllatong Hills, about lat. 21° 8', long. 92° 51', and joining the Myoo river about lat. 20° 43', long. 92° 42', at the village of Khengkeong.

KALEE RIVER.—See GHOGRA.

KALEEGUNJE.—A town in the British district of Mymnaing, lieutenant-gov. of Bengal, 189 miles N.E. of Calcutta. Lat. 24° 36', long. 90° 29'.

KALEEGUNJE.—A town in the British district of Rungpoor, lieutenant-gov. of Bengal, 30 miles E.S.E. of Rungpoor. Lat. 25° 34', long. 89° 43'.

KALEE KEMAON.—See CHAMPAWUT.

KALEE OUNG.—A town in the British province of Tenasserim, 134 miles S.S.E. of Moulmein. Lat. 14° 39', long. 98° 22'.

KALEGOUK ISLAND is situate six miles off the coast of Amherst (Tenasserim provinces). Its length from north to south is six miles, and its breadth one mile. Lat. 15° 32', long. 97° 43'.

KALE MYO.—A town of Burmah, situate on the left bank of the Myithia Khyoung, and 135 miles N.W. from Ummerapoo. Lat. 23° 3', long. 94° 28'.

KALERAWUN, in the British district of Hurriana, lieutenant-gov. of the N.W. Provinces, a village on the route from Hansee to Bhutnair, and 28 miles N.W. of the former. It is a poor place, and even water is scarce. Lat. 29° 18', long. 75° 35'.

KALE SERAI, in the Punjab, a village and caravanserai on the route from Attock to Rawul Pindie, and 39 miles S.E. of the former place. It is situate on the river Kalee, a tributary of the Hurroo. The Kalee, though of short course, is deep: the passage across it is effected by an old stone bridge. It is the

Toomrah of Walker's Map. At a short distance to the north-west of the village is a baoli or great well, the water of which is reached by a descent of 100 steps. The surrounding country is remarkably rocky, rugged, and barren, and the roads are rough and difficult. Lat. 33° 40', long. 72° 54'.

KALIDUNGA, in the British district of Kumaon, lieutenant-gov. of the N.W. Provinces, a village on a mountain of the same name, rising from the right bank of the river Ghagra, 20 miles S.E. of Chumpawut cantonment. Elevation above the sea 1,115 feet. At the base of the mountain, and about a mile from the village, is the Kalidunga ferry across the Kalee, forming a communication between the territory of the East-India Company and that of Nepal. Lat. 29° 7', long. 80° 19'.

KALI MATH, in the British district of Kumaon, lieutenant-gov. of the N.W. Provinces, a temple dedicated to the Hindoo goddess Kali, on a summit sloping westward to the left bank of the river Kosila, and four miles N. of Almora. A stockade was here garrisoned by the Goorkhas during their possession of Kumaon. Elevation above the sea 6,301 feet. Lat. 29° 38', long. 79° 42'.

KALI NUDDEE.—A river rising in the collectorate of Dharwar, presidency of Bombay, close to the town of Dharwar, and in about lat. 15° 30', long. 75° 6'. It holds a south-westerly course of about eighty miles, and falls into the Arabian Sea, or North Indian Ocean, at Sedashevagurh, in lat. 14° 50', long. 74° 10'. Near Barabuti, forty-five miles above its mouth, it is joined on the left side by the river Bidhati, flowing from the south.

KALIPANI, in the British district of Kumaon, lieutenant-gov. of the N.W. Provinces, a remarkable spring, regarded as sacred by the natives, and hence considered as the source of the great river Kalee, though this last has its remotest head-water about thirty miles farther to the north-west. The spring is situate on the north-eastern declivity of the great mountain Bians Rikhi, and on the route from Bians Pass to Askot, five miles S.W. of the pass, 45 N.E. of Askot, and in lat. 30° 11', long. 80° 56'. Its water is discharged into a stream flowing a few hundred feet to the west, and which bears the name of Kalipani river. This river is formed by the union of two streams, one rising close to the western entrance of the Bians Pass, and, holding a westerly course of about four miles, joins the other, rising on the western declivity of the great Kuntas Peak, in lat. 30° 14', long. 80° 56', and, flowing five miles southerly, to the confluence, in lat. 30° 11', long. 80° 55', and about a mile above the spring. The united stream flows five miles south-westward, to its confluence with the Kali, in lat. 30° 8', long. 80° 54', and at an elevation above the sea of 11,413 feet. The spring is resorted to for ritual ablutions and other religious practices, by pilgrims on their route to *Manasarovara*. The confluence of the

branches of the Kalipani is about 150 feet below the limit of perpetual snow, and the streams scarcely flow during the winter season, when the waters of this tract generally are masses of ice.

KALKAPORE.—A town in the British District of Beerbhoom, lieutenant-gov. of Bengal, 148 miles N. by W. of Calcutta. Lat. $24^{\circ} 37'$, long. $87^{\circ} 50'$.

KALLACH.—A town in the dominions of Gholab Singh, 163 miles N. by E. from Kangra, and 116 miles E. by N. from Sirinagur. Lat. $34^{\circ} 19'$, long. $76^{\circ} 57'$.

KALLEENJUR.—A celebrated hill fort in the British district of Banda, in Bundelcund, under the lieutenant-gov. of the N.W. Provinces. It is situated at the south-eastern extremity of the plains of Bundelcund, where rises the Bindachal range, the first and lowest terraced elevation of the Vindhya Mountains. The rocky hill on which the fort is situated is completely isolated from the adjacent range by a chasm or ravine, about 1,200 yards wide. A modern writer has hazarded a conjecture, that it may be regarded as having been formerly an island, situated in an ocean rolling over the plain of Bundelcund. The sides rise rather steeply from the plain, and in the upper part have a nearly perpendicular face of 150 or 180 feet in height, in most places inaccessible. The lower part of the hill consists of syenite, in vast polyhedral masses, fitting into each other, and on the outer surface forming an accessible slope; but the upper part, consisting of sandstone arranged in horizontal strata, presents externally so bold a scarp as to be for the most part impracticable of ascent. Franklin states that he found indications of coal in the vales about the hill; but the granitoid character of the formations affords grounds for questioning the soundness of his conclusion. The summit of the rock, a sort of table-land slightly undulated, is between four and five miles in circuit. Throughout its whole extent it is fortified by a rampart rising from the very edge, in continuation of the scarp of the rock, and at places where the difficulties of the ascent in its natural state might be overcome, access has been guarded against by a facing of masonry. The fortifications are massively constructed of large blocks of stone, laid generally without cement, and about twenty-five feet thick; but in many places they have been allowed to fall into decay. A few small hamlets are scattered over the table-land, and numerous ruins indicate that there must have been a town of some importance, which was supplied with water from tanks yet to be seen. One, at least, of these still contains water at all seasons, though the quality is bad. There are also several palaces, which, though ruinous, appear to be of no great antiquity. One of considerable size is, however, in such repair as to serve for the abode of the small garrison. Temples are numerous, the place being regarded by the Hindoos amongst the holiest class. The divinity

in most repute is Siva, the images of whom are extremely numerous, and all ithyphallic to a degree of the grossest indecency.

Since the capture of the place in 1812, the British soldiers have mutilated many of those hideous and grotesque figures, knocking off their emblems. The principal idol is called Nilkanth, a name of Siva; and the figure is hewed out of the rock on the southern scarp of the hill, the proportions being so huge, that the figure, though represented squatting, is above thirty feet high. Jacquemont describes it as making a most scandalous display of the parts which decency requires to be concealed. At no great distance is a large lingam, three feet high and two in circumference, with a rude resemblance of a countenance having two large silver eyes. In the scarp of the hill is an entrance to a very long flight of steps, penetrating the interior of the rock to a great distance, and terminating at a subterraneous reservoir of clear cool water of great depth, and said by the natives to be unfathomable. Access to the vast circumvallation of this hill is by a pathway sloping up the face of the rock in an oblique manner, at the south-eastern side. It is a rough and narrow passage through jungle, to the lowest gateway, situated a considerable way up the hill; but from that point it is a wide and fine stairway, reaching to the table-land of the fortress, and passing in the recent successively through seven gates, some of them commanded by fortifications reputed impregnable. There are several rude pieces of artillery lying about dismounted, some formed of bars of iron laid longitudinally, and bound round with a flat band of the same material wound about them. At present, the place is in command merely of a lieutenant of British infantry. As a station, it has the advantages of interesting archaeological associations, highly picturesque scenery, and remarkably salubrious climate.

The town is situated at the south-eastern base of the hill, and, though now much decayed, has numerous ruins which prove it to have been once important. According to Ferishtah, Kalleenjur was founded by Kedar Raja, contemporary with Mahomet, the founder of Islam, and consequently about the commencement of the seventh century. It appears to have subsequently become the capital of a considerable realm, as it is related that its rajah, in the year 1022, marched at the head of 36,000 horse, 45,000 foot, and 640 elephants, to oppose Mahmood of Ghazni, who subsequently besieged the fort; but, probably despairing of success, allowed himself to be appeased by submission and rich presents, and evacuated the territory. In 1202, it was besieged by Kootb-ood-deen, the lieutenant of Mahomed Sultan, of Ghor, in Afghanistan, and reduced, in consequence of the supply of water failing. In 1532, it was again subjected to siege by Humayun, emperor of Delhi, who, at the expiration of a month, relinquished his attempt, on receiving a large amount of treasure for his forbearance. In 1543, Sher Shah, the Patan

ruler, who had succeeded in driving Humayun from his throne and kingdom, besieged Kalleenjūr. During the operations, some explosive missile projected against the garrison, rebounded, and, setting fire to some gunpowder, Sher Shāl was scorched so dreadfully, that in a few hours he died in great agony, but not before the assault had succeeded. About the middle of the eighteenth century, it was wrested from the sovereign of Delhi by the rajah of Pūna, owing, it is said, "to the disorders of the times, the troops which garrisoned it being kept in arrears, mutinied for want of pay, and sold their charge." About 1790, Ali Behadur, a Mahratta invader of Bundelcund, besieged Kalleenjūr, but, after a blockade of ten years, died, without making himself master of it. The fort at that time was held by a Brahmin, successor to a killadar or commandant appointed by the rajah of Pūna, but who subsequently assumed independence and the exclusive dominion of the place. He had given much trouble to the British authorities, and committed or connived at numerous depredations on their subjects; and in consequence, on January 19th, 1812, it was besieged by a force consisting of about two regiments of cavalry, six battalions and five companies of infantry. The besieging force took possession of a summit situate north of the fort, and though of small dimensions, scarcely inferior in elevation to it. To this summit, estimated to be 780 feet above the surrounding plain, the British, with very severe toil, dragged up four long iron 18-pounders and two mortars, and the surface being bare rock, the earth requisite to make the batteries was carried up in canvas sacks. About two-thirds lower than this upper battery, or 260 feet above the plain, a battery of two 18-pounders and two 12-pounders was erected on a shoulder of the eminence; but its fire was of little avail, as, in consequence of the great depression, the shot, striking the walls in a direction slanting upwards, glanced off, and produced little effect. As soon as the upper batteries were completed, a British detachment occupied the town, which the enemy evacuated without resistance. The fire of the upper battery, which was alone efficient, was directed against the north-east angle of the rampart, distant half a mile, and in three weeks the breach was considered practicable. On the morning of the 20th of February the besieging batteries opened a brisk fire of round-shot, grape, and shrapnell, to clear the breach, and a storming-party making its way up the steep, rocky, and rugged face of the hill, attempted, by means of scaling-ladders, to mount the ill-opened breach and the portions of perpendicular cliffs presenting themselves in many places. Though the assailants pushed their enterprise with amazing vigour and intrepidity, they suffered so severely by the fire of matchlocks, and from large stones rolled down from the higher ground, that the attempt was found hopeless, and after a struggle of thirty-five minutes, the survivors were recalled. The

storming-party consisted of a column headed by five companies of the King's 53rd infantry, twelve companies of grenadiers, and nine companies of light infantry. The loss of the British was severe: it included two commissioned officers, one serjeant, and ten other men killed; ten commissioned officers, six serjeants, and 114 men wounded. There were, besides, a commissioned officer and forty-one native pioneers wounded. Mundy, a military officer, states, that twenty men and as many old women, with no other arms than the huge stones piled around, could make the place good against hundreds of thousands. The loss of the defenders, however, was very severe, from the fire of the British artillery. When the assault was deemed inevitable, the rajah's family, and all the women within the garrison, were collected into a large stone building, and arrangements made by the defenders to blow it up in the event of the success of the attack. The chabue, however, who held the fort, surrendered it to the British eight days afterwards, on condition of receiving an equivalent in lands in the adjacent plain. In 1854 orders were issued for the destruction of this celebrated fort. Lat. 25°, long. 80° 32'.

KALLEE NUDDEE (EAST), a river of the Doab between the Ganges and Jumna, has its origin in the British district of Mozuffernuggur, at Untwana, at an elevation of 900 feet above the sea, and in lat. 29° 19', long. 77° 51'. Near the town of Meerut, twenty-five miles south from its source, it, on the western side, receives the Khodara Nulla, or Aboo Fuquers, which formerly communicated with the Kallee Nuddee (West) by means of a canal, now dry, and which is attributed by tradition to a native of the name of Muhaimmad Abu Khan. The Khodara nulla passes through the British cantonment, and is traversed by two bridges, one built by the East-India Company, the other by the Begum Sumroo. The latter, in consequence of the inadequate waterway allowed by its three diminutive arches, has sometimes caused serious inconvenience by extensively flooding the cantonment during great inundations, though in the dry season the channel is nearly devoid of water. In the dry season, the Kallee Nuddee is crossed by means of ford, on the route from Meerut to Mhow. At the town of Boolundshuhur the elevation of the river above the sea is 764 feet; and as the distance from its source is eighty miles, the fall in its channel so far is little more than a foot and a half per mile. Close to the town of Boolundshuhur, on the route to Bareilly, it is crossed in the dry season by ford, and during the rains by ferry. The fall between this point and the vicinity of Khoorjah, a further distance of ten miles, does not exceed one foot per mile. Here it takes a south-easterly direction, which it holds for the rest of its course of about 220 miles, falling, three or four miles below Kunnoji, into the Ganges, on the right side, in lat. 27° 1', long. 80° 8', running altogether a dis-

KAL—KAM.

tance of 310 miles. Between the vicinity of Khoorjah and that of Hurduganj, a distance of forty miles, the inclination of the channel is one foot one and a half inch per mile. The route from Allyghur to Bareilly passes it by a brick bridge, about twenty miles below Hurduganj, and the river thence continues navigable downwards to its mouth.

KALLEE NUDDEE (WEST), a river of the Doab between the Jumna and Ganges, rises in the British district of Saharanpore, at an elevation probably of more than 1,000 feet above the sea, and in lat. 30°, long. 77° 47'. It takes a southerly course of about fifty miles, as far as Mozuffernuggur, and a mile west of that town is crossed by the route to Kurnoul, being in that part fordable, except during heavy inundations. About ten miles below Mozuffernuggur it takes a south-westerly direction, and falls into the Hindun, on the east or left side, in lat. 29° 13', long. 77° 35', after a total course of about seventy miles. Formerly it communicated with the Khodara Nulla, running through Meerut, by means of the canal of Mohammed Aboo Khan, which passed off six or eight miles north of Sirdhana.

KALLEE SIND, a river of Malwa, rising on the south side of the Vindhya Mountains, and in lat. 22° 36', long. 76° 26'. It has a course generally northerly, and in lat. 23° 57', long. 76° 16', about ninety miles from its source, receives on the left side the Ludkunda, also rising in the Vindhya range; and on the same side, about sixty miles farther down, it is joined by the united streams of the Ahoor and Amjar, at Gagrour, in lat. 24° 37', long. 76° 19', close to the pass where the Kallee Sind makes its way through the Mokundara range into the more depressed tract of Harouti. The scene is described by Tod as striking. "The ascent to the summit of the ridge was so gradual, that our surprise was complete, when, casting our eye north, we saw the Caly Sind sweeping along the northern face of both fort and town, whence it turns due north, ploughing its serpentine passage, at a depth of full 200 feet below the level of the valley, through three distinct ranges, each chasm or opening appearing in this bold perspective like a huge portal, whence the river gains the yielding plains of Harouti." Thirty-five miles lower down, it receives the Newuj, on the right side. After a total course of about 225 miles, it falls into the Chumbul, on the right side, in lat. 25° 30', long. 76° 23'. At Kundgong, about fifty miles from its mouth, it is crossed on the route from Kotah to Saugor, and at the place of passage has "bed 450 yards wide, and bottom of flat rock-like pavement; banks cut into ravines; water shallow during the fair season, deep and rapid in the rains."

KALLY BHEEL, in the British district of Saugor and Nerbudda, lieutenant-gov. of the N.W. Provinces, a town on the route from Baitool to Burwance, 57 miles W. of the former. Lat. 21° 54', long. 77° 5'.

KALOO.—A town in the Rajpoot state of Jodhpore, on the left bank of the river Loonee, and 62 miles E. from Jodhpore. Lat. 26° 23', long. 74° 7'.

KALOREE, in the jaghire of Jujhur, lieutenant-gov. of the N.W. Provinces, a village on the south-western frontier towards Shekhawati. Lat. 28°, long. 76° 7'.

KALPEE.—See **CALPEE**.

KALSAMREE.—A town in the British district of Chota Nagpore, lieutenant-gov. of Bengal, 241 miles W. by N. of Calcutta. Lat. 23° 30', long. 84° 50'.

KALUNGA.—See **NALAPANI**.

KAMA, in the territory of Bhurtpore, a town on the north-east frontier, towards the British district of Muttra, on the route from the town of Muttra to Ferozepore, in Goorgaon, 39 miles N.W. of the former. Of late years, it appears to have been scarcely visited by Europeans, but, according to Tieffenthaler, who described it about eighty years ago, it was then a small city, fortified with strong walls and towers, and belonging to the rajah of Jeypore. Towards the latter part of the last century, it was taken by Nujuf Khan, the powerful commander-in-chief of the forces of Shah Alum, of Delhi; but subsequently acquired by the rajah of Bhurtpore. Distant N.W. from Muttra 39 miles. Lat. 27° 40', long. 77° 20'.

KAMALPOOR, in the British district of Allahabad, lieutenant-gov. of the N.W. Provinces, a small town on the route from the city of Allahabad to Futtehpore, and 38 miles S.E. of the latter. Close to it is a grove of noble trees, and the surrounding country is a vast field of tombs and ruins, forming, with the intermixed jungle, a very picturesque and romantic scene. The place is named from Kamal, a reputed Mahomedan saint, who, with his son and several of his disciples, lies buried here. Lat. 25° 42', long. 81° 25'.

KAMARUDDINNAGAR, in the British district of Meerut, lieutenant-gov. of the N.W. Provinces, a town in the Kadir or marsh of the Ganges, and on the left bank of its channel, here fordable during the dry season. It is a remarkable and important locality, being one of the very few points at which the Ganges is fordable after leaving the mountains. Amir Khan, the Patan freebooter, on the occasion of his invasion of Rohilcund, in 1805, and when urgently anxious to escape across the river from the British army under General Smith, in active pursuit, searched in vain for a ford for a distance of 100 miles, and was about to march upwards to Hurdwar, where the stream issues from the mountain, until relieved from his embarrassment by a native, who unexpectedly pointed out the ford at Kamaruddinnagar. The amir found the ford not difficult about the 12th of February, at which time, probably, the stream had scarcely risen by any melting of the Himalayan snows; so that he "crossed

KAM—KAN.

with all his horse, the girths even not being wetted, so shallow was the water." On the 15th of the same month, the British army in pursuit crossed the river at the same place, but appear to have missed the best line of ford, as the water, which was half a mile wide, was about breast-high, and in the middle even deeper, inasmuch that the horses there got out of their depth, and took to swimming, and several women and children of the bazar, who were mounted on ponies and on bullocks, were swept away by the current and drowned. On the 12th of March, the amir recrossed at the same place, pursued on the 15th by the British, who found the ford still more difficult than before. **Kamaruddinnagar** is 24 miles E. of Meerut, 55 miles N.E. of Delhi. Lat. 28° 56', long. 78° 10'.

KAMBACHO.—A town in the native state of Nepal, near the left bank of the Kumbachen river, and 51 miles N.W. by N. from Darjeeling. Lat. 27° 37', long. 87° 52'.

KAMGAUM.—A town in one of the recently sequestrated districts of Hyderabad, or dominions of the Nizam, and a celebrated mart for cotton, 72 miles S.W. by W. of Ellichpoor. Lat. 20° 41', long. 76° 37'.

KAMMAH.—A town in the British province of Pegue, on the right bank of the Irrawady, and 23 miles N. by W. from Prome. Lat. 19° 4', long. 94° 56'.

KAMONAH, in the British district of Boolundshuhur, lieutenant-gov. of the N.W. Provinces, a town near the right bank of the East Kallee Nuddee, 64 miles S.E. of Delhi. In 1805, when Amir Khan, the Patan freebooter, made an irruption into the Doab, the zemindar or proprietor of Kamonah favoured his cause, and for some time defended the mud fort of the place against all the efforts of a British besieging force, but finally submitted. The zemindar subsequently again revolted in 1807, when his fort fell into the hands of the British, after a resistance which cost the lives of Captain Fraser and many others of high character and merit. Lat. 28° 8', long. 78° 10'.

KAMPTA, in Bundelcund, a village giving name to a small jaghire or feudal grant held of the East-India Company, the jagheerdar being "free landholder and controller of the said villages." It "is possessed by Rao Gopal Loll. It comprises two villages within the area of one square mile, has a population of 300 souls, and yields a revenue of 1,500 rupees." D'Cruz intimates that Rao Gopal Lal holds the jaghire in compensation of his claim as one of the Chaubis or joint Brahminical possessors of the stronghold of Kaleenjor, surrendered on conditions in 1812. The village is very probably the "Compta" of Franklin's great map of Bundelcund, situate on a feeder of the small river Paisuni, 48 miles S.E. of the town of Banda, 65 S.W. of Allahabad. Lat. 25° 11', long. 80° 55'.

KAMPTEE, in the territory of Nagpoor,

a British cantonment on the route from Hazareebagh to the city of Nagpoor, 565 miles S.W. of the former, nine N.E. of the latter. Though the climate is, from its intertropical situation, hot, the thermometer ranging above 100° in April, yet severe hailstorms are sometimes felt, as in April, 1836, when hailstones fell varying from six to nine inches in circumference. A commodious church was built here in 1833. A few years later, the experiment was tried of substituting the arrangements of a coffee-room for those of a canteen for the troops. The result has been highly successful, the sale of spirituous liquors being in a great measure superseded by that of beer, tea, and coffee. **Kamptee** is in lat. 21° 16', long. 79° 14'.

KAMRA.—A town in the British district of Moorsheadabad, lieutenant-gov. of Bengal, 134 miles N. of Calcutta. Lat. 24° 30', long. 88° 10'.

KAMROIJ.—A town in the native state of Wusravee, presidency of Bombay, on the left bank of the Taptee, and 13 miles N.E. from Surat. Lat. 21° 15', long. 73° 2'.

KAMTAOL.—A town in the British district of Tirhoot, lieutenant-gov. of Bengal, 30 miles N.E. by N. of Dinapoor. Lat. 25° 58', long. 85° 23'.

KAN, or **KAND**, a small river of Malwa, rises on the north side of the Vindhya range, eight miles E. of the British cantonment of Mow, about lat. 22° 36', long. 75° 51'. It takes a northerly course, and, flowing through a very fertile country by the city of Indore, is joined by the Sirsooty; it then takes a north-easterly direction for about nineteen miles, and, winding by the town of Samer, falls into the river Ghatty, its total length being forty-five miles. On the route from Mow to Oojein, it is crossed, about twelve miles from its source, "by a good ford, water about one foot deep during the fair season."

KANACGERRI.—A town in one of the recently sequestrated districts of Hyderabad, or dominions of the Nizam, 129 miles E. by S. of Belgaum. Lat. 15° 34', long. 76° 29'.

KANADKHAID.—A town in Hyderabad, or dominions of the Nizam, situate on the left bank of the Doodna river, 158 miles N.W. from Hyderabad. Lat. 19° 20', long. 77° 5'.

KANAR.—A town in Gwalior, or possessions of Scindia, situate on the left bank of the Asun river, and 86 miles W.S.W. from Gwalior. Lat. 26° 1', long. 77° 48'.

KANARAK.—See **CANARAC**.

KANASIR, in the Rajpoot state of Jodhpoor, a village on the route from Pokhurn to Balmeer, and 60 miles N. of the latter. It is situate on a sandhill near the western side of an extensive jungle of large bushes of the ber or jujube, from fifteen to twenty feet high. Lat. 26° 19', long. 71° 45'.

KANDA.—A town in the principality of Cashmere, or dominions of Gholab Singh,

situate on the right bank of the Jhelum river, and 130 miles E. from Peshawur. Lat. $34^{\circ} 14'$, long. $73^{\circ} 44'$.

KANDA, in the British district of Ghurwal, lieutenant-gov. of the N.W. Provinces, a town on the route from Sireenuggur to the Rakus Lake, 23 miles E. by N. of the former. Lat. $30^{\circ} 19'$, long. $79^{\circ} 27'$.

KANDAL GHATTJ, in Gurhwal, a pass over a ridge rising above the right bank of the Bhageerettee, as the Ganges is called in the upper part of its course. It was a secondary station in the trigonometrical survey of the Himalayas. Elevation above the sea 11,893 feet. Lat. $30^{\circ} 59'$, long. $78^{\circ} 43'$.

KANDCUTTE.—A town in the British district of Ramgurbh, lieutenant-gov. of Bengal, 246 miles N.W. by W. of Calcutta. Lat. $24^{\circ} 19'$, long. $85^{\circ} 7'$.

KANDLAH, in the British district of Muzaffarnugur, lieutenant-gov. of the N.W. Provinces, a village on the right or west bank of the Doab Canal. Population 7,062. Lat. $29^{\circ} 19'$, long. $77^{\circ} 20'$.

KANEEMYO.—A town of Burmah, situate on the right bank of the Khyendwen river, and 80 miles W.N.W. from Ava. Lat. $22^{\circ} 25'$, long. $94^{\circ} 59'$.

KANEEREE.—A town in one of the recently sequestered districts of Hyderabad, or dominions of the Nizam, situate 58 miles S.W. of Ellichpoor. Lat. $20^{\circ} 39'$, long. $76^{\circ} 54'$.

KANEWARA, in the British district of Saugur and Nerbudda, lieutenant-gov. of the N.W. Provinces, a town on the route from Jubbulpore to Seoni, 18 miles E.N.E. of the latter. Lat. $22^{\circ} 9'$, long. $79^{\circ} 55'$.

KANGAL.—A petty fort on a small feeder of the Sutluj, situate two miles from the left bank of that river. Elevation above the sea 6,311 feet. Lat. $31^{\circ} 16'$, long. $77^{\circ} 25'$.

KANGAN.—A town in the principality of Cashmere, or Gholab Singh's dominions, 161 miles E. from Attock, and 106 miles N. from Jamos. Lat. $34^{\circ} 17'$, long. $75^{\circ} 3'$.

KANGAON.—A town in the British province of Nagpoor, situate five miles from the left bank of the Warda river, and 54 miles S.W. from Nagpoor. Lat. $20^{\circ} 31'$, long. $78^{\circ} 40'$.

KANGCHANG.—See KINCHINJUNGA.

KANGLA.—A town in the native state of Nepal, situate on the left bank of the Dud Coosy river, and 76 miles E. by S. from Khatmandoo. Lat. $27^{\circ} 30'$, long. $86^{\circ} 30'$.

KANGRA, in Sirmoor, a summit of the mountains between the Giree and Tons, and nearly equidistant, or about three miles from each river. It is composed of limestone. During the great trigonometrical survey of the Himalaya, it was one of the stations of the small series of triangles. Elevation above the sea 6,660 feet. Lat. $30^{\circ} 34'$, long. $77^{\circ} 47'$.

KANGRA, or KOT KANGRA, in the north-east of the Punjab, among the mountains in the lower ranges to the south of the Himalaya, in an extensive hill fort situated on the top of an eminence, about 150 feet above the Ban Gunga, near its confluence with the Beas. The eminence is about three miles in circuit, bounded for the most part by precipices nearly perpendicular, and, in places of less declivity, rendered inaccessible by masonry and ramparts. Its position is in all respects such, that Vigne considers that by European engineers it might be rendered impregnable. About the beginning of the present century it belonged to Sansa-Chand, who, being attacked by the Goorkhas, defended it for four years against them, but finally gave it up to Runjeet Singh, who expelled the invaders. Kot Kangra is in lat. $32^{\circ} 5'$, long. $76^{\circ} 18'$. Soon after the Punjab became a British possession, the vicinity of Kangra was selected as one of the localities for the culture of the tea-tree. The experiment commenced upon a petty scale, and in 1851 only two small plantations had been made; but the high character of the produce satisfied the government that the soil and climate were admirably adapted to the growth of the plant, and authority was given for the formation of an extensive plantation at the foot of the Chumba range of mountains. Later reports fully confirm the favourable anticipations formed by the government.

KANGRAULI, in the British district of Goruckpore, lieutenant-gov. of the N.W. Provinces, a small town near the south-eastern frontier, towards the British district of Sarun. It contains, according to Buchanan, 300 houses, which would assign it a population of about 1,800 persons. Distance S.E. from Goruckpore cantonment 55 miles. Lat. $26^{\circ} 16'$, long. $84^{\circ} 2'$.

KANGYAM.—A town in the British district of Coimbatore, presidency of Madras, 158 miles E.S.E. of Cannanore. Lat. 11° , long. $77^{\circ} 36'$.

KANHAN.—A river rising in the Deogarh Mountains, in the British territory of Saugor and Nerbudda, about lat. $21^{\circ} 54'$, long. $78^{\circ} 11'$. Holding a tortuous course, but generally southerly, for about 130 miles, it receives on its left side, in lat. $21^{\circ} 17'$, long. $79^{\circ} 13'$, the Pench, flowing from the north. The joint stream, from the confluence, continues to hold a south-easterly course of about forty-five miles, passing by the British cantonment at Kamptee, and falls into the Waingunga on the right side, in lat. $21^{\circ} 5'$, long. $79^{\circ} 39'$. At Kamptee, about forty-three miles above the mouth, the river's bed is 500 yards wide. Timber, both for building and firewood, is floated down the river in considerable quantities, and in smaller quantities is transported upwards, by tracking against the stream. The river is also serviceable for the transport of military stores.

KAN.

KANHOOR.—A town in the British district of Ahmednuggur, presidency of Bombay, 24 miles W. of Ahmednuggur. Lat. 19° 7', long. 74° 24'.

KANIKA.—A town in the principality of Cashmere, or dominions of Gholab Singh, 104 miles N.N.E. from Kangra, and 113 miles S.E. from Sirinagur. Lat. 33° 29', long. 76° 49'.

KANJOLE.—A town in the British district of Bhagulpur, lieutenant-gov. of Bengal, 161 miles N. by W. of Calcutta. Lat. 24° 49', long. 87° 50'.

KANKA, in the British district of Allygurh, lieutenant-gov. of the N.W. Provinces, a village on the route from the cantonment of Allygurh to that of Muttra, and 14 miles S.W. of the former. Lat. 27° 43', long. 78° 3'.

KANKRAULI, in the Rajpoot territory of Oodeypoor, a town on the route from Neemuch to Deesa, 79 miles N.W. of former, 171 N.E. of latter. It is situate at the south extremity of a considerable lake, called Raj Samundar, and is a large town, with a good bazar. Lat. 24° 50', long. 73° 56'.

KANNEH.—A town in Cashmere, or Gholab Singh's dominions, situate on the left bank of the Jhelum river, and 110 miles E. from Peshawur. Lat. 34° 8', long. 73° 30'.

KANODE, in the Rajpoot state of Jessulmere, a town north-east of the city of Jessulmere. It is situate at the southern border of an extensive lake of salt water, stretching to the north about fifteen miles, with a breadth of about eight. Such are, however, the dimensions during the periodical rains only, as at other times it nearly disappears, leaving the ground over which it had spread encrusted with salt, which is removed and sold for the benefit of the rawul or ruler of Jessulmere. The lake, when fullest, is discharged on its eastern side by a stream, which, flowing about thirty miles in an easterly direction, is lost in the sands of Jodhpoor or Marwar. Kanode is in lat. 27° 8', long. 71° 5'.

KANOJE.—See KUNNOUJ.

KANOOND, in the jaghire of Jujhur, lieutenant-gov. of the N.W. Provinces, a town on the route from Hansie to Neemuch, and 70 miles S. of the former. During the troubled period which preceded the expulsion of the Mahrattas by Lord Lake, it was an important place, being one of the principal strongholds of Vavon Rao, an influential chief of that people. It at present has a large bazar, and is abundantly supplied with water, which is, however, rather brackish. The road in this part of the route is heavy and sandy. The surrounding country, though having occasional patches of cultivation, is described by Elphinstone as in general very barren. "On approaching Canound, we had the first specimen of the desert to which we were looking forward with anxious curiosity. Three miles before reaching that place, we came to sandhills, which at first were covered

with bushes, but afterwards were naked piles of loose sand, rising one after another, like the waves of the sea, and marked on the surface by the wind, like drifted snow. There were roads through them, made solid by the treading of animals; but off the road our horses sunk into the sand above the knee." Lat. 23° 14', long. 76° 13'.

KANPOOR, in the Rajpoot state of Jodhpoor, a village on the route from Nusserabad to Deesa, and 159 miles S.W. of the former. Lat. 25° 11', long. 73° 10'.

KANSBANS, a river of Cuttack, rising in lat. 21° 13', long. 86° 31', a few miles S.E. of the town of Koparea, in the British district of Balasore, through which it runs in an easterly direction for thirty miles, and falls into the Bay of Bengal, in lat. 21° 9', long. 86° 53'.

KANT, in the British district of Shahjehanpur, lieutenant-gov. of the N.W. Provinces, a small town on the route from Futtehgurh to the cantonment of Shahjehanpur, and 10 miles S.W. of the latter. It has a small bazar and abundance of water. Lat. 27° 49', long. 79° 51'.

KANTAL, in the north-east of Cashmere, a lofty mountain south of the pass called Bultul by Vigne and modern geographers. Through this pass lies one of the principal routes from Cashmere to Ladakh and Bultistan. Its crest forms a division between the basin of the Indus and that of the Jhelum; the Dras river, which rises here, flowing northwards to the former river, and the Sinde, in a south-west direction, to the Jhelum. The elevation of this pass is 10,500 feet. Lat. 34° 15', long. 75° 39'.

KANTANAGAR, in the British district of Purnea, lieutenant-gov. of Bengal, a town on the south boundary, and on the left bank of an offset from the Ganges, 30 miles S. from the town of Purnea. It contains 700 houses, and, according to the usually-received average of inmates to houses, 3,500 persons. Lat. 25° 22', long. 87° 28'.

KANTEE, in the jaghire of Jujhur, lieutenant-gov. of the N.W. Provinces, a village on the route from Delhi to Narnol, and 14 miles E. of the latter. Lat. 28° 3', long. 76° 23'.

KANTEE, in the British district of Allahabad, lieutenant-gov. of the N.W. Provinces, a small town on the route by the Sobagi Pass from Allahabad to Rewa, and 16 miles S. of the former city. It has a few shops: water is obtained from a tank and wells. Lat. 25° 15', long. 81° 51'.

KANUM, in Bussahir, a small town, the principal place of the district of Koonawar, is situate on the declivity of a recess embosomed in lofty mountains, and near a feeder of the Sutluj, which flows past at the distance of about a mile. The sloping surface is formed into terraces by means of rough and massive embankments of stone, and the more extensive levels thus made are overlaid with earth and cultivated, those narrower forming the sites of houses rising above each other in such a

manner, that the flat roofs of those beneath are platforms in front of the upper. Interspersed through this straggling collection of dwellings, are fine groves of poplar, and flourishing orchards of peach, apple, apricot, and walnut-trees. This prosperity results from the judicious employment of irrigation, the means of which are supplied from the torrent flowing down the valley, as the great aridity of the climate otherwise precludes vegetation. Here is a celebrated Buddhist temple, provided with a library of books, printed in the Tibetan language; one of these is an encyclopædia, in 225 volumes; another a system of theology, in 100. The encyclopædia is considered by Jacquemont a translation from the Sanscrit. The printing is distinct, and done with wooden types. Kanum is the fountain-head of learning and faith for Koonawur, and its lama is the superior of all others in that tract, in fact, the great pontiff of the country. He is elected by the lamas from their own number, but the choice requires the ratification of the lama of Ladakh. The dress of the grand lama of Kanum closely resembles that of a Roman Catholic bishop; the mitre is exactly the same. Jacquemont gives a lively description of one of their grotesque ceremonies. The grand lama bearing a bell, and his followers drums, cymbals, and other noisy instruments, kept time to a slow and solemn chant; whilst three other lamas, masked, danced at first in measured paces, but finally with the wildest and most furious gesticulations and capers, the villagers standing by, and, with the most boisterous mirth, expressing their gratification. The ceremony terminated by the grand lama sipping water from a chalice, and throwing into a fire a cake, decked with sprigs of juniper, which was no sooner done, than the actors departed peaceably, the whole scene being intended to display the efficacy of the prayers and rites of the priests in rendering the malignant demons powerless. Jacquemont, during his brief stay at Kanum, visited Csoma de Koros, the Hungarian traveller, then secluded there, and closely occupied in the study of Tibetan language, theology, and antiquities. Kanum is in charge of an hereditary wazir, who governs it for the rajah of Bussahir, to whom he forwards the trifling revenue. It contains about sixty or seventy families; but as in that inclement climate and sequestered locality the physical exigencies of the population are numerous, and must be supplied principally from domestic resources, each homestead is extensive, and has many inmates; and the commercial character of the inhabitants causes a small warehouse to be a usual appurtenance to a residence. Elevation above the sea about 9,296 feet. Lat. $31^{\circ} 40'$, long. $78^{\circ} 30'$.

KANUNA.—A town in the Rajpoot state of Jodhpoor, situate on the right bank of the Loonee river, and 53 miles S.W. from Jodhpoor. Lat. $25^{\circ} 50'$, long. $72^{\circ} 30'$.

KANUWAH, in the Baree Doab division

of the Punjab, a town situated on the right bank of the river Chukki, 83 miles E. by N. of the town of Lahore. Lat. $31^{\circ} 55'$, long. $75^{\circ} 30'$.

KANWARA.—A town of Malwa, in the native state of Tonk, situate on the right bank of the Ahoo river, and 178 miles W. by N. from Saugur. Lat. $24^{\circ} 25'$, long. $76^{\circ} 4'$.

KAOLAIR.—A town in Hyderabad, or dominions of the Nizam, 137 miles N.N.W. from Hyderabad, and 137 miles S. by E. from Ellichpoor. Lat. $19^{\circ} 17'$, long. 78° .

KAOMALLA.—A town in the Rajpoot state of Jodhpoor, 106 miles S.W. by S. from Jodhpoor, and 54 miles N. by E. from Deesa. Lat. $24^{\circ} 58'$, long. $72^{\circ} 21'$.

KAONDAUR.—A town of Orissa, on the south-west frontier of Bengal, in the native zemindarry of Jeypoor, 22 miles E. from Jeypoor, and 76 miles N.W. from Visianagrum. Lat. $18^{\circ} 59'$, long. $82^{\circ} 46'$.

KAPALADROOG, in the Mysore, a fort on a steep hill producing sandal-wood. It was selected by Tipoo Sultan for the incarceration of those unhappy persons who incurred his especial displeasure. The choice was probably made with reference to the insalubrity of the place, the air and water being extremely bad, and the quality of the latter being rendered more deleterious by throwing into the wells branches of euphorbium and putrescent animal substances. These sources of death, further aided by unwholesome food, told on the wretched inmates of the place so fearfully and fatally, that it is said "no native prisoner ever returned to detail the horrors of this dungeon." Kapaladroog is situate in the rough mountainous tract N.E. of Seringapatam, from which it is distant 30 miles. Lat. $12^{\circ} 30'$, long. $77^{\circ} 21'$.

KAPOORTHELLA, in the Julinder Doab division of the Punjab, a town situated eight miles from the left bank of the river Beas, 75 miles E. by S. of the town of Lahore. Lat. $31^{\circ} 24'$, long. $75^{\circ} 25'$.

KAPRAIRA, in the Rajpoot state of Jodhpoor, a village or small town on the route from Nusseerabad to the town of Jodhpoor, and 29 miles E. of the latter. It contains 500 houses. Lat. $26^{\circ} 17'$, long. $73^{\circ} 36'$.

KAPURRA.—A town in the Rajpoot state of Boondee, five miles from the right bank of the river Chumbul, and 29 miles E.S.E. from Boondee. Lat. $25^{\circ} 22'$, long. $76^{\circ} 10'$.

KARAKNARIL.—A town in Hyderabad, or the Nizam's dominions, 60 miles N.N.E. from Ahmednuggur, and 60 miles S.E. by S. from Malligaum. Lat. $19^{\circ} 52'$, long. $75^{\circ} 7'$.

KARANJA, in the presidency of Bombay, an island on the east side of the harbour of Bombay, situate south of the island of Elephanta, and separated by a narrow channel from the mainland. It is four miles long, and nearly two broad, and is low, with the ex-

ception of two remarkable hills, called the Great and Little Karanja Hills. Karanja Little Hill is on the north part of the island, and has an irregular outline. The great hill, which is on the south part of the island, is very conspicuous. Its shape is somewhat convex, but with a flat space on the summit, and a steep declivity at each end. The town of Karanja is a small assemblage of low ill-built houses, situate near a tank. On the south hill, and on a site very difficult of access, is the fort, now ruinous, and at no time strong, mounting fourteen guns, but offering no resistance to attack except from its difficulty of approach. The less-elevated part of the island is very fertile, "abounding with rice-fields, coconut, palmyra, mango, and tamarind-trees; the trees being filled with monkeys, parrots, owls, and singing-birds of various kinds." Karanja was an early possession of the Portuguese; and in 1661, when Bombay was ceded as part of the dowry of the Infanta of Portugal, on her marriage with Charles II., was retained, notwithstanding the protest of the English authorities that its retention was a violation of the treaty. The Portuguese, moreover, availed themselves of its possession to give every possible annoyance to the settlement of Bombay. It soon after (in 1683) fell into the hands of Sambaji, the Mahratta chief. In 1774, it was taken by the English, and formally ceded by the Mahratta government in 1775, the cession being confirmed by an additional clause in the treaty of Poorender, concluded in the following year. Karanja is in lat. $18^{\circ} 51'$, long. $73^{\circ} 2'$.

KARANO.—A town in the British province of Nagpore, 102 miles S.E. by S. from Nagpore, and 55 miles E. by N. from Chanda. Lat. $20^{\circ} 8'$, long. $80^{\circ} 14'$.

KAREAL.—See **KERIAL**.

KAREANS.—A town in the British district of Amherst, in the Tenasserim provinces, 58 miles E. by S. of Moulmein. Lat. $16^{\circ} 20'$, long. $98^{\circ} 34'$.

KARENUR.—A town in the British district of Malabar, presidency of Madras, 51 miles S.E. by S. of Cannanore. Lat. $11^{\circ} 18'$, long. $75^{\circ} 56'$.

KAREPUTTUN.—A town in the British district of Ratnageriah, presidency of Bombay, 174 miles S.S.E. of Bombay. Lat. $16^{\circ} 32'$, long. $73^{\circ} 41'$.

KARGVIL.—A town in the principality of Cashmere, or dominions of Gholab Singh, two miles from the right bank of the river Dras, and 79 miles E.N.E. from Sirinagur. Lat. $34^{\circ} 32'$, long. $76^{\circ} 15'$.

KARHLA, or **KARBLA**, in the Rajpoot state of Jodhpoor, a village on the route from Neemuch, *via* Palee, to the city of Jodhpoor, and 33 miles S. of the latter. Supplies are scanty, but there is good water in tanks. The road to the south is excellent, over an open

country; to the north, very sandy, over undulating ground. Lat. $25^{\circ} 51'$, long. $73^{\circ} 23'$.

KARIAN, in the Jetch Doonab division of the Punjab, a town situated 15 miles from the left bank of the Jhelum, 88 miles N. by W. of the town of Lahore. Lat. $32^{\circ} 47'$, long. $73^{\circ} 54'$.

KARICAL.—A French settlement within the limits of the British district of Tanjore, presidency of Madras, situate near the Croomandel coast of the Bay of Bengal, on a small estuary of the river Cauvery. In the dry season, the mouth of this estuary is quite obstructed by a bar of sand, which, during the periodical inundations of the Cauvery, is so far swept away, that the channel is navigable for coasting craft. The French territory, which is completely surrounded by the British district of Tanjore, contains an area of 63 square miles. It was restored at the general pacification in 1814, on condition that no fortifications should be erected thereon. The population is estimated, for town and territory, at—Europeans, 43; East-Indians, 71; natives, 49,193: giving a total of 49,307. By the terms of the treaty, no military are to be retained but such as may be required for purposes of police. The civil establishment consists of a governor, a colonial inspector, a commandant of the troops, a royal judge, and other officers. Distant from Tanjore, E., 47 miles; Madras, S., 150 miles. Lat. $10^{\circ} 55'$, long. $79^{\circ} 53'$.

KARINJA.—A town in the British province of Nagpore, 46 miles W. from Nagpore, and 59 miles E. from Ellichpore. Lat. $21^{\circ} 10'$, long. $78^{\circ} 28'$.

KARINJA, in the British district of Saugor and Nerbudda, lieutenant-gov. of the N.W. Provinces, a town on the route from Baitool to Ellichpore, 44 miles S.S.W. of the former. Lat. $21^{\circ} 18'$, long. $77^{\circ} 40'$.

KARIS, in the British district of Allypore, lieutenant-gov. of the N.W. Provinces, a village on the route from the cantonment of Allypore to that of Muttra, and 18 miles S.W. of the former. Lat. $27^{\circ} 39'$, long. $78^{\circ} 2'$.

KARKEEKOT.—A town in the native state of Nepal, three miles from the left bank of the Gunduk river, and 131 miles N.W. by W. from Khatmandoo. Lat. $28^{\circ} 27'$, long. $83^{\circ} 21'$.

KARKULL, in the British district of South Canara, presidency of Madras, a town on the stream discharging itself, a short distance below, into a small lake. It is without fortifications, and near it are the ruins of the palace of the Byrasu Wodears, rajahs of the Jain persuasion, and formerly rulers of this country. Here is an image of Gomuta Raya, who, according to tradition, had been once a powerful king. It "is made of one piece of granite, the extreme dimensions of which above-ground are, thirty-eight feet in height, ten and a half feet in

KAR.

breadth, and ten feet in thickness ;" and there are probably three feet more underground. Karkull is 26 miles N.E. of Mangalore, 360 W. of Madras. Lat. 13° 13', long. 75° 3'.

KARLEE.—A village in the British collectorate of Poona, presidency of Bombay, situate on the main road from Bombay to Poona, seven miles E. of the Phore Ghaut. That which chiefly gives distinction to Karlee, is the cavern-temple, with its accessories of attendant excavations, in conformity with the view taken by Colonel Sykes, who observes, "These monasteries consisted of a chapel or chapels, common halls or refectories, with sleeping-cells around them," and other appendages. Heber describes it as hewn on the face of a precipice about two-thirds up the side of a steep hill, rising with a very scarp and regular talus to the height probably of 800 feet above the plain. Besides the principal temple, the excavations contain many smaller apartments, evidently intended for the lodging of monks or hermits. Some of these are very highly ornamented. The temple itself is approached by a narrow path winding among trees, brushwood, and fragments of rock, and entered by a noble arch. In the front is a pillar surmounted by three lions back to back. Within the portico are several colossal figures of elephants, on each of which is a mohout, very well carved, and a howdah with two persons seated in it. Naked male and female figures in alto-relievo, and somewhat larger than life, cover the screen on each side of the door. Both as to dimensions and elaborate ornament, this temple merits high distinction among buildings of its kind. It contains no visible object of devotion, except the mystic chhattah or umbrella. Buddhist symbols predominate throughout. All the various cave-temples have much in common, as may be seen to a certain extent in the article ELEPHANTA, in this work. Karlee is distant E. from Bombay 40 miles, N.W. from Poona 32. Lat. 18° 46', long. 73° 31'.

KARMEL, in the Punjab, a village on the route from Ramnuggur to Pind Dewaun Khan, and six miles N.W. of the former town. It is situate near the right bank of the Chenaub, and close to the ferry, which is one of great importance, as the river, when fullest, is above a mile broad, and the traffic considerable. Lat. 32° 26', long. 73° 46'.

KARNAPRAYAG, in the British district of Kumaon, lieutenant-gov. of the N.W. Provinces, a village at the prayag or confluence of the Aluknunda and Pindar rivers. It contains a math or shrine of Karna, a mythological personage revered by the Hindoos ; and hence is one of the five prayags pilgrimage to which is enjoined in the Shastras. The Pindar is here crossed by a jhula or rude suspension-bridge of ropes. Elevation above the sea 2,560 feet. Lat. 30° 15', long. 79° 16'.

KAROOMBA.—An island situated in the Gulf of Cutch, four miles from the coast of the peninsula of Kattywar, one and a half mile

long, N. to S., and three miles broad, E. to W. Lat. 22° 27', long. 69° 47'.

KAROORAH.—A town in the British province of Nagpoor, four miles from the right bank of the Soondoo river, and 123 miles W. by S. from Sumbulpoor. Lat. 21° 1', long. 82° 7'.

KAROW RIVER, rising on the south-west frontier of Bengal, in lat. 22° 50', long. 85° 13', in the British territory of Singbloom, and, flowing in a circuitous, but generally north-easterly course, through the British district of Chota Nagpoor for eighty-five miles, falls into the Soobunrecka river, on its right bank, in lat. 23° 16', long. 85° 52'.

KAROWKE.—See GAROWKE.

KARRAN.—A town in the native state of Bombra, on the south-west frontier of Bengal, situate on the left bank of one of the branches of the Braminy river, and 61 miles E. from Sumbulpoor. Lat. 21° 27', long. 84° 59'.

KARTINAAD, in Malabar, a district or raj extending from the seacoast up the western declivity of the Western Ghats. The more level parts towards the sea are very fertile and productive, especially of rice ; but the dreadful devastations of Tippoo Sultan threw the country into such a state of confusion and weakness, that the grain produced was not sufficient for the consumption of the inhabitants, who, in 1800, imported from the southern districts as well as from Canara. In the eastern part of the district the hills are much overgrown with wood, which the Nairs, constituting the majority of the population, regard as a protection against invasion. Amongst those woods cardamoms are of natural growth. Those who bring them to market search such places as are thickly covered with bushes, and have many springs and small streams, and they generally succeed in finding some scattered plants of the valued shrub. They then clear away the trees and underwood around the plants, which multiply abundantly during the rainy season, and in the fourth year flower and produce their fruit. Coolness is requisite for the perfection of this plant, which consequently can be successfully managed only on lofty hills. The Nairs of this country exhibit in character and manners all the revolting peculiarities of their caste. The ancestor of the rajah of Kartinatad, or Cadutinada as it is called by the natives, was a Nair of eminence, who, about 1564, wrested this tract from the rajah of Cherikal, and exercised absolute power within it ; as did his successors, until the invasion of Tippoo Sultan. On the expulsion of that tyrant, in 1792, the then rajah was restored. A tribute is paid to the East-India Company, but in other respects the rajah assumes sovereign sway. He resides at Kuthipuram, in lat. 11° 42', long. 75° 44'.

KARUB.—A town in the British district of Patna, lieutenant-gov. of Bengal, 15 miles S.S.E. of Patna. Lat. 25° 21', long. 85° 21'.

KAR—KAT.

KARUNJA, in Hyderabad, or territory of the Nizam, a town on the northern declivity of the range of mountains bounding the valley of the Taptee on the south. Distance from Ellichpoor, S., 53 miles; Aurungabad, N.E., 140; Hyderabad, N., 225. Lat. 20° 28', long. 77° 34'.

KASEENUGUR.—A town in the independent state of Tipperah, presidency of Bengal, situate on the right bank of one of the branches of the Barak, and 32 miles S.S.E. from Silhet. Lat. 24° 32', long. 92° 10'.

KASEGAON.—A town in the British province of Sattara, presidency of Bombay, 88 miles E. of Sattara. Lat. 17° 36', long. 75° 22'.

KASHEEPORE, in the British district of Goorgaon, lieut.-gov. of the N.W. Provinces, a village on the right bank of the Jumna. Distance S.E. from Delhi 48 miles. Lat. 28° 1', long. 77° 33'.

KASHIPOOR, in the British district of Moradabad, lieut.-gov. of the N.W. Provinces, a town on the route from the town of Moradabad to Almora, and 31 miles N. of the former. It is situate in a marshy plain, overrun with gigantic grass, intermixed with bushes and trees. Heber observes, that he had "never seen a more feverish or tigerly country." It is a famous place of Hindoo pilgrimage, having several temples, and a holy tank, where pilgrims bathe, on their way to Badrinath. A short distance to the south-east is a fort, now in ruins. There is a brisk transit-trade in this town, between Kumaon and Chinese Tartary on one side, and Hindostan on the other; and some of the traders are opulent. The natives attribute to it great antiquity, alleging it to have been built 5,000 years ago, by a renowned personage called Cashi. Elevation above the sea 756 feet. Lat. 29° 13', long. 79° 1'.

KASHMERE.—See **CASHMERE**.

KASHUNG, or **KOZHANG**, in Bussahir, a river, or rather torrent, in the district of Koonawur, is crossed by the route from Pangi to Sungnum, in lat. 31° 37', long. 78° 22', and at an elevation of 8,240 feet above the sea. Its volume of water is considerable, and is hurried along with extreme violence, noise, and rapidity, forming a complete line of foam. The route crosses it by means of a good sanga or wooden bridge; about two miles below which, flowing in a south-easterly direction, it falls into the Sutlej, in lat. 31° 36', long. 78° 22'.

KASIMKA.—A town in the native state of Bhawalpoor, four miles from the left bank of the Ghara river, and 91 miles N.E. by E. from Bhawalpoor. Lat. 30° 2', long. 73° 8'.

KASIMPOOR, or **KASIMABAD**, in the British district of Allyghur, lieut.-gov. of the N.W. Provinces, a town on the route from Futtehgurh to Meerut, by Khasgunje, and 101 miles N.W. of Futtehgurh. It is situate near the left bank of the Kalee Nuddee (East), in an open country but partially cultivated. Lat. 28° 3', long. 78° 19'.

KASIN.—A town in the Cis-Sutlej Seik state of Mundote, situate on the left bank of the river, and 33 miles S.W. by W. from Ferozepoor. Lat. 30° 38', long. 74° 14'.

KASNIKOTA.—A town in the British district of Vizagapatam, presidency of Madras, 22 miles W. of Vizagapatam. Lat. 17° 40', long. 83° 1'.

KASNUH, in the British district of Boondshuhur, lieut.-gov. of the N.W. Provinces, a town, the principal place of the pergunnah of the same name, on the route from Delhi to Muttra, by the left bank of the Jumna, and 25 miles S.E. of the former. Lat. 28° 26', long. 77° 36'.

KASSEHGAON.—A town in the British province of Sattara, presidency of Bombay, 154 miles S.E. by S. of Bombay. Lat. 17° 8', long. 74° 16'.

KASSIAREE.—A town in the British district of Midnapoor, lieut.-gov. of Bengal, 80 miles W.S.W. of Calcutta. Lat. 22° 8', long. 87° 17'.

KASSYE GOPANG, in Sinde, a town on the route from Hydrabad to Sehwan, by the way of Kotree, and 25 miles N. of Hydrabad. It is situate on the right bank of the Indus, in a fertile and well-cultivated country. Lat. 25° 46', long. 68° 22'.

KATELEE.—A town in the British district of Mymensing, lieut.-gov. of Bengal, 77 miles E. of Dinajpoor. Lat. 25° 27', long. 89° 50'.

KATHA MYO.—A town of Burmah, situate on the right bank of the Irawaddy river, and 161 miles N. from Ava. Lat. 24° 11', long. 96° 14'.

KATH KI NAO, in the British district of Kumaon, lieut.-gov. of the N.W. Provinces, a summit in the range dividing the valley of the Western Ramgunga river from that of the Kosilla. On it are a fort and stockade, held by the Goorkas during their occupation of the country. Elevation above the sea 5,001 feet. Lat. 29° 34', long. 79° 10'.

KATHOJIYA.—A town in the native state of Nepal, three miles from the right bank of the Trisul Gunga river, and 35 miles W.N.W. from Khatmandoo. Lat. 27° 53', long. 84° 47'.

KATHORI, in the Rajpoot state of Jessulmere, a village on the route from the town of Jessulmere to Bahawalpoor, and 16 miles N. of the former. It is supplied with water from a fine tank. There are several wells, but the water is brackish. The village is inhabited by Puliwals, called elsewhere Boras, a tribe of Brahmans engaged principally in commercial pursuits. Lat. 27° 7', long. 70° 59'.

KATHOURA, in the British district of Rohtuk, lieut.-gov. of the N.W. Provinces, a village on the route from Delhi to Hansee, and 37 miles N.E. of the former. Lat. 28° 50', long. 76° 45'.

KATI, or **KASTEE**, in Jaunsar, a village among the mountains on the right of the Jumna, and two miles from its bank. It is

situate in a chasm, inclosed on every side by declivities, and hence the air is remarkably close, oppressive, and unhealthy. Lat. $30^{\circ} 36'$, long. $78^{\circ} 3'$.

KATI.—A town in Hyderabad, or dominions of the Nizam, situate 141 miles E. by S. of Poonah. Lat. $17^{\circ} 58'$, long. $75^{\circ} 58'$.

KATKARINJEH.—A town of Orissa, on the south-west frontier of Bengal, in the native state of Keunjur, 185 miles W. by S. from Calcutta, and 110 miles E.N.E. from Sumbulpoor. Lat. $21^{\circ} 55'$, long. $85^{\circ} 40'$.

KATMANDOO.—See **KHATMANDOO**.

KATNUGGUR.—A town in the British district of Midnapoor, lieut.-gov. of Bengal, 77 miles S.W. by W. of Calcutta. Lat. $22^{\circ} 1'$, long. $87^{\circ} 22'$.

KATOH.—A town in the Rajpoot state of Jodhpoor, 94 miles N.E. by E. from Jodhpoor, and 51 miles N.W. by N. from Ajmeer. Lat. $27^{\circ} 7'$, long. $74^{\circ} 19'$.

KATOLE.—A town in the British province of Nagpoor, situate on the left bank of one of the branches of the Warda, and 35 miles W. by N. from Nagpoor. Lat. $21^{\circ} 16'$, long. $78^{\circ} 37'$.

KATTEREWAH, in the British district of Saugur and Nerbudda, lieut.-gov. of the N.W. Provinces, a town on the route from Jubbulpoor to Ruttunpoor, 76 miles S.E. of the former. Lat. $22^{\circ} 29'$, long. $80^{\circ} 57'$.

KATTYWAR.—A province comprehending the whole of the peninsula of Guzerat, the name of one of the districts having been thus extended. On the north and north-west the peninsula is bounded by the Runn and the Gulf of Cutch; on the south-west and south by the Arabian Sea; on the east by the Gulf of Cambay and the British district of Ahmedabad. It lies between lat. $20^{\circ} 42'$ — $23^{\circ} 10'$, long. $69^{\circ} 5'$ — $72^{\circ} 14'$, and has an area of 19,850 square miles. It is divided into ten districts, called prants, named respectively, Jhalawar, Kattywar, Muchoo Caunta, Hallar, Soruth, Burda, Gohilwar, Oond Surweya, Babriwar, and Okamundel. These districts are again subdivided into the separate possessions of a host of Hindoo chiefs, some of whom are tributary to the British government, others to the Guicowar. The Peishwa formerly claimed very considerable tributary rights in Kattywar; and the destruction of his power and sovereignty by the British transferred them to the latter. In this manner did the British government acquire superiority over part of the chiefs above mentioned; and it being found inconvenient that two authorities should exercise the power of levying tribute, all have been placed under the control of that government, by whose agency the entire tribute is now collected; the Guicowar's share being accounted for to that prince. The number of chiefs amounts to 216, their total revenue to 450,172*l.*; of which 104,739*l.* is paid as tribute, leaving a residue of 345,433*l.* The military force maintained

consists of about 4,000 cavalry and 8,000 infantry. The chiefs are left in a large degree of independence. A criminal court has been established for the trial of more serious offences, through the agency of the British residents; but the native chiefs of the several states within the jurisdiction of the court sit therein as assessors.

The surface of the country is generally undulating, with low ranges of hills running in irregular directions. The land in the middlemost part of the district is the highest, and here all the rivers take their rise, disembodying themselves respectively into the Runn, the Gulf of Cutch, the Arabian Sea, or the Gulf of Cambay. The locality denominated the Gir consists of a succession of ridges and hills, covered with forest-trees and jungle, and with a surface extremely rugged. Towards the south of the peninsula, some of the hills are above 1,000 feet high; but their elevation declines towards the north. Caverns, deep ravines, and other fastnesses, are very numerous, and being extremely difficult of access, afford retreats from which those within cannot be dislodged but with the utmost difficulty. The deadly climate of this wild tract is an additional security against the attacks of strangers, who encounter great risk by attempting to remain in it at the close of the year. The Seedees, a people from the coast of Africa, alone encounter it with impunity. Some of other races are occasionally tempted to brave the danger, as water and forage may be obtained here when they have failed in the plains, from which the cattle are driven up at such times; the water, however, is bad, and few persons drink of it for many days without incurring the penalty of disease. Numbers are cut off by death, and many more linger in a state of suffering from agues, fevers, and visceral complaints. These wooded hills are haunted by lions, leopards, chitas or hunting-leopards, wolves, jackals, foxes, wild cats, wild swine, deer, and antelopes; porcupines are also numerous, and vast bodies of migratory rats sometimes move over the country, none knowing whence they come, nor, on their disappearance, whither they go. They are double the size of the common rat; and their ravages in some years are of frightful extent. In 1814 they produced a famine, and on this account it acquired, and is still referred to, as the "rat year."

Of domestic animals, the Kattywar horse was once celebrated, and considered superior, for military purposes, to any in India; but of late years the breed has much deteriorated. Of kine, the breed called Desam is much prized, both in the peninsula and beyond its limits; and buffaloes are also much valued. There are a few camels; but they are small, and not much valued.

The grains principally cultivated are bajra or millet, joar or maize, and wheat. The sugarcane is grown to a considerable extent, but want of skill among the people prevents the produce from being brought to any other form

than goor or molasses. Cotton is the principal commercial crop. The soil is not fertile, being in general rather sandy, and requiring considerable irrigation for the production of crops; but for this there are ample means, as besides the numerous streams throughout the country, water is in general close to the surface, and wells are very numerous, especially in the southern part of the country. The population is returned at 1,468,900. The principal towns, Amreli, Choteyla, Koondla, Buggusra, Cheetal, are described under their respective names in the alphabetical arrangement. For further information, see the article GUZERAT.

KATUKPOOR, in the British district of Moradabad, lieutenant-gov. of the N.W. Provinces, a village on the route from Allypore to the town of Moradabad, and 30 miles S.W. of the latter. Lat. $28^{\circ} 33'$, long. $78^{\circ} 32'$.

KAULARI, or **KOELARU**, in the British district of Agra, lieutenant-gov. of the N.W. Provinces, a town 12 miles S.E. of the city of Agra. Lat. $27^{\circ} 3'$, long. $78^{\circ} 14'$.

KAUMOORY.—A town in the British district of Madura, presidency of Madras, 40 miles S.S.E. of Madura. Lat. $9^{\circ} 24'$, long. $78^{\circ} 25'$.

KAUNDY, in the British district of Cawnpore, lieutenant-gov. of the N.W. Provinces, a village on the route from the cantonment of Euawa to that of Cawnpore, and 43 miles W. of the latter. Lat. $26^{\circ} 21'$, long. $79^{\circ} 47'$.

KAUNKAKOTE, in the Jetch Doab division of the Punjab, a town situated on the left bank of the Jhelum, 113 miles W. of the town of Lahore. Lat. $31^{\circ} 31'$, long. $72^{\circ} 16'$.

KAUNWUN.—A town of Malwa, in the native state of Dhar, 137 miles W.S.W. from Bhopal, and 174 miles E. from Ahmedabad. Lat. $22^{\circ} 53'$, long. $75^{\circ} 18'$.

KAURLOALLA, in the Sude Sagur Doab division of the Punjab, a town situated 24 miles from the right bank of the Jhelum, 142 miles W. of the town of Lahore. Lat. $31^{\circ} 29'$, long. $71^{\circ} 46'$.

KAUTCOT.—A town in the native state of Gwalior, or the territory of Sindhia's family, 103 miles W.S.W. from Hoosungabad, and 120 miles N.W. from Ellichpore. Lat. $22^{\circ} 20'$, long. $76^{\circ} 12'$.

KAVUDAHALLI.—A town in the British district of Coimbatore, presidency of Madras, 141 miles E. of Cannanore. Lat. $12^{\circ} 4'$, long. $77^{\circ} 30'$.

KAYBONG.—A town in the British province of Pegue, on the right bank of one of the mouths of the Irawady, and 68 miles W. by S. from Pegue. Lat. $17^{\circ} 30'$, long. $95^{\circ} 16'$.

KAZA.—A town in the British district of Guntur, presidency of Madras, 10 miles N.E. of Guntur. Lat. $16^{\circ} 24'$, long. $80^{\circ} 36'$.

KAZIKHERA, in the British district of Cawnpore, lieutenant-gov. of the N.W. Provinces, a village on the route from the cantonment of

Cawnpore to Futtehpoore, and five miles S.E. of the former. Lat. $26^{\circ} 25'$, long. $80^{\circ} 27'$.

KAZURANGA.—A town of Assam, in the British district of Nowgong, 42 miles E.N.E. of Nowgong. Lat. $26^{\circ} 37'$, long. $93^{\circ} 24'$.

KEDA.—See **QUEDAH**.

KEDAR GUNGA, in native Gurwhal, a river rising at the north-eastern base of the mountain styled in the trigonometrical survey Mount Moira, and in lat. $30^{\circ} 54'$, long. $79^{\circ} 5'$. It holds a very rapid course of ten or twelve miles, generally in a north-westerly direction, and falls into the Bhagerettee, on the left side, about a gunshot below Gangotri, and in lat. $30^{\circ} 59'$, long. $78^{\circ} 59'$. Like other Himalayan streams, it is subject to great and rapid increase, from the melting of the mountain snows by the sun's heat; and this may account for the different descriptions of it by Fraser, and by Hodgson and Herbert. According to the former, it is "a rapid and considerable stream, said to have its rise in the Cedar Mountain, twelve cos distance." According to the latter, "It has no claim to the title of a river, being merely a torrent from the snow, of ten or twelve feet wide, and shallow. It comes out of a rocky gorge, and its course cannot be longer than three or four miles."

KEDAR KANTA, in native Gurwhal, a peak in the ridge separating the rivers Jumna and Tons. The acclivity of its sides is moderate in all parts, so that it can without much difficulty be ascended everywhere, though elevated considerably above the ridges which radiate from it to almost all points of the compass. The summit terminates in an horizontal area of a few square yards; and, according to Hodgson and Herbert, consists of gneiss; but Jacquemont explicitly states that the formation is micaceous schist (micaschiste), which, according to him, forms the whole mass of the mountain. About the base, however, in many places are enormous beds of white saccharoid limestone, veined with yellowish mica, and sometimes upwards of 120 feet thick. The top of Kedar Kanta is above the limit of forest vegetation, which terminates on its sides, at an elevation of about 10,000 feet above the sea, in rather precise demarcation, on soil well suited for the growth of trees; and consequently the cessation of their growth must be the effect of diminished temperature. Below the stated limit, the sides of the mountain are covered with dense forests of oak, pine, yew, maple, holly, horse-chestnut, alder, rhododendron, and thickets of juniper and gooseberry. The character of the forests is quite that of similar vegetation in Europe, the growth of whose mountains and plains is here united. The treeless and higher part of the mountain produces a sedgy sward, intermixed with various sorts of the anemone, ranunculus, iris, corydalis, phalangium, primula, gentiana, saxifraga, and some other Alpine plants. A minute species of euphorbia thrives, but not below 11,000 feet. In the year when this mountain was surveyed

by Hodgson and Herbert, "in June, it was deep in snow, but in August had lost it all." Jacquemont, at the end of May, found the summit free from snow, though a patch lay undissolved on the north-eastern declivity. From a barometrical observation, he estimates the elevation at 12,756 feet above the sea. The estimate of Hodgson and Herbert is 12,689; a closer correspondence than usual between those authorities. It was a station of the large series of triangles in the great trigonometrical survey of the Himalaya. Lat. $31^{\circ} 1'$, long. $78^{\circ} 14'$.

KEDARNATH (TEMPLE OF), in Gurhwal, is situate on a lofty ridge, rising on the eastern frontier towards Kumaon. The temple is rather large and handsome, and, according to Traill, was only completed about twenty-five years since. It is frequented by Hindoo pilgrims, a previous visit to Kedarnath being considered a necessary preparation to the pilgrimage of Badarinath. The object of worship is a rock, supposed to represent a portion of the body of Kedarnath, who, flying from some pursuers, took refuge here in the form of a buffalo, and, finding himself overtaken, dived into the ground, leaving, however, his hinder part on the surface an object of adoration. The remaining portions of the body of the god, four in number, are objects of worship at four separate temples, situate along the Himalaya chain, and which, along with Kedarnath, form what is termed the "Panch Kedar," the pilgrimage to which places in succession is considered an achievement of extraordinary merit. In the vicinity of Kedarnath is the peak of "Maha Panth," where, in imitation of the Pandavas, who, according to the legend, devoted themselves, and from whence they were believed to be taken up to heaven, from twenty to thirty wretched victims of superstition annually commit suicide, either by proceeding into the snowy waste until they perish by hunger and cold, or by precipitating themselves from a precipice in the neighbourhood, called Bhyrava Jhamp. These suicides are chiefly from Guzerat and Bengal; the hill people seldom thus devote themselves. The rawal, or chief priest of the temple, is invariably a Brahmin from the Malabar coast. The temple has an annual income of about 6,000 rupees, principally from lands, and eked out by offerings. Elevation above the sea, of the temple, 11,755 feet. Lat. $30^{\circ} 44'$, long. $79^{\circ} 7'$.

KEDER.—A town in the British district of Midnapoor, lieut.-gov. of Bengal, 60 miles S.W. of Calcutta. Lat. $22^{\circ} 19'$, long. $87^{\circ} 31'$.

KEDJEREE, in the British district of Hooghly, lieut.-gov. of Bengal, a seafaring place on the western coast of the estuary of the Hooghly, and on the inside or most western channel, formerly the principal approach for shipping destined for Calcutta. The largest ships might then moor here, the depths being six or seven fathoms; but a sand bank has

accumulated in the road or channel, by which the depth has been reduced to two or two and a half fathoms at low water. The first section of telegraphic communication in India extended from this place to Calcutta. Distance from Calcutta, S.W., 40 miles. Lat. $21^{\circ} 53'$, long. 88° .

KEDYWAREE, in Sind, is the mouth of an offset from the right or western side of the Sata, or great eastern branch of the Indus, by which the great bulk of its waters is discharged. Since the inundation of 1848, the old bed of the Kedywaree has been deserted, and the stream now flows to the sea by a channel inclined six miles more eastward. The new channel is at present tolerably well defined, having six to eight feet water at low tide. Lat. $24^{\circ} 2'$, long. $67^{\circ} 21'$.

KEECHOWLEE, in the British district of Mynpooree, lieut.-gov. of the N.W. Provinces, a village on the route from the cantonment of Allypore to that of Mynpooree, and 13 miles N.W. of the latter. Lat. $27^{\circ} 20'$, long. $78^{\circ} 57'$.

KEEKAIRY.—A town in Mysore, 29 miles N.N.W. from Seringapatam, and 96 miles N.E. by E. from Cannanore. Lat. $12^{\circ} 46'$, long. $76^{\circ} 30'$.

KEELEPALEE.—A town of Orissa, on the south-west frontier of Bengal, in the native state of Sonapor, situate on the left bank of the Mahanuddy river, and 22 miles S. from Sumbulpore. Lat. $21^{\circ} 10'$, long. $84^{\circ} 3'$.

KEEL KUNDAH.—A town in the British district of Malabar, presidency of Madras, 160 miles S.E. by E. of Cannanore. Lat. $11^{\circ} 14'$, long. $76^{\circ} 45'$.

KEENY.—A town in Hyderabad, or dominions of the Nizam, situate 65 miles S.S.W. of Ellichpore. Lat. $20^{\circ} 19'$, long. $77^{\circ} 16'$.

KEERPOY, in the British district of Hooghly, lieut.-gov. of Bengal, a town on the route from Burdwan to Midnapore, 40 miles S. of the former, 30 N.E. of the latter, 48 W. of Calcutta. Lat. $22^{\circ} 44'$, long. $87^{\circ} 41'$.

KEERTAR.—A range of mountains of inconsiderable height in the western part of Sind, being an offset of the great Hala range farther west. Their average height is probably below 2,000 feet, but neither as to dimensions nor in a geological point of view, have they been well explored. They lie between lat. $25^{\circ} 50'$ — $26^{\circ} 40'$, and about the meridian line of long. $67^{\circ} 40'$.

KEERUTPOOR, in the British district of Mynpooree, lieut.-gov. of the N.W. Provinces, a town on the route from the cantonment of Etawa to that of Mynpooree, and six miles S.W. of the latter. Lat. $27^{\circ} 10'$, long. $79^{\circ} 2'$.

KEIM.—A town in the British district of Sholapoor, presidency of Bombay, 171 miles E.S.E. of Bombay. Lat. $18^{\circ} 11'$, long. $75^{\circ} 22'$.

KEI—KEO.

KEIPU, in Bussahir, a pass in Koonawar, over a lofty range of mountains dividing the valley of the Taglakhar river from that of the Hocho. Elevation above the sea 13,456 feet. Lat. 31° 40', long. 78° 35'.

KEIRNAH.—A town of Orissa, on the south-west frontier of Bengal, in the native state of Mohurbunge, 153 miles W. by S. from Calcutta, and 117 miles N. from Cuttack. Lat. 22° 9', long. 86° 5'.

KEITHA, or **KITHA**, in the British district of Humeerpoor, lieutenant-gov. of the N.W. Provinces, a town on the route from Calpee to Jubulpoor, 52 miles S. of the former, 217 N. of the latter. It is situate on the small river Bearma, amidst sandstone rocks, and on the border of a plain of black soil, to the effects of which is attributed the deadly malaria which has caused the place to be deserted as a military station. The deleterious influence is aggravated during the rainy season by the inundations which overspread the vicinity, and at other times by a very sultry temperature. Here was a British cantonment, which, in 1828, was occupied by two regiments of infantry and a troop of cavalry. They were subsequently withdrawn, and when, six months afterwards, the place was visited by Davidson, the lodges of the Europeans, and even their tombs, had been partially demolished by the natives, and a force of thirty native soldiers and a European serjeant were all that remained. It has, however, still a small bazar, where supplies may be obtained. Lat. 25° 31', long. 79° 36'.

KEKAPAR, in the British district of Saugur and Nerbudda, lieutenant-gov. of the N.W. Provinces, a town on the route from Baitool to Jubbulpoor, 69 miles N.E. of the former. Lat. 22° 33', long. 78° 41'.

KEKREE, in the British district of Ajmeer, lieutenant-gov. of the N.W. Provinces, a town, the principal place of a pergunnah of the same name, on the route from Nusseerabad to Boondes, 36 miles S.E. of former, and 56 miles N.W. of latter. The population of the town, which is surrounded by a wall, and represented as a place of importance, is 4,025. Distant S.E. from Nusseerabad cantonment 35 miles; S.E. from city of Ajmeer 50. Lat. 26° 1', long. 75° 20'.

KELEEAREE, in the British district of Kumaon, lieutenant-gov. of the N.W. Provinces, a town on the route from Almora to the Nepal territory, 26 miles E. of the former. Lat. 29° 39', long. 80° 8'.

KELLA CALLE.—A town in the British district of Backergunje, lieutenant-gov. of Bengal, 100 miles E. by N. of Calcutta. Lat. 22° 50', long. 89° 59'.

KELLUKKAMOOREY.—A town in the native state of Travancore, 120 miles W. by N. from Madura, and 131 miles S.E. by S. from Cannanore. Lat. 10° 15', long. 76° 27'.

KELSAKARREE.—A town in the British

district of Backergunje, lieutenant-gov. of Bengal, 137 miles E. by S. of Calcutta. Lat. 22° 17', long. 90° 30'.

KELZUR.—A town in the British province of Nagpoor, 26 miles S.W. from Nagpoor, and 86 miles E. by S. from Ellichpoor. Lat. 20° 54', long. 78° 51'.

KEMNA.—A town in the British district of Tirhoot, lieutenant-gov. of Bengal, 88 miles N.E. of Dinapoor. Lat. 26° 22', long. 86° 16'.

KENAMOW.—A town in the territory of Oude, 48 miles S. from Lucknow, and 39 miles S.E. from Cawnpoor. Lat. 26° 11', long. 80° 57'.

KENKAR.—A town in the native state of Bhotan, situate on the left bank of the Monas river, and 65 miles N.N.E. from Goalpara. Lat. 27°, long. 91° 9'.

KENLAY.—A town of Burmah, 48 miles S.E. by E. from Ava, and 212 miles N.N.E. from Proma. Lat. 21° 30', long. 96° 39'.

KENNERY.—See **SALSETTE**.

KEN RIVER.—See **CANE**.

KEOBRUNG, in Bussahir, a pass over a very lofty ridge, forming on the north-east the boundary between Koonawar and Chinese Tartary. It is situate a short distance within the boundary of Chinese Tartary, but the exposure and severity of the climate prevent any piquet of that people from being stationed there, so that it has been repeatedly visited by Europeans, who, on attempting to continue their course to the eastward, have been uniformly stopped and turned back by the authorities of the Celestial Empire. Hence it has been of late years the remotest point reached by European enterprise in attempting to penetrate in that direction to Central Asia. The pass has been found free from snow at the end of July, though at the enormous elevation of 18,313 feet above the sea. Lat. 31° 36', long. 78° 54'.

KEONGPULA, **KEONGPEETA**, or **KHEUNGKELA**.—A stockade situate near the river Arracan, in the province of the same name, and about thirty miles from the town likewise so designated. It is noticeable only on account of an attempt to reduce it, made in 1825, by a marine force under Commodore Hayes. It was then garrisoned by 1,000 men, and after a severe contest of ten hours' duration, the commander was forced to retire. Lat. 20° 30', long. 93° 8'.

KEOKOOCHEE, in Bussahir, a halting-place on the north-eastern declivity of the elevated Charung Pass, which traverses the huge mountain dividing the valley of the Buspa from that of the Tidung. This place is frequented on account of its supply of herbage from thyme, mint, sage, and other odoriferous plants, and of fuel, from junipers and other shrubs, indispensable resources to travellers in those frigid and dreary wastes. The halting-place is on the right bank of the Nungulti, a rapid unfordable torrent, falling

into the river Tidung a few miles farther down. Elevation above the sea 12,457 feet. Lat. $31^{\circ} 27'$, long. $78^{\circ} 37'$.

KEOUN NAGAH.—A town of Burmah, situate on the left bank of the Irawaddy river, and 40 miles N. from Prome. Lat. $19^{\circ} 20'$, long. 95° .

KEOW PEA.—A town in the British province of Tenasserim, 37 miles N.W. by N. of Tenasserim. Lat. $12^{\circ} 33'$, long. $98^{\circ} 49'$.

KEPU, in the hill state of Kotgurh, a village situate on the left bank of the Sutluj, and at the northern base of the lofty ridge on which stands the fort of Kotgurh. The village of Kepu is 3,000 feet above the sea, and surrounded by beautiful and luxuriant vegetation. Lat. $31^{\circ} 20'$, long. $77^{\circ} 31'$.

KERAON, in the British district of Cawnpore, lieut.-gov. of the N.W. Provinces, a town three miles N. of the left bank of the Jumna, 20 miles E. of Calpee. Lat. $26^{\circ} 7'$, long. $80^{\circ} 7'$.

KERIAL, KOREN, or BHOKUR.—A raj under the control of the political agent for the south-west frontier of Bengal. The chief districts bordering on it are Bora Samba, Patna, Phooljer, and Calabandy; and it embraces an area of 1,512 square miles. Its centre is in lat. $20^{\circ} 30'$, long. $82^{\circ} 40'$. The country is wild, and the people savage. The tribute, however, amounting with that of Bhokur, which is included in it, to 1,095 rupees, is represented as paid with regularity. The present annual value of the country has been computed at 10,000 rupees. The population is supposed to be about 68,000. Kerial, the capital, is in lat. $20^{\circ} 19'$, long. $82^{\circ} 50'$.

KERIM KHAN, in the British district of Humeerpoor, lieut.-gov. of the N.W. Provinces, a village on the right bank of the Jumna, the channel of which is obstructed by rocks of kankar or calcareous conglomerate, lying in confusion, in consequence of the less-resisting clay, which sustained them, having been washed away by the violence of the stream. The rocks formerly extended in broken masses four or five feet above the water, for two-thirds of the width of the river, and at the season of low water formed so dangerous and difficult an obstruction to navigation, that by the order of government, engineers have for some years been employed in removing them. Lat. $26^{\circ} 20'$, long. $79^{\circ} 34'$.

KEROWLEE.—A small state in Rajpootana, denominated from the city of the same name. It is bounded on the north by Bhurt-pore; on the east by the state of Dholpore; on the south-east by the river Chumbul, dividing it from the territory of Gwalior, or the possessions of the Scindia family; on the west by the river Bunas, dividing it from the state of Jeypore; and on the north-west by the state of Jeypore. It lies between lat. $25^{\circ} 53'$ — $26^{\circ} 48'$, long. $76^{\circ} 47'$ — $77^{\circ} 38'$. The area is 1,878 square miles. Little or no

authentic information as to its physical characteristics or productions appears to exist. The population computed at the rate of 100 to the square mile, would amount to 187,800; and this is believed to be not widely distant from the fact.

From its slight importance, the early history of this district is very obscure, and perhaps the first that is known of it, is that in 1454 it was conquered by Mahmud Khilji, king of Malwa, and, with some neighbouring tracts, assigned as an appanage to his son. After the conquest of Malwa by Akbar, the territory of Kerowlee probably became incorporated with the empire of Delhi, and on the decline of that state, it appears to have been so far subjugated to the Mahrattas, that they exacted from it a tribute of 25,000 rupees annually. In 1817, the right or claim to this tribute, with some others of a similar nature, was, under the fourteenth article of the treaty of Poona, transferred by the Peishwa to the British government, which gratuitously remitted it to the rajah. He was, however, little grateful for the concession, as, though bound by treaty to acknowledge the supremacy of the British government, and to co-operate with it, he in 1825, when that government was engaged in the Burmese war, and the standard of rebellion was hoisted at Bhurt-pore by Doorjun Saul, lent his puny aid to sustain the cause of the usurper just named, and on the fall of the fortress, assembled troops for his own defence. Subsequently, however, he made strong professions of attachment, and it was not deemed necessary to take any serious notice of these very foolish but hostile proceedings. Beyond the adjustment of some border differences between the states of Kerowlee and Jeypore, there seems to have been hardly any communication with the rajah of this small principality, from the period of the negotiation of the treaty until recently, when the advice and remonstrance of the British political agent were demanded by the usual causes—mismanagement on the part of the head of the state and his servants; pecuniary difficulties thence resulting, and the existence of faction and insubordination among the military chiefs. Subsequently, the distracted condition of the state induced the rajah to solicit the interference of the British government; and a compliance with his request led to the restoration of tranquillity. Upon the death, in 1852, of the young rajah Nursing Pal, his adopted son Bhurt Pal was recognised by the British government as his successor, and arrangements were made for the administration of the state during the minority of the rajah. Shortly afterwards, however, it was discovered that certain irregularities in the adoption of Bhurt Pal had rendered the ceremony invalid. Upon this being made known to the British government, the recognition of Bhurt Pal as successor to the throne was annulled, and Muddun Pal, the nearest of kin to Nursing Pal, and a chief of mature age, was elevated to the throne. The

KER—KEY.

total revenue of the country is stated at 506,903 rupees; but so much is alienated for various purposes, as to leave little more than two-thirds of that sum for the use of the state. The military force appears greatly disproportioned to the importance or necessities of the state, being returned at 784 (cavalry and infantry), besides nearly 1,100 men in the garrisons of a few forts; making a total of nearly 1,900.

KEROWLEE, in Rajpootana, the principal place of a small state of the same name, is situate on the route from Nussarabad to Gwalior, 152 miles E. of the former, and 89 W. of the latter. Garden gives nearly all that of late years is known of the place in the following passage:—"A large town and capital of the Karowlee state; supplies and water abundant; the town is inclosed by a pukka (masonry) wall, and surmounted by difficult ravines to an extent of nearly two miles." Tieffenthaler, describing its condition about seventy years ago, states that the site of the town was selected by the rajah, when seeking security against Mahomedan invaders, on account of the difficulty of access to it, the road being for two miles narrow and easily defended. The immediate environs of the town he describes as well watered, fertile, carefully cultivated, and containing fine groves; the houses as built of brick, and those of a superior class faced with squared stone, and covered with large thin slabs; but the streets as narrow and filthy. He mentions two forts on two connected hills close to the town. One, the residence of the rajah, is described as a fine building, with very lofty towers, the walls being outside and inside faced with red stone, put together with admirable accuracy and fine finish. The interior is represented as containing fine buildings and agreeable gardens. The walls of the town are stated to be massive, and well built of large slabs, laid in regular layers one over the other; but the whole upper fabric as too frail to bear artillery, and subject to inevitable destruction, if so assailed. Kerowlee is distant S.W. of Agra 80 miles, S. of Delhi 150. Lat. 26° 28', long. 77° 10'.

KERUTPOOR, in Sirhind, a village in the alluvial tract on the left bank of the Sutlej. It is situate in a beautiful grove of mango-trees, and at the foot of a bank surmounted by an elegant Hindoo temple, approached by means of a finely-proportioned and grand flight of stone steps. The neighbouring alluvial eminences are furrowed and broken up by torrents into numerous abrupt knolls, the resort of innumerable wild peafowl, protected by the superstition of the natives, and enlivening and heightening the beauty of the scenery. Distant N.W. from Calcutta 1,090 miles. Lat. 31° 11', long. 76° 37'.

KERYCAUD.—A town of Southern India, in the native state of Travancore, situate on the coast, 122 miles W.S.W. from Madura. Lat. 9° 11', long. 76° 32'.

KESSODE.—A town in the province of Guzerat, or the dominions of the Guicowar, 13 miles N.E. from the coast, and 81 miles S.S.W. from Rajkote. Lat. 21° 16', long. 70° 18'.

KEST, in the British district of Etawa, lieutenant-gov. of the N.W. Provinces, a village on the route from the cantonment of Agra to that of Etawa, and eight miles N.W. of the latter. Lat. 26° 52', long. 78° 58'.

KETHOR, in the British district of Meerut, lieutenant-gov. of the N.W. Provinces, a town on the route from Muzaffurnuggur to Boolundshuhur, 33 miles N. of the latter. Lat. 28° 51', long. 78°.

KETWAREE, in the territory of Bhurt-pore, a village on the route from Muttra to Feroz-pore, in the British district of Goorgaon, 35 miles N.W. of former, 17 S.E. of latter. Lat. 27° 37', long. 77° 12'.

KEUNJUR.—A town of Orissa, on the south-west frontier of Bengal, in the native state of Keunjur, three miles from the left bank of the Byeturnee river, and 82 miles N. by W. from Cuttack. Lat. 21° 39', long. 85° 41'.

KEUNJUR, in Orissa, one of the Cuttack mehals, on the south-west frontier of Bengal, bounded on the north by Singboom; on the north-east by Mohurbunge; on the east by the British district of Balasore; on the south by the Cuttack mehals; and on the west by the native states of Bombra and Bonei. It extends from lat. 21° 1'—22°, and from long. 85° 7'—86° 23'; is ninety miles in length from south-east to north-west, and sixty miles in breadth. The population is returned at 225,990. The mahal became subject to British supremacy upon the conquest of the province of Cuttack in 1804.

KEUTEE, in Bhaghelcund, or the territory of Rewa, a village on the direct route from Mirzapoor to the diamond-mines of Punnah, and 75 miles S.W. of the former. It is remarkable for a cascade, where the Mohana, a small tributary of the Tons, falls a depth of 272 feet, over a purplish rock overlying a mottled sandstone. Elevation above the sea 923 feet. Lat. 24° 49', long. 81° 31'.

KEWAIE, or **KOT KEWAYI**, in the British district of Allahabad, lieutenant-gov. of the N.W. Provinces, a small town near the eastern frontier towards Benares, and about eight miles from the left bank of the Ganges, 25 miles E. of the city of Allahabad. Lat. 25° 25', long. 82° 23'.

KEYALL, in the Sinde Sagur Doab division of the Punjab, a town situated on the left bank of the river Indus, 78 miles S.W. of the town of Mooltan. Lat. 29° 15', long. 70° 43'.

KEYONTHUL, a hill state between the Sutlej and the Jumna, is bounded on the north by Simla and by the chieftainships Kothee, Mudhan, Theog, and Goond, all of them tributary to Keyonthul; on the east by Balun; on

the south by Sirmour and by territory appertaining to the rajah of Pateela; and on the west by Baghat and a portion of Pateela. It is about fifteen miles in length from north to south, and about the same distance in breadth. The centre is in lat. 31°, long. 77° 18'. It is throughout a maze of mountains of considerable height, no part of the country having probably an elevation less than 3,000 feet, while one summit, that of Mauund, attains the height of 7,800; and another, that of Mahhasu, 9,078 above the sea. The drainage is south-eastward into the river Giri. The principal place is Junug, the residence of the rana, or Hindoo prince.

The territory of Keyonthul was dismembered by the British government, after the conquest of the hills, and a portion sold to the rajah of Pateela. In consideration of this alienation, the remainder of the Keyonthul state is exempted from the payment of tribute. As at present existing, Keyonthul proper has an area of 139 square miles; but if its tributary dependencies, Kothee, Mudhan, Theog, Goond, and Poondur, be included, the area will be 272 miles. The population of Keyonthul proper is about 14,000; with that of the dependencies, it is estimated at 26,000. The chief state produces an annual revenue of about 2,000*l.*; the dependencies about 1,350*l.*

KEYRAULOO, in Guzerat, or territory of the Guicowar, a town on the route from Neemuch to Deesa, 219 miles W. of former, 41 S.E. of latter. It is situate in a fertile country, and is a flourishing town, with considerable manufactures. Population about 12,000, many of whom are of Sindhian descent, the place being held by chiefs of that nation on feudal tenure from the Guicowar. Lat. 23° 54', long. 72° 39'.

KEYSOPOOR, in the British district of Allyghur, lieutenant-gov. of the N.W. Provinces, a village on the route from Allyghur cantonment to that of Etawa, and 29 miles S.E. of the former. Lat. 27° 32', long. 78° 18'.

KEYSUMPETT.—A town in Hyderabad, or the Nizam's dominions, 32 miles S.S.W. from Hyderabad, and 80 miles N.N.E. from Kurnool. Lat. 16° 56', long. 78° 24'.

KHAB, or **CHAP**, in Bussahir, a village of Koonawar, on the left bank of the Sutluj, which here flows between stupendous cliffs of mica-slate and granite. The site of the village is circumscribed by fragments of rock, amidst which the traveller is surprised to find himself instantly amongst fields, vineyards, and avenues of apricot-trees. It is the highest place in which the grape grows in Koonawar. It does not, however, ripen properly, and is little better than the produce of the wild vine of Koonawar. Elevation above the sea 9,310 feet. Lat. 31° 48', long. 78° 41'.

KHABILL.—A river of Nepal, rising in lat. 27° 27', long. 88° 7', on the western side of the spur of the Himalayas, separating Nepal from Sikhim. It flows in a south-westerly

direction for fifty miles, and falls into the Tambur in lat. 27° 13', long. 87° 27'.

KHABUL, in Bussahir, a village in the valley of the Pabur, and a mile from the right bank of that river, is situate on the route from Subathoo to the Burenda Pass, and 20 miles S.W. of this last place. The surrounding country is described by Lloyd as "well tilled, and the villages large, clean, and delightfully situated amongst shady trees. The sycamore, chestnut, and apricot, the last loaded with green fruit, grew in great luxuriance. Numerous streams likewise rushed down the sides of the mountain, and either turned mills or were conducted to irrigate the fields." Elevation above the sea 8,400 feet. Lat. 31° 15', long. 77° 58'.

KHACHI.—A town in the native state of Nepal, 154 miles W. by N. from Khatmandoo, and 98 miles N.N.W. from Goruckpoor. Lat. 28°, long. 82° 51'.

KHACHROD, in the territory of Gwalior, or possessions of Scindia's family, a town on the route from Baitool to Neemuch, 231 miles N.W. of the former, 81 S.E. of the latter. It is a large open town. Elevation above the sea 1,638 feet. Lat. 23° 28', long. 75° 20'.

KHAIRABAD.—A village on the right bank of the Indus, opposite Attock, and at the Peshawur or western extremity of the ferry, or of the bridge of boats which affords the means of communication during the season of low water. Lat. 33° 54', long. 72° 15'.

KHAIRAH, in the British district of Muttra, lieutenant-gov. of the N.W. Provinces, a town in lat. 27° 42', long. 77° 30'.

KHALBOLEA.—A town in the British district of Nuddea, lieutenant-gov. of Bengal, 66 miles N.N.E. of Calcutta. Lat. 23° 30', long. 88° 43'.

KHALIYANPOOR, in the British district of Futtehpoor, lieutenant-gov. of the N.W. Provinces, a town on the route from Cawnpore to the town of Futtehpoor, and 15 miles N.W. of the latter. There is a serai or lodge for travellers here. Lat. 26° 4', long. 80° 42'.

KHALIYANPOOR (KULEANPUR), in the British district of Bareilly, lieutenant-gov. of the N.W. Provinces, a small town on the route from the town of Bareilly to Almora, and 46 miles N. of the former. It is a wretched place, and, though situate on a plain apparently open and dry, the air for the greater part of the year is very unhealthy, afflicting the inhabitants with severe intermittents and other fatal fevers. The natives call the disease *awal*, and, with perverse ignorance, attributing it to the quality of the water, take no precautions against the malaria. Lat. 28° 54', long. 79° 30'.

KHALKA DEBI, called also **ATTUK**, in the British district of Kumaon, lieutenant-gov. of the N.W. Provinces, a ruined village, with Hindoo temple, on the route from Askot to the Bians Pass, 11 miles N.E. of former, halt

a mile from the right bank of the Kallee river. Lat. 29° 49', long. 80° 32'.

KHALSEE, in Jaunsar, a town, with a fort, at the confluence of the rivers Tons and Jumna. In the Goorkha war it early fell into the power of the British, and was retained, with the rest of Jaunsar, by the East-India Company, when the rajah of Sirmoor was restored to his possessions. It was formerly more considerable and flourishing than at present, yet still remains the entrepôt of the commerce between the plains and the tracts northward. Close to the town a copper-mine was formerly worked, but has been for some time abandoned. As the confluence of the Tons and Jumna is 1,686 feet above the sea, the elevation of Khalsee, situate on a ridge rising considerably above that point, must exceed that amount. Lat. 30° 32', long. 77° 54'.

KHAMARIYA, in the British district of Goruckpore, lieutenant-gov. of the N.W. Provinces, a small town 55 miles W. of Goruckpore cantonment, is situate on the Ramrekha, a feeder of the river Koyane. Distant N.W. of Benares 110 miles, N.E. of Allahabad 100. Lat. 26° 50', long. 82° 18'.

KHAMBAT.—A town of Burmah, 19 miles from the right bank of the Khyendwen river, and 173 miles N.W. from Ava. Lat. 23° 46', long. 94° 25'.

KHANAIWALA, in the Baree Doab division of the Punjab, a town situate 17 miles from the left bank of the Chenaub, 28 miles E.N.E. of the town of Mooltan. Lat. 30° 16', long. 71° 47'.

KHANAPOOR.—A town in the British province of Sattara, presidency of Bombay, 57 miles S.E. by E. of Sattara. Lat. 17° 15', long. 74° 48'.

KHANAPOOR.—A town in the native state of Kolapoor, territory of Bombay, 29 miles S. from Kolapoor, and 40 miles N.W. by N. from Belgaum. Lat. 16° 19', long. 74° 13'.

KHANAPOOR.—A town in the British district of Belgaum, presidency of Bombay, 15 miles S. of Belgaum. Lat. 15° 39', long. 74° 33'.

KHANBAILA, in Bhawalpoor, a considerable town near the left bank of the Punjnad. The neighbouring country is very fertile, and, in the season of inundation, overspread by the waters of the river; so that the dense population, by light labour, draw from it abundant and rich crops, especially of rice, wheat, and barley. When visited by Wood, so early as the end of April, "the surface was often, as far as the eye could range, one continuous corn-field. It was harvest-time, and crops of wheat and barley stood ready for the sickle, dressed in the rich livery of the season." When the waters retire, the seed is thrown down, and the farmer has no further trouble till the harvest calls him forth to husband his crops. Khanbaila is in lat. 29° 4', long. 70° 52'.

KHANDEISH.—See CANDEISH.

KHANGHER.—A town of Sinde, in the British district of Shikarpoor, presidency of Bombay, 25 miles N.N.W. of Shikarpoor. Lat. 28° 19', long. 68° 24'.

KHANGURH.—A town in the native state of Bhawalpoor, 68 miles S. from Bhawalpoor, and 103 miles W.N.W. from Beekaneer. Lat. 28° 16', long. 71° 45'.

KHANGURH, in the Sinde Saugur Doab division of the Punjab, a town situated on the right bank of the Chenaub, 32 miles S.W. by S. of the town of Mooltan. Lat. 29° 45', long. 71° 13'.

KHANPOOR, in the British district of Ghazee-pore, the principal place of the pergunnah or subdivision of the same name, a town on the route from Ghazee-pore cantonment to Jounpore, 32 miles W. of the former, 28 S.E. of the latter. Lat. 25° 34', long. 83° 11'.

KHANPOOR, in Bhawalpoor, a flourishing commercial town, with a good roofed bazar, is situate on the Ikhtiarwah, a navigable canal from the Punjnad. There is a ruinous mud fort, 200 yards long and 120 broad. The surrounding country is populous, and, where irrigated, fertile; but in general of lighter quality than the region to the south and west, as the eastern desert here begins to be observable. The route from Islamgurb, situate 55 miles south, is through the sandy desert, in which the characteristic features of such frightful tracts are peculiarly striking. They are well described by Boileau:—"Long and lofty ridges of sandhills follow each other in ceaseless succession, as if an ocean of sand had been suddenly arrested in its progress, with intervals of a quarter or half a mile, or even more, between its gigantic billows; for, after ascending many hundred yards along a gradual slope, we would suddenly come to a steep descent, when our path lay across the line of waves; and on other occasions we would perhaps move parallel to them, with a steep wall of sand on one hand, and a gentle rise on the other." Khanpoor has many symptoms of having been formerly a place of much greater importance than now. Population 10,000. Lat. 28° 35', long. 70° 41'.

KHANPOOR, in the Punjab, a fort 41 miles E. of Attock, is situated at the foot of the low range of mountains forming the first stage of the ascent from the plain to the Himalaya. It is surrounded by a fertile country, containing beautiful gardens. Lat. 33° 52', long. 73°.

KHANPOOR GHAT, in the British district of Goorgaon, lieutenant-gov. of the N.W. Provinces, a pass through a low range of hills extending from north-east to south-west. The small town or village of Pingawa is situate a mile east of the pass, which is on the route from Muttra to Ferozpoor, and 52 miles N.W. of the former. Lat. 27° 54', long. 77° 9'.

KHANSRU CHOKI, in the British district of Dehra Doon, a halting-place on the route

from Hurdwar to Dehra, and 12 miles N.W. of the former place. Distant N.W. from Calcutta 937 miles. Lat. $30^{\circ} 5'$, long. $78^{\circ} 11'$.

KHANWAH, in the territory of Bhurtpore, a village on the route from Agra to Ajmeer, 31 miles W. of the former, 197 E. of the latter. It is described by Heber as a large but dilapidated village, situate at the foot of a great ridge of rock, surmounted by a small mosque. Here, in the year 1526, commenced the great battle between Baber, the Mogul conqueror of Delhi, and Rana Sanka, of Oodeypore, the head of a confederacy of Rajpoot princes, banded to engage the Mussulmans. Baber was so alarmed respecting the result, that, hoping to gain the favour of heaven by contrition, he renounced the use of wine, or any other strong drink, broke up his drinking-vessels of gold and silver, and distributed the metal as alms. Rana Sanka was totally defeated, and escaped with difficulty, and Baber assumed the title of Ghazi, or "victorious champion of the faith." He also caused a tower of the skulls of the infidels to be erected on a small hill close to the field of battle. The force opposed to Baber is reported to have amounted to 200,000 men, principally cavalry. Khanwah is in lat. $27^{\circ} 3'$, long. $77^{\circ} 37'$.

KHALALU, or **KHOPALU**, in the territory of Gholab Singh, a fort built on the summit of a rock, nearly isolated, in an expanse on the left bank of the Indus. This open space is described by Vigne as a sloping bank "of two or three miles in extent, and exhibiting a green and shady confusion of stone walls, cottages, and fruit-trees." The eminence on which the fort stands is more than 1,000 feet above the Indus, and commands a very grand view. Lat. $35^{\circ} 7'$, long. $76^{\circ} 24'$.

KHAPPA.—A town in the British province of Nagpore, situate on the right bank of one of the tributaries of the Wein Gunga river, 21 miles N. by W. from Nagpore. Lat. $21^{\circ} 25'$, long. 79° .

KHAPPOH, in the British district of Saugur and Nerbudda, lieut.-gov. of the N.W. Provinces, a town on the route from Jubbulpore to Nagpore, 14 miles S. by E. of the former. Lat. $22^{\circ} 59'$, long. $80^{\circ} 4'$.

KHAPURHA, in the British district of Jounpore, lieut.-gov. of the N.W. Provinces, a village on the route from Jounpore cantonment to Purtabgurb, 14 miles W. of the former, 34 E. of the latter, situate on the right bank of the river Sae, here crossed by a fine bridge of masonry. Lat. $25^{\circ} 45'$, long. $82^{\circ} 33'$.

KHARRAH, in the Rajpoot state of Jodhpore, a village on the route from Bikumpore to Balmeer, and 67 miles S. of the former. It is situate in a sterile ill-cultivated country. Lat. $27^{\circ} 1'$, long. $72^{\circ} 12'$.

KHARROH, or **KHARA**, in the Rajpoot state of Jessulmeer, a village on the western frontier, towards Sinde. A line drawn from this village in an easterly direction to the opposite frontier would nearly bisect Jessul-

meer, and divide the comparatively fertile tract in the southern part from the thoroughly barren desert in the northern. Khara is in lat. $27^{\circ} 32'$, long. $71^{\circ} 39'$.

KHARGUNJ, in the British district of Furruckabad, lieut.-gov. of the N.W. Provinces, a village on the route, by Nanamow Ghat, from Lucknow to Futtelgurb, and 38 miles S.E. of the latter. The country is fertile, and generally cultivated, though much cut up by ravines and fissures. Lat. 27° , long. $80^{\circ} 2'$.

KHARGUNJE, in the British district of Mynpoorie, lieut.-gov. of the N.W. Provinces, a town on the route from Allyghur to Bareilly, and 38 miles S.E. of the former. It is situate on the Kalee Nuddi (East), here crossed by a handsome brick bridge of five arches, up to the vicinity of which the river is navigable from the Ganges; thus affording a communication by water from the sea to this place. Here was formerly a military cantonment, which was burned during Holcar's incursion into the Doab in 1804. It is now a large town, with a population of 10,752. The road in this part of the route is good generally, but in some parts heavy; the country open, and partially cultivated. Lat. $27^{\circ} 48'$, long. $78^{\circ} 43'$.

KHATAH.—A town in the native territory of Rampore, district of Bareilly, 25 miles N.W. from the town of Bareilly, and 26 miles E.S.E. from Moradabad. Lat. $28^{\circ} 40'$, long. $79^{\circ} 14'$.

KHATANG.—A town in the native state of Nepal, three miles from the right bank of the Arun river, and 96 miles E.S.E. from Khatmandoo. Lat. $27^{\circ} 18'$, long. $86^{\circ} 46'$.

KHATMANDOO.—A town of Nepal, situated on the east bank of the Bishnminuty river, and regarded as the capital of the country, not so much in consideration of its superiority in point of size or population, as from its being selected for the residence of the rajah. Its length along the bank of the river is about a mile, and its average breadth scarcely exceeds a quarter of that distance. Access to the town from the westward is obtained by means of two slight bridges thrown over the river, one at its northern, the other at its southern extremity. Though building-stone abounds, edifices of this material, with the exception of some of the ornamental parts of temples, are altogether wanting. The city, however, is adorned by several temples, "constructed of brick, with two, three, and four sloping roofs, diminishing gradually as they ascend, and terminating pretty generally in pinnacles, which, as well as some of the superior roofs, are splendidly gilt, and produce a very picturesque and agreeable effect." But among the most striking objects of the place are its numerous wooden temples, many of them of considerable elevation and proportionate bulk, which are scattered over the environs as well as throughout the body of the town. Like those of most other eastern towns, the streets of Khatmandoo are narrow and dirty. The houses are of brick, with tiled roofs, and though consisting ordin-

KHE.

rily of several stories, they are represented, almost without exception, as of a mean appearance. Even the residence of the rajah is entitled to no particular notice. The number of houses has been estimated at 5,000, and the population at 50,000. Khatmandoo is distant 137 miles N.E. from Goruckpore, and 53 E. by S. from Gorkha. Lat. 27° 42', long. 85° 18'.

KHEDRA.—A village in the British district Huriara, lieutenant-gov. of the N.W. Provinces, presidency of Bengal. Lat. 29° 21', long. 75° 56'.

KHEEREE.—A town in the territory of Oude, 10 miles from the left bank of the Chowka river, and 72 miles N. from Lucknow. Lat. 27° 54', long. 80° 51'.

KHEERWA.—A town in the Rajpoot state of Jodhpoor, 49 miles S.E. by S. from Jodhpoor, and 93 miles S.W. from Ajmeer. Lat. 25° 41', long. 73° 33'.

KHEGUMPA.—A town in the native state of Bhotan, three miles from the left bank of the Demree river, and 64 miles N.N.W. from Gowhatty. Lat. 27°, long. 91° 24'.

KHEIR.—A town of Guzerat, in the native state of Mhyecaunta, on the left bank of one of the branches of the Saburmuttee, and 87 miles N.N.E. from Ahmedabad. Lat. 24° 9', long. 73° 9'.

KHEIR.—A town in the British district of Poonah, presidency of Bombay, 68 miles E. of Bombay. Lat. 18° 51', long. 73° 55'.

KHEIR.—A town in the British district of Poonah, presidency of Bombay, 76 miles S.E. of Bombay. Lat. 18° 23', long. 73° 53'.

KHEIR.—A town in Hyderabad, or the Nizam's dominions, situate on the right bank of the Godavery river, and 160 miles N.W. from Hyderabad. Lat. 18° 58', long. 76° 50'.

KHEIR.—A town in the British district of Ahmednuggur, presidency of Bombay, 135 miles E.S.E. of Bombay. Lat. 18° 22', long. 74° 51'.

KHEJURWALA, in the British district of Suharunpoor, lieutenant-gov. of the N.W. Provinces, a village on the route from Meerut to Suharunpoor, and nine miles S.E. of the latter place. It is situate in a level, open, well-cultivated country. Distant N.W. from Calcutta, *via* Kurnaul, 1,000 miles. Lat. 29° 52', long. 77° 41'.

KHELCHEEPOOR, in the territory of Gwalior, or possessions of Scindia's family, a town on the route from Neemuch to Saugor, 138 miles E. of former, 168 W. of latter. It is a thriving town, and is the principal place of a small state tributary to Scindia, and held by a chief of the Kichi Rajpoot tribe, who pays annually a tribute of 13,500 rupees to Scindia, and of 1,050 to the rajah of Kota. The rajah maintains sixty horse and 300 irregulars. Lat. 24° 2', long. 76° 34'.

KHEMANDI, in the Rajpoot state of Jodhpoor, on the route from Nusseerabad to Deesa, and 154 miles S. W. of the former. It

contains 150 houses and thirty shops, and is supplied with water from twenty wells. The surrounding country is rather hilly, and the road occasionally rough in this part of the route. Lat. 25° 15', long. 73° 11'.

KHEMLA, in the Rajpoot state of Jeypore, a town on the route from Agra to Nusseerabad, 82 miles S.W. of former, 138 N.E. of latter. It has a bazar. Lat. 26° 41', long. 76° 55'.

KHEMPOOR, in the British district of Moradabad, lieutenant-gov. of the N.W. Provinces, a village on the route from Hurdwar to the town of Moradabad, and 15 miles N.W. of the latter. The road in this part of the route is good. Lat. 29° 2', long. 78° 44'.

KHENGUNPOOR, in the Baree Doob division of the Punjab, a town situate nine miles from the right bank of the Beas, 61 miles S. by W. of the town of Lahore. Lat. 30° 46', long. 74° 8'.

KHER.—A town in the British district of Rutnageriah, presidency of Bombay, 93 miles S.S.E. of Bombay. Lat. 17° 44', long. 73° 30'.

KHERA, in the British district of Agra, a village on the route from the city of Agra to Jeypore, and 19 miles W. of the former. The road in this part of the route is good; the country fertile and highly cultivated. Lat. 27° 7', long. 77° 46'.

KHERA, in the British district of Muttra, lieutenant-gov. of the N.W. Provinces, a village on the route from the city of Agra to Bareilly, and 37 miles N.E. of the former. The road in this part of the route is good; the country well wooded, and cultivated. Lat. 27° 31', long. 78° 28'.

KHERAH, in the British district of Suharunpoor, lieutenant-gov. of the N.W. Provinces, a village on the route from Kurnaul to Suharunpoor, and 12 miles S.W. of the latter town. It is situate in a level country, amidst considerable cultivation. Distant N.W. from Calcutta 995 miles. Lat. 29° 53', long. 77° 26'.

KHERAH, in the British district of Delhi, lieutenant-gov. of the N.W. Provinces, a village on the route from the city of Delhi to Kurnaul, and eight miles N.W. of the former. The road in this part of the route is good. Lat. 28° 46', long. 77° 11'.

KHEREE, a village with a ruined brick fort in the British district of Suharunpoor, lieutenant-gov. of the N.W. Provinces, is situate on the route from the town of that name to Dehra, and 22 miles S.W. of the latter. Here was a secondary station of the great trigonometrical survey of the Himalaya. Lat. 30° 3', long. 77° 52'.

KHERI, in the British district of Muzuffurnugur, lieutenant-gov. of the N.W. Provinces, a village on the route from Kurnaul to the town of Muzuffurnugur, and 25 miles W. of the latter. Lat. 29° 26', long. 77° 22'.

KHERNI, in the Rajpoot state of Jeypore,

a small town on the route from Boondee to Agra, 70 miles N.E. of former, 120 S.W. of latter. It is surrounded by a rampart of masonry. Lat. $26^{\circ} 14'$, long. $76^{\circ} 23'$.

KHERSTONG.—A town in the British district of Darjeeling, lieutenant-gov. of Bengal, 12 miles S. of Darjeeling. Lat. $26^{\circ} 52'$, long. $88^{\circ} 18'$.

KHETI.—A town of Sind, in the British district of Kurrachee, presidency of Bombay, 53 miles S.W. by S. of Tatta. Lat. $24^{\circ} 10'$, long. $67^{\circ} 30'$.

KHETREE, in the Rajpoot territory of Shekhawatee, a town, the principal place of a district which, with Kot-Pootli, granted by Lord Lake, yields its thakoor or lord an annual revenue of 6,000,000 rupees. Distance S.W. from Delhi 90 miles, N. from Jeypore 75. Lat. 28° , long. $75^{\circ} 53'$.

KHEYRA, in the British district of Mirzapore, lieutenant-gov. of the N.W. Provinces, a small town or village which, with Mungror, gives name to the pergunnah of Kheyra Mungror, is situate 21 miles S.E. of Benares, 43 E. of the city of Mirzapore. Lat. $25^{\circ} 4'$, long. $83^{\circ} 19'$.

KHI, in Sirhind, a small town seven miles from the left bank of the Sutlej, on the route from Ferozepore to Mandot, and five miles S.W. of the former place. It was formerly comprised within the possessions held by the maharajah of the Punjab on the left of the Sutlej, under British protection and control, but has now been incorporated with the British district of Ferozepore. Distant N.W. from Calcutta, by way of Delhi and Ferozkote, 1,111 miles. Lat. $30^{\circ} 54'$, long. $74^{\circ} 30'$.

KHILPURI, in the British district of Bareilly, lieutenant-gov. of the N.W. Provinces, a small town on the route from the city of Pilibheet to Almora, 30 miles N.W. of the former, situate on the Bygul, a small river tributary to the Gurra. Lat. $28^{\circ} 59'$, long. $79^{\circ} 46'$.

KHILPUTEE, in the British district of Kumaon, lieutenant-gov. of the N.W. Provinces, a village with small military station, on the route, by Puchesar, from Petoragurh cantonment to Chumpawut, 15 miles S. of Petoragurh, seven N.E. of Chumpawut. Lat. $29^{\circ} 23'$, long. $80^{\circ} 13'$.

KHIRAGARH, in the British district of Agra, lieutenant-gov. of the N.W. Provinces, a town on the south-western frontier towards Dholpore, 22 miles S.W. of the city of Agra. Lat. $26^{\circ} 53'$, long. $77^{\circ} 56'$.

KHIRKA, in the British district of Bareilly, lieutenant-gov. of the N.W. Provinces, a village on the route from the town of Bareilly to Moradabad, and 14 miles N.W. of the former. Lat. $28^{\circ} 28'$, long. $79^{\circ} 16'$.

KHIRKA BIRNA, in the British district of Bareilly, division of Pilleebheet, lieutenant-gov. of the N.W. Provinces, a village on the route from Bareilly to Petoragurh, and 47 miles N.E. of the former. Lat. $28^{\circ} 48'$, long. $79^{\circ} 56'$.

KHIRON, in the district of Bainswara, territory of Oude, a town 25 miles S. of Lucknow. Butter estimates the population at 5,000, a third of that number being Mussulmans. Lat. $25^{\circ} 30'$, long. $80^{\circ} 50'$.

KHOAPOOR, in the British district of Futtehpore, lieutenant-gov. of the N.W. Provinces, a village on the route from Calpee to the town of Futtehpore, and 10 miles N.W. of the latter. It has a few shops; water is obtained from wells and a tank; and supplies may be collected from the neighbourhood. Lat. 26° , long. $80^{\circ} 45'$.

KHOAPOOR, in the British district of Cawnpore, lieutenant-gov. of the N.W. Provinces, a village on the route from Calpee to Futtehpore, and 14 miles N. of the former. Lat. $26^{\circ} 17'$, long. $79^{\circ} 47'$.

KHODABAD, in Sind, is a ruined town, 30 miles N. of Hyderabad, and 10 miles E. of the Indus. Little more than thirty years ago, it rivalled Hyderabad in size and population, yet now not one habitable dwelling remains. The ruins cover two square miles. On this, Wood remarks, "How perishable must be the architecture of Sind!" It had been a favourite residence of the Talpoor chiefs of Sind, and here the remains of several of them rest in tombs of neat but plain construction. Lat. $25^{\circ} 48'$, long. $68^{\circ} 32'$.

KHODAGANJ, in the British district of Furrukhabad, lieutenant-gov. of the N.W. Provinces, a town on the route from Cawnpore to Futtehpore, and 13 miles S. of the latter. It is situate on the north bank of the Kalee Nadi (East), here crossed by a suspension-bridge, constructed at the expense of the Nawab Hakeem Mehndee. In the town is a good serai or resting-place for travellers, built of brick and lime-mortar, with vaulted chambers and two high gates. There is likewise a bazar. Lat. $27^{\circ} 11'$, long. $79^{\circ} 44'$.

KHETORA.—A town in the British province of Nagpore, 22 miles N.E. from the river Warda, and 62 miles S.E. from Nagpore. Lat. $20^{\circ} 18'$, long. $79^{\circ} 25'$.

KHOJAH SARAE, in the British district of Delhi, lieutenant-gov. of the N.W. Provinces, a village and caravanseraï on the route from the city of Delhi to Muttra, and 14 miles S.E. of the former. Lat. $28^{\circ} 30'$, long. $77^{\circ} 22'$.

KHOJAPHUL, in the British district of Cawnpore, lieutenant-gov. of the N.W. Provinces, a town on the route from Calpee to Etawah, and 45 miles S.E. of the latter. Lat. $26^{\circ} 24'$, long. $79^{\circ} 39'$.

KHOLAKOT, in the British district of Kumaon, lieutenant-gov. of the N.W. Provinces, a village on a ridge in the Sub-Himalaya, or mountain-system south of the main range, on the route from Chumpawut to Askoth, eight miles N. of the former. Lat. $29^{\circ} 28'$, long. $80^{\circ} 7'$.

KHOLRO, in the jaghire of Loharoo, lieutenant-

gov. of the N.W. Provinces, a village on the eastern frontier towards Jujhur. Lat. $28^{\circ} 30'$, long. $75^{\circ} 55'$.

KHONDEAN, or **KHOADEAN**, in the Sinde Sagur Doab division of the Punjab, a town situate eight miles from the left bank of the Indus, 168 miles W.N.W. of the town of Lahore. Lat. $32^{\circ} 26'$, long. $71^{\circ} 30'$.

KHONGJUEEKHOOLEL.—A town of Eastern India, in the native state of Munceepoor, 93 miles S.E. by E. from Silhet, and 140 miles E.N.E. from Tipperah. Lat. $24^{\circ} 20'$, long. $93^{\circ} 10'$.

KHONGWA ZAKAN.—A village in Aracan, about five miles from Aeng, on the route which bears the name of that town, and close to where it crosses the river. There is no bridge, but the river is fordable, being only two or three feet deep. Lat. $19^{\circ} 52'$, long. $94^{\circ} 9'$.

KHOODA, in Sirhind, a village in the British district of Umballa, on the route from Loodiana to Subarunpoor, and 50 miles N.W. of the latter place. Distant N.W. from Calcutta 1,008 miles. Lat. $30^{\circ} 20'$, long. $76^{\circ} 58'$.

KHOONDS.—See GONDWANA.

KHOORDAH, or **KHORDAGARH**, in the British district of Pooree, or southern division of Cuttack, lieut.-gov. of Bengal, a town at one time the capital of Orissa, but now much decayed, the walls of the old palace and some gateways being the only relics of its former importance. It is still the principal place of the zemindary of the rajah of Khoordah, the most opulent landholder in Orissa.

The rajah of Khoordah exercises superintendence over the temple of Juggurnauth and all its affairs, as well as over the priests, officers, and servants attached to that stronghold of superstition; a power continued to him by the British government when it ceased to collect the pilgrim-tax. A donation, fixed in the first instance at something more than 30,000 rupees, subsequently reduced to 23,000, was to be made in compensation of the loss which it was supposed would be sustained by the abolition of the tax; but it has been directed, by orders from home, that government should renounce altogether its connection with the temple, taking care only that it should be placed in a position as good, as to pecuniary means, as it held when it first came within the circle of British rule. Its present position is believed to be much better than this, and there seems good ground for the belief. The act by which the pilgrim-tax was abolished forbade the rajah of Khoordah to receive any payment from pilgrims, or to allow such payments to be received, except such as might be voluntarily offered. It is obvious that such an enactment must be nugatory, as, indeed, it has proved. The pilgrim revenue is as productive as ever, perhaps more so than at any former period;

but it is most honourable to the home authorities, that they have repudiated the stain of idolatry, by instructing the local government to sever the last link of the chain by which it was kept in contact with so contaminating an association. Distance from the town of Cuttack, S.W., 25 miles; Calcutta, S.W., 245. Lat. $20^{\circ} 10'$, long. $85^{\circ} 43'$.

KHOORJA.—The principal place of the pergunnah of the same name, in the British district of Boolundshuhur, on the route from Muttra to Meerut, and 54 miles S. of the latter. It is of considerable size, and has a bazar. The population is returned at 22,147. At the time of Lake's campaign in the Doab in 1803, this was a place of importance, having a fort, with large stores of grain, which were relinquished by the garrison evacuating the place. Elevation above the sea 770 feet. Lat. $28^{\circ} 15'$, long. $77^{\circ} 55'$.

KHOORUM.—A river rising in lat. $33^{\circ} 28'$, long. $69^{\circ} 27'$, on the south-eastern slope of the Suffeld Koh range of mountains, and, flowing through Afghanistan in an easterly direction for 45 miles, enters the territory of the Punjab through a gorge in the Suliman Mountains, and shortly afterwards turning south-east, flows for 100 miles through the valley of Bunnoo, and falls into the Indus at the town of Kaler Kote, in lat. $32^{\circ} 30'$, long. $71^{\circ} 20'$.

KHOOSHALPOOR, in the British district of Bijnour, lieut.-gov. of the N.W. Provinces, a town on the route from Moradabad to Hurdwar, and 50 miles N.W. of the former. Lat. $29^{\circ} 29'$, long. $78^{\circ} 28'$.

KHOOTHAR, in the British district of Shahjehanpoor, lieut.-gov. of the N.W. Provinces, a town on the route from Pilleebheet to Lucknow, 41 miles S.E. of the former. Lat. $28^{\circ} 11'$, long. $80^{\circ} 20'$.

KHOOTNEE, in the British hill district of Jaunsar, a stream rising in the mountains in the middle of that district, and in lat. $30^{\circ} 45'$, long. $77^{\circ} 56'$. It has a south-easterly course of about fifteen miles, and falls into the Jumna on the right side, in lat. $30^{\circ} 39'$, long. $78^{\circ} 5'$. Hodgson, who calls it the Cunti, forded it at the confluence, where he found it sixty feet wide and from one and a half to two feet deep. Skinner, who forded it nearer its source, found the water rather deep, and about fifty feet wide.

KHOPA, in the British district of Allahabad, lieut.-gov. of the N.W. Provinces, a town on the route from Allahabad to Banda, 22 miles W. of the former. Lat. $25^{\circ} 21'$, long. $81^{\circ} 34'$.

KHOPA, in Bundelcund, a village of Punnah, on the route from Banda to Jubbulpoor, 99 miles S. of the former, 96 N. of the latter, situate near the left bank of the river Cane, near that place crossed by ford, with a "stony bottom." It has a bazar, and water is abundant. Lat. $24^{\circ} 19'$, long. $80^{\circ} 20'$.

KHOPRA NUDDEE.—A river rising in

the Saugor and Nerbudda territory, in lat. 23° 26', long. 79° 9', and, flowing about 55 miles in a north-easterly direction, through the British district of Dumoh, falls into the Sonar on the right side, in lat. 24° 3', long. 79° 31'.

KHOR, in the jaghire of Jujhur, lieutenant-gov. of the N.W. Provinces, a village close to the eastern frontier, towards the territory of Tijara. Lat. 28° 5', long. 76° 19'.

KHORO, in the jaghire of Doojana, territory of Jujhur, lieutenant-gov. of the N.W. Provinces, a village on the route from Dadree to Rewaree, and eight miles S.E. of the former. Lat. 28° 28', long. 76° 23'.

KHOSALGURH.—A town in the Rajpoot state of Banswarra, 119 miles E. by N. from Ahmedabad, and 22 miles S. from Banswarra. Lat. 23° 10', long. 74° 27'.

KHOUNGTOUNG MYO.—A town of Burmah, situate on the left bank of the Irrawaddy river, and 166 miles N.N.E. from Ava. Lat. 24° 10', long. 96° 55'.

KHUDDEE.—See **KUDDI**.

KHUDRA, in Busahir, a village of the district of Koonawur, is situate on the right bank of the Sutluj, and on the low circuitous route from Pangri to Lipi. Elevation above the sea about 8,300 feet. Lat. 31° 35', long. 78° 26'.

KHURJURA, in the British district of Goruckpore, lieutenant-gov. of the N.W. Provinces, a small market-town four miles S. of the right bank of the Raptee, 25 miles N.W. of Goruckpore cantonment. Lat. 26° 57', long. 83° 7'.

KHURJURIA, in the jaghire of Rampoor, lieutenant-gov. of the N.W. Provinces, a village on the route from the town of Bareilly to Almora, and 39 miles N. of the former. The road in this part of the route is bad; the country level, open, and cultivated. Lat. 28° 43', long. 79° 25'.

KHULALA.—See **KHUNDALA**.

KHULLELGANJ, in the British district of Allygurh, lieutenant-gov. of the N.W. Provinces, a village on the route from the city of Agra to Bareilly, and 30 miles N.E. of the former. Lat. 27° 28', long. 78° 22'.

KHULSA, in the British district of Boondshuhur, lieutenant-gov. of the N.W. Provinces, a village on the route from Muttra to Meerut, and 50 miles S. of the latter. Lat. 28° 19', long. 77° 55'.

KHUND, or **KOOND**, in Cashmere, a valley furrowing the northern side of the Panjal, or mountain Barichal. It is three miles long, displays great picturesque beauty, is well cultivated, and contains some villages. The less-cultivated part is covered with wild apricot-trees, "whose blossom," Vigne observes, "in the early spring, yields a perfume so fragrant and powerful, that the Cashmirians come far and near to inhale it." So romantic

a spot could scarcely be without one of those legends so rife in Cashmere; accordingly, Vigne was informed "that the place was infested by a serpent, so long, that his tail was perceived at the bottom of a hill when his head might be seen moving on the top of it." It is so embosomed in lofty mountains, that its climate is said to be the coolest in the lowlands of Cashmere. Vigne estimates its elevation above the level of the sea at 6,000 feet. Koond, the principal place, is in lat. 33° 32', long. 75° 10'.

KHUNDALA, in the Rajpoot state of Jodhpoor, a village on the route from Balotra to the town of Jodhpoor, and 16 miles S.W. of the latter. Lat. 26° 10', long. 73° 2'.

KHUNDALU.—A lake in the hill state of Hindoor, situate about 2,800 feet above the sea, amidst the hills forming the range extending in a south-westerly direction from the left bank of the Sutlej to the Sub-Himalaya or Sewalic Mountains. It is about a mile and a half in length during the season of low water, but in the rainy season, when fullest, is a mile longer. The natives consider it unfathomable, and in some parts it is actually very deep, requiring a line of 138 feet to reach the bottom. British visitors consider that it has much resemblance to Ullswater, though neither so large nor so clear. The similitude is thought to be in its winding length, in the outline of the inclosing hills, and in the shore being clothed with vegetation to the water's edge. A species of fish, popularly called the Himalaya trout, abounds in it. A village of the same name is situate about a mile from the lake, and on the mountain-top rising above it the British political agent has built a house, the windows of which to the north command a noble view of the fortress of Malown, and the Himalaya rising behind it; whilst to the south the eye can for a vast distance trace the course of the Sutlej through the plain of Hindoostan. Lat. 31° 10', long. 76° 47'.

KHUNDEH, in the British district of Humeerpoor, lieutenant-gov. of the N.W. Provinces, a town on the route from Banda to Calpee, 14 miles N.W. by W. of the former. Lat. 25° 33', long. 80° 12'.

KHUNDELA, in the Rajpoot territory of Jeypore, a town on the N. frontier towards Shekawuttee. It is the property of the powerful thakoor or baron, who pays annually a tribute of 60,000 rupees to the government of Jeypore. Distant N. of Jeypore 50 miles. Lat. 27° 34', long. 75° 40'.

KHUNDOWLI, in the British district of Agra, a town on the route from Agra to Allygurh, and 13 miles N. of the former. It has a bazar. Lat. 27° 18', long. 78° 5'.

KHUNJUR, in the British district of Muttra, lieutenant-gov. of the N.W. Provinces, a village on the route from the cantonment of Meerut to that of Muttra, and 21 miles N. of the latter. Lat. 27° 45', long. 77° 51'.

KHUNNAH, one of the petty Cis-Sutlej states in Sirhind, having an area of about twenty-eight square miles. Upon the death of the rane, in 1851, without heirs, her possessions, yielding an annual revenue of 4,000*l.*, escheated to the British government. Khunna, the principal place, 8 miles N.W. from the town of Sirhind, is in lat. 30° 42', long. 76° 20'.

KHUNFOOR, in the British district of Shahjehanpore, lieutenant-gov. of the N.W. Provinces, a village on the route from Bareilly to the cantonment of Futtchgurh, and 36 miles S.E. of the former. Lat. 27° 54', long. 79° 44'.

KHUR, in the Cis-Sutlej territory of Sirhind, a town situate 25 miles N. of Ambala. Lat. 30° 45', long. 76° 43'.

KHURAWAR, in the British district of Rohituck, lieutenant-gov. of the N.W. Provinces, a village on the route from the city of Delhi to the town of Hansee, and 36 miles N.W. of the former. Lat. 28° 50', long. 76° 45'.

KHURCOT.—A town in the native state of Nepal, 46 miles S. from Khatmandoo, and 100 miles N. from Dinapore. Lat. 27° 3', long. 85° 22'.

KHUREHLA.—A town in the British district of Hummerpore, lieutenant-gov. of the N.W. Provinces. It has a population of 8,064 inhabitants. Distant S.W. from Hummerpore 36 miles. Lat. 25° 33', long. 79° 52'.

KHURENCHA, in the Rajpoot state of Jodhpore, a village on the route from the town of Jodhpore to that of Ajmeer, and 38 miles N.E. of the former. It is situate in a rough country, having a gravelly soil, much cut up by ravines; and in consequence the road in this part of the route is indifferent. Lat. 26° 24', long. 73° 43'.

KHURGAON, in the British district of Bareilly, lieutenant-gov. of the N.W. Provinces, a village on the route from the town of Bareilly to Sectapore, and one mile S.E. of the former. Lat. 28° 22', long. 79° 29'.

KHURIAL, in Sirhind, a village on the route from Hansee to Loodiana, and 74 miles N. of the former town. It is situate in a country of an undulating surface, and which, though in some parts sandy and covered with jungle, has considerable cultivation. Distant N.W. from Calcutta 1,050 miles. Lat. 30° 6', long. 75° 58'.

KHURKHOUDA, a town in the British district of Rohtuk, lieutenant-gov. of the N.W. Provinces, is the principal place of the pergunnah or subdivision of Khurkhouda. Lat. 28° 52', long. 76° 58'.

KHURKHURRA, in the British district of Rohtuk, lieutenant-gov. of the N.W. Provinces, a village on the route from Delhi to Hansee, and 29 miles S.E. of the latter. Lat. 28° 56', long. 76° 25'.

KHURSALEE.—See CURSALEE.

KHURTAPOOR.—A town in the territory of Oude, situate three miles from the left bank of the Ghogra, and 103 miles N. from Lucknow. Lat. 28° 20', long. 81° 9'.

KHURUK, in Sirhind, a halting-place on the route from Hansee to Loodiana, and 18 miles N. of the former town. Supplies can be collected from the adjacent country, and water is obtainable from two brick-lined wells. Distant N.W. from Calcutta 976 miles. Lat. 29° 21', long. 76° 4'.

KHUSA.—A town in the native state of Nepal, situate two miles from the right bank of the Bhotiya Coosy river, and 53 miles N.E. from Khatmandoo. Lat. 28° 7', long. 86°.

KHUSAWARA, or **KURSAVA**.—A small raj, part of Singhbhoon, and under the control of the political agent for the south-west frontier of Bengal. Its centre is in lat. 22° 50', long. 85° 49'. Its annual revenue has been estimated at 6,000 rupees.

KHUTA, in the territory of the jaghire of Rampore, lieutenant-gov. of the N.W. Provinces, a village on the route from the town of Bareilly to Almora, and 45 miles N. of the former. Lat. 28° 52', long. 79° 27'.

KHUTARO.—A town in the British province of Sattara, presidency of Bombay, 137 miles S.E. of Bombay. Lat. 17° 39', long. 74° 28'.

KHUTKURRIE, in the territory of Rewah, in Baghelcund, a town on the route, by the Kutra Pass, from Allahabad to Jubbulpore, and 83 miles S.W. of the former. Jacquemont describes it as a populous village of huts, built of mud, thatched with straw, and falling to ruin; and a similar description is given of it by a British traveller. Elevation above the sea about 1,200 feet. Lat. 24° 42', long. 82° 3'.

KHUTOWLEE, in the British district of Muzaffurnagar, lieutenant-gov. of the N.W. Provinces, a town on the route from Meerut to Hurdwar, 20 miles N. by E. of the former. Lat. 29° 17', long. 77° 49'.

KHUTTEAR.—A town in the British district of Purneah, lieutenant-gov. of Bengal, 21 miles S. by E. of Purneah. Lat. 25° 28', long. 87° 37'.

KHUTUWAS, in the Rajpoot state of Jodhpore, a village on the route from Balotri to the city of Jodhpore, and 18 miles S.W. of the latter. The road in this part of the route is good, and passes through a level and well-wooded country. Lat. 26° 9', long. 73°.

KHYBER MOUNTAINS, in Eastern Afghanistan, rise west of the plain of Peshawur, and connect the most southern and lowest range of Hindoo Koosh with the Sufed Koh, the Salt range, and the Suliman Mountains. They at first sight present the appearance of a mass of hills irregularly grouped; but a careful observer will find the distinct arrangement of a chain separating the plain of Peshawur

wur on the east, from the plain of Jelalabad and the uneven surface of Nungnehar on the west. They generally consist of slate and primary limestone, with a small proportion of overlying sandstone. The sanguinary and rapacious character of the population has prevented their mineral deposits from being explored; they are, however, known to abound in antimony, which so strongly impregnates the water at Ali Musjid, as to render it highly deleterious. The Tatarat summit is the most elevated in the range, being 3,500 feet above the plain of Peshawur, and 4,800 above the sea. The breadth of the Khyber range may be stated at about twenty miles; the length, from the base of the nearest and lowest range of the Hindoo Koosh to the Sufeid Koh and Salt range, at about fifty. It is cross-cut by two great natural channels—the Khyber ravine or pass, and, further north, the channel of the Kabool river. These, in the opinion of Lord, drained a vast lake, which once occupied the extensive valley of Kabool, an opinion strengthened by the nature of the soil of Peshawur, which, near the pass, for a great depth, consists of fragments of slate and limestone, the constituent substances of the Khyber range. Griffith, however, urges some forcible objections to this hypothesis of Lord. The Khyber Mountains are supposed to be so called from the Khyber tribe who inhabit them; and these are divided into the Afreedees, Shainwarries, and Orik Zais. As this range is lower than the Hindoo Koosh to the north, and the Sufeid Koh, the Salt, and the Suliman ranges to the south, the most practicable passes from Hindustan to northern Afghanistan lie through it. There are four of these passes, leading from east to west, and lying in the following order from south to north:—First, the Khyber Pass, the most level, and the only one practicable for cannon. Second, the Tatarat Pass, commencing near the eastern entrance of the Khyber Pass, taking a circuit northwards, and then running in some degree parallel to it, and finally rejoining it at Duka, at the entrance of the valley of Jelalabad. Third, the Abkhana Pass, by which the Abkhana route proceeds. This crosses the Kabool river at Muchnee, and recrosses it at Abkhana, where it enters the Khyber Mountzins, and proceeds along the southern bank of the river to Duka, joining the Tatarat and Khyber passes. Fourth, the Carapa route, which crosses the Kabool river above Dobundee, then crosses the Lundye from east to west, and proceeding nearly due west to Lalpoor, recrosses the Kabool river, and joins the main road proceeding westward. The Khyber range lies between lat. 33° 30'—34° 20', and long. 71° 10'—71° 30'.

KHYBER PASS.—The principal pass in the north between Afghanistan and Hindustan, as the Bolan is in the south; hence it is called the key of Afghanistan. It commences at Kadam, a remarkable collection of caves, about ten miles west of Peshawur, and extends about

thirty miles, in a tortuous but generally north-westerly course, to Duka, at the entrance of the plain of Jelalabad. Havelock, considering the pass to commence at Huzarnow on the west, estimates its entire length at fifty miles. It lies for the most part through slate rock, and along the bed of a torrent liable to be filled with a sudden fall of rain, and then so violent as to sweep away everything in its course. At other times the bed is dry, or the water shrunk to a small rill, sometimes disappearing under the gravel, or running on one side. There are two peculiarly difficult portions of the pass. One of these is close to Ali Musjid, where the road is merely the narrow bed of a rivulet, inclosed on each side by precipices, rising to the height of 600 or 700 feet, in some places to 1,000 or 1,200, at an angle of seventy or eighty degrees, and overhung by the small fort of Ali Musjid. This petty fort occupies the summit of a peaked rock, but is of small value as a military position, from want of water, and from being commanded by adjacent heights. Its possession was obstinately contested during the late military operations in Afghanistan. The Afghans in garrison evacuated it as soon as they found it commanded by the hostile artillery, and the British occupied it, but being ultimately in peril from the Khyberees, retreated, though with considerable loss. The air in this gorge, though dry, has been considered remarkably deleterious, as most of the troops posted in it perished by disease. Some, however, with more reason, attribute the mortality to the poisonous nature of the water, which is impregnated with antimony. At Lalabeg, about midway through, the pass expands into a small valley, in which is a great tope or artificial mound, on the north side of the road. Near Landee Khana, the road is for a great distance a gallery of about twelve feet wide, having on one side a perpendicular wall of rock rising to a great height above, and on the other a deep precipice. The pass rises gradually from the eastern entrance, but has a steep declivity westward, though the descent is not so great in that direction, as the plain of Jelalabad is more elevated than that of Peshawur. The height of the summit of the pass is 3,373 feet above the sea, and about 2,100 above Peshawur. As the Khyberees are a predatory and ruthless race, well armed with long rifled matchlocks, jezzails, or jingels, which take effect at greater distance than muskets, it is necessary that those who have occasion to use the pass should purchase their forbearance; and for this purpose the Durani monarchs pay them 130,000 rupees annually. The slender resources of Dost Mahomed Khan obliged him to reduce this allowance to 20,000 rupees, distributed among 20,000 fighting-men. Nadir Shah, is said to have disbursed a sum equal to 100,000*l.* for an unmolested march through the pass; but, according to Masson, he turned it by taking a southern route through Tira. The Khyber Pass was

the scene of obstinate and sanguinary conflicts during the war in Afghanistan. It was forced by the British after their first occupation of Kabool. A similar attempt, made after the disastrous retreat from Kabool, failed, with great loss; but subsequently, though obstinately defended by a large body of men, it was again forced in April, 1842. The eastern entrance of the Khyber Pass is in lat. 33° 58', long. 71° 30'.

KHYENDWEN, the principal feeder of the Irawady, rises in lat. 26° 28', long. 96° 54', in the northern part of the Burmese territory, through which it flows, generally in a southerly direction, for 470 miles, and falls into the Irawady, on the right side, a few miles below the town of Amyenmyo, and in lat. 21° 48', long. 95° 3'.

KHYOUKKALOUNG.—A town of Burmah, situate on the left bank of the Irawady river, and 24 miles W. from Ava. Lat. 21° 55', long. 95° 40'.

KHYOUK PHYOO.—See **KYOUK PHYOO**.

KHYOUNGAH ROUTE commences at a large village of the name, from whence it takes its designation, and leads by a good road, in one march, to Kioungyee, in lat. 16° 49', long. 94° 48', a short distance N. of Bassein, in the British territory of Pegue.

KHYR, in the British district of Allygurh, lieutenant-gov. of the N.W. Provinces, a town on the route from Muthra to Boolundshuhur, 32 miles N.N.E. of the former. Lat. 27° 56', long. 77° 55'.

KHYRA, in the hill state of Bhugee, a village on the declivity of a mountain rising from the left bank of the Sutluj. Elevation above the sea 2,613 feet. Lat. 31° 14', long. 77° 16'.

KHYRA, in the British district of Mirzapoor, lieutenant-gov. of the N.W. Provinces, a village on the right bank of the Ganges, 31 miles N.W. of the city of Mirzapoor. Lat. 25° 14', long. 82° 20'.

KHYRABAD, in the territory of Oude, a town on the route from Setapoor to Sekrora, five miles S.E. of the former, 75 N.W. of the latter. Tieffenthaler describes it, about eighty years ago, as a populous town, in an extensive plain, studded with numerous ponds, productive of great variety of luxuriant crops, and adorned by a vast number of fruit-trees planted in rows. The cultivation was estimated at that time to yield annually 12,00,000 rupees. Two centuries earlier, it, according to the Ayeen Akbery, was 10,91,109 rupees. The principal manufacture was fine cotton cloth. Distant N.W. from Lucknow 62 miles. Lat. 27° 32', long. 80° 49'.

KHYREEGUR, in the territory of Oude, a town in the north-western extremity, towards Kumaon, is situate on the left bank of the river Ghaghra. Tieffenthaler, describing its condition about eighty years ago, states it to be a fortified place, worthy of note, as well on account of its excellent construction as of its size, being four

or five miles in circuit. The defences are built of large blocks of stone below, and above of bricks, of unusual size; but it now lies waste, and infested with tigers and other wild beasts. It was built by an Afghan chief on a site well chosen to check the mountaineers who might threaten Oude from Kumaon or Nepaul. The town is two miles N.E. of this great work, the intervening space being overrun with trees and grassy jungle, the haunts of beasts of prey. Distant 110 miles N. of Lucknow. Lat. 28° 28', long. 80° 41'.

KHYRGAON, in Sinde, a town on the west bank of the Koodun, a branch of the Western Narra, the great offset leaving the Indus near Bukkur, and terminating in Lake Manchur, from which this town is distant about thirty miles north. Though, as Westmacott observes, it has not yet found a place in the map, it is of considerable importance, having seven mosques, and between 2,000 and 3,000 inhabitants, of whom a fifth part are Hindoos. It has a handsome bazar, well supplied with cottons. Lat. 26° 55', long. 67° 50'.

KHYROO, in the British district of Hurreana, lieutenant-gov. of the N.W. Provinces, a village on the southern frontier, towards Loharoo. Lat. 28° 41', long. 75° 58'.

KHYRPOOR, in the British district of Shahjehanpore, lieutenant-gov. of the N.W. Provinces, a village on the route from Bareilly to the cantonment of Futtehgurh, and 30 miles S.E. of the former. Lat. 27° 59', long. 79° 44'.

KHYRPOOR, in Bhawalpore, a town situate a mile from the left bank of the river Ghara. The sand-hills of the Thurr, or great sandy desert, are, on the east, so close to the town, that the extremities of the streets in that direction open on a dreary waste of sand-hills, ruined houses, and walls half-buried by the sand, which is continually encroaching on the cultivated ground along the river. The rapidity of the encroachment may be estimated from the fact, that a few years ago the boundary of the desert was two miles east of the town. In time of inundation, the town only intervenes between the water's edge and the desert. The houses are built of unburnt brick, which are found to last long, as rain seldom falls; the round domes of the mosques are generally built of the same material, the great mosque alone being constructed of burned brick. This last edifice is embellished with tiles, varnished, of various colours; but has been allowed to fall greatly into decay. There is a tolerable bazar, containing about 400 shops; but the number of these was greater formerly, all trade having here, of late years, fallen away considerably. It is, however, still a small mart for caravans or caravans resorting from the desert to obtain various articles of commerce. The neighbourhood abounds in small ruined mud forts, formerly held by petty chiefs, who resisted the authority of the ancestors of the present Bhawal Khan. Khyrpoor is in lat. 29° 36', long. 72° 12'.

KHYRPOOR, a town of Sind, is situated about fifteen miles east of the Indus, in a country of alluvial formation, but in which, as bordering on the Thurr, or eastern desert, sand is largely intermixed with the clay deposited by the river. A large canal, called the Merwah, from the Indus, yields water both for irrigation and drinking; that obtained from wells being in general brackish, unpalatable, and unwholesome. One well in the palace yields very fine water. The canal receives its water a few miles below Roree, and in time of inundation, by means of numerous ramifications, overspreads the country. Part of the water finds its way back, in many small streams, to the Indus, in the lower part of its channel; the rest is finally lost by absorption and evaporation. When the river is very low, the canal is sometimes destitute of water. The town, originally a military cantonment, grew into importance in consequence of having been selected as the residence of the chief ameer of Northern Sind. But notwithstanding this, it is but a large collection of mud hovels, with a few houses of a better description scattered about; destitute of fort or defence, unless the embattled mud wall inclosing the residence of the ameer can be deemed such. This palace is situate amidst the bazars, and presents little worth notice, except a mosque crowned with a cupola covered with gaily lackered tiles of various hues. The town is very filthy: from this cause, together with the heat of the climate, and the deleterious influence of the stagnant marshes around, it is unhealthy. The population is estimated at 15,000. There is no manufacture, except to a very small extent in weaving and dyeing coarse cottons. During the Talpoor dynasty, the ameers of Khyrpoor held the northern and finest part of Sind; but as it was much inferior in size to the dominions of their kinsmen, the ameers of Hyderabad, the former were subordinate, though allowed an influential voice in all questions considered to affect the general welfare. The territory subject to the ameers of Khyrpoor was 120 miles long, and of the same breadth. The government, it need scarcely be added, was a military despotism; the power, military resources, and revenue, being divided in various proportions between a great number of the ruling Beloochee family of Talpoor, of whom the eldest in lineage was regarded as the chief. Though mild as affecting life, the rule of this multitude of chieftains was in all fiscal matters so oppressive and rapacious as to be productive of rapidly progressive ruin and desolation. The revenue of the Khyrpoor ameers was estimated at 120,000*l.* per annum. The military force appears to have been based on a rude and ill-compacted feudal system; the chiefs having allotments of lands on condition of bringing forward and supporting a proportionate force of armed men, who were paid partly in money, partly in grain. The number of men which might be raised on emergencies was from 10,000 to 12,000. When Sind was

subjugated by the British forces, a large measure of favour was extended to one of the Khyrpoor ameers, Ali Moorad, on the ground of his early and consistent adherence to the cause of the conquerors; and it was proposed to confirm him not only in his patrimonial lands, but also in others, which had passed into his possession by virtue of a treaty executed in 1842, when he vanquished his brother and nephew, and obtained certain cessions as the price of farther forbearance. The extent of these cessions was open to question, but Ali Moorad, having persuaded Sir Charles Napier to adopt that view which best promoted his interest, was admitted to all he claimed. Suspicion, however, was never altogether lulled, and subsequent inquiry proved the ameer's claim to rest on fraud and forgery. The treaty had been written, according to Mahomedan custom, upon a leaf of the Koran, and the extent of territory transferred being very small, Ali Moorad, by interpolating some words, contrived to convey to himself one much larger; the effect being to invest him with considerable districts, in place of small villages. Fearing, however, that some curious eye might detect the interpolation, he subsequently removed the leaf, and caused its place to be occupied by another, bearing record to the like effect. This was established before a British commission on the 5th of January, 1853, and on evidence which could not be doubted, the instruments and assistants of Ali Moorad being brought forward and confronted with him. But one result could reasonably follow, and Ali Moorad was of necessity deprived of his ill-gotten acquisitions, which were incorporated with the rest of Sind, as part of the British empire in India. He was, however, permitted to retain the lands allotted to him by his father, an act certainly not of justice, but of that liberality of which so many instances are found in the dealings of the British government with native chiefs. Since his connection with the British government, Ali Moorad has abolished slavery within his territory. Khyrpoor is about 13 miles S.W. of Roree, the road from which place is good. Lat. 27° 30', long. 68° 48'.

KHYTOOPARA.—A town in the British district of Pubna, lieut.-gov. of Bengal, 112 miles N.E. of Calcutta. Lat. 23° 50', long. 89° 32'.

KIANTHENGSAH.—A town in the Tenasserim provinces, 158 miles S. by E. of Moulmein. Lat. 14° 17', long. 98° 18'.

KICHIWARA, in Malwa, a district so named, because inhabited by Kichi Rajpoots. It lies between lat. 23° 40'—24° 16', long. 76° 16'—77° 11'. Detailed information respecting it is given in the notice, in the alphabetical arrangement of Rajgurh, its principal place.

KIDDERPORE, in the British district called the Twenty-four Pergunnahs, lieut.-gov. of Bengal, a small town almost adjoining Cal-

cutta, of which it may be regarded as a suburb. It is described by Heber as a large village, in the vicinity of which are several considerable houses inhabited by Europeans, and considered to be remarkably dry and salubrious. There is here a dockyard, formerly belonging to Mr. James Kyd, but now the property of government. A factory has also been recently erected, and thus the means are concentrated within the dock establishment for the efficient repair of the government steamers. Distance from Fort William, S.E., four miles. Lat. $22^{\circ} 30'$, long. $88^{\circ} 24'$.

KIDWARRA, or **KULWARI**, in the British district of Allypore, lieut.-gov. of the N.W. Provinces, a village on the route from the city of Agra to Allypore cantonment, and 30 miles N. of the former. Lat. $27^{\circ} 34'$, long. $78^{\circ} 7'$.

KILA DOWLA, in the Sinde Sagur Doab division of the Punjab, a town situated 43 miles E. from the left bank of the Indus, 142 miles W. by N. of the town of Lahore. Lat. $31^{\circ} 54'$, long. $71^{\circ} 49'$.

KILLADEE.—A town of the Deccan, in the territory of Nagpore, situate nine miles from the left bank of the Wein Gunga river, and 46 miles E.S.E. from Nagpore. Lat. $20^{\circ} 56'$, long. $79^{\circ} 49'$.

KILNER GHAUT.—A pass on the Bombay and Agra road, constructed over the Vindhya range of mountains, under the superintendence of Captain Kilner, in compliment to whom it has been named. The return of traffic passing over this ghaat exhibits a gradual annual increase, the amount of tolls received having been doubled between the years 1845 and 1852. Later accounts continue to show a progressive increase. Lat. $22^{\circ} 22'$, long. $75^{\circ} 35'$.

KILPOOREE, in the British district of Bareilly, lieut.-gov. of the N.W. Provinces, a town on the route from Pilleebheet to Almora, 27 miles N. by W. of the former. Lat. 29° , long. $79^{\circ} 47'$.

KIMLASA, in the British territory of Saugor and Nerbudda, a town on the route from Tehree to Oojein, 50 miles S.W. of former, 170 N.E. of latter. It is of considerable size, and has a fort on a hill. Lat. $24^{\circ} 12'$, long. $78^{\circ} 25'$.

KIMLIA, in Bussahir, a pass over the range of the outer Himalaya, bounding Kunawur to the south. It is rarely passable but during May, June, and part of July; afterwards, the snow is treacherous, and many flocks of sheep and herds of goats, with the people in charge of them, have sunk in the soft and melting mass, and perished. It is therefore little frequented after the periodical rains have set in. Its elevation above the sea is probably about 17,000 feet. According to local information, this snow-bed could bear a person's weight for the first half of July, early in the morning, before the sun casts a heat sufficient to melt it; but at other times is impassable. A peak

two or three miles south-west of the pass, was by the great trigonometrical survey ascertained to have an elevation 19,481 feet above the sea. The pass is in lat. $31^{\circ} 14'$, long. $78^{\circ} 28'$.

KIMSUR, in the Rajpoot state of Jodhpore, a village on the route from Jessulmere to the town of Nagor, and 123 miles N.W. of the latter. Lat. $26^{\circ} 58'$, long. $73^{\circ} 27'$.

KINCHINGUNGA.—A mountain of the Himalaya range, situate in the territory of Sikhim, and presumed to be the second loftiest summit in the world. Its elevation is 28,176 feet above the level of the sea. That of Mount Everest, recently discovered, exceeds 29,000 feet. Lat. $27^{\circ} 45'$, long. $88^{\circ} 2'$.

KINEYREE, in the Baree Doab division of the Punjab, a town situated on the left bank of the Cheaub, 41 miles S.S.W. of the town of Lahore. At this place, in May, 1848, the troops of the khan of Bahawalpore having effected a junction with Captain Edwardes and General Courtlandt, sustained an attack from Moolraj (the rebel of Mooltan), which resulted in the complete discomfiture of the latter. Lat. $29^{\circ} 36'$, long. $71^{\circ} 12'$.

KING.—An island situate 10 miles W. from the coast of Temasserim. Length, north to south, 26 miles; breadth, east to west, 10 miles. Though infested by tigers and snakes, it is inhabited, and affords plenty of large straight timber, fit for masts and several parts of shipbuilding. Lat. $12^{\circ} 31'$, long. $98^{\circ} 28'$.

KINGRI.—A town in the dominions of Gholab Singh, 91 miles N.E. by N. from Kangra, and 147 miles S.E. by E from Sirinagar. Lat. $33^{\circ} 4'$, long. $77^{\circ} 15'$.

KINIKOTE.—A town in the native state of Cutch, seven miles S.E. from the great Western Runn, and 48 miles E.N.E. from Bhoj. Lat. $23^{\circ} 28'$, long. $70^{\circ} 26'$.

KINJUR, in the Sinde Sagur Doab division of the Punjab, a town situated on the left bank of the Indus, 32 miles S.W. by W. of the town of Mooltan. Lat. $29^{\circ} 55'$, long. $71^{\circ} 3'$.

KINTALEE.—A town in the British province of Aracan, lieut.-gov. of Bengal, 209 miles S.S.E. of Aracan. Lat. $17^{\circ} 57'$, long. $94^{\circ} 35'$.

KINTALEE.—The name of a pass leading over the Youmadoung Mountains, from the town of the same name, on the coast of Arracan, to the interior of the British district of Pegue. Lat. $17^{\circ} 59'$, long. $95^{\circ} 5'$.

KIOWOONG.—A town in the British district of Beerbhoom, lieut.-gov. of Bengal, 83 miles N.N.W. of Calcutta. Lat. $23^{\circ} 43'$, long. $88^{\circ} 31'$.

KIRBASSAH.—A town in Nepal, three miles from the right bank of the Jinru river, and 19 $\frac{1}{2}$ miles W. by N. from Khatmandoo. Lat. $28^{\circ} 23'$, long. $82^{\circ} 10'$.

KIREE, in Sirhind, a village on the route

from Kurnal to Loodiana, and 36 miles N.W. of the former town. It is a small collection of houses, pleasantly situated. Distant N.W. from Calcutta 1,001 miles. Lat. $30^{\circ} 8'$, long. $76^{\circ} 46'$.

KIRREANUGGUR.—A town in the native state of Cutch, 14 miles S.E. from the great Western Runn, and 62 miles E.N.E. from Bhooj. Lat. $23^{\circ} 30'$, long. $70^{\circ} 40'$.

KIRSTNAPATAM.—A town in the British district of Nellore, presidency of Madras, 82 miles N. of Madras. Lat. $14^{\circ} 17'$, long. $80^{\circ} 11'$.

KIRTYNASSA.—A considerable offset of the Ganges river, flowing from the parent stream in lat. $23^{\circ} 30'$, long. $90^{\circ} 3'$, and, holding a south-easterly course for eighteen miles through the British district of Fureedpore, and twenty-five miles through that of Dacca, falls, in lat. $23^{\circ} 15'$, long. $90^{\circ} 32'$, into the Megna, as the Brahmapootra is called in the lower part of its course.

KIRUTPOOR, or KEERUTHPOOR.—A town in the British district of Bijnour, lieutenant-gov. of the N.W. Provinces, distant N. from Bijnour 80 miles. Lat. $29^{\circ} 30'$, long. $78^{\circ} 15'$.

KIRWAH, in the territory of Seronj, a possession of the family of Amcer Khan, a small town on the route from Tehari to Oujein, 81 miles S.W. of former, 185 N.E. of latter. Lat. 24° , long. $77^{\circ} 58'$.

KISHENGHUR, or KRISHNA GURH, in the Punjab, a strong fort, about 10 miles E. of the Indus, and on the route to Cashmere through the Dub Pass. It is of a quadrangular form, and regularly built, though the walls are only of mud. Vigne observes, "Krishna Gurh is the finest specimen of a regular square mud fort that I have seen in the Punjab." Lat. $34^{\circ} 4'$, long. $72^{\circ} 53'$.

KISHENGUNGA, or SINDH, in the Punjab, a large river, which, rising in lat. $34^{\circ} 48'$, long. $75^{\circ} 4'$, in the mountains forming the north-eastern boundary of Kashmir, sweeps round the north of that valley, and, after a course of about 120 miles, falls into the Jailum at Mazufarabad, in lat. $34^{\circ} 23'$, long. $73^{\circ} 22'$, being little inferior there to the principal stream. It was formerly crossed by a wooden bridge; but this has been destroyed, and the communication is now kept up by a ferry.

KISHENGUNJE.—A town in the British district of Purneah, lieutenant-gov. of Bengal, 31 miles N.E. of Purneah. Lat. $26^{\circ} 4'$, long. $87^{\circ} 56'$.

KISHENGURH, in the Rajpoot territory of Alwur, under the political superintendence of the Governor-General's agent in Rajpootana, a town on the route from Delhi, by Rewari, to the town of Alwur, and 23 miles N.E. of the latter. It is situated near the Kishengurh pass, which lies through a range of low rocky mountains, and is traversed by a bad road. Supplies are procurable in this town, and water may be obtained in abundance from wells. Lat. $27^{\circ} 49'$, long. $76^{\circ} 47'$.

KISHENGURH, in Rajpootana, a small state named from its principal place. It is bounded on the north-west and north by the territory of Joudpore; on the east by the territory of Jeypore and Ajmere; and on the south and south-west by the British district of Ajmere. Kishengurh lies between lat. $25^{\circ} 50'$ — $26^{\circ} 50'$, long. $74^{\circ} 50'$ — $75^{\circ} 15'$. The area is estimated at 724 square miles. It is in general a barren country, having a soil of unpromising clay, except where overspread by rocky hills, of which the principal is a range near the middle of the country, extending from south-east to north-west. The cultivation of the lower parts of the district might, however, be much increased, as water is there found near the surface. The wild vegetation is of a repulsive aspect, being principally euphorbias, which overspread the craggy hills. The population, estimated at the rate proposed by Sir John Malcolm, of ninety-eight to the square mile, would amount to upwards of 70,000.

The family of the rajah is Rajpoot, of the Rahtore tribe, and an offset of the family of Joudpore. Kulliam Singh, rajah of Kishengurh in 1818, entered into a treaty with the British government, the latter stipulating to afford protection, the former to acknowledge the supremacy of the British government, and to act in subordinate co-operation with it; to abstain from entering into negotiations with other states without its sanction, to refrain from aggression, to refer disputes to the arbitration of his British ally, and to furnish troops when required, according to his means. The rajah with whom this treaty was concluded, soon manifested eccentricities sufficient to warrant the belief that he was not of sane mind. In 1825, he left his capital, under an alleged impression that the British authorities were about to interfere in the internal administration of his dominions, and proceeded to Delhi, there to represent his case. It was explained to him that no such danger existed, and he appeared satisfied with the explanation. Shortly afterwards, he despatched troops to attack two of his principal dependants, himself proceeding again to Delhi, there to await the result of the movement. The effects of these disturbances were soon felt injuriously in the British district of Ajmere, where depredations were committed by one or both the belligerent parties. It was thereupon represented to the rajah, that the British government would hold him answerable for the conduct of his chiefs and their troops, as well as for his own; an intimation which seems to have caused him some alarm, for upon receiving it, he quitted Delhi with some raw levies, which he had made, demanded the assistance of his remaining dependants, and marched in person to reduce those in arms against him. His nobles had, however, no inclination for assisting in the destruction of members of their own order, whose interests were identified with theirs, and they accordingly deserted him, attempted to gain posses-

sion of the capital, and avowed their intention to depose the ruling prince, and set up his infant son. The rajah then fled to Ajmere, and invoked the arbitration of the British government. The chiefs made a similar appeal. The British authorities enjoined an immediate settlement of disputes by arrangement between the contending parties, which, after a time, was apparently effected. But this pacification was not lasting. The rajah, soon after the temporary adjustment, again quitted his territory. On the urgent remonstrance of the representative of the British government, he returned, but never succeeded in effecting a reconciliation with his discontented chiefs, and probably never attempted it in sincerity. Eventually, in 1832, he abdicated in favour of his son, and retired to the British dominions, on an allowance of 36,000 rupees per annum; a sum significant of the small resources of the state in comparison with its extent and population.

KISHENGURH, the principal place of the small native territory of the same name, a town on the route from Nussersabad to Hansee, 21 miles N.E. of the former, 222 S.W. of the latter. It is situate on the south-west side of a range of hills of gneiss and granite, which have a direction from south-east to north-west, and is surrounded by a high and thick rampart of masonry. Within the town is the residence of the rajah, a large and strongly-fortified structure, but in rather a rude style of architecture. Adjoining is a large tank, and there are gardens fenced with hedges of cactus. The town, once considerable, is now in many places ruinous. Lat. 26° 33', long. 74° 57'.

KISHENGURH, in the Rajpoot state of Jessulmere, a fort and village in the desert, close to the frontier towards Bahawalpoor, and 80 miles N.W. of the town of Jessulmere. Lat. 27° 40', long. 70° 36'.

KISHENNUGUR.—A town in the British district of Beerbhoom, lieutenant-gov. of Bengal, 104 miles N.W. of Calcutta. Lat. 23° 46', long. 87° 29'.

KISHENPORE.—The chief station of the Governor-General's agent for the south-western frontier, and commissioner for Chota Nagpore. Here is a jail for both civil and criminal prisoners. About a mile and a half south of this place is Dorunda, the present headquarters of the military within the district. An experimental coffee-plantation was formed in the vicinity of the town in 1844, and samples of the produce were sent home and submitted to brokers and merchants, by whom they were highly esteemed. The object of the experiment having been answered, by demonstrating that the climate and soil of the district were well adapted to coffee-cultivation, the plantation was disposed of by the government. Lat. 23° 28', long. 85° 20'.

KISHNUGUR, in the British district of Nuddea, lieutenant-gov. of Bengal, and the seat of the civil establishment of the district, a town

on the route from Calcutta to Berhampore, 64 miles N. of former, and 54 miles S. of latter. This town has the advantage of valuable water-carriage, being situate on the navigable river Jellinghee, ten miles above its confluence with the Hooghly, navigable downwards to the sea. It is noted for its manufacture of fine muslins, highly prized even at present, when similar fabrics are produced in Britain in such perfection and cheapness. The price, however, is high, and the patterns, though tasteful, printed in only a single colour. Here also are modelled, in a sort of cement, small "figures, illustrative of the great variety of castes and classes of the population of Hindostan." One of the government colleges has been established here. The town is in lat. 23° 24', long. 88° 28'.

KISHOONPOOR, or **KISHENPOOR**, in the British district of Futtehpore, lieutenant-gov. of the N.W. Provinces, a village on the left bank of the Jumna, 25 miles S.E. of the town of Futtehpore. Lat. 25° 39', long. 81° 4'.

KISHTAWAR, in the dominions of Gholab Singh, the ruler of Cashmere, a town situate on the southern slope of the Himalaya, and in a small plain near the left bank of the Chenab, which here rushes through a ravine having precipitous sides of gneiss rock about 1,000 feet high. A little up the river, and on the opposite side from the town, is the confluence of the Muru Wurdwun, a considerable river from the north. It is a town of ill-built flat-roofed houses, with an insignificant bazar and a fort. There are trifling manufactures of shawls of inferior quality and of coarse woollens. The population, consisting of Malomemans and Hindoos, are proverbially poor, the place having suffered excessively from the oppression of the Sikhs since the expulsion of the rightful rajah, who ruled over the surrounding territory, which bears the same name, and whose power extended northwards as far as Ladakh. Kishtawar is situated 5,000 feet above the sea, and in lat. 33° 18', long. 75° 46'.

KISHUNEE.—A town in the territory of Oude, on the right bank of the Goomtee river, and 50 miles E.S.E. from Lucknow. Lat. 26° 34', long. 81° 44'.

KISHUNGURH.—A town in the Rajpoot state of Jeypoor, 36 miles W.N.W. from Jeypoor, and 64 miles N.E. from Ajmeer. Lat. 27° 9', long. 75° 25'.

KISING.—A town in Nepal, situate three miles from the left bank of the Gunduck river, and 83 miles W. from Khatmandoo. Lat. 27° 46', long. 83° 56'.

KISRY.—A town in Guzerat, or the dominions of the Guicowar, 82 miles S. by E. from Rajkote, and 163 miles S.W. from Ahmedabad. Lat. 21° 9', long. 71° 9'.

KISSEN DASKA TALAO, in the British district of Delhi, lieutenant-gov. of the N.W. Provinces, a village and halting-place on the route from the city of Delhi to Muttra, and 11 miles

S. of the former. Supplies may be collected from the vicinity, and water is abundant. Lat. $28^{\circ} 30'$, long. $77^{\circ} 21'$.

KISSENGURH.—A town of Bundelcund, in the native state of Chutterpoor, situate 78 miles N.E. by E. from Saugur, and 94 miles N. by W. from Jubbulpoor. Lat. $24^{\circ} 29'$, long. $79^{\circ} 49'$.

KISSERAING.—An island of the Mergui Archipelago, situate off the coast of Tenasserim; length N. to S. 20 miles, breadth 10 miles. Lat. $11^{\circ} 34'$, long. $98^{\circ} 36'$.

KISSUNPUR. in Sirhind, in the British district of Ferozepore, a village on the route from Lodiana to Ferozepore, and 32 miles W. of the former town. It is situate close to the left bank of a large offset of the Sutlej, and in a level, open country, partially cultivated. Distant N.W. from Calcutta 1,134 miles. Lat. $30^{\circ} 55'$, long. $75^{\circ} 18'$.

KISTNAGERRY.—A town in the British district of Kurnool, presidency of Madras, 23 miles S.W. of Kurnool. Lat. $15^{\circ} 34'$, long. $77^{\circ} 53'$.

KISTNAGHERRY, in the British district of Salem, presidency of Madras, a fort situate on a "tremendous rock," 700 feet in perpendicular height, and remarkably bare and steep. It is supplied with water from reservoirs within the fort; and at the base of the rock there are springs, which supply the petta or town. Distance from Salem, N., 60 miles; Madras, S.W., 150. Lat. $12^{\circ} 32'$, long. $78^{\circ} 17'$.

KISTNAH, or **KRISHNA**, a river rising in the Deccan, at Mahabulishwar, on the eastern brow of the Western Ghats, at the elevation of 4,500 feet above the level of the sea, and in lat. $18^{\circ} 1'$, long. $73^{\circ} 41'$. Though ultimately falling into the Bay of Bengal, its source is only about forty miles east of the western coast of the peninsula, or of the shore of the Arabian Sea. Taking a south-easterly course of about 145 miles through the territory of Sattara, and thence dividing that province from the jaghires of the Southern Mahratta country for the further distance of ten miles, it near Sanglee, in lat. $16^{\circ} 50'$, long. $74^{\circ} 36'$, on the right side, receives the Wurna, flowing from the west. From that confluence flowing south-east for 153 miles, alternately between and through the jaghires of the Southern Mahratta country, Sattara, and the British district of Belgaum, it on the right side receives the Gutpurba, and thence holds a similar course for thirty-five miles, separating the collectorates of Sholapore and Belgaum, to lat. $16^{\circ} 10'$, long. $76^{\circ} 18'$, where it arrives at the territory of the Nizam. Though its source has a considerable elevation, the country through which it flows in the upper part of its course does not appear to have a rugged aspect, being described as "one extensive plain to the south-east and north-west, whilst the ridges of hills on the north and south are barely visible, and at a distance. The banks of the river [Kistnah],

which are deep and shelving, are composed of black earth, with mixed sand. The country undulates, and presents here and there hilly ranges of broken basalt. Some parts of it consist of extensive plains, covered by a little stunted grass, serving as pasture to numerous flocks [herds] of antelopes." In its course through Belgaum, it on the right side, as before mentioned, receives the river Gutpurba, and twenty-two miles lower down, the Mulpurba, besides several small torrents on the right and left. The river, skirting the territory of the Nizam for about ten miles, passes into it, and holds through it a course north-east for about sixty miles, to Lekur, in lat. $16^{\circ} 32'$, long. $77^{\circ} 3'$, where it turns south-east, and, flowing in that direction twenty-five miles, on the left side receives, in lat. $16^{\circ} 24'$, long. $77^{\circ} 21'$, the Beema, a large tributary from the north-west; and, continuing to flow in a south-easterly direction eighty miles farther, receives on the right side, in lat. $15^{\circ} 58'$, long. $78^{\circ} 19'$, the Tumboodra, a considerable river flowing from the south-west; and thence flows circuitously, but generally north-east, for 180 miles, through the rocky gorges of the Eastern Ghats, to Reveralah, in lat. $16^{\circ} 50'$, long. $80^{\circ} 10'$, where it turns south-east, and at Chentapily, ten miles lower down, leaves the recesses of the Ghats, and enters the plain. In this part of its course, between the confluence of the Tumboodra and Chentapily, it receives on the left side, from the territory of the Nizam, some important tributaries; as the Dindee, the Pedawa, the Hullea, the Masc or Musi, the Palair; and a few miles below its entrance into the plain, it receives, on the same side, the Moonyair, a very considerable stream. During its course through the mountains, its tributaries, though numerous, are all unimportant. From the confluence of the Tumboodra to that of the Palair, it forms the boundary between the territory of the Nizam, lying either north or west, on the one side, and on the other the territory of Kurnool and the British district of Guntoor. The channel of the Kistnah is deep, its banks varying in height from thirty to fifty feet; and Heyne observes, that it "has very steep, indeed almost perpendicular, banks during its whole course, which renders it altogether useless for agricultural purposes, such as watering the countries through which it flows. Both the banks are higher than the adjoining country, as has been ascertained by barometrical observations." From Chentapily, where it enters the plain, it holds a course of seventy miles south-east to Boburlanka, in lat. $16^{\circ} 5'$, long. $80^{\circ} 56'$, where it parts into two arms, the one flowing south-east thirty miles, and falling into the Bay of Bengal at Point Divy, in lat. $15^{\circ} 57'$, long. $81^{\circ} 15'$; the other flowing south twenty-five miles, and falling into the Bay of Bengal, in lat. $15^{\circ} 45'$, long. $80^{\circ} 53'$; inclosing between them a delta, traversed by a third branch sent off from the southern arm, and by some watercourses from the main branches. The total length of course

of the Kistnah is 800 miles. It is subject to two periodical inundations annually; the first and principal, caused by the south-west monsoon precipitating its heavy rains on the Western Ghats, Mysore, and other elevated tracts about the upper parts of the river's course, takes place at the end of summer; the other periodical inundation occurs in October, being caused by the local rains brought by the north-east monsoon, and is comparatively insignificant. The Kistnah, in consequence of the rapid declivity of its waterway and rockiness of channel, cannot be navigated even by small craft for short distances; and the manner of crossing ferries is by means of large, wide, circular baskets made of bamboo, and rendered water-tight by hides sewed on the outside of the framework, and having the seams secured by being overlaid with resin.

An extensive system of irrigation in connection with this river is now in progress, and has been estimated to cost 150,000*l*. The object is proposed to be effected by means of an annicut or embankment thrown across the river at the head of the delta, and by thus accumulating the waters, to extend the benefits of irrigation to large portions of the districts of Masulipatam and Guntoor.

KISTNAPOOR.—A town in the British district of North Arcot, presidency of Madras, 180 miles W. by S. of Madras. Lat. 12° 52', long. 78° 27'.

KISTNARAAJPOOR.—A town in the Mysore, on the left bank of a branch of the Cauvery river, and 18 miles W.N.W. from Seringapatam. Lat. 12° 31', long. 76° 30'.

KISUNI, or **KISHNEE**, in the British district of Mynpooree, lieut.-gov. of the N.W. Provinces, a village on the route from the cantonment of Etawa to that of Futtchgurh, and 25 miles N.E. of the former. Lat. 27° 2', long. 79° 19'.

KITTOOR, in the British district of Belgaum, presidency of Bombay, a town formerly of great splendour, but now in decay, situate 26 miles S.E. of Belgaum. This town was the scene of a formidable insurrection in 1832, which, however, was happily suppressed by the zeal and intrepidity of two patells, named Liacqua Gowah and Krishen Row, whose services on the occasion were acknowledged on the part of government by grants of land. Lat. 15° 36', long. 74° 51'.

KIU.—A town within the dominions of Gholab Singh, the ruler of Cashmere, situate 149 miles N.N.E. from Kangra, and 135 miles E. from Sirinagur. Lat. 33° 59', long. 77° 19'.

KIVALUR.—A town in the British district of Tanjore, presidency of Madras, 166 miles S. by W. of Madras. Lat. 10° 47', long. 79° 48'.

KIVENTHA, in Arracan, a village on the route from Membo to Aeng, and situate on the Mine river. It is at this village that the

road diverges, one branch leading to Shemhegiven. Lat. 20° 18', long. 94° 22'.

KOAIDA, or **CHUTENEA.**—A small river, rising in the district of Boghelkhand, territory of Rewa, in two branches, the Odda and Silar, on an elevated plateau, the first-named in lat. 24° 35', long. 81° 59'; the Silar, in lat. 24° 35', long. 81° 55'. The elevation of the source above the sea must exceed 1,000 feet, as that is the elevation of the stream at the cascade of Bouti, twenty miles lower down. At that cascade it is precipitated a depth of 400 feet over the brow of the Kutra ridge, and continuing a northerly course of about fifteen miles, during which it is joined by the Goorna, is discharged, on the left side, and in lat. 24° 57', long. 81° 57', into the Bilund, a tributary of the Sone. Jacquemont, who, in the dry season, crossed it within a few miles of its source, styles it a rather considerable rivulet.

KOANG, a tributary of the Sone river, rises in the Saugor and Nerbudda territory, in lat. 23° 30', long. 82°, and, flowing in a westerly direction for forty miles, falls into the Sone in lat. 23° 25', long. 81° 31'.

KOARA FORT, in the Rajpoot state of Jessulmeer, a village on the route from Roree, in Sind, to the town of Jessulmeer, from which it is distant 33 miles W. It has a small stone fort. Lat. 27° 7', long. 70° 26'.

KOATPULLY.—A town in Hyderabad, or dominions of the Nizam, situate nine miles N. from the right bank of the Tandoor river, and 53 miles W. from Hyderabad. Lat. 17° 22', long. 77° 45'.

KOBELANPOOR.—A town in the British district of Silhet, lieut.-gov. of Bengal, 55 miles S. by W. of Silhet. Lat. 24° 9', long. 91° 37'.

KOCHANG.—A town in the British district of Chota Nagpoor, lieut.-gov. of Bengal, 60 miles S.E. by E. of Lohadugga. Lat. 22° 55', long. 85° 30'.

KOCHECHOO, in the British district of Humcepore, lieut.-gov. of the N.W. Provinces, a village on the route from Banda to Gwalior, 67 miles W. of the former. It is situate on the river Dhasan; and supplies may be obtained. Lat. 25° 34', long. 79° 29'.

KOCHELAH MOOREA.—A town in the British district of Durrung, province of Assam, 57 miles N.E. by E. of Durrung. Lat. 26° 55', long. 92° 47'.

KOCHELAOOTAH.—A town in the British district of Nellore, presidency of Madras, 50 miles W.N.W. of Ongole. Lat. 15° 50', long. 79° 25'.

KOCHUS.—A town in the British district of Shahabad, lieut.-gov. of Bengal, 76 miles W.S.W. of Dinapore. Lat. 25° 10', long. 84°.

KODAMUNGLOM.—A town in the native state of Travancore, (territory of Madras, 112 miles N. by W. from Trivandrum, and 63

KOD—KOK.

miles S.S.W. from Coim atoor. Lat. $10^{\circ} 4'$, long. $76^{\circ} 42'$.

KODUMUDY.—A town in the British district of Coimbatore, presidency of Madras, 64 miles E. of Coimbatore. Lat. $11^{\circ} 4'$, long. $77^{\circ} 57'$.

KODUNDOOR.—A town in the British district of Coimbatore, presidency of Madras, 45 miles S.S.E. of Coimbatore. Lat. $10^{\circ} 23'$, long. $77^{\circ} 18'$.

KODUNGALLOOR.—See CRANGANORE.

KODUNGUL.—A town in Hyderabad, or dominions of the Nizam, situate seven miles from the left bank of the Tandoor river, and 60 miles W.S.W. from Hyderabad. Lat. $17^{\circ} 6'$, long. $77^{\circ} 41'$.

KOEL, or KOYLE.—A river rising in the mountainous tract on the southern frontier of the British district of Chota Nagpore, about lat. $23^{\circ} 3'$, long. $83^{\circ} 58'$. It holds a course generally northerly, and, receiving several torrents right and left, passes into the native state of Sirgooja and the British districts Palamow and Behar, and falls into the river Son on the right side, in lat. $24^{\circ} 31'$, long. $83^{\circ} 54'$, having a total course of about 140 miles. Valuable coal-fields have been discovered at Singra and some other places on its banks.

KOELAOR.—A town in the territory of Oude, situate on the right bank of the Gogra, and 52 miles E. from Lucknow. Lat. $26^{\circ} 51'$, long. $81^{\circ} 50'$.

KOENT, in the British district of Cawnpore, lieutenant-gov. of the N.W. Provinces, a village on the route from the cantonment of Etawa to that of Cawnpore, and 34 miles W. of the latter. Lat. $26^{\circ} 22'$, long. $79^{\circ} 56'$.

KOEREEPOOR, in the British district of Jounpore, lieutenant-gov. of the N.W. Provinces, a village situate in a patch of territory surrounded on all sides by that of Oude, 25 miles N. of Allahabad. Lat. $26^{\circ} 2'$, long. $82^{\circ} 24'$.

KOGOON.—A town of Eastern India, in the British province of Pegue, situate 90 miles E. from Rangoon, and 51 miles N. from Amherst. Lat. $16^{\circ} 50'$, long. $97^{\circ} 39'$.

KOH, or CHOIA, a river of the British districts of Kumaon and Bijnour, rises in the most southern range of the Himalaya mountain-system, near Sungoor fort, at an elevation of about 6,400 feet, and in lat. $29^{\circ} 55'$, long. $78^{\circ} 42'$. It takes a course of about eighteen miles, in a south-westerly direction, to the southern frontier of Kumaon, where it passes into the plain of Hindoostan at Kotdwara, having an elevation of 1,342 feet above the sea. From this place it runs in a direction, first southerly, and subsequently south-easterly, a distance of about forty-five miles, to its junction with the Western Ramganga, in lat. $23^{\circ} 17'$, long. $78^{\circ} 42'$. It was formed by Webb at Kotdwara, in March, when it was two feet deep and fifteen yards wide, with a rapid current.

KOHAT.—A town of Northern India, in the hilly tract north of the Salt range of mountains, and in the valley of Kohat, which is about seven miles in diameter, populous, fertile, well watered by the river Teo and by numerous springs. The town, which is surrounded by a wall, is meanly built, but has a good bazar and a fine mosque. Its beautiful situation, and the luxuriant vegetation of the surrounding country, render it a delightful place. The great route from Peshawur to Kala Bagh passes through Kohat, as does also westward an important route by Bungush to Khoraan. Kohat is the capital, not only of the pergunnah of the same name, but of an extensive and fertile valley, which, for administrative purposes, has recently been formed into a separate district of the Punjab. At Sheikh, which is situate a few miles east of the town, are springs of naphtha and very rich and extensive deposits of sulphur. The British government are about to construct a chain of fortresses in the Kohat Pass, with the view of controlling the wild tribes in the vicinity. Kohat is in lat. $33^{\circ} 32'$, long. $71^{\circ} 27'$.

KOHNGAM.—An island 20 miles E. from the coast of Siam, two miles long by one and a half broad. It is situate 258 miles S.S.W. of Siam. Lat. $11^{\circ} 21'$, long. $100^{\circ} 5'$.

KOHRAR KHAS, in the British district of Allahabad, lieutenant-gov. of the N.W. Provinces, a town on the route from Mirzapore to Bandah, 36 miles W. of the former. Lat. $25^{\circ} 8'$, long. $82^{\circ} 4'$.

KOI, or KHOEE, in Sirhind, a village on the route from Hansee to Loodiana, and 48 miles S. of the latter town. It is situate in a country slightly undulated, tolerably fertile, and partially cultivated. Distant N.W. from Calcutta 1,064 miles. Lat. $30^{\circ} 17'$, long. $75^{\circ} 56'$.

KOILA, in the British district of Allahabad, lieutenant-gov. of the N.W. Provinces, a village on the route from the cantonment of Allahabad to Futtehpore, and 15 miles N.W. of the former. Lat. $25^{\circ} 29'$, long. $81^{\circ} 43'$.

KOILAH, in the jaghire of Jujhur, district of Dadree, lieutenant-gov. of the N.W. Provinces, a village on the north-eastern frontier, towards the British district of Rohtak. Lat. $28^{\circ} 44'$, long. $76^{\circ} 19'$.

KOILCONDAH.—A town in Hyderabad, or dominions of the Nizam, 65 miles S.W. from Hyderabad, and 62 miles N. by W. from Kurnoul. Lat. $16^{\circ} 41'$, long. $77^{\circ} 50'$.

KOILKOONTLA.—A town in the British district of Cuddapah, presidency of Madras, 61 miles N.W. of Cuddapah. Lat. $16^{\circ} 13'$, long. $78^{\circ} 23'$.

KOKREE, a river of Bombay, rising in lat. $19^{\circ} 22'$, long. $73^{\circ} 57'$, a few miles east of the Malsej Ghat, and, flowing for fifty miles in a south-east direction, through the British districts of Poona and Ahmednuggur, falls into the Goor river, in lat. $18^{\circ} 52'$, long. $74^{\circ} 20'$.

KOK—KOL.

KOKREET.—A town in the British province of Tenasserim, situate 60 miles N. of Moulmein. Lat. $17^{\circ} 20'$, long. $97^{\circ} 42'$.

KOKSAL.—A town in the British district of Pubna, lieut.-gov. of Bengal, 98 miles N.E. by N. of Calcutta. Lat. $23^{\circ} 48'$, long. $89^{\circ} 16'$.

KOKUR, in Cashmere, a celebrated spring at the northern base of the Panjal of Banihal, bounding the valley on the south. It gushes with a copious volume of water out of six orifices at the bottom of a limestone cliff. A considerable stream is thus formed, which flows into the Bureng river. The water is celebrated for its excellence, and the Afghan court, when established in Cashmere, drank no other. Koker Nag is in lat. $33^{\circ} 30'$, long. $75^{\circ} 19'$.

KOKUTNOOR.—A town in the British district of Sholapoor, presidency of Bombay, 32 miles E. of Beejapoor. Lat. $16^{\circ} 49'$, long. $76^{\circ} 16'$.

KOKUTNOOR.—A town in the British district of Belgaum, presidency of Bombay, 73 miles N.E. of Belgaum. Lat. $16^{\circ} 41'$, long. $75^{\circ} 16'$.

KOLA, in the British district of Kumaon, lieut.-gov. of the N.W. Provinces, a small fort, built of stone, and surrounded by a ditch, situate on a hill on the right bank of the river Dubha, on the route from Almora to Kosheepoor, 25 miles N.E. of the latter. Lat. $29^{\circ} 25'$, long. $79^{\circ} 20'$.

KOLABAH.—An island; also a portion of territory on the Concan coast, the whole subject to the presidency of Bombay. The island is situate in the Arabian Sea, or North Indian Ocean, half a mile W. of the shore of the Concan, and opposite the town Ali Bagh, in about lat. $18^{\circ} 38'$, long. $72^{\circ} 56'$. It appears to have been long neglected as a barren rock, but the active operations of European commerce, and maritime warfare, having shown the importance of its position, it was occupied and fortified in 1662, by the Mahratta chief Sevajes, who there "practised as a sea attorney." The course of piracy was, after his death, pursued by the Mahratta family of Angria, and became so formidable and ruinous to the commerce of the maritime powers, that, in 1722, an expedition of three British ships of the line and a Portuguese land force attacked it; but the attempt failed, in consequence of the cowardice of the Portuguese. The pirates continued to thrive in their iniquitous avocation, and Forbes, who, in 1772, visited Ragojee, the possessor of Kolaba, describes his palace, treasury, and other public buildings, gardens and stables, "containing a noble stud of Persian and Arabian horses, elephants, and camels;" adding, that "everything about the durbar was in princely style."

The tract of country on the mainland is bounded on the north by the harbour of Bombay; on the east by the British district of Tannah, with which it is now incorporated as a sub-collectorate; on the south by Jhingera; and on the west by

the Arabian Sea. It extends from lat. $18^{\circ} 26'$ — $18^{\circ} 48'$, and from long. $72^{\circ} 55'$ — $73^{\circ} 12'$; is thirty miles in length from north-west to south-east, and twelve in breadth; with an area of 318 square miles, and a population of 58,721. After the overthrow and expulsion of the Peishwa, Ragojee Angria in 1822 concluded a treaty with the British government, by which he agreed to acknowledge its supremacy, and was in turn guaranteed protection against external attack. Ragojee Angria died in 1838, leaving one of his widows in a state of pregnancy. She gave birth to a son, who was recognised as chief of Kolaba. The boy died in infancy, when the legitimate line of descent to the Kolaba state became extinct, and the territory lapsed to the paramount power. Pretensions to the succession were put forth by the illegitimate sons of Ragojee; but these, after due consideration, being ultimately rejected, the territory was annexed to the British dominions. The country is rich in teak forests and other timber. The surplus revenue available for the general purposes of the state, after deducting all disbursements, including pensions to the members of Angria's family, amounted, in 1844, to 1,27,355 rupees.

KOLACHEE, in the Daman division of the Punjab, a town situated 40 miles W. from the right bank of the Indus, and 140 miles N.W. by N. of the town of Mooltan. Lat. $31^{\circ} 51'$, long. $70^{\circ} 53'$.

KOLAD.—A town in the British district of Tannah, presidency of Bombay, 46 miles S.E. of Bombay. Lat. $18^{\circ} 26'$, long. $73^{\circ} 20'$.

KOLADYNE RIVER.—The principal river of Arracan. It takes its rise near the Blue Mountains, in lat. $22^{\circ} 27'$, long. $92^{\circ} 51'$, but the highest point to which it has been explored is in lat. $21^{\circ} 25'$, or ninety miles above Akyab, where its stream is narrow, and navigable only for canoes. After traversing for some miles a mountainous and desolate region, it opens upon wide and luxuriant plains, whereon are several villages, having extensive cultivation in their neighbourhood, more especially of rice, for which the soil is peculiarly adapted, from the facilities of irrigation. The inhabitants of these sequestered villages consist of Mughs and Burmese. The town of Arracan is situated on a branch of the river, about fifty miles from its mouth; and up to within a few miles of that place it is navigable for ships of 250 tons burden. For the last twenty or thirty miles of its course, it is connected with the rivers Myoo and Lemyo by innumerable creeks, by means of which much inland communication is carried on. It empties itself into the sea close to the island of Akyab, which is situated between this and the estuary of the Myoo. The breadth at its mouth is about ten miles.

KOLANGODU, in the British district of Malabar, under the presidency of Madras, a town near its eastern frontier, towards the British district Coimbatore. It is situate in a very beautiful country; the mountains on the

south pouring down fine cascades, and the cultivated fields being interspersed with forests and plantations of fruit-trees. Each dwelling is inclosed by a small garden, and the number of houses has been stated at 1,000. Distance direct from Calicut, S.E., 75 miles; Cananore, S.E., 125; Coimbatore, S.W., 32; Madras, S.W., 300. Lat. $10^{\circ} 37'$, long. $76^{\circ} 45'$.

KOLAPOOR.—A raj or state under the political management of the presidency of Bombay. It is bounded on the north and north-east by Sattara; on the east and south by the British collectorate of Belgaum; and on the west by Sawunt Warree and the British collectorate of Rutnagherry. It lies between lat. $15^{\circ} 58'$ — $17^{\circ} 17'$, long. $73^{\circ} 47'$ — $74^{\circ} 46'$; is ninety-five miles in length from south-east to north-west, and sixty-five in breadth. The area is stated to be 3,445 square miles. It is throughout included within the country popularly denominated the Deccan, and is a tract sloping with a rugged surface from the culminating ridge of the Ghauts, forming the western boundary, towards the east or plain country, in the British collectorate of Belgaum. From that circumstance, the numerous torrents traversing this rough tract have a direction easterly, falling into the Kistnah, by the channel of which great river their contents are ultimately discharged into the Bay of Bengal. The Kistnah itself, flowing southward from Sattara, touches on this raj a few miles below the confluence of the Wurna, in lat. $16^{\circ} 50'$, long. $74^{\circ} 36'$, and, holding a course very tortuous, but generally in a direction south-easterly, for about twenty-five miles, forms for that distance the boundary between Kolapoor and the Southern Jagheerdars. The Wurna rises at the north-west corner of the raj, at Tewra, on the eastern declivity of the Ghauts, in lat. $17^{\circ} 20'$, long. $73^{\circ} 46'$, and, flowing towards the south-east for about thirty miles, forms for that distance the boundary between this raj and the province of Sattara, and falls into the Kistnah on the right side. The other streams are mere mountain torrents. The elevation of the highest summits of the Ghauts, in the western part of the raj, is probably between 3,000 and 4,000 feet; the average elevation of the lowest part, or that farthest east, varies perhaps from 1,500 to 1,800 feet. The geological formation appears to be throughout volcanic, principally trappean, like the rest of the northern section of the Ghauts; and the volcanic formation is generally overlaid by laterite, or cellular ferruginous sandstone, which, when disintegrated, forms a very fertile soil. The population consists principally of two races,—Maharattas and Ramooses; these last resembling in some respects the Bheel tribe, so extensively spread farther north. The Ramooses, however, are more intelligent than the Bheels, and though actuated by similar plundering habits, are much superior in a military point of view. The number of the people has

been returned at 500,000. This, however, includes the population of the dependencies of Kolapoor; viz., Vishalgur, Kagul, Inchulkurunjee, and Bowda. The chief of Inchulkurunjee having died without male issue, the question of the lapse of the estate to the Kolapoor government has been made dependent on the non-existence of any male descendant of the founder of the ruling family. Should the resumption be sanctioned, the estate of Inchulkurunjee will probably be transferred to the British government in liquidation of the debt incurred by the Kolapoor state for the suppression of the insurrection in the year 1844. Kolapoor, the seat of government, appears to be the only town. The route from Sattara to Sawuntwarree, from north to south, passes by the town, as does that from south-east to north-west, from Dharwar to the South Concan. There is also a route from north-east to south-west, from Sholapoor to the town of Kolapoor.

The rulers of Kolapoor trace their descent from Sevajee, the founder of the Mahratta empire. While Saho, the third in descent from Sevajee, was a prisoner at Delhi, his uncle, Rajah Ram, the second son of Sevajee, assumed the government. Rajah Ram died before Saho's liberation, and was succeeded by his son Sevajee, who contested the Mahratta supremacy with his cousin Saho. Sevajee did not long survive his father, and left his brother Sambajee heir to his pretensions. Sambajee continued the contest for the throne of Sattara with his cousin Saho; at length a compromise was effected, by which Sambajee acknowledged Saho's right to the whole Mahratta country except Kolapoor with its dependent territory, which was assigned to himself, with the title of rajah, and the same dignity as that assumed by Saho; hence the rajah of Kolapoor was addressed as a superior by the Peishwa. Sambajee died in 1760, without issue. His widow adopted, as her husband's heir, a boy named Sevajee, and conducted the affairs of the principality in his name. The piracy which prevailed on the coast induced the government of Bombay to send an expedition against Kolapoor in 1765. The fort of Malwan was captured and retained until certain satisfaction was rendered, when it was restored to the Kolapoor state by treaty, concluded the 12th of January, 1766. In 1804, when Sir A. Wellesley was engaged in settling the Southern Mahratta country, the Kolapoor rajah preferred certain claims against the Peishwa. He was told that the British government would arbitrate his claims, but would not allow him to invade the Peishwa's dominions. The opportunity was taken to propose an agreement for the suppression of piracy, on account of which the Kolapoor ports were then blockaded; but it does not appear to have ever been concluded. The subjects of the rajah's maritime districts never desisted from piracy: when detected, and punishment threatened, apologies were offered, with promises of reparation for the past, and abstinence from

future depredations; but the system of piracy was not effectually suppressed until 1812, when the demand against the rajah on account of plunder of British property amounted to fifty lacs of rupees. During the distracted condition of the Poona government, a hostile conflict was maintained by the states of Kolapoor and Sawuntwarree. Latterly, Appa Dessaye, the Peishwa's general, interfered, and was besieging Kolapoor with a view of reducing it to the Peishwa's authority; but the differences were arranged by stipulations contained in a treaty concluded by Mr. Elphinstone with the rajah of Kolapoor, by which the territorial rights of that prince in regard to the Peishwa were defined, and all claims on his part over the dominions retained by the Peishwa, and over the subjects of that chieftain, surrendered. Malwan and its dependencies were ceded in perpetual sovereignty to the British government, the suppression of piracy was decreed; and, in consideration of these conditions, the Company agreed to guarantee the rajah in possession of the territories assigned to him; at the same time the British relinquished all pecuniary demands against the rajah. In 1822, the rajah Abba Sing was murdered. He left an infant son, by Tarra Bai, usually styled the Dewan; but his brother, Bawa Sahib, seized the Guddee, and his nephew, whose right he had usurped, dying soon after, he became the rightful rajah. In 1825, the rajah's maladministration and aggressions on the neighbouring jaghiredars, who were under British protection, compelled the armed intervention of the Company's government. A force was accordingly moved into the Kolapoor country, when hostile proceedings were arrested by the submission of the rajah, with whom a new treaty was concluded; but scarcely had the British force been withdrawn, when the rajah levied troops and renewed his oppression of the guaranteed chiefs. His conduct compelled the British government to take military possession of the country. The rajah at length submitted, and entered into new engagements, contained in a preliminary treaty, concluded towards the end of the year 1827, and a definitive treaty (more favourable to him), concluded in 1829. It was deemed necessary that his proceedings should for some be watched by a corps of observation, a precaution justified by the event; the rajah, under the pernicious advice of the minister appointed by the British government, and who proved faithless to the authority to which he owed his power, having resumed his previous course of violence. The minister being removed and tranquillity restored, the military force was withdrawn. Nothing of importance occurred till 1839, when the rajah Bawa Sahib died, leaving two sons, both young, and by different mothers. He was succeeded by the elder, Sevajee, usually called Baba Sahib. The mother of the rajah assumed the regency during his minority, but it was shortly wrested from her by Tarra Bai, the widow of the former rajah, Abba Sing,

and already mentioned as known by the title of the Dewan. This lady was recognised as regent by the British government. She continued to exercise full authority until 1842, when her extreme mismanagement compelled the government, as guardian of the young rajah's interests, to interfere. After the complete failure of milder measures, the regent was set aside altogether, and a minister appointed to act under the immediate control of the British government. The Dewan's party, discontented from the loss of their nefarious gains, excited a general rebellion throughout the country in 1844. The rebellion was put down by force of arms, and the entire management of the Kolapoor state assumed, and thenceforward directly exercised, by the British government, in the name of the rajah, whose authority in the mean time remains in abeyance.

The military force of the state of Kolapoor amounts to between 9,000 and 10,000 men, of various descriptions. If that of the dependent jaghiredars be added, the number will be increased to more than 12,000.

KOLAPOOR.—The principal place and seat of government of the raj or state of the same name. Being in a secluded tract, seldom visited by Europeans, little is known concerning it. When, in 1825, a British force advanced to the place, the reconnaissance gave the information that the defences were weak, and might, without much difficulty, be taken by escalade. On the rampart were many guns of small calibre, from four to twelve-pounders; but there was reason to conclude the garrison had no supply of ammunition. When, in consequence of the rajah, having again become troublesome, it was once more necessary to march a force against him, the place was peaceably delivered up to the British troops, the Arabs and Scindians, who constituted the garrison, marching in search of other service, and the rabble, which had collected from various quarters, dispersing in all directions. Under British authority, the physical condition has been scarcely less benefited than the political and civil circumstances of the country of which it is the capital. The town being excessively crowded and unhealthy, a series of measures for its sanitary improvement commenced in 1848; and it has since been officially reported, that the place has been tolerably cleansed from its filthiness, and that a plentiful supply of water has been obtained. Further improvement may reasonably be looked for. Distant S.E. from Bombay 185 miles, S. from Poona 130, S. from Sattara 70. Lat. 16° 42', long. 74° 18'.

KOLAR.—A town in the British province of Sattara, presidency of Bombay, situate 27 miles S. of Bejapoor. Lat. 16° 28', long. 75° 44'.

KOLARAS, in the territory of Gwalior, or possessions of Scindia's family, a town, the principal place of a pergunnah of the same

name, assessed at the annual land revenue of 90,000 rupees. Distant 79 miles S.W. of Gwalior fort. Lat. 25° 13', long. 77° 41'.

KOLASHAGARAPURAM.—A town in the native state of Travancore, territory of Madras, situate 51 miles N.W. by N. from Trivandrum, and 83 miles W.N.W. from Tinnevely. Lat. 9° 6', long. 76° 35'.

KOLBAREEA.—A town in the British district of Pachete, lieut.-gov. of Bengal, 131 miles N.W. of Calcutta. Lat. 23° 48', long. 86° 54'.

KOLHUAGAR, in the district of Bainswara, territory of Oude, a village on the left bank of the Ganges, 10 miles S.E. of Cawnpore, 30 S.W. of Lucknow. Butter estimates the population at 1,000, all Hindoos. Lat. 26° 25', long. 80° 31'.

KOLLAH.—A town in the British province of Sattara, presidency of Bombay, 31 miles S. by E. of Sattara. Lat. 17° 14', long. 74° 10'.

KOLLATHOOR.—A town in the British district of Tinnevely, presidency of Madras, 41 miles N.E. by E. of Tinnevely. Lat. 9° 1', long. 78° 15'.

KOLRON, in the Kyarda Doon, in Sirmor, a village and halting-place on the route from Dehra to Nahun, and 54 miles W. of the former town. The hills inclosing the Doon are here so close, that they are separated merely by the channel of the Batta. The road in this part of the route is described by Mundy as a rough track; and no supplies can be procured except water from the Batta. This place is called Kolson by Moorcroft, who states it to have been the scene of a severe defeat received by the Rohilla prince Gholam Kader from Jagat Prakas, the rajah of Sirmor. Distant N.W. from Calcutta 1,086 miles. Lat. 30° 30', long. 77° 29'.

KOLWAR, in the district of Sultanpoor, territory of Oude, a village 70 miles S.E. of Lucknow, 10 miles W. of Sultanpoor cantonment, half a mile from the right bank of the river Goomtee. According to Butter, the population is 1,000, of whom 100 are Mussulmans. Lat. 26° 23', long. 82°.

KOMARPOOR.—A town in the British district of Purneah, lieut.-gov. of Bengal, 29 miles S. by E. of Purneah. Lat. 25° 23', long. 87° 41'.

KOMEDPORE.—A town in the British district of Pubna, lieut.-gov. of Bengal, 110 miles N.N.E. of Calcutta. Lat. 24° 3', long. 89° 9'.

KOMHARSIN, a hill state between the Sutlej and the Jumna, is bounded on the north by Kooloo, from which it is separated by the river Sutlej; on the east by Kotgurh and the British districts of Sundooch and Kothkaee; on the south by Bulsun; and on the west by the district of Goond, one of the tributaries of the state of Keonthul. It embraces an area of about fifty-six miles. Its centre is in lat.

31° 13', long. 77° 32'. Except a narrow strip along the left bank of the Sutlej, the surface has a considerable elevation; that of the town of Komharsin above the level of the sea, is 5,279 feet; of the cantonment of Kotgurh, on the eastern frontier, 6,634; of Whartoo, in the same locality, 10,656. The drainage is northwards, by a small stream, into the Sutlej; southwards, by two feeders of the river Giree. The principal crops are wheat, barley, various sorts of millet, phaphur, and some other species of buckwheat; various esculent vegetables, tobacco, and, on the banks of the Sutlej, ginger and cotton. The poppy is extensively cultivated for opium, which is of very fine quality, and brings a higher price than that of the plains. The seeds yield a sweet oil, much used as an article of diet, and for burning. Hemp is an important product, on account of its fibres, the intoxicating drug obtained from its resinous secretion, and its seeds, which yield oil, and are parched and used as food. A hardy species of rice is partially cultivated. Oats grow spontaneously, but are not applied to any use. The fruits are apples of indifferent quality, pears, peaches, apricots, cherries, grapes, walnuts, filberts, raspberries, currants, barberries, and mulberries. Bamboos, and some of the tropical fruits, grow on the bank of the Sutlej.

The rana or prince of this state formerly owed allegiance to Bussahir, but was dispossessed of his rights by the Goorkhas. On the expulsion of these aggressors, in 1815, he was reinstated by the British. The grant was in favour of Rana Kehur Sing and his posterity. Kehur Sing died without issue in 1839, and, according to the strict letter of the endowment, this territory lapsed to the British government; but, in consideration of the early attachment of the deceased rana to British interests, and of other circumstances, the grant was renewed in favour of Preetum Singh, a collateral heir. This chief engaged to prevent suttee, and to abolish infanticide. The present annual revenue of the state is estimated at 1,000*l.*, out of which a tribute of 144*l.* is paid to the East-India Company.

KOMHARSIN, an insignificant village, though the principal place of the hill state of the same name, and the residence of the rana or native prince, is situate on a mountain descending precipitously a depth of 2,280 feet to the left bank of the Sutlej. Fraser describes it, at the time of his visit, as "mean and poor," not consisting of "more than a dozen houses, built, like the rest of the hill villages, of dry stone and wood, in the Chinese fashion." It has probably improved under British protection, as Archer, twelve years afterwards, found the rana residing in a large and well-built residence, and the surrounding country well cultivated and luxuriantly productive. Elevation above the sea 5,279 feet. Distance N.W. from Calcutta, by Kurnool and Subathoo, 1,110 miles. Lat. 31° 19', long. 77° 30'.

KOMTA, in the territory of Nagpoor, a town on the route from Hazareebagh to the city of Nagpoor, 107 miles N.E. of the latter, 467 S.W. of the former. Here, after the deposition of Appa Sahib Bhonsla, in 1818, some of his partisans attempted to make head, manning the defences, which consisted of a wall and partial ditch, inclosing a small fort. The garrison amounted to above 2,000, and had two batteries. After the outer defences had been forced, and the fort attacked, the garrison surrendered, on promise of personal safety. The loss of the besieged was estimated at 400; that of the besiegers at sixty-one. Lat. $21^{\circ} 32'$, long. $80^{\circ} 21'$.

KOMULMAIR, or **KUMULMAIR**, in the territory of Oodeypoor, in Rajpootana, a pass defended by a fortress, on the route from Oodeypoor to Joudpore, 50 miles N. of former, 90 S.E. of latter. It lies through a succession of deep and rugged ravines in the Aravulli, and forms the communication between the more elevated region of Mewar and the plain of Marwar. The fortress was gained for the East-India Company in 1818, by bribing the garrison of the ruler of Joudpore to give it up; and it was made over to the rajah of Oodeypoor. Elevation above the sea 3,353 feet. Lat. $25^{\circ} 10'$, long. $73^{\circ} 40'$.

KONADAH.—A town in the British district of Vizagapatam, presidency of Madras, 30 miles N.E. by N. of Vizagapatam. Lat. $18^{\circ} 1'$, long. $83^{\circ} 40'$.

KONADOON.—A town in Hyderabad, or dominions of the Nizam, situate 30 miles S.W. from Hyderabad, and 89 miles N. from Kurnoor. Lat. $17^{\circ} 6'$, long. $78^{\circ} 11'$.

KONAIE.—A considerable watercourse of Bengal, separating from the Brahmapootra in lat. $25^{\circ} 10'$, long. $89^{\circ} 43'$, near the town of Mebindergunje, in the British district of Mymensing. Flowing first in a southerly direction for 100 miles, and then communicating with the Ganges by means of a considerable offset, it turns south-east, and, taking the name of the Dulasseree, it flows for seventy-five miles, to lat. $23^{\circ} 13'$, long. $90^{\circ} 33'$, at which point it reunites with the parent stream, there denominated the Megna. The Konaie in its course receives several smaller streams and watercourses, such as the Goggot, the Attree, and the Bunsai.

KONAKAGIRI.—A town in the British district of Salem, presidency of Madras, 190 miles S.W. by W. of Madras. Lat. $11^{\circ} 53'$, long. $78^{\circ} 4'$.

KONCHPARA.—A town of Assam, in the British district of Camroop, 19 miles W. of Gowahatty. Lat. $26^{\circ} 7'$, long. $91^{\circ} 26'$.

KONDA, in the British district of Benares, lieutenant-gov. of the N.W. Provinces, a village situate on the right bank of the Ganges, 666 miles N.W. of Calcutta by water. Lat. $25^{\circ} 20'$, long. $83^{\circ} 9'$.

KONDELWUDDY.—A town in Hyder-

abad, or dominions of the Nizam, situate four miles from the right bank of the Godavery river, and 112 miles N.N.W. from Hyderabad. Lat. $18^{\circ} 48'$, long. $77^{\circ} 45'$.

KONDURH, in the British district of Futtehpore, lieutenant-gov. of the N.W. Provinces, a town situate 14 miles S.E. of the town of Futtehpore. Lat. $25^{\circ} 46'$, long. $80^{\circ} 57'$.

KONGOODY DROOG.—A town in the British district of North Arcot, presidency of Madras, 123 miles W. by S. of Madras. Lat. $12^{\circ} 46'$, long. $78^{\circ} 29'$.

KONKAN.—See **CONCAN**.

KONKEE.—A river rising in lat. $26^{\circ} 41'$, long. $87^{\circ} 51'$, in Nepal, on the southern slope of the Sub-Himalaya range of mountains, and, flowing in a southerly direction for fifteen miles through Nepal, and fifty miles through the British district of Purneah, falls into the Mahananda in lat. $25^{\circ} 51'$, long. $87^{\circ} 48'$.

KONKEIR, or **KAKAIR**, in the territory of Nagpoor, a town situate between the right or south bank of the river Mahanuddée and a high rocky hill, surmounted by a fortress. It is surrounded by rocky mountains, of which those to the north, the east, and the south, are very lofty. Under the Mahratta government, the zemindary, of which this town is the chief place, was held on condition of furnishing, when required, 500 troops. In 1809, the rajah was dispossessed of his territory; but having joined the rebels in the troubles which arose on the escape of Appa Sahib, he retook Kakair, and was confirmed in his possession, subject only to the payment of a fixed rent of 500 rupees annually. Distant from Nagpoor, S.E., 170 miles. Lat. $20^{\circ} 15'$, long. $81^{\circ} 33'$.

KONKEL NUGGUR.—A town in the British district of Chota Nagpoor, lieutenant-gov. of Bengal, 55 miles S.W. of Lohadugga. Lat. $22^{\circ} 50'$, long. $84^{\circ} 10'$.

KONKLY.—A town in the native state of Tatcheer, one of the independent hill tribes of Orissa, on the right bank of the Braminy river, and 112 miles N. from Ganjam. Lat. 21° , long. $85^{\circ} 10'$.

KONNAVERUM.—A town in Hyderabad, or dominions of the Nizam, situate on the left bank of the Godavery, and 187 miles E. by N. from Hyderabad. Lat. $17^{\circ} 36'$, long. $81^{\circ} 21'$.

KONNOOR.—A town in the British district of Sholapoor, presidency of Bombay, 36 miles S.E. of Beejapoor. Lat. $16^{\circ} 30'$, long. $76^{\circ} 12'$.

KONUKPOOR.—A town in the British district of Silhet, lieutenant-gov. of Bengal, 36 miles E.S.E. of Silhet. Lat. $24^{\circ} 42'$, long. $92^{\circ} 22'$.

KOOAREE, or **KOHARI**.—A small river rising in the territory of Gwalior, about 60 miles S.W. of the fort of Gwalior, and in lat. $25^{\circ} 44'$, long. $77^{\circ} 28'$. It flows first north-west, then north-east, subsequently east, and finally south-east, having a course semicircular

in its general outline, and of 185 miles in length, and falls into the Sindu on the left side, in lat. 26° 26', long. 79° 14'. The route from Agra to Gwalior crosses it at Hingonah, lat. 26° 32', long. 78° 3', and there it is represented with "little water, banks steep, and cut into ravines; but they slope off gradually at the ghat (passage), and form no impediment." It is crossed, forty-five miles above its mouth, by the route from Etawa to Gwalior, and is no doubt there fordable, except during heavy rains. The lower part of its course is through Sindous, a barren and wild subdivision of the British district of Etawa, and much cut up by deep, steep, and very difficult ravines, formerly the lurking-places of thugs, dacoits, and other heinous malefactors; but of late years cleared by the energetic operations of the British authorities. This river seems to be identical with the Kewari mentioned by Baber.

KOOATHUREE, in the British district of Kumaon, lieut.-gov. of the N.W. Provinces, a town on the route from Almora to the Nepal territory, 38 miles E. by N. of the former. Lat. 29° 42', long. 80° 19'.

KOOCHAUN.—A town in the Rajpoot state of Jodhpoor, 128 miles E.N.E. from Jodhpoor, and 50 miles N. by E. from Ajmeer. Lat. 27° 10', long. 74° 53'.

KOOCH BEHAR.—A territory in the northern part of that portion of British India which is subject to the lieut.-gov. of Bengal. It is under the administration of a Hindoo prince, whose ancestor, having been expelled from the raj, was, in 1773, restored by the British government, on condition of rendering annually to the Company one-half of his revenue, the amount to be ascertained and fixed at the time, and to be thenceforth unalterable. The territory is bounded on the north by Bootan; on the east by the district of Goalpara; on the south and south-west by the British district of Rungpore; and on the west by that of Dinajepore. It lies between lat. 25° 58' and 26° 32', long. 88° 42' and 89° 45', is sixty miles in length from south-east to north-west, and forty in breadth. The area is 1,364 square miles. It is altogether an alluvial and remarkably level country, but sloping gradually to the south-east, as indicated by the rivers flowing in that direction. The principal of these are the Durlah, the Neelmeer, the Manchee, and the Sonkos or Chonnekosh. This country seems to have been a subdivision of the realm denominated Kamroop. Its early history is fertile in the silly fables which supply the place of facts in Hindoo records. Even for some time after the Mussulman conquests, the state of information is little better. Soon after the East-India Company had acquired Bengal by grant from Shah Alum, their assistance was invoked by the rajah of Kooch Behar. The hereditary minister of this state had rebelled against his master, and, forming an alliance with the Der rajah (ruler of Bootan), had agreed to make large cessions of territory to

the latter, on condition of being supported in his attempts to overthrow his lord. A battalion of native troops, with two pieces of cannon, commanded by Captain Jones, was thereupon sent by the British authorities, in 1772, to the aid of the rajah; and this force, after routing the rebellious minister, entered Bootan, stormed the hill fort Dalim Koth, and ultimately compelled the aggressive rajah and his associate to sue for peace. Many difficulties occurred in the consequent settlement of affairs, and it seems to be believed that the ruler of Bootan was treated with much favour. Within the now restricted confines of Kooch Behar (for previous encroachments, together with the recent alienations, had greatly reduced its extent), other difficulties presented themselves, arising from claims made by the minister and the commander of the forces to shares of the territory. These claims were not easily susceptible of adjustment, and have remained for a long series of years matter of dispute. Questions of boundaries also arose, but these were settled with comparative ease. Still more recently, the British authorities found it necessary to despatch an officer (Captain Jenkins) to investigate complaints, numerous and strongly urged, of the oppressive conduct of the rajah's servants towards the people. Though having the title of rajah, the position of the chief is rather that of a zemindar, enjoying the surplus revenue remaining after the payment of a fixed amount of tribute.

KOOCH BEHAR, the principal place of the raj or small tributary state of the same name, is situate on the river Toresha, 45 miles N. of the town of Rungpore. Though it appears in the Tibetan legends a place very renowned in Buddhist lore, scarcely anything but the name appears to be known respecting it. Upon the decease of the rajah of Kooch Behar, in 1847, he was succeeded by an adopted son, a boy of six years of age, who has been placed for education in one of the government colleges. Distant N.E. from Berhampore, by Dinajepore, 220 miles; N.E. from Calcutta, by same route, 348. Lat. 26° 16', long. 89° 29'.

KOOCHUT.—A town in the British district of Burdwan, lieut.-gov. of Bengal, 50 miles N.N.W. of Calcutta. Lat. 23° 14', long. 88° 9'.

KOODAL.—A town in the British province of Sattara, presidency of Bombay, 13 miles N.W. by N. of Sattara. Lat. 17° 50', long. 73° 59'.

KOODLIGHEE.—A town in the British district of Bellary, presidency of Madras, 38 miles W.S.W. of Bellary. Lat. 14° 53', long. 76° 27'.

KOODSOO.—A town in the Rajpoot state of Jodhpoor, 89 miles N. by E. from Jodhpoor, and 112 miles N.W. from Ajmeer. Lat. 27° 32', long. 73° 20'.

KOODWUL.—A town in the native state

of Bhurtpoor, 40 miles W.S.W. from Agra, and 18 miles S. from Bhurtpoor. Lat. $26^{\circ} 59'$, long. $77^{\circ} 31'$.

KOODYA, in the British district of Azimgurh, lieut.-gov. of the N.W. Provinces, a small town on the route from the town of Azimgurh to Sultanpoor cantonment, in Oude, 12 miles W. of the former, 56 N. of Benares. Lat. $26^{\circ} 4'$, long. $82^{\circ} 58'$.

KOOHIE.—A town of the Deccan, in the territory of Nagpoor, situate on the right bank of one of the branches of the Wein Gunga, and 20 miles E.S.E. from Nagpoor. Lat. $21^{\circ} 2'$, long. $79^{\circ} 25'$.

KOOJODDOO.—A town of Assam, in the British district of Sudiya, lieut.-gov. of Bengal, 24 miles S. of Sudiya. Lat. $27^{\circ} 30'$, long. $95^{\circ} 45'$.

KOOKAY OORNEY.—A town in the British district of Madura, presidency of Madras, 51 miles E.S.E. of Madura. Lat. $9^{\circ} 45'$, long. $78^{\circ} 53'$.

KOOKIWARI, or **KOOKYWARREE**, RIVER, one of the mouths of the river Indus, formerly "the grand embouchure" of that river, having a breadth of 1,100 yards, but now blocked up by a sand-bank. Lat. $24^{\circ} 5'$, long. $67^{\circ} 33'$.

KOOKOOLOOBAH.—A town in the British district of Ganjam, presidency of Madras, 56 miles N.N.W. of Ganjam. Lat. $20^{\circ} 8'$, long. $84^{\circ} 46'$.

KOOKRESUR, in the territory of Indore, or possessions of Holkar's family, a town on the route from Neemuch to Kotah, 26 miles E. of former, 96 S.W. of latter. It has a good bazar, and is well supplied with water, and contains about 800 houses, and a population of about 4,000 persons. Elevation above the sea 1,412 feet. Lat. $24^{\circ} 28'$, long. $75^{\circ} 28'$.

KOOKSEE.—A town of Malwa, in the native state of Dhar, situate 41 miles S.W. by W. from Dhar, and 150 miles N.E. by E. from Surat. Lat. $22^{\circ} 15'$, long. $74^{\circ} 50'$.

KOOKUNOOR.—A town in one of the recently sequestered districts of Hyderabad, or dominions of the Nizam, situate 100 miles E. by S. of Belgaum. Lat. $15^{\circ} 30'$, long. $76^{\circ} 2'$.

KOOKURMOONDA.—A town in the British district of Candeish, presidency of Bombay, 73 miles N.N.W. of Malligaum. Lat. $21^{\circ} 31'$, long. $74^{\circ} 7'$.

KOOLAU, in Sirhind, a village on the route from Hansee to Loodiana, and 56 miles S. of the last-mentioned town. It is situate in a level well-cultivated country. The road in this part of the route is in general good, but liable to become miry during heavy rains. Distance N.W. from Calcutta 1,054 miles. Lat. $30^{\circ} 10'$, long. $75^{\circ} 56'$.

KOOLBURGA, in Hyderabad, or territory of the Nizam, a town on the route from Hyder-

abad through Sholapoor to Poona, 110 miles W. of former, 210 S.E. of latter. It is one of the stations of the force denominated the army of the Nizam, but actually a British force, disciplined and commanded by British officers, and under the direction and control of the presidency of Madras. Distance from Madras, N.W., 380 miles; Bombay, S.E., 285. Lat. $17^{\circ} 19'$, long. $76^{\circ} 51'$.

KOOLGURRAH.—A town of the Deccan, in the territory of Nagpoor, on the left bank of the Wein Gunga river, and 96 miles S.E. by S. from Nagpoor. Lat. $20^{\circ} 4'$, long. $80^{\circ} 1'$.

KOOLITULLAY.—A town in the British district of Trichinopoly, presidency of Madras, 21 miles W.N.W. of Trichinopoly. Lat. $10^{\circ} 56'$, long. $78^{\circ} 29'$.

KOOLNA, in the British district of Jessore, lieut.-gov. of Bengal, a town on the river Bhoirub, 35 miles S.E. of the town of Jessore, 75 E. of Calcutta. Lat. $22^{\circ} 48'$, long. $89^{\circ} 46'$.

KOOLOO.—See **KULU**.

KOOLOO.—A town in the Rajpoor state of Jodhpoor, 91 miles W. by S. from Jodhpoor, and 75 miles S.E. from Jessulmeer. Lat. $26^{\circ} 3'$, long. $71^{\circ} 43'$.

KOOLOOHA, in the British district of Allahabad, lieut.-gov. of the N.W. Provinces, a village on the route by the Rajapoor ferry from the cantonment of Allahabad to Banda, and 42 miles W. of former. Lat. $25^{\circ} 25'$, long. $81^{\circ} 19'$.

KOOLPAC.—A town in Hyderabad, or dominions of the Nizam, situate on the right bank of one of the branches of the Kistnah river, and 43 miles N.E. by E. from Hyderabad. Lat. $17^{\circ} 41'$, long. $79^{\circ} 6'$.

KOOMAR.—A watercourse, and one of the numerous offshoots of the Ganges which intersect the lower provinces of Bengal. It divaricates from the Martabhangal in lat. $23^{\circ} 50'$, long. $88^{\circ} 51'$, and, dividing the districts Pubna and Jessore, flows in a south-easterly direction for seventy miles, and in lat. $23^{\circ} 32'$, long. $89^{\circ} 28'$, falls into the Nabogunga, or, as it is afterwards called, the Barashee.

KOOMARKOLL, in Orissa, a town in the native state of Boad, on the south-west frontier of Bengal, situate five miles from the right bank of the Bang Nuddee, and 64 miles S. from Sumbulpoor. Lat. $20^{\circ} 33'$, long. $84^{\circ} 7'$.

KOOMB.—A town in the British district of Shikarpoor, province of Scinde, presidency of Bombay, 92 miles S.W. of Shikarpoor. Lat. $27^{\circ} 1'$, long. $67^{\circ} 41'$.

KOOMBABH, in Sirhind, a village on the route from Hansee to Loodiana, and 24 miles N. of the former town. It is situate in an undulating country of moderate fertility and partially cultivated. The road in this part of the route is excellent. Distant N.W. from Calcutta 1,000 miles. Lat. $29^{\circ} 25'$, long. $76^{\circ} 5'$.

KOOMBABHARLA GHAT, a mountain-

pass over the Western Ghats, between Rutnageriah and Sattara districts of the Bombay presidency, 123 miles S.E. by S. from Bombay. It is traversed by the new line of road from Kerrar, in Sattara, to the port of Chiploon. A toll is levied on the passing traffic. Lat. 17° 22', long. 73° 48'.

KOOMBHER, in the territory of Bhurt-pore, a town 11 miles N.W. of the city of Bhurt-pore. Tieffenthaler, describing its condition about eighty years ago, states it to be "a considerable burgh, or rather a small city, situate in a plain, and surrounded by a mud wall and a ditch. Most of the houses are of plaster, but several are of masonry, and tiled. Of the last sort is a fine palace of the rajah, situate on a moderate eminence, and white-washed. It commands an extensive prospect over the plain, and serves as a fortress, being surrounded by strong walls." The soil around this town is much impregnated with common salt, which is extracted for alimentary purposes by washing the earth, and allowing the brine thus obtained to be evaporated in shallow ponds by the heat of the sun. Koombher was founded at the beginning of the 18th century, by the advice and with the assistance of Jai Singh, rajah of Jeypore or Amber. In 1754, it was unsuccessfully besieged by the Mah-rattas. After the capture of the city of Bhurt-pore by the British, in 1826, Koombher was surrendered to them without resistance. Distant N.W. of Agra 45 miles. Lat. 27° 19', long. 77° 28'.

KOONDONG.—A town of Eastern India, in the native state of Muneepoor, 19 miles N.W. from Muneepoor, and 120 miles S.E. by S. from Nungong. Lat. 24° 56', long. 93° 47'.

KOOMERI.—A town in the native state of Gwalior, or the territory of Scindia's family, situate 47 miles N. from Saugur, and 64 miles N.W. from Dumoh. Lat. 24° 30', long. 78° 50'.

KOOMHPOOR, in the British district of Kumaon, lieut.-gov. of the N.W. Provinces, a town on the route from Almora to Suharun-poor, 16 miles W. of the former. Lat. 29° 38', long. 79° 28'.

KOONA, or **KOYANE**, a river rising in the territory of Oude, about lat. 27° 22', long. 82° 11', and, running south-east about twenty-five miles towards the frontier of the British district of Goruckpore, forms for twenty miles from that point the boundary between the dominions of the Company and those of the ruler of Oude. It here sends out a small branch, called the Jehada, which, after a course of about three miles, joins the Besui, which latter stream, after a course of five or six miles, returns the water of the Jehada, and discharges its own into the Koyane. That river, holding its way through the district of Goruckpore, in a direction circuitous, yet generally south-east, for 110 miles, ultimately falls into the Ghogra, on the left side, in lat. 26° 16', long. 83° 28', after a total course of

about 155 miles. Buchanan describes it as "a fine little river, which, with its numerous branches, fertilizes all the southern parts of the district." In its course it receives, in addition to the Besui, a number of streams and rivulets: the Batparoya, the Bengwora, the Pawai, the Manavi, the Kathne, the Marora or Manorammar, the Sajai, the Keyane, and the Hihjara; all of them inconsiderable. Previously to its receiving the Besui, the Koyane has a channel of considerable width, and a stream which, though narrow, is of such depth as to be impracticable for loaded cattle. Lower down, Buchanan, in the beginning of January (dry season), found that the Koyane contained a fine stream, which, he continues, "I could not cross on an elephant without boats." Referring to a point still farther towards the mouth of the river, Buchanan says, "In November [close of the rainy season], I crossed the Koyane, where it was about fifty yards wide, but contained much water, being at least six feet deep. In some parts, however, it is said to have only a foot and a half of water; but at all seasons canoes can pass up and down, and in the rainy season it could be navigated by large boats; but, as far as I could learn, it is never applied to the purposes of commerce; and disputes about the property have prevented the produce of the forests on its banks from being brought to market, except in carts." According to Garden, it is crossed by ferry at Lalganj, on the route from the cantonment of Goruckpore to that of Sultanpore, in Oude, and probably about forty-five miles from its source. It has here a channel seventy yards wide.

KOONAWUR, a district of Bussahir, extending over the northern part of that territory, is bounded on the north by the Spiti valley; on the east by Chinese Tartary; on the south by Gurwhal and the Bussahir districts of Chooara and Dussow; and on the west by Kooloo. It is about seventy miles in length from south-west to north-east, forty in breadth; is said to contain an area of 2,100 square miles, and extends between lat. 31° 12'—32° 8', long. 77° 50'—78° 52'. It is a very elevated and rugged country, consisting of various groups of enormous and lofty ridges, through which the valley, or rather vast ravine of the Sutluj, runs, in a direction generally from north-east to south-west, a distance of about seventy miles from the point where it leaves Chinese Tartary, about lat. 31° 50', to the vicinity of Seran, where it passes the south-western frontier, in lat. 31° 25', long. 77° 38'. The principal habitable part of the country lies not so much along the banks of the Sutluj, which are generally rocky and precipitous, as in the valleys drained by its numerous feeders; the principal of which, on the right side, are the Li, or river of Spiti, the Darbung, the Pejur, the Kozhang, the Mul-gun, and the Yala; on the left, the Hocho, the Taglagkhur, the Tidong, and the Buspa.

The general elevation of the country may be determined from the fact that the bed of the Sutluj, necessarily the lowest part, as it drains the whole country, slopes from the elevation of 10,000 feet, which it has at the north-eastern boundary, to about 5,000, being that at Spara, Wodar, and Wongtu Jhula, near the south-western frontier.

The climate in summer is hot in the lower part of the valley of the Sutluj, and sometimes oppressively so, in consequence of the radiation of heat from the inclosing rocks, Cheenee and some other places having an elevation exceeding 8,000 feet. The grape attains great excellence, and yields a product resembling raisin-wine, and a very strong spirit. In the southern and lower part of Koonawur, the monsoon rains are rather heavy in July, August, and September; but as they do not fall to the north of about lat. $31^{\circ} 30'$, the rest of the district is, during those months, refreshed only by partial and light showers; so that cultivation is successful only in situations on which streams can be directed from the snowy summits. The winter is generally rigorous; to such an extent in some places, that for a long period there is no leaving the villages, in consequence of the depth of snow.

The population partakes of both the Mongolian and the Caucasian varieties of the human race. The Koonawaris are in general very dark, but sometimes display considerable rudeness. They are tall, athletic, and well made; and in character are said to be frank, hospitable, generous, and remarkably free from falsehood and suspicion. Of all the hill people, the Koonawaris alone gave effectual resistance to the Goorkhas, whom they defeated in action, and so baffled by breaking down the bridges and defending the fastnesses, that their invaders entered into a convention, by which, in consideration of the annual payment of about 750*l.*, they agreed to abstain from entering the district, and to leave unmolested the rajah of Bussahir, who had taken refuge there. In consequence of that good service, the Koonawaris are peculiarly favoured by the rajah, who chooses most of his officers and supporters from them, and assesses them more lightly than his other subjects.

Polyandry is almost universal; and in the northern part the total disregard of the laws of chastity renders the country one vast brothel. The religion of Koonawur is Brahminism in the south; in the north, Lamaic Buddhism; in the middle, a mixture of the two systems. There prevails a regularly graduated transition from one to the other. Thus, Brahmins are not met with beyond Saharun, near the southern boundary, where they officiate at the shrine of the sanguinary female divinity Biima Kali, to whom, at no remote period, they offered human sacrifices. At Kanum, about half-way between the northern and southern frontiers, the sacred books are in Tibetan, and lamas are there first met with; but kine are venerated, and some attention paid to the distinction of

castes; thus partially amalgamating the two creeds. At Hungrung, on the northern frontier, the religion is pure Lamaic Buddhism. There are five distinct dialects spoken in Koonawur. In the north, the language is Tibetan; and the Kanawari or Milchau dialect, of which a vocabulary is given by Herbert, bears a strong resemblance to that language. Gerard, after an elaborate computation, estimates the population at 9,850 persons; being nearly at the rate of five to the square mile. The principal places are Sungnum and Kanum, which are noticed respectively in the alphabetical arrangement.

KOONCH, in the British district of Jaloun, the principal place of the pergunnah of the same name, a town on the route from Calpee to Gwalior, 42 miles S.W. of the former, 82 S.E. of the latter. In May, A.D. 1804, a British detachment engaged in the siege of Aminta Malaya, a small fort, was surprised by a greatly superior force under Ameer Khan, the noted Patan freebooter. On this occasion, two companies of native infantry and about fifty European artillerymen were cut to pieces, and two howitzers, two twelve-pounders, one six-pounder, and a number of tumbrils, were carried off by the Patan, the remainder of the detachment with difficulty making its retreat to Koonch. About a month after, in the same vicinity, however, the Patan's troops were defeated by the British with signal slaughter. It is mentioned in the Ayeen Akbery, under the name of Kownj, as having a fort, and yielding 46,295 rupees annually. The pergunnah of Koonch contains a native jaghire, belonging to Bhuma Bae, which is under British management. Lat. $25^{\circ} 59'$, long. $79^{\circ} 13'$.

KOONDA.—A town in the British district of Rangurh, lieut.-gov. of Bengal, 45 miles W.N.W. of Hazareebagh. Lat. $24^{\circ} 12'$, long. $84^{\circ} 44'$.

KOONDALLEE.—A town of the Deccan, in the territory of Nagpoor, on the left bank of one of the branches of the Wurda river, and 32 miles W. from Nagpoor. Lat. $21^{\circ} 7'$, long. $78^{\circ} 40'$.

KOONDALLY.—A town in the native state of Travancore, 117 miles N. from Travandrum, and 60 miles S. by E. from Coimbatour. Lat. $10^{\circ} 9'$, long. $77^{\circ} 10'$.

KOONDERKEE, in the British district of Moradabad, lieut.-gov. of the N.W. Provinces, a town on the route from Moradabad to Budaon, 11 miles S. of the former. Lat. $28^{\circ} 41'$, long. $78^{\circ} 52'$.

KOONDGUL.—A town in the Southern Mahratta jaghire of Jamkundee, 63 miles S.E. from Belgaum, and 112 miles W. from Ballary. Lat. $15^{\circ} 15'$, long. $75^{\circ} 19'$.

KOONDLA, in Guzerat, or territory of the Guicowar, a town in the district of Kattiwar, situate on the river Naula, a tributary of the Sitronji. Distance from Ahmedabad, S.W., 138 miles; Baroda, S.W., 115; Surat, W., 95;

KOO.

Bombay, N.W., 190. Lat. $21^{\circ} 22'$, long. $71^{\circ} 20'$.

KOONDUH, in the British district of Meerut, lieut.-gov. of the N.W. Provinces, a village on the route from Delhi to Meerut, and seven miles S.W. of the latter. Lat. $28^{\circ} 56'$, long. $77^{\circ} 43'$.

KOONDULLA.—A town in the Rajpoot state of Jodhpoor, 13 miles N.N.W. from Ajmeer, and 98 miles E.N.E. from Jodhpoor. Lat. $26^{\circ} 40'$, long. $74^{\circ} 39'$.

KOONEEMOONDAH.—A town of the Deccan, in the territory of Nagpore, 27 miles N.E. by N. from the hill zemindary of Jeypoor, and 162 miles W. from Ganjam. Lat. $19^{\circ} 20'$, long. $82^{\circ} 40'$.

KOONGA.—A town in the native state of Patna, 74 miles S.W. from Sumbulpoor, and 126 miles N.N.E. from Jeypoor. Lat. $20^{\circ} 40'$, long. $83^{\circ} 16'$.

KOONGMA, or **LAKONGMA**, in Bussahir, a pass in Koonawur, over a lofty mountain-ridge running from north to south, and forming the boundary between the British and Chinese empires. Elevation of the crest of the pass above the sea 16,007 feet. Lat. $31^{\circ} 48'$, long. $78^{\circ} 46'$.

KOONJBUNGHUR.—A town in one of the native states of the independent hill tribes of Orissa, situate eight miles from the right bank of the Mahanuddy, and 63 miles S. by E. from Ganjam. Lat. $20^{\circ} 21'$, long. $84^{\circ} 57'$.

KOONJERRY.—See **KEUNJUR**.

KOONJUH, a village in the British district of Dehra Doon, situate on the left bank of the Asun, near its confluence with the Jumna. Here was a station of the series of small triangles in the trigonometrical survey of the Himalayas. Elevation above the sea 1,618 feet. Lat. $30^{\circ} 26'$, long. $77^{\circ} 44'$.

KOONLUS, in the boundary of the British district of Kumaon, lieut.-gov. of the N.W. Provinces, a ridge of the main range of the Himalaya, on the north-eastern angle of the district, towards Hindes or South-western Tibet. It is thus named by the Tartars and Tibetans, the Hindus calling it Kailas. There are two peaks on the ridge, both rising far above the lower limit of perpetual snow, the higher having an elevation above the sea of 22,513 feet, the other, a short distance to the south-east, an elevation of 21,669. The former is in lat. $30^{\circ} 14'$, long. $80^{\circ} 54'$; the latter, lat. $30^{\circ} 13'$, long. $80^{\circ} 58'$.

KOONREE.—A town in the territory of Oude, situate five miles W. of the right bank of the Gogra, and 52 miles N. by E. from Lucknow. Lat. $27^{\circ} 34'$, long. $81^{\circ} 17'$.

KOONSALA, in Gurhwal, a village on the left bank of the Jumna, is situate amidst forests of oaks, rhododendrons, maples, and azalias, containing, however, patches of fertile ground carefully cultivated, and producing grain and potatoes, the latter recently intro-

duced into this part of the Himalayan region. Elevation above the sea 7,084 feet. Lat. $30^{\circ} 54'$, long. $78^{\circ} 24'$.

KOONY.—A river in Hyderabad, or the Nizam's territory, rising in lat. $20^{\circ} 21'$, long. $78^{\circ} 14'$, and, flowing in a south-easterly direction for seventy miles, falls into the Payne Gunga river on the left side, in lat. $19^{\circ} 46'$, long. $78^{\circ} 49'$.

KOONYHAR, or **KOONEEAR**, a small hill state, bounded on the north-west by Bhagul, and on all other sides by the outlying territory of the rajah of Pateala. It is about five miles in length and three in breadth, and contains an area of twelve square miles. Its centre is situate about lat. $31^{\circ} 6'$, long. $77^{\circ} 4'$. It contains two pergunnahs or districts. The population is estimated at about 2,500, and the annual revenue at the insignificant sum of 350*l.*, out of which a tribute of 18*l.* is paid to the British government. The rana, or petty sovereign, is said to have about 200 armed retainers, no doubt supported on lands assigned to them on feudal principles. He holds his raj by virtue of a grant made to him by the British government on the conquest of the country from the Goorkhas, in 1815. This prince resides at a small town or village of the same name as the state, and occupies a dwelling which, according to Hügel, "scarcely merits the name of house."

KOOPONCI.—A town of Eastern India, in the British district of Aracan, 162 miles S.E. by S. of Aracan. Lat. $18^{\circ} 41'$, long. $94^{\circ} 32'$.

KOORABUR, in the Rajpoot territory of Oodeypoor or Mewar, a town on the route from Neemuch to Baroda, 68 miles W. of former, 202 N.E. of latter. It has a bazar, and supplies and water are abundant. Elevation above the sea 1,272 feet. Lat. $24^{\circ} 34'$, long. $74^{\circ} 6'$.

KOORAH.—A town in one of the recently sequestered districts of Hyderabad, or dominions of the Nizam, 80 miles W.S.W. of Ellichpoor. Lat. $20^{\circ} 59'$, long. $76^{\circ} 22'$.

KOORAHUREE, in the British district of Muttra, lieut.-gov. of the N.W. Provinces, a village on the route from the cantonment of Meerut to that of Muttra, and 20 miles N. of the latter. Lat. $27^{\circ} 44'$, long. $77^{\circ} 50'$.

KOORALA, in the British district of Moradabad, lieut.-gov. of the N.W. Provinces, a village on the route from the town of Meerut to that of Moradabad, and 38 miles S.E. of the former place. It is situate near the left bank of the Ganges, in an open and partially cultivated country. Distant N.W. from Calcutta 884 miles. Lat. $28^{\circ} 51'$, long. $78^{\circ} 16'$.

KOORALLA, in the Reechna Doab division of the Punjab, a town situated 16 miles from the right bank of the Ravee, 45 miles N.N.E. of the town of Lahore. Lat. $32^{\circ} 10'$, long. $74^{\circ} 29'$.

KOORANIA, in Sindé, a village on the

KOO.

route from Sehwan to Larkhana, and 16 miles N. of the former place. It is situate a mile and a half from the right bank of the Indus, in a level, fertile country, mostly covered with grass, but diversified by occasional patches of cultivation. Lat. $26^{\circ} 38'$, long. $67^{\circ} 55'$.

KOORAOWLEE, in the British district of Mynpooree, lieut.-gov. of the N.W. Provinces, a town on the route from Mynpooree to Allygurh, 11 miles N. of the former. Elevation above the sea 648 feet. Lat. $27^{\circ} 24'$, long. $79^{\circ} 2'$.

KOORAR, in Orissa, a town of Nyaghur, one of the petty hill states on the south-west frontier of Bengal, situate 45 miles N. by W. from Ganjam, and 68 miles S.W. by W. from Cuttack. Lat. $20^{\circ} 1'$, long. 85° .

KOORAWAH, in the British district of Muzaffurnugur, lieut.-gov. of the N.W. Provinces, a village on the route from Kurnal to Meerut, and 39 miles S.E. of the former. It is abundantly supplied with water from tanks and wells. Lat. $29^{\circ} 21'$, long. $77^{\circ} 30'$.

KOORDAH.—See **KHOORDAH**.

KOOREEGAUM.—A town of the Deccan, in the territory of Nagpur, situate 20 miles N.W. from Jeypoor, and 113 miles N.W. from Vizianagrum. Lat. $19^{\circ} 14'$, long. $82^{\circ} 13'$.

KOOREEJAMPA.—A town in the native state of Bhotan, 68 miles N. by E. from Goalpara, and 83 miles N.W. from Gowhatty. Lat. $27^{\circ} 5'$, long. $90^{\circ} 57'$.

KOOREEPOOR.—A town in the territory of Oude, 52 miles S. by E. from Oude, and 53 miles W. from Azimgurh. Lat. $26^{\circ} 3'$, long. $82^{\circ} 23'$.

KOORELALESAN, in the Sinde Sagur Doab division of the Punjab, a town situated 11 miles from the left bank of the Indus, 88 miles N.N.W. of the town of Mooltan. Lat. $31^{\circ} 20'$, long. $71^{\circ} 3'$.

KOORIE, in the Rajpoot state of Jodhpoor, a village on the route from Balotra to the city of Jodhpoor, and 12 miles N.E. of the former. Lat. $25^{\circ} 56'$, long. $72^{\circ} 30'$.

KOORKULLO.—A town in Hyderabad, or dominions of the Nizam, situate on the right bank of the Godavery, and 142 miles N.E. by E. from Hyderabad. Lat. $18^{\circ} 23'$, long. $80^{\circ} 23'$.

KOORMAIL.—A town in Hyderabad, or dominions of the Nizam, situate two miles from the right bank of one of the branches of the Godavery, and 96 miles N. by E. from Hyderabad. Lat. $18^{\circ} 43'$, long. $78^{\circ} 48'$.

KOOROODA.—A village in Arracan, situate on the left side of the Mayu river, about ten miles from its mouth. Lat. $20^{\circ} 20'$, long. $92^{\circ} 52'$.

KOOROOOL.—A town in one of the recently sequestered districts of Hyderabad, or dominions of the Nizam, situate 13 miles E. of Ellichpoor. Lat. $21^{\circ} 10'$, long. $77^{\circ} 48'$.

KOOROOTHANEE.—A town in Hyderabad, or dominions of the Nizam, situate two miles from the left bank of the Payne Gunga river, and 90 miles S. by E. from Ellichpoor. Lat. $19^{\circ} 57'$, long. $77^{\circ} 57'$.

KOORSEE.—A town in the territory of Oude, 15 miles N.N.E. from Lucknow, and 60 miles N.E. from Cawnpoor. Lat. $27^{\circ} 3'$, long. $81^{\circ} 8'$.

KOORSEE.—A town of the Deccan, in the territory of Nagpoor, situate 11 miles E. of the left bank of the Wein Gunga, and 92 miles S.E. from Nagpoor. Lat. $20^{\circ} 17'$, long. $80^{\circ} 11'$.

KOORSUNDUH.—A town in the British district of Muttra, lieut.-gov. of the N.W. Provinces. It has a population of 6,325 inhabitants. Distant S.E. from Muttra 21 miles. Lat. $27^{\circ} 24'$, long. $78^{\circ} 5'$.

KOORTHUL, or **KURTHUL**.—A town in the British district of Meerut, lieut.-gov. of the N.W. Provinces: it contains a population of 7,972 inhabitants. Distant N.W. from Meerut 31 miles, N. from Delhi 40 miles. Lat. $29^{\circ} 14'$, long. $77^{\circ} 19'$.

KOORTHUL, in the British district of Muzaffurnugur, lieut.-gov. of the N.W. Provinces, a village on the route from Kurnal to Meerut, and 49 miles S.E. of the former. Lat. $29^{\circ} 14'$, long. $77^{\circ} 33'$.

KOORTY.—A town in Hyderabad, or dominions of the Nizam, situate on the left bank of the Payne Gunga river, and 180 miles N. from Hyderabad. Lat. $19^{\circ} 57'$, long. $78^{\circ} 27'$.

KOORUNDAH.—A town in Hyderabad, or dominions of the Nizam, situate 167 miles N.W. by N. from Hyderabad, and 122 miles S. by W. from Ellichpoor. Lat. $19^{\circ} 27'$, long. $77^{\circ} 18'$.

KOORUNDWAR.—A town in the Southern Mahratta jaghire of Koorundwar, situate two miles from the right bank of the Kistnah river, and 58 miles N. from Belgaum. Lat. $16^{\circ} 40'$, long. $74^{\circ} 40'$.

KOORUNGHA.—A town of Orissa, in the native state of Jushpore, on the south-west frontier of Bengal, situate 80 miles N.N.W. from Sumbulpoor, and 92 miles S. by W. from Palamow. Lat. $22^{\circ} 33'$, long. $83^{\circ} 38'$.

KOORUNTADI, in the British district of Ghazee pore, lieut.-gov. of the N.W. Provinces, a town on the left bank of the Ganges. It has a bazar, and a portion of the government stud on the Ghazee pore establishment is located here. Distant 566 miles N.W. of Calcutta by water. Lat. $25^{\circ} 34'$, long. $84^{\circ} 2'$.

KOORWAE.—A town in Malwa, the principal place of a native state of the same name, on the right or east bank of the river Betwa, on the route from Tehari to Onjei, distant 60 miles S.W. of former, 150 N.E. of latter. It is of considerable size, is surrounded by a wall, and has a large fort, built of stone.

KOO—KOR.

The inhabitants are principally Patans, who settled here in the reign of Aurungzebe. It was founded by Delut Khan, a Patan of the Feroz Khayl tribe, and a native of Khyber, in Afghanistan; and his descendants once enjoyed sovereignty over a territory of five or six thousand square miles in area; but Mahratta conquests have reduced it within the slender limits of 200, with a population not exceeding 20,000 inhabitants. During the predominance of the Pindaries, the nawab or chief of this little territory was stripped of all his possessions, except the small portion commanded by the fort of Koorwaee; but on the expulsion of those freebooters in 1817, he regained what he at present holds. His annual revenue is estimated at 75,000 rupees. On the left bank of the Betwa, opposite to this town, and almost united to it, is Boraso, also a considerable place. Lat. 24° 6', long. 78° 5'.

KOOSSEEL.—A town of Orissa, in the native state of Bombrá, on the south-west frontier of Bengal, situate on the right bank of the Maltee Nuddee, and 12 miles E. from Sumbulpoor. Lat. 21° 27', long. 84° 11'.

KOOSER.—A town in one of the recently sequestered districts of Hyderabad, or dominions of the Nizam, situate 42 miles S.W. of Ellichpoor. Lat. 20° 45', long. 77° 8'.

KOOSHALGURH.—A town in the Rajpoot state of Jeypore, situate on the route from Agra to Mow, 98 miles S.W. of former, 317 N.E. of latter. It has a mud fort, with double wall, round bastions, and a ditch, and contains several large buildings of stone. Lat. 26° 30', long. 76° 47'.

KOOSHALNUGGUR.—See FRASERPET.

KOOSHALPUR, in the British district of Moradabad, lieutenant-gov. of the N.W. Provinces, a village on the route from Kasheepoor to Almora, 13 miles N.E. of the former. It is situate on the left bank of the river Kosilla, in the Tarai or marshy forest extending along the southern base of the Sub-Himalaya. Lat. 29° 19', long. 79° 11'.

KOOSH BEHAR.—See KOOSH BEHAR.

KOOSHTUGI.—A town in one of the recently sequestered districts of Hyderabad, or dominions of the Nizam, situate 112 miles E. of Belgaumi. Lat. 15° 46', long. 76° 16'.

KOOTKEBULEE.—A town of North-eastern India, situate in the British district of Goalpara, 31 miles W.N.W. of Goalpara. Lat. 26° 20', long. 90° 11'.

KOOTLAH, in the British district of Futtehpore, lieutenant-gov. of the N.W. Provinces, a small town, with fort, on the right bank of the Ganges, 18 miles E. of the town of Futtehpore. It is the Cooter of Rennell. Lat. 25° 50', long. 81° 9'.

KOOTOOMBEH.—A town in the British district of Behar, lieutenant-gov. of Bengal, 37

miles W. of Sherghotty. Lat. 24° 38', long. 84° 17'.

KOOTTOOR.—A town in Hyderabad, or dominions of the Nizam, situate on the left bank of the Godavery, and 122 miles N.N.E. from Hyderabad. Lat. 19°, long. 79° 14'.

KOOTREE.—A town in the native state of Cutch, situate 30 miles W.S.W. from Bhooj, and 17 miles N.N.W. from Mandavee. Lat. 23° 5', long. 69° 19'.

KOOTUBDEA, the name of two islands on the coast of Chittagong, lying close to each other, and extending together about twelve miles in length. They are low and woody. At the south end there is fresh water, close to a tope of trees. Creeks are numerous: one, called Pilot Cotta Creek, forming the division between the two islands, has five or six fathoms water at its eastern entrance, and five feet water on the bar, where it joins the sea, on the west side. The centre of the islands is about lat. 21° 50', long. 91° 55'.

KOOTUBPOOR, in the British district of Muttra, lieutenant-gov. of the N.W. Provinces, a village on the route from the cantonment of Allygurh to that of Etawah, and 42 miles S.E. of the former. The surrounding country is open, with a clayey soil rather well cultivated. Lat. 27° 23', long. 78° 25'.

KOOWANJEE.—A town in the Rajpoot state of Kotah, situate three miles from the left bank of the Ahoo river, and 40 miles S.S.E. from Kotah. Lat. 24° 40', long. 76° 10'.

KOPAREE.—A town in the British district of Balasore, lieutenant-gov. of Bengal, 156 miles S.W. by W. of Calcutta. Lat. 21° 15', long. 86° 29'.

KOPEELEE NUDDEE, a tributary of the Kullung river, rises in lat. 25° 8', long. 92° 33', and, flowing in a northerly direction, during which it forms the boundary between the British districts Jynteah and Northern Cachar, falls into the Kullung, in lat. 25° 50', long. 92° 50'.

KOPOORTHELLA.—See KAPOORTHELLA.

KOPURGAUM.—A town in the British district of Ahmednuggur, presidency of Bombay, situate 59 miles N.N.W. of Ahmednuggur. Lat. 19° 53', long. 74° 29'.

KOPURTHELLA.—A town in the Jullinder Doab division of the Punjab, about 10 miles from the left bank of the Beas, and on the route from Ludiana to Lahore. Here Futteh Sing, the half-brother of Runjeet, built a magnificent street, a palace, and a temple, and near the town commenced and almost completed a mansion, in so massive a style that he incurred the suspicions of the maharaja, and was in consequence obliged to fly. Lat. 31° 24', long. 75° 25'.

KOR, or KOD.—A town in the British district of Dharwar, presidency of Bombay, 72

KOR.

miles S.W. by S. of Dharwar. Lat. 14° 31', long. 75° 30'.

KORA, in Sinde, a small town about 15 miles S.W. of Khyrpoor, and on the great route from that town to Hyderabad. The population consists generally of weavers engaged in the manufacture of loongees or scarfs and of coarse cotton cloths. Lat. 27° 22', long. 68° 36'.

KORACHAH.—A town of the Deccan, in the territory of Nagpoor, situate 115 miles S.E. by E. from Nagpoor, and 132 miles S.E. by S. from Seenni. Lat. 20° 25', long. 80° 45'.

KORAEEN, in Sinde, a village on the route from Subzulcoote to Shikarpoor, and 23 miles W. of the former town. It is situate in a low, level country, overflowed extensively, in time of inundation, by the Indus, from the left bank of which the village is three miles distant. Koraeen is in lat. 28° 11', long. 69° 30'.

KORAEJEE NA GOTE, in Sinde, a town on the route from Hyderabad to Sehwan, by the way of Kotree, and 22 miles N. of Hyderabad. It is situate about a mile from the right bank of the Indus, in lat. 25° 44', long. 68° 25'.

KORAH, in the British district of Futtehpore, lieut.-gov. of the N.W. Provinces, a small town or village on the left bank of the Jumna, 19 miles S.W. of the town of Futtehpore. Lat. 25° 48', long. 80° 35'.

KORAH KHAS, in the British district of Futtehpore, lieut.-gov. of the N.W. Provinces, a town on the route from Futtehpore to Etawah, 30 miles W.N.W. of the former. It has a bazar. The town is mentioned by Baber. Lat. 26° 7', long. 80° 27'.

KORAI, in the British district of Futtehpore, lieut.-gov. of the N.W. Provinces, a village on the route from Calpee to the town of Futtehpore, and four miles N.W. of the latter. Lat. 25° 57', long. 80° 45'.

KORAM, in Sirhind, a town situate in the Cis-Sutlej territory, 27 miles S.W. by S. of Ambala. Lat. 30° 5', long. 76° 33'.

KORAMBAH.—A town in the British district of Chota Nagpoor, lieut.-gov. of Bengal, 10 miles S. of Lohadugga. Lat. 23° 18', long. 84° 43'.

KORAR.—A town of Bundelcund, in the British province of Jhansee, situate 20 miles E. from Jhansee, and 86 miles W.S.W. from Humeerpoor. Lat. 25° 30', long. 78° 59'.

KORD.—A town in the Rajpoot district of Godwar, situate 105 miles S.W. by W. from Ajmeer, and 53 miles S.S.E. from Jodhpoor. Lat. 25° 35', long. 73° 24'.

KOREA.—A raj within the limits of the territory superintended by the political agent for the south-west frontier of Bengal. Its centre is in lat. 23° 25', long. 82° 30'; its area is 2,225 square miles. The country, when lately visited by the British agent, was reported

to be in a very deplorable state: it is computed to yield about 10,000 rupees annually; but the British tribute of 1,600 rupees is paid very irregularly. The chief products of the country are lac and wild silk. The population is computed to be about 100,000.

KOREA.—A town, the principal place of the native state of Korea, 153 miles N.W. from Sumbulpoor, and 135 miles S.W. by W. from Sherghotty. Lat. 23° 6', long. 82° 26'.

KOREA GUNJ, in the British district of Allygurh, lieut.-gov. of the N.W. Provinces, a small town on the route from Bareilly to Allygurh cantonment, and 16 miles S.E. of the latter. Lat. 27° 50', long. 78° 22'.

KOREE, in Sinde, at the south-eastern extremity of the seacoast of that country, is an arm of the sea, the estuary of the most eastern branch of the Indus, and still receiving part of its waters during high inundations. At Cotasir, twenty miles from the open sea, it is seven miles wide. The Korea mouth is in lat. 23° 40', long. 68° 25'.

KOREE, a river of the Rajpoot state of Oodeypoor, rises in lat. 25° 32', long. 73° 57', at the town of Deogurh, and flows in an easterly direction for 115 miles, forming for a portion of that distance the boundary between Ajmeer and Oodeypoor: subsequently traversing a detached portion of Ajmere, it falls into the Banas river, in lat. 25° 53', long. 75° 30'.

KOREECH.—See KHURENCHA.

KOREEKOLA.—A town of Orissa, in the native state of Bonci, on the south-west frontier of Bengal, situate five miles from the left bank of the Braminy river, and 70 miles E.N.E. from Sumbulpoor. Lat. 21° 50', long. 85° 1'.

KOREHGAON.—A town in the British province of Sattara, presidency of Bombay, 12 miles E. of Sattara. Lat. 17° 41', long. 74° 15'.

KORENEE, in the British district of Delhi, lieut.-gov. of the N.W. Provinces, a village on the route from the city of Delhi to Kurnal, and 15 miles N.W. of the former. Lat. 28° 50', long. 77° 9'.

KORHALEH.—A town in the British district of Ahmednuggur, presidency of Bombay, 50 miles N.N.W. of Ahmednuggur. Lat. 19° 44', long. 74° 26'.

KORNRA.—A town in the Rajpoot state of Jodhpoor, 23 miles W.S.W. from Jodhpoor, and 122 miles W. by S. from Ajmeer. Lat. 26° 13', long. 72° 48'.

KOROUND.—A town in the territory of Oude, situate on the right bank of the Goomtee, and 23 miles N.N.W. from Lucknow. Lat. 27° 12', long. 80° 49'.

KORULL.—A town in Guzerat, or the dominions of the Guicowar, situate on the right bank of the Nerbudda river, and 30 miles S. from Baroda. Lat. 21° 50', long. 73° 12'.

KORYGAUM.—See **CORYGAUM**.

KORYNAUR, in the peninsula of Kattywar, province of Guzerat, a town in the district of Soruth, on the estuary of the river Singora, a fine stream, which, about two miles lower down, or farther south, falls into the Arabian Sea. Here is a considerable fort; and there is also a temple of Krishna, worshipped under the singular title of Rinchor, or the Recreant; and at certain times great multitudes of pilgrims resort to it. Distant from Ahmedabad, S.W., 200 miles; Baroda, S.W., 190. Lat. 20° 47', long. 70° 40'.

KORZOK.—A town in the dominions of Gholab Singh, the ruler of Cashmere, situate 134 miles N.E. by E. from Kangra, and 194 miles E. by N. from Jamoo. Lat. 32° 57', long. 78° 17'.

KOSAH NAG, in Cashmere, a mountain lake on the north side of the Futi Panjal, one of the mountains bounding the valley on the south. It is three-quarters of a mile long and 500 yards broad, and is replenished from the melted snows of the neighbouring summit, the supply from which is sometimes so abundant as to raise the surface of the water forty feet above its level in the lowest state. It gives rise to the Veshau, one of the principal feeders of the Jailum, which last river is also known in some parts of its course by the name of the Veshau. Vigne thus describes its efflux:—"Its full, strong torrent is suddenly seen gushing out from the foot of the last and lofty eminence that forms the dam on the western end of the lake, whose waters thus find an exit not over, but through, the rocky barrier with which it is surrounded." The inclosing rock is a beautiful amygdaloid, containing spots of quartz in a dull, dark purple-coloured matrix. The lake is held in great veneration by the Hindoos, who call it Vishnu Paudh (the foot of Vishnu), in consequence of a legend that the deity produced it by stamping the ground with his foot. It is, in consequence, visited in pilgrimage by devotees, for the purpose of performing ceremonial ablutions. The elevation above the level of the sea is estimated by Vigne at 12,000 feet. Lat. 33° 30', long. 74° 52'.

KOSEMURA, in the British district of Mynpooree, lieut.-gov. of the N.W. Provinces, a town on the route from the cantonment of Futtehghurh to 'lat of Etawa, and 28 miles N.E. of the latter. Lat. 27° 7', long. 79° 21'.

KOSILLA, or **KOSI**.—A river rising in the British district of Kumaon, lieut.-gov. of the N.W. Provinces, in lat. 29° 52', long. 79° 34'. The elevation of its source is probably considerable, being in the Central Himalaya, and near Pin Nath, a summit 7,111 feet above the sea. Receiving numerous small feeders right and left, it holds a southerly course for about thirty miles, as far as lat. 29° 33', long. 79° 30', where it receives, on the left side, the Soal, a stream of nearly equal size. It passes from the mountains by a gorge of extraordinarily

picturesque beauty and grandeur, and with a course so tortuous, that Heber pursuing his way down it, was obliged to ford the stream twelve times in the course of a day's journey. The stream in the beginning of December, the season of low water, was as high as the middle of the saddle, and very rapid. After a total course of between 140 and 150 miles, it falls into the Western Rungunga in lat. 28° 41', long. 79° 1'.

KOSLEE.—A town in the native state of Jhujhur, 50 miles W.S.W. from Delhi, and 57 miles S.E. by S. from Hansee. Lat. 28° 23', long. 76° 33'.

KOSOOME.—A town of the Deccan, in the territory of Nagpoor, 11 miles N.W. from Jeypoor, and 104 miles N.W. from Vizianagrum. Lat. 19° 10', long. 82° 20'.

KOSY, in the British district of Muttra, a town on the route from Muttra to Ferozpoor, in the district of Goorgaon, and 29 miles N.W. of the former. It has a good bazar, and is abundantly supplied with water. In October, A.D. 1804, it was for a night occupied by the Mahratta chief Holkar, in his precipitate retreat from the British army under General Lake, who, having forced the enemy to continue his flight, took the town. The road in this part of the route is rather good, the country open. Lat. 27° 48', long. 77° 29'.

KOT, in the Punjab, 10 miles E. of the Indus, is a small and poor town. It contains one spacious and fine house, belonging to a fakir, or religious mendicant. This holy man was the pauper of thirty different villages, the inhabitants of which prided themselves on their benevolence in maintaining their mendicant in such state. Von Hügel met him clothed in silk, and borne in a palanquin. Kot (the fort) is in lat. 33° 59', long. 72° 48'.

KOTAGERI, or **KOTERGHERRY**.—One of the minor sanitary stations on the Neilgherry hills, in the district of Malabar, presidency of Madras, situate 6,000 feet above the level of the sea. This station is well protected from the violence of the south-west monsoon by the Dodabetta range, which stands out like a huge wall, to screen it. The annual fall of rain averages fifty inches. Lat. 11° 27', long. 77°.

KOTAGHEER.—A town in Hyderabad, or dominions of the Nizam, situate five miles E. from the right bank of the Manjera river, and 96 miles N.N.W. from Hyderabad. Lat. 18° 34', long. 77° 52'.

KOTAGOODM.—A town in Hyderabad, or dominions of the Nizam, situate on the right bank of the Godavery, and 160 miles E.N.E. from Hyderabad. Lat. 18°, long. 80° 52'.

KOTAH.—A town of Baghelcund or Rewah, situate 51 miles S.S.E. from Rewah, and 44 miles N.N.E. from Sohagpoor. Lat. 23° 51', long. 81° 45'.

KOTAH, a raj or state of Rajpootana

named from its principal place. It is bounded on the north-east and east by the newly-formed state of Jhallowa, the territory of Gwalior, and Chupra, a small isolated possession of the noted Patan freebooter Ameer Khan; on the north-west by the Chumbul, dividing it from the state of Bhoondee; on the west by a detached portion of Gwalior; and on the south by a detached portion of Holcar's territory and Jhallowa. The raj of Kotah lies between lat. $24^{\circ} 30' - 25^{\circ} 50'$, long. $75^{\circ} 35' - 76^{\circ} 56'$; is about ninety miles in length from north to south, and eighty in breadth. The area of the raj, as at present constituted, may be estimated at 4,339 square miles. Its surface slopes gently northward from the high table-land of Malwa, and is drained by the Chumbul and its tributaries, the Kalee Sindh, the Newaj, the Parbaty, and some other streams of less magnitude, all of which take a northerly or north-easterly direction. A range of hills, of moderate height, running from south-east to north-west, formerly bisecting the Kotah territory, now forms the boundary between it and part of Jhallowa. This range is considered to form the boundary between Malwa and Harowtee; and the route through the Mokundurra Pass is the great outlet between the Deccan and Northern India. Though in general a fertile and highly-cultivated country, the climate of Kotah has little to recommend it, being sultry in the extreme during the prevalence of the hot winds at the commencement of summer, and exceedingly unhealthy during the periodical rains. The population of this raj, estimated at the rate adopted generally for Rajpootana (100 to the square mile), would be 433,900.

The raj of Kotah, which, with Bhoondee, forms the district denominated Harowtee, was formerly a fief of Bhoondee. During the reign of Rao Ratan, chief of the territory last named, Kotah was severed from Bhoondee and given to Madhu Singh, the second son of Rao Ratan, by the emperor Shah Jahan, in reward of his valour and conduct at the battle of Burhanpore. Mindful of the favour conferred upon their father, the five sons of Madhu Singh supported their benefactor's cause against his son Aurungzebe, and in the battle of Oojein, where the latter was victorious, four of the brothers were slain, and the survivor left on the field for dead. After the death of Aurungzebe, Ram Singh, then rao or rajah of Kotah, supported the cause of the younger son, Azim, against the elder, Moazzim, and was slain in the battle of Jajau, in which the former prince was defeated, and lost his life. Bhim Singh, son and successor of Ram Singh, rose high in favour with the sovereign of Delhi, and fell in his service, being slain in battle against Nizam-ul-Mulk, who, having revolted against his lord, was intercepted in his march to the Deccan by the Rajpoot rajah. The Mahrattas, confederated with the Jats and the rajah of Jeypore, invaded the territory of Kotah in 1744, and invested the city; but, after a siege of three months, were compelled to retreat

with loss. Somewhat later, the internal history of the Kotah state became truly extraordinary. About the year 1771, on the death of a rajah named Goman Singh, the entire powers of the government passed into the hands of a chieftain named Zalim Singh, in the character of regent, the departed rajah having nominated him to this office during the minority of the heir, Omed Singh, then only ten years of age. Zalim Singh, who was originally the hereditary foudjar or commander-in-chief of Kotah, exercised his new powers with extraordinary ability. He established and maintained a commanding ascendancy over all the states of Rajpootana; and, whether from indolence or a distrust of himself, Omed Singh, after the termination of his minority, continued in the hands of Zalim Singh the entire and uncontrolled administration of the country, retaining only the outward pomp and show of sovereignty, which, with the most scrupulous attention and suberviency, were conceded to him by the possessor of the actual power. In 1804, the advance and retreat of the force under Colonel Monson afforded Zalim Singh an opportunity for showing to the British two different aspects of his policy, as modified by circumstances. On the advance of Colonel Monson, he received him with cordiality, and readily afforded supplies and assistance; on the disastrous retreat of that unfortunate commander, Zalim Singh shut his gates against him, influenced by a fear of Holkar, whom, however, this negative manifestation of hostility to the British cause was insufficient to propitiate, the incensed chief exacting 10,00,000 rupees (100,000*l.*) from the government of Kotah, as a penalty for the friendly services rendered the English. In 1817, a treaty was concluded between the British government and the state of Kotah, which, besides the usual stipulations for friendship on both sides, protection on the part of the superior, and subordinate co-operation on that of the dependent state, the freedom of the latter in its internal affairs, and its renunciation of all external relations except with the British, provides that the tribute previously paid by the Kotah state to the Mahratta chiefs shall thenceforward be paid to the British government. This treaty was of course contracted in the name of the reigning prince Omed Singh; but the administration had then been for nearly half a century in the hands of Zalim Singh, and the ostensible ruler took no apparent interest in public affairs. A supplemental article, annexed about two months after the conclusion of the treaty, confirmed the succession to the principality to Keshour Singh, the son and heir-apparent of Omed Singh, and his heirs, in regular succession and perpetuity; but vested the entire administration of affairs in Zalim Singh, by whom it had been so long exercised, and after him, in his eldest son, Madhoo Singh, and his heirs, in like regular succession, in perpetuity. It was thus proposed to perpetuate the extra-

ordinary state of things which had accidentally arisen out of the commanding talents of one man and the supine indifference of another; an experiment little likely to be attended with success. The results which might have been anticipated, followed. The rajah, Omed Singh, died in 1819, and the dissatisfaction of his successor, Keshour Singh, soon became apparent. In December, 1820, the prince left Kotah, and entered into an extensive series of intrigues, directed towards the recovery of the alienated powers of sovereignty. It is the ordinary fate of native princes to trust to agents whose only object is personal advantage; and the wandering rajah of Kotah fell into the hands of one of this class, whom he deputed to Calcutta, and who, by collusion with the principal native servants in the political secretary's office, was enabled to persuade his master that his mission was in a fair train, and that government were well disposed towards him. At Delhi, the intrigues set on foot were more successful. The treasurer of the residency was enlisted in the cause of the disaffected rajah, and by the aid of that functionary large sums of money were raised. Keshour Singh was thus enabled to proceed, with 2,000 followers, towards Rajpootana, where he caused reports to be disseminated to the effect that the measures of the local agent were disapproved by the British government, and that the expropriated rajah had their approval and support. Public feeling was strongly with him, and Keshour Singh soon found himself at the head of 6,000 men. With this force he advanced into Kotah, and on the 30th September, 1821, ventured to risk a contest with a body of British troops which had been marched thither to support the existing state of rule. The event was destructive of the rajah's hopes; he was defeated, his brother killed, and his adherents dispersed. The rajah found shelter in the sanctuary of Nathdwara, in Joudpore; whence, in the December subsequent to the battle, he returned to Kotah, and was again installed in the pageant sovereignty from which he had fled. A fixed allowance was made for his personal expenses and the support of his dignity, and an instrument executed, by which the perpetual administration of Zalim Singh and his heirs was again recognised. In 1824 Zalim Singh died. His son, Madhoo Singh, seems to have inherited no portion of the abilities of his father; and the incongruity of a titular prince and a servant invested with sovereign power was now rendered more glaring, by the fact that the latter was an incompetent administrator. To get rid of a system so anomalous, unpopular, and inconvenient, it was proposed by the British government that Madhoo Singh should resign his pretensions to the administration, and receive in compensation a part of the territory, to be formed into a new principality, and held by him independent of Keshour Singh and his heirs. From this proposal, however, Madhoo Singh recoiled, declaring that he should be

infamous throughout Rajpootana, if he consented to dismember the territories of his master. The proposal, therefore, at that time, fell to the ground; but the inconveniences of the existing system continued to manifest themselves so strongly, that the necessity of recurring to it at some time appears to have been constantly before the eyes of government. A few years removed from life both the titular and the actual ruler of Kotah; the former being succeeded by a nephew, whom he had adopted, and the latter by a son. The proposal was now revived, and the difficulties in the way of carrying it out surmounted. The more southern part of the Kotah territory, with a small detached portion on the eastern side, were assigned to the descendant of Zalim Singh, as a separate principality, in supercession of his claim to the administration of the whole country; the remaining portion being thus left to the representative of the ancient rajahs of Kotah, who retains the title of his ancestors, with the larger share of their possessions. The chief of the new state is called rana of Jhallowa. The territory assigned to him was estimated to yield a revenue of twelve lacs; that retained by the rajah of Kotah, twenty lacs. The latter seems to have improved under the change, as; a few years subsequent to the separation, the revenue was estimated at twenty-five lacs, and it is now reported to amount to twenty-eight lacs. An arrangement was made for the assignment of three lacs of rupees annually from Kotah, for the formation of a contingent force, under British officers; but, in 1844, the demand was reduced to two lacs. The charge rather exceeds this sum. The strength of the force in 1846 was 283 cavalry, 66 artillery, and 799 infantry; total, 1,148. The native force consists of about 3,450 men of every description, and 2,000 sebundies for police purposes. Suttee has recently been prohibited in this state. There is a British political agent for Kotah or Harowtee.

KOTAH, in the Rajpoot tract denominated Harowtee, a town, the principal place of a raj or state of the same name, is situate on the right bank of the river Chumbul (here crossed by a ferry), and on the route from Nuserabad to Saugor. East of the town is an extensive tank, on the bank of which is a well-wooded pleasure-ground. The city is inclosed by a strong rampart, with bastions and dry ditch. On the side towards the river, the rampart runs parallel to the bank, and at no great distance from it. At its southern extremity, placed within a fortress, and separated from the town, is the palace, embellished with numerous cupolas and slender minarets. The terminating bastion to the north is a little fort of itself, and commands the surrounding country on both banks. In the Chumbul, abreast of the town, is an islet, containing the summer residence of the rajah, built in a florid style of architecture. The town is of considerable size, and contains many Hindoo

KOT.

temples and some mosques. It is a thriving and rather wealthy place, having considerable traffic both in the transit-trade and for supplying the home markets with manufactures. The climate is extremely sultry during the prevalence of the hot winds in the beginning of summer, and very unhealthy during the periodical rains, when the air and water are equally deleterious. Distant N. from Oojein 140 miles, S.W. from Agra 195, S. from Delhi 260. Lat. 25° 10', long. 75° 52'.

KOTAKA-SERAE, in the territory of Gwalior, or possessions of Scindia, a town on the route from the fort of Gwalior to Saugor, 10 miles S.E. of former, 191 N.W. of the latter. It is situate on the small river Oomrar. Lat. 26° 9', long. 78° 11'.

KOTANUH, in the British district of Meerut, lieutenant-gov. of the N.W. Provinces, a town on the route from Meerut to Jheend, 33 miles W. by N. of the former. Kotanuh has a population of 6,684 inhabitants. Lat. 29° 6', long. 77° 15'.

KOTAOOR.—A town in the British district of Tinnevely, presidency of Madras, 54 miles N.N.E. of Tinnevely. Lat. 9° 26', long. 78° 3'.

KOTAR.—A town in the native state of Travancore, 40 miles S.E. by E. from Trivandrum, and 44 miles S.S.W. from Tinnevely. Lat. 8° 9', long. 77° 27'.

KOTARGO, in Sind, a village on the route from Hyderabad to Sehwan, by the way of Kotree, and eight miles S.E. of Sehwan. It is situate near the right bank of the Indus, and close to the southern extremity of the pass formed by the approach of the Lukkee Mountains to the river. Kotargo is in lat. 26° 16', long. 67° 57'.

KOTARY.—A town in Hyderabad, or dominions of the Nizam, 170 miles N. by W. from Hyderabad, and 106 miles S. from Ellichpoor. Lat. 19° 40', long. 77° 45'.

KOTAY PEAK.—A mountain in the Western Ghats, at the junction of the boundaries of the British districts Madura and Tinnevely and the native state of Travancore. Lat. 9° 33', long. 77° 29'.

KOTAYEM, in the British district of Malabar, a town situate five miles from the seacoast. Distance from Calicut, N.W., 42 miles; Cananore, S.E., 12. Lat. 11° 50', long. 75° 36'.

KOTBUND, or **KOTWUN**, in the British district of Muttra, lieutenant-gov. of the N.W. Provinces, a village with a fort on the route from the cantonment of Muttra to Delhi, and 32 miles N.W. of the former. The road in this part of the route is good. Lat. 27° 50', long. 77° 28'.

KOTDWAR, in the British district of Bijnour, lieutenant-gov. of the N.W. Provinces, a village at the southern entrance of the gorge in the Sewalik range, where the small river Koh flows southwards from the mountains to

the plain of Hindoostan. It is a remarkable locality, as gold is found there in the sands of the Koh, and in that of most of the streams to the westward, as far as Hurdwar, a distance of nearly thirty miles, and, as Herbert observes, "the fact furnishes proof of the actual occurrence of gold in some part of the strata which these rivers traverse;" and the weighty opinion of Prinsep (Jamee) is, that extensive veins of the metal are in that vicinity. Lat. 29° 43', long. 78° 35'.

KOTE, in the British district of Ahmedabad, presidency of Bombay, a town on the route from the city of Ahmedabad to Rajkot, 32 miles S.W. of former, 90 E. of latter. Lat. 22° 38', long. 72° 16'.

KOTE, in the Sind Sagur Doab division of the Punjab, a town situated on the right bank of the Chenaub, 13 miles N. of the town of Mooltan. Lat. 30° 20', long. 71° 31'.

KOTEE, in Bundelcund, a town, the principal place of the jaghire or feudal grant of the same name, on the route from Banda to Rewa, 66 miles S.E. of the former, 46 N.W. of the latter. The jaghire is held by an hereditary Bundela chief, to whom it was confirmed by the British government in 1810, after its acquisition of Bundelcund. The sunnud, or instrument of grant, enumerates eighty-two villages, with the lands annexed to them. Lal Madhoo Singh, the late chief, died in 1852, and was succeeded by his brother Lal Abdoot Singh. Kotee is in lat. 24° 45', long. 80° 49'.

KOTEKUTCHWAH, in Sirhind, a village on the route from Kurnal to Loodiana, and 45 miles N.W. of the former place. Distant N.W. from Calcutta 1,010 miles. Lat. 30° 17', long. 76° 53'.

KOTELI.—A town in the dominions of Gholab Singh, the ruler of Cashmere, situate on the right bank of the Jhelum, and 140 miles E. from Peshawur. Lat. 34° 7', long. 74° 1'.

KOTE ODOO, in the Sind Sagur Doab division of the Punjab, a town situated nine miles from the left bank of the Indus, 36 miles N.W. of the town of Mooltan. Lat. 30° 28', long. 71° 4'.

KOTESALBAHAN, in the British district of Budaoon, lieutenant-gov. of the N.W. Provinces, a town on the route from Budaoon to Moradabad, 21 miles N.W. of the former. Lat. 28° 15', long. 78° 58'.

KOTE SOOLTAN, in the Sind Sagur Doab division of the Punjab, a town situated on the left bank of the Indus, 55 miles N.W. by N. of the town of Mooltan. Lat. 30° 47', long. 70° 58'.

KOTEWA.—A town in the British district of Sarun, lieutenant-gov. of Bengal, 52 miles N. of Chupra. Lat. 26° 29', long. 84° 55'.

KOTGURH, a small hill state, bounded on the north by the river Sutlej; on the east by

Bassahir; on the south by the British district of Kothkhae; and on the west by Komharsin. It is seven miles long, about five broad, and contains an area of thirty square miles. Its centre is in lat. $31^{\circ} 19'$, long. $77^{\circ} 33'$. Kotgurbh was one of the petty states formerly recognised under the general appellation of the Baru Thakoorae, or Twelve Lordships, occupying the tract between the Sutlej and the Tonse. It would appear to have formerly acknowledged a degree of dependence on the state of Bussahir, but by the terms of the sunnud dated the 6th November, 1815, granting that province to the reigning family after its conquest by the British, the petty chiefs of Kotgurbh were declared independent of all but the paramount authority of the British government.

The cantonment for British troops is in the pergunnah or division of Sundoch, and is situate on the brow of the eastern side of a ravine nearly 4,000 feet deep. To the north-west, the surface rapidly sinks to the depth of 4,000 feet to the left bank of the Sutlej, distant about four miles. Lloyd mentions a striking instance of the effect produced on the temperature by this sudden depression of the surface:—"The effect of aspect and elevation upon the cultivation is very remarkable; for while on the uplands the produce is green, it has been reaped and carried at the base of the valley. Indeed, this is extraordinarily exemplified in two gardens which Captain P. Gerard had at Kotegurbh, one of which is near the house where he resided, and the other in the dell, 4,000 feet below. In the lower one, plantains and other tropical fruits are abundant, while in the upper English fruits are equally plentiful." The climate of this cantonment is pleasant and salubrious. Frost sets in about the middle of October, and continues till March; and during December, January, and February, snow falls, and lies in shaded places to the depth of two or three feet. The winters, however, are by no means intolerable, being said to resemble those of Europe, but to be less severe. During April, May, and June, the climate is agreeable within-doors, and woollen clothing is comfortable; but in places exposed to the direct rays of the sun, they are found very powerful. The pergunnah in which the cantonment is situate was retained by the British government as a military station, after the conclusion of the Goorkha war in 1815. Elevation above the sea 6,634 feet. Distance N.W. from Calcutta, by Kurnal and Subathoo, 1,120 miles. Lat. $31^{\circ} 15'$, long. $77^{\circ} 34'$.

KOTHAR, a small hill state under the superintendence of the Governor-General's agent for the Cis-Sutlej territories, is bounded on the east by Subathoo, and on the remaining sides by the states of Mhilog and Beja. It is about five miles long and three broad: its centre is in lat. $30^{\circ} 57'$, long. $77^{\circ} 1'$: it comprises six pergunnahs. The population is estimated at 4,000, and the annual revenue at

700*l.*; out of which is paid a tribute to the British government of 108*l.* Kothar belongs to a Hindoo rana, who received it from the British government on the expulsion of the Goorkhas in 1815.

KOTHEE, a small hill state, bounded on the north by Bhugee; on the east by Mudhan; on the south by Simla and Keyonthul, and on the west by a portion of the territory of the rajah of Patecala. Its centre is in lat. $31^{\circ} 8'$, long. $77^{\circ} 16'$. The area of the state is thirty-five miles. It consists entirely of a few ridges of considerable elevation, with intervening valleys. The drainage is northward, to the Sutlej, by the stream termed the Nowla Gad. It is divided into five pergunnahs, is estimated to have a population of 3,000, and an annual revenue of 400*l.* This petty chieftainship is tributary to the state of Keyonthul.

KOTHKHAE, between the Sutlej and the Tonse, one of the hill states in that quarter, and formerly a native possession, is bounded on the north by Bussahir and the British pergunnah of Sundoch; on the east by Bussahir and Turroch; on the south by Poondur; and on the west by Bulsun and Kamharsin. It is about twelve miles from north to south, and six from east to west: its centre is in lat. $31^{\circ} 7'$, long. $77^{\circ} 37'$. It forms the eastern part of a considerable valley, communicating with others of less size, penetrating the great range of mountains extending from Warton on the north, to the Chur on the south. On the west side of this range, the Giree and its feeders in the upper part of its course have their origin. On its eastern side, it throws off several large feeders to the Sutlej, the Pahar, and the Tons. It is generally composed of gneiss and red and white quartz. The south side of the valley is deeply wooded, and in the highest degree romantic and picturesque, being enlivened by the Giree, which, rising here, pursues its noisy course among huge masses of fallen rocks and precipices, variegated with profuse vegetation. Kothkhae, on the Giree, was formerly the residence of the rana, or Hindoo chief, placed over this territory by the British government; but the atrocious cruelty and tyranny consequent on the misgovernment of the second prince, rendered it necessary, in 1828, to dethrone him, and to annex the territory to the British possessions. An annual allowance of 130*l.* is made to the degraded chief, and one of 70*l.* to his relatives; and after these deductions, a revenue of 355*l.* is received by the East-India Company.

KOTHKHAE, in the British hill state of the same name, the principal place of the district, and the residence of the rana previously to his deposition by the British government in 1828. This village has a picturesque site on the right bank of the Giree, and contains two remarkable masses of buildings; one, the residence of the family of the deposed sovereign, the other, of a principal zamindar or landowner; each being situate on a lofty promontory of

KOT.

rock, just affording sufficient area for the houses and offices. Here, also, is a bungalow or stage-house, belonging to the British government. Elevation above the sea 5,515 feet. This little town is thus described by Gerard, who visited it in 1818:—"It is situate on a most romantic spot, upon the point below which two streams unite to form the Giree. On one side, the rock is 182 feet perpendicular, and on the other there is a long flight of stone steps: neither of the streams, which are only twenty feet broad, are fordable; so, by destroying the bridges, the place might be well defended against manaketry. The rana's residence is "three stories high, and has a most imposing appearance: each story projects beyond the one beneath, and the top is crowned by a couple of handsome Chinese turrets, beautifully adorned with finely-carved wooden work." Lat. $31^{\circ} 7'$, long. $77^{\circ} 36'$.

KOTI, in Bussahir, a village on a feeder of the Pabur, and about $\frac{1}{2}$ mile from the left bank of that river. It is situate on an eminence rising in the midst of a dell, opening into the valley of the Pabur. The sanga or wooden bridge over the torrent flowing by the village has an elevation of 5,910 feet above the sea. Lat. $31^{\circ} 5'$, long. $77^{\circ} 58'$.

KOTIUM.—A town in the native state of Travancore, 82 miles N. by W. from Trivandrum, and 103 miles S.S.W. from Coimbatore. Lat. $9^{\circ} 35'$, long. $76^{\circ} 35'$.

KOT KANGRA.—See **KANGRA**.

KOT KASSIM, in the British district of the same name, lieut.-gov. of the N.W. Provinces, a town situate on the route, by Rewaree, from Alwar to Delhi, and 69 miles S.W. of the latter. Lat. 28° , long. $76^{\circ} 48'$.

The territory of which this town is the principal place forms one of the non-regulation districts, subject to the superintendence of the lieut.-gov. of the N.W. Provinces. It extends from lat. $27^{\circ} 59'$ to $28^{\circ} 7'$, and from long. $76^{\circ} 41'$ to $76^{\circ} 55'$, and contains an area of seventy square miles. The population is returned at 13,767, of whom 11,719 are Hindoos.

KOTKIPAR.—A town of the Deccan, in the territory of Nagpore or Berar, situate 141 miles E.N.E. from Nagpore, and 118 S.E. from Jubbulpore. Lat. $21^{\circ} 51'$, long. $81^{\circ} 12'$.

KOT KUMALIA, in the Punjab, a small town six or seven miles from the right or west bank of the Ravee. It has an appearance of antiquity, and is built of burnt bricks. There is a fortress, constructed of the same materials, and a bazar. Masson supposes "that Kamalia may have been the fortress at which the great Macedonian hero had nearly become the victim of his temerity." Arrian distinctly states that Alexander was marching through the Doab, or peninsula between the Chenuab or Acesines, and the Ravee or Hydrates; that he crossed the Hydrates in pursuit of some Indians who had fled over it; that he again crossed (re-crossed) the same river in pursuit of the fugi-

tives, and there attacked this unnamed city, in the storming of the citadel of which he received his wound. This certainly very exactly designates the country in which Kumalia is situated, and affords countenance to Masson's opinion, though he states that he had nothing to rely on but his memory. Still there is no sufficient evidence to fix this very town as the actual scene of the event. Kumalia is in lat. $30^{\circ} 46'$, long. $72^{\circ} 43'$.

KOTKUPPOORA, in Sirhind, a town situate 42 miles from the left bank of the Sutlej. It lies on the route, by Munuk, from Delhi to Ferozpoor, and 40 miles S.E. of the last-mentioned place. There is a small fort at the north of the town. It was comprised in the possessions which the maharaja of the Punjab held on the left of the Sutlej, but is now incorporated with the British district of Ferozepore. Distant N.W. from Calcutta, by Delhi and Munuk, 1,130 miles. Lat. $30^{\circ} 36'$, long. $74^{\circ} 51'$.

KOTLA, in the Baree Doab division of the Punjab, a town situated on the right bank of one of the branches of the Beas, 124 miles E.N.E. of the town of Lahore. Lat. $32^{\circ} 13'$, long. $76^{\circ} 4'$.

KOTLA, in the British district of Agra, lieut.-gov. of the N.W. Provinces, a town on the route from Agra to Furruckabad, 28 miles E. by N. of the former. Lat. $27^{\circ} 17'$, long. $78^{\circ} 32'$.

KOTLI, in the dominions of Gholab Singh, the ruler of Cashmere, a small town among the mountains south of Cashmere, and on the route from Lahore to Cashmere, by the town of Punch. It contains 150 houses, and is the post for levying the duties on goods introduced into Cashmere through the Punch Pass. Lat. $33^{\circ} 28'$, long. $73^{\circ} 59'$.

KOTNUR, in Gurhwal, a village on the left bank of the Jumna, is situate at the confluence of a torrent with that river, and about 150 feet above the water. The houses, rudely built of blocks of stone, and covered with slabs of coarse slate, are situate on a small fertile expanse, gently sloping to the foot of a mountain. Altogether the village and its environs have a neat, clean, lively appearance. Lat. $30^{\circ} 51'$, long. $78^{\circ} 22'$.

KOT POOTELEE, in the Toorawuttee dependency of the Rajpoot state of Jeypore, a district so called from kot, or fort, and the adjacent village of Pootlee. The village, with the fort, is on the route from Delhi to Mhow cantonment, and 99 miles S.W. of the former. The fort was an important place at the close of the last century, and was held by the Mahattas, before their expulsion from this region by Lord Lake, who, on that event, granted it to the Shekhawuttee rajah of Keytri. Lat. $27^{\circ} 43'$, long. $76^{\circ} 16'$.

KOTREE, in Sindé, a village on the right bank of the Indus, nearly opposite Hyderabad, from which it is distant four miles S.W. It is

KOT—KOY.

important in a military point of view, as here is the junction of the routes from Kurrachee, from the Delta, and from Sehwan to Hyderabad. It consequently commands, in a great measure, the southern part of Sind west of the Indus. Here, in the beginning of 1839, was encamped the Bombay division of the British army advancing towards Afghanistan. Kotree is in lat. $25^{\circ} 22'$, long. $68^{\circ} 23'$.

KOTREE.—A town of Sind, in the British district of Hyderabad, presidency of Bombay, 106 miles S. by E. of Hyderabad. Lat. $23^{\circ} 54'$, long. $68^{\circ} 46'$.

KOTTAUM.—A town in the British district of Rajahmundry, presidency of Madras, 36 miles N.E. by N. of Samulkottah. Lat. $17^{\circ} 29'$, long. $82^{\circ} 30'$.

KOTTOOFAUDEE.—A town of the Deccan, in the territory of Nagpoor or Berar, situate 19 miles N.W. from Jeypoor, in the hill zemindary of that name, and 112 miles N.W. from Vizianagram. Lat. $19^{\circ} 15'$, long. $82^{\circ} 16'$.

KOTTOOR.—A town in the hill zemindary of Jeypoor, on the south-west frontier of Bengal, 123 miles S.W. from Jeypoor, and 94 miles N. by E. from Masulipatam. Lat. $17^{\circ} 29'$, long. $81^{\circ} 30'$.

KOTTOROH, in the Rajpoot state of Jodhpoor, a small town on the route from Pokhurn to Balmer, and 28 miles N. of the latter place. Lat. $26^{\circ} 7'$, long. $71^{\circ} 11'$.

KOTUH, in the British district of Boolundshuhur, lieut.-gov. of the N.W. Provinces, a town situate five miles from the right bank of the East Kallee Nuddee, and 34 miles E. of Delhi. Lat. $28^{\circ} 32'$, long. $77^{\circ} 50'$.

KOTULUH, in the British district of Goorgaon, lieut.-gov. of the N.W. Provinces, a village on the western shore of an extensive fresh-water jhil or lake. Distance S.W. from Delhi 48 miles. Lat. $28^{\circ} 1'$, long. 77° .

KOTYANA.—A town in Guzerat, or the dominions of the Guicowar, situate on the right of the Bhader river, and 67 miles S.W. from Rajkote. Lat. $21^{\circ} 39'$, long. $70^{\circ} 8'$.

KOULSERA, in the British district of Boolundshuhur, lieut.-gov. of the N.W. Provinces, a village on the route from the cantonment of Allyghur to that of Delhi, and 18 miles S.E. of the latter, is situate near the left bank of the Hindon. Lat. $28^{\circ} 32'$, long. $77^{\circ} 29'$.

KOUNG-GOOAH.—A town in the British province of Pegue, situate on the left bank of the Irrawady river, and nine miles N. from Promé. Lat. $18^{\circ} 52'$, long. 95° .

KOWAUN, in the Reechna Doob division of the Punjab, a town situated on the left bank of the Chenaub, 76 miles N.E. by N. of the town of Mooltan. Lat. $30^{\circ} 59'$, long. $72^{\circ} 14'$.

KOWLAS.—A town in the native state of Indore, or territory of Holkar, situate 10 miles

from the right bank of the Nerbudda river, and 89 miles N.W. from Raikool. Lat. $23^{\circ} 31'$, long. $76^{\circ} 49'$.

KOWLAASS, in Hyderabad, or territory of the Nizam, a town on the route from Hyderabad to Nandair, 85 miles N.W. of former, 65 S.E. of latter, close to a remarkable hill of granite traversed by a great vein of basalt. Lat. $18^{\circ} 20'$, long. $77^{\circ} 45'$.

KOWPOOM.—A town of Eastern India, in the native state of Munceepoor, 30 miles W.S.W. from Munceepoor, and 112 miles E. by S. from Silhet. Lat. $24^{\circ} 40'$, long. $93^{\circ} 36'$.

KOWRAH.—A town in the native state of Cutch, situate in the Great Western Runn, and 44 miles N. by E. from Bhooj. Lat. $23^{\circ} 50'$, long. $69^{\circ} 50'$.

KOWREEA, in the British district of Azimgurh, lieut.-gov. of the N.W. Provinces, a town on the route from Azimgurh to Oude, 17 miles N.W. by N. of the former. Lat. $26^{\circ} 13'$, long. $83^{\circ} 7'$.

KOWRIA.—A town of Baghelcund, in the native state of Rewah, situate on the right bank of a branch of the Sone, and 80 miles S.W. by S. from Rewah. Lat. $23^{\circ} 32'$, long. $80^{\circ} 42'$.

KOWRI ALI SINGH KE, in Sirhind, a village on the route from Hansee to Loodiana, and 65 miles N. of the former town. Distant N.W. from Calcutta 1,041 miles. Lat. $29^{\circ} 59'$, long. $75^{\circ} 59'$.

KOWROUKIRE, in Arracan, a halting-place on the Aeng route, between Natyagain and Aeng. A fine stream issues from the hills close to it. Lat. 20° , long. $94^{\circ} 14'$.

KOWTA.—A town in the Southern Marhatta jaghire of Sanglee, situate 84 miles N.N.E. from Belgaum, and 73 miles S.E. from Sattara. Lat. 17° , long. $74^{\circ} 55'$.

KOWTALL.—A town in the British district of Bellary, presidency of Madras, 48 miles N.N.E. of Bellary. Lat. $15^{\circ} 47'$, long. $77^{\circ} 11'$.

KOYANDOWNG, the name of a hill in the island of Ramree (Arracan), and in the neighbourhood of the town of Ramree. It has two temples on its summit. It is sometimes called St. George's Hill.

KOYER.—A town in Hyderabad, or dominions of the Nizam, situate on the left bank of the Naringa river, and 55 miles W.N.W. from Hyderabad. Lat. $17^{\circ} 38'$, long. $77^{\circ} 46'$.

KOYLATH, in the Rajpoot state of Beekaneer, a village on the route from the town of Beekaneer to that of Jessulmeer, and 29 miles S.W. of the former. Here is a very large and well-filled tank, where is held every October, at the full moon, a mela or fair, much frequented by the superstitious Hindoos, who attribute high expiatory and sanctifying powers to ablation in the water. Koylath is in lat. $27^{\circ} 48'$, long. $73^{\circ} 1'$.

KOYUL.—A town in the dominions of Gholab Singh, the ruler of Cashmere, situate

KRI—KUH.

186 miles E.N.E. from Kangra, and 173 miles N.E. from Simla. Lat. $32^{\circ} 54'$, long. $79^{\circ} 17'$.

KRISHNA.—See **KISTNAH RIVER.**

KROL, in the hill state of Keyonthul, a peak of the lower and more southerly part of the Himalaya, 12 miles E. of Subathoo. According to Jacquemont, it is formed of schistus and greywacke, having at the summit a saccharoid white magnesian limestone, which yields the lime employed in the buildings at Simla. Elevation above the sea 7,612 feet. Lat. $80^{\circ} 56'$, long. $77^{\circ} 10'$.

KUARA, or **POOJALEE**, in Bussahir, a village on the route from Muscoore to the Gunas Pass, and 15 miles S. of the latter place. It is situate amidst mountains of great height, near the left bank of the Roopin, a deep and rapid river, crossed below the town by a wooden bridge thirty-five feet in length, and above it by one of forty-four. This place is described by Herbert as "a substantial village of about forty houses." The elevation is nearly the same as that of Dudu, situate on the opposite side of the river, 8,790 feet above the sea. Lat. $31^{\circ} 12'$, long. $78^{\circ} 10'$.

KUBARA, in the British district of Allahabad, lieutenant-gov. of the N.W. Provinces, a village on the right bank of the Ganges, 11 miles below the city of Allahabad by way of the river. Lat. $25^{\circ} 20'$, long. $82^{\circ} 2'$.

KUBRAEE, in the British territory of Jaloun, in Bundelcund, lieutenant-gov. of the N.W. Provinces, a small town on the route from Banda to Sangor, 24 miles S.W. of the former. It has a bazar. Lat. $25^{\circ} 25'$, long. $80^{\circ} 5'$.

KUCHARKEHAUT.—A town of Amam, in the British district of Seeshpoor, 50 miles S.W. of Seeshpoor. Lat. $26^{\circ} 31'$, long. $94^{\circ} 3'$.

KUCHLA GHAT, in the British district of Budaon, lieutenant-gov. of the N.W. Provinces, a ferry over the Ganges, on the route from Agra to Bareilly, and 83 miles N.E. of the former. The channel of the Ganges is uncertain here, the stream being sometimes single and at other times divided into two or more branches. Lat. $27^{\circ} 56'$, long. $78^{\circ} 56'$.

KUCHNAB, in the British district of Moradabad, lieutenant-gov. of the N.W. Provinces, a village on the route from the town of Moradabad to Alnora, and 15 miles N. of the former. Elevation above the sea 741 feet. Lat. $29^{\circ} 1'$, long. $78^{\circ} 55'$.

KUCHOUNA.—A town in the territory of Oude, 40 miles W.N.W. from Lucknow, and 47 miles N. by E. from Cawnpore. Lat. $27^{\circ} 9'$, long. $80^{\circ} 26'$.

KUCHRAWUD.—A town of Malwa, in the British district of Mundlaour, 148 miles W. by N. of Baitool. Lat. $22^{\circ} 6'$, long. $75^{\circ} 41'$.

KUCHRIE, in the Rajpoot state of Jessulmer, a halting-place on the route from Roree, in Sindh, to the town of Jessulmer, from which it is distant 30 miles in a N.W. direction. There are thirteen wells lined with stone, and

a tank containing good water. The road in this part of the route is good. Lat. 27° , long. $70^{\circ} 44'$.

KUCHROWLI, in the British district of Paneeput, lieutenant-gov. of the N.W. Provinces, a village on the route from the city of Delhi to Kurnal, and 18 miles S.E. of the latter. The road in this part of the route is good. Lat. $29^{\circ} 27'$, long. $77^{\circ} 1'$.

KUCHUHLA, or **KUTCHWA**, in the British district of Mirzapoor, lieutenant-gov. of the N.W. Provinces, a town with a bazar on the left bank of the Ganges, 705 miles by water N.W. of Calcutta, or 882 taking the Sunderbund passage; 35 S.W. of the city of Benares, or higher up the stream. It is on the direct route by land from Benares cantonment to that of Mirzapoor, 19 miles S.W. of the former, eight N.E. of the latter. Lat. $25^{\circ} 12'$, long. $82^{\circ} 46'$.

KUCKRUMPILLE.—A town in Hyderabad, or dominions of the Nizam, situate 20 miles S.E. from the right bank of the Godavery river, and 96 miles N. from Hyderabad. Lat. $18^{\circ} 43'$, long. $78^{\circ} 20'$.

KUDDERPOOR.—A town in the British district of Ahmedabad, presidency of Bombay, 111 miles S. by W. of Ahmedabad. Lat. $21^{\circ} 29'$, long. $72^{\circ} 12'$.

KUDDI.—A petty jaghire in Bundelcund, containing an area of twenty-two square miles, with a population of about 2,800. Upon the demise, in 1850, of Purseram Bahadour, the original grantee, the territory lapsed, under the conditions of the grant, to the British government. Kuddi, the principal place, is situate in lat. $25^{\circ} 20'$, long. $80^{\circ} 12'$.

KUDDUN.—A town of Sind, in the British district of Hyderabad, presidency of Bombay, 73 miles S.E. by S. of Hyderabad. Lat. $24^{\circ} 29'$, long. $69^{\circ} 3'$.

KUDJOOA.—See **KUJWA**.

KUDKA.—A town in Hyderabad, or dominions of the Nizam, situate on the right bank of one of the branches of the Manjera river, and 106 miles N.W. from Hyderabad. Lat. $18^{\circ} 28'$, long. $77^{\circ} 25'$.

KUDSEH.—A town of Eastern India, in the native state of Muneepoor, 37 miles N.N.W. from Muneepoor, and 104 miles S.E. from Nowgong. Lat. $25^{\circ} 17'$, long. $93^{\circ} 52'$.

KUGUTNAAD.—A town in the British district of Coorg, presidency of Madras, 25 miles S.S.E. of Merkara. Lat. $12^{\circ} 7'$, long. $75^{\circ} 59'$.

KUGNALI, or **SACRIFICE ROCK**.—A small steep rocky island, lying six miles off the coast of the British district of Malabar. It has been called Sacrifice Rock, "from the crew of an English ship having been massacred there by pirates, at the beginning of the seventeenth century: it is famous for edible bird-nests, found in the clefts in the rocks." Lat. $11^{\circ} 30'$, long. $75^{\circ} 35'$.

KUHLOOR, a small hill state or raj amidst

the Sub-Himalaya, is bounded on the north by the Sutlej, separating it from the Upper Punjab; on the east by the petty states of Mangul and Bhagul; on the south by that of Hindoor; and on the west by a strip of the Sirhind territory. The rajah was deprived by Runjeet Singh of that part of his territory lying on the right side of the Sutlej; and the state at present consists principally of a narrow belt of land of about six miles in breadth and thirty in length, deeply indented by the winding course of the great river which borders it, and lying between lat. $31^{\circ} 10'$ — $31^{\circ} 25'$, long. $76^{\circ} 27'$ — $76^{\circ} 55'$. The area is about 150 miles: the general elevation is considerable. At Soonee, about eighteen miles above the frontier of Kuhlloor, the bed of the Sutlej is 2,283 feet above the sea; and as its descent in this part of its course averages twenty feet a mile, the elevation of the bed of the river at the frontier must be about 1,920 feet. The left bank of the Sutlej, for a short distance from the water, is tolerably level and fertile as high up as Belaspoor; and lower down, on the western frontier of the district, this flat space expands into the small plain of Makowal, communicating at its southern extremity with the Pinjor Dun. A steep ridge rises at no great distance from the river, in the north-western corner of the district, and holds a south-easterly direction until it joins the Sub-Himalaya. Parallel to this, and separated from it by the Gumbah or Gumbur river, is the ridge of Malown, which, very steep and difficult, rises to the height of 4,448 feet, and at the foot of the same name has a breadth of only twenty-two yards. The country, viewed from this height, is represented as very beautiful. "The terraced fields are like the steps of some magnificent amphitheatre, upon which the produce waves in many hues. These terraces are carried up to the tops of the ranges, and frequently in situations apparently inaccessible. Many elegant little hamlets are scattered up and down the fields, and upon the peaks are several small forts, while here and there large pine-woods sweep down in rich dark-green masses, intersected by thin rills of the whitest foam, or long forky mountain-paths. There is, too, an amenity and perfume in the air, and repose, which soothes the senses, while the immensity of the view expands the mind." The low lands on the bank of the Sutlej are alluvial; the mountains and other high grounds consist of recent sandstone, gravel, or indurated clay. The climate and products in the low tract in some degree resemble the less ardent parts of intertropical regions; and on the high grounds approach to those of the warmest parts of Europe. The rainy season is felt with considerable severity, extending through the later summer months, to the end of September or beginning of October. The crops are maize, rice of various kinds, wheat, barley, various kinds of millet, oil-seeds, pulse, ginger, turmeric, bang or hemp, cultivated on account of its intoxicating qualities, opium, tobacco, chil-

lies or red pepper, and a variety of esculent vegetables. The principal fruits are peaches, apricots, walnuts, apples, pears, pomegranates, raspberries, gooseberries, strawberries, and barberries. Except the Sutlej, the only river of any importance is the Gumbhur or Gumbah, which, flowing in a north-westerly direction by the hill of Malown, crosses the southern frontier in lat. $31^{\circ} 14'$, long. $76^{\circ} 50'$, and, after a course of four or five miles, falls into the Sutlej in lat. $31^{\circ} 17'$, long. $76^{\circ} 48'$. A few other streams,—the Gumrara, the Sir, the Lohund, the Jujur,—are little more than large brooks. The only considerable piece of water is the Khundatu Lake. The rajah of Kuhlloor was formerly of much greater importance than at present, having then considerable possessions on the right bank of the Sutlej, which were wrested from him, as already mentioned, by Runjeet Singh. His possessions to the left of the Sutlej, also, were much more extensive than at present, as, besides Kuhlloor, they included twelve lordships or small states, yielding an aggregate annual revenue estimated at 13,500*l*. Kuhlloor, with the other hill states between the Kali and Sutlej, having been overrun by the Goorkhas, became in 1814 the scene of obstinate struggle between that power and the East-India Company; and here that serious conflict was ultimately decided by the surrender of Ummer Singh, the Goorkha commander-in-chief, who had been cooped up in the fortress of Malown. The territories of the rajah of Kuhlloor were included in the subsequent pacification, which transferred the hill states to British protection. It is stated to yield an annual revenue of 11,000*l*. The population is estimated at 64,848: the military force amounts to about 400 infantry. In 1850, Rajah Juggut Chund, chief of Kuhlloor, was permitted to abdicate in favour of his grandson and heir, Heer Chund. Besides about ninety villages, the territory contains the towns of Belaspoor, Kuhlloor, Anandpoor, and Makowal.

KUHLLOOR, a small town in the hill state of the same name, is situate at the south-western base of the Nina Devi Mountain, and five miles from the left bank of the Sutlej. Though bearing the name of the state, whence it might be supposed to be the chief place in it, it is in fact of little importance, Belaspoor being much larger, and the residence of the rajah. Kuhlloor is distant from Calcutta 1,103 miles. Lat. $31^{\circ} 15'$, long. $76^{\circ} 40'$.

KUJEENAAD.—A town in the native state of Travancore, presidency of Madras, situate 53 miles S. from Coimbatore, and 63 miles E.N.E. from Cochin. Lat. $10^{\circ} 15'$, long. $77^{\circ} 11'$.

KUJWA, or **KUDJOA**, in the British district of Futtehpore, lieut.-gov. of the N.W. Provinces, a town on the route from Calpee to the town of Futtehpore, and 20 miles N.W. of the latter. Tieffenthaler describes it, a century ago, as a large place (grosser Flecken), with a fine serai of brick, with vaulted apart-

ments, and a lofty and beautiful portal on the west side, and another on the east; and on the north-east a spacious garden, inclosed with a wall having turrets at intervals. It was built by Aurangzebe, to commemorate his victory gained here over his brother Shuja, who "fled from the field, leaving 114 pieces of cannon and many elephants, to the victor." The name of Aurangabad, which the victor gave to this place, in honour of himself, appears to have endured but a short time. It has a bazar. Lat. 26° 3', long. 80° 35'.

KUKKOR, or KAKORH, in the territory of Jeypoor, district of Ooniar, in Rajpootana, a large town, with a fort, in a very picturesque situation on the southern extremity of a range of hills. Close to it is an extensive jhil or small lake, which, however, becomes dry in prolonged droughts. Distant direct from Boodee, N.E., 40 miles; from Kota, N., 60; Jeypoor, S., 65. Lat. 26° 2', long. 76° 4'.

KUKRALA, in the British district of Mynpoore, lieutenant-gov. of the N.W. Provinces, a village situate on the route from the cantonment of Allypore to that of Etawah, and 38 miles N.W. of the latter. Lat. 27° 11', long. 78° 36'.

KUKRALUH, in the British district of Baddaon, lieutenant-gov. of the N.W. Provinces, a town on the route from Baddaon to Furruckabad, 11 miles S.S.E. of the former. Lat. 27° 54', long. 79° 16'.

KUKRUHTEE, or KURETI, in Bundelcand, a village in the district of Punna, on the route from Banda to Jubalpoor, 64 miles S. of the former. It has a bazar; water is abundant, and supplies are procurable. The country here slopes gently from the plateau on the summit of the range styled by Franklin the Pannah Hills. Lat. 24° 34', long. 80° 21'.

KUKURAH, or KAKARA, in the British district of Allahabad, a town on the left bank of the Ganges, 14 miles above the city of Allahabad by the course of the river. Lat. 25° 30', long. 81° 49'.

KUKURRAMUTTA.—A town of the Deccan, in the territory of Nagpoor or Berar, situate 146 miles E. from Nagpoor, and 134 miles S. by E. from Ramgurn. Lat. 20° 55', long. 81° 23'.

KULADGEE.—A town in the British district of Belgaum, presidency of Bombay, 71 miles E.N.E. of Belgaum. Lat. 16° 11', long. 75° 33'.

KULAIRREE, in Sind, a considerable watercourse, which parts from the right side of the Indus three miles due east of Tatta, and in lat. 24° 46', long. 68° 2'. It holds a circuitous course, first north, then west, and then south; and in times of inundation, has so great a body of water as to insulate Tatta. At such times as the torrents flow down from the hilly country to the north-west, several of them empty themselves into the Kulairree. At the season of low water in the Indus, the

Kulairree becomes completely dry. It holds a course almost due west, and, under the name of the Gharra Creek, falls into the Arabian Sea. Burnes inadvertently states that it is the first offshoot of the Indus on its right bank; but the Western Narra, and many others, leave the right bank far above this place.

KULALPOOR, in the Reechna Doosh division of the Punjab, a town situated on the right bank of the Ravee, 43 miles N.E. by N. of the town of Mooltan. Lat. 30° 40', long. 71° 58'.

KULAN COTE, KULIA KOTE, or KUL-LAN KOTE (the Great Fort), in Sind, is situate near the north or right bank of the Buggaur, or western branch of the Indus, and three miles south of Tatta. To the west are the remains of a suburb, and on the other side the ruined fort is washed by a lake of considerable extent, communicating with the Indus. The site is on a hill of limestone, abounding in marine shells, and everywhere honeycombed with natural cavities. The walls are of mud, faced with kiln-burned brick, and inclose an area three-quarters of a mile long and 500 or 600 yards broad. It appears to have been constructed with much care and skill, and has numerous massy round towers, connected by curtains: among other remarkable ruins, are those of a mosque of spacious dimensions. Lat. 24° 42', long. 67° 54'.

KULEAGUNJE.—A town in the British district of Dinajpoor, lieutenant-gov. of Bengal, 27 miles W. by S. of Dinajpoor. Lat. 25° 30', long. 88° 13'.

KULEEAHPoor.—A town in the British district of Sarun, lieutenant-gov. of Bengal, 66 miles N.W. by N. of Chupra. Lat. 26° 31', long. 84° 10'.

KULEEANPOOR.—A town in the British district of Sarun, lieutenant-gov. of Bengal, 47 miles N. by E. of Chupra. Lat. 26° 25', long. 85°.

KULEGPESE.—A town of Orissa, in the hill zemindarry of Jeypoor, 38 miles W.S.W. from Ryaguddah, and 75 miles N.W. by N. from Vizianagram. Lat. 19° 4', long. 82° 56'.

KULELLY.—A town in the native state of Travancore, presidency of Madras, 52 miles N. from Trivandrum, and 63 miles N.W. by W. from Tinnevely. Lat. 9° 13', long. 76° 57'.

KULGAUM.—A town in Hyderabad, or dominions of the Nizam, situate on the left bank of one of the branches of the Payne Gunga river, and 98 miles S. from Ellichpoor. Lat. 19° 47', long. 77° 47'.

KULHOREE, in the British district of Mynpoore, lieutenant-gov. of the N.W. Provinces, a village on the route from the city of Agra to the cantonment of Mynpoore, and 14 miles W. of the latter. Lat. 27° 12', long. 78° 54'.

KULIANEE, in the territory of Gwalior, a village on the route from the fort of Gwalior

KUL.

to Sangor, 21 miles S. of former, 181 N.W. of latter. Lat. $26^{\circ} 2'$, long. $78^{\circ} 15'$.

KULIANPOOR, in the Rajpoot state of Jodhpoor, a large village on the route from Balotra to the city of Jodhpoor, and 28 miles N.E. of the former. It is situate in a level country, rather fertile, and cultivated; but the water, which is obtained from wells only, is very brackish. Lat. $26^{\circ} 4'$, long. $72^{\circ} 44'$.

KULIANPOOR.—A town in the British district of Hijellee, lieut.-gov. of Bengal, 40 miles S.W. of Calcutta. Lat. $22^{\circ} 10'$, long. 88° .

KULIGAM, in Cashmere, a town, the capital of the district of Deosir, is situated near the left bank of the river Jhelum, here called the Veshan. The road from the Punjab, by the Col Narrawa Pass, debouches by Kuligam, and hence is sometimes called the Kuligam Pass. Kuligam is in lat. $33^{\circ} 37'$, long. $75^{\circ} 5'$.

KULIGAM, in Cashmere, a village at the head of the Lolab valley, and near the source of the river of that name, a small tributary of the Jhelum. It is situate at the southern base of the Green Mountains, bounding the valley of Cashmere on the north-west. Close to it on the east is a circular valley, five miles and a half in diameter, inclosed on every side by a verdant range, and having a morass in the centre. Here every evening, an incredible number of birds of the *corvus* genus assemble from all parts of Cashmere, to pass the night in the sheltered and warm valley. Kuligam is in lat. $34^{\circ} 33'$, long. $74^{\circ} 41'$.

KULINJERA, or **KANJRA**, in the raj or state of Banswara, in Rajpootana, a small town on the route from Neemuch to Baroda, 99 miles S.W. of former, 139 N.E. of latter. It has water and supplies in abundance. Here is a fine spacious antique temple, now quite deserted. Heber, who was informed that it was a Jain temple, describes it as of very complicated and extensive plan, covered with numerous domes and pyramids, divided into a great number of apartments, roofed with stone, crowded with images, and profusely embellished with rich and elaborate carvings. This was formerly a place of considerable wealth and trade, conducted by Jain merchants, who were all ruined or driven away by Mahratta freebooters. Lat. $23^{\circ} 24'$, long. $74^{\circ} 28'$.

KULKEREE.—A town in the British district of Sholapoor, presidency of Bombay, 72 miles S.S.E. of Sholapoor. Lat. $16^{\circ} 40'$, long. $76^{\circ} 21'$.

KULLANOOR, in the British district of Rohtak, lieut.-gov. of the N.W. Provinces, a village on the route from Hanees to Goorgaon, and 36 miles S.E. of the former. Lat. $28^{\circ} 50'$, long. $76^{\circ} 27'$.

KULLEE KUHAR, in the Sindie Sagur Doonab division of the Punjab, a town situated twenty-three miles from the right bank of the

Jhelum, 131 miles N.W. by W. of the town of Lahore. Lat. $32^{\circ} 49'$, long. $72^{\circ} 28'$.

KULLELPOOR, in the British district of Bareilly, lieut.-gov. of the N.W. Provinces, a village on the route from the town of Bareilly to Moradabad, and six miles N.W. of the former. Lat. $28^{\circ} 24'$, long. $79^{\circ} 26'$.

KULLIANEE, in Hyderabad, or territory of the Nizam, a town with a fort, formerly of considerable strength, but now ruinous. Distant from the city of Hyderabad, N.W., 106 miles. Lat. $17^{\circ} 51'$, long. $76^{\circ} 59'$.

KULLIANPOOR, in the British district of Cawnpore, lieut.-gov. of the N.W. Provinces, a village on the route from the cantonment of Cawnpore to that of Futtehgurh, and seven miles N.W. of the former. Lat. $26^{\circ} 31'$, long. $80^{\circ} 18'$.

KULLIANPOOR, in the British district of Allahabad, lieut.-gov. of the N.W. Provinces, a village on the route from the cantonment of Allahabad to Futtehpore, and 32 miles N.W. of the former. Lat. $25^{\circ} 36'$, long. $81^{\circ} 30'$.

KULLOOR.—A town in Hyderabad, or dominions of the Nizam, situate 139 miles E. from Hyderabad, and 52 miles N.W. from Ellore. Lat. $17^{\circ} 13'$, long. $80^{\circ} 38'$.

KULLOOR, in the Sindie Sagur Doonab division of the Punjab, a town situated three miles from the left bank of the Indus, 131 miles S. by W. of the town of Peshawur. Lat. $32^{\circ} 10'$, long. $71^{\circ} 17'$.

KULLOOR, in the Daman division of the Punjab, a town situated on the right bank of the Indus, 92 miles S. by W. of the town of Peshawur. Lat. $32^{\circ} 44'$, long. $71^{\circ} 20'$.

KULLSAPAWA.—A town in the British district of Cuddapah, presidency of Madras, 47 miles N. by E. of Cuddapah. Lat. $15^{\circ} 8'$, long. $79^{\circ} 1'$.

KULLUNG, a river of Eastern India, rises in lat. $25^{\circ} 4'$, long. $93^{\circ} 5'$, on the southern boundary of Toolaram Senahputtee's country, and flows north for sixty-five miles, dividing that territory from the British district of Cachar, when it enters the district of Nowgong, through which it flows in a north-westerly direction for ninety miles, to its junction with the Brahmapootra, in lat. $26^{\circ} 15'$, long. $91^{\circ} 55'$.

KULLUS.—A town in the British district of Poonah, presidency of Bombay, 65 miles E.S.E. of Poonah. Lat. $18^{\circ} 13'$, long. $74^{\circ} 50'$.

KULLYAVA KOORTY.—A town in Hyderabad, or dominions of the Nizam, situate 50 miles S. from Hyderabad, and 64 miles N.E. by N. from Kurnool. Lat. $16^{\circ} 40'$, long. $78^{\circ} 33'$.

KULOONJUR.—A town in the British district of Tirhoot, lieut.-gov. of Bengal, 54 miles N.E. by E. of Dinapoor. Lat. 26° , long. $85^{\circ} 51'$.

KULORA, in Sindie, a village on the western

KUL—KUM.

route from Roree to Hyderabad, and 60 miles S.W. of the former town. It is situate four miles from the left bank of the Indus, in an alluvial country much intersected by water-courses, dug for the purposes of irrigation. Lat. $27^{\circ} 11'$, long. $68^{\circ} 13'$.

KULORAH, in Sinde, a village on the western route from Sehwan to Larkhana, by way of the Arul river, and seven miles south-west of Larkhana. It is situate on the Cheela, a watercourse from the Western Narra river. The road in this part of the route is in general good, though occasionally traversed by small watercourses. Kulorah is in lat. $27^{\circ} 24'$, long. $68^{\circ} 9'$.

KULPANEE, in the British territory of Saugur and Nerbudda, lieutenant-gov. of the N.W. Provinces, a town on the route from Jubbulpore to Nagpore, 41 miles S.E. by S. of the former. Lat. $22^{\circ} 40'$, long. $80^{\circ} 23'$.

KULPEE, or **CALPEE**, in the British district called the Twenty-four Pergunnahs, lieutenant-gov. of Bengal, a town situate on the left bank of the river Hooghly, at the place where it expands into an extensive estuary. Distance from Calcutta, S., 31 miles. Lat. $22^{\circ} 4'$, long. $88^{\circ} 18'$.

KULPUTTY.—A town in the British district of Coimbatore, presidency of Madras, 38 miles S. of Coimbatore. Lat. $10^{\circ} 28'$, long. $77^{\circ} 4'$.

KULU, **KULLU**, or **KOOLOO**, a small raj or state in the north-east of the Punjab, consists of a few rugged valleys on the southern slope of the Himalaya, together with the inclosing ridges. It is consequently rough, barren, and thinly peopled. The chief, a Rajpoot, before the occupation of the country by the British, suffered much from the tyranny of the Sikh government. The capital is sometimes called Kulu, but is better known by the name of Sultanpore. Kulu lies between lat. $31^{\circ} 20'$ — $32^{\circ} 33'$, long. $76^{\circ} 45'$ — $77^{\circ} 50'$.

KULUGA, a village on the right bank of the Gurrab, in the British district of Bareilly, division of Pilleebheet, lieutenant-gov. of the N.W. Provinces. Lat. $29^{\circ} 6'$, long. $79^{\circ} 47'$.

KULU SAIYID'S TOMB, in the British district of Bijnour, lieutenant-gov. of the N.W. Provinces. It is situate on the crest of that part of the Sewalik range bounding the Patlee Doon on the south, and marks the burial-place of Kulu, a Saiyid, or descendant of Fatima. He fell in command of a Mussulman force, in an unsuccessful invasion of Gurhwal. Lat. $29^{\circ} 34'$, long. $78^{\circ} 44'$.

KULUTZI, **KALLACH**, or **KHALETSE**, in Ladakh, one of the largest villages in that country, is situate on the right or north bank of the Indus, which has here a rocky channel only twenty-five yards wide. The site is elevated considerably above the stream. Moorcroft observes: "At first sight, the situation appears unfavourable, presenting to the southward a line of towering rocks, and encircled

nearly from east to west by a ridge of brown and barren hills. The cultivated ground is, however, of good quality, though rather incommodiously laid out in terraces. The grain sown here ripens in three months, and a second crop of buckwheat, or turnips, is obtained from the same soil." The population, for the most part, are Buddhists, votaries of the Grand Lama of Tibet. At the time of Moorcroft's visit, there was a *sanga* or wooden bridge across the river, three-quarters of a mile from the village. It was "substantially constructed, resting on two scarped rocks, and was about thirty yards long. The river was not more than twenty yards broad, and was rolling, black and impetuously, about twelve feet below it." The depth at this time must have been very great, as, during the season of low water, a few months after, the surface of the stream was forty-five or fifty feet below the bridge. Kulutzi is in lat. $34^{\circ} 19'$, long. $76^{\circ} 58'$.

KULWAH, in Sirhind, a town on the route from Hansee to Kurnal, and 41 miles S.W. of the latter place. There is a bazar here, but water is scarce in the dry season: the surrounding country is scantily cultivated. It is comprised in the possessions of the rajah of Jheend, a Sikh chief under British protection and control. Distant N.W. from Calcutta, by Delhi and Hansee, 1,015 miles. Lat. $29^{\circ} 20'$, long. $76^{\circ} 35'$.

KUMALGANJ, in the British district of Furruckabad, lieutenant-gov. of the N.W. Provinces, a village on the route from the cantonment of Cawnpore to that of Futtehgurh, and seven miles S. of the latter. Lat. $27^{\circ} 16'$, long. $79^{\circ} 41'$.

KUMALPOOR, in the British district of Ghazeepoor, lieutenant-gov. of the N.W. Provinces, a town on the route from Chunar to Dinapore, 36 miles N.E. of the former, 110 S.W. of the latter. Lat. $25^{\circ} 23'$, long. $83^{\circ} 27'$.

KUMANPILLY.—A town in Hyderabad, or dominions of the Nizam, situate six miles from the right bank of the Godavery river, and 120 miles N.E. by N. from Hyderabad. Lat. $18^{\circ} 48'$, long. $79^{\circ} 35'$.

KUMAON, including Eastern Gurhwal, a British province under the lieutenant-gov. of the N.W. Provinces. It is bounded on the north-east by Chinese Tartary; on the east by Nepal; on the south-west by Rohilkund, comprising the British districts Pillibheet, Moradabad, and Bijnour; on the west by the British district Dehra Doon; and on the north-west by the native raj of Gurhwal. Its form is nearly that of an equilateral rectangle, the diagonals of which lie in a direction nearly from south-west to north-east, and from south-east to north-west; the extreme points being in lat. $29^{\circ} 5'$ — $31^{\circ} 6'$, long. $78^{\circ} 17'$ — $80^{\circ} 56'$. No country exhibits more extraordinary diversities of elevation, temperature, and climate, than Kumaon. The southern part is either Bhawar (forest lands), extending over the plain, or else Terrai (marsh). The low region com-

prising those tracts extends along the whole frontier on that side, with a breadth varying from two to fifteen miles, and is thus described by Herbert:—"Along the foot of the mountains, extends a tract called Bhawar, which has been always, I believe, reckoned an integral part of the mountains, politically speaking. It is of considerable elevation, and is further distinguished by an almost total deficiency of springs or running streams. It is bounded on the southward by a line of springs or waterheads, which is also the northern boundary of the tract called Terai, one equally distinguished with the former from the southern plain country, but occasionally annexed to it, and occasionally to the hills. This tract is remarkable for its moisture, as the other is for its dryness."

With the exception of these low lands, and a few similar tracts of small extent stretching along the great rivers in the lower parts of their courses, Kumaon is a maze of mountains, some of which, if not the loftiest known, may aspire very nearly to that distinction. The elevation of the surface increases towards the north and north-eastern frontier; the rivers rising respectively, in the Byanase, the Darma, the Juwahir or Juwar, the Niti and Mana passes, flowing south-westerly to pour their waters at various points into the great trunk of the Ganges. The north-eastern frontier is formed by the high ground which divides the drainage-system of the Indus from that of the Ganges, throwing off from the north and north-eastern sides feeders to the Sutlej, and from the other the great feeders of the Ganges just mentioned. The elevation of this dividing range, or succession of heights, is in general very great; thus the crest of the Niti Pass is 16,895 feet above the sea; that of Mana more than 20,000; that of Byanase about 15,000. This range, forming towards the south the boundary of the table-land of Tartary, is itself greatly overtopped by groups of gigantic mountains, situate generally thirty, forty, or fifty miles to the south and south-west of these passes, and attaining heights scarcely surpassed by any in the world. Nanda Devi, one of them, rises to the elevation of 25,749 feet above the sea; and close to it are two others, having the respective elevations of 23,531 and 23,317 feet; two others, farther north-west, respectively measuring 23,441 and 23,236 feet; eleven others, either in Kumaon or a few miles beyond its frontier, have elevations respectively exceeding 22,000 feet; eight others have elevations exceeding 21,000 feet; and ten more reach respectively an elevation of above 18,000 feet; so that there are thirty-four summits rising to elevations exceeding 18,000 feet, in a tract not more than 140 miles in length and forty in breadth. These summits are not situate on one extended ridge, but form groups separated by very deep valleys, determining the course of the several great torrents or rivers, all discharging themselves ultimately by the trunk of the Ganges. These remote

feeders of the Ganges are on the declivity of the southern buttress of the table-land of Tartary, and north, or beyond the highest summits of the Himalaya Mountains, amongst which they make their way down valleys of rapid declivity and extraordinary depth. The more remote of these have their sources at an average elevation probably of about 13,000 feet. Enumerated in a direction from east to west, the principal are, the Kalee, the Eastern Douli, the Goonka or Gorigunga, the Western Douli, the Vishnugunga. Of the valleys down which these streams flow, the deepest is that of the Aluknunda river, formed by the united streams of the Vishnugunga and Western Douli, and which, at the confluence, having an elevation of 4,743 feet above the sea, is bounded to the east by the Nandadevi group, rising, in a distance of little more than twenty miles, to the elevation of 25,749 feet; and on the west by the Badrinath group, rising, in a distance of about fifteen miles, to the height of 23,441 feet; thus forming an enormous depression of between thirty and forty miles in width, irregularly defined, with a very varied surface, and having its lowest part more than 20,000 feet below the culminating point on one side, and more than 18,000 below that on the other. These remote feeders of the Ganges soon become swollen by numerous tributaries descending from the great Himalayan heights; and the rivers thus formed take their way through the mazes of the subordinate ranges overspreading the southern tract, and ultimately pass into the plain of Hindoostan by two great channels; that of the Kalee or Gogra on the east, and of the Aluknunda on the west. Inferior to these, and unconnected with them, are some less extensive and less important drainages of the southern and less elevated high lands. Of such, the principal are the Kosila, and west of this the Ramgunga; but ultimately all are discharged into the Bay of Bengal by the channel of the Ganges.

Kumaon produces gold, which is obtained by searching the sands of the Aluknunda; and of which Captain Herbert obtained particles from a matrix of granite near Kedarnath. The Goorkha government, during its sway, derived a small revenue from the gains of the gold-washers, but it has been remitted by the British, as too trifling for notice. Captain Herbert, however, considers that by encouragement the pursuit might become more beneficial, as well to the rulers as to the labourers; he also has a favourable opinion of the lead-mines, which formerly, it is said, yielded more than the aggregate of the mines of every kind at present. Such views must, however, be received with great caution, as the value of the copper-mines, respecting which very glowing accounts had been given, has been brought to the test of experiment with very unsatisfactory results. Thus it had been asserted that one mine in Pokree yielded in a single year a return equal to 5,000*l.*; but experiments con-

ducted there, under able European management, for several years, afforded a return of 780 rupees, against an expenditure of 8,164 rupees. The object was in consequence abandoned in 1841. The situation of these mines is almost inaccessible, and the vicinity affords no adequate supply of fuel for smelting. From these causes British copper is cheaper in Kumaon than that of native origin. Some arrangements were, however, made in 1852, in view to the working of some of these mines by persons of capital. The principal mines are in the group of Pokree above mentioned, in lat. $30^{\circ} 20'$, long. $79^{\circ} 15'$, and that of Dhunpur and Dhobri, in lat. $30^{\circ} 14'$, long. $79^{\circ} 5'$. The others are Gangoli, Sira, Khor, and Shor Gurang. Iron abounds in this province. Of all the iron districts in India of which anything is known, Kumaon is said to be the most promising. Within the last year deposits of surpassing richness have been discovered by Colonel Drummond in the Bhabur district of this province, and that officer is now (1856) in England, endeavouring to form a company to work the iron-mines in this quarter of India. In 1850, specimens of plumbago were sent to this country, and subjected to examination, when it was ascertained that the mineral of this description could not be made serviceable as graphite. A specimen of the pure graphite of Cumberland was subsequently forwarded to Kumaon, as the standard of the mineral for which it would be desirable to search, its value being computed at 3,000*l.* per ton.

The climate varies, according to the elevation, from the suffocating and deadly sultriness of the Terai to the perennial snow of the Himalaya. At Hawillagh, having an elevation of 3,887 feet, the average height of the thermometer at two P.M. was, for January, 47° ; February, 55° ; March, 61° ; April, 66° ; May, 73° ; June, 76° ; July, 78° ; August, 79° ; September, 75° ; October, 69° ; November, 60° ; December, 52° . The temperature is subject to great variations. Some years pass without any snow; the natives consider that they have reason to expect a snowy season every third year. When it falls, it never lies but on the mountain-tops and ridges, and not even there except they be very lofty, or densely covered with forests. On the Ghagar range, which rises on the southern frontier to an elevation of between 7,000 and 8,000 feet, snow lies so late as the middle of May. There do not appear to have been any systematically accurate observations respecting the limit of perpetual congelation, except those recently taken by Lieutenant Richard Strachey, in that section of the Himalayas lying between the north-west frontier of Nepaul and the river Sutlej. From these it appears that the heights crowned with perpetual snow extend from the 77th to the 81st degree of east longitude, and are confined within a belt of thirty-five miles in breadth, between the 30th and 32nd degrees of north latitude. The results of this traveller's observations further show

that the snow-limit which resists the effect of summer recedes to a higher altitude on the northern or Tibetan slope of the mountains than on the southern or Indian side, having an elevation on the former of 18,500 feet, while on the latter it is permanently maintained at about 15,500 above the sea-level.

Kumaon is subject to earthquakes. McClelland records eight as having occurred from 1831 to 1835. The most severe mentioned in any account that may be relied on as authentic, is that of 1803, which demolished a great number of the temples and other substantial buildings of the territory. According to Heber, scarcely a year elapses without one or two slight shocks; and, as a measure of precaution, the residences of the British are seldom built more than one story high.

Of forest-trees, the most important are the deodar or Himalayan cedar, pines, and firs, of which there are eight varieties; oaks, of which there are six kinds; sal (*Shorea robusta*), rhododendrons, red and white, horse-chestnut, &c. Adverting to the tree last named, Traill speaks of "an endless variety, some common to the plains, and others peculiar to the hills." Some of the firs and pines are above two feet in diameter, and rise to the height of sixty or seventy feet, free of branches, with a strong clear grain, full of turpentine; and though somewhat more dense and heavy than those used in Europe, well suited for mizen-masts, topmasts, and lower yards of ships of 800 tons burthen. The difficult situation, however, of the forests must ever interfere with their produce being made extensively available. Yew-trees and pines attain great dimensions in the elevated Himalayan regions. Batten saw some on the route to the Niti Pass having a girth of twenty-seven feet. The fruit-trees comprise apple, pear, apricot, cherry, walnut, pomegranate, mulberry, peach, mango, guava, orange, lemon, citron, plantain. There are also grapes, raspberries, barberries, gooseberries, currants, strawberries, melons, and pumpkins. The churi or butter-tree, a production peculiar to the hills, bears a small edible fruit, from which a fixed oil, resembling butter, is obtained.

The zoology of Kumaon is copious and varied. Elephants are numerous in the Terai, and being now protected by the orders of government from wanton destruction, may be expected to increase so as to supply the commissariat. The tiger is a great scourge to the people of Kumaon. In the cooler season, it haunts the deep valleys and lower grounds, and in hot weather, or during the rainy season, ascends the hills, and prowls about the villages, which it occasionally enters, and carries off any living being which it may pounce upon. These animals every year destroy from 200 to 300 of the limited population of the province, sometimes causing extensive tracts to be deserted. Government pays a pound sterling for every tiger's head brought in; but the number of these animals seems to suffer no decrease.

Leopards are very numerous, and destructive to sheep, goats, and especially dogs, but do not molest human beings, except in self-defence. Bears are numerous and mischievous, devastating the crops; but unless very closely pressed, showing no disposition to attack their pursuers. For the destruction of these devastating animals, rewards are offered by government. In the snowy districts of the Himalayas, there is a large species, of variable colour, tawny in summer and nearly white in winter. The cheang, an equine quadruped frequenting the same region, though often approached and pursued, has hitherto by its cunning eluded the close examination required for a scientific description. The best account of the animal is probably that given by Weller:—"I saw, what with great difficulty and the aid of my telescope, I made out to be a wild horse (cheang); probably 'wild ass' is the more correct term. This animal seemed about twelve hands high, short and compact, and more like a mule, particularly about the tail, which, with the mane and face, was black, the legs and belly white, and the sides and back reddish brown. When feeding, the animal looked much like a small punchy native horse, but when alarmed, he drew the head up so erect, that he looked far more like a burral or neauth, in which his colour assisted. The head was rather large, and the forehead broad. This animal proved the most cunning I had ever met, though they are said to be easily approached when in herds. He never stopped in a hollow, but always trotted briskly through to the next eminence, whence he could have a clear view of all around. There, if I ran or walked up quickly, he would remain till I came within 150 or 200 yards." The spotted axis (*Cervus axis*), a species of elk, frequents the higher and more difficult tracts of the mountains.

In the lower, warmer, and more fertile parts, there are annually two successive crops—the rubbee, or that sown in autumn and cut in spring, and the kurreef, or that sown in spring and cut in autumn. The rubbee consists principally of wheat, barley, oats, millet, peas, beans, vetch, tares, chickpeas, pigeon-peas, and lentils; tobacco, safflower, and succory; flax, and plants allied to mustard, and rape to serve as oilseeds; carrot, coriander, cumin, and the esculent vegetables of Europe. The kurreef crop consists of rice, cotton, indigo, maize, Holcus sorghum or Indian millet, joar (*Sorghum vulgare*), koda (*Paspalum scorbiculatum*), various tropical legumes, cucumbers and gourds, sesamum for oil, the egg-plant, ginger, turmeric, and sweet potato. The sugarcane is cultivated to a limited extent. The cultivation of hemp is considerable, and the quality excellent. It is raised both for an intoxicating drug and for the fibre, which is either exported to the plain or manufactured at home into cordage or coarse cloth. The common potato has of late years been introduced by Europeans, and is cultivated to considerable extent. The cultivation of the tea-

shrub and preparation of the leaf have been introduced into Kumaon by the orders of government. The shrubs have thriven well, and some samples of the tea have been by good judges declared very fine. Jameson observes, "The experiment, as far as it has been tried, has fully realized the most sanguine expectations." On the authority of the Chamber of Commerce of Calcutta, the tea has been pronounced "a very good marketable article;" by experienced tea-brokers in London, "fine-flavoured and strong, and equal to the superior black tea sent as presents, and better for the most part than the China tea imported for mercantile purposes." Mr. Commissioner Lushington sent a small quantity of the tea across the British frontier to the authorities in Tibet, by whom it was declared to be of "superior quality; and many inquiries were made as to the locality of the plant." The green-tea plant is also reported to thrive well. Indeed, the best hopes are entertained of establishing the tea-plant as an article of profitable cultivation; and the merit of this important accession to the resources of the country is attributable to the earnest and truly valuable efforts of Dr. Royle, by whom the cultivation was first suggested. The object has been pursued with great zeal and judgment by Dr. Jameson, under whose care the plantations will probably be extended over a wide extent of country.

As several frequented routes from Hiundes or Chinese Tartary traverse Kumaon, the traffic carried on by its inhabitants is considerable. The most westerly route proceeds up the course of the Aluknunda and its tributary the Bishenganga, by Joshimath, Badrinath, and Mana. East of that, a route proceeds up the Douli river, by the village of Niti, and debouches by the Niti Pass. Then in succession eastwards, are the routes proceeding respectively by the course of the river Gorigunga, and through the Uta Dhura Pass; 2nd, up the course of the Eastern Douli, and through the Dharma Pass; 3rd, up the course of the Eastern Kalee, and debouching by the Byanase Pass. There are likewise some important routes from the plains, penetrating into the interior of the country, and terminating there without any continuation to Hiundes; such is that by Srinagar and up the course of the Mandakini to Kedarnath; the British military route to Lohugut and Petoragurh, and that to Almora and Hawilbagh. The Bhotias, or natives of the mahala or hamlets situate between the culminating ridge of the Himalaya and the frontier of Hiundes, have exclusively the right to traffic with it, the Chinese authorities allowing them the privilege, in consequence of paying tribute and allegiance as well to that state as to the British. Thus, the Bhotias take from the traders of the south the merchandise destined to be transmitted from that quarter to Hiundes, and, receiving the produce of the great tableland, make their returns in it. The merchandise of the south consists of grain of various

kinds, coarse sugar, sugarcandy, spices, dyes, broad-cloths, cottons, tobacco, hardware, pearls, coral, glass beads, glassware, cabinetware, wooden vessels, and timber. The returns from Hiundes are goat's-wool for the manufacture of shawls, sheep's-wool, culinary salt, borax, gold-dust, coarse shawls, coarse silks, chauris or tails of yaks, gunts or Tartarian ponies, tanned leather, resembling the Russian, dried fruit, saffron, and some other drugs. Besides this transit-trade, there is a direct one carried on with the plains, by dealers of the district of Kumaon, who are remarkable for intelligence and enterprise. One of this class, with an investment composed of Tartarian goods, acquired by his own capital,—iron, copper, wax, ginger, turmeric, and other hill roots, and drugs, sets out for the plains, often proceeding to Furruckabad or Lucknow, and bringing back cottons, broad-cloths, sugar, manufactures of Hindostan and of Britain, and other goods, which find ready market in the hills. The exports from the Terrai to the south are considerable, consisting principally of timber, ebony, bamboos, firewood, wooden vessels, charcoal, gum, gumlac, ghee or clarified butter, oil, grain, pulse, oil seeds, sweet potatoes, red pepper, and grass for cordage.

The greater part of the population is probably descended from a Hindoo stock migrating from the plains at a remote period, and continually reinforced by pilgrims and other devotees, attracted by the veneration investing numerous shrines and localities in this district. At present the population is mainly divided into Brahmins, the descendants of those of that caste among the Hindoo emigrants, Rajpoots, and Doms or outcasts. These last perform all the menial offices, and exercise the trades considered of inferior character; as that of the coppersmith, blacksmith, carpenter, mason, quarrier, miner, tailor, and musician. They are, for the most part, hereditary slaves, and have been so from time immemorial. In their physical type, they differ from the Hindoo race, as they have black woolly hair, and very black complexions. The Bhotias are another race, distinct in their Tartarian aspect, and their language, which is a dialect of the Tibetan. The general language of the population of Hindoo descent is Hindge, as derived from Sanscrit, without any mixture of Persian, but rude and irregular in its inflections. Brahminism is the generally acknowledged faith; but to it is superadded a variety of local superstitions. To every mountain-peak, cave, forest, fountain, and crag is assigned, in popular belief, its presiding spirit, to which frequent offerings and propitiatory rites are paid by the neighbouring inhabitants, in small temples erected on the spot. This form of superstition is on the increase, whilst regular Brahminism is declining. The principal shrines and places of pilgrimage are Kedarnath, Badrinath, Deoprayag, at the confluence of the Bhageerettee and Aluknunda; Rudraprayag, where the latter river receives the Mundagnee; Kurna-

prayag, where it receives the Pindur; Nundaprayag, where it receives the Nandakini; and Vishnuprayag, at the confluence with the Doulee. When a marriage is contemplated, the suitor invariably pays to the nearest relative of the damsel a sum of money, the amount of which varies from twenty-five to a thousand rupees, which are disbursed in the expenses attending the ceremony and the commencement of house-keeping. Polygamy is practised, and priority of marriage establishes a right of precedence among the wives. The services of the suitor for a given number of years are sometimes accepted in liquidation of the price of the damsel, who is borne away by the servitor at the termination of the stipulated time of service. Polyandry has long been discontinued, as well as the atrocious cruelty of burning widows with the corpses of their deceased husbands. All dead bodies are, however, still consumed by fire.

The present British district of Kumaon comprises the former raj or state of that name and a large portion of the neighbouring state of Gurhwal, reserved when, on the expulsion of the Goorkhas in 1815, the western part was restored to the hereditary rajah. The reserved territory of Gurhwal and Kumaon proper have been estimated to have each an area of about 5,000 square miles. A more recent estimate gives to Kumaon proper (Gurhwal being excluded) an area of 6,962 square miles. This result was attained by a rough calculation from the parallels of latitude and longitude, and consequently the true superficial area exceeds the statement, the figures therein representing the area of the plain surface covered by the hills. The entire population of Kumaon proper has been returned at 166,755, and that of Gurhwal at 132,744, but these returns are based on very loose premises.

In the year 1379, an army sent by Feroz Toghluk, king of Delhi, overran Kumaon, and reduced 23,000 of the inhabitants to slavery. Timur, in the early part of the fifteenth century, made a transient incursion into the south of Kumaon, and some authorities state that the descendants of certain of his troops located there may still be met with in the Bhotiah district Dharma. According to Buchanan, the family of the last rajah of Kumaon was descended from an adventurer, a native of Jhansi, a village on the left bank of the Ganges, opposite Allahabad, who, about 350 years ago, succeeded in seizing on the sovereignty of the country. Prinsep states that "neither Akbar, nor any of his descendants on the throne of Delhi, made any attempt to add the tract of hills to the Mogul empire;" but Buchanan relates that Akbar sent into Kumaon an invading army, which besieged Almora, but was defeated by the rajah Rudra, who, pursuing his success, advanced into the plain, and made himself master of a considerable tract along the base of the mountains. This was subsequently granted to him in jaghire by Akbar, who treated him with great

favour, and, among other privileges, empowered him to strike money. It is difficult to ascertain the precise date of the conquest of Kumaon by the Goorkhas. The following statement is perhaps the most explicit that exists on the point. "So far back as the year 1791, after reducing Kumaon and its dependencies, the Gurchalis made an attempt to subdue the country of Gurwal." In the course of the war which, in 1814, broke out between the Goorkhas and the East-India Company, a British force under Colonel Nicholls penetrated into Kumaon, in the beginning of April, 1815, and, after a series of skilful manoeuvres and fierce skirmishes, invested the town of Almora, which, being surrendered by the Goorkha commander, his troops, under a convention, evacuated the whole district of Kumaon, and marched home across the river Kales. Several competitors set up hereditary claims to the liberated raj, but the government put an end to disputes by constituting it an integral part of the British dominions, under the title of the province or district of Kumaon, having embodied with the raj of that name the reserved portion of Gurhwal, or that part east of the river Alaknunda and Mandakini.

KUMARARA.—A town in the British district of Pooalia, lieutenant-gov. of Bengal, 46 miles W. by S. of Midnapoor. Lat. $22^{\circ} 17'$, long. $86^{\circ} 41'$.

KUMAULPOOR.—A town in Guzerat, or the dominions of the Guicowar, situate 80 miles W. from Baroda, and 77 miles E. by N. from Rajkote. Lat. $22^{\circ} 28'$, long. 72° .

KUMBACHEN, a river of Nepal, rising on the south western face of the great peak of the Himalayas known by the name of Kang-chang, in lat. $27^{\circ} 40'$, long. $87^{\circ} 55'$. It flows along the north-western side of a spur of the above-named peak for thirty miles, to lat. $27^{\circ} 27'$, long. $87^{\circ} 32'$, the point of its junction with the Tambur river.

KUMBOOA, in Sindé, a village on the route from Shikarpoor to Larkhana, and eight miles S.W. of the former place. It is situate nine miles from the right bank of the Indus, and in that scantily-cultivated tract where the fertile alluvial soil adjoining the river degenerates into the *Pat* or desert of Shikarpoor. Lat. $27^{\circ} 54'$, long. $68^{\circ} 34'$.

KUMBUR.—A town of Sindé, in the British district of Shikarpoor, presidency of Bombay, 54 miles S.W. by W. of Shikarpoor. Lat. $27^{\circ} 33'$, long. $67^{\circ} 58'$.

KUMEREE, in the British district of Kumaon, lieutenant-gov. of the N.W. Provinces, a village on the route up the course of the river Sarju, from Almorah fort to the Unta Dhura Pass. It is situate on the right bank of the Sarju, 35 miles N.W. of Almorah fort. Lat. $30^{\circ} 2'$, long. $79^{\circ} 58'$.

KUMHARPANEE.—A town of the Decan, in the territory of Nagpoor or Berar, situate 40 miles N. from Nagpoor, and 77 miles E. from Baitool. Lat. $21^{\circ} 43'$, long. $79^{\circ} 9'$.

KUMLA RIVER.—The name given to the Gogaree in the upper part of its course.—See GOGAREE.

KUMLA GURH, or **THE FOOL'S FORTRESS**, in the north-east of the Punjab, and near the left or south bank of the Beas, a range of forts, constructed partly out of the natural rock and partly of masonry. They are built on several sandstone peaks, which extend, north and south, a distance of about three miles. The principal stronghold among them is an isolated rock, with precipitous sides, rising about 150 feet above the other peaks, about 1,500 feet above the Beas, and having an elevation of 3,000 feet above the sea. This range of forts is situated on the summit of a mountain about eight miles long and five broad, surrounded by deep ravines, with precipitous sides, 80, 100, or 150 feet high. These strongholds belong to the ruler of Mundi. Sansar Chand, the powerful rajah of Tira, and once the rival of Runjeet Singh, attacked them in vain; and they were considered by the people of the country to be impregnable, until taken by the Sikhs under Ventura. Kumla Gurh is in lat. $31^{\circ} 48'$, long. $76^{\circ} 43'$.

KUMLANOO.—A town in Hyderabad, or dominions of the Nizam, situate 62 miles S. by W. from Hyderabad, and 50 miles N.N.E. from Kurnool. Lat. $16^{\circ} 29'$, long. $78^{\circ} 22'$.

KUMMERGUNJE, in the British district of Bhagulpoor, lieutenant-gov. of Bengal, a small town on the route from Bhagulpoor to Moon-gheer, 20 miles W. of former, 15 S.E. of latter. Lat. $25^{\circ} 13'$, long. $86^{\circ} 40'$.

KUMMUMMETT, in Hyderabad, or territory of the Nizam, a town on the left bank of Moonyair river, a considerable tributary of the Kistna. It is the principal place of an extensive zemindary or nominal raj held under the Nizam, but with so much latitude, that it may be regarded rather in the light of a tributary state. The district is also often called the raj of Paloon Shah, from a considerable town with fort which it contains. Distance from the city of Hyderabad, E., 110 miles. Lat. $17^{\circ} 15'$, long. $80^{\circ} 13'$.

KUMMUR, in the Daman division of the Punjab, a town situate seventeen miles from the right bank of the Indus, 87 miles S.S.W. of the town of Peshawur. Lat. $32^{\circ} 53'$, long. $71^{\circ} 3'$.

KUMORA DUMORA, in the jaghire of Rampoor, lieutenant-gov. of the N.W. Provinces, two villages adjoining each other on the route from Bareilly to the city of Rampoor, and six miles S.E. of the latter. Lat. $28^{\circ} 41'$, long. $79^{\circ} 11'$.

KUMPIL, in the British district of Furruckabad, lieutenant-gov. of the N.W. Provinces, a town on the route from Futtahgurh to Bud-daon, 26 miles N.W. of the former. Lat. $27^{\circ} 37'$, long. $79^{\circ} 21'$.

KUM—KUN.

KUMPIN.—A town in the British district of Bellary, presidency of Madras, 28 miles N.W. of Bellary. Lat. 15° 25', long. 76° 40'.

KUMROO.—See MOHNE.

KUMUR, in the Daman division of the Punjab, a town situated on the right bank of the Indus, 84 miles S. by W. of the town of Peshawur. Lat. 32° 50', long. 71° 20'.

KUMURDAH.—A town in the British district of Balasore, lieutenant-gov. of Bengal, 86 miles S.W. of Calcutta. Lat. 21° 45', long. 87° 25'.

KUNADEEA.—A town in the native state of Indore, or territory of Holkar, situate 80 miles W. from Bhopal, and 110 miles W.N.W. from Hoosungabad. Lat. 23° 21', long. 76° 10'.

KUNAPOOR, in the British province of Sagur and Nurbudda, lieutenant-gov. of the N.W. Provinces, a town on the route from Baitool to Omraoutie, 40 miles S. of the former. Lat. 21° 17', long. 78°.

KUNCHABAREE.—A town in the British district of Purneah, lieutenant-gov. of Bengal, 65 miles N.E. by E. of Purneah. Lat. 26° 23', long. 88° 21'.

KUNCHUNPOOR, or **CHANDPOOR,** in the British district of Cawnpore, lieutenant-gov. of the N.W. Provinces, a village on the route from the cantonment of Cawnpore to that of Calpee, and 29 miles N.E. of the latter. Lat. 26° 24', long. 80° 6'.

KUNCHUNPOOR, in the British district of Sohagpoor, territory of Saugor and Nerbudda, lieutenant-gov. of the N.W. Provinces, a town on the route from Sohagpoor to Nagpoor, 80 miles S. of the former. Lat. 22° 53', long. 81° 26'.

KUNDA, in native Gurhwal, a village on the left bank of the Jumna, nearly opposite the confluence of its tributary the Budiar. It is situate on a mountain, rising from the base of which is a spring of fine water, from a source choked with lilies. This is by the superstitious Hindoos supposed to be the Ganges, which, at the prayer of an ascetic, made its way beneath a vast mountain intervening between this spot and Gangotri, and thus saved the devotee from the laborious journey which he daily took to bathe in the sacred stream. The name in Sanscrit signifies "drinking-cup," and, according to Hindu mythology, the Ganges takes its course through the Kunda or drinking-cup of Brahma. The village is in lat. 30° 49', long. 78° 19'.

KUNDAHAR, in Hyderabad, or territory of the Nizam, a town 135 miles north-west of the city of Hyderabad. Lat. 18° 52', long. 77° 17'.

KUNDAL.—A town in the British district of Bulloah, lieutenant-gov. of Bengal, 40 miles N.E. of Bulloah. Lat. 23° 11', long. 91° 27'.

KUNDALA.—A town in the British dis-

trict of Poonah, presidency of Bombay, 37 miles E.S.E. of Bombay. Lat. 18° 48', long. 73° 26'.

KUNDAVELLEE.—A town in the British district of Rajahmundry, presidency of Madras, 20 miles S. of Rajahmundry. Lat. 16° 42', long. 81° 50'.

KUNDERY.—A town in the native state of Sirgoojah, on the south-west frontier of Bengal, situate 41 miles N.E. from Sirgoojah, and 71 miles W. from Lohadugga. Lat. 23° 28', long. 83° 40'.

KUNDIAPURRA.—A tract inhabited by one of the independent hill tribes of Orissa. Its centre is in lat. 20° 17', long. 85° 17'.

KUNDIE.—A town of the Deccan, in the territory of Nagpoor or Berar, situate 152 miles E. by N. from Nagpoor, and 86 miles S.S.E. from Ramgurrh. Lat. 21° 39', long. 81° 26'.

KUNDROWN.—A town of Bundelcund, in the British province of Jhansee, situate three miles from the right bank of the Mohwur river, and 22 miles W. by N. from Jhansee. Lat. 25° 32', long. 78° 20'.

KUNEENUH.—A village in the jaghire of Jajhur, lieutenant-gov. of the N.W. Provinces. Lat. 28° 18', long. 76° 22'.

KUNERAH, in the British district of Muttra, lieutenant-gov. of the N.W. Provinces, a village on the route from the city of Agra to Bareilly, and 21 miles N.E. of the former. Lat. 27° 23', long. 78° 15'.

KUNGRA, in the British district of Goruckpoor, lieutenant-gov. of the N.W. Provinces, a small lake half a mile in length and 200 yards wide, with high banks, and water free from weeds. It appears to have been a deep part of the channel of a river, the current of which has now taken a different course. This part of the country is yearly extensively flooded by the periodical rains, and, as the waters subside, vast quantities of fish find their way to Kungra, and are pursued thither by many crocodiles. The natives believe it to be unfathomable, and that it was excavated by some god; but Buchanan found the depth of the spot which he sounded to be sixty-two feet. Lat. 26° 35', long. 83° 22'.

KUNGULL.—A town in Hyderabad, or dominions of the Nizam, situate on the right bank of one of the branches of the Kistnah, and 58 miles S.E. by E. from Hyderabad. Lat. 16° 56', long. 79° 18'.

KUNGURH.—A town of Bundelcund, in the native state of Punnah, situate 27 miles E. from Punnah, and 47 miles N.W. by W. from Rewah. Lat. 24° 45', long. 80° 41'.

KUNHER.—A river rising in Bengal, on the southern frontier of the British district of Sirgoojah, towards the state of Odeipoor, and about lat. 23° 15', long. 83° 38'. It has a direction generally northerly, but slightly inclined to west, and falls into the river Son on the south or right side, in lat. 24° 29', long. 83° 10', after a total length of course of about

KUN.

130 miles, forming for the greater part of the distance the boundary between Palamow and the district of Sirgooja.

KUNJUR, or **KINJORE**, in *Sinde*, a lake, or, as it is vernacularly called, a *dund*—an extensive and permanent piece of stagnant water, left by the Indus after it has retired to the channel to which it is confined in the season when it is lowest. The *dund* of Kinjore is about three miles westward of the channel, and is a beautiful expanse of water. It is one of three, which extend north and south about twenty miles, and swarm with fine fish, caught with much skill and in great abundance by the fishing population on the banks, and forming their principal subsistence. Lat. $24^{\circ} 55'$, long. $68^{\circ} 8'$.

KUNJPOORA, in *Sirhind*, a town close to the south-eastern frontier, in the space insulated between the canal of Feroz Shah and the Jumna, from the right bank of which it is distant two miles. It is the principal place of a small district, the annual revenues of which, estimated at 5,000*l.* sterling, are divided between two *sirdars*, in the proportion of two-thirds to one and a third to the other; but these chiefs have no independent authority. At the battle of Kurnal, fought in 1739, between the army of Nadir Shah, of Persia, and that of Muhammad Shah, of Delhi, a division of 20,000 Persian matchlockmen and musketeers, concealed among the houses and orchards of Kunjpoora, fell on the flank of the enemy during the height of the engagement, and routed them with dreadful carnage. Kunjpoora is in lat. $29^{\circ} 43'$, long. $77^{\circ} 8'$.

KUNKAS.—A river rising on the south-western slope of the Garrow Hills, in lat. $25^{\circ} 23'$, long. $89^{\circ} 58'$, and, flowing in a south-easterly direction for 130 miles, through the British district of Mymensing, falls into the Barak river in lat. $24^{\circ} 16'$, long. $90^{\circ} 56'$.

KUNKEEPOOR, in the British district of Mynpooree, *lieut.-gov.* of the N.W. Provinces, a village on the route from the cantonment of Allygurh to that of Mynpooree, and 15 miles N.W. of the latter. Lat. $27^{\circ} 21'$, long. $78^{\circ} 55'$.

KUNKHUL, in the British district of Saharunpoor, a large town on the route from Saharunpoor to Hurdwar, and three miles S.W. of the latter place. It is situate on the right bank of the Ganges, in a delightful country, and embosomed in trees, crowded with monkeys, regarded by the Hindoos with superstitious favour, and hence so tame, that they intrude into the dwelling-houses and shops, and snatch away any provisions within reach. The town consists principally of a main street, running parallel to the river; and consisting of houses substantially built of brick and mortar, plastered over, and painted in fresco with grotesque and ill-executed groups of men and animals. Those fantastic residences belong to rich Hindoos, from all parts of Hindoostan, it being considered a mark of

wealth, as well as of piety, to have a house at this town, which, as well as Hurdwar, is a place of pilgrimage; and in consequence, the holy stream of the Ganges is rendered accessible by numerous ghats, or stairs of cut stone. There are also numerous long, low *serais*, built of brick, for the accommodation of pilgrims, who lodge there in irregular crowds, interspersed with their cattle, brought to be blessed at the sacred stream. The streets, filthy in the extreme, are so deep with black mud, that it is difficult to make way through them. Kunkhul was a secondary station in the great trigonometrical survey of the Himalayas. Elevation above the sea 1,032 feet. The head of the Ganges Canal is situate a little to the north of the town. Lat. $29^{\circ} 55'$, long. $78^{\circ} 12'$.

KUNKUNWAREE.—A town in the British district of Belgaum, presidency of Bombay, 44 miles N.E. of Belgaum. Lat. $16^{\circ} 21'$, long. $74^{\circ} 58'$.

KUNNAUGOODY.—A town in the British district of Madura, presidency of Madras, 58 miles E. of Madura. Lat. $9^{\circ} 56'$, long. $79^{\circ} 1'$.

KUNNELJRA.—A town in the native state of Cutch, situate 10 miles N. from Bhooj, and four miles S. of the Great Western Runn. Lat. $23^{\circ} 21'$, long. $69^{\circ} 46'$.

KUNNIGHERRY.—A town in Hyderabad, or dominions of the Nizam, situate 140 miles E. from Hyderabad, and 57 miles N.W. from Ellore. Lat. $17^{\circ} 21'$, long. $80^{\circ} 39'$.

KUNNIGHERRY.—A town in the British district of Nellore, presidency of Madras, 37 miles W. by S. of Ongole. Lat. $15^{\circ} 25'$, long. $79^{\circ} 33'$.

KUNNOJ, or **KUNNOUJ**, the principal place of the *pergunnah* of the same name, in the British district of Furruckabad, a decayed town, situate on the Kalee Nuddes, a river which falls into the Ganges about three miles below. The Ganges, represented to have formerly touched the town, now flows two miles east of it. The eastern part of the present site is situate on a gentle eminence, the western in the plain. At present it is little more than an expanse of ruins, as described by an eye-witness:—"For many miles before you enter the present town, you travel through jungles interspersed with small fields of tobacco, that consist of brickdust and mortar. To remove all doubt that the rubbish consists of the remains of a town, walls and broken gateways here and there raise their heads, in defiance of time. The greatest part of the standing buildings are ruinous, uninhabited, rent, and tending to decay. The few poor people now in the place accommodate themselves under mud huts buttressed up against the old walls. Not a great many buildings are entire; whole mountains of unsightly ruins meet your eye in every direction, upon a space of ground much larger than the site of London."

KUN.

The principal street is described by Tiedemann as half a mile long, straight, of moderate breadth, with some brick-built houses; the whole length of the present town being above a mile, the breadth half that measure. The ruinous fort, situate on a small hill of slight elevation, rather steep on the west side, but on the others low and easily accessible, has a brick rampart, but is little worthy of notice, and appears, it is said, of no great antiquity. The buildings at present (or lately) most remarkable, are two handsome Mahomedan mausoleums. Some portions of this vast scene of ruins, in themselves not very striking, but highly interesting from their historical associations, are represented finely by Daniell. Though now thus fallen, Kunnaj was formerly one of the chief of Indian cities, as it was also probably one of the most ancient; Elphinstone intimating, that in this respect it ranked next to Ayodha or Oude, which he considers the most early in Hindostan. It is not, however, mentioned in the celebrated ancient poem of the Mahabharat, the era of which is by Elphinstone conjectured to be about 1400 B.C. Hamilton (France), however, considers the town to have existed before the first introduction of Brahminism from the west. So remote is its antiquity, that some relics of its language have baffled the multifarious acquisitions, acuteness, and perseverance of Mr. Prinsep in his attempts to decipher them; "the characters in which their legends are given being wholly unknown." In its palmy state, according to a learned writer of easy belief, "the circumvallation covered a space of more than thirty miles," and its sovereign led forth an "army which in numbers might compete with the most potent which, in ancient or modern times, was ever sent into the field. Eighty thousand men in armour, 30,000 horse covered with quilted mail, 300,000 infantry, and of bowmen and battle-axes 300,000, besides a cloud of elephants bearing warriors." Even Ferishta, an author of more sober cast of mind, states that Kunnaj "contained 30,000 shops for the sale of paca [betel-leaf], and 60,000 families of public dancers and singers." The era of this prosperous condition he states to be in the reign of Khosrow Purves, king of Persia, about the year 590, shortly after which period, North-western India is represented as divided into the following states:—1. Kunnaj; 2. Meerut; 3. Mahawan; 4. Lahore. Long afterwards, and a century before the invasion by Mahmood of Ghazni, Kunnaj continued to be the chief city of India. Mahmood took it in 1018, but, appeared by the ready submission of the rajah, left it un injured, after a stay of a few days. More decisive was the attack of Shahabuddin Mohammed, sovereign of Ghoor, who, in 1194, defeated, near Bhawa, Jye-Chand Ray, king of Kunnaj, and overthrew that monarchy. The remaining history of the place records only a succession of disasters. In 1340, Mohammed Taghlak, the frantic tyrant of Delhi, "made an excursion towards Kunnaj,

and put to death the inhabitants of that city and the neighbourhood for many miles round." It was in the early part of the sixteenth century the subject of fierce contention between Baber and his Patan foes, but ultimately fell into the hands of the former, who here, in 1528, bridged the Ganges, and crossed it at the head of his army invading Oude. Here, in 1540, Humayon, son and successor of Baber, received a decisive defeat from Sher Shah, his Afghan rival, and was in consequence compelled to fly from Hindostan. At present, this once celebrated place contains only 16,000 inhabitants, living in great indigence. Distant S.E. from Futteh-gurh 30 miles, N.W. from Cawnpore 52. Elevation above the sea 494 feet. Lat. 27° 3', long. 79° 59'.

KUNNOOTA.—A town in the Rajpoot state of Jeypoor, situate 11 miles E.S.E. from Jeypoor, and 89 miles E.N.E. from Ajmeer. Lat. 26° 50', long. 76° 3'.

KUNNOWHEE, in the British district of Allygurh, lieut.-gov. of the N.W. Provinces, a village on the route from the cantonment of Allygurh to that of Delhi, and 13 miles N.W. of the former. Here is a jhil or shallow lake. Lat. 28° 2', long. 78° 2'.

KUNNUR.—A town in Hyderabad, or dominions of the Nizam, situate 51 miles W.N.W. from Jaulnah, and 53 miles S.E. by E. from Malligaum. Lat. 20° 10', long. 75° 18'.

KUNOWEE, in Sirhind, a village on the route from Hansee to Loodiana, and 56 miles S. of the latter town. It is situate in a level, fertile, well-cultivated country. Distant N.W. from Calcutta 1,056 miles. Lat. 30° 11', long. 75° 56'.

KUNPOOR, in the British district of Muttra, lieut.-gov. of the N.W. Provinces, a village on the route from the cantonment of Allygurh to that of Etawah, and 31 miles S.E. of the former. Lat. 27° 28', long. 76° 19'.

KUNRAJA.—A town on the S.W. frontier of Bengal, in the recently lapsed state of Odeipoor, 12 miles N.E. from Odeipoor, and 96 miles N.N.W. from Sumbulpoor. Lat. 22° 47', long. 83° 31'.

KUNSA, in the district of Bainswara, territory of Oude, a town six miles N.E. of the left bank of the Ganges, 30 S.W. of Lucknow. Butter estimates the population at 7,000, including fifty Mussulmans. Lat. 26° 22', long. 80° 40'.

KUNTHOOA, in the British district of Allahabad, lieut.-gov. of the N.W. Provinces, a small town on the right bank of the Ganges, 865 miles by way of the river from Calcutta, 34 miles S.E. by land from the town of Futteh-pore. Lat. 25° 47', long. 81° 25'.

KUNTIL, in the British district of Mirzapoor, lieut.-gov. of the N.W. Provinces, a town on the route from Mirzapoor to Allahabad, three miles W. by N. of the former. This place is the residence of the rajah of the same

KUN—KUR.

name. He is considered the head of the Rajpoot tribe of Guburwar, a numerous and powerful clan, and possessed of great local influence and consideration. Lat. $25^{\circ} 7'$, long. $82^{\circ} 35'$.

KUNTOOL.—A town of Orissa, in the Cuttack mahal of Amtargh, situate 16 miles W.N.W. from Cuttack, and 88 miles N.N.E. from Ganjam. Lat. $20^{\circ} 33'$, long. $85^{\circ} 41'$.

KUNU, in Bessahir, a village of Koomawur, near the right bank of the river Tidung, here in summer furiously rapid, and sweeping along, suspended in its current, a great deal of fine white sand. The noise of large stones hurried along by the torrent is incessant, and, mingled with the roar of the water, produces a sublime effect. The stream is here crossed by a sanga or rude wooden bridge, fifteen feet long. Elevation above the sea 11,727 feet. Lat. $31^{\circ} 28'$, long. $78^{\circ} 39'$.

KUNWARA.—A town in the Rajpoot state of Jeypoor, situate 81 miles S. from Jeypoor, and 86 miles S.E. by E. from Ajmeer. Lat. $25^{\circ} 46'$, long. $75^{\circ} 50'$.

KUNWYE LARKANI.—A town in the Rajpoot state of Jodhpoor, situate 124 miles N.E. from Jodhpoor, and 68 miles N. from Ajmeer. Lat. $27^{\circ} 27'$, long. $74^{\circ} 39'$.

KUNY KAIRY.—A town in Hyderabad, or dominions of the Nizam, situate six miles from the left bank of the Beemah river, and 99 miles S.W. by W. from Hyderabad. Lat. $16^{\circ} 36'$, long. $77^{\circ} 19'$.

KUPASDEE, in the British territory of Sagur and Nurbudda, lieut.-gov. of the N.W. Provinces, a town on the route from Hoomagabad to Boorhanpoor, 46 miles S.W. by S. of the former. Lat. $22^{\circ} 11'$, long. $77^{\circ} 20'$.

KUPELA SUNGUM.—A town in the British district of Belgaum, presidency of Bombay, 105 miles E. by N. of Belgaum. Lat. $16^{\circ} 11'$, long. $76^{\circ} 8'$.

KUPPASUN.—A town in the Rajpoot state of Oodeypoor, 45 miles N.E. by E. from Oodeypoor, and 43 miles N.W. from Neemuch. Lat. $24^{\circ} 53'$, long. $74^{\circ} 25'$.

KUPPELVOY.—A town in Hyderabad, or dominions of the Nizam, situate on the right bank of the Moonyair river, and 87 miles E. by N. from Hyderabad. Lat. $17^{\circ} 30'$, long. $79^{\circ} 50'$.

KUPPILL.—A town in the British district Vizagapatnam, presidency of Madras, 49 miles N.E. of Vizagapatnam. Lat. $18^{\circ} 10'$, long. $83^{\circ} 53'$.

KUPPURWUNJ, in the British district of Kaira, presidency of Bombay, a town situate on a tributary of the river Sabarmuttee. It is fortified, and has some trade and a few manufactures. Population about 13,000. Distance from the city of Ahmedabad, E., 30 miles; Kaira, N.E., 32. Lat. $23^{\circ} 2'$, long. $73^{\circ} 9'$.

KUPSA, in the British district Banda, lieut.-gov. of the N.W. Provinces, a town on

the route from the town of Banda to Calpee, 11 miles N.W. of the former. It has a bazar, and is well supplied with water. Lat. $25^{\circ} 34'$, long. $80^{\circ} 17'$.

KUPURWAR, in the British district of Goruckpore, lieut.-gov. of the N.W. Provinces, a small town on the left bank of the Raptree, four miles above its confluence with the Ghogra. According to Buchanan, it contains 100 houses; an amount which would assign it a population of about 600 persons. Distant S.E. from Goruckpore cantonment 32 miles. Lat. $26^{\circ} 15'$, long. $83^{\circ} 43'$.

KURAI, in the British territory of Sagur and Nurbudda, lieut.-gov. of the N.W. Provinces, a town on the route from Sagur to Nussacerabad, 31 miles W.N.W. of the former. Lat. $24^{\circ} 1'$, long. $78^{\circ} 22'$.

KURAKUT, a town on the route from Ghazeeppore cantonment to that of Jeempore, 40 miles N.W. of the former, 18 S.E. of the latter. Lat. $25^{\circ} 36'$, long. 83° .

KURALEE, in the British district of Allahabad, lieut.-gov. of the N.W. Provinces, a small town on the route from the cantonment of Allahabad to Banda, and 21 miles W. of the former. It has a bazar. Lat. $25^{\circ} 27'$, long. $81^{\circ} 30'$.

KURAMBALORE.—A town in the British district of Trichinopoly, presidency of Madras, 31 miles N. by E. of Trichinopoly. Lat. $11^{\circ} 15'$, long. $78^{\circ} 51'$.

KURAOO.—A town in the Rajpoot state of Jodhpoor, 68 miles W.N.W. from Jodhpoor, and 74 miles E. by S. from Jessulmeer. Lat. $26^{\circ} 39'$, long. $72^{\circ} 6'$.

KURARA.—A town of Bundekund, in the British province of Jhansce, situate on the right bank of the Mohwur river, and 28 miles W. from Jhansce. Lat. $25^{\circ} 28'$, long. $78^{\circ} 13'$.

KURATTEEA, or **CURATTEEA.**—An offset of the Attree river, quitting the parent stream in lat. $26^{\circ} 4'$, long. $85^{\circ} 41'$. Flowing in a south-easterly direction for eighty miles, it forms the boundary between the British districts Rungpore and Dinajpoore. Thenceforward, traversing for 105 miles the districts of Bogra and Patna, it falls into the Koraie river, in lat. $23^{\circ} 58'$, long. $85^{\circ} 45'$, a few miles before the junction of that river with the Ganges.

KURAYA, in the territory of Gwalior, or possessions of Scindia's family, a town on the Nua, a small feeder of the river Sindh, on the route from Gwalior fort to Narwar, 24 miles S. of the former, 18 N. of the latter. Lat. $25^{\circ} 54'$, long. 78° .

KURCHOLKEE, in the British district of Moradabad, lieut.-gov. of the N.W. Provinces, a village on the route from Allypore to Moradabad, and 44 miles S.W. of the latter. Lat. $28^{\circ} 30'$, long. $78^{\circ} 33'$.

KURCUMBAD.—A town of the Deccan, in the territory of Nagpoor or Berar, situate

KUR.

13 miles E. of the left bank of the Hudad river, and 101 miles N.W. from Sambulpoor. Lat. 22° 21', long. 82° 48'.

KURDA.—See **KURDLAH**.

KURDAWAD.—A town in the native state of Indore, or territory of Holkar, situate 144 miles E. from Ahmedabad, and 101 miles S. from Neemuch. Lat. 23°, long. 74° 50'.

KURDER.—A town in the British district of Tannah, presidency of Bombay, 57 miles N.E. of Bombay. Lat. 19° 36', long. 73° 26'.

KURDEH, in the British district of Goruckpoor, lieutenant-gov. of the N.W. Provinces, a town on the route from Goruckpoor to Khatmandoc, 45 miles N.E. of the former. Lat. 27° 6', long. 83° 55'.

KURDLAH.—A town in the British district of Ahmednuggur, presidency of Bombay, situate 61 miles S.E. by E. of Ahmednuggur. In 1795 an engagement took place between the Mahrattas and the Nizam, near this place, to which the latter retreated, and being completely hemmed in by the enemy, was constrained to accede to an ignominious treaty. Lat. 18° 40', long. 75° 34'.

KURGOON, in the territory of Indore, or possessions of Holkar's family, a decayed town in the tract of Nimaur, of the southern part of which it was the capital. "It is surrounded by a wall, commenced with stone, and carelessly finished with mud;" and has a small citadel, the residence of the amakdar, or officer of the district. It was nearly destroyed during the Mahratta wars, in the early part of the present century, the number of houses being reduced from 5,000 to 800, scattered amongst heaps of ruins. Distant S. from Indore 60 miles, S. from Mow 49. Lat. 21° 50', long. 75° 45'.

KURHUL, in the British district of Mynpooree, lieutenant-gov. of the N.W. Provinces, a town on the route from Etawah to Mynpooree, 17 miles S. by W. of the latter. Lat. 27°, long. 79°.

KURHUS, in the British district of Panceput, lieutenant-gov. of the N.W. Provinces, a village on the route from the city of Delhi to Kurnal, and 31 miles S.E. of the latter. Lat. 29° 16', long. 77° 4'.

KURIETA, in the British district of Agra, a village on the route from the city of Agra to Mynpooree, and 30 miles E. of the former. Lat. 27° 7', long. 78° 31'.

KURINGA, in British district Banda, lieutenant-gov. of the N.W. Provinces, a town 25 miles E. of the town of Banda, 72 W. of Allahabad. Lat. 25° 30', long. 80° 46'.

KURKOWDA, or **GHURGOUDUH,** in the British district of Meerut, lieutenant-gov. of the N.W. Provinces, a village with a small bazar on the route from Allypore to the town of Meerut, and 11 miles S. of the latter. Lat. 28° 50', long. 77° 47'.

KURJUMB.—A town in the British dis-

trict of Sholapoor, presidency of Bombay, 41 miles W.N.W. of Sholapoor. Lat. 17° 51', long. 75° 22'.

KURKUNNEE.—A town in the Rajpoot state of Jodhpoor, 110 miles E.N.E. from Jodhpoor, and 20 miles S. by W. from Ajmeer. Lat. 26° 45', long. 74° 48'.

KURMODA.—A town in one of the recently sequestered districts of Hyderabad, or dominions of the Nizam, situate 52 miles W. by S. of Ellichpoor. Lat. 21° 6', long. 76° 47'.

KURMPOOR, in Sind, a village on the route from Sehwan to Larkhana, and three miles N. of the former place. It is situate half a mile from the right bank of a considerable offset of the Indus, and near the south-eastern edge of a large *desad*, or piece of stagnant water. The surrounding country is low, level, and fertile. The road in this part of the route is in general good. Lat. 26° 25', long. 67° 56'.

KURMULLA.—A town in the British district of Sholapoor, presidency of Bombay, 69 miles N.W. of Sholapoor. Lat. 18° 25', long. 75° 15'.

KURNAL, in the British district of Paniput, lieutenant-gov. of the N.W. Provinces, a town on the route from the city of Delhi to Ludiana, and 78 miles N. of the former, situate on the right or western bank of the Delhi Canal, about fifteen miles above the divergence of the canal of Feroz Shah, and surrounded by a ruinous wall. Jacquemont describes it as "in the interior an infamous sink, a heap of every sort of uncleanness; amongst heaps of dung, brick-rubbish, and carcasses of beasts, are winding paths, scarcely passable for horses, and having here and there a few miserable huts. I have seen nothing so bad in India, and it is fair to mention, that amongst the natives its filth is proverbial." It has, however, a handsome mosque overtopping the wall. North of the town, and adjoining it, is a cantonment of British troops. The population of the town is returned at 20,178 inhabitants. Here, in 1739, Nadir Shah, at the head of an army, the strength of which is variously estimated, by some at 160,000, by others at 70,000 men, encountered and routed the forces of Muhammad Shah, the Timurian monarch of Delhi. Kurnal is distant 965 miles N.W. from Calcutta. Lat. 29° 41', long. 77° 3'.

KURNALLI RIVER rises in Tibet, in lat. 30° 43', long. 80° 47', and flows for seventy-five miles in a south-east direction, to the town of Angharah, on the borders of Nepal, ten miles beyond which it first turns south-west for seventy miles, and subsequently south-east for forty miles, to its junction with the Bhyrree, on the borders of Oude, through which kingdom it flows for thirty miles in a south-westerly direction, to its junction with the Gogra, in lat. 28° 17', long. 81° 5'.

KUR.

KURNOLER, in the Sinde Sagur Doab division of the Punjab, a town situated 17 miles from the left bank of the Indus, 118 miles S. of the town of Peshawur. Lat. $32^{\circ} 18'$, long. $71^{\circ} 36'$.

KURNOOL.—A British district in the presidency of Madras, bounded on the north by the rivers Toongabudra and Kistnah, separating it from the Nizam's dominions; on the east and south by the British district of Cuddapah; and on the west by that of Bellary. It extends from lat. $14^{\circ} 55'$ to $16^{\circ} 15'$, and from long. $77^{\circ} 47'$ to $79^{\circ} 15'$; is 110 miles in length from north-east to south-west, and eighty miles in breadth, and contains an area of 2,643 square miles, with a population of 273,190. The tract is not included within what are termed "the Regulation districts," power being reserved by legislative enactment of modifying, to any extent that may be deemed requisite, the introduction of the ordinary modes of revenue and judicial administration. For the preservation of peace and order, a body of irregular cavalry was raised, upon the acquisition of the province by the British. The corps maintains a high degree of efficiency, and its formation has conferred additional benefits upon the community, by affording employment, which was much wanted by persons of all classes in the country. Kurnool was visited by a tremendous storm in 1851, which occasioned vast injury to works of irrigation, and great destruction of human life. The revenue in 1843 was returned at nine lacs of rupees, or 90,000*l*.

Towards the close of the year 1838, while the British were planning the expedition for the restoration of Shah Shoojah to the throne of Cabool, information reached them that military preparations upon an extensive scale had been carried on for some time by the nawab of Kurnool. An investigation followed, the result of which left little doubt that the nawab was one of the originators of a widespread Mussulman conspiracy for the subversion of British rule in India; its development merely awaiting a fitting opportunity, which it was anticipated events in the north-west would afford. Recourse to arms became necessary. "No difficulty was experienced in obtaining possession of the capital; but the nawab, with some hundred of his followers, withdrew from the place. Lieut.-Col. Dyce, of the 34th Madras light infantry, marched with a force against them, and, after a sharp encounter, succeeded in securing the person of the nawab, as well as several other prisoners, and much property." An immense quantity of warlike stores was found in the town, the greater part having been deposited under the shelter of the zenana. No satisfactory explanation could be given for the accumulation of so vast a quantity of the *matériel* of war, or for the systematic disguise and concealment under which it had taken place; and as the obvious conclusion was, that the nawab's

proceedings were connected with plans for the subversion of the paramount power, it was justly thought that the chief had been guilty of a breach of allegiance, and his territory was annexed to the British dominions. The nawab retired to Trichinopoly, where it was remarkable that he frequently attended the service of the Missionaries' church. Upon the last occasion of such attendance, he was mortally stabbed by one of his Mahometan followers. His eldest son, Uluf Khan, received from the British government a stipend of 10,000 rupees per annum, which lapsed upon his demise in 1848. Orders have been given from home for the formation of this province into a separate zillah.

KURNOOL.—A town in the British district of Kurnool, presidency of Madras, 90 miles N.E. by E. of Bellary. The population has been computed at 20,000. Lat. $15^{\circ} 50'$, long. $78^{\circ} 5'$.

KUROD, in the British district of Surat, presidency of Bombay, a town on the left or south bank of the river Taptee, 25 miles E. of Surat. Lat. $21^{\circ} 9'$, long. $73^{\circ} 16'$.

KURONDE.—See CALAHANDY.

KURORA, in the British district of Allahabad, lieut.-gov. of the N.W. Provinces, a village on the route from the cantonment of Allahabad to Futtehpoor, and 30 miles N.W. of the former. Lat. $25^{\circ} 36'$, long. $81^{\circ} 31'$.

KUROULEE, in the British district of Agra, a town on the route from the city of Agra to Jeypore, and 15 miles W. of the former. It is a small place, situate on a low gravelly hill, and surrounded by a ruinous rampart with towers. Around are scattered a few poor gardens. Lat. $27^{\circ} 8'$, long. $77^{\circ} 51'$.

KUROUNDTHUH, a village in the British district of Rohtuk, lieut.-gov. of the N.W. Provinces. Lat. $28^{\circ} 48'$, long. $76^{\circ} 40'$.

KURR.—A town of Eastern India, in the British province of Tenasserim, 110 miles N.N.W. of Tenasserim. Lat. $13^{\circ} 37'$, long. $98^{\circ} 31'$.

KURRA.—A town in one of the recently sequestered districts of Hyderabad, or dominions of the Nizam, situate 29 miles E.E.E. of Ahmednuggur. Lat. $18^{\circ} 54'$, long. $75^{\circ} 9'$.

KURRACHEE is a seaport of Sinde, near the north-western extremity of the coast of that country. It is situate near the base of the southern extremity of the Pubb or Brahocic Mountains, on a level space intervening between them and the sea, and is the only seaport in Sinde for vessels drawing more than ten feet of water. The port is protected from the sea and bad weather by Munorah, a bluff rocky headland, projecting south-eastward from the mainland, and leaving a space of about two miles between the extreme point and the coast to the east. In the harbour and within the entrance are some rocky islets, which are seen from sea over the low isthmus connecting

the point of Munorah with the coast to the west. There is a good roadstead outside Munorah, except during May, June, July, and part of August, when the south-west monsoon blows with such violence as to render anchoring there impracticable. At the entrance of the harbour is a bar, having one fathom and a quarter of water when the tide is out, and two and a half or three fathoms at high water spring tides; it consequently cannot be safely crossed by ships the draught of which exceeds sixteen feet. About a mile inside the bar there is an extensive bank, dry at low water; and between this and the western shore is the channel up the harbour. The general depths in the fair track along that side of the bay are from two to four fathoms at low water. The harbour is spacious, extending about five miles northward from Munorah Point, and about the same distance from the town, on the eastern shore, to the extreme western point; but a small part only of this expanse admits large ships. Experiments, however, have been authorized, with the view of ascertaining the practicability of removing the bar at the entrance, and otherwise deepening the harbour. The first voyage from England direct to the port of Kurrachee was made in 1852, by the ship "Duke of Argyle," of 800 tons. The point of Munorah terminating to the eastward the promontory, which landlocks the harbour on the south, is rocky, and about 150 feet high. On it a fort was built in 1797, which has been said to be so placed that the fire of ships could have no effect on it, because their guns would require to be so greatly elevated, to avoid striking the brow of the hill, that most of the shot must pass over and fall into the sea at the opposite side; while at the same time the vessel must approach the headland so close, that musketry protected by the rocks could clear the decks. This opinion, however, was disproved, and that of Lord, that the eleven guns on the fort, owing to their partial depression, could produce no effect on shipping, corroborated, by what occurred in the beginning of 1839, when the fire of the "Wellesley," 74 guns, in an hour dismantled the fort, which was forthwith occupied by the British troops.

The town is three miles from the landing-place when the tide is out; but it has been rendered easy of access by the formation of a mole and road, constructed at a cost of upwards of 30,000*l*. Before the occupation by the British troops, the fortifications were very mean and irregular, being composed chiefly of mud and straw, and in many parts so dilapidated that a horseman might ride to the top of them. In a few places they were found in good repair, and partially faced with masonry. The town, with its extensive suburbs, was ascertained, by census, in 1813, to contain 12,000 persons. Burnes, in 1830, estimated the population at 15,000, about one-half of them Hindoos, who here carry on an extensive commerce. In 1850, the population amounted to 11,773 persons, and was regarded

as on the increase. In 1853, the town contained 13,769 inhabitants, and the suburbs 8,458; making a total of 22,227. An English school has been opened in the town by the government, and a church has been erected. The native exports are camels, saltpetre, salt, rice and other grain, ghee or clarified butter, hides, tallow, oil, oil-seeds, fish, bark for tanning, alkalies, indigo, cotton. The transit exports from the adjoining countries are asafetida and various other drugs, madder and other dyes, alum, wool, silk, Kashmir shawls, dried fruits, lapis lazuli, gems of various kinds, the precious metals, and horses. The imports are metals, hardware, cottons and silks, twist and yarn.

Kurrachee is a position of very great importance, whether regarded in a commercial, a political, or a military point of view. It has been laid down, that a force stationed here, with detachments at Sehwan and Bukkur, might hold Sind in complete subjection. Kurrachee is the only safe port of Sind. In a commercial point of view, it may be defined the gate of Central Asia, and is likely to become to India what Liverpool is to England. It is also the terminus of the Sind Railway, and will consequently be shortly connected with Hyderabad, and indeed with the whole of Northern India, through which some of the extensions of this railway will doubtless be carried. It has a good route westward to Sonmucanee, and consequently ready access to Beloochistan. To the east there is a route to Tatta, along the seacoast, as far as Garrah creek, then along the course of the Garrah stream, and from the small town of that name directly to Tattah. There is another route from Kurrachee, directly through the hilly country to Tattah. Another route conducts to Kotree, on the Indus, opposite Hyderabad; another, westward of these, through the Lukkee hills, to Sehwan; another, still farther west, through the same hills, to Shikarpoor.

Burnes and Carless state that there is an inland navigation by means of cross channels, from Kurrachee to the Indus; but there is little doubt that this is an error, as Kennedy, who went down the creek in a boat, found that it debouched into the sea nine miles east of the mouth of the harbour of Kurrachee; and in this he is borne out by the manuscript map of the quartermaster-general. The ground, however, between the creek and the port is quite level, so that a canal could, without much difficulty, be made, connecting the two waters. The Garrah creek is navigable as far as Garrah village, about forty miles from the sea, and the land intervening between this last place and the Indus, abreast of Tatta, is level, low, of a soft nature, and only twenty-five miles across; so that the great river might, with little labour and a moderate outlay, be thus rendered accessible from the sea for large vessels. The climate of Kurrachee is cool in proportion to its latitude, and, under British auspices, the town must speedily become a

KUR.

most important place. Lat. 24° 51', long. 67° 2'.

KURRADIKUL.—A town in one of the recently sequestered districts of Hyderabad, or dominions of the Nizam, situate 57 miles W. of Raichoor. Lat. 16° 9', long. 76° 33'.

KURRAH, or KARHA.—A town on the right bank of the Ganges, on the route from Allahabad to Cawnpore, and 40 miles N.W. of the former. It extends about a mile along the bank, on the more elevated part of which is an old fort, now a heap of ruins, and was so in the time of Tieffenthaler, a century ago. This last author mentions that it had a number of ruined houses, from which, and from the multitude of tombs crowded around it, some conjecture may be formed of its former populousness. Its celebrity and importance, in the opinion of the native population, resulted from the vicinity of the tomb of a famous reputed Mussulman saint, named Kamal Shek, who lies buried at the contiguous town of Kamalpur. The ruin of Kurrah commenced when Akbar, towards the close of the sixteenth century, removed the civil establishment to Allahabad, and was completed by Asaf ud Daulah, the nawaab of Oude, who destroyed the finest buildings for the sake of the materials, which he used in raising edifices at Lucknow. The surrounding country, however, could not have been very highly cultivated or peopled three centuries ago, as Baber mentions, that at that time it abounded in wild elephants, and the people of thirty or forty villages were mainly occupied in their capture. The town itself, at the same time, had a fort, the residence of an important Mussulman chief. Distant N.W. from Calcutta by land 535 miles. Lat. 25° 41', long. 81° 28'.

KURRAR.—A town in the British province of Sattara, presidency of Bombay, 31 miles S.S.E. of Sattara. Lat. 17° 17', long. 74° 16'.

KURREE, in Guzerat, or territory of the Guicowar, presidency of Bombay, a town in a picturesque site in a finely-wooded country. Here is a palace, formerly the residence of Mulhar Row, Guicowar. Population 25,000, many of whom are excellent artisans. Distance from the city of Ahmedabad, N.W., 25 miles; Baroda, N.W., 85; Surat, N., 155; Bombay, N., 310. Lat. 23° 18', long. 72° 19'.

KURRUCKPOOR, in the district of Sandi, territory of Oude, a town on the western frontier, towards the British district of Furruckabad, on the route from Futteghurh cantonment to that of Setapoor, eight miles N.E. of the former, 74 W. of the latter. It is situate on the left bank of the Ramgunga (Western), here crossed by ferry. There is a bazar here, and supplies are abundant. Lat. 27° 27', long. 79° 47'.

KURRUK, in the Daman division of the Punjab, a town situated 23 miles from the right bank of the Indus, 84 miles S.W. by

S. of the town of Peshawur. Lat. 32° 57', long. 71°.

KURRUMBILA.—A town of Orissa, in the native state of Mohurbunge, situate 60 miles W. by S. from Midnapoor, and 60 miles N.W. by N. from Balasore. Lat. 22° 12', long. 86° 30'.

KURRUMFOOLEE.—A river of Eastern India, rising in lat. 23° 8', long. 93° 5', on the western slope of the Youmadoung range, to the north of the Blue Mountain, and, flowing in a south-westerly direction for 130 miles, falls into the Bay of Bengal a few miles below the town of Chittagong, in lat. 22° 20', long. 91° 56'.

KURRUNG.—A town of Assam, in the British district of Nowgong, 15 miles N.N.E. of Nowgong. Lat. 26° 33', long. 92° 56'.

KURSANEH, in the British district of Mynpooree, a small town on the route from Allygurh cantonment to that of Futteghurh, and 44 miles S.E. of the former. Lat. 27° 44', long. 78° 46'.

KURSAVA.—See KHUSAWARA.

KURSOD.—A town in the native state of Gwalior, or territory of Scindia's family, situate 28 miles W. from Oojein, and 90 miles S.S.E. from Neemuch. Lat. 23° 12', long. 75° 22'.

KURTUL, in the British district of Banda, lieut.-gov. of the N.W. Provinces, a village on the route from the town of Banda to Adijgurh, 12 miles N. of the latter. Water is obtained from wells. Lat. 25° 2', long. 80° 24'.

KURTUR.—A town in the British district of Nellore, presidency of Madras, 95 miles N. of Madras. Lat. 14° 27', long. 80° 13'.

KURUCKDEA.—A town in the British district of Ramgur, lieut.-gov. of Bengal, 60 miles N.E. by E. of Hazareebagh. Lat. 24° 27', long. 86° 11'.

KURUHEEA, in the British district of Ghazee-pore, lieut.-gov. of the N.W. Provinces, a village on the route from Chunar to Dinapore, 61 miles N.E. of the former, 185 S.W. of the latter. Lat. 25° 26', long. 83° 50'.

KURUJGEE.—A town in the British province of Sattara, presidency of Bombay, 24 miles N. of Bejnipoor. Lat. 17° 9', long. 75° 39'.

KURULPETTA.—A town of the Deccan, in the territory of Nagpoor or Berar, situate 205 miles S.E. from Nagpoor, and 25 miles N.W. from Jugdulpoor. Lat. 19° 30', long. 81° 43'.

KURUMBEE.—A town in the British district of Chota Nagpoor, lieut.-gov. of Bengal, 58 miles W.S.W. of Lohadugga. Lat. 23° 10', long. 83° 55'.

KURUMNASA.—A river rising in the British district of Shahabad, presidency of Bengal, and in lat. 24° 34', long. 83° 46', near the "village Surodag, close by the southern

side of the table-land (of South Shahabad), among some stones, above a rice-field. The Kurumnasa issues from a little fountain called Sarmanchuya, and immediately forms a fine rapid streamlet, which, notwithstanding its horrible impurity, is as clear as crystal." The source is about eighteen miles west of the celebrated fort of Rohtas. Its direction is north-west for about fifty miles, and in this part of its course it has a rapid stream, which flows even in the driest weather, and expands into numerous pools, abounding in fish. In lat. $24^{\circ} 51'$, long. $83^{\circ} 15'$, it turns nearly due north, in which direction it flows twenty-six miles, forming, in the first instance, the boundary between the British districts Shahabad and Mirzapoor, and then traversing the latter district. In this part of its course it is precipitated a depth of 100 feet down a vast rock, called Chhanpathar, and in the rainy season forms a noble cascade, but in the dry season the stream in many sandy places disappears, the channel containing at intervals numerous stagnant pools. In lat. $25^{\circ} 8'$, long. $83^{\circ} 22'$, it takes a north-easterly direction, first intersecting Benares for ten miles, then forming for twenty miles the boundary between that district and Shahabad; and finally, dividing for forty miles the last-named district from that of Ghazeepeer, it falls into the Ganges, on the right side, in lat. $25^{\circ} 28'$, long. $83^{\circ} 58'$, having altogether a course of about 146 miles. About twenty-seven miles above its mouth, and in lat. $25^{\circ} 19'$, long. $83^{\circ} 44'$, it is joined on the right side by the Durgawati, the latter having rather the larger volume of water. Where traversed, about a mile or two above its mouth, by the route from Chunar to Dinapoor, it is 100 yards wide, with very deep water and steep banks, and is usually crossed by troops by means of a bridge of boats. At Nowbulpoor, in lat. $25^{\circ} 13'$, long. $83^{\circ} 32'$, and fifty-five miles from its mouth, it is traversed by the great north-western route from Calcutta to Delhi, the passage being made by a fine bridge of stone masonry, which has replaced one 320 feet in length, constructed of ropes, on the suspension principle. The present structure consists of three equal arches, each fifty-three feet in span; piers 30 by 13; roadway twenty-five feet wide and perfectly horizontal. The cost of 10,000*l.* must be regarded as very low; but advantage was taken of an excellent foundation laid in a previous attempt to build a bridge at the same place. This river is subject to violent rain-floods, and has been known to rise twenty-six feet in one night in June, when scarcely any rain had fallen in the plain extending along the Ganges. According to a statement in a late publication, it is navigable during the periodical rains.

KURUNRAS, in the British district of Boolundshuhur, lieutenant-gov. of the N.W. Provinces, a village on the right bank of the Ganges, 72 miles S.E. of Delhi. Lat. $28^{\circ} 16'$, long. $78^{\circ} 23'$.

KURUNRUMMA.—A town in the British district of Ramgur, lieutenant-gov. of Bengal, situate 38 miles N.N.E. of Hazarebagh. Lat. $24^{\circ} 30'$, long. $85^{\circ} 40'$.

KURUPAM.—A town in the British district of Ganjam, presidency of Madras, situate 107 miles W.S.W. of Ganjam. Lat. $18^{\circ} 52'$, long. $83^{\circ} 37'$.

KURVULLA.—A town in Hyderabad, or dominions of the Nizam, situate 137 miles E.S.E. from Ahmednuggur, and 105 miles S.E. by S. from Jaulnah. Lat. $18^{\circ} 31'$, long. $76^{\circ} 44'$.

KURWA, in the British district of Ajmeer, lieutenant-gov. of the N.W. Provinces, a town on the route from Nusseerabad to Beawr, 20 miles W.S.W. of the former. Lat. $26^{\circ} 14'$, long. $74^{\circ} 32'$.

KURWAKHERA, in the British district of Etawa, lieutenant-gov. of the N.W. Provinces, a village on the route from the cantonment of Etawa to Calpee, and 10 miles S.E. of the former. Lat. $26^{\circ} 42'$, long. $79^{\circ} 12'$.

KURYAH.—A town in the native state of Nepal, 46 miles S. from Khatmandoo, and 43 miles E.N.E. from Bettiah. Lat. $27^{\circ} 3'$, long. $85^{\circ} 10'$.

KUSBA, in the British district of Purnea, lieutenant-gov. of Bengal, a town situate five miles N.E. of the town of Purnea. It contains 1,500 houses, a number which, according to the usually received average of inmates, would assign it a population of about 7,500 persons. Lat. $25^{\circ} 49'$, long. $87^{\circ} 32'$.

KUSBAH SUCHENDEE, in the British district of Cawnpoor, lieutenant-gov. of the N.W. Provinces, a town on the route from Cawnpoor to Jaloun, 10 miles W.S.W. of the former. Lat. $26^{\circ} 27'$, long. $80^{\circ} 16'$.

KUSBEH BOLA, in the British district of Ghazeepeer, lieutenant-gov. of the N.W. Provinces, a town on the route from Dinapoor to Ghazeepeer, 11 miles E. by N. of the latter. Lat. $25^{\circ} 34'$, long. $83^{\circ} 49'$.

KUSBUH SECUNDRA, in the British district of Allahabad, lieutenant-gov. of the N.W. Provinces, a town on the route from Mirzapoor to Lucknow, 49 miles N.W. of the former. Lat. $25^{\circ} 35'$, long. $82^{\circ} 4'$.

KUSEEA, in the British district of Goruckpoor, lieutenant-gov. of the N.W. Provinces, a small town on the route from Diaapoor to Goruckpoor, 110 miles N.W. of the former. Within a mile of the town is a conical mound, constructed of bricks, and known among the people by the name of Devasthan,—"place of the goddess;" and near it the ruin of a solid temple, built of brick. The inhabitants have no tradition as to when, by whom, or from what motives, they were raised. At present water and supplies are abundant here. Lat. $26^{\circ} 41'$, long. $83^{\circ} 56'$.

KUSHBIR, in Bussahir, a village, with a small fort, in the district of Koonawur. It

is situate on a declivity, sloping gradually eastward to the right bank of the Sutluj, and surrounded by vineyards. Elevation above the sea 9,284 feet. Lat. $31^{\circ} 33'$, long. $76^{\circ} 19'$.

KUSHEY SONDA, in the Sangor and Nerbudda territories, a town situate in the British district of Ramgurih, on the route from Ramgurih to Rewah, 21 miles N. of the former. Lat. $23^{\circ} 7'$, long. $81^{\circ} 1'$.

KUSHYN, in Bussahir, a fort near the right bank of a considerable feeder of the river Pabur. It is of considerable size, with houses neatly built, and well covered with slate, in a site of little beauty, the view from it being confined by surrounding mountains of repulsive aspect. Close to the town are iron-mines, containing specular ore, embedded in mica-slate. This is smelted and rendered malleable at the village; but the produce is not considered abundant. Elevation above the sea 6,875 feet. Lat. $31^{\circ} 11'$, long. $77^{\circ} 42'$.

KUSMIR.—A town in the British district of Sarun, lieut.-gov. of Bengal, six miles N.N.E. of Dinapoor. Lat. $25^{\circ} 40'$, long. $85^{\circ} 11'$.

KUSMORE.—A town in the British district of Shikarpoor, province of Sind, presidency of Bombay, 71 miles E.N.E. of Shikarpoor. Lat. $28^{\circ} 22'$, long. $69^{\circ} 41'$.

KUSOWLEAH, in the British district of Furruckabad, lieut.-gov. of the N.W. Provinces, a town on the route from the cantonment of Allygurih to that of Futtehgiurh, and 42 miles N.W. of the latter. Lat. $27^{\circ} 31'$, long. $79^{\circ} 4'$.

KUSRAON, in the Sind Sagur Doab division of the Punjab, a town situated 26 miles from the left bank of the Indus, 58 miles S.E. by E. of the town of Peshawur. Lat. $33^{\circ} 27'$, long. $72^{\circ} 29'$.

KUSSAREE, in the British district of Allahabad, lieut.-gov. of the N.W. Provinces, a village on the route from the city of Allahabad to Lucknow, and 10 miles N.W. of the former. Lat. $25^{\circ} 33'$, long. $81^{\circ} 50'$.

KUSSAUN, in Sirhind, a village on the route from Kythui to Jheend, and 28 miles N. of the latter place. It is situate amidst bush-jungle, so thick that a small force can scarcely find room for encampment. Distant N.W. from Calcutta 1,003 miles. Lat. $29^{\circ} 39'$, long. $76^{\circ} 29'$.

KUSSEAH, in the British district of Allahabad, lieut.-gov. of the N.W. Provinces, a village on the route from the cantonment of Allahabad to Futtehpoor, and 29 miles N.W. of the former. Heber describes it as a large ruinous village, near a grove of neem-trees. Garden describes the surrounding country as well cultivated, but Heber states it to be much wilder, worse cultivated, and worse peopled than any which he had seen in India. Lat. $25^{\circ} 36'$, long. $81^{\circ} 32'$.

KUSSOOR, in the Punjab, a large town

nine miles from the right or western bank of the Ghara. It is a place of great antiquity, is inclosed by a wall, and has several divisions, each surrounded by a separate wall strengthened with bastions. According to tradition, there were formerly twelve of these divisions corresponding to the number of the twelve sons of the founder, who assigned one to each. There are several mosques and palaces. The surrounding country abounds in gardens and other well-cultivated spots. The inhabitants are all Mahometans. Hough observes, that at this place "an army might make a good stand, as not only are there heights, but each division of the town might be turned into a fortified position." Lat. $31^{\circ} 9'$, long. $74^{\circ} 27'$.

KUSSOWLEE, a British sanatory station in Baghat, is situate on the route from Pinjor to Simla, nearly due north of the former place, and distant from it about fourteen miles by a circuitous route. This recently-established station is thus described by a correspondent of the Delhi Gazette:—"Kussowlee itself is a hill of about five miles in circuit, considerably detached from the chain of which it forms a part. Its height is about 7,000 feet, the upper part is an undulating table land; and the whole hill does not show any abrupt peak. From the plains the ascent is very sudden, that face of the hill presenting a forbidding aspect, intersected by perpendicular ravines, and showing the strata of clay-slate at an angle of 30° or 40° . The road from Pinjor is chiefly cut along this steep hill-side. The northern face of the hill is much less abruptly defined, and runs into the ranges that slope to the river Gumber." In a direct line, it is about 20 miles S.W. of Simla, and nearly on a level with it. The soil overlying the rock is light and porous, except in places where decaying vegetation has accumulated a black mould. The timber consists principally of firs, mixed with which are a few oaks and rhododendrons. The absence of underwood, and the porosity of the soil quickly absorbing rain, render the air dry and healthful. The principal disadvantage is the want of water. The natural springs are at a distance below the station, and the non-retentive nature of the surface precludes the construction of tanks, while from the rocky character of the substratum, it is impracticable to obtain a supply by sinking wells. Hence, during spring and the early part of summer, water must be brought on mules and bullocks from springs a mile and a quarter distant, and 848 feet below the level of the parade-ground. There is no cultivation except in the valleys, where irrigation is practicable; and in such localities the slopes are formed into terraces, supporting successive slips of soil bearing very fine crops of rice and other grain, ginger, turmeric, potatoes, onions, and other vegetables. The writer already quoted describes the scenery as fine:—"West and south, the view of the plain is boundless, and after the rains, the Sutlej winds along in great majesty, its course

KUT.

being clearly traceable from Roopur to Loodianah; while on the other side the Jumna can be seen. Standing on the summit of the hill, looking down the steep declivity of nearly 6,000 feet, there is one vast map spread before you, which, in the different lights of morning and evening, shows a magic variety of tints and shades. The sun is just now dipping into the Sutlej, where it runs due west; turn gradually to the right, and you will have a view of the plains of the Punjab, until you reach the lowest spurs of the mountain-range, just where the river issues from the hills. Then comes a group of beautiful varied hills, the highest of which is Soorujghur, above Belaspoor. Behind these the white peaks begin to appear, and, looking north, you have the whole snowy rampart rising in uninterrupted majesty; for the hills on a level with Simla, or even Whartoo, form but undulations in the foreground of this magnificent panorama. Turn further round, and to the north-east you have another group of nearer hills, the most conspicuous of which is Baghat, and behind them the snow appearing at intervals till you reach the east. In that quarter you have lost the snow, but there is a beautiful sea of undulating hills, with here and there glimpses of the plains, until, looking south, you come again to an unlimited horizon. In all this landscape, there is but one thing wanting, the one deficiency which prevents our hills from being absolutely lovely, and that is, the absence of water. No lake, no stream, enlivens the view; and this makes all the rest like a beautiful face with the eyes shut." A church has been erected here for the accommodation of the Christian community. In 1845, Kussowlee was visited by cholera, which greatly increased the ordinary rate of mortality; but its general salubrity appears well established. Kussowlee is distant N.W. from Calcutta 1,069 miles. Lat. $30^{\circ} 54'$, long. $77^{\circ} 3'$.

KUTCHEGUD.—A town situate on the north-west point of the peninsula of Kattywar, territory of Guzerat, 10 miles S. from the Gulf of Cutch, and 118 W. of Rajkote. Lat. $22^{\circ} 20'$, long. $69^{\circ} 1'$.

KUTCHNAR SURYE.—A town in the native state of Gwalior, or possessions of the family of Scindia, situate 83 miles W.N.W. from Saugur, and 83 miles S. by W. from Bhopal. Lat. $24^{\circ} 24'$, long. $77^{\circ} 39'$.

KUTCHOUDA.—A town of Malwa, in the native state of Amjherah, situate 10 miles S. from Amjherah, and 126 miles E. from Baroda. Lat. $22^{\circ} 24'$, long. $75^{\circ} 10'$.

KUTCHWA, in the British district of Allahabad, lieutenant-gov. of the N.W. Provinces, a village on the left bank of the Ganges, and distant N.W. from Calcutta by the river route 756 miles, S.E. from the city of Allahabad 52 by the same. Lat. $25^{\circ} 12'$, long. $82^{\circ} 20'$.

KUTHOTEEA, in the territory of Saugur and Nerbudda, a town in the British district

of Ramgurh, situate on the route from Ramgurh to Jubbulpoor, 18 miles W.N.W. of the former. Lat. $22^{\circ} 53'$, long. $80^{\circ} 46'$.

KUTI.—A town in the native state of Nepal, situate six miles S.E. from the left bank of the Bhotiya Coosy river, and 63 miles E.N.E. from Khatmandoo. Lat. $28^{\circ} 8'$, long. $86^{\circ} 11'$.

KUTKA UMROAHA, in the British district of Benares, lieutenant-gov. of the N.W. Provinces, a village on the route from Allahabad to the city of Benares, 55 miles E. of the former, 19 W. of the latter. Lat. $25^{\circ} 16'$, long. $82^{\circ} 45'$.

KUTLUNGEE, in the British territory of Sagur and Nerbudda, lieutenant-gov. of the N.W. Provinces, a town on the route from Nagpoor to Ramgurh, 62 miles N.E. of the former. Lat. $21^{\circ} 47'$, long. $79^{\circ} 50'$.

KUTOLA, in the Rajpoot state of Jodhpoor, a village on the route, *via* Nagor, from Jessulmeer to Nussersabad, and 142 miles N.W. of the latter. Lat. 27° , long. $73^{\circ} 16'$.

KUTOLLEE, in the territory of Kotah, in Rajpootana, a town on the left bank of the river Parbutty, and held by a feudatory of the rajah of Kotah. The residence of the feudatory is a lofty edifice, in a handsome Hindoo style of architecture, situate on the bank of the river. Distant direct N.E. of Kotah 50 miles, S.W. of Gwalior 110. Lat. $25^{\circ} 39'$, long. $76^{\circ} 35'$.

KUTPURI, in the British district of Etawah, lieutenant-gov. of the N.W. Provinces, a village on the route from the cantonment of Agra to that of Etawah, and 18 miles N.W. of the latter. Lat. $26^{\circ} 58'$, long. $78^{\circ} 53'$.

KUTRA, in the British district of Allahabad, lieutenant-gov. of the N.W. Provinces, a pass on one of the routes from the city of Allahabad to Rewa, and 63 miles S.E. of the former. The surface of the country rises from the valley of the Ganges about Mirzapoor to the elevated tracts of Bundelcund and Bughelcund, lying to the south-west. The ascent takes place in successive plateaus, becoming continually more elevated towards the west, and bounded on the side of the more depressed tracts by ranges of hills of no great relative elevation. The plateau nearest the Ganges is bounded towards it by a ridge traversed by the Tara Pass, and to the south and south-west it is bounded by a ridge which forms the face of the plateau that rises over it, and is traversed by the Kutra Pass. The north-east side of the Kutra range, towards Tara Pass, is rather steep, yet overstrewn with rubbish of disintegrated rock, amidst which grows a stunted forest of trees allied to pines, besides the pipal (*Ficus religiosa*) and coranthus. The village of Kutra is situate at the north-east side of the pass, on the left bank of the Seoti, a small river tributary to the Bilund. Into the Seoti are discharged several small streams, which tumble in lofty cascades down the face of the overhanging ridge. At that of Bilohi, twelve

KUT—KUV.

miles west of the Kutra Pass, the fall is 398 feet, and the escarpment nearly perpendicular. Franklin considers part of the ridge rising above the village to be saliferous; and adds, that salt is manufactured on the banks of the Tons. According to Jacquemont, however, the water of the wells is not salt. The road through the pass is excellent, being carefully laid down from Mirzapoor. Water is abundant, being obtained from the Seoti; but supplies must be collected from the adjacent country. Elevation of summit of ridge above the sea 1,219 feet; of the village, 520 feet. Lat. $24^{\circ} 51'$, long. $82^{\circ} 11'$.

KUTRA.—See MEERANPOOR KUTRA.

KUTSUHEE.—A town in the British district of Balasore, lieutenant-gov. of Bengal, 99 miles S.W. of Calcutta. Lat. $21^{\circ} 39'$, long. $87^{\circ} 16'$.

KUTTAJEE, a small river of Sind, rises in the hilly tract between Kurrachee and Sehwan, and in lat. $25^{\circ} 7'$, long. $67^{\circ} 28'$. After a course of twenty miles in a north-westerly direction, it falls into the river Goorban. Though so inconsiderable in point of size, it is in this arid country important, for affording a constant supply of good water, as even when it has ceased to run, the pools in its bed contain considerable quantities.

KUTTANO, in the British district of Mynpooree, lieutenant-gov. of the N.W. Provinces, a village 30 miles N.W. of the town of Mynpooree. Lat. $27^{\circ} 24'$, long. $78^{\circ} 37'$.

KUTTEEGEREE.—A town in the British district of Belgau, presidency of Bombay, 76 miles E. by N. of Belgau. Lat. $16^{\circ} 4'$, long. $75^{\circ} 41'$.

KUTTOSUN.—See MYTHE CAUNTA.

KUTTOWLI, in the British district of Futtehpore, lieutenant-gov. of the N.W. Provinces, a village on the route from Banda to the town of Futtehpore, and 11 miles S.W. of the latter. Lat. $25^{\circ} 52'$, long. $80^{\circ} 44'$.

KUTTREE.—A town in the British district of Bhagulpore, lieutenant-gov. of Bengal, 20 miles N.E. by E. of Bhagulpore. Lat. $25^{\circ} 20'$, long. $87^{\circ} 17'$.

KUTTUNGEE, in the British territory of Saugor and Nerbudda, lieutenant-gov. of the N.W. Provinces, a town on the route from Saugor cantonment to Jubbulpore, 39 miles S.E. of former, 22 N.W. of latter. It has a bazar, and is well supplied with water. Here is a considerable quantity of iron, manufactured principally into gun-barrels, which are much esteemed and largely exported. Lat. $23^{\circ} 27'$, long. $79^{\circ} 50'$.

KUTTUNGTOLE.—A town of the Deccan, in the territory of Nagpoor or Berar, situate 70 miles N.E. by E. from Nagpoor, and 101 miles S. from Jubbulpore. Lat. $21^{\circ} 41'$, long. $80^{\circ} 4'$.

KUTTUNGY.—A town in the territory of Nagpoor or Berar, situate on the right bank of one of the branches of the Wein Gunga, and

88 miles E.N.E. from Nagpoor. Lat. $21^{\circ} 43'$, long. $80^{\circ} 21'$.

KUTURPOOR, in the British district of Allyghur, lieutenant-gov. of the N.W. Provinces, a village on the route, by Khasganj, from Bareilly to Allyghur cantonment, and 20 miles S.E. of the latter, 52 N.E. of Agra. Lat. $27^{\circ} 51'$, long. $78^{\circ} 25'$.

KUTURUGGA.—A town in the British district of Sumbulpore, on the south-west frontier of Bengal, situate 19 miles N.E. by N. of Sumbulpore. Lat. $21^{\circ} 41'$, long. $84^{\circ} 10'$.

KUTULGARH, in the British district of Kumaon, lieutenant-gov. of the N.W. Provinces, a fort, formerly garrisoned by the Goorkha troops, situate on the route, by Ramesur, from the cantonment of Petoorgurh to that of Champawut, four miles N. of the latter. Webb, who surveyed it at the close of A.D. 1815, thus describes it:—"The shape of Kutulgarh fort is irregular, and fitted, as it were, to the top of the hill on which it stands. The work is oblong; its greatest length from north to south may be about fifty yards, and the breadth half that quantity: each extremity is completed by a species of star fort: the line connecting these has, at short distances, salient angles, which flank each other with tolerable exactness. The wall is of considerable solidity, and is composed of rough stones without cement: it is looped and pierced all round, and is nine feet high on the outside. The whole work is surrounded, about fifteen feet beyond the wall, by a stockade, the stakes of which are about ten feet above the earth. The whole appears to be in good and defensible order. The ascent to the fort is most easy from the eastern side, but is, even here, very steep; and the latter part, by a zig-zag path, is within long musket-shot" of a detached stockade outside the fort. Close to this stockade is a small Hindoo temple. Water must be obtained from a source covered by a fire of musketry from the stockade, distant 400 feet. Lat. $29^{\circ} 24'$, long. $80^{\circ} 5'$.

KUTUMBO, in the raj or protected Rajpoot state of Ulwar, a small town on the eastern frontier, towards Bhurtpore. It was bombarded and laid in ruins October 29th, 1803, by the Marhatta army, which had escaped from the Deccan, and was flying before the British under General Lake. On the 31st the British general reached the smoking ruins of Kutumbo, but found that the enemy had deserted it that morning; and pursuit being continued, the fugitive host was next morning overtaken, and totally defeated at Laswari. Kutumbo is 60 miles W. of Agra, 95 miles S. of Delhi. Lat. $27^{\circ} 19'$, long. $77^{\circ} 8'$.

KUVOY, in the British district of Malabar, under the presidency of Madras, a town on an extensive estuary of a river flowing from the Western Ghats. The surrounding country is a sandy plain of no great fertility, but suited for the culture of inferior rice and cocoanut-trees. The town is stated to have only about sixty or seventy houses. The inhabitants are Moplahs

KUW—KYR.

or Mussulmans. Here the English had a cactory in 1750; and about that time the French built a fort on the south side of the river. This fort, and another of native construction, are now in ruins. Distance N.W. from Cananore 18 miles, S.E. from Mangalore 58. Lat. 12° 6', long. 75° 16'.

KUWA, in the British district of Futtehpore, lieut.-gov. of the N.W. Provinces, a town on the left bank of the river Jumna, 17 miles S. of the town of Futtehpore. Lat. 25° 42', long. 80° 52'.

KYAL PYEN.—A town of Burmah, situate 53 miles from the left bank of the Irawady, and 96 miles N.E. by N. from Ava. Lat. 23° 3', long. 96° 50'.

KYAN NAYAT MYO.—A town of Burmah, situate on the left bank of the Irawady river, 96 miles N. from Ava. Lat. 23° 15', long. 96°.

KYAR, or **KYE RIVER**, one of the mouths of the Indus, leading into the Pitty-anee. Lat. 24° 34', long. 67° 13'.

KYARDA, in Sirmoor, a village in the Doon or valley of the same name, and on the route from Dehra to Nahun, being 21 miles S.E. of the latter place. It is a small place, described by Mundy as "romantically situated in a dell, completely encompassed by woody heights, on the summit of the nearest of which are the ruins of what appears to have been a petty Goorkah fortress." The lands comprised in the Kyarda Doon were granted to the rajah of Sirmoor by the British government in 1833, subject to certain conditions; among which were the impartial administration of justice, the abolition of transit-duties, and the construction and repair of roads. Elevation of the village above the sea 1,844 feet. Lat. 30° 28', long. 77° 36'.

KYBYOUN.—A town of Burmah, situate on the right bank of the Irawady river, and 60 miles N. from Ava. Lat. 22° 42', long. 95° 56'.

KYL.—A town in the north-east quarter of the Punjab, situate in the British district of Spiti, 107 miles E. by N. of Kangra. Lat. 32° 17', long. 78° 3'.

KYLASCOTTAH.—A town in the hill zemindary of Jeypoor, on the south-west frontier of Bengal, situate 79 miles E. by N. from Jeypoor, and 100 miles W. by S. from Ganjam. Lat. 19° 14', long. 83° 36'.

KYLEE, in the British district of Benares, lieut.-gov. of the N.W. Provinces, a town on the route from Chunar to Dinapore, situate 21 miles N.E. of the former, 125 S.W. of the latter. Lat. 25° 20', long. 83° 13'.

KYMPROO, a village in Arracan, situate on the right bank of the Lemroo river, near the confluence of one of the feeders of that river. Lat. 20° 35', long. 93° 33'.

KYNETA, in the British district of Mynpooree, lieut.-gov. of the N.W. Provinces, a village on the route from the city of Agra to

Etawa, and 42 miles N.W. of the latter. Lat. 27° 8', long. 78° 31'.

KYOKOO.—A town of Burmah, situate 20 miles W. from the right bank of the Irawady river, and 145 miles S.W. from Ava. Lat. 20° 24', long. 94° 23'.

KYOONTHUL.—See **KEYORTHUL**.

KYOUKDWAIN.—A town of Eastern India, in the British province of Tenasserim, 142 miles N. by W. of Tenasserim. Lat. 14° 7', long. 98° 38'.

KYOUKKYAH.—A town of Burmah, situate on the right bank of the Irawady, and 173 miles N. by E. from Ava. Lat. 24° 20', long. 96° 30'.

KYOUKNEMO, in the island of Ramree, in Arracan, a village situate on a large creek, by which it has access to the sea. It was at one time much infested by dacoits, but through the exertions of the magistrates, it has now become a thriving place.

KYOUK PHYOO, the capital town and principal military station of the island of Ramree, province of Arracan, is situated on its north-western extremity. It derives its designation from Kheouk, signifying white, and Pheo, a stone, on account of the number of beautiful white pebbles which cover the beach in its vicinity. It stands upon the extremity of a sandy plain, which is bounded on the south-west by a range of sandstone hills, varying in height from 500 to 2,000 feet. On the east it is bounded by a small creek, which confers upon it superior facility of water-communication with Calcutta, Chittagong, &c. It is a healthy spot, and its salubrity is probably in a great measure owing to the protection it receives from the range of sandhills on the south-west, forming an admirable barrier against the monsoon, which generally approaches with great fury from that quarter. In connection with that of nature, the powerful hand of art has been at work for the last few years, and a great improvement has been effected by removing all the dense jungle in the vicinity of the town, which generated much dampness, and consequent disease. A judicious system of drainage has also been carried out. Its harbour is said to be one of the finest in the world. Its entrance is so deep and wide as to allow of the safe ingress of the largest-sized ships at any season of the year. Lat. 19° 24', long. 93° 24'.

KYOUKTEGADEYOUNG, a village in Arracan, situate on the left bank of the Coladyne river, a few miles S. of Ferguson's route. Lat. 20° 50', long. 93° 9'.

KYOUNGTHA, a pass in the British district of Pegue, on the route over the Youmadoung Mountains, connecting the seacoast of the Bay of Bengal with the interior of Pegue. The crest of the pass is 20 miles N.N.W. of Bassein, in lat. 17° 2', long. 94° 45'.

KYRABAD, in Rajpootana, a town of

Kotah, situate on the route from Neemuch to the city of Kotah, 78 miles N.E. of former, 44 S.W. of latter. It has a bazar, and water is abundant. The number of houses is estimated at 400. Lat. 24° 37', long. 76°.

KYRAGURH.—A town of the Deccan, in the territory of Nagpoor or Berar, situate 114 miles E. by N. from Nagpoor, and 102 miles S. from Ramgurh. Lat. 21° 20', long. 80° 53'.

KYRANUH, in the British district of Muzaffarnugur, lieutenant-gov. of the N.W. Provinces, a town on the route from Muzaffarnugur to Paneeput, 30 miles W. by S. of the former. It has a population of 15,162 inhabitants. Lat. 29° 23', long. 77° 16'.

KYRE.—A town of Burmah, situate on the left bank of the Khyendwen river, and 118 miles N.W. from Ava. Lat. 23° 2', long. 94° 45'.

KYREE DERA, in Sinde, a village on the route from Larkhana to Bagh, and 15 miles N. of the former place. There is a good supply of water from wells and pools about the village. Lat. 27° 44', long. 68° 7'.

KYREE GURREE, or **KEYRA GHURREE**, in Sinde, a town on the route from Larkhana to Bagh, and 44 miles N. of the former place. It is situate on the south-eastern border of the *Pas*, or desert of Shikarpoor, is surrounded with a wall, and is supplied with water from wells. Lat. 28° 6', long. 67° 57'.

KYRIM, in Eastern India, one of the Cossya hill states, bounded north-east and south by the British territory of Jynteah, and west by the other Cossya states: it extends from lat. 25° 10'—25° 58', and from long. 91° 48'—92° 11'; is 58 miles in length from north to south, and 13 in breadth.

KYTHUL, in Sirhind, a town the principal place of the territory of Kythul. It is situate in a level, fertile country, and is irregularly, but substantially, built of excellent brick. The palace is a lofty building of a striking appearance, rising above a fine grove of trees, overhanging a spacious sheet of water. There are in the town kilns, producing great quantities of sal ammoniac. The last rajah of the country died in 1843, and, leaving no issue, his possessions lapsed to the paramount power in India. At the period of the escheat, in 1843, the territory comprised 516 villages, and was estimated to yield a surplus revenue of 44,000*l*. Kythul is distant N.W. of Calcutta 1,004 miles. Lat. 29° 49', long. 76° 28'.

KYUAI-THE-TSAKHAN.—A town of Burmah, situate 33 miles E. of the left bank of the Irawady, and 126 miles N. by E. from Ava. Lat. 23° 39', long. 96° 32'.

KYUNGYAM.—A town in the dominions of Gholab Singh, the ruler of Cashmere, situate 190 miles E. by S. from Sirinagar, and 159 miles N.E. from Kangra. Lat. 33° 39', long. 78° 11'.

L.

LABADOR.—One of the islands situated at the mouth of the Megna river. Its length from north to south is 11 miles, and its breadth five; the centre being in lat. 22° 22', long. 90° 48'.

LABEIRA, in the British district of Bareilly, lieutenant-gov. of the N.W. Provinces, a village on the route from the town of Bareilly to Pillibest, and 13 miles N.E. of the former. Lat. 28° 28', long. 79° 35'.

LABRUNG, in Bussahir, a village of the district of Koonawur, is situate near the right bank of the Zong, a feeder of the Sutluj, and divided by it from the town of Kanum. Gerard describes it as of considerable size; Hutton, as "a small and filthy-looking place, built on the edge of a shelving hill." Here is a small fort, belonging to the rajah of Bussahir. It is square, about forty feet high, and surrounded by a loopholed wall of stones without cement. Elevation above the sea 9,296 feet. Lat. 31° 40', long. 78° 29'.

LACARACOONDA.—A town in the British district of Beerboom, lieutenant-gov. of Bengal, situate 111 miles N.W. of Calcutta. Lat. 23° 48', long. 87° 20'.

LACCADIVE ISLANDS.—A cluster off the Malabar coast of India. They extend from lat. 1° 50' to 12° 20', and from long. 72° 20' to 74° 25', and contain a population of 6,800. The greater portion of these islands are under the uncontrolled management of the Beeboe of Cannanore, subject to the payment of an annual tribute to the British government of 1,000*l*. This tribute having fallen into arrear, the islands have been attached, and are now under the administration of the British government.

LACHOONG.—A town in the native state of Sikhim, situate on the right bank of the Teesta river, and 52 miles N.E. by N. from Darjeeling. Lat. 27° 40', long. 85° 47'.

LACKREGONG, in the British district of Allahabad, lieutenant-gov. of the N.W. Provinces, a small town, with bazar, on the route, by Rajapur ferry, from the cantonment of Allahabad to Banda, and 16 miles W. of the former. Lat. 25° 25', long. 81° 46'.

LADAKH, or **MIDDLE TIBET**.—A very elevated and rugged country north of the Punjab, and included within the dominions of Gholab Singh, the present ruler of Cashmere. Excluding the British districts of Spiti and Lahoul, Ladakh is distributed into five subdivisions, named Nabra, Ladakh, Zaskar, Rukchu, and Purik-Sara-Dras. It is bounded on the north by the unexplored region south of Chinese Turkistan, and the Chinese territory of Khoten; on the north-east by the Chinese territory of Khoten, and Chan-thau and Rodokh, districts of Great Tibet; on the south by the Chinese territory and Spiti; on the

south-west by Lahoul, Chamba, and Kishtewar, and on the west by Cashmere and Bultistan. The information obtained by Vigne and Cunningham justifies us in stating the position of Ladakh as being between lat. $32^{\circ} 20' - 35^{\circ}$, long. $75^{\circ} 30' - 79^{\circ} 30'$; and in computing the area at 26,036 square miles. The most important feature in the physical aspect of Ladakh is the great valley of the Indus, which traverses the country through its whole length, from south-east to north-west, and divides the great northern range called variously Kouenlun, Mooz Taugh, or Karakorum, from the stupendous mountains of Rupshu, Spiti, and Zaskar. The most elevated mountains rise to heights little inferior to those of any summits on the face of the globe. The climate is characterized by cold and excessive aridity.

The population is of that variety of the human race called the Mongolian by Blumenbach and his followers, and are classed under the general denomination Tibetan. The amount is estimated by Moorcroft at between 150,000 and 180,000 persons; but a decrease appears to have taken place since Moorcroft's time, and the present amount of inhabitants is presumed to be 125,000. They have the usual features of the Mongolians, but improved by intermixture with the Cashmerian; the women especially, according to Gholaum Hyder, are pretty and fair, with rosy cheeks. In moral character they are mild, good-humoured, peaceable, and honest, but timid, indolent, excessively dirty, addicted to intoxication and sexual immorality. Gholaum Hyder observes:—"They are the most peaceable race of beings in the world, very quiet, honest, and hospitable." In consequence of this disposition, crimes of violence are scarcely known. Polyandry is common among the lower orders, and, according to the last-quoted authority, under peculiarly disgusting circumstances. "In a family of two or more brothers who are poor, only one of them marries, and the wife is common to all, and no jealousies or quarrels ensue." Primogeniture here has such high privileges, that on the marriage of the eldest son, the property of the parents passes to him, and they become dependent on him for maintenance, while the younger brothers are little better than servants. The men wear close dresses of woollen cloth, and large mantles, which, for the rich, are made of European broad-cloth, for the poor of sheepskin, with the wool inwards. The dress of the grand lama or priest is yellow, that of other lamas of superior rank red; and as these dignitaries wear broad-brimmed hats, they closely resemble cardinals in costume. The dress of the women consists of a jacket and petticoat of enormous dimensions, and a sheepskin mantle. When rich, they are loaded with a variety of fantastic ornaments and uncouth jewellery. "A Ladakhi female, in full costume," observes Moorcroft, "would cause no small sensation amongst the fashionable dames of a European capital." The language is Tibetan, according

to Klaproth, the primitive dialect of the aboriginal people inhabiting the vast mountain-region between Hindostan and Tartary. It is very rough, and abounds in harsh combinations of consonants, unutterable even by those accustomed to the most rugged tongues of northern Europe. The religion is Lamaism, a form of Buddhism, resembling apparently in its moral and spiritual tenets those entertained by the early ascetics and by the Quietists of later date. In the existence of monastic establishments for both sexes, the acknowledgment of a supreme infallible head of the whole religious community, and the adoption of pageantry in public worship, some seeming resemblance has been traced to the characteristics of the Romish church. Moorcroft describes Lamaism as "a strange mixture of metaphysics, mysticism, morality, juggling, and idolatry." The transmigration of souls is received as a prominent tenet. The Deity is worshipped in the character of a trinity, but adoration is paid to a great number of inferior beings, represented by a variety of curious idols. The general character of Lamaism appears to be more gentle than that of many other superstitions, and under its influence the terrific Moguls and other Tartars have become a comparatively mild and peaceable race.

Previously to the conquest of this country by the Sikhs, the government was a simple despotism, which, during Moorcroft's residence, was administered by the khalum or prime minister of the rajah, who was himself but a mere pageant: at all times the sovereign was liable to be deposed by the intrigues of the influential lamas, and his place supplied by the next in hereditary succession. The revenue was not paid in money, the people being bound to support the rajah and his officers, not only by furnishing provisions, and all other things requisite for subsistence, but serving as domestic as well as agricultural labourers. They were likewise bound to take the field in case of collision with neighbouring states. Gholaum Hyder says, the "troops are mostly horsemen, armed with a few matchlocks, bows and arrows, and swords, and may amount in all to 2,000 men; the infantry may be about 1,200 men, armed with matchlocks, bows and arrows, and swords." They are incredibly cowardly, and so ill armed that, according to Moorcroft, on occasion of a war with their neighbours of Bultistan, the infantry had but one matchlock for ten men, and one sword for six. It is not therefore surprising that Ladakh made no resistance to the troops of Gholab Singh, the present ruler of Cashmere, who took possession of it in 1835, and still retains his acquisition.

LADNO.—A town in the Rajpoot state of Jodhpoor, 126 miles N.E. from Jodhpoor, and 81 miles N. by W. from Ajmeer. Lat. $27^{\circ} 38'$, long. $74^{\circ} 28'$.

LADWA, in Sirhind, a small territory formerly the jaghire of a Sikh chieftain, who, in consequence of the non-performance of his

feudatory obligations during the Lahore war, was deprived of his possessions, which were annexed to the British dominions. Ladwa, the principal place, is situate 22 miles N. from Kurnool, in lat. 29° 59', long. 77° 6'.

LAENADOWN, in the British district of Saugor and Nerbudda, lieutenant-gov. of the N.W. Provinces, a town on the route from Nagpoor to Jubbulpoor, 45 miles S.S.W. of the latter. Lat. 22° 34', long. 79° 44'.

LAGWAN.—A town in the British district of Bhagulpore, lieutenant-gov. of Bengal, 58 miles S.W. of Rajmahal. Lat. 24° 22', long. 87° 14'.

LAHAR, in the territory of Gwalior, or the possessions of the Scindia family, a town six miles E. of the right or E. bank of the river Sindh. In A.D. 1780, Captain Popham, in command of 2,400 infantry, a small body of cavalry, and a detail of European artillery, with a howitzer and a few field-pieces, besieged this fort, which was found to be much stronger than had been fallaciously represented by the rana of Gohud, who was anxious to have it captured from the Mahrattas. It was imperfectly breached, and as the light field-pieces could produce no farther effect on the defences, the British commander determined to make a desperate attempt at storming. By extraordinary efforts, a lodgment was made in the place. "Dreadful slaughter ensued on both sides. The enemy defended themselves with desperation, and it was not until the garrison, which had consisted of 500 men, was reduced to their killadar and a mere handful of his dependants, that quarter was demanded. The British lost 125 men." It appears to have been ceded to Scindia by the second article of the treaty of Mustafapoor, on the 22nd November, 1805. Lahar is 50 miles W. of Calpee, the same distance E. of Gwalior fort, 85 S.E. of Agra. Lat. 26° 12', long. 78° 59'.

LAHENE, in the British district of Futtehpore, lieutenant-gov. of Agra, a town on the right bank of the Ganges, 917 miles from Calcutta by the river, 107 miles above Allahabad, N.W. from the town of Futtehpore by land 15 miles. Lat. 26° 8', long. 80° 41'.

LAHORE, a large city in the Punjab, is situate about a mile east of the Ravee river. It is surrounded by a brick wall, formerly twenty-five feet high, but which has recently been lowered by the British government. Runjeet Singh ran a good trench around the wall, beyond this constructed a line of works round the entire circumference, mounted them with heavy artillery, and gave orders for clearing away such ruins and other objects as might yield shelter to assailants. The circuit of this line of fortifications exceeds seven miles. The fort or citadel occupies the north-west angle of the city, and contains extensive magazines and manufactories of warlike stores. There are several large and handsome mosques. The Padshah mosque, said to have been built by Aurungzebe, is a massive, lofty structure of red sandstone, of great size, and ornamented

with spacious cupolas. It was converted into a barrack by Runjeet Singh. The Vizier Khan mosque is also a fine edifice, ornamented with lofty minarets, and covered with varnished tiles, inscribed with Arabic sentences, which are popularly supposed to comprise the entire of the Koran. These splendid structures have been desecrated by the Sikhs, who killed swine in them, and converted their courts into stables. The Sonara mosque is another splendid building. There are besides many handsome mosques and Hindoo temples. One of the greatest ornaments in the neighbourhood is the tomb of the Mogul emperor Jehangir. It is very extensive and beautiful, of a quadrangular figure, with a minaret at each corner, rising to the height of seventy feet. The principal material is red sandstone, but there is a profusion of ornaments executed in marble, arranged in elegant mosaics, representing flowers and texts of the Koran in Arabic and Persian. These texts consist of a hundred repetitions of the name of God in different modes of expression. This beautiful monument is about three miles west of Lahore. It is separated from the town by the river Ravee, which has lately swept away part of the wall inclosing the tomb, and threatens speedily to engulf the structure itself. Runjeet Singh gave it as a residence to a French officer of the name of M. Amise, who caused it to be cleared out and put in repair, but died shortly afterwards. His fate was considered by the Mahometans as retributive of his impiety in desecrating the sacred pile, which has since been closed up. Another of these huge ornamental tombs is styled that of Anarkalli, a youth, according to tradition, a favourite of one of the emperors, who, instigated by jealousy, having seen him smile at a lady of the imperial zenana, caused him to be put to death, by being built up in a brick cell, and this splendid mausoleum to be raised over him. Unfortunately, the tone of Mahometan morals is not such as to render the story incredible. Three miles north-east of Lahore is the garden of Shah Jehan, the Shalimar, or "House of Joy." It is about half a mile long, with three successive terraces, rising one above the other, and contains 450 fountains, which throw up water, subsequently received into marble tanks. Runjeet Singh barbarously defaced this superb monument of oriental magnificence, by removing a large portion of the marble embellishments to his new capital, Amritsar.

The streets of Lahore, which are very narrow, contain numbers of lofty but gloomy houses, inclosed within extensive dead walls. The bazars, though numerous, and stocked with profusion of costly wares, are in general contracted and mean. There is an abundant supply of water from wells in the town. The vicinity is fertile and well cultivated, being covered with the most luxuriant gardens and orchards. The great extent and size of the ruins scattered over the adjacent country bear evidence of the former greatness of the city.

Von Hügel describes the scene as a huge mass of serais, palaces, and ruins, which must be seen, to form any notion of their multitude and extent. The population is still considerable, the streets being crowded in an extraordinary degree; yet in this respect, as well as in regard to trade, Lahore, according to Burnes, is greatly excelled by Amritsar, which has recently grown up into a successful rival; for though Runjeet Singh resided much at Lahore, where he delighted to show his state, Amritsar was both the spiritual and commercial capital of his dominions. The statement of Burnes, however, as to the comparative amount of the population of the two cities, has been disputed, and the superiority claimed for Lahore, which, even in its decay, is a great city. Von Hügel says that it stretches in a semicircular form four or five miles along the branch of the Ravee, and yet that, if we judge from the ruins, it is not one-tenth part the size that it once was. It is very difficult to make even any safe guess at its population; but from its extent and the multitudes which throng it, the number can scarcely be less than from 94,000 to 95,000. This indeed is a great declension from the amount in the time when it was the residence of the Mogul emperors, and was nine miles in length; the population then, probably, was eight or ten times the present number.

Lahore partakes to some extent of the advantages of education, and even forms a centre for their diffusion. It is the seat of an establishment which is at once a vernacular school and a college for the study of Hindoo and Mahomedan learning and European knowledge, through vernacular media. A portion of the funds of the institution is contributed by the British government, but it is chiefly supported by subscriptions from Bhopal and four other native states, the chiefs and people of which regard its maintenance as inseparably connected with British protection and supremacy; so that, in the language of Major Cunningham, "it is a kind of fashion to contribute to the school." In 1849 the number of pupils was 541.

Lahore appears to have fallen into the hands of Mahmood of Ghiznee in 1069, on his advance to destroy Nagarcot; and in 1152 it became the capital of the Gaznevide dynasty. In 1186 it was captured from the last Gaznevide by Sahub-ud-dein, the Ghorian monarch. In 1523 it was taken by Sultan Baber, whose posterity made it a favourite residence, and raised it to its greatest splendour. In 1748 it fell into the hands of Ahmad Shah, the first Durani emperor. In 1799 Runjeet Singh was, by Zeman Shah, invested with the government of Lahore, with the title of rajah. He immediately manifested his determination to possess the substance as well as the ensign of power, by expelling three Sikh sirdars, who attempted to retain possession; and he thereupon made it one of his favourite places of residence. When, after the death of that chieftain, the enormities committed by those who grasped his power, com-

pelled the English to put an end to his dynasty, Lahore became, with the rest of the Punjab, British. The events connected with its subjugation are related in the historical sketch of the Punjab. Lahore is in lat. 31° 36', long. 74° 21'.

LAHOREE BUNDER, in Sind, a village on the south or left bank of the Buggaur, or western branch of the Indus, 20 miles from the Pittiee mouth. When visited by Alexander Hamilton, in 1699, it was the principal port of Sind, being accessible for ships of 200 tons burthen; and at the close of the last century it was the seat of an English factory. It has since fallen to decay, in consequence of the contiguous channel having ceased to be navigable. Lat. 24° 32', long. 67° 28'.

LAHOUL, in the north-east of the Punjab, a British district, bounded on the north-east by Ladak; on the east by Spiti; on the south-west by Kulu; and on the west by Chamba and Kishtawar. It is about sixty-eight miles in length, and thirty-four in breadth, and contains an area of 1,872 square miles. It is situated between lat. 32° 5'—33° 8', long. 76° 45'—77° 46'. This territory is surrounded by lofty mountains; the Ritanka Pass, on the south, having an elevation of 13,300 feet, and the Bara Lacha Pass, on the north-west, 16,500; some peaks in the vicinity rising 1,000 feet higher, and being covered with perpetual snow. Lahoul is traversed by innumerable torrents, the feeders of the Surajbhaga and the Chandrabhaga, the junction of which forms the river Chenaub. The elevation of the whole territory must be very great, as Kishtawar, above 100 miles lower down the course of the rapid Chenaub, is more than 5,000 feet above the level of the sea. There are no towns in this secluded tract, the only collections of habitations being two small hamlets, one called Gosha, the other Tand, both situate close to the confluence of the Surajbhaga and Chandrabhaga. Notwithstanding the elevation of the surface, good crops of grain are produced.

LAIDAH.—A town in the British district of Rangpur, lieut.-gov. of Bengal, 52 miles E.N.E. of Hazareebagh. Lat. 24° 12', long. 86° 11'.

LAHURAH, in Sirhind, a village on the route from Hansee to Loodiana, and 16 miles S. of the latter town. It is situate in a country having a surface slightly undulated, moderately fertile, and comparatively cultivated. Distant N.W. from Calcutta 993 miles. Lat. 30° 42', long. 75° 53'.

LAKAHPOOR, in the British district of Mynpoorie, lieut.-gov. of the N.W. Provinces, a village 20 miles N. of the town of Mynpoorie. Lat. 27° 31', long. 78° 57'.

LAKAHURAH, in the Punjab, a village on the route from Lahore to Mooltan, 50 miles N.E. of the latter city. It is situate on the left bank of the Ravee, about 30 miles above

LAK—LAL

its confluence with the Chenaub. Lat. $30^{\circ} 33'$, long. $72^{\circ} 13'$.

LAKGWADWA.—A town in the British province of Aracan, situate 93 miles S.S.E. of Aracan. Lat. $19^{\circ} 30'$, long. $93^{\circ} 58'$.

LAKHAJUMOGARI.—A town in the native state of Nepal, situate on the right bank of a branch of the Marachangdi river, and 67 miles N.W. by W. from Khatmandoo. Lat. $28^{\circ} 14'$, long. $84^{\circ} 26'$.

LAKHA MANDAL, in Jaunsar, a ruined town on the right bank of the Jumna, and 300 feet above it. Some celebrity attaches to it in the Hindoo legends, in which it is regarded as one of the temporary residences of the Pandus, so famous in the heroic ages of Hindustan. Lat. $30^{\circ} 44'$, long. $78^{\circ} 7'$.

LAKNAOTI, in the British district of Suharunpoor, lieut.-gov. of the N.W. Provinces, a village on the route from Kurnoul to Suharunpoor, and 15 miles N.E. of the former place. It is situate on the Sendellie, a torrent falling into the Jumna a few miles lower down. Distant N.W. from Calcutta 980 miles. Lat. $29^{\circ} 46'$, long. $77^{\circ} 16'$.

LAKSA, in the British district of Barasut, lieut.-gov. of Bengal, a village, with a police-station, situate on the Golgosi, an offset of the Ganges, which, some miles lower down, or farther south, is lost in the Sunderbunds. Laksa is distant from Calcutta, E., 40 miles. Lat. $22^{\circ} 44'$, long. $89^{\circ} 4'$.

LALDERWAZA.—A pass on the route from Kheree to Dehra, over the Sewalik range, separating the British districts of the Dehra Doon and Suharunpoor. It was a secondary station in the trigonometrical survey of the Himalaya. Elevation above the sea 2,935 feet. Lat. $30^{\circ} 13'$, long. $77^{\circ} 58'$.

LALDHANGI, or **LALL DONG**.—A village on the northern frontier of the British district of Bijnour, towards Kumaon. Thither, in 1774, Fazzullah Khan, the Rohilla leader, retreated after his defeat by the British in the battle of Tesnah, and, being closely pressed by the victorious army, aided by the nawab of Oude, entered into a convention, acknowledging the suzerainty of that potentate. Distant 925 miles N.W. from Calcutta. Lat. $29^{\circ} 52'$, long. $78^{\circ} 23'$.

LALÉE RIVER.—A small tributary of the Dihong, rising in lat. 28° , long. $95^{\circ} 1'$, in the mountainous territory inhabited by the Abor tribes. Flowing in an easterly direction, it falls into the Dihong river, in lat. $27^{\circ} 56'$, long. $95^{\circ} 23'$.

LALER FORT, or **LALLNEIR**, in the British district of Bolundshuhur, lieut.-gov. of the N.W. Provinces, a village on the route from Khasgunge to Meerut, and 61 miles S.E. of the latter. Lat. $28^{\circ} 13'$, long. $78^{\circ} 7'$.

LALGLAH.—A river of Orissa, rising in lat. $19^{\circ} 35'$, long. $83^{\circ} 18'$, on the northern boundary of the native state of Jeypoor,

through which it flows in a southerly direction for fifty-three miles. Subsequently traversing the British district of Vizagapatam in a southeasterly direction for eighty miles, it falls into the Bay of Bengal, in lat. $18^{\circ} 12'$, long. 84° .

LALGUNJ.—A town in the British district of Tirhoot, lieut.-gov. of Bengal, 18 miles N.N.E. of Dinapoor. Lat. $25^{\circ} 50'$, long. $85^{\circ} 12'$.

LALGUNJ.—A town in the territory of Oude, situate 19 miles N.E. from the left bank of the Gogra river, and 21 miles N.E. from Oude. Lat. $26^{\circ} 59'$, long. $82^{\circ} 28'$.

LALITA PATUN.—A town in the native state of Nepal, six miles S. from Khatmandoo, and 78 miles N.E. by N. from Bettiah. Lat. $27^{\circ} 38'$, long. $85^{\circ} 17'$.

LAL KANYO, in the Punjab, a village situate in the Doab of the two rivers Chenaub and Jhelum, and very near their junction. Lat. $31^{\circ} 14'$, long. $72^{\circ} 13'$.

LALLEE, in the Punjab, a town in the Doab of Jetch, and nearly equidistant from the Chenaub and Jhelum. It is situate in a level desert tract, and at the base of an inconsiderable eminence, the summit of which is occupied by a station of fakirs, and is also a much-frequented place of pilgrimage. The population of the town is about 5,000. Lat. $31^{\circ} 49'$, long. $72^{\circ} 30'$.

LALLGUNGE, in the British district of Goruckpore, lieut.-gov. of the N.W. Provinces, a small market-town on the route from the cantonment of Goruckpore to that of Sultanpoor, in the territory of Oude, 43 miles S.W. of the former, 67 N.E. of the latter. It is situate on the small river Kooanuh, so that water is abundant. Lat. $26^{\circ} 43'$, long. $82^{\circ} 56'$.

LALLGUNGE.—The principal place of the pergunnah of the same name, in the British district of Mirzapore, lieut.-gov. of the N.W. Provinces, a small town on the route from the city of Mirzapore to Saugor, and 20 miles S.W. of the former. It is situate on the plateau, which is slightly elevated above the valley of the Ganges, lying to the north and north-east, and separated from the more depressed tract by the Tara ridge, traversed by the Tara Ghat or pass. Lallgunge has a bazar, and is well supplied with water. An anonymous British traveller describes it as a large place: it is styled by Jacquemont a very large village, in a wonderfully sterile country. Garden states it to be partially cultivated. The road is excellent, having been made under the superintendence of the East-India Company's engineers. Elevation above the sea 504 feet. Lat. $25^{\circ} 1'$, long. $82^{\circ} 25'$.

LALLOO, in Sinde, a village on the road from Bukkar to Hyderabad, 60 miles S. of the former town. Lat. $26^{\circ} 52'$, long. $68^{\circ} 57'$.

LALLPOOR, in the British district of Cawnpoor, lieut.-gov. of the N.W. Provinces, a village on the route from the cantonment of

Futtehgurh to that of Cawnpore and 29 miles N.W. of the latter. Lat. $26^{\circ} 47'$, long. $80^{\circ} 9'$.

LALLPORE.—A town in the British district of Purneah, lieutenant-gov. of Bengal, 21 miles N.W. of Purneah. Lat. $25^{\circ} 59'$, long. $87^{\circ} 20'$.

LALPOOR, in the British district of Moradabad, lieutenant-gov. of the N.W. Provinces, a village on the route from the town of Moradabad to Almora, and 19 miles N. of the former. Lat. $29^{\circ} 5'$, long. $78^{\circ} 54'$.

LALPOOR, in the peninsula of Kattywar, province of Guzerat, a town in the district of Hallar, situate 170 miles S.W. of Ahmedabad, 200 miles W. of Baroda. Lat. $22^{\circ} 12'$, long. $70^{\circ} 6'$.

LALSOAT.—A town in the Rajpoot state of Jeypoor, situate 43 miles S.E. from Jeypoor, and 110 miles E. from Ajmeer. Lat. $26^{\circ} 32'$, long. $76^{\circ} 29'$.

LAMBA.—A town in the Rajpoot state of Jodhpoor, on the right bank of a branch of the Loonee river, and 50 miles E.N.E. from Jodhpoor. Lat. $26^{\circ} 33'$, long. $73^{\circ} 52'$.

LAMBA, or **CHOTA LAMBA,** in the territory of Kishengurh, in Rajpootana, a town on the route from Agra to Nusseerabad, 203 miles S.W. of former, 20 N.E. of latter. It has a bazar, and water is abundant. Lat. $26^{\circ} 24'$, long. $75^{\circ} 6'$.

LAMEEA.—A town in the Rajpoot state of Jeypoor, situate 35 miles N.W. from Jeypoor, and 75 miles N.E. from Ajmeer. Lat. $27^{\circ} 19'$, long. $75^{\circ} 33'$.

LAMJUN.—A town in the native state of Nepal, situate on the right bank of the Marachandi river, and 80 miles W.N.W. from Khatmandoo. Lat. $28^{\circ} 10'$, long. $84^{\circ} 8'$.

LANDEE KHANA.—The most difficult part of Khyber Pass, lying about twenty-three miles from Kadam, the eastern entrance, and seven from the western entrance. The pass here descends very steeply to the west, and is both narrow and rugged, so as to be with difficulty practicable for wheel-carriages. It is in one place a mere gallery, twelve feet wide, with the lofty rock rising like a wall on the north side, and a deep precipice on the south. In April, 1842, the British army under General Pollock, when forcing the Khyber Pass, encamped near this spot. The elevation above the sea is 2,488 feet. Landee Khana is in lat. $34^{\circ} 10'$, long. $71^{\circ} 10'$.

LANDOUR, in the British district of Dehra Doon, a sanatory station on the ridge bounding that valley on the north, was founded for the reception of invalids from Meerut and other cantonnments in the plains of the North-Western Provinces. It is situate on a ridge running nearly east and west, and is three miles east of the sanatory station of Mussoree, but connected with it by an intermediate straggling series of buildings. Barracks and other public buildings and private residences

are scattered over the rugged ridges and slopes, which form a wild and varied scene, rendered more striking by magnificent views of the distant Himalayas, covered with perennial snow. According to the notice in the Bengal and Agra Guide of 1842, the station contained, about that time, a church, post-office, forty-two private dwelling-houses, large hotel, library, temperance-room, hospital, five barracks for invalid European soldiers, seven officers' quarters, mess-room, guard-room, storehouse and magazine, quarter for steward, quarter for hospital sergeant, godown (storehouse) for commissary stores, godown for barrack department, bakehouse, mule-shed. At the same time, the average number of officers doing duty at the depôt was eight; of Europeans annually sent up, the average number was 110; of those who returned cured, 100. In consequence of the rapid increase of elevation, the diminution of temperature is very striking to a visitor from the plains, as the thermometer has been found to fall from 90° to 52° in a journey of two or three hours. The maxima and minima of degrees of temperature during the successive months, the variations being taken between 6 A.M. and 6 P.M., were,—January, 53° — 31° ; February, 60° — 32° ; March, 67° — 44° ; April, 76° — 55° ; May, 78° — 58° ; June, 79° — 54° ; July, 75° — 61° ; August, 72° — 60° ; September, 70° — 58° ; October, 69° — 45° ; November, 58° — 34° ; December, 56° — 39° . The burial-ground of the united stations is situate on the northern face of the western extremity of Landour. The highest point of the station is 7,579 feet above the sea. Distant N.W. from Calcutta 1,028 miles. Lat. $30^{\circ} 27'$, long. $78^{\circ} 10'$.

LANGCHEN KHARAB.—The name given to the Sutluj river near its source. See **SUTLUJ**.

LANGKONG.—A town of Eastern India, in the native state of Muneepoor, 24 miles W. from Muneepoor, and 116 miles E. from Silhet. Lat. $24^{\circ} 50'$, long. $93^{\circ} 40'$.

LANGLO, or **NANGLOEE,** in the British district of Delhi, lieutenant-gov. of the N.W. Provinces, a village on the route from Rohtuk to the city of Delhi, and 10 miles W. of the latter. Lat. $28^{\circ} 40'$, long. $77^{\circ} 7'$.

LANJEE.—A town in the British district of Rutnageriah, presidency of Bombay, 23 miles S.E. of Rutnageriah. Lat. $16^{\circ} 50'$, long. $73^{\circ} 40'$.

LANJEE, in the territory of Nagpore, a town on the route from Hazareebagh to Nagpore, 467 miles S.W. of the former, 107 E. of the latter. It is situate in a difficult country, in a range of mountains stretching southward from the Vinthya range, and called the Lanjee Hills, from this town. Lanjee is in lat. $21^{\circ} 32'$, long. $80^{\circ} 38'$.

LARGEY, a dreary valley north of the Derajat, and separated from the Indus by a prolongation of the Salt range of mountains. It is about forty miles in length and eight or

ten in breadth, arid, barren, and desert, being visited merely because the great route from north to south, along the western side of the Indus, passes through it. The middle part is in lat. $32^{\circ} 20'$, long. $71^{\circ} 5'$.

LARH, in the British district of Goruckpore, lieut.-gov. of the N.W. Provinces. It is a market-town, and one of the most considerable in that part of the district, having, according to Buchanan, 1,000 houses. It is situate five miles from the left bank of the Ghogria, two from the left of the Chota Gundack, 50 miles S.E. of Goruckpore cantonment. Lat. $26^{\circ} 10'$, long. $84^{\circ} 2'$.

LARKHANA, in Sinde, a town seven miles west of the Indus, situate on a considerable feeder of that river, and into which it falls about twenty-five miles below Sukkur. The surrounding country, which is fertile, populous, and highly cultivated, is probably the finest tract in Sinde. The town is rudely fortified, and has a citadel at its western end, which, during the rule of the Talpoor dynasty, was the head depôt of the artillery of the ameer of Hyderabad. Larkhana is one of the principal grain-marts of Sinde, and has a good bazar, containing 370 shops, well supplied with wares. The principal manufactures are the weaving of silk and cotton, and the place derives some commercial advantages from being situate on the great route from Southern Sinde to Cutch, Gundawa, Beloochistan, and Kandahar, through the Bolan Pass. The population has been estimated at 10,000 or 12,000. Near the town, on the banks of the Narra, is a large ruined fortress, called Maihota, built on a huge mound. Larkhana is in lat. $27^{\circ} 30'$, long. $68^{\circ} 10'$.

LASUR.—See LOSUR.

LASWARI, in the Rajpoot territory of Macherry or Alwur, is a village situate on an eminence on the left bank of the Mahnus Nye, a small river, hence by some called the Laswari. This village and its vicinity were, on the 1st of November, 1803, the scene of one of the most obstinately contested and sanguinary battles recorded, which terminated in the utter defeat of the Mahrattas by the British, under the command of General Lake, afterwards Lord Lake. The Mahratta force, consisting of seventeen of Scindia's regular battalions of infantry, amounting to about 9,000 men, together with 3,000 cavalry and seventy-two pieces of artillery, under the command of Monsieur Dundernague, a French adventurer, was in hasty retreat attacked by the British general with his cavalry, which he had by a forced march brought on five hours in advance of his infantry. In this desperate service, the cavalry suffered dreadfully, especially from the powerful and well-served artillery of the Mahrattas; but, after the infantry came up, the fate of the day became no longer doubtful. The British arms steadily advanced, and by four o'clock in the afternoon, the destruction of the hostile army was complete. Of the British, 172 were killed, and 652 wounded. "The enemy left in the

possession of the British troops the whole of their bazars, camp equipage, and baggage, with a considerable number of elephants, camels, and upwards of 1,600 bullocks, seventy-two pieces of cannon of different calibre, forty-four standards of colours, and sixty-four tumbrils completely laden with ammunition. Three tumbrils with money were also captured, together with fifty-seven carts laden with matchlocks, muskets, and stores, and some artificers' carts." A medal commemorative of the victory was struck in London in 1851, and presented, with the sanction of her Majesty, to the surviving officers and soldiers who were present at the engagement.

The Mahnus Nye, or stream of Laswari, has its origin near the south-western frontier, towards Jeypore, and, holding a course generally easterly, passes the eastern frontier into the territory of Bhurtpore, where it is probably lost in the marshes about Deeg, after a total course of 100 miles. When crossed by Jacquemont, in lat. $27^{\circ} 25'$, long. $76^{\circ} 46'$, and at about fifty miles from its source, it was found, on the 23rd of February, and consequently in the dry season, a small river with a gentle current. At Laswari, thirty miles farther from the source, it was, on October 21st, and some time after the rainy season, found to be "a rivulet, the banks of which were very high, and difficult of access." The village of Laswari is 128 miles S. of Delhi, by Alwur. Lat. $27^{\circ} 33'$, long. $76^{\circ} 59'$.

LATHEE, in the Rajpoot state of Jessulmere, a town on the route from Pokrun, in Jodhpore, to the town of Jessulmere, and 25 miles N.W. of the former. Lat. $27^{\circ} 2'$, long. $71^{\circ} 39'$.

LAUKKNANG.—A town of Eastern India, in the British province of Tenasserim, 161 miles S.S.E. of Moumein. Lat. $14^{\circ} 11'$, long. $98^{\circ} 23'$.

LAULGOODY.—A town in the British district of Trichinopoly, presidency of Madras, 10 miles N.E. of Trichinopoly. Lat. $10^{\circ} 53'$, long. $78^{\circ} 53'$.

LAUT.—A town in Hyderabad, or dominions of the Nizam, situate 10 miles S. from the right bank of the Godavery river, 137 miles N.W. by N. from Hyderabad. Lat. $18^{\circ} 58'$, long. $77^{\circ} 21'$.

LAWA.—A town of Malwa, in the native state of Tonk, 21 miles N.W. by N. from Tonk, and 63 miles E. from Ajmeer. Lat. $26^{\circ} 23'$, long. $75^{\circ} 43'$.

LAWAEN.—See LOHAEN.

LAWAH, in the Rajpoot territory of Oodepore or Mewar, a town on the route from Neemuch to Jodhpore, 85 miles N.W. of former, 107 S.E. of latter. It has a bazar, and is abundantly supplied with water from wells. Population about 3,000. Lat. $25^{\circ} 12'$, long. $74^{\circ} 2'$.

LAYGEAH.—A town of Burmah, 102 miles E.S.E. from Ava, and 233 miles N.E. from Prome. Lat. $21^{\circ} 20'$, long. $97^{\circ} 29'$.

LE, in Ladakh, or Middle Tibet, of which it is the capital, is situated about two miles from the right or northern bank of the Indus, here called *Sin-kha-bah*. A narrow sandy plain stretches between the river and a chain of mountains, which rise on the north about 2,000 feet; and on this level space the town is built. It is inclosed by a wall surmounted at intervals with conical or square towers, and extending on each side to the summit of the mountains. The streets are very irregular and intricate; in many places they are covered over. The houses, varying in height from one to three stories, and in some instances extending to more, are built partly of stone, partly of unburned brick: being whitewashed, they have a lively appearance. They generally have wooden balconies in front. The roofs are flat and ill-constructed of the trunks of poplars, covered with a layer of willow twigs, and this with another of straw, a coat of mud overlaying the whole, which at last constitutes a very insufficient defence against rain. The walls taper as they rise, so that the outer surface slopes inwards. The rain and cold are very imperfectly excluded by wooden shutters, or strong curtains drawn across the windows. There are no chimneys, and the wood-smoke is consequently offensive and suffocating, often producing severe and permanent injury to the eyes. The furniture is very rude, and withal very scanty. The floor sometimes serves for bed, chair, and table, while sheep, goats, and other stock, not unfrequently lodge in the same room with the family. The palace of the rajah, though simple in construction, and rude in finish, yet being several stories high, and having a front of 250 feet, is a conspicuous object. There are several temples as rudely built as the houses. The hereditary rajah, a votary of Lamaism, was deposed by Gholab Singh, the present ruler of Cashmere, who now holds the country.

Le is important as the great rendezvous for the intercourse between the Punjab and Chinese Tartary, and the principal mart for the sale of shawl-wool brought from the latter region. It has above 500 houses, and probably 4,000 inhabitants. Its elevation above the sea is stated by Moorcroft to be more than 11,000 feet, and by Vigne to be about 10,000. Lat. $34^{\circ} 10'$, long. $77^{\circ} 40'$.

LEBONG, in the British district of Kumaon, lieut.-gov. of the N.W. Provinces, a lofty ridge of the main range of the Himalaya. It runs in a direction from south-east to north-west, and is crossed by an excessively difficult and dangerous pass over perpetual snow, from the mahall or subdivision of Beasans on the east, to that of Dharma on the west. Webb, who crossed it from Beasans to Dharma, in June, found a "steep, difficult, fatiguing ascent, former [lower] part over beds of ice, latter [higher] deep and perpetual snow, frozen hard. Severe oppression in breathing, unable to proceed twenty paces at a time without halting."

Still higher up, he found "steep ascent, recent snow in parts knee-deep;" and after crossing the crest of the pass, "the whole of this distance [1,516 fathoms] excessively steep and perilous descent, the snow nearly knee-deep. The declivity was so great, that it was necessary to employ people with hatchets to make small hollows in the snow where hard, in which the foot might be placed. As in the ascent all had experienced intolerable difficulty in breathing, so in the descent a violent determination of blood to the head, with severe pain, was equally general. The passage of this ghat occupied twelve hours for people who did not carry loads; none of the bearers of baggage came up before the second day, and some loads not till the second evening. The exertions of this day occasioned a general illness in my camp." The crest of the pass is 18,942 feet above the sea. Lat. $30^{\circ} 20'$, long. $80^{\circ} 39'$.

LEELMA.—A town in the Rajpoot state of Jodhpoor, 178 miles W. by S. from Jodhpoor, and 88 miles S.S.W. from Jessulmeer. Lat. $25^{\circ} 48'$, long. $70^{\circ} 24'$.

LEENGRA.—A town in the British province of Sattara, presidency of Bombay, 47 miles S.E. by E. of Sattara. Lat. $17^{\circ} 20'$, long. $74^{\circ} 41'$.

LEIA, in the Punjab, an important commercial town, situate on a small branch of the Indus, about eleven miles eastward of the main stream. It is a place of great business, not only in direct but in transit trade, as it lies on the main road from Hindostan to the west, by the Kahere ferry, and is, besides, the mart for the abundant and rich produce of the surrounding fertile country. The principal articles of sale are indigo, madder, sugar, silk, cotton, wool, iron, copper, groceries of various kinds, ghee or clarified butter, and grain. The population is 15,000, and must have greatly increased from the time of Elphinstone, who describes it as a poor place, containing 500 houses. Lat. $30^{\circ} 57'$, long. $71^{\circ} 4'$.

LEIPENGA.—A town on the south-west frontier of Bengal, in the British district of Sumbulpoor, 20 miles N. of Sumbulpoor. Lat. $21^{\circ} 44'$, long. 84° .

LELYP.—A town in the native state of Nepal, situate on the right bank of the Tambur river, and 140 miles E. by S. from Khatmandoo. Lat. $27^{\circ} 24'$, long. $87^{\circ} 30'$.

LEMYO RIVER.—See **ARRACAN**.

LENGLOONG.—A town in the native state of Bhotan, 118 miles N.N.W. from Gowhaty, and 106 miles N. by E. from Goalpara. Lat. $27^{\circ} 40'$, long. $90^{\circ} 58'$.

LEROREE, in the British district of Budayon, lieut.-gov. of the N.W. Provinces, a village on the route from Bareilly to Delhi, and 37 miles W. of the former. Lat. $28^{\circ} 26'$, long. $78^{\circ} 56'$.

LETKHOK, the name of a pass leading

from the Arracan coast of the Bay of Bengal over the Youmadoung Mountains, to the Bassein branch of the Irrawaddy river, in the British territory of Pegue. The crest of the pass is about lat. $17^{\circ} 28'$, long. $94^{\circ} 55'$.

LEYRAHGUR.—A town in the native state of Keunjur, on the south-west frontier of Bengal, 31 miles W.S.W. from Keunjur, and 81 miles E. from Sumbulpoor. Lat. $21^{\circ} 26'$, long. $85^{\circ} 16'$.

LI, or SPITI RIVER, the principal tributary of the Sutlej, and at some seasons not inferior to it in magnitude, rises, according to Gerard, on the northern slope of the Paralasa range, which divides its feeders from those of the Chenab, on the south-western side, in about lat. $32^{\circ} 39'$, long. $77^{\circ} 44'$. Near its source it was forded by Trebeck, the fellow-traveller of Moorcroft, and is by him called the Parang La river, "to which frequent supplies were brought by rivulets and rills from the rocks on either hand, originating in the snow-beds, with which every nook and recess was filled. In one part of the defile, a mass of snow formed a complete bridge across the stream." Flowing circuitously, but generally in a south-east direction, for a distance of fifty-six miles, it receives, in lat. $32^{\circ} 7'$, long. $78^{\circ} 12'$, the Peenoo, a considerable feeder, having a course of about thirty-eight miles; and twenty-eight miles lower down, at the distance of ninety-four miles from their remotest source, the collected waters are joined by the Para or Parati, flowing from the wilds of Rupshu. At the confluence, in lat. $32^{\circ} 4'$, long. $78^{\circ} 38'$, the respective streams were measured in August by Gerard, who found the Spiti seventy-two feet wide, and the Para ninety-eight, and more rapid than the other. Their depths could not be ascertained. At Shalkur, about six miles below the confluence, the bed of the river has an elevation of 10,014 feet above the sea; and if we allow the length of course so far to be 100 miles, and the elevation of the source to exceed 17,000 feet, the slope of the channel is not less than sixty-nine feet per mile. J. G. Gerard, in his passage from Kulu to Ladak, came upon the stream at an elevation of 13,500 feet. From the confluence of the Para, the Spiti or Li flows about twenty miles in a direction nearly due south, to its confluence with the Sutlej, receiving in that interval several feeders, of which the principal are the Yoolang and Leepak, from the west; and by these accessions becomes a very considerable stream, measuring in one part of its course, at Leeo, about six miles from the Sutlej, in width 274 feet, the current being very rapid, and the body of water great. The confluence of the Li and Sutlej, in lat. $31^{\circ} 48'$, long. $78^{\circ} 41'$, and at an elevation of 8,494 feet above the sea, is described by Gerard as very striking. "The character of the gulf at the confluence is certainly one of the wonders of the world. The flanks of the passage are solid granite, stratified as before

observed, and seem perfectly mural. The contrast between the two streams is striking: the Li issues forth from its almost subterranean concealment in a calm blue deep body, to meet the Sutlej; but the salutation is scarcely received before it is grasped in the embrace of its impetuous consort." The noise made by the collision of the two streams, and echoed by the surrounding heights, is completely stunning.

LIDUR, a river of Cashmere, is one of the feeders of the Behut or Jhelum, and by some considered the principal of the streams which unite to form its volume. It rises on the southern slope of the mountain bounding Cashmere on the north-east, in lat. $34^{\circ} 8'$, long. $75^{\circ} 48'$, and at an elevation of probably not less than 14,000 feet. Its current is in consequence very rapid until it reaches the alluvial tract in the bottom of the valley, where it becomes a dull and muddy stream. After a course of about forty-five miles in a south-westerly direction, it falls into the Jhelum, about five miles below Islamabad, in lat. $33^{\circ} 45'$, long. $75^{\circ} 16'$. At the confluence, the volume of water of the Lidur is scarcely inferior to that of the Jhelum.

LILAJUN RIVER, a tributary of the Ganges, rises in lat. $23^{\circ} 35'$, long. $84^{\circ} 21'$. Taking a northerly direction for eighty miles through the British district of Ramgurb, sixty miles through Behar, and twenty-five miles through Patna, it makes a bend eastward, and, flowing for sixty-five miles parallel to the Ganges, forms a junction with that river in lat. $25^{\circ} 16'$, long. $86^{\circ} 10'$.

LILHA.—A town in the territory of Oude, situate on the left bank of the Gumtee, 40 miles S.E. of Lucknow. Its principal business is in grain, cotton, and dyeing. Lat. $26^{\circ} 35'$, long. $81^{\circ} 40'$.

LILOKHERI, in Sirhind, a village on the route from Kurnal to Loodiana, and 12 miles N.W. of the former town. It is situate near the right bank of the Chitang river or torrent, and is a meanly-built place, surrounded by a mud wall, within the inclosure of which are two or three lofty watch-towers, which overlook the surrounding country. There is a good supply of water from a tank and wells, and the road in this part of the route is good. This village is the principal place of a small district belonging to a chief of the protected Sikhs, and yielding him an annual revenue estimated at 400*l.* sterling. Distant N.W. from Calcutta 975 miles. Lat. $29^{\circ} 50'$, long. $76^{\circ} 59'$.

LIMRA, in the peninsula of Kattywar, province of Guzerat, a town in the district of Gohilwar, situate on a small river, which, forty miles eastward, falls into the Gulf of Cambay. It is the principal place of a subdivision containing five villages, and paying an annual tribute of 1,139 Ahmedabad sicca rupees to the Guicowar, and of 300 to the nawab of

Joonagurh. Distance from Ahmedabad, S.W., 165 miles; Baroda, S.W., 110; Surat, N.W., 90; Bombay, N.W., 210. Lat. $21^{\circ} 47'$, long. $71^{\circ} 37'$.

LIMREE, in the peninsula of Kattywar, province of Guzerat, a town situate in the prant or district of Jhalawar, on the river Bogwara, tributary to the Muchu. It was formerly fortified, but the rampart inclosing it is fast going to ruin. The town, however, is extensive, and noted for the number of wealthy capitalists residing in it. The talook or subdivision annexed to it contains forty towns and villages, a population of 9,040, and pays an annual tribute of about 1,994*l.* to the British government. The chief is a Rajpoot. Distance from Ahmedabad, S.W., 65 miles; Baroda, W., 90; Bombay, N.W., 265. Lat. $22^{\circ} 33'$, long. $71^{\circ} 47'$.

LINGAGERRY.—A town in a detached portion of the British district of Masulipatam, presidency of Madras, 102 miles W.N.W. of Masulipatam. Lat. $16^{\circ} 53'$, long. $79^{\circ} 52'$.

LINGARA.—A town in one of the recently sequestered districts of Hyderabad, or dominions of the Nizam, situate 54 miles W. by S. of Ellichpoor. Lat. 21° , long. $76^{\circ} 48'$.

LINGAROO.—A town in the native state of Nepal, eight miles from the left bank of the Kalee river, and 77 miles E.N.E. from Almora. Lat. $29^{\circ} 56'$, long. $80^{\circ} 55'$.

LINGASAGOOR.—A town in one of the recently sequestered districts of Hyderabad, or dominions of the Nizam, situate nine miles N.E. of Moodgul. Lat. $16^{\circ} 5'$, long. $76^{\circ} 34'$.

LINGO.—A town in the native state of Sikhim, situate on the right bank of the Teesta river, and 34 miles N. by E. from Darjeeling. Lat. $27^{\circ} 30'$, long. $88^{\circ} 30'$.

LINGUMPURRO.—A town in the British district of Rajahmundry, presidency of Madras, 18 miles N. by W. of Samulkottah. Lat. $17^{\circ} 18'$, long. $82^{\circ} 11'$.

LINGWAR, in Bussahir, a village close to the right bank of the Pabur, and a little below the confluence of the Sipoon. Elevation above the sea 8,759 feet. Lat. $31^{\circ} 18'$, long. $78^{\circ} 1'$.

LINYA.—A town in the British province of Tenasserim, 48 miles S. by E. of Tenasserim. Lat. $11^{\circ} 27'$, long. $99^{\circ} 13'$.

LINYA, a river of the Mergui district of the Tenasserim provinces, rises in lat. $11^{\circ} 17'$, long. $99^{\circ} 13'$, on the western slope of the mountains forming the eastern boundary of those territories, and flowing first in a northern direction for twenty-five miles, and subsequently north-west for thirty-eight miles, falls into the Indian Ocean, in lat. $11^{\circ} 44'$, long. $98^{\circ} 56'$.

LIO, in Bussahir, a village of the district of Koonawar, is situate on a small rocky eminence, amidst an alluvial expanse of moderate extent, on the right bank of the Li, or river of

Spiti, and at the confluence of the Lipak, a considerable torrent flowing from the west. At the east of the village is an isolated rock sixty feet high, and surmounted by a fort, now in ruins. The population of the village consists of Tartar families, votaries of Lamaism, and a few nuns of the same persuasion. The bed of the Li, or river of Spiti, is here 9,000 feet, that of the village 9,362 feet above the sea, from which this spot is, by the continuous course of the Sutluj and Indus, distant above 1,100 miles; yet even here it is a rapid unfordable river, 277 feet wide. Lat. $31^{\circ} 53'$, long. $78^{\circ} 37'$.

LIPI, in Bussahir, a village of the district of Koonawar, is situate in a sheltered recess of a dell, near the left bank of the Titi, a considerable stream, which, about four miles below, falls into the Sutluj. The village has an elevation of 8,700 feet above the sea. Lat. $31^{\circ} 39'$, long. $78^{\circ} 26'$.

LIPU KETHAN, in the British district of Kumaon, lieut.-gov. of the N.W. Provinces, a very difficult pass on the southern frontier of the Bhotia subdivision of Juwahir. The route here is inclosed between the shoulder of one of the Himalaya mountains, rising on the western, and the rapid course of the river Goree on the eastern side; and the painful path lies over large fragments of rocks, the peril of the traveller being heightened by the frequent fall of masses dislodged from the impending cliffs, either by the inclement weather or by earthquakes, not unfrequent in this region. On the right, when Webb passed in the end of May, 1817, a crag, shaken down by a shock of earthquake, destroyed a trading party of men, with a large train of goats. Elevation above the sea 9,127 feet. Lat. $30^{\circ} 10'$, long. $80^{\circ} 17'$.

LITI, in Bussahir, a torrent on the southern declivity of the Burenda Pass, flowing, during the warm season, from a vast mass of snow, nearly filling the glen above the source. It is remarkable for a fine waterfall, where the stream "rolls over a broken ridge of fine-grained gneiss, in a noble cascade, and is immediately buried beneath a bed of snow." Here is a bungalow or hut to shelter travellers: elevation above the sea 11,692 feet. Lat. $31^{\circ} 21'$, long. $78^{\circ} 8'$.

LOAN, in the British district of Kumaon, lieut.-gov. of the N.W. Provinces, a village on the right bank of the Nundeejah, a feeder of the Goree. Elevation above the sea 12,228 feet. Lat. $30^{\circ} 20'$, long. $80^{\circ} 12'$.

LOANAR.—A town in Hyderabad, or dominions of the Nizam, situate 42 miles E. by N. from Jaulnah, and 109 miles S.W. from Ellichpoor. Lat. $19^{\circ} 58'$, long. $76^{\circ} 35'$.

LOAR.—A town in Guzerat, or the dominions of the Guicowar, situate 96 miles S.S.E. from Rajkote, and 170 miles S.W. by S. from Ahmedabad. Lat. $20^{\circ} 58'$, long. $71^{\circ} 17'$.

LOAWUN.—A town in the British district

of Tirhoot, lieutenant-gov. of Bengal, 71 miles N.E. by E. of Dinapoor. Lat. $26^{\circ} 10'$, long. $86^{\circ} 5'$.

LOCAPILLY.—A town in Hyderabad, or dominions of the Nizam, situate 22 miles N.E. from the left bank of the Beemah river, and 79 miles S.W. by W. from Hyderabad. Lat. $16^{\circ} 50'$, long. $77^{\circ} 30'$.

LODEEKAW.—A town in Guzerat, or the dominions of the Guicowar, situate 17 miles S.W. by S. from Rajkote, and 140 miles S.W. by W. from Ahmedabad. Lat. $22^{\circ} 8'$, long. $70^{\circ} 41'$.

LODELL.—A town in Hyderabad, or dominions of the Nizam, situate 93 miles N.E. by E. from Hyderabad, and 138 miles N.N.W. from Guntoor. Lat. $18^{\circ} 7'$, long. $79^{\circ} 40'$.

LODHO, in the British district of Allygurh, lieutenant-gov. of the N.W. Provinces, a village situate on the cross route from Coel to Khyr, and eight miles S.E. of the latter, 55 miles N. of Agra. Lat. $27^{\circ} 54'$, long. $78^{\circ} 3'$.

LOGAON.—A town in Hyderabad, or dominions of the Nizam, situate nine miles S.W. from the right bank of the Godavery, and 117 miles N.W. by N. from Hyderabad. Lat. $18^{\circ} 49'$, long. $77^{\circ} 38'$.

LOGASSI, or **LUGASI,** in Bundelcund, a town, the principal place of a small raj or principality of the same name. It is on the route from Calpee to Jubbulpore, 86 miles S. of the former, 133 N. of the latter. Supplies may be had, but water is rather scarce in the dry season. Here is a bazar, and a small fort commands the town. The raj of which it is the principal place "yields a revenue of 15,000 rupees; is stated to comprise an area of twenty-nine square miles, and to contain eleven villages, with a population of 3,500 souls. The jagheedar maintains a force of fifteen horse and 125 foot." According to Spry, the rajah is of ancient Bundela lineage. He was acknowledged by the British government in 1808, by sunnud or written grant, in which he is stated to be "of the Boondelah caste, and one of the chieftains of rank of the province of Bundelcund;" and his possessions are guaranteed to him rent-free, on condition "of obedience and submission to the government." The town of Logassi is in lat. $25^{\circ} 4'$, long. $79^{\circ} 39'$.

LOGHUR.—A hill fort in the British district of Poona, presidency of Bombay, distant N.W. from Poona 26 miles, S.E. from Bombay 43 miles. Lat. $18^{\circ} 42'$, long. $73^{\circ} 31'$.

LOHADUGGA, in the British district of Chota Nagpore, lieutenant-gov. of Bengal, a military entonment on the route from Hazareebagh to the city of Nagpore, 82 miles S.W. of the former, 492 N.E. of the latter. It is the sudder or principal station of an assistant to the commissioner for Chota Nagpore and political agent for the south-west frontier of Bengal. Notwithstanding its importance in this respect, and that it has a jail and some other buildings

for the use of the civil power, it is a very inconsiderable place. An annual fair has been established in the district of Lohadugga, on the banks of the Soobunreeka, near the frontier of Hazareebagh and Singhboom, with every prospect of success. Lat. $23^{\circ} 26'$, long. $84^{\circ} 46'$.

LOHAGURRE.—A town in the British district of Jessore, lieutenant-gov. of Bengal, 91 miles E.N.E. of Calcutta. Lat. $23^{\circ} 3'$, long. $89^{\circ} 46'$.

LOHAIN, or **LOWAN,** in the British district of Allahabad, lieutenant-gov. of the N.W. Provinces, a village on the right bank of the Ganges, six miles below the city of Allahabad. Abreast of it, the river in the dry season is very shallow, with a rapid current and a sandy bottom, causing great difficulty and obstruction to the navigation, especially to craft proceeding upwards. Distance N.W. from Calcutta, by the river, 802 miles. Lat. $25^{\circ} 22'$, long. $81^{\circ} 58'$.

LOHANEE, in the British district of Hurriana, lieutenant-gov. of the N.W. Provinces, a village situate on the eastern frontier, towards Dadree. Lat. $28^{\circ} 42'$, long. $76^{\circ} 8'$.

LOHARA.—A town in the British district of Candeish, presidency of Bombay, 70 miles E.N.E. of Malligaum. Lat. $20^{\circ} 42'$, long. $75^{\circ} 32'$.

LOHARAPALLEE.—A town on the south-west frontier of Bengal, in the British district of Sumbulpore, situate 45 miles W. by S. of Sumbulpore. Lat. $21^{\circ} 18'$, long. $83^{\circ} 20'$.

LOHAREE.—A town in the British district of Beerboom, lieutenant-gov. of Bengal, 171 miles N.W. of Calcutta. Lat. $24^{\circ} 13'$, long. $86^{\circ} 29'$.

LOHAREE.—A village in the British district of Hurriana, lieutenant-gov. of the N.W. Provinces. Lat. $29^{\circ} 15'$, long. $76^{\circ} 8'$.

LOHAREE NAIG, in Gurhwal, a stupendous rapid or succession of falls on the Bhageerettee, as the Ganges is called in the upper part of its course. At this point the river is more obstructed than in any part of the course, and here the torrent tears its way over enormous masses of rock, that have fallen into it from the mural precipice forming its left bank. That precipice is a huge cliff of solid granite, which appears to have been undermined at its foot by the stream, so that the lower part has fallen into the channel, while the summit overhangs the vacuity thus formed, through which the river rushes. The pile of shattered fragments extends for about a quarter of a mile; and through and over them the river forces its way in a succession of cascades. "The scene," observes Hodgson, "is full of sublimity and wildness, and the roar of the water is astounding." Lower down, on the right bank, has been another slip of the mountain, but of inferior magnitude. Above the fall, the river is crossed by a sanga or wooden bridge, sixteen paces long, and twenty-five feet above the stream. Elevation of the bridge above the sea 7,389 feet. Lat. $30^{\circ} 57'$, long. $78^{\circ} 44'$.

LOH.

LOHARGAON, in the territory of Bundelcund, a village with bazar, on the route from Allahabad to Sagar, by Rewa, 198 miles S.W. of Allahabad. It is situated on a calcareous formation, in a slightly depressed tract, between two ranges, styled by Franklin the Punna and the Bandair Hills. Adam supposes this depressed tract to have been an extensive basin, at one time filled by the water of the river Cane, which, having worn a way for itself northwards through the Punna range, left the alluvial bed of the lake dry. Here was formerly a British military station, to maintain the communication between Bundelcund and the posts in Nagpoor. When Fitzclarence visited it in 1817, the force consisted of five companies of native infantry, 120 Rohilla irregular horse, and two six-pounders. The troops have been withdrawn, and when Jacquemont passed in 1830, the place was a scene of desolation. Water is obtainable from a tank and two wells of the depth of forty feet, but is rather scanty in the dry season. The jaghiredar of Behut, a town on the river Dhasan, 90 miles to the north-west, holds also the mowza or rural district of Lohargaon from the East-India Company, subject to an annual payment of 1,400 rupees. Elevation above the sea 1,260 feet. Lat. $24^{\circ} 29'$, long. $80^{\circ} 24'$.

LOHAROO.—A jaghire or feudal dependency, subject to the lieut.-gov. of the N.W. Provinces. It is bounded on the north by the British district of Hurriana; on the east by the jaghire of Jujhur; on the south and south-west by Shekhawuttee; and on the west by Beekaneer and Hurriana. It lies between lat. $28^{\circ} 22'$ — $28^{\circ} 50'$, long. $75^{\circ} 44'$ — 76° , and has an area of about 200 square miles, with a population of 18,000 inhabitants. On the expulsion of the Maharrattas by Lord Lake from the Delhi territory, in the early part of the present century, Loharoo was, with some other districts, transferred by him to the chief of Alwur, who granted it to his vakeel or agent, Nawaub Ahmud Buksh Khan. At the same time, Lord Lake conferred the district of Ferozepore, south of Delhi, on the vakeel; on whose death those possessions descended to his son Shumsodeen Khan. That person was, in 1836, hanged at Delhi, for procuring the murder of Mr. William Fraser, the British political agent there; and his possessions being forfeited, the supreme government conferred Loharoo on his brothers Ameen-ood-deen Khan and Zeecaoodeen Khan. The jaghire is ruled by the elder brother, Ameen-ood-deen, who pays his brother an allowance of 1,800*l.* per annum, as an equivalent for half the net revenues of the estate. Loharoo, the principal place, is in lat. $28^{\circ} 24'$, long. $75^{\circ} 52'$.

LOHARSING.—A town in the British district of Darjeeling, in Northern Bengal, 38 miles S.W. by S. of Darjeeling. Lat. $26^{\circ} 32'$, long. $88^{\circ} 6'$.

LOHATEH.—A town of the Deccan, in the territory of Nagpoor or Berar, situate 130

miles E.S.E. from Nagpoor, and 170 miles S. from Raingur. Lat. $20^{\circ} 23'$, long. $80^{\circ} 59'$.

LOHAWUT, in the Rajpoot state of Joudpore, a village on the route, *via* Nagor, from Jessulmere to Nusseerabad, and 178 miles W. of the latter. It has two wells 310 feet deep, the water from one of which is good, from the other indifferent. The road to the east is heavy, passing among sandhills and thin jungle; to the west it is hard and stony. Lat. $26^{\circ} 59'$, long. $72^{\circ} 42'$.

LOHGURH, in Sirhind, a village on the route from Loodiana to Ferozpoor, and 38 miles W. of the former town. It is situate five miles from the left bank of the Sutlej, in an open level country, partially cultivated, and well supplied with water. Distance N.W. from Calcutta 1,127 miles. Lat. $30^{\circ} 59'$, long. $75^{\circ} 20'$.

LOHI, in the British district of Muttra, lieut.-gov. of the N.W. Provinces, a small town or village on the route from the cantonment of Meerut to that of Muttra, and 23 miles N. of the latter. Water is obtained from wells. Lat. $27^{\circ} 47'$, long. $77^{\circ} 51'$.

LOHIA, in the jaghire of Rampoor, lieut.-gov. of the N.W. Provinces, a village on the route from Bareilly to Moradabad, and 29 miles N.W. of the former. Lat. $28^{\circ} 38'$, long. $79^{\circ} 12'$.

LOHSUL.—A town in the Rajpoot state of Shekawuttee, 67 miles N. by E. from Ajmeer, and 62 miles N.W. by W. from Jeypoor. Lat. $27^{\circ} 23'$, long. $75^{\circ} 2'$.

LOHUGHAT, or **RIKHESUR**, in the British district of Kumaon, lieut.-gov. of the N.W. Provinces, a cantonment for troops stationed to defend the frontier towards Nepal. It is situate on the left bank of the Lohu, a small river, which, taking a south-easterly direction, about twenty miles farther down falls into the Gagra or Kaley river, in lat. $29^{\circ} 20'$, long. $80^{\circ} 21'$. Hence the name, signifying ghat, ferry, or pass, of the Lohu. It is open on the west to the extreme extent of the valley in that direction (about two miles), but on the other sides inclosed by mountains rising above it from 1,000 to 1,500 feet high, with very precipitous sides, yet mostly covered with vegetation. There is an abundant supply of fine water from springs and streams. There are here a bazar, stores, and bungalows or cottages for the accommodation of those connected with the cantonment, which was formerly at Champawut, three miles farther south, but removed to its present position, which is much more salubrious. Elevation above the sea, of the cantonment, 5,562 feet. Distance S.E. from Almora 30 miles. Lat. $29^{\circ} 24'$, long. $80^{\circ} 9'$.

LOHURKOT, in the British district of Kumaon, lieut.-gov. of the N.W. Provinces, a town on the route from Almora to Bareilly, 11 miles S.S.W. of the former. Lat. $29^{\circ} 27'$, long. $79^{\circ} 39'$.

LOJAY, in the native state of Korea, on the south-west frontier of Bengal, a town among the mountains of Gondwana, 50 miles W. of the ruined town of Sirjoja, 120 S. of Mirzapoor, 430 W. of Calcutta by Hazaribagh. Lat. 23° 10', long. 82° 20'.

LOKAPOOR.—A town in the Southern Mahratta jaghire of Moodhull, presidency of Bombay, situate 61 miles E.N.E. from Belgaum, and 56 miles N.E. by N. from Dharwar. Lat. 16° 10', long. 75° 25'.

LOKMANPORE.—A town in the British district of Bhagulpore, lieut.-gov. of Bengal, 22 miles N.E. by N. of Bhagulpore. Lat. 25° 27', long. 86° 57'.

LOLL BAZAR, in the territory of Cooch Behar, a town on the north-western route from Rungpore to Cooch Behar, 26 miles N. of former, and 20 S.W. of latter. The ruined city of Komotapoor, a "most stupendous monument of rude labour," was situate near this place, on the west or right bank of the Dhorla. Loll Bazar is but an inconsiderable place; it is situate in lat. 26° 4', long. 89° 18'.

LOLL BAZAR, in the British district of Bogra, lieut.-gov. of Bengal, a small town, the locality of a thannah or police establishment, situate on the river Jabuna, near the northern frontier, towards the British district Dinajpore. Distance from the town of Bogra, N.W., 30 miles; from Calcutta, N.E., 180; from Berhampur, N.E., 90. Lat. 25° 7', long. 89° 4'.

LOMYNE.—A town of Eastern India, in the British province of Tenasserim, 71 miles S.S.E. of Moulmein. Lat. 15° 30', long. 98° 2'.

LONEE, in the British district of Meerut, lieut.-gov. of Bengal, a town, the principal place of the pergunnah of the same name, in lat. 28° 45', long. 77° 21'.

LONERE.—A town in the British district of Candeish, presidency of Bombay, 23 miles E.N.E. of Malligaum. Lat. 20° 29', long. 74° 10'.

LONEY.—A town in one of the recently sequestered districts of Hyderabad, or dominions of the Nizam, 33 miles S. by E. of Ellichpore. Lat. 20° 44', long. 77° 43'.

LONJEEGOORA.—A town on the south-west frontier of Bengal, in the native state of Calahandy, 31 miles E.S.E. from Joonnagudda, and 81 miles W. by S. from Goomsoor. Lat. 19° 41', long. 83° 27'.

LOODAOWLEE, in the British district of Mynpooree, lieut.-gov. of the N.W. Provinces, a town on the route from the city of Agra to Etawa, and 26 miles N.W. of the latter. Lat. 27° 3', long. 78° 46'.

LOODHOWA, in the British district of Allyghur, lieut.-gov. of the N.W. Provinces, a village on the route from the cantonment of Allyghur to that of Mynpooree, and 13 miles S.E. of the former. Lat. 27° 46', long. 78° 21'.

LOODHUN, in the Punjab, a village situate on a watercourse connected with the river

Ghara, from the right bank of which it is distant about four miles, and sixty miles south-east of Mooltan. Lat. 29° 51', long. 72° 27'.

LOODIANA.—A British district, forming part of what are called the Cis-Sutlej territories, and named after the chief place within it. It is bounded on the north by the Julindeh Doab, from which it is separated by the Sutlej river; on the east by the British district of Umballa; on the south by the native territories of Patteala and other protected Sikh chiefs; and on the west by the British district of Ferozpoore: it lies between lat. 30° 34'—31° 2', long. 76° 25', and has an area estimated at 725 square miles. It was, however, the opinion of the deputy commissioner, in 1848, that this estimate was considerably under the fact, though there then existed no adequate means for correcting it. The population is returned at something under 121,000; but here also there appears to have been error committed, the number being that of males only, distinguished into cultivators and non-cultivators.

A part of this district lapsed to the British government on the failure of heirs in 1836. The remainder came into its possession from escheats at different periods, during the years 1846 and 1847. The district also received some increase on the dismemberment of the district of Wudnee, and the transfer of its territory to others lying adjacent.

LOODIANA, a town of Sirhind, the chief place of the British district bearing the same name, is so called in consequence of having been founded and principally inhabited by the Lodi tribe of Afghans. It is situate on the western brow of an abrupt bluff, rising about thirty feet above the nullah or watercourse, which, having its source near Ropur, and running west for about fifty miles, in some degree parallel to the Sutlej, falls into it at Wallipura, fifteen miles below the fort. The greater part of the course of this nullah was formerly the channel of the Sutlej, which now flows between four and five miles farther north. It is an ill-built town, without a wall, but having a fort on the north side, situate on the bluff rising over the nullah. It was built about 1808, but is of no great strength. The population consists chiefly of Mahomedans, but there is no mosque of any note: still it is a thriving place, its residents including several capitalists; among whom are bankers corresponding with Amritsar, Lahore, Jagadri, Delhi, Calcutta, Bombay, Cashmere, Attock, Peshawur, Caubool, and Herat; and as it lies on one of the principal routes from Delhi to Lahore and Northern Afghanistan, a considerable transit-trade passes through it and over the Sutlej at Filor. The greater part of the inhabitants are weavers, who manufacture a coarse and very strong cotton cloth, suitable for the clothing of the lower orders, or for tent-cloths, and brought to market at a very low price. A still more important branch of

industry is the manufacture of shawls, conducted by Cashmirians. The quality is greatly inferior to that of the shawls made at Cashmere, and they would not easily find a sale in Europe, but are readily disposed of in India, in consequence of their greater cheapness. The population of Loodiana has been returned at 47,191.

Loodiana, in consequence of its position on one of the great routes from Delhi to the Punjab, has long been an important place in a military point of view. One of the most formidable hurricanes which had visited the locality within the memory of man, occurred at Loodiana in 1846, causing great loss of life and the total destruction of the barracks occupied by the Queen's troops. Here Shah Zeman Dooranee took refuge for many years, after he had been deposed, deprived of sight, and exiled from Cauhul; and his brother Shah Shooja also here found an asylum until his departure in 1838 to attempt the recovery of the sovereignty of Afghanistan. Loodiana is distant N.W. from Calcutta 1,102 miles. Lat. $30^{\circ} 55'$, long. $75^{\circ} 54'$.

LOOMBOOEE.—A town of Eastern India, in the native state of Muneepoor, 23 miles N.E. by E. from Muneepoor, and 146 miles E. from Jynteeapoor. Lat. 25° , long. $94^{\circ} 21'$.

LOONA.—A town in the native state of Cutch, presidency of Bombay, situate two miles S. of the Great Western Runn, and 41 miles N.W. from Bhooj. Lat. $23^{\circ} 40'$, long. $69^{\circ} 20'$.

LOONEE, or LUNI, a river of Western India, has its extreme source in a marshy tract immediately west of Pokhur, a town in the British district of Ajmeer, and about lat. $26^{\circ} 37'$, long. $74^{\circ} 46'$. It takes a south-westerly course nearly parallel to the base of the Aravulli range, from the north-western declivity of which it receives numerous feeders. 'Tud crossed the Loonee about lat. 26° , and again near Govindgurh, nearer its source, in lat. $26^{\circ} 29'$, long. $74^{\circ} 31'$. "We crossed a stream half a mile west of Govindgurh, called the Saburmati, which, with another, the Sarasrati, joining it, issues from the Poshkur lake. The Saburmati is also called the Loonee: its bed is full of micaceous quartzose rock: the banks are low, and little above the level of the country." Boileau crossed it in lat. $25^{\circ} 51'$, long. $72^{\circ} 20'$, in the beginning of July, when, in consequence of the periodical rains, it "was rushing down with a fierce and turbid stream a quarter of a mile wide, but not very deep." Continuing to flow in a south-westerly direction through the fertile and well-watered tract forming the south-eastern part of the territory of Jodhpoor, it, after a course of about 300 miles, passes into the Runn by two mouths, one in lat. $24^{\circ} 42'$, long. $71^{\circ} 11'$, the other about ten miles more to the south-east, and is lost in that dreary waste. Its total length of course is about 320 miles.

LOONEE, in the Damaun, a village on the

route from Ghuznee to Dera Ismael Khan, about 35 miles W. of the latter town. It is situate on a branch of the Gomul river. Lat. $31^{\circ} 50'$, long. $70^{\circ} 12'$.

LOONGHEE.—A town of Burmah, situate on the left bank of the Irawaddy, and 60 miles N. from Prome. Lat. $19^{\circ} 39'$, long. $94^{\circ} 59'$.

LOPO, in Sirbind, a village on the route from Ferozpoor to Simla, and 58 miles S.E. of the former town. Distant N.W. from Calcutta 1,087 miles. Lat. $30^{\circ} 38'$, long. $75^{\circ} 13'$.

LORAPELLY.—A town in the territory of one of the independent hill tribes of Orissa, situate 70 miles E.S.E. from Sumbulpoor, and 76 miles N.W. from Cuttack. Lat. $21^{\circ} 10'$, long. $85^{\circ} 3'$.

LORGURKARA, in Bhawlpoor, a village on the route from Khanpoor to Subzulcote, and 26 miles N.E. of the latter place. Lat. $28^{\circ} 22'$, long. $70^{\circ} 16'$.

LOROO.—A town in the native state of Jushpoor, on the south-west frontier of Bengal, 83 miles N. from Sumbulpoor, and 80 miles S.W. from Lohadugga. Lat. $22^{\circ} 40'$, long. $83^{\circ} 51'$.

LOSUR, in the north-east of the Punjab, a village of Spiti, is situate near the confluence of the Losur river with the river of Peeno. It is the last inhabited spot which travellers find in ascending the course of the latter river, and has an elevation of about 13,400 feet. Above this part of the valley, through which the river flows, the mountains rise in mural cliffs so steep that no snow can rest on their faces, though it lies deeply on their tops, which are for the most part flattened, forming tablelands. The general character of the soil and atmosphere is excessive aridity; but in some places patches of fertility, at the bases of the declivities, are rendered productive by means of irrigation. On one of these slips is situated the village of Losur; and the appearance of this singularly secluded place, as described by Gerard, is far from repulsive. "Lofty as the level of Losur is, there is little in the landscape to betray its position, when viewed in summer, embosomed in flourishing crops, and herds of shawlwool-goats. Yaks and horses meet the eye upon the high acclivities of the mountains, and an ardent sunshine keeps the air looming from the effects of mirage." The inhabitants are Tibetans or Tartars, of the Mongolian type, and their complexions are darker than in the low and sultry plains. When the ground is covered with snow, their black figures contrast strikingly and somewhat grotesquely with the dazzling whiteness of the surface on which they move. Losur is in lat. $32^{\circ} 28'$, long. $77^{\circ} 46'$.

LOTOWTEE.—A town in the Rajpoot state of Jodhpoor, situate on the left bank of the Loonee river, and 51 miles E. from Jodhpoor. Lat. $26^{\circ} 16'$, long. $73^{\circ} 57'$.

LOTUL.—A town in the British district of

Rangpur, lieut.-gov. of Bengal, 67 miles W. of Rangpur. Lat. 23° 39', long. 84° 29'.

LOTUN, in the British district of Goruckpore, lieut.-gov. of the N.W. Provinces, a small town near the northern frontier, towards the territory of Nepal. Buchanan describes it as containing only seventy poor huts. Distance N. from Gorakhpur 36 miles. Lat. 27° 16', long. 83° 12'.

LOUR, in the territory of Rewa, in Baghelcund, a village on the route, by the Kutra Pass, from Allahabad to Jubbulpore, and 102 miles S.W. of the former. Elevation above the sea about 1,200 feet. Lat. 24° 40', long. 81° 45'.

LOURTA.—A town in the Rajpoot state of Jodhpore, 46 miles N.W. from Jodhpore, and 136 miles W. from Ajmeer. Lat. 26° 43', long. 72° 33'.

LOWAIN, or LOOAHN, in the Rajpoot state of Jeypore, a town on the route from Agra to Nusseerabad, situate 121 miles S.W. of former, 102 N.E. of latter. It has a large bazar. Lat. 26° 46', long. 76° 16'.

LOWAR, in the Rajpoot state of Jessulmeer, a village on the eastern frontier, where it adjoins the territory of Jodhpore. A line drawn from this village in a north-westerly direction on to Khara, on the western frontier, towards Sindh, would nearly bisect the territory of Jessulmeer, and divide the desert tract extending over the northern part from that of comparative fertility in the south. Lowar is in lat. 26° 10', long. 70° 8'.

LOWJAH, in the British district of Mirzapore, lieut.-gov. of the N.W. Provinces, a village on the route from the city of Benares to Allahabad, 49 miles E. of the latter, 25 W. of the former. Lat. 25° 15', long. 82° 39'.

LOWRI.—A town of Bundelcund, in the native state of Chutterpore, situate 119 miles W.S.W. from Allahabad, and 60 miles S. by W. from Humeerpoor. Lat. 25° 8', long. 80° 3'.

LOWUN, or LOWAH, in the Rajpoot state of Joudpore, a village on the route from Pokhurn to the town of Joudpore, and eight miles E. of the former. Lat. 26° 51', long. 72° 8'.

LOWUN.—A town of the Deccan, in the territory of Nagpore or Berar, on the left bank of the Mahauddy river, and 118 miles W. from Sumbulpore. Lat. 21° 31', long. 82° 11'.

LUBOW, or LABAWA, in the British district of Mynpoore, lieut.-gov. of the N.W. Provinces, a village on the route from the cantonment of Allypore to that of Etawa, and 86 miles N.W. of the latter. Lat. 27° 9', long. 78° 37'.

LUBSA.—See LAKSA.

LUCHAGEER, in the British district of Allahabad, lieut.-gov. of the N.W. Provinces, a small town with bazar, situate on the left

bank of the Ganges, 776 miles N.W. of Calcutta by the river route, 32 S.E. of the city of Allahabad. Lat. 25° 19', long. 82° 15'.

LUCHMEENPOOR, in the British district Moradabad, lieut.-gov. of the N.W. Provinces, a village on the route from Kasheepore to Chilkia, four miles N.E. of the former. It is situate at the southern edge of the Terai or marshy forest extending along the southern base of the Sewalik range. Lat. 29° 15', long. 79° 3'.

LUCHMUNGURH, in the territory of Alwar, under the political management of the Governor-General's agent in Rajpootana, a town, with a fort, near the south-east frontier, towards Bhurtpore. Though now little noticed or known, it was formerly an important and strong place, as Pertab Singh, the Rao rajah of Machery or Alwar, successfully defended himself here against Nuju Khan, until the rainy season compelled that powerful chief to raise the siege. Distance S.W. from Delhi 70 miles. Lat. 27° 23', long. 76° 56'.

LUCHMUNGURH, in the Rajpoot territory of Shekhawatee, a handsome town, built on the regular model of Jeypore. It has a fort, situate on a lofty eminence, and conspicuous over the country. Luchman Singh, from whom it was denominated, founded it in the year 1806. Distance from Delhi, S.W., 154 miles; from Jeypore, N.W., 74. Lat. 27° 48', long. 75° 11'.

LUCHMUNPOOR, in the territory of Oude, a village on the route from Azimgurh to Sultanpore cantonment, 56 miles W. of the former, 22 S.E. of the latter. Lat. 26° 5', long. 82° 20'.

LUCHUWALLA, in the British district of Dehra Doon, a village on the route from Hurdwar to Dehra, and 20 miles N.W. of the former town. It is situate a mile from the right bank of the Soang, from which it is supplied with water, by means of a canal. Distant N.W. from Calcutta 945 miles. Lat. 30° 11', long. 78° 11'.

LUCKEPOOR.—A town of Eastern India, in the British district of Southern Cachar, situate 18 miles E. of Silchar. Lat. 24° 46', long. 93° 6'.

LUCKI DWAR.—A town in the native state of Bhotan, situate on the left bank of the Toresha river, and 64 miles E. by S. from Darjeeling. Lat. 26° 52', long. 89° 13'.

LUCKIMPOOR.—A town of Assam, situate in the British district of Luckimpoor, 46 miles N.W. by W. of Seabpoor. The district of which this town is the principal place contains an area of 2,950 square miles, and a population of 30,000. The town of Luckimpoor is in lat. 27° 19', long. 94° 3'.

LUCKIPOOR.—A town in the native state of Bhotan, situate on the left bank of the Jeniecker river, and 40 miles E. by S. from Darjeeling. Lat. 26° 57', long. 88° 55'.

LUCKIPOOR.—A town in the British district of Bulloah, lieutenant-gov. of Bengal, 156 miles E. by N. of Calcutta. Lat. 22° 57', long. 90° 50'.

LUCKMEEPOOR, in the British district of Mynpooree, lieutenant-gov. of the N.W. Provinces, a village on the route from the cantonment of Allypore to that of Futtehpore, and 45 miles S.E. of the former. Lat. 27° 43', long. 78° 47'.

LUCKNOUTI.—See GAUR.

LUCKNOW.—A district in the territory of Oude, named from the capital. It is bounded on the north by the districts Khairabad and Bahraich; on the east by Bahraich; on the south by Bainswara; and on the south-west by the Ganges, dividing it from the British district of Cawnpore.

LUCKNOW, the capital of the territory of Oude, is situated on the right or south-west side of the Goomtee, which is navigable upwards for many miles above the town, and downwards through its whole course to its confluence with the Ganges. Heber, who saw the stream a short time after the close of the rainy season, styles it "broad and rapid;" while Lumsden, at precisely the same time of the year, describes it as "a paltry and narrow stream." It is ill suited for supplying the population with water, as that which it furnishes during the rainy season can scarcely be used, in consequence of the great quantity of yellow clay which it holds suspended; "and when any great mortality prevails at Lucknow, or along the banks of the river, a putrid scum forms on its surface, occasioned by the number of dead bodies thrown into it." At the north-western extremity of the city is a bridge, a substantial structure of masonry; another, to the south-east, is formed of boats. A complete iron bridge was, in 1816, sent out in sections; but the death of the importer having stayed the progress of the undertaking, it long remained suspended, in consequence, it was reported, of the reluctance of the sovereign to complete a project commenced by a predecessor. At length, after the lapse of about thirty years, the bridge was erected, and now forms a conspicuous ornament of the city, as well as a useful addition to the means of transit. The city is represented as displaying a varied, lively, and even brilliant prospect, when viewed from a position elevated above the general height of the buildings. Of the continuous mass of erections which extends for about four miles along the bank, the middle part, being about a third of the whole, is considered to be the ancient city founded by Lakshmana, brother of Rama. It is meanly built, the houses having generally mud walls, with roofs of straw; and many are no better than booths of mats and bamboos, thatched with palm-branches or leaves. The number of brick-built houses is small. With few exceptions, the streets, which are generally sunk ten or

twelve feet below the level of the shops on each side, are crooked and narrow.

According to tradition, the stronghold of Lucknow was on an eminence, and was demolished by Aurungzebe, who showed his zeal for Islam by building a mosque upon its site. Adjoining this division, and on the south-east of it, is one more recent, said to have been built principally by Saadat Ali, the Nawab Vizier, who ruled in Oude from 1798 to 1814. From the division just described, there extends towards the south-east a handsome street, represented to be a mile in length. Heber describes it as "wider than the High Street at Oxford, but having some distant resemblance to it in the colour of its buildings, and Gothic style of the greater part of them." It is called Chinka Bazar, or Chinese Market, and has at each end a handsome gateway. Between this street and the right bank of the Goomtee is the residence formerly occupied by the deposed king.

The part of the city most interesting to a stranger is remote from the palace, being separated from it by the ancient and original city, to the north-west of which it is situated. This north-western quarter is stated to have been principally built by Asaf-ud-doula, Nawab Vizier from 1775 to 1797. Its great ornament is the splendid Imambarah, which, according to its representation in Salt's beautiful view, can scarcely be surpassed in the light and elegant style of architecture. Lord Valentia observes respecting it, "The Imambarah, the mosque attached to it, and the gateways that lead to it, are beautiful specimens of this architecture (light, elegant, but fantastic). From the brilliant white of the composition, and the minute delicacy of the workmanship, an enthusiast might suppose that geni had been the artificers;" and Heber, a critic of high authority on such subjects, observes, "I have never seen an architectural view which pleased me more, from its richness and variety, as well as the proportions and general good taste of its principal features." It opens on the Hasanabad, a broad street, running nearly from south-east to north-west, and parallel to the river. At no great distance is a large mosque, commenced by Saadat Ali, and at his death left unfinished. Three or four miles south-east of the town, and near the right bank of the river, is Constantia, "a strange, fantastical building, of every species of architecture, and adorned with minute stucco fretwork, enormous lions, with lamps instead of eyes, mandarins and ladies with shaking heads, and all the gods and goddesses of the heathen mythology." It was built at an enormous expense by an eccentric French adventurer, named Claude Martin, who arrived in India a private soldier, and died a major-general, in possession of property to the amount of several hundred thousand pounds. His body is deposited in a sarcophagus in one of the lower apartments. Martin had been bred a Romanist, but appears to have retained little of his early creed. A

large share, however, of his vast wealth was devoted to charitable purposes, and a college, called after the founder "La Martinère," preserves his memory at the place where his fortune was accumulated and his eccentricities indulged.

Lucknow may be regarded as entitled to an honourable distinction among Indian cities, in possessing an observatory. It was established under the superintendence of Major Wilcox, who succeeded in training competent assistants for its management, the majority of whom were natives. An hospital and dispensary also afford means for the useful application of European science. A church has been built, and a sum of money assigned for its repair. Of the amount of the population of Lucknow, nothing certain is ascertainable; it is estimated at 300,000. There is a large proportion of Mussulmans among the Hindoos, and not a few Christians. The city of Lucknow is probably about 360 feet above the sea. Distant N.W. from Calcutta, by Benares, Juanpore, and Sultanpore, 610 miles; N.W. from Allahabad 128; N.E. from Cawnpore 53. Lat. 26° 52', long. 81°.

LUCKONDA.—A town in the British district of Rajahmundry, presidency of Madras, 30 miles N. by E. of Rajahmundry. Lat. 17° 25', long. 82°.

LUCKOWULLY.—A town in the Mysore, situate on the right bank of the Budra river, and 111 miles N.W. from Seringapatam. Lat. 13° 41', long. 75° 42'.

LUCKPUT.—A town in the native state of Cutch, presidency of Bombay, situate on the left bank of the Koorie mouth of the Great Western Runn, the depth of which was considerably increased by the effects of the earthquake of 1819. Luckput is 71 miles N.W. by W. from Bhooj. Lat. 23° 50', long. 68° 43'.

LUCKSHAUM.—A town in the British district of Bulloah, lieutenant-gov. of Bengal, 180 miles E. by N. of Calcutta. Lat. 23° 14', long. 91° 10'.

LUCKWARIE, in Jaunsar, a village built near the summit of a hill on the right bank of the Jumna, and about 1,000 feet above it. The houses are in general neatly built of stone, and covered with slate. The women are fair and well made, and are distributed economically among the male population, several of whom cohabit with one female by a sort of extraordinary perversion of marriage. Skinner observes—"Four seems to be the mystical number; for all that I have questioned on the subject answer, 'We are four, and have one wife between us.'" Here is a temple built of wood, with doors covered with plates of brass, embellished with well-executed sculptures of figures of Hindu mythology. Lat. 30° 33', long. 78° 1'.

LUDGAON, in the British district of Futtehpore, lieutenant-gov. of the N.W. Provinces, a village on the route from Banda to the town

of Futtehpore, and 12 miles S.W. of the latter. Lat. 25° 51', long. 80° 43'.

LUDHEEA, a river of the British district of Kumaon, lieutenant-gov. of the N.W. Provinces. It rises amidst the mountains, in lat. 29° 25', long. 79° 50', and, holding a course generally in a south-easterly direction for about forty-five miles, falls into the Kalee or Surjoo on the right side, in lat. 29° 9', long. 80° 19'. It is fordable where crossed by the route from Pillibet to Pitoragarh, in lat. 29° 10', long. 80° 14'.

LUDHONA.—A town in the native state of Gwalior, or possessions of Scindia's family, situate 46 miles S.E. from Neemuch, and 214 miles W. from Saugur. Lat. 24°, long. 75° 27'.

LUDOOAREE.—A town in the British district of Tirhoot, lieutenant-gov. of Bengal, 82 miles N.E. by N. of Dinapoor. Lat. 26° 40', long. 85° 43'.

LUGAREE, in Sinde, a village on the route from Hyderabad to Omercote, and 60 miles W. of the latter place. It is situate on the right bank of the Poorana river. Lat. 25° 13', long. 68° 48'.

LUHORAH.—A river rising in lat. 31° 34', long. 69° 48', in the Suliman range of mountains, and, flowing in an easterly direction for about forty-five miles, is lost in the valley of the Derajat.

LUKA, in the Punjab, a town on the route from Ferozpoor to Mooltan. It is situate in the Doab between the Ghara and the Chinab. Lat. 29° 52', long. 72° 20'.

LUK BAWAN, in Cashmere, a village situate at the north-western extremity of a long ridge of hills, which, extending from the Snowy Panjal, gradually diminish in height and size, till they terminate on the plain. Though now scarcely containing half a dozen houses, Luk Bawan was once a considerable place. Here are the ruins of a large bath and an extensive stone-built tank. Lat. 33° 36', long. 75° 16'.

LUKENWAREE.—A town in one of the recently sequestered districts of Hyderabad, or dominions of the Nizam, situate 75 miles S.W. of Ellichpoor. Lat. 20° 30', long. 76° 43'.

LUKHNAU, in the British district of Etawa, lieutenant-gov. of the N.W. Provinces, a town situate three miles from the left bank of the Jumna, 11 miles S.E. of the town of Etawa, and 73 miles N.W. of the cantonment of Cawnpore. Lat. 26° 39', long. 79° 13'.

LUKKEE, in the Daman division of the Punjab, a town situated on the left bank of the Gombela or Tochee river, 116 miles S.S.W. of the town of Peshawur. Lat. 32° 30', long. 70° 51'.

LUKKEE MOUNTAINS, in Sinde, are a considerable range connected with the Hala or Brahooic Mountains of Beloochistan. With

the Juttee, the Keertar, the Pubh, and some other ranges less known, the Lukkee contributes to give character to the singularly wild tract constituting the western part of Sinde, extending between Beloochistan and the alluvial tract on the Indus, and also between the desert of Shikarpore and Kurrachee. The Lukkee is the most eastern of these ranges, and runs from the Juttee south-eastward, towards the high lands opposite Hyderabad, being known in different parts by the various appellations of the Eoroe Lukkee, Daran Lukkee, and Hallar Lukkee. These mountains are in general of recent formation, containing a vast profusion of marine exuviae. "The organic remains of former ages," observes Burnes, "are innumerable; the asteroid, the cockle, the oyster, the nummulite, and almost all kinds of sea-shells, may be collected on the Lukkee range." Huge fissures, apparently produced by earthquakes, traverse this range, which, in the frequent occurrence of hot springs and sulphureous exhalations, exhibit signs of volcanic action. Some parts appear to be of more ancient formation, as they produce lead, antimony, and copper. The elevation of the highest part of this dreary and sterile range is estimated at from 1,500 to 2,000 feet. Between the town of Lukkee and that of Sehwan, the mountain has a nearly perpendicular face, about 600 feet high towards the Indus, between which and the precipice there was at one time a road, though in some places so narrow, that only a single camel could pass at a time. In 1839, this defile was washed away by the turbulent river, which now sweeps along the base of the cliff. The length of the Lukkee range is about fifty miles. The centre of the range is about lat. 26°, long. 67° 50'.

LUKKEE (NORTHERN), in Sinde, a large town in ruins, on the route from Shikarpore to Sukkur, and 12 miles S.E. of the former place. Under the Durani sway it was wealthy and populous, but since it passed into the power of the ameers of Sinde, it has fallen into decay. In the time of its prosperity it yielded an annual revenue of 100,000 rupees. It is ten miles from the right bank of the Indus. Lat. 27° 52', long. 68° 42'.

LUKKEE (SOUTHERN), in Sinde, a town situate a short distance south of Sehwan, close to the west bank of the Indus, and adjacent to the entrance of the Lukkee Pass. Its site is picturesque, being near a lake a mile wide and several miles in length, which appears to have been at one time a reach of the Indus. The Lukkee Mountains, sloping down to the west of the town, and a little to the north, abut on that river, which sweeps along their rocky base. Close to the town is a spring of sulphureous water, which has a temperature of 102°, and flows from the base of a calcareous precipice 600 feet high. Lat. 26° 23', long. 68° 55'.

LUKKHOKI, in the Punjab, a small town in the Doab between the Ghara and the Ravee,

is situate about three miles from the right or west bank of the former river, and on the route from Ferozpoor to Mooltan. Lat. 30° 8', long. 72° 57'.

LUKMESHWUR.—A town in the Southern Mahratta jaghire of Meeruj, situate 89 miles S.E. from Dharwar, and 98 miles W. from Bellary. Lat. 15° 8', long. 75° 31'.

LUKTAHA, in the British district of Allahabad, lieut.-gov. of the N.W. Provinces, a village on the right bank of the Ganges, 789 miles N.W. of Calcutta by the river route, 20 S.E. of Allahabad by the same. Lat. 25° 19', long. 82° 8'.

LUKTUR.—A town in Guzerat, or the dominions of the Guicowar, situate 104 miles W.N.W. from Baroda, and 58 miles W. by S. from Ahmedabad. Lat. 22° 50', long. 71° 44'.

LULLEEANA, in the Punjab, a village 26 miles S. of Lahore. Lat. 31° 14', long. 74° 28'.

LULOWLEE, in the British district of Futtehpore, lieut.-gov. of the N.W. Provinces, a small town near the left bank of the Jumna, on the route from Banda to the town of Futtehpore, and 22 miles S.W. of the latter place. Lat. 25° 48', long. 80° 36'.

LUM.—A town in the native state of Nepal, situate on the left bank of the Arun river, and 96 miles E. by S. from Khatmandoo. Lat. 27° 29', long. 86° 49'.

LUMBEEA, in Bussahir, a pass over the range of the Himalaya bounding Koonawur on the south. This and three other passes cross the ridge within the space of little more than a mile. Its elevation above the sea is probably between 16,000 and 17,000 feet. It is seldom passed, except in May, June, July, and August, on account of cracks and the snow sinking. Lat. 31° 16', long. 78° 20'.

LUMBREE.—A town of Eastern India, in the native state of Osimlee, on the Cossya Hills, situate 46 miles S. from Gowhatty, and 79 miles S.E. by E. from Goalpara. Lat. 25° 30', long. 91° 39'.

LUNAWAURA, a small state in the Rewa Caunta division of Guzerat. This principality is situated on the confines of Guzerat, and is a continuation of the mountain-tract which forms the north-eastern boundary of that province. It is situate on the left bank of the Myhee, and adjacent to some important passes. The dominions of the nawaub of Balasinore bound it on the west and south-west: to the north is the Myhee Caunta territory; the states of Soauth and Barreah lie to the east; and Godra, one of Scindia's PUNCH mahals, to the south. It is situate between lat. 22° 50' and 23° 16', long. 73° 21' and 73° 47'. The length is estimated at thirty miles from north to south, and the breadth at nearly the same distance. The Panum, a tributary to the Myhee, on the banks of which some of the villages belonging to the state are situated,

flows within a mile of the capital. This small chieftainship having co-operated to the best of its ability with the army under Colonel Murray, in the war with Scindia, of 1803, was admitted by treaty to British protection. Sir George Barlow, in 1806, severed the connection; whereupon it reverted to Scindia, who exacted a tribute from it. In 1819, the right of supremacy over Lunawaura was ceded by Scindia to the British government, the latter guaranteeing the payment of the tribute, on condition that Scindia should immediately withdraw from the state all his troops, karkoons, and other officers, and on no account, for the future, exercise any interference, either directly or indirectly, in its affairs.

Prior to that event, and the introduction of our superintendence and control, Baoz Khan, the leader of bands of mercenaries, exercised the chief authority, under the direction and countenance of the rajah's mother. This power, it is scarcely necessary to say, was not used for the benefit of the country; the prince was held in a state of dependence and poverty, and the people subjected to systematic misrule: the cultivators were oppressed and impoverished, and the larger share of the revenue engrossed by the chief and his band. The nominal rajah (Futteh Sing) was too young and too much awed by the presence of the mercenaries, to attempt the exercise of sovereignty, and was, moreover, alarmed lest the threat of the Ranees to denounce him as a supposititious child, should, in the event of his taking any measures to lessen her influence, be carried into effect. On the expulsion of Baoz Khan by the authority of the British government, towards the end of 1819, the rajah was established in possession of the country, which he now holds.

It appears, however, that Futteh Sing was not the rightful heir, the inheritance being vested in his eldest brother, Sheo Sing, who had been excluded by the consequences of female jealousy. Purtaub Sing, the former ruler of Lunawaura, married two wives, each of whom bore him a son. The children were named Sheo Sing and Futteh Sing. The mother of the latter, from family and priority of marriage, was the first in rank and distinction, but the date of her son's birth was eight months later than that of the son of the other princess. The latter consequently became heir to the guddee, the rights of the firstborn not being invalidated by any inferiority of rank on the part of the mother, provided her marriage be lawful and regular. The circumstance of having given birth to an heir of the state excited against the mother of Sheo Sing a feeling of jealousy in the mind of her rival; domestic feuds were the result, and the rajah, apprehensive for the line of Sheo Sing, presented his mother with a sum of money, and removed her, together with the child, to the house of a distant relative in the principality of Dongurpoor. Soon after these events, Futteh Sing was born, and four years after-

wards, Purtaub, his father, died. Through his mother's influence, Futteh Sing was placed on the guddee, whilst Sheo Sing remained at Dongurpoor. His name and birth made him a convenient instrument in the hands of a mehlah named Nana, who, some time after Purtaub's death, hired troops, and began to make collections, under pretence of maintaining the cause of the rightful heir of the deceased prince. In the course of the disturbance for which the conflicting claims of the two parties afforded a pretext, success fluctuated. Sheo Sing was at one period placed on the guddee, but after a brief occupation, was dispossessed by his brother Futteh Sing. The nawaub of Balasinore then appeared on behalf of the former, and brought a body of troops against Lunawaura, which he captured, and retained for the space of a few months; during which period Sheo Sing remained in the territories of his ally. The payment of a large sum of money effected the removal of the Balasinore troops, and shortly afterwards, Sheo Sing's principal supporter, Nana, died. Nana's son, with the aid of a party of Bheels and marauders, then plundered in Sheo's name, but, after a time, made peace with Futteh Sing, and took up his residence at Lunawaura. With the defection of this champion, the active struggles for securing the government to Sheo Sing ended. Sheo Sing, however, submitted his pretensions to Sir John Malcolm, through a vakeel, whom he sent to make known his claims to the guddee, and request British interference in his behalf. To this application an answer was returned, to the effect, that our policy was to disturb existing arrangements as little as possible; which policy had consequently led to the recognition of the title of those whom we found in authority. Futteh Sing, thus supported, retained possession of the guddee.

The family of the chief of Lunawaura may be traced to an early period in the last century. In 1739, an ancestor, styled only zemindar, paid a tribute to the authorities in Guzerat. In 1758, his successor, Deep Sing, was besieged by the Peishwa, and after an honourable defence of his fort, obliged to pay down 50,000 rupees, and give hostages for good behaviour. Deep Sing was succeeded by his son Doorjun, and after him came Purtaub, the father of Futteh Sing. The Lunawaura state is for the most part composed of villages which have been either usurped from the neighbouring states or granted by their chieftains. It has little or no other resources than its land-revenue, which yields from 80,000 to a lac of rupees. It is subject to the payment of a tribute to Scindia of 12,000 rupees per annum; a claim which had existed for more than seventy years, and was paid up to the date 1819, when we became mediators, in order to accomplish our object of restoring peace to the country. It pays a Ghaus Dana also to the Guicowar, of 6,000 rupees, and is subject to a similar charge of 1,200 rupees to the neighbouring state of

LUN—LUT.

Balasinore. The military establishments comprise about 200 horse and foot, and the dependent chiefs of the rajah's family, who hold upon feudatory principles, arm themselves when required. An officer, appointed by the Baroda presidency, is maintained at the joint expense of the Soanath and Lunawaura states, for police purposes in their respective districts.

LUNAWAURA, the capital of the principality bearing its own name, and situate on the bifurcation formed by the junction of the Panum with the Myhee river. It is a fortified town, and the fortifications and town together are nearly three miles in circumference. Its situation is favourable for merchants proceeding from Rutlam and other parts of Malwah to Ahmedabad and the interior of Guzerat. Many of that remarkable race of men called Borahs reside in Lunawaura, which also contains many artisans, as smiths and carpenters, of reputed skill in their respective professions. It is situate in lat. 23° 8', long. 73° 37'.

LUNDYE RIVER, the name given to the Swat river previous to its junction with the Kabool river.

LUNGOOR, a fort in the British district of Kumaon, lieut.-gov. of the N.W. Provinces. It is situate in the southern or outer range of the Himalaya system, on the summit of a lofty conical hill, extremely difficult of access. The inclosing wall is seven feet high, and is built of rough stones without cement, and loop-holed for musketry. Within are a few huts for the shelter of the garrison, but all is now in a ruinous state. In a military point of view, it is valueless, as it commands no route of importance, and water cannot be obtained nearer than half a mile. The Gorkhas, during their occupation, made two tanks within the walls; but they are unserviceable, retaining no water. Elevation above the sea 6,401 feet. Lat. 29° 55', long. 78° 42'.

LUNGRASOO, in Gurhwal, a village on the left side of the torrent Aglar, and 450 feet above the stream, which runs in so steep a channel as to form a succession of cascades. The village is situate on the rugged side of a mountain, amidst a few cultivated patches, on terraces, formed on the declivity by means of embankments constructed of large blocks of stone. The crops of barley and wheat produced on those narrow surfaces suffice for the scanty population. Elevation above the sea 4,393 feet. Lat. 30° 29', long. 78° 12'.

LUNGTUNG.—A town of Eastern India, in the British district of Jynteah, 40 miles N. of Jynteahpore. Lat. 25° 40', long. 92° 9'.

LUNMEE, in the British district of Rangurh, in the Saugor and Nerbudda territory, lieut.-gov. of the N.W. Provinces, a town on the route from Rangurh to Ruttunpoor, 55 miles E.S.E. of the former. Lat. 22° 32', long. 81° 49'.

LUREE, in the Punjab, a village situate on

the left bank of the Swan river, on the route from Attock to Julalpoor, and 50 miles S.E. of the former town. Lat. 33° 33', long. 73° 8'.

LURROO, in Cashmere, on the route from the Banihal Pass to Islamabad, and about eight miles S. of the latter place. At the time of Forster's visit, it was a small but very populous town. It does not appear to be mentioned by Vigne or other late travellers, and it is not improbable that it may have been completely ruined in the dreadful depopulation which, within the last few years, has afflicted Cashmere. Wilson conjectures it to be identical with Lolara or Looloo, mentioned in the Ayeen Akbery. Abulfazel, however, states that Looloo was in Kamraj, or the western division of Cashmere; and Lurroo is, according to Forster's account, in the south-eastern part of the valley. Lat. 33° 36', long. 75° 16'.

LUSHKUREE KHAN KE SERAI, in Sirhind, a village on the route from Kurnool to Lodiana, and 19 miles S.E. of the latter place. It is situate in an open and well-cultivated country, so that supplies are abundant, and water can be had in large quantities. The road in this part of the route is excellent. Distant N.W. from Calcutta 1,069 miles. Lat. 30° 45', long. 76° 12'.

LUTSAN, in the British district of Allygurh, lieut.-gov. of the N.W. Provinces, a village on the route from the cantonment of Allygurh to that of Etawa, and 18 miles S. of the former. Lat. 27° 40', long. 78° 11'.

LUTTAULA, in Sirhind, a small town on the route from Ferozpoor to Simla, and 84 miles S.E. of the former place. It is situate in an open country, with considerable cultivation, and is abundantly supplied with good water from wells. Distant N.W. from Calcutta 1,069 miles. Lat. 30° 40', long. 75° 53'.

LUTTEEPOOR, in the British district of Mirzapoor, lieut.-gov. of the N.W. Provinces, a town, with fort, 13 miles S.E. of the fort of Chunar. Here, in 1781, Cheyt Singh, the refractory zemindar of Benares, raised his standard against the British authority, but was speedily compelled to fly, having previously, in cold blood, massacred a number of the East-India Company's troops, whom he had made prisoners. Distant S.E. from Mirzapoor 31 miles, N.W. from Calcutta 390. Lat. 24° 58', long. 83° 7'.

LUTTIPORE.—A town in the British district of Bhagulpore, lieut.-gov. of Bengal, seven miles N. of Bhagulpore. Lat. 25° 17', long. 86° 59'.

LUTTOODHEE, or **LUTHOODDEH**, in the British district of Ghazeepoor, lieut.-gov. of the N.W. Provinces, a village on the route from Ghazeepoor cantonment to Chupra, 24 miles E. of the former, 58 W. of the latter. It has water from wells, but supplies are scarce, and must be collected from the surrounding country. The road in this part of the country is rather good. Lat. 25° 40', long. 83° 58'.

LUTTUMMUR, in the Daman division of the Punjab, a town situated 28 miles from the right bank of the Indus, 92 miles S.W. by S. of the town of Peshawur. Lat. $32^{\circ} 53'$, long. $70^{\circ} 51'$.

LUVVARA.—A town in one of the recently sequestered districts of Hyderabad, or dominions of the Nizam, situate 38 miles N.E. of Sholapoor. Lat. 18° , long. $76^{\circ} 23'$.

LUXAR, in Jaunsar, a village on a ridge rising above the right bank of the Jumna, and about two miles from that river. Lat. $30^{\circ} 34'$, long. $78^{\circ} 2'$.

LYNE.—A town in the British territory of Pegue, on the left bank of the Lyne river, and 41 miles W. by S. from Pegue. Lat. $17^{\circ} 33'$, long. $95^{\circ} 40'$.

LYNE RIVER.—The name given to one of the principal branches forming the Delta of the Irawady river. It leaves the parent stream in lat. $17^{\circ} 55'$, long. $95^{\circ} 20'$, when, flowing in a south-easterly direction, and passing the town of Rangoon, it takes the name of that place, and falls into the Indian Ocean in lat. $16^{\circ} 29'$, long. $96^{\circ} 26'$, after a total course of 155 miles.

M.

MAAT, in the British district of Muttra, lieut.-gov. of the N.W. Provinces, a town on the route from Muttra to Allygurh, seven miles N.N.E. of the former. Lat. $27^{\circ} 35'$, long. $77^{\circ} 49'$.

MACHERY, in the territory of Alwar, under the political superintendence of the Governor-General's agent for Rajpootana, a town two or three miles S.E. of the route from Nussacerabad to Muttra, and 76 miles S.W. of the latter. Though at present containing only a few houses, it was formerly the residence of the Rao rajah or Rajpoot sovereign of the territory, now better known by the name of Alwar; whence that petty potentate was, in early official documents of the East-India Company, styled the Maha Rao rajah of Machery. Lat. $27^{\circ} 15'$, long. $76^{\circ} 45'$.

MACHEWARA, in Sirhind, a town on the route from Loodiana to Ropur, and 22 miles E. of the former place. It is situate about four miles from the left bank of the Sutlej, which formerly flowed close to the town, but about fifty years ago took a direction more to the north. Distant N.W. from Calcutta, *via* Loodiana, 1,110 miles. Lat. $30^{\circ} 55'$, long. $76^{\circ} 17'$.

MACHILPOOR.—A town in the native state of Indoor, or territory of Holkar, situate 156 miles W. by N. from Sangor, and 105 miles N.N.E. from Indoor. Lat. $24^{\circ} 7'$, long. $76^{\circ} 22'$.

MACHEOLE, in the jaghire of Jujhur, lieut.-gov. of the N.W. Provinces, a village on the route from Kurnaul to Rewarree, and 24

miles N. of the latter. Water may be had from a tank. Lat. $28^{\circ} 27'$, long. $76^{\circ} 45'$.

MACHUNDER, in the British district of Bareilly, lieut.-gov. of the N.W. Provinces, a village on the route from Bareilly to Poteogurh, and 43 miles N.E. of the former. Lat. $28^{\circ} 45'$, long. $79^{\circ} 53'$.

MACHURLA.—A town in the British district of Guntoor, presidency of Madras, 70 miles W. of Guntoor. Lat. $16^{\circ} 28'$, long. $79^{\circ} 29'$.

MADAGEESY, in the Mysore, a small but well-fortified town, on the north-east frontier, towards the British district of Bellary. It is situate at the base of a rock very difficult of access, and surmounted by a fortress. It was formerly the stronghold of a polygar or landholder, who possessed the surrounding country to a wide extent. An unhappy woman, of the name of Madageesy, having performed the rite of suttee, by being burned alive with her husband's corpse, the place received its present name in commemoration of the circumstance. Distance from Seringapatam, N., 104 miles; Chitradurg, S.E., 60. Lat. $13^{\circ} 50'$, long. $77^{\circ} 15'$.

MADANPOOR, in the British district of Goruckpore, lieut.-gov. of the N.W. Provinces, a small town formerly the royal residence of Madan, the chief of the Tharus tribe, but now containing only 150 huts. It is situate on the Mujnuh or Buthooa, a small stream, a feeder of the river Raptce, 30 miles S.E. of Goruckpore cantonment. Lat. $26^{\circ} 15'$, long. $83^{\circ} 47'$.

MADANPOOR, a village of Oude, in the district of Aldemaun, situate on the left bank of the river Tons (North-eastern), 40 miles S.E. of Oude. Butler estimates the population at 300, of whom 200 are Mussulmans. Lat. $26^{\circ} 30'$, long. $82^{\circ} 26'$.

MADAPPOOR.—A town in the Mysore, 34 miles N.W. from Seringapatam, and 102 miles E. from Mangalore. Lat. $12^{\circ} 48'$, long. $76^{\circ} 24'$.

MADARA MYO.—A town of Burmah, situate eight miles from the left bank of the Irawady, and 29 miles N.N.E. from Ava. Lat. $22^{\circ} 15'$, long. $96^{\circ} 12'$.

MADDAPOULUM.—A town in the British district of Masulipatam, presidency of Madras, 42 miles E.N.E. of Masulipatam. Lat. $16^{\circ} 27'$, long. $81^{\circ} 46'$.

MADDEHJEE, in Sinde, a considerable village on the route from Sukkur to Larkhana, and 28 miles W. of the former place. It contains about 150 houses and twenty shops. A plentiful supply of water is procurable. Lat. $27^{\circ} 40'$, long. $68^{\circ} 30'$.

MADHARAJPOORA, in the Rajpoot state of Jeypoor, a town on the route from Delhi to Mow, 190 miles S.W. of former, 317 N.E. of latter. Lat. $26^{\circ} 35'$, long. $75^{\circ} 42'$.

MADHOOPORA, in the Rajpoot territory of Jeypoor, a town on the route from Hansee to Nussacerabad, situate 143 miles S.

of former, 100 N.E. of latter. It has a large bazar, and water and supplies are abundant. Lat. 27° 26', long. 75° 42'.

MADHOPOORA.—A town in the Rajpoot state of Jeypoor, situate 39 miles N.N.W. from Jeypoor, and 94 miles N.E. from Ajmeer. Lat. 27° 28', long. 75° 43'.

MADHOPOOR.—A town in the Rajpoot state of Jeypoor, situate 79 miles S.E. by S. from Jeypoor, and 121 miles E.S.E. from Ajmeer. Lat. 25° 56', long. 76° 34'.

MADHUPOOR, in the British district of Pubna, lieut.-gov. of Bengal, a town on the route from Berhampore to Dacca, 89 miles S.E. of former, 83 W. of latter. Lat. 23° 48', long. 89° 23'.

MADHUPOOR, in the British district of Bareilly, lieut.-gov. of the N.W. Provinces, a village on the route from Moradabad to Bareilly, and 11 miles N.W. of the latter. Lat. 28° 27', long. 79° 23'.

MADIGOLE.—A town in the British district of Vizagapatam, presidency of Madras, 40 miles W.N.W. of Vizagapatam. Lat. 17° 58', long. 82° 50'.

MADINA, or MODENA, in the British district of Rohtuk, lieut.-gov. of the N.W. Provinces, a village on the route from Delhi to Hansce, and 33 miles S.E. of the latter. Lat. 28° 56', long. 76° 30'.

MADOOROO.—A town in the British district of Masulipatam, presidency of Madras, 22 miles W.N.W. of Masulipatam. Lat. 16° 17', long. 80° 53'.

MADRAS.—One of the three presidencies of British India, named from the city which is the seat of its government. It is bounded on the north by the presidency of Bombay, the territory of the Nizam, that of Berar, and the petty native states on the south-west frontier of Bengal; on the east and south-east by the Bay of Bengal; on the south by the Indian Ocean; and on the south-west and west by the Arabian Sea. It extends from Cape Comorin, in lat. 8° 4', to the northern extremity of the district of Ganjam, in lat. 20° 18', and from Golamelly, the north-west point of the British district of North Canara, in long. 74° 9', to Priaghy, in the British district of Ganjam, in long. 85° 15'. Its greatest length, measured from north-east to south-west, from Priaghy to Cape Comorin, is about 950 miles, and its greatest breadth, measured at right angles to the direction of that line, from the city of Madras to Golamelly, is about 450. Its seacoast on one face, measured in a south-eastern direction, and subsequently eastward to Cape Comorin, extends 540 miles, being nearly throughout washed by the Arabian Sea, and for a short distance by the Indian Ocean. On the other face, measured from Cape Comorin north-east to Priaghy, along the shore of the Bay of Bengal, its length is about 1,187 miles; and consequently the total extent of the seacoast of the presidency is 1,727 miles; being much greater than that of the two others

combined. In the presidency of Bombay, however, the haven of the same name can receive and shelter fleets of the largest ships; and in the presidency of Bengal, the Hooghly, though in some respects not so eligible as the harbour of Bombay, can receive and shelter as great a number of ships, not inferior in size. But, notwithstanding the great extent of the Madras coast, there is no harbour equal to either: Cochin, on the Malabar coast, which has the greatest depth of water, is, during several months of the year, closed by the south-west monsoon. Its entrance, moreover, is intercepted by a bar, and it does not appear to be adapted for large ships. In the mid-channel, the depth of water varies from about eleven feet to sixteen. The port of Mangalore admits with safety only vessels having not more than ten or twelve feet draught. Small havens and creeks are, however, very numerous along the coast of Malabar, and are generally estuaries of streams flowing from the Western Ghats in such numbers, that there are not less than twenty-nine rivers and ten nullas [streams of inferior size] within a distance of 217 miles. From Golamelly, the north-western extremity of this coast, to Mangalore, a distance of 150 miles, the coast is in general bold and rocky, with soundings increasing fast as the navigator recedes from the shore. From Mangalore for about sixty-five miles, the land near the sea is generally low and woody as far as Mount Dilly, a headland rising from the sea. The Malabar coast, which may be considered to commence at Mount Dilly, and stretch generally south-east as far as Cape Comorin, a distance of 325 miles, is, with little exception, low, and either muddy or sandy, having numerous shallow inlets extending a considerable distance into the land, and called by the British the Backwaters. The Western Ghats, throughout the whole extent of the coast, from Golamelly to the vicinity of Cape Comorin, stretch nearly parallel to it, at an average distance of about forty miles, though in some parts approaching considerably nearer. They are visible from a great distance at sea, and their height, and bold and rugged outline, render them very striking objects. Cape Comorin itself is low and sandy; but a few miles inland, and to the north of the extreme point, the southern summits of the Ghats rise in lofty and majestic peaks. To the north-east of Cape Comorin, the coast is little frequented for 166 miles, as navigation northwards into the Bay of Bengal is obstructed and rendered impracticable for ships by Adam's Bridge, a sand-bank extending from the mainland of India to Ceylon, having only two navigable channels, and neither of them (although of late years considerably deepened) allowing the passage of craft drawing more than eight and a half feet water. The sea, bounded north-west by the coast of India, north and north-east by Adam's Bridge, and east by the west coast of Ceylon, is called the Gulf of Manar, and though little frequented by large vessels, in

consequence of the obstruction northwards, has, on its north-west side, or the shore of Tinnevely district, the roadstead or haven of Tutacurin, where ships may anchor throughout the year in considerable safety, being sheltered towards the sea by several small islands. The whole of the shore of Tinnevely and Madura is generally low, rocky, and much beset by reefs. North of Adam's Bridge, the shore extends nearly north-east, being the coast of the British districts of Madura and Tanjore, and bounding on the north-west Palk's Bay or Palk's Gulf, which, on the south, is bounded by Adam's Bridge, on the south-east by Ceylon, and to the north-east is open to the Bay of Bengal. The shore in this part has no bold features; "the whole of the coast bounding the west side of the bay is lined with shoal water." At Calymere Point, 130 miles north-east of Adam's Bridge, and in lat. $10^{\circ} 16'$, long. $79^{\circ} 55'$, the coast of Coromandel commences, and holds a direction due north across the estuaries of the Cavery, which either inclose or traverse a delta, having a base of eighty-two miles towards the sea. Along this base, the places frequented by shipping are Negapatam, Nagore, and Tranquebar; none of them having shelter for large ships, which must be anchored in the open sea at a considerable distance. Nagore is, however, situate on an estuary of the Cavery, admitting vessels of 200 tons burthen. The Coromandel coast continues to hold a northerly direction for 297 miles farther, to Godegam, in lat. $15^{\circ} 20'$, where the river Mussey is considered to bound it to the northward, and retains the same character of slight elevation and general sandy formation, with shallow water along shore. Throughout this distance there is no shelter for large ships, except at Blackwood Harbour, in lat. $14^{\circ} 1'$, a roadstead, where ships are secure from gales from all points but the north. At Porto Novo, Cuddalore, Pondicherry, Sadras, Madras, Godegam, and some other less-important seafaring places along the coast, ships must be anchored in the open sea, exposed to the huge roll of the Bay of Bengal. From Godegam, the seashore is termed the Golconda Coast, and holds a direction north-east for 269 miles, to the southern point of the district of Vizagapatam, in lat. $17^{\circ} 15'$. In the south-western part, it contains the estuaries of the branches of the river Kistnah, and those more numerous of the river Godavery; and in that part is so low, that when prolonged and violent gales from the north-east are simultaneous with great land-floods, the coast is extensively inundated, and great devastation takes place. The most important maritime places on the coast of Golconda are Masulipatam and Coringa, neither affording shelter to large ships, which, as at the places previously named, must be anchored in the open sea. At Masulipatam, the estuary of a branch of the Kistnah receives coasting craft, and at Coringa, a similar outlet of the Godavery receives vessels of 200 tons. The other maritime places along

the Golconda coast are Motapali, Narsapoor, Gordawar, and Watara. In lat. $17^{\circ} 15'$, the coast of Golconda is considered to terminate, and that of Orissa to commence. From this point the coast becomes bold and rocky, with rugged hills or no great height at intervals, and for the most part retains this character throughout the coast of Orissa for 243 miles, to the north-eastern extremity of the presidency, at Priaghy. Vizagapatam, the most southern place frequented by shipping on the coast of Orissa, is marked by a bold bluff headland, called by seamen the Dolphin's Nose. The other seafaring places are Bimlipatam, Chicacole, and Ganjam. The hills on the Golconda coast are connected in some places with the great range of the Eastern Ghats; and as this range approaches the south-west, its distance from the shore gradually increases, leaving space for the plain comprised in the tract known as the Circars and the Carnatic. About fifty-six miles north-west of the city of Madras, the Eastern Ghats form a junction with the range "which, sweeping irregularly inland, crosses the peninsula in a south-west direction;" and in the vicinity of the Neilgherries joins the Western Ghats, which extend to Cape Comorin on the one side, and to the northern frontier of the presidency on the other. The low land between the base of these last-mentioned mountains and the sea is of less breadth than that lying in the like situation with respect to the Eastern Ghats, being in some places not more than twenty or twenty-five miles in breadth; nowhere more than fifty. It comprises the level part of the territories of Travancore and Cochin, and nearly the whole of the British districts of Malabar and North and South Canara. The seaward faces of both the Eastern and Western Ghats are far more abrupt and more elevated above their bases than the sides which face towards the interior, as the two great ranges form, one on the south-west, the other on the south-east, the buttresses or walls of the triangular table-land of the Deccan. Though this great table-land rises considerably towards the south, it has a general slope of surface to the east or south-east, all the streams of any considerable magnitude flowing in that direction, and being ultimately emptied into the Bay of Bengal. The line of waterheads extends along the culminating ridge of the Western Ghats, and consequently at a short distance from the Western or Arabian Sea; and the three great rivers, the Godavery, the Kistnah, and the Cauvery, flow south-eastward or eastward nearly across Southern India, to their fall into the Bay of Bengal. Of each of these a description will be found in its proper place under the alphabetical arrangement. Numerous feeders from the Western Ghats discharge themselves into these main streams. Other large torrents flow from the table-land, and in the rainy season drain the level country, and fall into the Bay of Bengal. The principal of these are the Northern Penna, the Southern Penna, and the Palar; all of which rise in the

territory of Mysore. On the western side of the presidency, the numerous torrents falling into the Arabian Sea have perennial streams flowing from the Western Ghats, and channels with great declivity in the upper part, in the vicinity of the mountains; but towards the sea the declivity becomes slight, and these streams ultimately expand into shallow estuaries of great width, or into extensive and shallow lakes, communicating with the sea, and denominated by British writers backwaters. Of those, the most remarkable is the Backwater of Cochin, which extends from north to south a distance of 120 miles.

The mineral wealth of the presidency is attracting notice. Iron-ore occurs in several parts: it is found in the district of Malabar, near Beypoor, where iron-works have been erected: it exists also in great abundance in South Arcot, in the vicinity of Porto Novo, where extensive foundries have been established by a joint-stock association, called the East-Indian Iron Company, to whom also belong the works at Beypoor. Manganese exists in Mysore, in the Neigherries, and in Bellary: copper-ore is found in Nellore, in many parts of the Eastern Ghats, and in Bellary; but there are scarcely any regularly continuous lodes of the metal, and miners have generally been baffled in attempting to work according to the usual rules of their art. Perhaps, however, the unsatisfactory results are attributable to their not having penetrated to a sufficient depth. Antimony is found in Mysore, as is also silver-ore, both there and in Madura, generally in the form of a carbonate: corundum, in the form of emery, as well as in other forms, occurs in the valley of the Cauvery; lead-ore in Mysore; beryl in Coimbatore, and in various other places. Diamonds, generally of moderate value, are sometimes met with in the sandstone of Rajamundry, of Guntoor, and of Vizagapatam; and garnets are peculiarly abundant in the same districts. Coal is found on the banks of the Godavery, near Chinnore; and anthracite in considerable quantities in the same vicinity.

The climate is more varied by the different elevations of the surface, and by other local circumstances, than by the latitude. The table-land, or undulating surface on the summits of the Neigherry group, having an elevation of from 6,000 to 7,000 feet above the sea, enjoys the mild climate of the finest part of the temperate zone; and on the coast of Canara and Malabar the heat is tempered by the vicinity of the Western Ghats, and by the sea-breezes. On the eastern coast, the heat is very great during the early part of summer; and Masulipatam, on the estuary of a branch of the Kistnah, has been often mentioned as one of the hottest places in India. The Carnatic also, especially the districts of Arcot, Chingleput, and Nellore, is noted for the great heat and dryness of the winds rushing from the gorges of the Eastern Ghats, or sweeping over the parched and sultry plains

of the Carnatic or the Circars. The most remarkable circumstance in the climate of this part of India is the regular alternation of opposite monsoons. During the prevalence of the south-west monsoon, which commences in the latter of the spring months or the earlier of the summer ones, the clouds discharge volumes of rain on the districts of Malabar and Canara, while a considerable proportion, finding their way over the range, fall on the table-lands of Mysore, the Ceded Districts, and the territory of the Nizam, and swell the Cauvery, Kistnah, Godavery, and other rivers, which roll vast fertilizing currents into the Carnatic and Coromandel coast, at a season when those lands receive no water from the heavens. The fall of rain is enormous on the Western Ghats, in some parts of which nine rainy months in each year are calculated on. As the south-west monsoon dies away, the north-east sets in, and continues to blow during October and November, but brings with it a considerably less quantity of rain than that resulting from the other. The average annual rain-fall during the north-east monsoon does not exceed thirty inches.

The most valuable natural product of the presidency is ship-timber, which abounds in the forests of Malabar, Travancore, and Canara, as well as in those of the Eastern Ghats. Upwards of 100 different sorts of fine timber are enumerated as grown there; and amongst them teak, considered inferior to none for hulls of ships, and peon, of equal quality for masts and spars. A large proportion of the sandalwood supplied to the Chinese market is obtained from the forests of Malabar and Coorg. Of alimentary crops, rice is largely cultivated, and in great perfection, in the alluvial grounds of Canara, Malabar, Tinnevely, Tanjore, and Rajamundry. Of dry crops, or those which do not require copious irrigation, the staple is ragi (*Eleusine coracana*): maize and millet of various kinds are also largely cultivated, as well as oil-seeds, pulse, cucurbitaceous plants, yams, and plantains. The cocoanut-palm receives great attention, and is largely cultivated on the sandy alluvial tracts, as is also the palmyra-palm; the former for the food and cordage which it furnishes, the latter for its sap, which, subjected to the processes of fermentation and distillation, yields an intoxicating beverage. Sugar is produced in considerable quantities. Experiments, conducted by the government, for the introduction of the Mauritius cane, are reported to be progressing favourably. One of the more important commercial crops is cotton; and to the improvement of the quality of this staple produce, as well as to its more extended cultivation, government has been successful in drawing public attention. Some good indigo is cultivated; but the finest kinds grow wild. Tobacco is also raised, but principally for home consumption. Pepper is the principal export of the Malabar coast. Cardamoms, which form a less important, yet a considerable article of

export, are brought principally from the valleys of Coorg and Cochin.

Madras has participated in the improvements effected by means of useful public works, carried on at the expense of government for some time past, and which, under recent arrangements, will hereafter be greatly extended. Among such works, the annicuts on the rivers Godavery, Kistnah, and Cauvery, deserve especial mention. Private enterprise, moreover, may be expected to co-operate with the efforts of government in placing this part of India in the position which it is entitled to occupy. Railways are rapidly advancing to completion, and ere long Madras will have the advantage of being connected with Bombay by rail passing in the direction of Bellary, Sholapore, and Poona; while farther south, a line from Madras to Ponany will unite the eastern and western coasts of the peninsula. The electric telegraph, too, supplying the means of effecting communications nearly with the rapidity of thought, will shortly confer its almost magical powers upon Madras, by connecting it with the other presidency towns, and with the rest of India.

The presidency is divided into districts, the respective area and population of each, as officially reported, being set forth in the following tabular statement:—

Districts.	Area in Square Miles.	Population.
Rajahmundry	4,501	1,012,036
Madulipatam	4,711	529,860
Guntoor, including Palnadu ..	4,752	579,089
Nellore	7,959	933,690
Chingleput	2,717	593,462
Madras	27	720,000
Arcot, south division, including Cuddalore	5,020	1,006,005
Arcot, north division, including Consoddy	6,580	1,485,873
Bellary	12,101	1,229,599
Cuddapah, including Ponnagur	13,298	1,451,921
Salem, including Vonnadoor and Mullapudy	7,499	1,195,377
Chimmar	8,151	1,153,962
Trichinopoly	2,032	709,196
Tanjore, including Nalore ..	3,781	1,676,086
Madura, including Shevanga and Ramanad	13,545	1,756,791
Tinnevely	5,482	1,260,216
Malabar	6,050	1,514,009
Canara	7,152	1,056,333
	110,246	19,847,305
Ganjam	5,758	926,930
Vizagapatam	4,690	1,254,272
Kurnool	3,278	273,190
Coorg	2,116	Not known.
Total	132,090	22,301,697

Of the above, the first eighteen, being under the ordinary system of rules and management, are called "regulation districts;" the latter four, not being yet brought within the operation of that system, are termed "non-regulation

districts." The majority of the population throughout the whole presidency are Brahmans, but in some places Mussulmans, many of them said to be converts, or descendants of converts, are found in considerable numbers. The annual revenue, according to official authority, is thus rendered for the year 1853-54:—

Land	£3,402,333
Sayer, &c.	249,086
Stamps	52,819
Customs	126,528
Tobacco	8,957
Salt	480,213
Mint	15,012
Post-office	41,392
Marine	6,606
Judicial fees and fines	11,778
Subsidies from Mysore, Travancore, and Cochin	344,643
Interest on arrears of revenue ..	34,502
Miscellaneous receipts	173,719
Total	£4,947,588

The native states of Travancore and Cochin, and the hill zemindarries adjoining the British district of Vizagapatam, are also under the political and military management of this presidency. Mysore, though under the political management of the government of India, is subject for all military purposes to the jurisdiction of the Madras presidency, by the territories of which it is indeed almost completely surrounded. Their respective areas are stated as follows:—

	Sq. Miles.
Cochin	1,988
Mysore	30,886
Poodocottah (Rajah Tondiman's dominions)	1,165
Travancore	4,722
Jeypoor and hill zemindars	13,041

And if to their aggregate, amounting to 51,802 square miles, be added 132,090, the area of the territory of the Company in this presidency, and the further quantity of 188 square miles, the area of the French possessions within it, the total area will be found to be 184,080. The military strength of the Madras presidency comprises a body of 57,063 men. In April, 1853, the entire force was distributed as follows: cavalry, 3,280; infantry, 43,351; engineers, 913; artillery, 4,519. This is exclusive of her Majesty's troops, of whom there is usually a considerable body stationed within the Madras presidency. Upon the annexation of the Punjab to the British dominions, a revised distribution of the armies of the three presidencies was effected, with the view of providing for the defence of the north-western frontier without further addition to the regular native army. Under this arrangement, the Saugor division above the Ghats, including Mhow, has been assigned to the Madras army, while the Rajpootana field-force army has been

transferred to Bombay. At present, the force is accordingly thus distributed:—The central division comprehends Fort Guntoor, which comprises North and South Arcot, and Nellore, comprising Chingleput and the northern parts of Salem; the northern division, containing Masulipatan, Rajahmundry, Vizagapatam, Ganjam, and the Bengal districts of Cuttack; the southern division taking in the southern part of Salem, Coimbatore, Trichinopoly, Tanjore, Madura, Tinnevely, and the Travancore territory; the Mysore division occupying the territory of the rajah of that country; the Malabar and Canara division, stationed in the Malabar and Canara collectorates; the Ceded District division comprising Cuddapah, Bellary, and Kurnool; and the Sangor district embracing the Sangor and Nerbudda territory. In addition to the various places contained in the above divisions, Madras troops are stationed at Dharwar, Kulludgee, and Sholapore, all within the Bombay presidency, and also at Moulinein, Penang, Malacca, Singapore, Labuan, and, together with troops from Bombay, at Aden. The facilities of the Madras presidency for commerce are not great; the generally unfavourable character of the coast, the inadequate number of ports, and the indifferent nature of those which exist, have always been found impediments to any extensive development of mercantile enterprise. The value of the total foreign exports in the year 1853-54 was 1,96,30,200 rupees; that of the imports in the same year, 95,63,776. The principal exports were to the United Kingdom, Ceylon, and China. More detailed information, relating to the various districts and towns under the presidency, will be found in the articles respectively devoted to them.

MADRAS.—The seat of the presidency bearing that name, and the principal place of the territory subject thereto, as also of the district of Madras. The city is on the Coromandel coast, or the western shore of the Bay of Bengal, to the beach of which its buildings extend. Throughout the whole world no place of equal commercial and maritime importance is so disadvantageously circumstanced for maintaining an extensive and regular foreign trade. For two months in the year, during the continuance of the north-east monsoon, that is from the close of October to the close of December, even the crews of ships of the line, with all their appliances and means, can hold no communication with the shore without great danger; and at no time can they visit it in their own boats. The surf is less violent and dangerous with a westerly wind, which, blowing off shore, diminishes the force of the sea setting in towards the beach; but it is at all times sufficient to dash to pieces any boats of European construction. Landing or putting off to the shipping can only be effected, either for goods or passengers, in native craft, the larger sort of which, called by Europeans a *massulah-boat*, is made of planks, without ribs

or timbers, but merely sewed together with coconut-twine or coir, so as to yield to shocks without being shattered by them. During the north-east monsoon, however, even in those boats the landing is very dangerous; and many lives have been lost from time to time by rashly attempting it, the horror and danger being increased by sharks ready to devour any persons that may be exposed to their attacks. The other and smaller craft,—the *catamaran*, consists of three cocoa-tree logs lashed together, and big enough to carry one, or at most two, persons. With the view of sheltering the landing and diminishing the danger and inconvenience which attend going ashore or putting off to the shipping, an attempt was made to construct a breakwater 300 yards from the beach, the dimensions being, extreme length, from N.N.E. to S.S.W., about seventy-six feet; extreme breadth, from E.S.E. to W.N.W., about fifty-five feet. The soundings on it were found to vary from twenty-five to twelve feet. The attempt, however, was unsuccessful, and as the abandoned work was considered a new source of danger, a buoy was laid down on the south end; and the placing another at the north was contemplated. A breakwater to shelter ships would undoubtedly prove a work of enormous cost and difficulty; but the evils arising from the want of some such protection are almost incalculable, vessels being at present obliged to anchor two miles from shore, in nine, ten, or eleven fathoms, exposed to a heavy swell rolling in from seaward, save when the wind blows from the westward or land side. The bottom is in many parts of stiff mud, from which it is sometimes difficult to extricate anchors; and as it is frequently necessary to hurry to sea in bad weather, many anchors remain in the ground; the loss of these to the owners not completing the mischief, since the abandoned anchors rub and destroy the cables of vessels afterwards lying in the roads. Similar damage is caused by wrecks, of which there are some on the bottom. In 1813, a suspension-pier was projected by M. Piron, a French engineer of Pondicherry, to be erected over the surf of Madras, but the proposal was not entertained. Subsequently, the design of constructing a pier at Madras was taken up by a company, designated "The Madras Pier Company;" but the project appears to have been abandoned, and the company has been dissolved. More recently, a proposal was made by Messrs. Saunders and Mitchell, of London, to erect a pier at Madras, and the subject is now under consideration. The dangers of the roadstead during storms being great, their symptoms or premonitory signs are carefully watched for at the Observatory, and signals, on their appearance, are hoisted at the flagstaff of the master attendant, warning ships to proceed to sea. Innumerable losses have occurred from neglecting due precautions. An excellent judge, however, observes, "Gales are not frequent; and if a ship be kept in good condition for

proceeding to sea, embracing the opportunity to weigh, cut, or slip, and run out on the first approach of a gale, there is probably little danger to be apprehended." The old lighthouse within the walls of Fort St. George has ceased to be used, and on January 1st, 1844, on a new lighthouse, erected on the Esplanade north of the fort, a light was for the first time exhibited, and has since been continued for the guidance of mariners. It is elevated 128 feet above the mean level of the sea, and is what is called a flashing light, the duration of the flash to that of the dark interval being as two to three.

The earliest British settlement on the coast of Coromandel was at Armegon, about thirty-six miles north of Pulicat. A small grant of territory at Madras, by a native prince, in 1639, induced the chief, Mr. Francis Day, to abandon the old factory, and erect on the new acquisition Fort St. George, which was the nucleus round which have clustered and grown the remainder of the buildings regarded as constituting, with the fort, the city of Madras. The fort is in form an irregular polygon, somewhat in the form of a semicircle, of which the sea face is nearly a diameter, running north and south, and presenting a clear front on that side of 500 yards. The sea flows to within a few yards of the ramparts, which are fenced by an artificial barrier of stone-work, from the influence of the surf and tide. Dilapidations have notwithstanding occurred, occasioned principally by the sinking of the foundations consequent on the encroachment of the sea; but measures are in progress for the recovery of the beach, when the necessary repairs have been ordered to be made. The foundation of the works on this side contains a series of cisterns, supplied with water from wells in the Black Town. On the land side the fort is defended by a double line of fortifications, both bombproof; its sea face is well armed with heavy guns. The inner inclosure is so constructed as to afford accommodation to a large body of troops. In the rest of the space are the offices of the various departments of government, and barracks for European troops. The barracks occupy the north and western extremity of the inclosure, and are of an oblong form, the length being from north to south. This building has a terraced roof, and is two stories in height, the upper one being occupied by the officers, the lower by the privates. There is said to be accommodation for 1,000 men; but it seems, at the least, doubtful whether such a number can be conveniently lodged. Attached to the barracks is a bazar, for the supply of the troops; the other buildings of note are the Old Church and the Exchange. The Black Town is separated from the fort by a wide esplanade, which is now improved by a few ornamental plantations and well-designed watercourses. Its site is very low, being in some places only six inches above the level of the sea at spring tides, against the inroads of which it has been de-

fended by a strong bulwark of stone. There are three broad streets, running north and south, dividing the town into four nearly equal parts. These streets are respectable in appearance, well built, and contain the principal European shops, as well as many houses with upper stories and terraced roofs. On the beach, parallel with these streets, is a line of public offices, including the Supreme Court, the Custom House, the Marine Board Office, and the offices and storehouses of the principal European merchants. These are well-constructed buildings, having colonnades to the upper stories, supported on arched bases, and overlaid with chunam or cement, made of lime burned from shells, and forming a hard, smooth, and polished surface, resembling white marble. In conspicuous situations in the town are the male and female orphan schools, and the jail of the Supreme Court. The other buildings most worth note are—the Mint, the Roman Catholic Cathedral, the Church Mission Chapel, Armenian Church, Trinity Chapel, the General Hospital and Medical School. The numerous minor streets, which are inhabited by the natives, are irregular, crooked, narrow, and ill-ventilated. The houses are generally built of clay, overlaid with cement of chunam, and roofed with tile; and for the most part they consist of continuous apartments, arranged round a small quadrangular court. In 1847, the outlay of a large sum was authorized for improving the drainage of the Black Town, a measure most essential for raising its sanitary condition. It is a favourable circumstance, that the town is well supplied with water of remarkably pure and good quality, derived from wells, varying in depth from twenty to thirty feet. The water obtained from the wells in a certain inclosure near the north wall, known by the name of the Seven Wells, is especially valued for its purity, which it is said by seafaring men to preserve for a length of time at sea. Public waterworks have been erected in this inclosure by government, and two reservoirs have been constructed, one in the fort, the other midway between the fort and the town, which are daily replenished from the wells by means of metal pipes; and a supply is thus furnished for the shipping, as well as for all the inhabitants who choose to send for it. Royapooram, which must be considered a portion of Madras, lies on the north side of the Black Town, and extends for a mile along the beach. It is a wretched assemblage of mud huts, inhabited chiefly by fishermen and boatmen, whose poverty is extreme, as is the filthiness of the place. From these causes the people are wretchedly unhealthy; and it is calculated that two-thirds of the children born die before reaching maturity. The division called Vepery, including Pursewakkum, lies to the west of the Black Town. The principal streets are well built and clean, but the cross-streets are close and filthy. Chintadrapettah, separated from Vepery by the river Koom, which almost

incloses the former, is for the most part regularly built, and clean : here is a public dispensary. The populous suburbs of Poodoopettah and Egmore lie nearly due west of Chintadrapettah. Another large division of Madras, called Triplicane, runs parallel with the sea, south of the fort, being divided from it by the small river Koom, flowing very circuitously, but in a direction generally from west to east, and falling into the sea about a quarter of a mile south of the fort. About a mile from its mouth, this river divaricates, forming two nearly equal branches, the left or more northern, close to the point of parting, receiving a watercourse running from the north. After this accession, the left branch flows by the southern rampart of the Black Town, and subsequently by the south-west face of the fort. The right branch of the Koom takes a direction first south, subsequently south-east ; and both joining, about 300 yards from the sea, inclose an island, three-quarters of a mile in length and of half that breadth, laid out with roads, and ornamented in the centre by a statue of Sir Thomas Munro. On the right or south-west bank of the right branch are the Government Gardens. Government House is a spacious and handsome building ; the floors, walls, and pillars, are overlaid with cement of chunam, highly polished, so as to resemble fine white marble. There is an enormous banqueting-room, built in front of the house ; but it is considered to be in bad taste and inconvenient. Chapak Garden, the residence of the nawab of the Carnatic, is situate south-east of Government Garden ; and between it and the sea is a mosque, of some architectural excellence, the only Mussulman place of worship of any importance in the city. Royapetta, another extensive and populous suburb, lies westward of Triplicane, and adjacent to it. St. Thomé, which is also comprehended in the limits of Madras, is situate about three miles to the southward of the fort, and close to the sea. It is a straggling place, the continuity of the buildings being broken by uncovered ground ; but the portion occupied is generally clean, and in good order. The situation on the beach is considered favourable for European convalescents. The principal church belonging to the English establishment is that of St. George, situate in Royapetta. It is very beautiful. St. Andrew's Church, built for the use of the members of the Church of Scotland, is in the southern part of the Vepery division. It has been regarded as a fine specimen of architecture and engineering skill. The exterior of the body of the church is in the Ionic order, the interior in the Composite. It was finished in 1820, at a cost of about 20,000*l*. St. Andrew's Bridge, over the river Koom, in the vicinity of the church, was finished in 1818, and is considered a good specimen of architecture on a small scale. The erection of an additional masonry bridge over the river Koom, at a point called Ashton's Shop, was sanctioned by the home authorities

in 1846. At the southern extremity of the town, the river Adyar flows from west to east, falling into the sea about half a mile south of St. Thomé. To the west of the town, a chain of tanks, or pieces of stagnant water, extends from north to south. Of these, the most southern, called the Long Tank, is, when full, two miles in length from north to south, and half a mile in breadth : there are several others. Though excellent water is obtained by sinking wells in the Black Town, many of those in the other parts of Madras yield only that which is brackish, and scarcely drinkable. The site of the town is remarkably level, and rather low, no part being probably more than about twenty feet above the sea ; but the vicinity of the sandy beach, and the influence of the sea ever rolling in and breaking on it, together with the prevalence of the sea-breezes, have a salutary effect. The average mean annual temperature for eight years is stated as follows :—1831, 81° ; 1832, 84° ; 1833, 83° ; 1834, 87° ; 1835, 82° ; 1836, 77° ; 1837, 82° ; 1838, 86°. The north-east monsoon sets in with much thunder and lightning and heavy rain, about the close of October, and continues to the close of December, after which it gradually diminishes in force until the middle of February, about which time it ceases. The south-west monsoon, commencing in May, and ending in the beginning of October, is scarcely felt here, its force being intercepted by the Ghats. During the hot months, the sea-breeze sets in about noon, and continues for some time after nightfall. From its refreshing and invigorating influence, the British popularly call it the doctor. It is succeeded by the land wind, a sultry and oppressive current of air, which prevails until the setting in of the sea-breeze on the following day.

The European residents live in garden-houses, or villas situate in compounds or distinct inclosures, dispersed throughout the suburbs, and about the neighbourhood of the city, extending from three to four miles inland. These are generally of two stories, constructed in a pleasing light style of architecture, terraced, with porticos and verandas, supported by pillars. The lower story is often raised several feet from the ground ; the doors and windows are large, and provided with Venetian blinds, so as to admit free ventilation ; and the apartments are lofty, spacious, and airy. During the prevalence of the hot, dry winds, mate, made of kusha, a fragrant grass, and kept wet, are placed at the doors and windows on the western side of the house, whereby coolness, moisture, and a grateful scent are imparted to the air permeating them. By these means, aided by the use of the punkah, the heat is rendered more tolerable. The compounds, or inclosures in which the houses are situate, are usually so closely planted with trees and shrubs, that even when viewed from a height, the tops only of many of the houses can be seen. Such plantations interrupt due ventilation ; but the evil is tolerated in con-

sideration of the protection which they afford from the dust and glare, so distressing in the Carnatic.

The tables of European residents have ample means of supply in the markets, where are offered for sale in abundance, beef, mutton, veal, kid, fowls, turkeys, ducks, geese, fish of excellent quality, potatoes, turnips, peas, carrots, cabbages, beans, sweet potatoes, yams, onions, salad mangoes, plantains, pine-apples, custard-apples, oranges, grapes, guavas, and other fruits less esteemed. Society is much more limited in Madras than in Calcutta, and there is much less of pretension and luxury: there are few handsome equipages; palanquins are used, chiefly by natives. The favourite drive is the beach, extending along the seashore for about a quarter of a mile south of the fort. The Mount Road, leading from the fort to the cantonment of St. Thomas, has for six miles a succession of beautiful villas on each side, and is lined with noble trees, affording ornament and shade.

Madras being the seat of the government of the presidency, the governor, members of council, and principal functionaries, reside here, as do also the judges of the Supreme Court (a chief justice and two puisne judges), and other officers of that institution. The chief establishments of every department of the government are here, and there are various local establishments. Among these may be mentioned the police-office, attached to which are a superintendent and justice of the peace, two police magistrates, two others, called also deputy-superintendents of police, and several subordinate officers; the court for the recovery of small debts, of which there are four commissioners, and the Government Savings Bank. The Bank of Madras, being not only chartered, but in some degree subjected to the control of government, which nominates part of the directorial body, may, in a certain sense, be regarded as a government institution. Other banks have branches here, and the number of agency and mercantile houses is considerable. Various societies for insurance of lives, as well as against fire and marine risk, have establishments or agencies in the city. Madras is the seat of an episcopal see. In addition to the principal church (St. George's), there are about eight churches and chapels of the United Church of England and Ireland: that of St. Mary's, within the fort, has several monuments; and among them one to the memory of the celebrated missionary Schwartz. In the Scottish church of St. Andrew, already mentioned, the worship is conducted by ministers in communion with the Established Church of Scotland, of whom two are chaplains in the service of the Company. The seceding body from the Established Scottish Church, calling itself the "Free protesting Church of Scotland," maintain public worship in the hall of the Free Church Mission Institution. The Romanists have a bishop or vicar-apostolic, with a considerable staff of clergy, performing the cere-

monies of their faith in various places. The Armenians have a church, opened so long since as 1712. The Wesleyans have five chapels, the Baptists two, the Independents one, and the American Mission two. Education, or at least that of the highest order, does not hitherto appear to have been much encouraged: a university was some years ago projected, comprehending a college and a high school, but the latter only is in operation. Measures however have been taken for the introduction of a new scheme of state education throughout the presidency, under which it may be hoped that the literature and science, the philosophy and arts of the West, may be imparted to the people of this division of India. The religious and charitable associations are numerous, and education is a leading object with many of these. The military male and female orphan asylums, two most valuable and meritorious institutions, date respectively so far back as 1787 and 1788. The medical school, founded some years since, for the instruction of natives in medicine and surgery, has been most useful, as well in qualifying for the practice of the healing art, as in gradually removing the repugnance felt to the necessary studies. There is an agricultural and horticultural society, of which the governor is the patron. The Madras Literary Society enjoys the same distinguished patronage, and now adds to the title above given, that of Auxiliary of the Royal Asiatic Society. The mention of the Madras Polytechnic Institution (of which the governor is likewise patron) exhausts the list of societies of this class; but the Government Observatory must not be overlooked among the establishments for the advancement of science. About nine newspapers are published at Madras; some three times a week, some twice, and some once only. Two publications are issued twice in each month; seven are published monthly: one of these is commercial, one devoted to the interests of the society of Freemasons; the remainder are of a religious character. Lists of the army and civil service are published quarterly; and six or seven publications, all of them of the description of almanacks, are sent forth annually.

The city of Madras, including the whole of the various divisions of which it is composed, and the jurisdiction of the Supreme Court, extends along the seacoast in a direction nearly from north to south for a distance of nine miles: its extreme breadth may be considered to be $3\frac{1}{2}$ miles, its average breadth $2\frac{1}{4}$: the area is stated officially to be thirty square miles; but a large portion of this space, comprehended within the assigned limits, is occupied by gardens and compounds or inclosures, and in various parts dwellings are thinly scattered. No census has been made to ascertain either the classes or total amount of the population; and the official statement, in which it has been "assumed at 720,000," probably errs in excess. The great majority are Brahminists; Mussulmans are next in numbers; Christians com-

paratively few, and consist for the most part of those denominated Portuguese Christians, being descendants of persons of that nation, or of proselytes made by their ecclesiastics. Distance from Tanjore, N., 178 miles; Cuddalore, N., 105; Pondicherry, N., 88; Coimbatore, N.E., 270; Calicut, N.E., 330; Cananore, E., 343; Mangalore, E., 370; Bangalore, E., 185; Arcot, E., 73; Bombay, S.E., 640; Poona, S.E., 570; Bellary, S.E., 270; Hyderabad, S.E., 320; Nagpore, S., 565; Masulipatam, S., 220; Calcutta, S.W., 885. Lat. $13^{\circ} 5'$, long. $80^{\circ} 21'$.

MADRUPORE.—A town in the British district of Bhagulpore, lieut. gov. of Bengal, 22 miles E.S.E. of Bhagulpore. Lat. $25^{\circ} 5'$, long. $87^{\circ} 20'$.

MADURA, under the presidency of Madras, a British district, named from its principal place. It is bounded on the north by the British districts Coimbatore and Trichinopoly; on the north-east by Tanjore and Rajah Tondiman's dominions; on the east by Tanjore and Palk's Straits; on the south by the Gulf of Manar; on the south-west by the British district Tinnevely; and on the west by the territory of Travancore. It lies between lat. $9^{\circ} 5'—10^{\circ} 54'$, long. $77^{\circ} 15'—79^{\circ} 15'$, and (including Dindigul) has an area of 10,700 square miles. The seacoast of this district comprises the north-west coast of Palk's Straits and of the Gulf of Manar, and extends in a direction from north-east to south-west 115 miles. The Gulf of Manar, formed on the north-west by the seacoast of the districts of Tinnevely and of Madura, on the east by the western coast of Ceylon, is terminated on the north and north-east by Adam's Bridge, "a narrow ridge of sand and rocks, mostly dry, nearly connecting the island of Ceylon with the continent." This ridge, at its north-western extremity, joins the island of Rameserum, between which and the headland of Tonitorai, on the continent, is the Paumbaum passage. The other end of Adam's Bridge joins the island of Manaar, between which and Ceylon is a narrow passage, navigable only for craft of moderate size. The coast of this district throughout its entire extent, from the south-west extremity to Adam's Bridge, is much beset with dangerous rocks and shoals. From this cause, that part lying to the north of Adam's Bridge, and forming the north-eastern coast of Palk's Bay, can scarcely be frequented by vessels of any burthen. The north-western part of this district, forming the subdivision of Dindigul, extends over part of the undulating rugged plateau and eastern declivity of the Ghats, in this part called the Vurragiri, Pulnai, or Kunundaven Mountains. This group has at Permaulmullay, its highest summit, an elevation of 8,000 feet above the level of the sea. The principal geological formations are gneiss, stratified with quartz; but in some places there are immense precipices of granite. South-eastward of this group is the extensive valley of Dindigul. The average eleva-

tion of the plain country of Dindigul and Madura is, at the base of the mountains, about 800 feet above the sea, falling in the maritime tracts to 200. The south-eastern portion of the district, towards Palk's Straits and the Gulf of Manar, is an extensive plain, without a single hill or conspicuous eminence. The undulating formation, where it appears on the coast, is of sandstone.

Though a few rivers hold their course northward and north-eastward towards Coimbatore, and discharge themselves into the river Cauvery, the general slope of the country is eastward and south-eastwards, towards the Gulf of Manar, Palk's Bay, and the Bay of Bengal, in which direction is the main drainage. The principal river is the Vygar, which rises at the south-western extremity of the valley of Dindigul, and flows seventy miles north-eastward, to Jyempolliam, receiving on its way numerous feeders right and left, streaming down from the ranges inclosing the valley. It at that point turns south-east, in which direction it flows 100 miles, by Madura and Ramnad, below which latter place it expands into a considerable tank; and eleven miles still lower, falls into Palk's Strait, a short distance north-west of the headland of Tonitorai. The other rivers (which are very numerous), though having sometimes considerable volumes of water during rains, are generally destitute of it in the dry season.

The climate of the hills is mild and genial in summer, being seldom below 50° or above 75° . It is said, however, to be cold in January, when the ground is covered with hoar-frosts during the morning; and it is singular, that at this chill period the population are subject to intermitting fevers. February, March, and April constitute the dry season, which is followed by a succession of rainy weather throughout the prevalence of the south-west monsoon. In October, the north-east monsoon sets in, and continues with more or less violence till December. The climate of the plain is a good deal characterized by dryness and heat, the thermometer having been known to reach 115° , and, according to some, 130° . It participates in the vicissitudes of the two monsoons,—the south-west continuing from April till July, the north-east from October to December; yet, notwithstanding this double provision, the district sometimes suffers ruinously from drought. The soil in the vicinity of the sea is generally sandy, but in the interior black and fertile, produced apparently from decayed vegetation, and well suited for the growth of cotton, which is the principal commercial crop. Sugar-cane and betel-nut are cultivated in the valleys. Tobacco is also grown to some extent, both for home consumption and exportation, it being in much demand, and considered the best produced in the southern provinces. In favourable situations, various esculent vegetables known in Europe are cultivated with success, and in considerable quantities; comprising peas, beans, potatoes, cabbages, para-

nips, turnips, cucumbers, and other cucurbitaceous plants. Of fruits, there are the orange, citron, guava, mango, jak (*Artocarpus integrifolia*), and others of less importance. The population of Madura, including Dindigul, will be found under the article MADRAS. A large majority of the inhabitants are Hindoos. The language spoken in the district is the Tamil. The principal route is from north-east to south-west, from Trichinopoly through Madura, to Palamkotta, and thence to Cape Comorin: from this main line a road passes off north-west to the military and civil station of Dindigul, and south-eastward to that of Ramnad; and another south-eastward to the seaport of Tutacorin. Good roads of less importance are numerous in every direction throughout the plain country, except in the district of Ramnad, where they are generally mere sandy tracks, impracticable for wheel-carriages. The principal places are Madura the (capital), Dindigul, Ramnad, Shivaganga, Kamuri, Kilakarai, Autankarai, Devipattinam, Tonde, Tirumangalam, and Malur.

MADURA.—A town, the principal place of the British district of the same name, presidency of Madras, 33 miles S.S.E. of Dindigul. Of late years, considerable improvements have been made in this town, by laying it out with wide streets, market-places, and accommodation for travellers, whereby the public health and convenience have been greatly promoted. Lat. $9^{\circ} 55'$, long. $78^{\circ} 10'$.

MADUTHOOR.—A town in the British district of Tinnevely, presidency of Madras, 29 miles E. by N. of Tinnevely. Lat. $8^{\circ} 49'$, long. $78^{\circ} 8'$.

MADUVANALLI.—A town in the British district of Coimbatore, presidency of Madras, 122 miles E. by N. of Cannanore. Lat. $12^{\circ} 10'$, long. $77^{\circ} 13'$.

MAGAMURCHY.—A river rising in lat. $11^{\circ} 59'$, long. $78^{\circ} 6'$, and, flowing through the British district of Salem for forty-two miles in a south-westerly direction, falls into the Cauvery on the left side, in lat. $11^{\circ} 30'$, long. $77^{\circ} 47'$.

MAGANUND, a pass through the Sewalik ridge bounding Sirhind to the north-east, is situate on the route from Sidowra to Nahun, and five miles S.W. of the latter town. The road lies along the course of the Markanda, which crosses the ridge, flowing from the Kyarda Doon to Sirhind. Maganund, a small village at the northern extremity of the pass, gives name to it. Here was the rendezvous of the British army destined to attack Nahun, at the commencement of the Goorkha war in 1815. The road was then very difficult, so that great numbers of bullocks and camels perished, the elephant being on that, as on other occasions, found the most surefooted and efficient beast of burthen in hilly roads. At the time of Davidson's visit, it appears to have been much improved, as he describes the ascent

from Mogee Nun (Maganund) as very gradual. As the elevation of Nahun is 3,207 feet above the sea, and that of Naraingurb, in the plain of Sirhind, and near the southern base of the Sewalik range, is 2,154, the elevation of Maganund may, by a coarse approximation, be taken at 2,600. Distant N.W. from Calcutta 1,030 miles. Lat. $30^{\circ} 32'$, long. $77^{\circ} 19'$.

MAGUEE.—A town of Eastern India, in the native state of Muneepoor, 22 miles N.N.W. from Muneepoor, and 116 miles from Jyntea-poor. Lat. $25^{\circ} 6'$, long. $93^{\circ} 54'$.

MAHA NUDDEE.—A river formed in the British province of Saugor and Nerbudda, from several small feeders, the principal of which are stated to be the Kuthna and the Niwar. The source is in lat. $23^{\circ} 44'$, long. $80^{\circ} 16'$, a few miles west of Belhari, whence the river flows in a north-easterly direction for thirty miles, through the Saugor and Nerbudda territory, thirty-seven miles through the native state of Meyhar, and seven miles through that of Rewa, and falls into the Sone in lat. $24^{\circ} 4'$, long. $81^{\circ} 7'$.

MAHABALIPOORAM, or the **SEVEN PAGODAS,** on the Coromandel coast, and in the British district of Chingleput (presidency of Madras), so called because built in honour of Maha Bala, or the great Bala, the gigantic brother of the deity Krishna. Distant from Madras, S., 33 miles. Lat. $12^{\circ} 37'$, long. $80^{\circ} 15'$.

MAHABULESHWAR, in the presidency of Bombay, a small town or village on the summit of the range of mountains bearing the same name. The range is part of the Western Ghats, extending from south to north in a direction nearly parallel to the western shore of India, and at the distance of about forty miles from it. This section is bounded on the north by the gorge from which issue the headwaters of the river Kistnah, in lat. $18^{\circ} 1'$, long. $73^{\circ} 40'$; the southern boundary of this part of the range is in about lat. $17^{\circ} 55'$. Its greatest breadth at the northern extremity is about fifteen miles, and about eight at its southern boundary: its extent, taken diagonally from north-east to south-west, is about seventeen miles. Its southern extremity is bounded by a deep depression of the surface, extending nearly across the range, but leaving a small neck of land on the west side, which maintains continuity with the Ghaut further south. The summit of the range thus marked is a sort of undulating and rugged table-land, the western buttress of which rises abruptly from the adjacent Concan: the descent towards the Deccan is more gradual, and less in actual amount. Excellent roads, made in various directions, give access to all the more interesting spots. An abundant supply of excellent water may be had from wells, in which it is found at depths varying in different parts from ten to forty feet. There are also many streamlets traversing the country, and continuing to run at all seasons. One of the most striking characteristics of the climate is the extreme

violence of the monsoon, beginning about the middle of June and ending in the commencement of October. During July and August, the country is always covered with fog, and there is scarcely any intermission of rain, which is generally rather light and drizzling, though occasionally drenching showers descend. One report gives the mean annual fall, as deduced from the observations of ten years, at 229 inches, and the number of days on which rain falls at 127. From the dense nature of the soil, however, and the undulating form of the surface, the water quickly drains off, and there is not the slightest appearance of a marsh or swamp. At other times of the year, the humidity of the atmosphere is moderate. The cool season commences early in October, which is the most genial and pleasant part of the year, in consequence of the moderate temperature and the freshness of the air, resembling that of a European spring. Throughout November, December, January, and February, the sky is almost uniformly clear, and the atmosphere cold, bracing, and elastic. During this period slight hoar-frosts sometimes occur. In scarcely any place is there less variability in the meteorological phenomena. In contrast with most other hill-stations in India, this is totally free from malaria, an exemption attributed to the circumstance, that the Concan, which stretches from the base of the mountain, through a sultry tract, is not a pestilential one. This place, having in so many circumstances affecting health a decided superiority over the more depressed and sultry tracts in its vicinity, was selected as a sanatory station for troops; but the project was abandoned after a short trial, on the ground, as it is understood, of the climate being unsuited to the acute diseases which are most common among the soldiery. It is, however, much frequented by invalid officers, for whose accommodation there is a sanatorium, containing eight sets of quarters and several detached bungalows. There are also about seventy private dwellings, of which upwards of fifty are substantially built of hewn stone. The greater part have thatched roofs, which are said to be better adapted than tiles to resist the monsoon rains. Many persons not in the service of the government seek the restoration of health at this place, and very generally with success. The number of visitors appears to have been steadily increasing. The station is situate at the north-west corner of the table-land, and has a western aspect, favourable for receiving the advantage of the salubrious sea-breezes. It was established in 1828 by Sir John Malcolm, then governor of Bombay, after whom the village of Malcolm Peth was named. The site was ceded by the rajah of Sattara, in exchange for another spot. The bazar is a tolerably large one, and is well supplied. There is a small church, a subscription-library, and an hotel. A detachment of fifty native troops, under the command of a jenadar, is stationed here to maintain the requisite guards: its

European establishment consists of a chaplain and a medical officer, the latter being superintendent of the station. The services of the chaplain are shared by other places, which are visited at stated periods. The general elevation of the station above the sea is 4,500 feet; that of the highest summit, 4,700. Distance N.W. from Sattara, by a good carriage-road, 30 miles; S.W. from Poona, by circuitous hilly route, 70; S.E. from Bombay, crossing the haven and subsequently proceeding by Nagotna, 114; or by another route 127; viz. by sea, down the coast to Bancote, 70, thence up the river Sawitri 30, and subsequently by land about 30 more. Mahabuleshwar is in lat. 17° 59', long. 73° 41'.

MAHADEO MOUNTAINS, denominated from a celebrated Hindoo temple of the same name, a cluster of considerable height in the north part of the Nagpore territory, towards the British province of Saugor and Nerbudda. It is situate at the eastern extremity of the Sautpoora Mountains, where they adjoin the Vindhya, and may be considered as lying between lat. 21° 30'—22° 40', long. 78°—80°. None of the elevations appear to have been accurately determined; but Dowlagherie is conjectured to be the highest; and the elevation of Ambarmaph, another, is estimated at 2,500 feet; Chindwara, 2,100; and Pachmarhi has been vaguely conjectured to have an elevation of 5,000; but this estimate is very probably an exaggeration. In a publication of very high character, it is mentioned, that Dokgur, one summit of the cluster, "is stated by Captain Franklin to be 4,800 feet high;" and it is farther observed, "There are two other peaks exceeding this in height, viz. Putta Sunkur (above the cave of Mahadeo) and Choura Deo, the highest of all which I conjecture to be about 5,000 feet above the sea." As, however, no specific reference is given to any work of Franklin in support of those points, they must be considered problematical.

MAHADEPOOR.—A town in Hyderabad, or dominions of the Nizam, situate on the right bank of the Godavery river, and 138 miles N.E. from Hyderabad. Lat. 18° 48', long. 79° 59'.

MAHAGAON.—A town of the Deccan, in the territory of Nagpore or Berar, situate 69 miles E.S.E. from Nagpore, and 95 S.S.E. from Scuni. Lat. 20° 44', long. 80° 7'.

MAHAGAUM.—A town in Hyderabad, or dominions of the Nizam, situate on the right bank of the Araun river, and 75 miles S.S.E. from Ellichpoor. Lat. 20° 10', long. 78°.

MAHAGAUM.—A town in the British district of Tannah, presidency of Bombay, 60 miles N. of Bombay. Lat. 19° 48', long. 72° 50'.

MAHANUDDY.—A river having its origin in Nowagudda, one of the native states on the

south-west frontier of Bengal. It rises about lat. 20° 20', long. 82°, and flowing westerly ten miles through Nowagudda, it enters the territory of Nagpore, through which it holds a course in the same direction for twenty miles, to a point a few miles north-east of the town of Konkeir, when it turns north-east for 110 miles, to its junction, in lat. 21° 35', long. 82° 16', with its principal and more remote feeder. Forty miles farther, the united stream receives the Hutssoo river, another considerable tributary, flowing from the north, when, turning south-easterly, it holds a course of about 300 miles through the native states on the south-west frontier of Bengal, to the town of Cuttack, where it divaricates into the numerous branches inclosing or traversing the delta, the total length of its course being estimated at near 520 miles. Its principal mouth is in lat. 20° 20', long. 86° 50'. At Sumbulpoor, 260 miles above its mouth, it is nearly a mile in breadth during the rains, and at the town of Cuttack, just above its divarication, it at the same season is fully two miles in breadth. From July to February it is navigable for boats from the sea as far as Sewnarain, a distance of about 160 miles. At the point of divarication, near the town of Cuttack, is a hill, said to contain promising indications of coal, but which is more probably merely of volcanic formation. Although the navigation is in some places rendered difficult by rapids, it may be rendered materially available as the means of communication between the sea and the interior of the country. The volume of water rolled down by this river during the periodical rains must be enormous, as Kittoe found the bed of the river near Sumbulpoor 4,500 feet wide, and "the highest flood-water mark to be about forty-seven feet above the level of the shallow stream flowing during dry seasons in the centre of the bed;" and Heber during the rainy season observed, three or four miles out at sea, the fresh water of the Mahanuddee floating, in consequence of less specific gravity, on the salt water of the Bay of Bengal, "exactly like a river about half a mile broad, smooth, dimply, and whirling."

MAHANUNDA.—A large river of Bengal, tributary to the Ganges. It rises in the territory of Darjeeling, and about lat. 26° 57', long. 88° 20', and flowing south for fifteen miles, it on the right side receives the Balasun, a stream coming from the north-west; and from the confluence, the united stream flows southerly for twenty-five miles, forming for the greater part the boundary between the British districts Purnea and Dinajepore. Subsequently entering the former district, it takes a course south-westerly for sixty miles, and thence turning south-east for fifty more, receives at Jagatnathpur, on the left side, the large stream Nagor; and touching on the British district Dinajepore, and taking a direction southerly, it again forms the boundary between that district and Purneah for twenty miles. At that

distance it passes into the British district Maldah, through which it flows in a direction south-easterly for forty miles, to Rahunpoor, in lat. 24° 47', long. 88° 20'. From that point turning south, it for thirty miles forms the boundary between the British districts Maldah and Rajeshahye; and at Godari, in lat. 24° 30', long. 88° 20', it falls into the Podda, or great eastern branch of the Ganges, on the left side; its total length of course being 240 miles. Even within a few miles of its source, its navigation is practicable for canoes and for floating timber; and from Kishengunje, seventy-five miles from its source, it is navigable for craft of about eight tons during the dry season, and for those of much larger burthen during the rains. In the lower part of its course, it is at all times navigable for craft of between forty and fifty tons burthen.

MAHARAJE DROOG.—A town in the Mysore, situate 61 miles N.W. by W. from Seringapatam, and 73 miles E. from Mangalore. Lat. 12° 54', long. 76°.

MAHARAJGUNJ, in the British district of Goruckpore, lieutenant-gov. of the N.W. Provinces, a small town which, according to Buchanan, who surveyed it about forty years ago, had then 125 houses. Distant N.E. from Goruckpore cantonment 23 miles. Lat. 27° 2', long. 83° 32'.

MAHARAJGUNJE, in the British district of Benares, lieutenant-gov. of the N.W. Provinces, a town on the route from the city of Benares to Allahabad, 52 miles E. of the latter, 22 W. of the former. Lat. 25° 16', long. 82° 40'.

MAHARAJPOOR, in the British district of Cawnpore, lieutenant-gov. of the N.W. Provinces, a town on the route from the cantonment of Cawnpore to Futtehpore, and 12 miles S.E. of the former. It has a bazar, and is supplied with water from a tank and wells. Lat. 26° 19', long. 80° 31'.

MAHARAJPOOR, in Gwalior, or possessions of Scindia, a village or small town 15 miles N.W. of the fort of Gwalior. This place and the neighbouring village of Chonda were the keys of the position of the Mahratta army on the 29th December, 1843, when the battle took place between them and the British army under Sir Hugh Gough, commander-in-chief. The Mahrattas were driven from all points of their position, lost fifty-six pieces of artillery and all their ammunition-waggons, and retreated to the fort of Gwalior. The loss of the British army was severe, amounting to 106 killed, 684 wounded, and seven missing. The numbers on each side appear to have been nearly equal, numbering about 13,000 British and 15,000 Mahrattas. A monument at Calcutta, constructed from the cannon captured on the field, commemorates the victory. Lat. 26° 29', long. 78° 5'.

MAHASIN.—A town in the territory inhabited by the independent hill tribes of Orissa, situate 104 miles S. from Sumbulpoor, 585

MAH.

and 86 miles N.W. by W. from Ganjam. Lat. 19° 59', long. 83° 59'.

MAHASINGPUR, in the British district of Allyghur, lieutenant-gov. of the N.W. Provinces, a village on the route from the cantonment of Allyghur to that of Etawa, and 26 miles S.E. of the former. Lat. 27° 34', long. 78° 16'.

MAHATTIE.—A town of Eastern India, in the British province of Aracan, eight miles S. of Aracan. Lat. 20° 36', long. 93° 25'.

MAHBUBGANJ, in the district of Aldemau, territory of Oude, a village on the right bank of the Ghaghra, 18 miles S.E. of the city of Oude. Butter estimates the population at 1,000, including 200 Mussulmans. Lat. 26° 46', long. 82° 22'.

MAHDARA, in the district of Aldemau, territory of Oude, a village a mile west of the right bank of the Tons (north-eastern), 25 miles S.E. of the city of Oude. Butter estimates its population at 400, all Hindoos. It is the Mijghora of the surveyor-general's map. Lat. 26° 27', long. 82° 26'.

MAHE.—A French settlement and seaport included within the limits of the British district of Malabar, containing an area of two square miles. It is situate on the south side of the estuary of a small river flowing from the Western Ghats, but not navigable for vessels of any considerable burthen, which must anchor in the road, in five or six fathoms, and one and a half or three miles from shore. The river is, however, navigable for boats a considerable distance inland, and in fair weather small craft can cross the bar in safety. The site of the town is fine, on a high ground, overlooking the river; and it is a neat place, many of the houses being good. It was long a serious and vexatious source of annoyance to the British, by affording the French a footing in Malabar, and a ready communication with Mysore and its ruler; but in 1779 it was reduced by a force sent from Bombay, and dismantled, and in 1793 formally taken possession of by the British. The British establishment previously stationed at Tellicherry was then removed to Mahe; but it having been restored to the French at the last general pacification of 1815, the British establishment was replaced in its original station at Tellicherry. The Carandites have a church and a missionary establishment here. The population is stated at 2,616 souls. Distance from Tellicherry, S.E., seven miles; Bombay, S.E., 636; Cannanore, S.E., 16. Lat. 11° 42', long. 75° 36'.

MAHEIDPORE.—See MEHIDPORE.

MAHESWA, in the Rajpoot state of Jodhpoor, a village on the route from Nusseerabad to Deesa, and 49 miles W. of the former. Lat. 26° 12', long. 74° 14'.

MAHEWA, in the territory of the rajah of Panna, in Bundelcund, a small town on the route from Allahabad to Saugor, 101 miles N.E. of the latter. It has a bazar, and supplies and water are abundant. Elevation

above the sea 1,181 feet. Lat. 24° 24', long. 80° 12'.

MAHEWA, in the British district of Allahabad, lieutenant-gov. of the N.W. Provinces, a village on the right bank of the Ganges. Distant N.W. of Calcutta 762 miles by the river route, and 46 S.E. of the city of Allahabad by the same. Lat. 25° 10', long. 82° 18'.

MAHGWAY.—A town of Burmah, situate on the left bank of the Irawady, and 103 miles N. from Prome. Lat. 20° 13', long. 94° 43'.

MAHHASU, in Keyonthul, a peak of one of the lower ridges of the Himalaya, rises amidst picturesque mountains, clothed with forests of towering cedars, noble oaks, and sycamores. On the summit is a small temple, of Chinese architecture, built of wood and stone, and dedicated to the Hindu deity Siva. Elevation of the summit above the sea 9,140 feet. Lat. 31° 6', long. 77° 20'.

MAHIM.—A town in the British district of Tannah, presidency of Bombay, 50 miles N. of Bombay. Lat. 19° 40', long. 72° 47'.

MAHIM.—A town at the northern extremity of the island of Bombay. It is situate on the south side of the channel separating that island from Salsette, and at the point where they are connected by a road running partly on arches of masonry, partly on a causeway constructed by government, aided by a munificent contribution from Sir Jamsetjee Jejeebhoy, a Parsee merchant of great wealth, residing in Bombay. The passage is commanded by a fort, originally intended as a defence against the Mahrattas, and still garrisoned by a small force. The town is ill built, and inhabited chiefly by native Christians, of Portuguese descent, who have here a church and some other relics of their former prosperity; in a wood outside the town are the ruins of another church, of a college, and of some other buildings connected with Romish establishments. Distance from the fort of Bombay, N., seven miles. Lat. 19° 1', long. 72° 54'.

MAHLTEERY.—A town in the British district of Balasore, lieutenant-gov. of Bengal, 48 miles S.W. of Balasore. Lat. 21° 6', long. 86° 23'.

MAHMUDA, in the British district of Furruckabad, lieutenant-gov. of the N.W. Provinces, a village on the route from Cawnpore to Futtelghurh, and 30 miles S.E. of the latter. Lat. 27° 2', long. 79° 56'.

MAHMUDPOOR, in the British district of Moradabad, lieutenant-gov. of the N.W. Provinces, a town, with a bazar, on the route from Allyghur to the town of Moradabad, and 14 miles S.W. of the latter. Lat. 28° 40', long. 78° 43'.

MAHMUDPOOR, in the British district of Allyghur, lieutenant-gov. of the N.W. Provinces, a village on the route, by Khasganj, from Bareilly to Allyghur, and eight miles S.E. of the latter, 46 miles N. of Agra. Lat. 27° 52', long. 78° 15'.

MAHNUS NY.—A small river in the Alwar territory.—(See **LASWARI**.)

MAHOB, in Bundelcund, in the British district of Hummerpoor, lieutenant-gov. of the N.W. Provinces, a town on the route from Banda to Saugor, 36 miles S.E. of the former. It is situated in a beautiful and picturesque country, amongst numerous striking ruins of mausoleums, palaces, and temples. There are three very beautiful lakes, on the west, south, and east sides of the town respectively; and though each two or three miles in circuit, and of considerable depth, have been formed artificially, by damming up the extremities of valleys with huge mounds of earth faced with stone. Local tradition attributes those works to Parmal Deo, a Rajpoot prince, who ruled in Mahoba about A.D. 1083. Their construction appears to have been intended to secure a copious supply of water for irrigation, the skilful employment of which has converted into a complete garden a tract otherwise rather sterile. They are, however, productive of malaria, which has hastened the depopulation of the place. The town is now an expanse of ruins, amongst which are scattered some houses still tenanted by a population guessed at 5,000 souls. Above the town rises a rocky hill, once strongly fortified, but the defences are now merely piles of massive blocks of stone. Mahoba, according to tradition, is a place of considerable antiquity, as Parmal Deo, who was the last sovereign, and was subdued A.D. 1083, by Pirthiraj, of Delhi, is alleged to have been the nineteenth in lineal descent from the founder. It appears to have been subdued by the Patan Mussulmans about the close of the twelfth century, as Kutb-ood-Deen Eibak, their commander, in A.D. 1196 overran this part of India, and took the neighbouring fort of Kalleenjar. In the beginning of the eighteenth century, it was wrested from the declining power of Delhi by Chutter Saul, an enterprising Boondela chief, who, being in his turn hard pressed by Muhammad Khan, the Afghan possessor of Furruckabad, called in the aid of the Peishwa; and in remuneration of it willed to him this and some other considerable portions of the country. The Peishwa gave it in jaghire to Govind Pandit, whose successor, Nana Govind Rao, ceded it, in A.D. 1817, to the East-India Company, to whom the whole of his remaining territory subsequently passed in 1840. The town is 147 miles W. of Allahabad. Lat. 25° 18', long. 79° 55'.

MAHOLA.—A village in the British district of Goorgaon, lieutenant-gov. of the N.W. Provinces. Distance S. from Delhi 27 miles. Lat. 28° 16', long. 77° 19'.

MAHOMEDABAD, in the territory of Oude, a town on the route from Seetapoor to Sekrora, 38 miles S.E. of the former, 42 N.W. of the latter, 32 N.E. of Lucknow. Lat. 27° 16', long. 81° 8'.

MAHOMED ALI, in Sinde, a village on the route from Sehwan to Larkhana, and 63

miles N. of the former place. It is situated on the right bank of a great offset of the Indus. Lat. 27° 8', long. 68° 3'.

MAHOMED AMROO, in Sinde, a village on the route from Sehwan to Larkhana, and five miles S. of the last-mentioned town. Lat. 27° 28', long. 68° 11'.

MAHOMED KHAN KA TANDA, in Sinde, a town on the route from Hyderabad to Cutch, and 20 miles S.E. of the former place. It is situated on the bank of the Fulailee branch of the Indus, and the neighbouring country, though near the border of the desert, is fertile and well cultivated. It is a thriving place, in consequence of its manufactures and of the transit-trade from Cutch. During the Talpoor sway in Sinde, it was usually the residence of one of the subordinate amceers. Lat. 25° 7', long. 68° 36'.

MAHOMED KHAN TANDA, in Sinde, a village on the route from Sehwan to Kurra-chee, and 70 miles N.E. of the latter place. Lat. 25° 28', long. 67° 55'.

MAHOMEDPOOR, in the British district of Furruckabad, lieutenant-gov. of the N.W. Provinces, a village on the route from the cantonment of Allygurh to that of Futtehgurh, and 11 miles N.W. of the latter. Lat. 27° 23', long. 79° 34'.

MAHOMEDPOOR.—A town in the native state of Indoor, or territory of Holkar, situated 58 miles S. from Indoor, and 139 miles W. from Baitool. Lat. 21° 52', long. 75° 50'.

MAHON, a river of Sirgoojah, rising in lat. 23° 6', long. 83° 18', a few miles E. of the town of Sirgoojah, and, flowing in a northerly direction for seventy miles, falls into the Rehund, near the town of Cohur, in lat. 23° 50', long. 82° 51'.

MAHONA, in the territory of Oude, a town on the route from Lucknow to Seetapoor, 13 miles N. of the former. It has a bazar, and is abundantly provided with water from wells. Lat. 27° 6', long. 80° 50'.

MAHONY.—A town of Baghelcund, in the native state of Rewah, situated nine miles E. of the right bank of the Sone river, and 61 miles S. from Rewah. Lat. 23° 39', long. 81° 28'.

MAHOP, in the British district of Bareilly, lieutenant-gov. of the N.W. Provinces, a village on the north-eastern frontier, and on the route from the town of Pilleebheet to Oude, and 11 miles N.E. of the former. Lat. 28° 40', long. 79° 59'.

MARHUL, in the British district of Azimgurh, lieutenant-gov. of the N.W. Provinces, a town on the route from Azimgurh to Fyzabad, 23 miles W.N.W. of the former. Lat. 26° 6', long. 82° 53'.

MAHOUNEA.—A town in the kingdom of Oude, situated 10 miles E. of the left bank of the Ghogra river, and 152 miles N. by W from Lucknow. Lat. 28° 58', long. 80° 20'.

MAHOWLI, in the British district of Etawa, lieutenant-gov. of the N.W. Provinces, a village on the route from Calpee to the cantonment of Etawa, and 34 miles S.E. of the latter. Lat. 26° 29', long. 79° 30'.

MAHRAM, a native state of Eastern India, situate in the Cossya Hills. It is bounded on the north, east, and west by other native hill states, and on the south by the British district of Silhet: its centre is about lat. 25° 12', long. 91° 24'. It is twenty miles in length from north-east to south-west, and twelve in breadth, and contains an area of about 162 square miles.

MAHUMUDPORE, in the British district of Jessore, lieutenant-gov. of Bengal, a town on the route from Calcutta to Dacca, by Baraset, 108 miles N.E. of Calcutta, 72 S.W. of Dacca, situate on a branch of the river Barashee, here crossed by ferry. Lat. 23° 24', long. 89° 38'.

MAHUR.—See **CHOTA OODEPOOR**.

MAHUR.—A town in Hyderabad, or dominions of the Nizam, situate four miles from the right bank of the Payne river, and 98 miles S.S.E. from Ellichpoor. Lat. 19° 50', long. 78°.

MAHUTHWAR, in the British district of Ghazeepoor, lieutenant-gov. of the N.W. Provinces, a town on the route from Ghazeepoor to Mozufferpoor, 49 miles E.N.E. of the former. Lat. 25° 49', long. 84° 23'.

MAHUYADABAR, in the British district of Goruckpoor, lieutenant-gov. of the N.W. Provinces, a small town on the Manaura, a feeder of the Koyane, and with it ultimately discharged into the Ghaghra. Buchanan describes Mahuyadabar as a straggling place, buried in plantations, and containing 200 houses, many of which are tiled, and some have two stories. Distant S.W. from Goruckpoor cantonment 40 miles. Lat. 26° 34', long. 82° 44'.

MAI, in the British district of Mynpooree, lieutenant-gov. of the N.W. Provinces, a village on the route from the cantonment of Allygurh to that of Mynpooree, and 19 miles N.W. of the latter. Lat. 27° 23', long. 78° 54'.

MAIDOOD GAT.—A town in the British district of Masulipatam, presidency of Madras, 74 miles N.W. by N. of Masulipatam. Lat. 17° 1', long. 80° 32'.

MAIKER.—A town in Hyderabad, or dominions of the Nizam, situate on the left bank of the Payne Gunga river, and 96 miles S.W. from Ellichpoor. Lat. 20° 10', long. 76° 40'.

MAILCOTTA, in the Mysore, a town with a fort, situate on a high rocky hill commanding a noble and extensive view southwards. Here is a huge temple of square ground-plan, and entirely surrounded by a colonnade, but all in a rude and mean style of architecture, and overlaid with many thousand coarse images in plaster. It is dedicated to Krishna, and the

traditions respecting its foundation are, as usual in such cases, connected with silly and obscene legends. It is viewed with great veneration by the Brahminists, and possesses a quantity of costly jewels, which remained untouched, either by Tippoo Sultan or by the victorious British army; they are lodged for security at Seringapatam, and conveyed to this place only on occasions of high festivity. Here is a very fine tank, mostly resorted to for ritual ablutions, both of the idols and of their votaries, who have the infatuation to believe that on occasion of great festivals the water of the Ganges is miraculously conveyed thither by subterraneous passages. Distant from Seringapatam, N., 18 miles; Bangalore, W., 65. Lat. 12° 40', long. 76° 42'.

MAILSIR.—A town in the Rajpoot state of Beekaneer, situate 80 miles N.E. by E. from Beekaneer, and 148 miles N. from Ajmeer. Lat. 28° 36', long. 74° 28'.

MAIMOKE GHAT (or FERRY), in the Punjab, situate on the Ghara river. By this ferry the route from Hindostan passes to the town of Pank Petten, where is a celebrated shrine of a Mahometan saint. In consequence of this, the ferry is much frequented at the time appointed for his festival. Lat. 30° 13', long. 73° 13'.

MAINDOO.—A town in the British district of Pegue, on the right bank of the Rangoon river, and two miles S. from Proma. Lat. 16° 44', long. 96° 17'.

MAINGY, an island of the Mergui Archipelago, situate 23 miles W. of the coast of Tenasserim. Its centre is in lat. 12° 32', long. 98° 22'.

MAIRPOOR.—A town in the Rajpoot state of Oodeypoor, situate on the left bank of the Saburmuttee river, and 23 miles W.N.W. from Oodeypoor. Lat. 24° 42', long. 73° 27'.

MAIRWARA, or realm of the Mairs, in Rajpootana, a mountainous tract, consisting of a number of parallel ridges, extending in a direction from north-east to south-west, and constituting that portion of the Aravulli range which lies between Komulmer and Ajmere, a space of about ninety miles in length, and varying in breadth from six to twenty. Mairwarra is interposed between Mewar, or the state of Oodeypore, and Marwar, or the state of Joudpore. Its north-eastern extremity is in about lat. 26° 10', long. 74° 30'; its south-western in lat. 25° 25', long. 73° 50'. In the valleys between the ridges are numerous isolated eminences. The average elevation of the bottoms of the valleys above the sea is probably about 1,600 feet, and the summits, which increase in height towards the south-west, have an elevation in some instances of about 1,000 feet more. The rocks are of primary formation, and probably contain ores of lead, copper, and antimony, though as yet nothing has been done towards making their

presumed contents available. Iron of good quality has been discovered in veins, believed to be inexhaustible. Several furnaces have been erected, and the number is increasing.

The Mairs have been from time immemorial the inhabitants of this rugged country, in which they maintained a savage independence, plundering all around them indiscriminately. They are considered to be of the stock of Menas, who are regarded as the aboriginal population of this part of India, and they have received their present appellation, signifying mountaineers, from the character of the localities which they inhabit. Previously to the establishment of the British power in this tract, the inhabitants lived concealed among their rugged hills, wearing hardly any clothing, and practising scarcely any sort of cultivation. The scanty herds of goats, constituting their live stock, were left to the charge of the boys and old men, while the more able spent their time, mounted on their diminutive ponies, in marauding, plundering, and murdering. Of their number, some professed to be Mussulmans, some Brahminists, but neither were very scrupulous in the observance of their respective tenets; they greedily indulged in flesh and strong drinks, feasting on the carcases even of such animals as had died of disease. They appeared to have had no priests or teachers of either denomination, unless a fakir, or professed ascetic, maintained in some villages, might be regarded as supplying the deficiency. Women were considered as slaves, and the unmarried sold to men requiring wives. The price demanded by the father was sometimes so great in proportion to the slender resources of the majority of the population, that many women found it very difficult to meet with husbands; and the deep disgrace attached to disappointment in this respect was so galling, that to avoid it female infanticide was very prevalent. The British authorities, however, succeeded in moderating this as well as many other evils, and female infanticide has ceased.

Dowlut Rao Scindia having, in 1818, ceded Ajmeer to the British government, it claimed Mairwarra as part of the transferred territory; but the states of Oodeypoor and Joudpore having urged pretensions to a considerable portion of it, their validity was hastily and unadvisedly recognised. The inconvenience of three independent states claiming to exercise the powers of government in a country so circumstanced was, however, subsequently mitigated by arrangements, under which the whole was placed under British management, Joudpore and Oodeypoor engaging to pay a certain sum towards the expense of a local corps, and receiving credit for the net revenue. It was, however, much easier to assert authority over such a people as the Mairs than to enforce it; and it required a strong hand to reduce these wild people to anything approaching to obedience and order. One of the measures, however, which appears to have been most efficacious in

reclaiming the people from their predatory habits, was the formation of a local corps, to which, as already mentioned, Oodeypoor and Joudpore were bound to contribute. The former freebooters became speedily excellent soldiers, perfect in the British discipline, well skilled in the use of fire-arms, active, trustworthy, and intelligent. The success of these and other judicious arrangements was complete: the inhabitants soon became orderly and peaceable; the revenue statements exhibited a progressive increase in the collections; and the country presented a pleasing picture of a population, reclaimed by judicious treatment from predatory and lawless habits, rapidly advancing in prosperity and in the arts of peace. The latest accounts indicate a continued increase of cultivation and prosperity. A land revenue settlement has been made for a period of twenty years. The principal place in the district is the newly-established town of Nya Nugga, which has been surrounded by a wall, and promises to be the seat of considerable trade. British Mairwarra contains an area of 282 square miles, with a population of 37,715. The portion allotted to Oodeypoor has an area of 305 square miles, and that belonging to Joudpore a superficial extent of about sixty-seven square miles.

MAISELY, in the British territory of Sagur and Nurludda, lieut.-gov. of the N.W. Provinces, a town on the route from Gawilgurrh to Raitool, 12 miles N.E. of the latter. Lat. $21^{\circ} 45'$, long. $77^{\circ} 53'$.

MAITWARRA.—A town of Malwa, in the native state of Bhopal, situate on the left bank of the Newuj river, and 61 miles W.S.W. from Bhopal. Lat. $22^{\circ} 59'$, long. $76^{\circ} 29'$.

MAJGURRA, in the Damau division of the Punjab, a village on the route from Dera Ismael Khan to Ghuznee, by the Gulaire Pass, and 29 miles W. of Dera Ismael Khan. It is situate at the foot of a pass across the Suliman Mountains, through which the road is difficult to within a short distance of the village. There is water from a subterraneous aqueduct. Lat. $31^{\circ} 45'$, long. $70^{\circ} 24'$.

MAJINDA, in Sind, a town on the route from Hyderabad to Sehwan, and 45 miles S.E. of the latter place. It is situate two miles from the right or western bank of the Indus, in an alluvial plain but indifferently cultivated. Its population is 2,000. Majinda has an extensive bazar and a good supply of water. The road in this part of the route is good. Lat. $25^{\circ} 54'$, long. $68^{\circ} 19'$.

MAJOGOYA.—A town in the British district of Seepoor, a division of Upper Assam, 67 miles N.E. of Seepoor. Lat. $27^{\circ} 36'$, long. $93^{\circ} 32'$.

MAJOORA.—A town in the British district of Tannah, presidency of Bombay, 31 miles N.N.E. of Bombay. Lat. $19^{\circ} 21'$, long. $73^{\circ} 4'$.

MAJRA, in the British district of Rohtuk,

lieut.-gov. of the N.W. Provinces, a village on the route from Rohuk to Narnol, and 20 miles S. of the former. Lat. 28° 40', long. 76° 30'.

MAKAVA.—A town in the British district of Vizagapatam, presidency of Madras, 67 miles N. of Vizagapatam. Lat. 18° 40', long. 83° 21'.

MAKLOR.—A town in the Rajpoot state of Jodhpoor, 13 miles S. of the left bank of the Loonee river, and 62 miles S.W. from Jodhpoor. Lat. 25° 37', long. 72° 32'.

MAKOWAL, in the hill state of Kuhloor, a small town situate close to the left bank of the Sutlej, in the level, fertile, alluvial tract stretching between the river and the Nina Devi mountain, and which from this place is usually called the Valley of Makowal. It was wrested from the rajah of Kuhloor by Runjeet Singh, who was subsequently compelled by the British to restore it. Distant N.W. from Calcutta 1,100 miles. Lat. 31° 14', long. 76° 34'.

MAKRAHA, in the district of Aldemau, territory of Oude, a town situate on the river Tons, 62 miles S.E. of the city of Oudh. Butter estimates the population at 6,000, all Hindoos and cultivators. Lat. 26° 14', long. 82° 52'.

MALABAR, a British district under the presidency of Madras, bounded on the north by Canara and Coorg; on the east by Mysore and Coimbatore; on the south by Cochín; and on the west by the Arabian Sea, or North Indian Ocean, lies between lat. 10° 15'—12° 18', long. 75° 15'—76° 55'. The area is 6,060 square miles. It has the advantage of an extensive seacoast, measuring 143 miles in length, and which abounds with havens, though for the most part, in consequence of want of adequate depth of water, they are suited only for the coasting craft of the country, or other vessels of small draught.

The most remarkable feature of the country is the great range of the Western Ghats, the culminating ridge of which, in the north part of the district, is nearly parallel to the coast, and on an average about thirty miles from it, dipping westward towards the low lands of Malabar with a bold precipitous face, but eastward becoming depressed more gradually and slightly into the rugged and rocky expanse of Coorg. The elevation of several of the summits is between 5,000 and 6,000 feet, and the ascent from Malabar so steep, that on the invasion of Coorg by the British troops in 1834, but two passes were found practicable for the advance of a military force; and of those one was so difficult, that the column which attempted it was driven back with severe loss by an inconsiderable and undisciplined body of Coorg troops, who defended the intricate ravine. Probably no part of the world exceeds the mountain-tracts of Malabar in the abundance and excellence of its timber-trees, especially teak (*Tectona grandis*). The

impediments in the way of transporting this valuable timber to the seaports are considerable; but so great is the demand for it, that, notwithstanding the difficulty and cost of shipping, the woods were fast becoming exhausted. With the view to the restoration of these forests, extensive tracts of waste land have been converted by the government into teak-plantations. In the latter part of 1843 and the spring of the following year, no less than 50,000 young trees were planted in these nurseries. In the comparatively level tracts about Palaghaut, elephants are employed to drag to the banks of the river Ponany and its various feeders the huge trees, which are thence floated to the coast; but in the elevated and less-accessible valleys, they are committed to the monsoon torrents, which hurry them down cataracts with such violence that most of them are so shattered as to be unsuitable for purposes requiring timber of large dimensions. In a report on this important subject, 120 valuable sorts of timber are enumerated as produced in Malabar. Some trees are of vast size, having been found on measurement forty-five feet in circumference, upwards of 120 feet high, and sixty feet without a branch. Teak has been felled measuring seven feet in diameter at the lower end, and twenty inches at the height of sixty feet. The peon or puna, a light and strong tree, is fit for masts, and has been cut ninety-five feet in length and three feet in diameter. This wood is as light as Riga timber, while it is stronger and more durable.

The climate of the seacoast is warm, but tolerably equable, the temperature being seldom lower than 68° or higher than 88°, and the mean temperature 78°. March, April, and May, constitute the hot season; the south-west monsoon setting in about the beginning of June, when vast masses of clouds rise from the ocean and move towards the north-east, accumulating and becoming more dense as they approach the land, and casting deep gloom and darkness over the sky. The air, previously calm and sultry, is agitated by violent gusts of wind, followed by loud peals of thunder and flashes of vivid lightning; heavy rain succeeds, and continues for several days, renovating, invigorating, and refreshing vegetation, so that the surface of the country, from an arid, naked expanse of hard earth, becomes a sheet of varied and luxuriant verdure, and the air being cooled and purified, animal life is refreshed.

Wild elephants, inferior in size to none in India, harbour in the forests and jungly valleys, and associate in herds of 200 or 300. Tigers of great size are numerous, and dreadfully ferocious. There are wild buffaloes, deer of various kinds, bears, apes, and monkeys innumerable. The gaval, a gigantic bovine quadruped, lurks in the most secluded recesses of the Ghats: it is stated to be ten feet high, and proportionally bulky, with large beautiful horns, silvery-grey coat, and flesh hard and fibrous, but very palatable and nutritious.

Of commercial products, the most important is pepper, proverbially styled the money of Malabar. It requires much moisture, and hence thrives best in the deep valleys of the Ghats, but may with proper culture succeed in any moist ground. The trailing plant which produces pepper, is propagated by planting a cutting at the root of the jak, the mango, or other tree having rough bark, up which the vine climbs. After it has been planted, it requires no great trouble or attention, the cultivator having little more to do than to collect the produce in the proper season. When the fruit is intended for black pepper, it is not allowed to ripen, but is collected green, and becomes black on drying. That which is intended for white pepper is left to ripen thoroughly, in which state the berries are covered with a red pulp, which being washed off, leaves the peppercorn white, and requiring merely to be dried to be fit for market. Cardamoms, a scarce and high-priced article, are produced spontaneously in the woods of the high land, the care given to them being merely the clearing of the ground from trees in those places where they are observed to spring up naturally. This spontaneous growth affords the only product of cardamoms in Malabar. The betel-vine appears to be little cultivated with a view to the demands of commerce; but every one who has a garden, plants for his own use a few vines, trained up the mango or other suitable trees. The cocoanut-tree (*Cocos nucifera*) is very extensively raised in the alluvial grounds along the seacoast, the soil and air being favourable to its successful culture. Grants of waste land have been made rent-free by government, for a term of years, with the view of encouraging the cultivation of the coffee-plant. The right of private property in the soil is more fully recognised in this district than in any other part of Madras; but even here a man is not allowed to keep his land waste, unless he agree to pay the government the tax they should derive from its cultivation. Should he decline to do this, the land is delivered over to any person who will undertake to till it, a specification being made, that out of the profits deducible from its cultivation a certain portion (about fifteen per cent.) shall be given to the proprietor, as the landlord's share. The principal routes are—1. From south-east to north-west, from Cochin to Calicut and Cannanore, nearly parallel to the coast, and at no great distance from it; 2. from east to west, from Palghat, on the eastern frontier, to Ponany, on the seacoast, by means of which is carried on the traffic in cotton, tobacco, and salt, between the districts of Coimbatore and Malabar; 3. from east to west, from Ootacamund, on the Neilgherry Hills, to Calicut, on the seacoast; 4. from south-east to north, from Matanadi, in Wynaad, to Calicut; 5. from Bangalore and Seringapatam, through Periyapatam and Coorg, to Cananore, and which has recently been improved. Superior means of transit will shortly be afforded by means of the

railroad from Ponany to Madras, connecting the eastern and western coasts of the peninsula. The principal places—Cochin, Cananore, Pennani, and Tellicherry—are described under their respective names in the alphabetical arrangement. The population is given under the article MADRAS.

Throughout this district the prevailing language is the Malayala, which varies considerably from the Tamul, or what, among the Europeans of Madras, is called the Malabar language. They are nevertheless but different dialects of the same language; and those who respectively use either, can in some measure understand each other. The accents are very different; but the Malayala language is considered more perfect than the Tamul, as containing a larger portion of Sanscrit, and of the Pat, or poetical dialect. The character used in the Malayala language is nearly the same with that used among the Tamuls for writing poetry. There are several grammars of the Malayala language, and a dictionary. There are also translations of the Old Testament, and of the book of Common Prayer of the English Church, printed in this language. The population consists of—1st, Brahminists, or followers of the Hindoo system, of divers castes and various denominations; 2nd, Mo-plays or Mussulmans; 3rd, Christians, either of native descent, and denominated Christians of St. Thomas or Syrian Christians, or of Portuguese origin, and members of the Romish Church; 4th, Jews. Among the professors of the Hindoo creed, the class considered by themselves as highest in dignity are Brahmins, denominated Namburis, reputed to have been the aboriginal proprietors of the soil, which Varuna, the deity of the sea, at the entreaty of Brahma, caused to emerge from the waters. Their hereditary chief, called Tamburacal, before the establishment of British authority, affected to regard himself as superior to the Tamuri or Zamorin, the Nair sovereign of Malabar, but in reality had no power except over the members of his own caste. Other Brahmins, called Puttar, are much more numerous than the Namburis, who, considering their dignity enhanced by the paucity of their race, keep down their number by preventing the younger sons in their families from marrying. The Brahmins of both these descriptions burn their dead, but it does not appear that at any time their women were required to be burned alive with the corpses of their husbands, in conformity with the horrible practice prevailing in many other parts of India.

The Nairs, who rank next to Brahmins, are here a very numerous and influential body, and long held the ruling power. Their habits and manners are marked by those strange peculiarities which elsewhere distinguish this class from all other people. Among these is the utter disuse of marriage; for though a ceremony which consists in a man tying a string round the neck of some young girl, has sometimes been represented as a marriage rite, it

has, in truth, no claim to be so regarded, as no cohabitation between the parties follows at any time. The girl, on attaining marriageable age, forms any connection which she may prefer; and her offspring, who have no claim upon their natural father, become the heirs of her brothers. Thus, the connection of the sexes, which, well regulated, is the basis of domestic and social duty, and the main link by which the well-being of the community is maintained, is here perverted into an organized system of shameless profligacy, alike abominable in its exercise, and mischievous in its effects. How so strange and revolting an illustration of the depth of human corruption could have arisen, is matter for pure conjecture. It has been suggested, that it originated with the early Brahmins, who on this view are imagined to have imposed it for the purpose of securing to themselves the means of sensual indulgence, free from the burden of parental duties, and at the same time to secure a race of soldiers more especially devoted to their service, in consequence of being exempt from the incumbrance of families. The Nairs look upon the Tiars (the next class) to be so much beneath them, that if any of them should by chance touch them, they think themselves contaminated, and are obliged to wash their bodies immediately. It formerly often cost the Tiar his life, without notice being taken of it. It requires some acquaintance with human nature in its more debased forms of existence, to admit the credibility of those whose lives were one systematized violation of the most obvious natural obligations, feeling the touch of an inferior contamination to be washed out only by blood. Yet, the perverseness of man, when under no better influence than passion and superstition, is too well authenticated to justify a refusal to believe in the perpetration of almost any enormity, if attested by sufficient evidence. Such practices, however, have of course disappeared before the impartial and wholesome strictness of British authority.

Of the Nair families, the most exalted is the Tamuri, called generally by Europeans that of Zamorin, whose founder, at a period not capable of being very precisely fixed, obtained a small settlement at Calicut. The chief of this family aspires to higher rank than the Brahmins, claiming to be inferior only to the invisible gods; but this assumption, though maintained by his followers, is of course held by the Brahmins to be unwarranted, absurd, and abominable. The descent of the dignity of head of the family, as well as of the Nair class and of the whole district of Calicut, is regulated in an extraordinary manner, the eldest male of the whole lineage succeeding on the occurrence of a vacancy. In conformity with Nair practice, those only possess the claim of lineage, who are born of a Tamburetti, or female of the Tamuri family; and, according to some authorities, if the eldest Tamburetti happen to be older than the Tamuri, she is considered as of higher rank.

The Tiars are considered next in rank to the Nairs, and are freemen engaged in cultivating the ground: next to these are the Maleres, musicians and conjurers, also freemen. The Poliar Chermar, or slaves, were a numerous class before the establishment of British supremacy, and many remained after that establishment, their condition, however, being then stated to have been much ameliorated. But, though their condition was improved, the landlords and proprietors of slaves still retained the power of mortgaging and letting them out for hire, as well as of selling them, with or without land. It has been supposed that the unfortunate persons in this state were the aboriginal population of the country, enslaved by their Brahminical conquerors. However this may have been, it is certain that they were studiously and systematically degraded, regarded with the utmost contempt, and exposed to the last degree of contumely. Happily, the necessity for adverting more minutely to the subject is removed by the provisions of a legislative act of the government of India, by which slavery is abolished. Measures have been adopted for securing the contemplated advantages of the act by efforts to provide employment for the emancipated, and education for their children, and at the same time to create, as far as practicable, a good feeling between the labourers and their masters.

The native Mussulmans, denominated Mapi-las, are a numerous and important class. The name is supposed to be contracted from Mahapilla, or "child of Mocha," in Arabia, from which country they originally came, as in the language of Malabar, Maha means Mocha, and pill, child. Their settlement in Malabar is of very remote date. According to some traditions, the first mosque in the country was founded as early as 642, being only a short period after the commencement of the Mahomedan era. More sober authorities, however, refer this event to a period about two centuries later. It is asserted that, in the vicinity of Calicut, the Moplals are more numerous than all the rest of the population. Fanatical outbreaks on the part of the Moplals have unhappily not been uncommon of late years. One occurred in this district at the end of 1843; another, attended with serious loss of life, followed in 1849. Upon the latter occasion, three murders in succession had been committed by a band of these men, who took shelter in a Hindoo pagoda, and set the police at defiance. Upon the arrival of a company of her Majesty's 94th regiment, the Moplals boldly advanced to the attack, and of the whole band, amounting to sixty-four, all were killed save one (a boy of sixteen years of age), who was severely wounded: they fought with desperation, seeking no quarter. The wounded prisoner stated that they had received an assurance from their priest, that those who died with arms in their hands fighting against infidels would be immediately translated to Paradise. Measures have been taken for the

prevention of these outrages. The Moplahs have numerous mosques. Their spiritual chief, denominated Tangu, resides at Ponany, and is maintained by lands which have been allotted for the purpose.

A considerable portion of the population of Malabar are Christians, of whom, as already intimated, there are two denominations; the Syrian Christians, or those who refer their conversion and the foundation of their religious establishment to St. Thomas the Apostle, and the disciples of the Church of Rome, either descendants from the Portuguese or their converts. The total number of Christians in the tract between Cape Comorin and the vicinity of Mangalore has been estimated at 150,000; but there does not appear to be any satisfactory information as to how many of those are in the British district of Malabar. At one time they were very numerous in the Concan, which they left at the instance of the rajah of Akkeri or Bednore, who induced 80,000 Christians, partly Syrian, partly Romish, to migrate into Malabar and Mysore. The liturgy of the Christians of St. Thomas is in Syriac, as is their version of the Scriptures, the date of which is referred to an early part of the fourth century. According to the information which a priest of this persuasion gave Buchanan, this church is dependent on the Jacobite patriarch of Antioch; but they have a metropolitan, who resides in Travancore, and who is sent by the patriarch on the death of his predecessor. They are settled chiefly in the mountainous parts of South Malabar, and had formerly an archbishop at Animalaya, a town on the confines of the British district of Comblatoor. Their doctrines are stated with a wide difference by different authorities. According to Wrede, they maintained the heresy of Nestorius. "They rejected the divine nature of Christ, and called the Virgin Mary only the mother of Christ, not of God: they also maintained that the Holy Ghost proceeded from the Father, and not from the Father and Son. They admitted no images of saints, where the holy cross alone was to be seen. They had only three sacraments, Baptism, Eucharist, and Orders, and would not admit transubstantiation in the manner the Roman Catholics do. They knew nothing of purgatory, and the saints, they said, were not admitted to the presence of God, but were kept in a third place till the day of judgment. Their priests were permitted to marry at least once in their life." There are, however, monasteries amongst them; and those establishments were formerly much more numerous, until the severe and continual persecutions of the Portuguese against the Syrian congregations and communities. An earnest and well-informed inquirer gives an account varying greatly from that above quoted. He represents their doctrines as identical with those of the Episcopal Church of England; viz., 1. Vicarious atonement for the sins of men by the blood and merits of Christ, and justification by faith; 2. Regeneration by

the influence of the Spirit of God; 3. Belief in the Trinity, as set forth in the Nicene Creed. A similar account is given by Swanton, a more recent writer:—"Their creed coincides with the articles of faith of Athanasius, but without its damatory clauses; they deny the tenets of the Nestorian heresy; they believe in God the Father, Son, and Holy Ghost; that Jesus Christ was born of the Virgin Mary, and was incarnate God and man; and that Christ appeared on earth for the salvation of mankind, through whose blood and merits atonement was made for the sins of men; they hold regeneration to righteousness; and they believe that the souls of the blessed will not see God till after the universal judgment." If thus far their tenets might be admitted to be generally the same with those of the Church of England, that which follows appears perfectly irreconcilable with such admission. The writer proceeds to say, "They commonly acknowledge seven sacraments, Baptism and the Lord's Supper, Ordination, Confirmation, Extreme Unction, Penance, and Marriage; they make use of holy oil in baptism; they practise auricular confession, even in children from the age of seven and upwards; they say masses for the repose of the souls of the dead." Their mode of worship appears also to be accompanied by prostrations, crossings, and other ceremonies, little agreeing with the sobriety and decorum of English devotion. The only imaginable mode of accounting for the existence of these opinions and practices among a people whose creed is said to be in accordance with the doctrines of the Church of England, is by adverting to a schism (hereafter to be noticed) which took place among the Syrian Christians about two centuries since, and by supposing that what in the last-quoted extract appears to be said of the entire body, applies, in fact, to only one section of it.

There is some evidence for concluding that the Gospel was preached in Malabar with successful results by St. Thomas, and that, immediately after his martyrdom, it was widely and zealously received there. It is not, however, to be unnoticed, that a large portion of the Syrian Christians attribute the introduction of Christianity into Malabar to a missionary, whom they call Mar Thome, and who appears to have laboured about the middle of the third century. Many Brahmins, and other persons of rank, became converts, and the church so flourished, that, in the tenth century, it is stated that Alfred, the Anglo-Saxon king, sent a mission to inquire after its welfare. At the time of the first arrival of the Portuguese, in the end of the fifteenth century, the Syrian Christians were a prosperous race, highly esteemed and honoured by the native princes. From the Portuguese, who were Romanists, actuated by all the intolerance which prevailed in their own church, the Syrian Christians endured every species of persecution and cruelty which the new-comers had power to

inflict, and in 1599 Menezes, the Portuguese archbishop of Goa, convened at Udiampier, near Cochin, a synod, at which the priests of the Syrian Christians, or at least many of them, terrified at the display of military force by the Portuguese and their native supporters, declared their conformity to the Church of Rome. At length the Dutch, having, in 1663, overthrown the Portuguese power in Malabar, the Syrian Christians recovered their religious liberty; but a considerable number of them voluntarily continued to conform to the faith which their ancestors had been forcibly constrained to adopt, and, coalescing with the Portuguese and their native converts, formed a body under the spiritual jurisdiction of the pope, and known by the denomination of Romish Christians of Malabar.

The Jews of Malabar are of two different denominations,—the Black Jews, from time immemorial settled in the country, and the White Jews, bearing, in their comparatively fair complexions, evidence of the recent emigration of their race from a more temperate climate. The principal settlement of the Jews is in the southern part of the district. In the city of Cochin are many white Jews, the black Jews for the most part inhabiting a suburb on the northern side of the city. The number of both denominations is, however, small.

Malabar, the present name of the tract extending along the south-western coast of Southern India, is considered to be a corruption of the name Malayalam, which, in the vernacular dialect, signifies “skirting the hills.” Its original Sanskrit name is stated to have been Kevala, and its original occupants the Brahmins, though there is some reason to conclude that they mastered and enslaved a still more ancient race, which, under the denomination of Poliar, groaned until lately under oppressive bondage. The Brahmins, who originally governed, it is said, by an aristocracy of their own caste, became, in consequence of their incessant and ruinous intestine discords, subject to a great potentate, who ruled them by permals (viceroys); a succession of these officers holding the dignity about twelve years each, until towards the commencement of the ninth century, when Cheruma Perumal threw off the yoke, established his independence, and divided his dominions with the Nairs, whom he had invited from the Carnatic. Having subsequently professed Islamism, he repaired to Mecca, and there ended his days. Great obscurity and inconsistency characterize the traditions, forming the only sources from which the history, real or fictitious, of these early periods is to be drawn. Neither dates nor facts can be relied on. The Nairs, however, appear to have maintained their ascendancy until the arrival of the Portuguese at Calicut in 1498, who found that city the residence of the Tamuri rajah, then the greatest potentate on the coast. From their landing, the intercourse of the Portuguese with the natives was characterized by an equal display of valour,

fanaticism, and cruelty, until the overthrow of their power by the Dutch, who, in 1663, took from them the city and seaport of Cochin; and thenceforth the native chiefs held their possessions with little molestation until the irruption of Hyder Ali. Influenced by ambition, rapacity, and the prospect of easy conquest from the dissensions of the chiefs, Hyder, in 1763, invaded Malabar from the side of Canara, overcame the obstinate but desultory resistance of the Nairs, and took Calicut, where the Tamuri rajah or Zamorin in despair fired his palace, and destroyed himself and his family in the flames. Calicut was garrisoned by a Mysorean force; but the inhabitants of Malabar continued obstinately, though ineffectually, to resist: 15,000 of them were driven off to people the devastated parts of the Carnatic; but this cruel measure proved abortive, as not more than 200 survived. Hyder Ali having plundered the country to exhaustion, in 1768 evacuated it; but in 1773, with little difficulty, recovered possession. His son and successor, Tippoo Sultan, outdid his father in acts of ferocity and plunder, everywhere treating the population with the greatest cruelty; and, among other outrages, causing such males as could be seized to be forcibly subjected to the initiatory rite of the Mahomedans. The success of the British arms against Tippoo transferred Malabar to the East-India Company, of whose possessions it has ever since formed part.

MALABAR POINT.—The south-western extremity of the island of Bombay. The place contains a residence for the use of the governor of the presidency. Distant W. from Bombay Castle three miles. Lat. 18° 56', long. 72° 51'.

MALACCA.—A town in the straits of the same name, situate at the entrance of a small river, near the southern extremity of the Malay peninsula. It consists of two divisions, separated by the river, but connected by a bridge. “On the left bank rises the verdant hill of St. Paul, surrounded by vestiges of an old Portuguese fort. Around its base lie the barracks, lines, and most of the houses of the military, the stadthouse, courthouse, jail, church, civil and military hospitals, convent, police-office, school, and post-office. On its summit stand the ruins of the ancient church of our Lady del Monte, erected by Albuquerque, and the scene of the labours and supposed miracles of that apostle of the East St. Francis Xavier. The bazars and by far the greatest part of the town are situate on the right bank of the river.” The view of the town from the roads is extremely picturesque. Lat. 5°, long. 100°.

The British territory, of which this town is the chief place, is bounded on the north-west by the Malay state of Salangore; on the south-east by that of Johore; on the east by Rumbow and Johole; and on the west by the Straits of Malacca. Its length is about forty miles; its breadth, including Naning, twenty.

five; and it contains an area of about 1,000 square miles. The products consist principally of rice, sago, jaggery, pepper, timber, poultry, and cattle: fruit and vegetables are abundant, and fish is plentiful and cheap. The climate is noted for its salubrity, the thermometer ranging from 72° to 85°. According to Newbold, "excessive heat and cold are not encountered here as on the peninsula of India, nor any scorching land-winds: hot nights seldom occur. There are regular land and sea breezes." The settlement is but slightly affected by the monsoons that prevail in the Bay of Bengal. A search for coal, conducted under the authority of the British government in different parts of the peninsula, has proved unsuccessful. Tin-mines are worked in various places.

The population of the settlement, inclusive of the military and also of convicts and all other classes, has been officially returned at 54,021. It is of very heterogeneous composition, embracing persons varying greatly as to descent, country, creed, and habits.

Malacca was captured by the Portuguese under Albuquerque in 1509, and remained in their possession till 1642, when it fell to the Dutch, who in their turn were expelled by the British in 1795. At the peace of Amiens, in 1801, it was restored to the Dutch: upon the renewal of hostilities in 1807, it again fell to the British; but was once more restored to the Dutch in 1818, after the general pacification. In 1824 it was finally transferred to the British, among the cessions made by the king of the Netherlands, in exchange for the British possessions on the island of Sumatra. The settlement, previously a dependency of the presidency of Bengal, was, by proclamation, 1st August, 1851, separated therefrom, and the governor of Prince of Wales Island, Singapore, and Malacca, was authorized to exercise within the three settlements, subject only to the government of India, the powers of administration which had previously been intrusted to the government of Bengal.

The peninsula of which Malacca forms part is inhabited by various tribes, chiefly, but not entirely, of Malay origin. In some tracts are found negroes, distinctly marked by the peculiar physical characteristics of that race. The Malay governments, as might be expected, have little or no pretensions to regularity. The chief is usually styled sultan, and between him and the people stand a body of nobles; but obedience, whether from the nobles to the prince, or from the people to both, is yielded only when inclination prompts, or the danger of resistance affrights. The chief points in the character of the Malay,—his violent and uncontrollable temper, his love of gambling, and more especially of cock-fighting, his faithlessness and cruelty, are well known. It is remarkable that his language should be singularly soft, sweet, and musical: it is of mixed origin, and great simplicity of construction. The following account of it is given by Hamilton:—"There is no inflexion of any part of

speech to express relative number, gender, time, or mood; and a word is often used without alteration, as a noun, adjective, verb, or adverb. The tenses of a verb are sometimes expressed by auxiliaries, sometimes by adverbs, but not unfrequently both are omitted, and the reader is left to gather the meaning from the context, the sentiment being rather hinted at than expressed. The language, as spoken in the year 1521 in the island of Tidore, when visited by a companion of Magellan, is said to have been precisely that of the present day. The religion professed by the Malays is Mahomedan."

MALAGARH, in the British district of Boolundshuhur, lieut.-gov. of the N.W. Provinces, a town on the left bank of the East Kallee Nuddee, 38 miles S.E. of Delhi. Lat. 28° 28', long. 77° 53'.

MALA SHEDAO.—A town in the native state of Bhawalpoor, situate on the left bank of the Beas river, and 77 miles N.E. by E. from Bhawalpoor. Lat. 29° 57', long. 72° 50'.

MALAUN, in the territory of Oude, a town on the route from Cawnpore to Seetapoor cantonment, 38 miles N. of the former, 41 S. of the latter. Heber, who visited it in 1824, describes it as a large town; and Tieffenthaler, about sixty years earlier, styles it "a small town (Städtchen), mostly built of brick, thickly peopled, surrounded by trees. It has a fort, built partly of mud, partly of brick, and having towers." Tennant describes it, at the beginning of the present century, as a "very large village, in length fully two miles. The inhabitants are numerous; but the town is mean and irregular, consisting almost entirely of small mud huts." Lat. 27°, long. 80° 32'.

MALAVELLY, or **MALAWALI**, in the Mysore, a large mud fort, situate about two miles from an extensive tank or artificial lake, and on the principal route from the Carnatic to Seringapatam. Here, in March, 1799, a battle took place between Tippoo Sultan and the British army under General Harris, advancing to besiege Seringapatam, in which the Mysoreans lost upwards of 1,000 men, while the loss of the British was only sixty-nine. After the latter had marched onwards past Malavelly, Tippoo Sultan caused it to be destroyed; but, after his overthrow, it was partially rebuilt. Distance from Seringapatam, E., 25 miles. Lat. 12° 23', long. 77° 7'.

MALCOLM ISLAND, in the Mergui Archipelago, situate 33 miles W. of the coast of Tenasserim. Its centre is in lat. 11° 18', long. 98° 20'.

MALCOLM PETT.—A village forming part of the convalescent station on the Mahabulishwar Hills, presidency of Bombay. It has several government bungalows for sick officers; the church is about four miles distant from the village and temples of Mahabulishwar, at the source of the Kistna river. The station is well supplied with vegetables from gardens

rented of the government. Distant S.E. from Bombay 104 miles. Lat. $17^{\circ} 56'$, long. $73^{\circ} 41'$.

MALDAH, a British district under the lieut.-gov. of Bengal, named from its principal place. It is bounded on the north by Purneah; on the north-east by the British district of Dinajepore; on the south-east by the British district of Rajshahye; and on the south-west by Moorsheadabad and Bhagulpore. It lies between lat. $24^{\circ} 30'$ — $25^{\circ} 25'$, long. $87^{\circ} 50'$ — $88^{\circ} 30'$; is seventy miles in length from south-east to north-west, and thirty-seven in breadth: the area is 1,000 square miles. It is throughout a thoroughly alluvial tract, traversed by numerous streams, all of which, flowing towards the south-east, indicate the general slope of the surface to be in that direction; and as they communicate with each other by numerous offsets, they give the country the character of the delta of a vast river, though distant 200 miles in a direct line from the sea. The principal of these are the Ganges, Mahanunda, Purnabada, and Bhagultt-e. The elevation of no part of the surface is considerable; it is probably not more than 110 feet at the north-western or highest part.

The principal towns are Maldah, English Bazar, Ruhampore, and Sivganj. The population is given under the article **BENGAL**. The routes are—1. From south to north, from Berhampore to Maldah, thence divaricating north-west to Purnea, and north-east to Dinajepore; 2. from west to east, from Rajmahal to Maldah.

The tract comprised within this district, according to Wiltord, quoting Puranic authorities, was originally part of the great kingdom of Magadha or Bengal, on the overthrow of which, in the middle of the seventh century, the town of Gaur became the capital of a rajah, the most powerful monarch of the eastern part of India. This state is said to have been overthrown, at the beginning of the thirteenth century, by Bakhtyar Khilji, an officer subordinate to Kutluddin Ailak, viceroy of Delhi, for Shahabuddin, the Mussulman monarch of Ghor, in Afghanistan. Bakhtyar Khilji assuming the title of king of Bengal, it became part of his realm, the seat of government being established at Laknouti or Gaur. In 1538 Gaur was taken, and the kingdom of Bengal conquered, by Sher Shah, the renowned Pa'han chief, who subsequently expelled Humayon from Delhi. During the conflict between those rivals, Humayon subjugated this tract, but was quickly obliged to retreat from it. The country was subdued, and restored to the kingdom of Delhi, in 1576, by the arms of Akbar and thenceforward remained ostensibly part of that realm, until it was granted to the East-India Company by the firman of Shah Alum, in 1765.

MALDAH, a town, the principal place of the British district of the same name, on the route from Burhampore to Purnea, 73 miles N. of the former, 91 S.E. of the latter. It is

situate on the left bank of the Mahanunda, at the confluence of a considerable offshoot from the Ganges, and during the periodical rains is nearly insulated by the inundation. Buchanan describes it as a wretched place, consisting of ruined houses, forming narrow irregular streets, loaded with filth. The manufactures which it formerly had have disappeared before the superior cheapness of those brought from Britain; and the desolation of the town appears to have extended to the surrounding country, as, though fertile, it had become a melancholy desert, from want of cultivation. Besides mosques, the only public building is a large serai or public lodging-house for travellers. Though giving name to the district, it is not the locality of the civil establishment, which is at English Bazar, four miles to the southward. The number of houses has been estimated at 3,000, which, according to the usually received average ratio of inmates to dwellings, would assign it a population of about 15,000. Distant N. from Calcutta, by Burhampore, 191 miles. Lat. $25^{\circ} 2'$, long. $88^{\circ} 11'$.

MALDAH.—A town in the British district of Mongheer, lieut.-gov. of Bengal, 46 miles W.S.W. of Mongheer. Lat. $25^{\circ} 8'$, long. $85^{\circ} 48'$.

MALEBUM.—A town in the native state of Nepal, 143 miles W.N.W. from Khatmandoo, and 127 miles N. from Goruckpoor. Lat. $28^{\circ} 30'$, long. $83^{\circ} 12'$.

MALEEPARA.—A town in the British district of Nuddea, lieut.-gov. of Bengal, 97 miles N.N.E. of Calcutta. Lat. $23^{\circ} 54'$, long. $88^{\circ} 51'$.

MALEKRA, in the north-east of the Punjab, a town in the southern range of the Himalaya, and close to the celebrated fort Kot Kangra. Here is an idol called Bawun, an object of great veneration to the superstitious Hindoos. It is without its head, which is supposed to be at Jewala Mukhi, and to breathe forth the perpetual fire issuing from the rock there. Malekra is a neat, clean-looking place, built on the side of a hill traversed by the road from Nadaum to Kot Kangra. Lat. $32^{\circ} 6'$, long. $76^{\circ} 19'$.

MALINGAPOOR.—A town in the Southern Mahratta jaghire of Moodhull, 66 miles E.S.E. from Kolapoor, and 58 miles N.E. from Belgaum. Lat. $16^{\circ} 23'$, long. $75^{\circ} 14'$.

MALKAH.—A town in the native state of Nepal, situate on the right bank of the Kurnalli river, and 19 miles W. by N. from Jemlah. Lat. $29^{\circ} 22'$, long. $81^{\circ} 23'$.

MALLA BONNOOR.—A town in the Mysore, 149 miles N.N.W. from Seringapatam, and 120 miles N.E. by N. from Mangalore. Lat. $14^{\circ} 21'$, long. $75^{\circ} 49'$.

MALLIA.—A town in Guzerat, or the dominions of the Guicowar, situate 86 miles S.S.W. from Rajkote, and 111 miles S.E. from Dwarka. Lat. $21^{\circ} 10'$, long. $70^{\circ} 21'$.

MALLIA, in the peninsula of Kattywar,

MAL.

province of Guzerat, a town in the district of Muchu Kanta, and in the spot where the Ruin or Salt Marsh joins the head of the Gulf of Cutch, and on the estuary of the small river Muchu. The talook or subdivision annexed to it contains nine villages, the whole having a population of 4,293, and paying annually to the Guicowar, and to the nawab of Joonaghur, a tribute of 1,641 rupees. It belongs to a thakoor or chief, a Jhareja Rajpoot, representative of the elder branch of the family holding the sovereignty of Cutch. The thakoor and his family reside at Kokraji, eight miles west of Mallia: his gross revenue, including the tribute paid by him, is estimated at 17,138 rupees. Distance from Ahmedabad, W., 115 miles; from Baroda, N.W., 160; Bombay, N.W., 315. Lat. 23° 4', long. 70° 46'.

MALLIAPPOORAM.—A town in the British district of Malabar, presidency of Madras, 24 miles S.E. by E. from Calicut. Lat. 11° 4', long. 76° 6'.

MALLIGAUM.—A town in the British district of Candesh, presidency of Bombay, situate on the trunk road from Bombay to Agra. A church has been recently erected in the town. A proposal was some time since made to transfer the civil station of the district to this place, from Dhoolia, its present locality, 154 miles N.E. of Bombay. Lat. 20° 32', long. 74° 30'.

MALLIWARRA.—A town of the Decan, in the territory of Nagpoor or Berar, situate 98 miles S.E. by E. from Nagpoor, and 94 miles S.W. by W. from Ryepoor. Lat. 20° 30', long. 80° 29'.

MALLOODIE, in Sind, a village on the route from Subulcote to Shikarpoor, and 35 miles S.W. of the former place. Lat. 28° 6', long. 69° 23'.

MALLUNG.—A town in the British district of Silhet, lieutenant-gov. of Bengal, 26 miles N.W. by N. of Silhet. Lat. 25° 11', long. 91° 38'.

MALOD, in Sirhind, a town on the route from Ferozpoor to Simla, and 101 miles S.E. of the former place. It is the possession of one of the Sikh chiefs, under the protection and control of the British. Distant N.W. from Calcutta 1,069 miles. Lat. 30° 38', long. 76° 3'.

MALOE, in the British district of Allygurh, lieutenant-gov. of the N.W. Provinces, a village 19 miles S.E. of the cantonment of Allygurh. Lat. 27° 42', long. 78° 17'.

MALOON.—A town of Burmah, situate on the right bank of the Iraddy river, and 85 miles N. from Proma. Lat. 19° 59', long. 94° 49'.

MALOOR.—A town in the British district of Madura, presidency of Madras, 19 miles N.E. by E. of Madura. Lat. 10° 3', long. 78° 24'.

MALOOR.—A town in the Mysore, 96 miles E.N.E. from Seringapatam, and 158

miles W. from Madras. Lat. 13°, long. 78° 1'.

MALOU.—A town in the territory of one of the independent hill tribes of Orissa, situate 85 miles S. from Sumbulpoor, and 98 miles N.W. from Ganjam. Lat. 20° 15', long. 83° 58'.

MALOWN, in the petty hill state of Hindoor, a celebrated fort, situate on a summit of the ridge of the same name, which rises over the left bank of the Sutlej, and has a south-easterly direction until it joins the Sub-Himalaya. The ridge in the part where the fort is situate is only between twenty and thirty yards wide, having on the north-east a steep declivity of 2,000 feet to the river Gumrara, and on the south-west one equally steep and deep to the river Gunbur. The fort is strongly built of masonry, and contains a court-yard, a few small apartments, and a magazine, the whole occupying a space 100 yards long and twenty wide, and surrounded by a strong wall without a ditch. Here, in April, 1815, the Goorkha forces, under their commander-in-chief Ummer Singh, were shut up, when dislodged from all their other posts in the western hill states by the persevering and masterly operations of General Ochterlony, and the British engineers having, with amazing toil and skill, made up those difficult heights a road practicable for heavy artillery, a breaching battery was formed within 100 yards of the fort, which was surrendered on the 15th of May following. By this capitulation, it was provided that the whole of the hill states west of the river Kalee should be evacuated by the Goorkhas, and delivered up to the British. Malown is 4,448 feet above the sea. Distant N.W. from Calcutta 1,095 miles. Lat. 31° 12', long. 76° 52'.

MALPURA, in the British district of Agra, lieutenant-gov. of the N.W. Provinces, a town situate eight miles S.W. of the city of Agra. Lat. 27° 7', long. 77° 59'.

MALPURA, in the state of Jeypoor, in Rajpootana, a town on the route from Delhi to Neemuch, 216 miles S.W. of former, 155 N.E. of latter. It is of considerable size, and water and supplies are abundant. Lat. 26° 17', long. 75° 25'.

MALRA, in the jaghire of Jujhur, lieutenant-gov. of the N.W. Provinces, a village on the route from Rohtuk to Narnol, and 47 miles S.W. of the former. Lat. 28° 19', long. 76° 15'.

MAISEIJ GHAUT, a pass over the Western Ghats, separating the Tannah and Ahmednuggur districts, 68 miles N.E. by E. from Bombay. Lat. 19° 25', long. 73° 48'.

MALTEE NUDDEE, a small river rising on the south-west frontier of Bengal, in lat. 21° 22', long. 84° 13', and, flowing circuitously, but generally westerly, for twenty miles, through the British district of Sumbulpoor, falls into the Mahanuddy, in lat. 21° 25', long. 84° 1'.

MALWA, or **CENTRAL INDIA**, a tableland of uneven surface, elevated from 1,500 to 2,500 feet above the level of the sea, bounded on the west by the Aravulli range of mountains; on the south by the Vindhya chain; on the east by Bundelcund; and on the north east by the valley of the Ganges. Of a country so extensive and so divided as to government, it would be out of place to attempt a description of either its physical or political circumstances; but in the articles devoted to particular portions, the proper information will be found; and to these the inquirer is referred. Malwa formerly constituted a powerful kingdom: it appears to have thrown off the yoke of Delhi at the close of the fourteenth century, in the reign of Feroz Toghluk. Its first king was Dilawar Ghorî, whose ancestors were natives of Ghor, in Afghanistan. It preserved its independence through a line of kings for 130 years, when it was subjugated by Akbar, and annexed to the imperial dominions. Malwa continued a province of the empire until the dissolution of that great fabric of power made way for the subjugation of Malwa by the power then rising in India,—the Mahrattas, by whom it was speedily overrun. The condition of the country became unsettled and irregular, and here, as the proper soil for their production, originated the associations of plunderers, infamous in Indian history under the name of Pindaries. These miscreants gradually extended themselves over Malwa, and would soon have occupied the whole, issuing forth but to carry devastation and misery into the adjacent countries, had not the vigorous measures of the Marquis of Hastings put an end to their success, and forced them to resort to more honest means of life than they had been accustomed to. Malwa was thus restored to peace and security, and the great preservative of peace afforded by the paramount power of the British government has been effectual in maintaining those blessings which its energy and perseverance won for the country. It is divided into a number of principalities, held by native chiefs. The peace of the country is in part preserved by a Bheel corps, embodied in 1840. The Bheels were among the most despised outcasts, and were considered among the most hopeless. The experiment of converting them into soldiers did not appear to bear much promise, but it has succeeded to an extent that the most sanguine could scarcely have looked for: they have been trusted, and they have shown themselves worthy of trust. The expense of the corps is supported partly by the British government, and partly by contributions from Holkar, Scindia, Dhar, Jabooa, and Amjherra. In addition to this force, is the Malwa united contingent, supported by Holkar and the petty states of Dewas and Jourah.

MALWAN, also known by the names of Melundy Island and Sindoodroog, is situate

off the coast of the Southern Concan, presidency of Bombay. It is little elevated above the water, and the channel being narrow, it at a short distance is not easily distinguished from the mainland, on which, abreast of the island, is a fort. This was formerly a stronghold of Mahratta pirates, but in 1812 it was, under the treaty of Kurveer, ceded to the East-India Company by the rajah of Colapore. Iron-ore of good quality has been found in the vicinity. Distant S. from Bombay 210 miles, S.W. from Sattara 122 miles. Lat. $16^{\circ} 4'$, long. $73^{\circ} 31'$.

MAMADPOOR, in Sinde, a village on the route from Subzulcote to Shikarpoor, and 22 miles S.W. of the former town. Lat. $28^{\circ} 7'$, long. $69^{\circ} 34'$.

MAMKPOONJ.—A town in the British district of Ahmednuggur, presidency of Bombay, 80 miles N. of Ahmednuggur. Lat. $20^{\circ} 14'$, long. $74^{\circ} 44'$.

MAMUN, in the British district of Boondshuhur, lieut.-gov. of the N.W. Provinces, a village on the route from Muttra to Meerut, and 49 miles S. of the latter. The road in this part of the route is good, the country open and partially cultivated. Lat. $28^{\circ} 20'$, long. $77^{\circ} 55'$.

MANA, in the British district of Kumaon, under the lieut.-gov. of the N.W. Provinces, a town on the Saraswati, called lower down the Vishnuganga or Bishenganga, a tributary of the Aluknunda. It is the chief place of a petty district of the same name, containing, according to Traill, three villages and 700 or 800 inhabitants. A route from the south proceeds by the village and up the course of the river, to the crest of the range dividing Kumaon from Chinese Tartary, on which it debouches by a pass of the same name as the town. The Mana Pass, though very lofty, is one of the easiest into Chinese Tartary from the south, in consequence of the ascent up the course of the river being rather regular and gradual. It is that usually followed by the Hindoo pilgrims in their journeys to Lake Manasarovara, for which they choose the month of July, returning in October by the Nilon Pass. The town of Mana has an elevation of 10,492 feet, the pass of 18,000. Lat. $30^{\circ} 46'$, long. $79^{\circ} 32'$, of town; lat. $31^{\circ} 5'$, long. $79^{\circ} 34'$, of pass.

MANAAR, an island off the coast of Ceylon, and at the eastern extremity of the narrow long sandbank called Adam's Bridge, which stretches in a direction from east to west between Ceylon and the mainland of India. Manaar gives name to a gulf or rather bay indenting the mainland of India: it bears north-east from Cape Comorin, and south-west from Palk's Straits, from which it is divided by Adam's Bridge. A survey of the gulf, conducted at considerable cost, was completed a few years since, and resulted in the formation of the Paumbum Passage, the par-

ticulars of which are described under that head in the alphabetical arrangement. The island is in lat. $9^{\circ} 3'$, long. 80° .

MANAMALEGUDI.—A town in the British district of Tanjore, presidency of Madras, situate 53 miles S. of Tanjore. Lat. $10^{\circ} 3'$, long. $79^{\circ} 18'$.

MANANTA WADDY, in the British district of Malabar, presidency of Madras, a town, the principal place of the talook or subdivision of Wynaad, and the head-quarters of the local force stationed in it. Distance from Calicut, N.E., 43 miles; Cananore, E., 50. Lat. $11^{\circ} 48'$, long. $76^{\circ} 4'$.

MANAPARA.—A town in the British district of Madura, presidency of Madras, 55 miles N.N.E. of Madura. Lat. $10^{\circ} 39'$, long. $78^{\circ} 29'$.

MANARGOODY.—A town in the British district of Tanjore, presidency of Madras, 22 miles E.S.E. of Tanjore. Lat. $10^{\circ} 40'$, long. $79^{\circ} 30'$.

MANAR GURR.—A town in the British district of South Canara, presidency of Madras, 26 miles N. by W. of Mangalore. Lat. $13^{\circ} 13'$, long. $74^{\circ} 47'$.

MANASA BUL, or **MANOS BAL**, in Cashmere, a beautiful lake, which discharges its water into the Jhelum, on the right or north side. It is altogether, according to Von Hügel, one of the most beautiful spots in existence. On the northern bank are the remains of a palace built by Nur Jehan, the celebrated queen of Jehangir, the Mogul emperor. Lat. $34^{\circ} 13'$, long. $74^{\circ} 48'$.

MANCHEE, a river rising in lat. 27° , long. $89^{\circ} 3'$, on the southern slope of the Sub-Himalaya range of mountains, and, flowing in a southerly direction for forty miles through the native state of Bhotan, and for nineteen through that of Coosh Behar, falls into the Jerdecker river on the left side, in lat. $26^{\circ} 20'$, long. $89^{\circ} 15'$.

MANCHUN, a river rising in lat. $22^{\circ} 21'$, long. $74^{\circ} 38'$, on the northern slope of the Vindhya range of mountains, and in the native state of Barreah, and, flowing in a northerly direction for fifty-five miles through Barreah, Dewud, Jhallod, and Saunte, falls into the river Mhye, in lat. $23^{\circ} 32'$, long. $74^{\circ} 1'$.

MANDALE.—A town of Burmah, situate five miles N. from the right bank of the Irawady, and 34 miles W.N.W. from Ava. Lat. $22^{\circ} 2'$, long. $95^{\circ} 32'$.

MANDAVEE, in the presidency of Bombay, a town, the principal place of a feudal dependency, which, on the demise of Rajah Doorjun Singee in 1840, and the failure of heirs in the direct line of succession, lapsed to the paramount power, and was subsequently annexed to the British dominions: it now forms part of the collectorate of Surat. The town is situate on the right bank of the Taptee, 73 miles S. of Baroda. Lat. $21^{\circ} 11'$, long. $73^{\circ} 20'$.

MANDAVEE.—A town in the native state of Cutch, situate on the coast of the Gulf of Cutch, and 34 miles S.W. from Bhooj. Lat. $22^{\circ} 51'$, long. $69^{\circ} 26'$.

MANDAWA.—A town in the Rajpoot state of Jeypoor, situate 86 miles N.W. by N. from Jeypoor, and 115 miles N.N.E. from Ajmeer. Lat. $28^{\circ} 1'$, long. $75^{\circ} 18'$.

MANDEYE, in the British district of Mynpooree, lieut.-gov. of the N.W. Provinces, a village situate on the route from the city of Agra to the cantonment of Mynpooree, and 27 miles W. of the latter. Lat. $27^{\circ} 7'$, long. $78^{\circ} 43'$.

MANDGAON.—A town of the Deccan, in the territory of Nagpoor, situate on the right bank of one of the branches of the Wurda river, and 39 miles S.S.W. from Nagpoor. Lat. $20^{\circ} 40'$, long. $78^{\circ} 55'$.

MANDI.—See **MUNDI**.

MANDOO, in the small raj or state of Dhar, in Malwa, an extensive deserted city, 15 miles N. of the right bank of the Nerbudda. The circuit of its ramparts is, according to Malcolm, thirty-seven miles; but it is not probable that the whole of this great space was inhabited. The greatest and least-injured of the ruined buildings is the Jama Masjid, or great mosque. Its area is raised several yards above the ground, and is reached by a large and handsome flight of stairs: its interior is open to the heavens. The ground-plan is a square, and on each side is a low deep gallery, supported by several ranges of enormous pillars. The size of this building is great, so that, notwithstanding some degree of heaviness and incandescence, its appearance is very striking. Next in importance is the mausoleum of Hoshung Ghori, king of Malwa, who raised this city to great splendour. It is built in massive style, of white marble, and is situate in a square court, from which proceeds a deep gallery, supported by columns elaborately sculptured; and in a chamber roofed with vast slabs is the sarcophagus of the sultan. The ruins of the palace of Baz Bahadur, king of Malwa, and of many other gorgeous buildings, strew the ground to a great extent. According to Malcolm, Mandoo was founded in the year 370 of the Sambat, or A.D. 813, and was at first the residence of the Hindoo rajahs of the state of Dhar. It is mentioned by Ferishta as the occasional residence and seat of government of Dilawar Khan Ghori, the first Mussulman king of Malwa, who reigned from A.D. 1387 to 1405; and that his son, Alp Khan, who succeeded him under the name of Hoshung Ghori, laid the foundations, during his father's life and reign, of the fortifications, which he completed afterwards when on the throne. In 1526 it was taken by Bahadur Shah, sovereign of Guzerat, and was embodied in his dominions, in which it remained comprised until their conquest by Akbar in 1570. The name of Akbar, and the date of his visit to Mandoo, are inscribed on a marble slab over one of

the principal gates. Elevation above the sea 1,944 feet. Distant from Mow, S.W., 26 miles; Indoor, S.W., 33 miles; from Oojein, by Indoor, S.W., 70. Lat. $22^{\circ} 20'$, long. $75^{\circ} 27'$.

MANDOUTHEE, in the British district of Rohtuk, lieutenant-gov. of the N.W. Provinces, a town on the route from Rohtuk to Delhi, 18 miles S.E. of the former. Lat. $28^{\circ} 42'$, long. $76^{\circ} 51'$.

MANDOWLA.—A town in the Rajpoot state of Jodhpoor, situate on the left bank of the Loonee river, and 100 miles S.W. from Jodhpoor. Lat. $25^{\circ} 20'$, long. $71^{\circ} 59'$.

MANDREL.—A town in the native state of Gwalior, or the territory of Scindia's family, situate on the right bank of the Parbatty river, and 62 miles W. from Gwalior. Lat. $26^{\circ} 14'$, long. $77^{\circ} 15'$.

MANDULGURH.—A town in the Rajpoot state of Oodeypoor, 96 miles N.E. by E. from Oodeypoor, and 96 miles S. by E. from Ajmeer. Lat. $25^{\circ} 10'$, long. $73^{\circ} 10'$.

MANDUNEE, in Koonbharasin, a village on the route from Simla to Kotgurh, and 10 miles S. of the latter place, remarkable for two Hindoo temples, constructed partly of stone, partly of wood, ingeniously and elaborately carved. The village is exclusively inhabited by Brahmins. Elevation above the sea 7,428 feet. Lat. $31^{\circ} 11'$, long. $77^{\circ} 29'$.

MANDWA.—A town in Hyderabad, or territory of the Nizam, situate 161 miles N.E. by N. from Hyderabad, and 127 miles S. by E. from Nagpore. Lat. $19^{\circ} 24'$, long. $79^{\circ} 40'$.

MANDWA.—A town in one of the recently sequestered districts of Hyderabad, or dominions of the Nizam, presidency of Bengal, situate 89 miles S.E. by E. of Ahmednuggur. Lat. $18^{\circ} 32'$, long. $75^{\circ} 59'$.

MANDWELLA.—A town in the Rajpoot state of Jodhpoor, situate on the right bank of the Sookree river, and 68 miles S.W. by S. from Jodhpoor. Lat. $25^{\circ} 28'$, long. $72^{\circ} 35'$.

MANDYAH, in the British district of Goorgaon, lieutenant-gov. of the N.W. Provinces, a village situate on the route from Dadri to Rewari, and six miles N.W. of the latter. Lat. $28^{\circ} 15'$, long. $76^{\circ} 36'$.

MANEGUMBA.—A town in the native state of Nepal, situate on the right bank of the Arun river, and 102 miles E.N.E. from Khatmandoo. Lat. $28^{\circ} 7'$, long. $86^{\circ} 51'$.

MANERUNG.—A pass over the lofty range of Danuk Shu, bounding Koonawur on the north-west, and dividing it from Ladakh. No European, except Alexander Gerard, appears to have visited that scene of terrific wildness; and its passage, and that of the Charung Pass, were the most arduous undertakings of that intrepid and adventurous explorer. The ascent of the pass from the south-east or Koonawur side is up the course of the Darbung river, to its source, in peren-

nial ice and snow, at an elevation of 15,000 feet. This pass is open about four months of the year: it was crossed by Gerard at the end of August. Elevation above the sea 18,612 feet. Lat. $31^{\circ} 56'$, long. $78^{\circ} 24'$.

MANGAHPETT, in Hyderabad, or territory of the Nizam, a small town on the right or south-west bank of the river Godavery, which flows at the base of a range of mountains situate in the territory of Nagpore. It has a small mud fort; but the remarkable objects there are some structures in the Cyclopean style of architecture, consisting of huge stones above twenty feet high, set upright as pillars, and arranged in circles like those of Stonehenge, and other antique works considered as Druidical monuments. They are cut out of the sandstone, the natural formation of the rocks in that part of the country. Distance from Hyderabad, N.E., 150 miles; from Polenshaw, N., 50. Lat. $18^{\circ} 13'$, long. $80^{\circ} 25'$.

MANGALORE, in the British district of South Canara, presidency of Madras, a town situate on the north side of the estuary formed by the junction of a river flowing from the north-east, and of the Nairavutty, a considerable river, but navigable only by small vessels, there being but ten or eleven feet water on the bar. "Here," says a traveller who visited the place some years since, "are the magazines for sandal-wood, which grows on the Mysore hills, of which," the writer states, the East-India Company had at the time a monopoly from the rajah. The estuary is a fine expanse of water, separated from the sea by a beach of sand, liable to be breached by the waves in different places, and thence the utility of the haven is greatly impaired, as the depth of water at the entrance, at no time great, is liable to vary at short intervals. The town is large, and is washed on east and west by the two streams whose confluence forms the estuary. The houses are generally mean, and there are no public buildings worth notice.

Mangalore, though a bad haven, was the principal seaport of the territory of Hyder Ali, and, subsequently, of his son Tippoo; and here were constructed the ships forming the maritime force of their realm: the fine teak-woods at the base and on the slopes of the Ghats affording abundance of the best materials. A few miles to the north of Mangalore is an extensive deposit of porcelain-clay, very closely resembling that of Limoges, in France, of which the beautiful Sevres ware is formed; and as the beds of this substance are close to the coast, it could advantageously be shipped to Europe as ballast, or, with the aid of Chinese artificers, might be manufactured in India.

Mangalore early and repeatedly suffered from the ferocity of the Portuguese. In 1547 it was desolated by them with fire and sword: being rebuilt in 1555, it was again destroyed by the same nation. Having recovered this calamity, it once more fell into the hands of these people, who destroyed every living being,

and burned the town. In 1567 it was finally occupied by the Portuguese, who built there the fort St. Sebastian and a church. In 1617, the Portuguese governor of Mangalore defeated the rajah of the small territory in the vicinity of the town, and compelled him to cede a portion of his possessions. In 1640 this place was still in the hands of the Portuguese; and it does not appear when or how it was wrested from them by the rajah of Bednore, on the overthrow of whose power by Hyder Ali, in 1763, it was seized by that adventurer. In 1768 it was taken by an expedition sent for that purpose from Bombay, and in the same year retaken by Hyder; the British garrison, though ample and provided with means to make a prolonged defence, pusillanimously evacuating the place, and making off to Bombay. In 1783 it was surrendered to a British force under General Matthews, and in the same year it yielded to Tippoo Sultan; on whose final overthrow, in 1798, it was acquired by the East-India Company.

The population was ascertained by census, in 1836, to amount to 11,548 persons, exclusive of the military. The cantonment is situated on the north side of the town, on a level space, gently elevated, well drained, and open to the sea-breezes; and from these circumstances is healthy. Here, in 1784, was concluded the treaty of peace, called the treaty of Mangalore, between the East-India Company and Tippoo Sultan. Mangalore is called also Cadyall Bunder, and is the principal place of a talook or subdivision of the same name. An excellent road from Mangalore to Mercara, a distance of eighty miles, was constructed in 1840, at a cost of upwards of 25,000*l*. The town is distant direct from Bombay, S.E., 440 miles; from Bangalore, W., 188; Seringapatam, N.W., 130; Madras, W., 370; Calcutta, S.W., by Bangalore, Ongole, Ellore, Cuttack, and Midnapore, 1,160. Lat. 12° 52', long. 74° 54'.

MANGLEE.—A town in Hyderabad, or dominions of the Nizam, situate on the left bank of the Payne Gunga river, and 169 miles N. by E. from Hyderabad. Lat. 19° 45', long. 78° 59'.

MANGLOOR, in the British district of Suharunpoor, lieutenant-gov. of the N.W. Provinces, a town on the route from Suharunpoor to Bijpore, 23 miles S.E. by E. of the former. Lat. 29° 47', long. 77° 57'.

MANGMUTCHIA.—A town in the British district of Mergui, one of the Tenasserim provinces. Lat. 13° 10', long. 98° 43'.

MANGOR, in the territory of Gwalior, or dominions of Scindia, a fortified village 11 miles S.W. of the celebrated fort of that name, and situate at the base of a high range of hills. Here, during the brief campaign at the close of December, 1843, the Mahratta army took post, preparatory to its attack on the British, under General Grey, posted close to the town of Puniar. In the engagement which ensued,

on December 29th, the Mahrattas were driven, with heavy loss, from all points of their position, and all their artillery, consisting of twenty-four pieces, was captured, as well as all their ammunition. The British had 35 men killed and 182 wounded. Lat. 26° 7', long. 78°.

MANGROL, in the peninsula of Kattywar, province of Guzerat, a town in the prant or district of Sorath, on the south-west coast, washed by the Arabian Sea. Though an indifferent port, the town is very populous, and has considerable traffic. Here is a mosque, the finest building of the kind in the peninsula of Kattywar. A tablet in one part of the building records its foundation, A.D. 1383. It belongs to a petty Mussulman chief, styled nawaub of Mangrol. He is tributary to the chief or nawaub of Joonagurh. The nawaub of Mangrol pays to Joonagurh an annual tribute of 11,000 rupees. Distant from Ahmedabad, S.W., 205 miles; Baroda, S.W., 210. Lat. 21° 8', long. 70° 10'.

MANGROL, in the Rajpoot territory of Kotah, a town on the route from Calpee to Kotah, 274 miles S.W. of former, 46 E. of latter. Here, on the 21st of September, 1821, a battle was fought between the army of Kishen Singh, the maha rao or hereditary prince of Kotah, and the troops of Zalim Singh, the minister of the state, aided by the British, in which the maha rao was utterly defeated, and his brother, Pirthi Singh, killed. Lat. 25° 17', long. 76° 33'.

MANGUL, a small hill state under the superintendence of the Governor-General's agent for the Cis-Sutlej states, is bounded on the north by Sooket, from which it is separated by the Sutlej; on the east and south by Bhagul; and on the west by Kuhlloor. It is about six miles in length from north to south, and four in breadth from east to west; its centre is in lat. 31° 18', long. 76° 56'; it contains two pergunnahs. The revenue is estimated at 100*l*, and the population at 1,000 souls.

MANGURH, in the British district of Dumoh, Saugor and Nerbudda territory, lieutenant-gov. of the N.W. Provinces, a town on the route from Dumoh to Sohagpoor, 21 miles E.S.E. of the former. Lat. 23° 40', long. 79° 50'.

MANICKDROOG.—A town in Hyderabad, or dominions of the Nizam, 166 miles N. by E. from Hyderabad, and 107 miles S. from Nagpoor. Lat. 19° 39', long. 79° 17'.

MANIHALA, or **MANIALA**, in the Baree Doob division of the Punjab, a town situated 14 miles S.E. from the left bank of the Ravee, 13 miles E.S.E. of the town of Lahore. Lat. 31° 32', long. 74° 35'.

MANIKPOOR, in the territory of Oude, a decayed town in the district of A hlaganj, on the route from Allahabad to Lucknow, 38 miles N.W. of the former, 90 S.E. of the latter. It is situate on the left bank of the Ganges, here a rapid stream, shallow in the

season of low water, when it is about a third of a mile wide, muddy and discoloured. Distance N.W. from Calcutta, by Allahabad, 541 miles. Lat. 25° 45', long. 81° 30'.

MANIKPOOR, in the British district of Budaon, lieutenant-gov. of the N.W. Provinces, a village on the route from Agra to Bareilly, and 44 miles S.W. of the latter. Lat. 28° 1', long. 79° 4'.

MANJEE, in the British district of Sarun, lieutenant-gov. of Bengal, a considerable town on the left bank of the river Ghogra, three miles above its confluence with the Ganges. Distance from Chapra, N.W., 12 miles; from Dinapore, N.W., 36. Lat. 25° 48', long. 84° 40'.

MANJERA, a river rising in lat. 18° 44', long. 75° 30', and, flowing in a south-easterly direction for 170 miles, separates for that distance one of the recently sequestered districts from the reserved territories of the Nizam. From the termination of this boundary it continues its course through the territory of Hyderabad, and falls into the Godavery river on the right-hand side, near the town of Sungum, in lat. 18° 48', long. 77° 55'.

MANKAH.—A town in the British district of Palamow, lieutenant-gov. of Bengal, situate 12 miles E.S.E. of Palamow. Lat. 23° 45', long. 84° 11'.

MANKORE, or **MANKAUR**, in the British district of Burdwan, lieutenant-gov. of Bengal, a town on the route from the town of Burdwan to Raniganj, 22 miles N.W. of former, 30 S.E. of latter. Jacquemont styles it a considerable village. Lat. 23° 24', long. 87° 34'.

MANKOT.—A town in the dominions of Gholab Singh, the ruler of Cashmere, situate 18 miles N.W. from the right bank of the Ravee, and 101 miles N.E. from Lahore. Lat. 32° 38', long. 75° 24'.

MANOKPOOR.—A town in the Rajpoot state of Jodhpoor, 49 miles N.E. from Jodhpoor, and 70 miles N.E. by N. from Ajmeer. Lat. 26° 49', long. 73° 40'.

MANOOKE, in Sirhind, a village on the route from Ferozpoor to Simla, and 50 miles S.E. of the former town. Lat. 30° 40', long. 75° 40'.

MANOOR.—A town in Hyderabad, or dominions of the Nizam, situate 141 miles N. from Hyderabad, and 139 miles S.S.E. from Ellichpoor. Lat. 19° 23', long. 78° 31'.

MANOOR.—A town in the British district of Ahmednuggur, presidency of Bombay, 41 miles E. of Ahmednuggur. Lat. 19° 9', long. 75° 21'.

MANPOOR, in the Rajpoot state of Jey-pore, a town on the route from Agra to Ajmeer, 87 miles W. of former, 141 E. of latter. It is situate on the right or south bank of the Baun or Banganga river or torrent, the channel of which, 600 yards wide, is devoid of water in the dry season, though having a considerable

stream during the periodical rains. The town is surrounded by a mud rampart from twelve to sixteen feet high, with eight good semi-circular bastions and a dry ditch. Boileau states that it contains 800 houses; an amount which would assign it a population of about 4,000 persons. Lat. 26° 58', long. 76° 44'.

MANSA, in the north of the Punjab, a small lake in the southern range of the Himalaya, a mile in length, half a mile in breadth, and very deep. Forster styles it "a delicious spot." It is considered sacred by the Hindoos, who visit it in pilgrimage, regarding it as a meritorious act to make the circuit of it, to propitiate the Devi or presiding spirit. Lat. 32° 40', long. 75° 8'.

MANSOOD, in the British territory of Saugur and Nurbudda, lieutenant-gov. of the N.W. Provinces, a town on the route from Ellichpoor to Deogur, 50 miles N.E. by E. of the former. Lat. 21° 38', long. 78° 10'.

MANSUK, in the native state of Korea, on the south-west frontier of the presidency of Bengal, a small town or village among the mountains of Gondwana, situate 45 miles W. of the ruined city of Sirgooja, 136 S. of Mirzapoor, 440 W. of Calcutta by Hazaribagh. Lat. 23° 12', long. 82° 25'.

MANTEE, in the British district of Cawnpore, lieutenant-gov. of the N.W. Provinces, a village on the route from the cantonment of Cawnpore to that of Calpee, and 21 miles N.E. of the latter. Lat. 26° 20', long. 80° 1'.

MANTHALIGHOT.—A town in the native state of Nepal, 47 miles E.S.E. from Khatmandoo, and 95 miles N. from Durbunga. Lat. 27° 30', long. 86°.

MANTHOLY.—A town in Nagpoor or Berar, situate 129 miles S.E. from Nagpoor, and 92 miles W. by S. from Chanda. Lat. 20° 6', long. 80° 47'.

MANUND, in Keonthul, a peak on a ridge connected with the Jako or Simla range, and throwing off feeders to the river Giri on one side, and to the Ushun on the other. Elevation above the sea 7,800 feet. Lat. 31° 3', long. 77° 19'.

MANUROO, or **MUNHEIROO**, in the jaghire of Jujhur, lieutenant-gov. of the N.W. Provinces, a village on the route from Hansi to Neemuch, and 34 miles S.E. of the former. Supplies may on notice be obtained in moderate quantity, and water is supplied from wells and tanks. The road in this part of the route is good. Lat. 28° 41', long. 76° 17'.

MAO, in the British district of Furruckabad, lieutenant-gov. of the N.W. Provinces, an ancient town 11 miles N.W. of the city of Furruckabad, and a mile and a half W. of the right bank of the Ganges. Lat. 27° 35', long. 79° 31'.

MAPAN, in the British district of Kumaon, lieutenant-gov. of the N.W. Provinces, a village in the Bhotia subdivision of Juwahir, on the

route to Hiundes or Chinese Tartary, and 16 miles S. of the Juwahir Pass. It is situated near the right bank of the Gores river, which flows at the depth of about 250 feet below. The country is above the limit of forest vegetation, producing only a few creeping cedars, barberry and gooseberry-bushes, and other shrubs. Elevation above the sea 11,082 feet. Lat. $30^{\circ} 23'$, long. $80^{\circ} 12'$.

MARACHANGDI, a river rising in lat. $28^{\circ} 55'$, long. $83^{\circ} 58'$, in the Snowy range of the Himalayas, and, flowing in a southerly direction for 100 miles, falls into the Naling, a tributary of the Trisul-Gunga, in lat. $27^{\circ} 40'$, long. $84^{\circ} 11'$.

MARANDAHALLIC.—A town in the British district of Salem, presidency of Madras, 161 miles W.S.W. of Madras. Lat. $12^{\circ} 24'$, long. $78^{\circ} 4'$.

MAREE, in Sirhind, a town thirty miles from the left bank of the Sutlej. It was comprised in the possessions held by the maharajah of the Punjab, on the left side of the Sutlej, and is now locally situated within the British district of Ferozepoor. Distant S.E. from Ferozepoor 38 miles; N.W. from Calcutta, by way of Delhi and Munuk, 1,068 miles. Lat. $30^{\circ} 36'$, long. $75^{\circ} 7'$.

MARHWAS.—A town of Baghelcund, in the native state of Rewah, situated 42 miles S.E. from Rewah, and 60 miles N.N.E. from Sohagpoor. Lat. $24^{\circ} 6'$, long. $81^{\circ} 51'$.

MARIAN RIVER.—One of the mouths of the Irawady, falling into the Bay of Bengal in lat. $16^{\circ} 35'$, long. $96^{\circ} 45'$.

MARJA, in Bussahir, a pass over the range of the Himalaya bounding Koonawur to the south. This pass and three others cross the ridge within a space of little more than a mile. The elevation of Marja is probably between 16,000 and 17,000 feet. On account of fissures in the ice, and the snow sinking, it is scarcely passable, except in May, June, July, and the first half of August. Marja Pass is in lat. $31^{\circ} 16'$, long. $78^{\circ} 27'$.

MARKAPOOR.—A town in the British district of Cuddapah, presidency of Madras, 91 miles N.N.E. of Cuddapah. Lat. $15^{\circ} 45'$, long. $79^{\circ} 20'$.

MARKARI, in the British district Malabar, presidency of Madras, a town on the western base of the Western Ghats, on a river flowing from that range, nine miles E. of Cannanore. Lat. $11^{\circ} 52'$, long. $75^{\circ} 38'$.

MARKUNDA, a river, or rather torrent, rises in Sirmour, under the name of Murkwa, in the hills about Nahun, in lat. $30^{\circ} 35'$, long. $77^{\circ} 27'$. Holding a course of a few miles in a south-westerly direction, it flows into Sirhind, and still proceeding south-west, joins the Sursooty in lat. $29^{\circ} 29'$, long. $76^{\circ} 39'$, having run from its source to this point about seventy miles. This river, like the Sursooty to the east, and the Gagur to the west, flows through

a shallow valley twenty-nine miles wide, and so level that, in time of inundation, the three rivers communicate by means of numerous branches, forming a maze of streams; and in extraordinary floods all unite, the whole country, except the elevated sites of villages, being laid under water: at other times, like the rest of the streams of Sirhind, it becomes "a mere thread of running water."

MARCOT, in Bhawalpoor, a town in the desert extending through the eastern part of that state. It is situated on the route from the town of Bhawalpoor to Bhutneer, and 60 miles E. of the former place. It is surrounded with a mud wall of considerable extent, having numerous bastions. Maroot is in lat. $29^{\circ} 5'$, long. $72^{\circ} 40'$.

MAROT, in the British district of Bhutteeana, lieutenant-gov. of the N.W. Provinces, a small town or village close to the north-east frontier towards Sirhind. Lat. $30^{\circ} 10'$, long. $74^{\circ} 35'$.

MAROUT.—A town in the Rajpoot state of Jodhpoor, situated 140 miles E.N.E. from Jodhpoor, and 52 miles N.E. by N. from Ajmeer. Lat. $27^{\circ} 5'$, long. $75^{\circ} 10'$.

MAROWA, in the British district of Benares, lieutenant-gov. of the N.W. Provinces, a village on the right bank of the Ganges, 659 miles N.W. of Calcutta by water, 10 N.E. of Benares. Lat. $25^{\circ} 22'$, long. $83^{\circ} 10'$.

MAROWRA.—A town in Bundelkund, 22 miles W. by N. from Shahgurrh, and 37 miles N. from Saugur. Lat. $24^{\circ} 22'$, long. $78^{\circ} 50'$.

MARTABAN.—A town in the British province of Pegue, situated on the east bank of the Salween, immediately opposite the British station of Mouhmein. It is a place of no strength, and upon the breaking out of the Burmese war in 1852, it was the first of the enemy's possessions which fell before the British arms. On the 4th April, a fire was opened upon the town from her Majesty's steamer *Rattler*, which had taken up a position at a short distance from the defences, and the garrison offering little resistance, the place became an easy conquest. (See also PEGUE.) Lat. $16^{\circ} 30'$, long. $97^{\circ} 40'$.

MARTEE KHAN KA TANDA, in Sind, a town on the route from Khyerpoor to Hyderabad, and 16 miles S.W. of the former place. Lat. $27^{\circ} 20'$, long. $68^{\circ} 36'$.

MARUDGEE.—A town in the British district of Dharwar, presidency of Bombay, nine miles E. of Dharwar. Lat. $15^{\circ} 29'$, long. $75^{\circ} 11'$.

MARUPOOR, in the British district of Furruckabad, lieutenant-gov. of the N.W. Provinces, a town on the route from Etawa to Futtehgurrh, and 13 miles S.W. of the latter. Lat. $27^{\circ} 14'$, long. $79^{\circ} 37'$.

MARWAR.—See JODHPORE.

MASHO.—A town in the dominions of

Gholab Singh, the ruler of Cashmere, situate on the left bank of the Sengé Khobab or Indus river, and 158 miles E. from Sirinagur. Lat. $34^{\circ} 1'$, long. $77^{\circ} 44'$.

MASIRANI, in Gurhwal, on the southern frontier, a peak on the range bounding the Dehra Doon to the north, and stretching along the left bank of the Aglar, a feeder of the Jumna. It is situate about five miles west of the sanatory station of Mussouree. Elevation above the sea 7,888 feet. Lat. $30^{\circ} 28'$, long. $78^{\circ} 7'$.

MASSEY.—A town in the territory of Oude, situate on the left bank of the Goomtee river, and 37 miles N.W. by N. from Lucknow. Lat. $27^{\circ} 20'$, long. $80^{\circ} 43'$.

MASTEE.—A town in the Mysore, 93 miles E.N.E. from Seringapatam, and 158 miles W. from Madras. Lat. $12^{\circ} 53'$, long. $78^{\circ} 3'$.

MASULIPATAM. — A British district, named from its principal place, within the limits of the presidency of Madras. It is bounded on the north by Hyderabad, or the territory of the Nizam; on the north-east and east by the British district Rajahmundry; on the south east by the Bay of Bengal; and on the south-west by the river Kistnah, dividing it from the British district Guntour. It lies between lat. $15^{\circ} 45'$ — $17^{\circ} 13'$, long. $80^{\circ} 5'$ — $81^{\circ} 49'$, and embraces an area, according to official return, of 5,000 square miles. The savacoast commences from the south-western or principal mouth of the Kistnah, and has a direction north-east for twenty-nine miles, to Point Divy, at the mouth of the great north-eastern branch of that river. The coast between these points is very low, and ships can scarcely sight it in some parts, shoals extending five or six miles seawards. It is conjectured, not without probability, that those shoals have been formed by the earth swept down the branches of the Kistnah during the rains. At Point Divy the shore takes a direction northward for fifteen miles, to the town of Masulipatam, where it turns to the north-east, following that direction for twenty-eight miles, and subsequently turns eastward for fifteen miles, forming an indenture in the coast, called the Bay of Masulipatam. Narsipore, situate just beyond the coast belonging to this district, at the eastern extremity of the bay, and on the eastern side of the mouth of the western branch of the Godavery, though having but eight or nine feet of water on the bar, and four or five fathoms inside, is the only port in the neighbourhood for shipping, even of that small draught, as the Chinnapuram Canal, which joins the sea at Masulipatam, admits boats only, and those but at high water, they being at other times excluded by a hard bar of sand. The low country extends inland and westward for between forty or fifty miles, and at some distance from the sea becomes more depressed than the shore, which is somewhat elevated by the sand thrown up by the waves, and raised by the winds into low ridges and hillocks. In one

place the depression is so great that the rains of the monsoons accumulating, form the lake of Colair, having an area of twenty square miles. Into this lake flow the redundant waters of the Kistnah and the Godavery, by channels proceeding from both rivers. As the waterways of these great streams, where they flow into the district, are much above the average level of its surface, probably no tract of equal extent has to a greater degree facilities for irrigation; yet, for ages, such was the disregard of this advantage, that the crops were allowed to depend on the annual amount of rain-fall, which is extremely precarious; and during three years, 1764, 1765, and 1766, so little rain fell, that the country was desolated; and it has been estimated that one-half of the population perished. The British government, alive to the importance of improving the means provided by the bounty of nature for averting such fearful results, has, at great cost, established an extensive system of irrigation, in connection with the rivers Godavery and Kistnah. In 1849, the sum of 91,000*l.* was authorized to be expended on the former river, and in the following year, 150,000*l.* on the latter. The hilly country commences about fifty miles inland, or westward from the coast, and attains its greatest elevation (about 1,700 feet) in the vicinity of Condapilly. In the geological formation, a variety of gneiss, which contains garnets instead of mica (though the latter sometimes co-exist), is the predominant rock. Sienite, limestone, granite, and other formations occur. At Malavilly, diamonds are found in a detritus consisting of a mixture of disintegrated sandstone, hornstone, iron-ore, and kunkar or calcareous conglomerate. Iron-ore abounds in many places, and roofing-slate, marble, and limestone are also met with. The great river Godavery throws off a branch, which, for a short distance, flows along the eastern boundary of this district towards Rajahmundry. Above the divarication, this river, during the season of inundation in June and July, rolls down in a rapid and deep current a mile wide. The Kistnah, flowing from the west, from the territory of the Nizam, touches on this district at its confluence with the Pallair, and turning south-east for eighty-five miles, separates Masulipatam from the British district Guntour as far as Beburunka, where it divides, sending to the southward one branch, which for twenty-five miles continues to separate the two districts as above, and then falls into the Bay of Bengal; and another, which, flowing south-east for twenty-eight miles, falls into the bay somewhat higher. The delta inclosed by these branches is traversed by others of less magnitude, which are numerous during inundations. The Moonyair, flowing from Hyderabad, or the territory of the Nizam, in a southern direction, falls into the Kistnah. The bed of the Kistnah is sandy, its channel deep, and the body of water considerable during inundation, but at other times rather scanty, so that it is of no avail for the purposes of navigation,

except at the estuaries of its various branches, which are in some instances navigable for small craft for a few miles from the sea. Its water is remarkably limpid, and free from any unpleasant or injurious admixture; and so considerable is its volume during inundations, that it fills the entire channel, which is at least a mile and a half wide. The seasons may be divided into the hot, rainy, and cold. The hot season commences in March, and ends in the first week in June; the rainy lasts from June until the end of October; the cold commences in November, and terminates about the end of February; and during this period the sky is generally clear, with a sharp wind from the north-east. March and April constitute the most disagreeable part of the year, the wind then setting in from the south-west, and being very relaxing and debilitating. May is the hottest month; but the excessive heat is mitigated by the sea-breeze, which sets in early in the afternoon. The commencement of the rains lowers the temperature many degrees. Of wild animals, there are the bear, hyæna, wolf, jackal, wild swine, wild buffalo, antelope, and hare: tigers infest the jungles and gorges of the hills in great numbers, and are of extraordinary size, one having been killed about fourteen or fifteen feet in length. The soil in the plain is alluvial, and very fertile, except in the vicinity of the seashore, where it is rather sandy. The cultivation of rice was formerly not considerable, though the soil was favourable to it; but with the extensive means of irrigation now available, its production in large quantities, and of a high degree of excellence, may be looked for. Various kinds of millet, maize, gram, and other pulse, oil-seeds, and other dry grain, are abundantly produced. Of commercial crops, the principal are chay-root (*Oldenlandia umbellata*), indigo and some other dye-stuffs, tobacco, and cotton. Of this last crop the quantity produced is sufficient to render it an article of exportation. A gradual falling off of late years in the revenue of this district tended to excite the suspicions of government, and led to an investigation, which resulted in the discovery of a gross system of fraud and oppression on the part of the native establishment.

Manufactures are few and insignificant, except those in cotton carried on in the town of Masulipatam. A trifling quantity of iron-ore is raised and smelted among the hills; but the diamond-mines, once celebrated, are now but little worked. The population is given under the article MADRAS. Masulipatam, the principal place, Condapilly, and Ellore, are described under their respective names in the alphabetical arrangement. The principal routes are—1. That from Calcutta, from north-east to south-west, along the coast, through Masulipatam and Ongole, to Madras; 2. in the same direction, but more inland, through Ellore, Guntoor, and Ongole, to Madras; 3. from south-east to north-west, from Masulipatam, through Bezawada, to Hydrabad. Masulipatam is one of the five Northern Circars which were obtained

by the French in 1753, and remained in their possession till 1759, when Clive transferred them to the East-India Company, to whom they were formally ceded in 1765, by the emperor of Delhi.

MASULIPATAM, the principal place of the British district of the same name, presidency of Madras, is situate on the Golconda coast, or western shore of the Bay of Bengal, and on the north side of the mouth of a branch of the river Kistnah. The shore is flat, and water very shallow, the depth in approaching it being not more than half a fathom for the distance of nearly a mile; consequently ships must be anchored four or five miles from land, and abreast of the town. During the north-east monsoon, from the middle of October to the middle of December, it is unfrequented by shipping. The Chinnapuram Canal, communicating with the sea about a mile and a half south-east of the fort, and passing close on the south side of its rampart, is navigable up to it for small craft, which ply with cargoes of bricks, tiles, and wood, and, proceeding past the town, joins the river Kistnah, about fifteen miles farther to the north-west. It can be entered from the sea, even by boats, only at high water, as at other times it is closed by a bar of hard sand, on which a violent surf beats, so as to dash to pieces any craft exposed to it. The town is situate in an extensive plain, stretching westward to the Ghats, and in an unhealthy marshy situation, the atmosphere having the characteristic odour of such pestiferous places, arising from the putrefaction of the lacustrine plants, the *Salicornia* principally. In the midst of this swamp, which is overflowed by the sea at spring tides, stands the fort, the ground-plan of which is an oblong rectangle, 300 yards in length and 600 in breadth, with high ramparts and a wide and deep ditch. Within this inclosure are the arsenal, the powder-magazine, the garrison hospital, and barracks for one European and one native regiment; a Protestant church and a Romanist chapel; besides several large houses. There is no good water within the fort, that used for drinking being brought from sources outside the walls. Formerly it was conveyed, by means of a covered channel, into a reservoir; but those works have been allowed to fall into decay. The cantonment and the pettah are situate on a slightly elevated ridge a mile north-west of the fort, four miles and a half in length, and one mile in breadth. It is highest near its south-west extremity: towards the native town, it falls so considerably, as to leave the greater part of both that and the cantonment but little raised above the level of the swamps when flooded. The pettah or native town is situate south-west of the cantonment, and has some wide and airy streets, tolerably straight and well built. In the middle of the pettah, at the spot where two principal streets cross each other, are placed erect, and arranged in a circular form, thirty-three large

slabs, of a compact limestone, covered with numerous figures, in basso and alto-rilievo, of the most exquisite execution. The delicate skill and taste displayed in the figures, their anatomical correctness, and the nature and freedom in their positions and attitudes, are said to rival the highest efforts of Italian genius. They were brought from the ruins of a pagoda about seven miles from this town; and some, at least, of the sculptured subjects are conjectured to be representations of the ceremonies of the Jain tribe. There is one large square in the native town, tolerably well built, and in which the markets are held. It bears the name of Mr. Robertson, a servant of the East-India Company, through whose exertions, when assistant to the collector here, it was made, and the vicinity much improved. Many of the houses in the town are large, and well built of brick and lime-mortar, with upper stories and tiled roofs; and even most of the dwellings of the poor are commodious and clean, in consequence of the neatness indispensably required for the manufacture of cotton fabrics, in which many of them are engaged. This branch of industry has of late years been somewhat circumscribed by the effects of the competition of British skill and capital, but it is still not inconsiderable. The operations carried on, include weaving, printing, bleaching, washing, and dressing tartans, gingham, towels, table-linens, and other articles; and the assiduous and provident habits of the people are indicated by their well-dressed creditable appearance. The population, according to the census of 1837, amounted to 27,884; of this number, 24,029 were Hindoos, and 3,855 Mussulmans; which last class comprised many persons from Western India and Persia, engaged in trade. Distance from Bangalore, N.E., 325 miles; Hyderabad, S.E., 195; Nellore, N.E., 135; Madras, N., 215. Lat. 16° 10', long. 81° 13'.

MATABHANGA.—A large watercourse in the Delta of the Ganges. Issuing from that river in lat. 24° 3', long. 88° 45', it takes a circuitous but generally southerly course for 103 miles, through the British district of Nudda, and falls into the Hoogly river in lat. 23° 9', long. 88° 26'. Its channel is said to have been formerly much deeper, and to have afforded the means of transit between Calcutta and the eastern portion of Bengal.

MATAN, in Cashmere, a karywa or tableland extending from the town of Islamabad to the base of the range inclosing the valley on the east. On a slight eminence at its western extremity, are situated the ruins of a very ancient building, which excites in all spectators feelings of admiration approaching to awe, by the elaborate skill displayed in its construction, and the simple, massive, and sublime character of its architecture. Hügel supposes that it was dedicated to the worship of the *linga*, and assigns the date of its erection to the period intervening between the waning of Buddhism

and the establishment of Brahminism. In common with others who have visited these ruins, he regrets the weakness of language to express the feelings to which they give rise. "My description unfortunately gives little conception of the impression produced by this simple majestic structure, which I class amongst the finest ruins of the world. The forms are throughout noble, and the embellishments often tasteful; but it is peculiarly characterized by the huge masses of which it is constructed; and the effect of these is heightened by the dark hue of the marble, and the desolation in which it stands in the most fruitful valley in the world." These ruins are situate in lat. 33° 42', long. 75° 21'.

MATCHUACAL.—A town in the British district of Tipperah, lieut.-gov. of Bengal, 27 miles W. by S. of Tipperah. Lat. 23° 22', long. 90° 46'.

MATEGAON, in the British territory of Saugur and Nurbudda, lieut.-gov. of the N.W. Provinces, a town on the route from Nagpore to Raingurh, 62 miles S.W. of the latter. Lat. 22° 8', long. 80° 21'.

MATHINGUMBO.—A town in the native state of Nepal, 71 miles E.N.E. from Khatmandoo, and 136 miles N. by E. from Durbunga. Lat. 28° 4', long. 86° 22'.

MATIL, in Keonthul, a village in the district of Poondur, and on the south-eastern declivity of the high ridge forming the greater part of it. Here, during the operations of the invasion of the Goorkhas, a body of about 6,000 of their troops gave a bloody defeat to the natives of Poondur, and utterly broke their power. Lat. 31° 1', long. 77° 39'.

MATTA BURAILLE.—A town of Malwa, in the native state of Bhopal, 70 miles E. from Bhopal, and 53 miles S.S.W. from Saugur. Lat. 23° 8', long. 78° 28'.

MAUCLY DROOG, in the Mysore, a hill fort, with a small town at its base, in the talook or subdivision of the same name, situate amidst the mountains north-west of Nundy Droog, from which it is distant 13 miles; from Bangalore, N., 33. Lat. 13° 26', long. 77° 34'.

MAUGRY, or **MAGERI**, in the Mysore, an ancient fortified town, the principal place of a talook or subdivision of the same name, situate on a rock, amidst dense and luxuriant forests, and separated by a deep rugged ravine, and a stream flowing through it, from the celebrated hill fort Savan Droog, situate four miles to the south-east. At Guttypoor, in its vicinity, is abundance of fine iron-ore, reducible into excellent iron and steel. The forests yield excellent sandal-wood, but its value has caused the trees to be cut with ruinous wastefulness. Maugry has a considerable tank and numerous ruined temples. Distance from Bangalore, W., 23 miles; Seringapatam, N.E., 53 miles. Lat. 12° 57', long. 77° 17'.

MAULMASEER.—A town in the territory of Oude, situate five miles W. of the right

bank of the Goomtee river, and 18 miles N.W. from Lucknow. Lat. $27^{\circ} 1'$, long. $80^{\circ} 50'$.

MAULPOOR, in Guzerat, or territory of the Guicowar, a town on the route from Mow to Deesa, 200 miles N.W. of former, 126 S.E. of latter. It is situate at the base of a low range of hills, has a bazar, and is supplied with water from wells and a tank, and belongs to a petty chief subject to the control of the British resident at Indor. Lat. $23^{\circ} 20'$, long. $73^{\circ} 28'$.

MAUMDOOR.—A town in the British district of North Arcot, presidency of Madras, 47 miles S.W. by W. of Madras. Lat. $12^{\circ} 45'$, long. $79^{\circ} 45'$.

MAUNDHOOM.—See PACHETE and BARABHOOM.

MAUNDEE.—A town in the British district of Burraboom, lieut.-gov. of Bengal, situate 114 miles W.N.W. of Calcutta. Lat. $23^{\circ} 4'$, long. $86^{\circ} 45'$.

MAUNDOOR.—A town in the native state of Sirgoolah, 40 miles N. from Sirgoolah, and 51 miles W. by S. from Palamow. Lat. $23^{\circ} 41'$, long. $83^{\circ} 13'$.

MAUNDVEE.—See MANDAVEE.

MAUNGUNGE, in the British district of Cawnpore, lieut.-gov. of the N.W. Provinces, a village on the route from the cantonment of Etawa to that of Cawnpore, and 50 miles W. of the latter. The road in this part of the route is good, the country cultivated. Lat. $26^{\circ} 21'$, long. $79^{\circ} 42'$.

MAUNKAIRA, or **MUNKERE**, in the Punjab, a town situate in the doab between the Jhelum and Indus. It is surrounded by a mud wall, and has a citadel built of burnt brick; but its principal defence is considered to be its position amidst arid sandhills, which afford no water to invaders. Runjeet Singh, when he invested it, at the close of 1821, supplied his troops at first with water carried for a considerable distance by beasts of burthen, and then without delay proceeded to dig an adequate number of wells. The siege was pressed with so much vigour and success, that the nawab, Hafiz Ahmed, surrendered to the Sikh ruler, on condition of being indemnified by a jaghire in the Derajat. Maunkaira is in lat. $31^{\circ} 18'$, long. $71^{\circ} 24'$.

MAUNSA, in Guzerat, or dominions of the Guicowar, a town near the right bank of the river Sabarmuttee: population estimated at 7,000. Distance from Ahmedabad, N., 30 miles; Baroda, N.W., 85. Lat. $23^{\circ} 26'$, long. $72^{\circ} 40'$.

MAUVINHOLA.—A town in the Mysore, 151 miles N.W. from Seringapatam, and 79 miles N. by E. from Mangalore. Lat. $13^{\circ} 58'$, long. $75^{\circ} 10'$.

MAYAKOT.—A town in the native state of Nepal, 193 miles W.N.W. from Khatmandoo, and 157 miles N.N.W. from Goruckpoor. Lat. $28^{\circ} 46'$, long. $82^{\circ} 25'$.

MAYAPOOR.—A town in the British district of Palamow, lieut.-gov. of Bengal, 11 miles S.W. by W. of Palamow. Lat. $23^{\circ} 45'$, long. $83^{\circ} 53'$.

MAYENOUNG.—A town in the British district of Pegue, situate on the right bank of the Irawady river, and 38 miles S. from Prome. Lat. $19^{\circ} 31'$, long. $94^{\circ} 27'$.

MAYUNEE.—A town in the British province of Sattara, presidency of Bombay, 40 miles E. by S. of Sattara. Lat. $17^{\circ} 25'$, long. $74^{\circ} 37'$.

MAZAGON.—A small village in the island of Bombay, distant direct from Bombay fort one mile and three-quarters. Mazagon has a dock for small vessels. Lat. $18^{\circ} 58'$, long. $72^{\circ} 53'$.

MAZUFURABAD, in the Punjab, a town at the confluence of the Jhelum and its great tributary the Kishengunga. It is a place of some importance, chiefly on account of its commanding position at the entrance of the Baramula Pass into Cashmere. There are ferries over both the Kishengunga and the Jhelum. The emperor Aurungzebe built a fort here, which was subsequently replaced by one of greater strength, erected by the Afghan governor Ata Mahomed. Lat. $34^{\circ} 24'$, long. $73^{\circ} 22'$.

MEADAY.—A town on the left bank of the Irawady river, in the British district of Pegue, 35 miles N. from Prome. This village was destroyed by fire on the retreat of the Burmese from Prome in 1825, and has been rebuilt near the frontier line separating Burmah from the British province of Pegue. Lat. $19^{\circ} 17'$, long. 95° .

MEAHSOO, in the Sindo Sagur Doab division of the Punjab, a town situated 12 miles W. from the right bank of the Chenaub, 71 miles N.N.E. of the town of Mooltan. Lat. $31^{\circ} 2'$, long. 72° .

MEAWALLEH, in the Sindo Sagur Doab division of the Punjab, a town situated on the left bank of the Indus, 70 miles N.N.W. of the town of Mooltan. Lat. $31^{\circ} 1'$, long. $70^{\circ} 57'$.

MEDDUCK.—A town in Hyderabad, or territory of the Nizam, situate on the right bank of the Manjera river, and 51 miles N. from Hyderabad. Lat. $18^{\circ} 4'$, long. $78^{\circ} 18'$.

MEDIRYEN COATA.—A town in one of the recently sequestered districts of Hyderabad, or dominions of the Nizam, situate nine miles S.E. from the right bank of the Kistnah river, and 20 miles N.E. from Moodgul. Lat. $16^{\circ} 13'$, long. $76^{\circ} 42'$.

MEDNA.—A town in the native state of Sonopoor, on the south-west frontier of Bengal, 20 miles W. by N. from Sonopoor, and 38 miles S.S.W. from Sumbulpoor. Lat. $20^{\circ} 58'$, long. $83^{\circ} 49'$.

MEEAHGUNJ, in the territory of Oude,

a town on the route, by Nanaman ghat or ferry, from Futtehgurh to Lucknow, 77 miles S.E. of the former, 34 W. of the latter. It was built towards the close of the last century, by the eunuch Almas Ali Khan, the able and powerful financial minister of Saadat Ali, nawaub vizier of Oude. Lord Valentia, who saw it in 1803, when inhabited by Almas, states that it contained his house, a large and neat structure, and three convenient serais; and adds, "It seems populous, and in a thriving condition, forming a complete contrast to the wretched villages we have hitherto met." Heber, twenty years later, found "trees, towers, gates, and palaces, sinking fast into rubbish and forgetfulness;" the park under crops of grain, and a poor bazar in the fort. The river Sace is traversed a little east of the town by a fine bridge, constructed partly of brick, partly of stone, by Almas, and since his death allowed to fall to ruin. Lat. 26° 48', long. 80° 33'.

MEEAN DOOAB.—A name sometimes given to the Julinder Dooab, which see.

MEEANEE, in the peninsula of Kattywar, province of Guzerat, a town situate in the prant or district of Burda, and lying on the south-western coast. Affording no shelter for shipping, its traffic is inconsiderable. Distant from Ahmedabad, S.W., 220 miles; Baroda, W., 240. Lat. 21° 50', long. 69° 31'.

MEEANEE, in Sind, a village on the route from Hyderabad to Cutch, and six miles S. of the former place, is situate on the left or eastern bank of the Indus. This village is in lat. 25° 20', long. 68° 20'.

MEEANEE, in Sind, a village on the banks of the Fulailee branch of the Indus, and six miles N. of Hyderabad. It will long be celebrated as the scene of a great victory obtained here by the Anglo-Indian army, under Sir Charles Napier, over a much more numerous force of the Belooches, headed by the amers of Sind. The British general, having ascertained by his emissaries that between 20,000 and 30,000 men, the finest troops of the Belooche nation, were drawn up on the banks of the Fulailee in his front, and that the lapse of another day would place nearly 30,000 more in his rear and on his left flank, moved forward to extricate himself from this threatening situation, and gave the enemy battle, on February 17th, 1843, though his own force amounted to but 2,800 men of all arms, and twelve pieces of artillery. The Belooche force actually on the ground amounted to 22,000 men, with fifteen pieces of artillery. After a close and obstinate engagement for above three hours, during which those brave barbarians showed desperate valour, the right of their position was carried by the Anglo-Indian cavalry, and their army totally routed, losing "artillery, ammunition, standards, and camp, with considerable stores, and some treasure." The British lost 256 men killed and wounded, the enemy about 5,000. Six of the principal

members of the Talpoor dynasty immediately surrendered themselves. A local monument has been erected over the remains of the British who fell in the battle. Meeanee is in lat. 25° 26', long. 68° 26'.

MEEANGUNJ.—See **MEEAHGUNJ**.

MEECHOO.—A tribe inhabiting a portion of the unsurveyed valley to the east of the native state of Bhotan. Lat. 27° 35', long. 93°.

MEEMBAH.—A town of Burmah, situate on the right bank of the Irawady, and 48 miles N. from Prome. Lat. 19° 28', long. 94° 57'.

MEENA.—A town in the British district of Dinajepoor, lieutenant-gov. of Bengal, 35 miles S.W. of Dinajepoor. Lat. 25° 15', long. 88° 11'.

MEENAPARA, in the Rajpoot state of Jeypore, a village on the route from Agra to Mow, 107 miles S.W. of former, 318 N.E. of latter, situate on the small river Bunhun. Lat. 26° 30', long. 76° 47'.

MEENUJ.—A town in the British district of Sholapoor, presidency of Bombay, 47 miles E.S.E. of Beejapoor. Lat. 16° 27', long. 76° 21'.

MEERANPOOR, in the British district of Mozuffurnuggur, lieutenant-gov. of the N.W. Provinces, a village on the route from Daranagar to Khutowlee, and 14 miles E. of the latter. Lat. 29° 17', long. 78° 1'.

MEERANPOOR KUTRA, in the British district of Shahjehanpoor, lieutenant-gov. of the N.W. Provinces, a town on the route from the town of Bareilly to Shahjehanpoor, and 27 miles S.E. of the former. It has a bazar, and is situate at the spot where the road to Futtehgurh passes off to the right from the direct line to Shahjehanpoor. Near this place, in 1774, the British army under Colonel Champion, supporting the cause of Shuja-huddawlah, nawaub of Oude, utterly defeated a greatly superior force of Rohilla Pathans. This engagement is variously named the battle of Cutterah or Kutra, of Futtehgunge, of Tessunah or Tessua, and of St. George. Kutra is in lat. 28° 2', long. 79° 43'.

MEEREE, in the Daman division of the Punjab, a town situated 48 miles W. from the right bank of the Indus, 120 miles S.W. by S. of the town of Peshawur. Lat. 32° 37', long. 70° 30'.

MEEREE KHO, or **NAMKIOO RIVER.**—The name given to the Irawaddy in the upper part of its course.—(See **IRAWADDY**.)

MEERGUNGE, in the British district of Goruckpore, lieutenant-gov. of the N.W. Provinces, a town situate on the route from Goruckpore cantonment to Lucknow, 28 miles N.W. of the former, 138 E. of the latter. It has a bazar, and is supplied with good water. The road in this part of the route is good. Lat. 26° 45', long. 83° 5'.

MEERGUNGE, in the British district of

Barcilly, *lieut.-gov. of the N.W. Provinces*, a town on the route from the town of Bareilly to Moradabad, and 21 miles N.W. of the former. It is inhabited by Rohilla Pathans, has a bazar and market, and is well supplied with water. Lat. $28^{\circ} 32'$, long. $79^{\circ} 16'$.

MEERGUNJE.—A town in the British district of Rajshaye, *lieut.-gov. of Bengal*, 116 miles N. by E. of Calcutta. Lat. $24^{\circ} 14'$, long. $88^{\circ} 43'$.

MEERGURH, in Bhawalpoor, a town in the desert extending through the eastern part of that state. The town consists of several dwelling-houses and a few shops, defended by a small brick-built fort: there is a good supply of water from wells, to which the cattle from a large tract of the surrounding desert have recourse. Meerghurh is in lat. $29^{\circ} 10'$, long. $72^{\circ} 52'$.

MEERHAUSER.—A river rising in Bundeelund, in lat. $24^{\circ} 39'$, long. $80^{\circ} 23'$. It holds a south-easterly course of about forty miles, and falls into the river Cane on the right side, in lat. $24^{\circ} 26'$, long. 80° .

MEERKHAN TANA.—A town in the British district of Kurrachee, province of Sind, presidency of Bombay, 74 miles N.E. of Kurrachee. Lat. $25^{\circ} 30'$, long. $67^{\circ} 58'$.

MEERPOOR, in the British district of Allygurh, *lieut.-gov. of the N.W. Provinces*, a village near the northern frontier, 50 miles S.E. of Delhi. Lat. $28^{\circ} 4'$, long. $77^{\circ} 48'$.

MEERPOOR.—A town in the dominions of Gholab Singh, the ruler of Cashmere, 92 miles S.W. from Sirinagur, and 113 miles N. from Lahore. Lat. $33^{\circ} 9'$, long. $73^{\circ} 50'$.

MEERPOOR.—A town in the British district of Hydrabad, province of Sind, presidency of Bombay, 40 miles E.N.E. of Hydrabad. Lat. $25^{\circ} 34'$, long. $69^{\circ} 2'$.

MEERPOOR, in Sind, a flourishing town near the left or eastern bank of the Pinyaree, a great branch of the Indus, and on the route from Cutch to Hyderabad. The surrounding country, which is fertile, well cultivated, and productive, yielded annually a revenue equal to 50,000*l.* to the ameer of Meerpoor, the least important and wealthy of the ameers of Sind. This town is of importance as commanding the line of communication between Cutch and Sind. Population 10,000. Lat. $24^{\circ} 41'$, long. $68^{\circ} 20'$.

MEERPUR.—See MEOPUR.

MEERUJ.—A town in the Southern Mahratta jaghire of Meeruj, situate 29 miles E.N.E. from Kolapoor, and 72 miles S.E. from Sattara. The revenues of the jaghire are returned at 17,502*l.* Its chief was bound to furnish a small contingent of horse to the British government, but the obligation has been commuted for a money payment. The young chief, Gungadhar Rao Bala, attained his majority some years since, and assumed the administration. Lat. $16^{\circ} 50'$, long. $74^{\circ} 42'$.

MEERUJGAON.—A town in the British district of Ahmednuggur, presidency of Bombay, 145 miles E. of Bombay. Lat. $18^{\circ} 46'$, long. $75^{\circ} 4'$.

MEERUNGLOOA.—A town of Eastern India, in the British district of Aracan, 51 miles W. of Aracan. Lat. $20^{\circ} 35'$, long. $92^{\circ} 38'$.

MEERUT.—A British district under the *lieut.-gov. of the N.W. Provinces*, named from its principal place. It is bounded on the north by the British district Mozuffurnugur; on the east by the British districts Bijour and Moradabad; on the south by the British district Boolundshuhur; and on the west by the British districts Paneeput and Delhi. It lies between lat. $28^{\circ} 33'$ — $29^{\circ} 17'$, long. $77^{\circ} 12'$ — $78^{\circ} 15'$; is about fifty-seven miles in length from east to west, and forty-eight in breadth: its area is 2,332 square miles. This district forms part of the Doab, and on the east is washed by the Ganges, which is navigable from the sea to Sukertal, a short distance north of the northern boundary; on the west it is separated from the adjacent districts by the Jumna, which, though at its exit from the mountains discharging 4,000 cubic feet of water in a second, is so reduced in volume by the draughts required to supply the canals of Delhi, of Feroz Shah, and of the Doab, that below the dam constructed for effecting that purpose, it can be crossed dry-shod; yet the under-current which percolates the gravelly bed, together with the drainage of the intermediate country, furnish a navigable stream of water at Agra, a distance of 260 miles by the river's course; and it is inferred from this example, that in abstracting the supply required for the Ganges Canal at Kunkul, the navigation of that river will not be injured below Cawnpore. The surface of the country rises in the middle of the Doab, so as to form a ridge of inconsiderable elevation, declining eastward to the Ganges, and westward to the Jumna. Along this high ground proceeds the line of the Ganges Canal, which, drawing its supply from the right side of that river, near Hurdwar, and traversing the middle of the Doab, discharges its redundant volume, or "tail-water," as it is technically termed, into the parent stream at Cawnpore. The line of this canal for about fifty miles passes through the district of Meerut. Besides the lateral slope of the surface east and west, to the two great bounding rivers, there is a general slope from north to south, as indicated by the course taken by the Ganges, Jumna, Hindun, East Kallee-Nudee, West Kallee-Nudee, and some other streams of less importance. From the levels taken for the construction of the Ganges Canal, the inclination of the surface in this district has been ascertained to average, in round numbers, a foot and a half per mile; the absolute elevation above the sea of the most northern and elevated part is about 900 feet. Muhammadpoor, on the northern boundary, is

894 feet above the sea; and the district being remarkably level, probably no spot throughout it is much higher. Faridnagar, close to the southern boundary, is 834 feet above the sea.

The climate is so favourable, that it produces nearly all the vegetables and fruits of Europe, as well as those of the tropics; and the same fields which in the cool season are covered with crops of wheat, are in the wet bearing sugar-cane, indigo, and cotton. The vicinity of the mountains, the comparatively high latitude, and considerable elevation, render the district one of the healthiest parts of the plain of India. The weather for five months, from November to March, is delightfully cool and invigorating. The prevailing winds are westerly and northerly, with little rain. In January, the ground in the morning is frequently covered with hoar frost, and woollen clothing and fires are found necessary to comfort. In April, the hot westerly winds commence, and, sweeping over the great sandy desert of Scinde and Rajpootana, are arid as well as sultry. The time immediately preceding the setting in of the rains, in the latter part of June, is rather unhealthy; but the heat diminishes, and an improvement takes place, after the commencement of the regular rainy season, which continues, with slight intermission, until the commencement of September. The last-mentioned month is cloudy, with little wind; occasionally extremely hot and exhausting, and altogether the most unhealthy period of the year. In October, though the days are very hot, the nights become gradually cool and pleasant. The population, according to the census of 1853, amounted to 1,135,072. Of these there are, Hindoos employed in agriculture, 427,785; Hindoos non-agricultural, 457,453; Mahometans and others, not being Hindoos, employed in agriculture, 82,350; non-agricultural, 167,484. Thus it appears that the majority of the inhabitants are Hindoo in creed and non-agricultural in occupation. The following classification of the towns and villages is drawn from the vernacular Mouzawar returns submitted by the collector of the revenue:—

Number containing less than 1,000 inhabitants. . .	1,077
Ditto more than 1,000 and less than 5,000	288
Ditto more than 5,000 and less than 10,000	5
Ditto more than 10,000 and less than 50,000	3
Total	1,373

The land-assessment is fixed for a term of years, which will expire on the 1st July, 1865.

After experiencing a full share of the vicissitude and suffering incidental to a state of society where war is the chief occupation, and conquest almost the only object of pursuit among kings and chieftains, Meerut was embodied into the empire of the Timurian sovereigns of Delhi. It was wrested from them by the Mahrattas, and formed part of the tract ceded to the East-India Company by Dowlut Rao Scindia, in 1803, under the treaty of Serjee Anjengaum. In this district the infamous Sunroo obtained a jaghire, which, on his death,

fell to his widow, the celebrated, or rather notorious, Begum Sunroo. Sunroo was either a Swiss or a German by birth: he had served in the French army, under the name of Walter Reinhard, but deserted, and in or about the year 1760 arrived in Bengal, where he bore the name of Walter Summers. After taking service under the English, the French, and divers native princes, he found in one of the latter a fitting master and suitable employment. Meer Cossim, known as the occupant of the musnud of Bengal in the interval between the expulsion of Jaffier Ali Khan and his subsequent restoration, thought him a proper instrument for effecting the massacre of a number of British prisoners. Sunroo, "nothing loth," accepted the office, and discharged it with atrocious fidelity. Forsaking Meer Cossim, when the star of that chief was on the decline, he served in rapid succession a variety of masters, from one of whom he received the jaghire in Meerut. The woman with whom Sunroo connected himself in marriage, was not unworthy of being the helpmate of such a man. She was a dancing-girl, of more than ordinary beauty and fascination; and to her blandishments Sunroo yielded himself a willing captive. She was not at once elevated to the rank of his wife. This step was the result of her own artful management; and when achieved, she perseveringly exercised the rights thereby attained, to raise herself to the actual enjoyment of all the powers derived from Sunroo's political station. Subsequently to the death of that respectable individual, she formed a matrimonial alliance with another European, named Vaisseaux or L'Oiseau, who had been an artilleryman in her service. The mode in which one of these husbands surrendered life was of a tragical character. Whether the result of jealousy, satiety, or some other cause, the Begum became anxious to get rid of her lord and master. To accomplish her purpose, she persuaded him that a plan had been laid for murdering both himself and her, and seizing on the jaghire, and urged him, thereupon, to collect without delay all the treasure that could readily be transported, and by flight save both their lives and a portion of their wealth. Having thus far succeeded, she extorted from her intended victim a vow, in which she joined, to the effect that, in case of their flight being intercepted, each party should by death secure escape from the probable consequences; and to enable her to effect this, should it become necessary, the lady, as well as her husband, carried arms. All arrangements being perfected, the fugitives with their treasure departed, under the cover of night; but scarcely had they passed the boundary of their own jaghire, than they encountered a party of troops, placed in the position which they occupied by order of the Begum. Resistance and recourse to flight seemed alike hopeless, and the report of a pistol from the Begum's palki, followed by loud cries from her attendants, assured the husband that his wife had performed her share

in their mutual engagement. Portions of her garments stained with blood were exhibited to confirm the impression; and under the influence of terror, more probably than of conscientious regard for his pledge, the entrapped victim followed the supposed example of his wife, and with a pistol terminated his earthly existence. The sanguinary farce was now at an end; the Begum returned, and resumed her usual habits of life. Of the actual occurrence of the catastrophe above detailed, there appears no room to doubt; but it is somewhat strange that the authorities by whom it is recorded, should not agree as to whether it were the first or the second husband who was the suffering hero in the direful drama. Other fearful acts of atrocity stain the name of this wretched woman; and among them the murder of one of her slave-girls stands pre-eminent for cruelty. By some it is said that the girl's crime consisted in her having attracted the favourable notice of one of the Begum's husbands; but whatever the offence, her barbarous mistress visited it by causing her to be buried alive. The time chosen for the execution was the evening; the place, the tent of the Begum; who, causing her bed to be arranged immediately over the grave, occupied it till the morning, to prevent any attempt to rescue the miserable girl beneath. Notwithstanding these and similar deeds, the Begum lived in great power and splendour, secure in her jaghire under all circumstances, and obtained from the English government a recognition of her right, when, by the course of events, the East-India Company became supreme lords of the territory. Remorse, if she ever felt it, did not shorten her days; she lived to be nearly ninety years of age, and on her decease, which took place in 1836, the jaghire, including the town of Sirdhannah, lapsed to the British government.

MEERUT, the principal place of the British district, and also of the pergunnah of the same name, under the lieut.-gov. of the N.W. Provinces, is situated nearly in the middle of the district, being distant twenty-five miles from the Ganges on the east, and thirty from the Jumna on the west. The Kalee Nuddee flows about three miles to the eastward of the town, and a small branch from it passes through the station. The slope of the country is gentle towards the south; and the Kalee Nuddee, the banks of which are low and marshy, is lost in the widely-spread inundation during the rainy season, but at other times it is a small stream. The soil of the surrounding country is sandy, with a subsoil of kunkar or calcareous conglomerate, and it is covered with grass all the year round. The ruined wall of the town is extensive, inclosing a considerable space, throughout which are scattered "some good architectural remains of mosques and pagodas;" but the houses are wretchedly built, and the streets narrow and dirty. The most important structure in every point of view is the English church: Heber considered it much the largest

which he had seen in India; and its organ as one of the best. The building is 150 feet long, eighty-four wide, and being galleried all round, can contain 3,000 persons. It has a high and handsome spire, and its appearance is striking; but the materials are very flimsy, being bad brick overlaid with stucco. The expense of its building was partly defrayed by grant from government, partly by funds raised by subscription; among the contributors to which it is for many reasons somewhat remarkable, that the Begum Sunroo was the most considerable, that extraordinary personage professing the Romish faith, while her life was little calculated to reflect credit upon any creed.

The cantonment of the British force stationed here is two miles north of the town, and is divided into two parts by a small branch of the Kalee Nuddee, over which are two handsome bridges, one built by the East-India Company, the other by the Begum Sunroo. On the northern side of the stream are lines for the accommodation of a brigade of horse-artillery, a European cavalry corps, and a regiment of European infantry, respectively separated from each other by intervals of several hundred yards. In front is a fine parade-ground, a mile in width and four miles in length, having ample space for field-battery practice and the manœuvres of horse-artillery. Upon the extreme right is the heavy battery. The headquarters of artillery for the presidency of Bengal have been lately removed from Dum Dum to this place. Overlooking the parade are the barracks, with stables, hospitals, riding-schools, canteens, and other military offices. In the rear of the barracks and in a continued line three deep, are the bungalows or lodges of the officers, each surrounded by a garden about a hundred yards square. The barracks consist of a series of separate brick-built low-roofed structures, each consisting of one large and lofty room, surrounded by a spacious inclosed veranda, divided into apartments for the non-commissioned officers and the families of married men. On the opposite side of the stream are the cantonments of the native infantry, who have no barracks, but are quartered in mud huts: the officers are accommodated with detached bungalows. There is water at the depth of from eight to fifteen feet in the wells of the station: the quality is brackish, except from a few wells lined with brick, and for the most part constructed by the Mah-rattas. Medical authorities consider the air very healthy for Europeans. In three years, a European regiment 1,120 strong lost only sixty men. The establishment of a military prison in this town has been sanctioned as an experimental measure, with the view of ascertaining the practicability of substituting local imprisonment for the present inefficient punishment of transportation. In hot weather, large quantities of ice are consumed, though to obtain a supply, it has been the practice to resort to a very tedious and laborious process. In mid-winter, a number of wide shallow earthen pans,

each containing water to the depth of half an inch, are arranged over a layer of straw or sugarcane-leaf, and in chill nights become covered with ice an eighth or a fourth of an inch thick. These laminae are carefully collected and stored in pits, lined throughout with thick layers of straw and reeds, and the water which drains off is received into a well of greater depth than that of the pit. The ice, when wanted for use, is wrapped in a coarse blanket, and conveyed to the place where required, in large baskets thickly padded with cotton. About 280 labourers and forty water-carriers employed in this way in a winter, produce 160,000 lb. of ice.

Meerut is noted for the hospitality of its residents, both civil and military, its amusements, and varied social enjoyments. At one time there were no less than five theatres, affording to the inhabitants and visitors the pleasure of dramatic performances; four of these Thespian establishments being supported by the privates of the several regiments. The population of the town, according to the latest return, is 29,014 inhabitants.

Probably the first authentic mention of Meerut is by Ferishta, who relates that the town, in the year 1017, capitulated to Mahmud of Ghuzni, and paid him a ransom of 250,000 dinars and thirty elephants. In 1327 it baffled the attack of Tarmasherin Khan, the formidable Mogul invader, from whom the king of Delhi had been obliged to purchase peace. In 1399 it fell before the sanguinary fury of Tamerlane, whose troops took it by escalade, sacked it, and demolished the walls. "The Gahrs were all flayed alive, their women and children made slaves, the houses burned, the walls razed, and the whole place reduced to dust and ashes."

The elevation of Meerut above the sea has not been accurately ascertained; but an approach to a correct estimation of it may be made by reference to the respective heights of Sirdhana, twelve miles to the north-west of Meerut, up the course of a canal, and that of Furreednuggur, sixteen miles south of it, lower down the slope of the country. The former is 882 feet, the latter 834 feet above the sea. Distance from Calcutta, *via* Delhi, 930 miles. Lat. 28° 59', long. 77° 46'.

MEERZAPOOR.—A town in the British district of Shikarpoor, province of Scinde, presidency of Bombay, 11 miles S. of Shikarpoor. Lat. 27° 51', long. 68° 39'.

MEETANEE.—A town in the British district of Hyderabad, province of Scinde, presidency of Bombay, 106 miles N. by W. of Hyderabad. Lat. 26° 52', long. 68°.

MEETANEE.—A town in the peninsula of Kattywar, province of Guzerat, 18 miles N. from Rajkote, and 160 miles W. by N. from Baroda. Lat. 22° 32', long. 70° 46'.

MEETEEYEE, in the British district of Allypurl, lieutenant-gov. of the N.W. Provinces, a village on the route from the city of Agra to

Allypurl cantonment, and 29 miles N. of the former. Lat. 27° 33', long. 78° 6'.

MEETHEEPOOR, in the British district of Etawa, lieutenant-gov. of the N.W. Provinces, a village on the route from the cantonment of Agra to that of Etawa, and 16 miles N.W. of the latter. Lat. 26° 57', long. 78° 53'.

MEETTEE.—A town in the British district of Hyderabad, province of Scinde, presidency of Bombay, 96 miles S.E. of Hyderabad. Lat. 24° 45', long. 69° 50'.

MEETYALLA.—A town in the peninsula of Kattywar, province of Guzerat, situate 80 miles S.S.E. from Rajkote, and 100 miles E.S.E. from Poorbunder. Lat. 21° 12', long. 71° 17'.

MEGANEE, or **MEENGANA,** in the Punjab, a thriving manufacturing town three or four miles from the left or eastern bank of the Chenaub. Lat. 31° 10', long. 72° 12'.

MEGNA.—The name by which the Brahmapootra river is known during the lower part of its course. (See **BRAHMAPOOTRA.**)

MEHANEE.—A river rising in lat. 24° 2', long. 85° 16', ten miles W. of Hazareebagh, in the British district of Ramgurl, and flowing in a northerly direction for thirty miles through Ramgurl, and thirty-three through the British district of Behar, falls into the Lilajun river a few miles above the town of Gayah, and in lat. 24° 44', long. 85° 4'.

MEHDOORA.—A town in the Rajpoot state of Jodhpoor, situate 161 miles W. by S. from the town of Jodhpoor. Lat. 25° 50', long. 70° 39'.

MEHEDPOOR.—A town in one of the outlying possessions of Indore, or the territory belonging to the Holkar family. It is situate on the right bank of the river Seepa, in the angle formed by the confluence of a small feeder. Abreast of the town, the Seepa is traversed by the route from Neemuch, by means of ferry; but a short distance farther up, or more to the south, by a deep ford. The ground on the left bank of the Seepa was, in 1817, the scene of the decisive victory obtained by the British over the army of Holkar, whose power was in consequence effectually and irretrievably overthrown. The Mahrattas were commanded, at least ostensibly, by Mulhar Rao Holkar, and strongly posted on the left bank, behind batteries containing about seventy guns. The British army, commanded by Sir Thomas Hislop, crossed the river by the ford above the town, and in front of the left of the enemy's position, distant about 800 yards, and advancing under a murderous fire from the numerous and well-served Mahratta batteries, took them at the point of the bayonet, and routed the whole army. The enemy's camp, sixty-three guns, many of large calibre, and the ammunition-tumbrils, fell into the hands of the British, who, however, had 174 killed, including three European officers, and 604 wounded, of whom thirty-five were European

officers. The loss of the Mahrattas was estimated at 3,000 men. The victory was decisive; no further serious resistance was made; and in the treaty of Mundesor, concluded a few weeks afterwards, Holkar submitted to such terms as reduced him to the condition of an insignificant and virtually dependent power. Elevation above the sea 1,600 feet. Distance N. of Indor 53 miles, N. of Oojein 23, W. of Saugor 200, S.W. of Gawlior fort 250, S.W. of Agra 300. Lat. 23° 30', long. 75° 40'.

MEHINDERGUNJE.—A town in the British district of Mymensing, lieut.-gov. of Bengal, situate 24 miles N.W. by N. of Jumalpoor. Lat. 25° 11', long. 89° 52'.

MEHMOODABAD.—A town in the British district of Kaira, presidency of Bombay, eight miles N.E. of Kaira. The streets of this town are level, broad, and clean. Lat. 22° 49', long. 72° 45'.

MEHOAR, or **MEHEWA**, in the British district of Allahabad, lieut.-gov. of the N.W. Provinces, a village on the route, by Rajapoor ferry, from Allahabad cantonment to Banda, and 25 miles W. of the former. Lat. 25° 26', long. 81° 34'.

MEHOONBARA.—A town in the British district of Candeish, presidency of Bombay, 27 miles E. of Malligaum. Lat. 20° 33', long. 74° 55'.

MEHUM, or **MOHIM**, in the British district of Rohtuk, lieut.-gov. of the N.W. Provinces, a town on the route from Hansi to Delhi, and 24 miles S.E. of the former. It was formerly a large and important commercial town, but is now ruinous, though having still a good bazar, and a population of 5,660 inhabitants. Here is a very fine baoli or well, 130 feet deep, lined with stone, and having stairs of the same material twenty feet wide, reaching to the surface of the water. Lat. 28° 58', long. 76° 21'.

MEIL GHAUT.—A town in one of the recently sequestered districts of Hyderabad, or territory of the Nizam, on the left bank of the Taptee river, and 38 miles N.W. from Ellichpoor. Lat. 21° 38', long. 77° 15'.

MEINAH COTE, in the British district of Shahjehanpoor, lieut.-gov. of the N.W. Provinces, a village on the route from Pilleebheet to Oude, and 16 miles E. of the former. Lat. 28° 41', long. 80° 8'.

MEINGHEOUNG.—A town of Burmah, situate on the left bank of the Irawady river, and 79 miles N. from Prome. Lat. 19° 54', long. 94° 54'.

MEINTSTEIN.—A town of Burmah, situate 40 miles E. of the left bank of the Irawady, and 34 miles S.W. by S. from Ava. Lat. 21° 29', long. 95° 43'.

MEKRAIME.—A town in the British province of Pegue, situate on the right bank of the Martaban river, 35 miles N. from Martaban or Salween river. Lat. 17° 1' long. 97° 38'.

MELAKERI, in the Rajpoot state of Alwur, under the political superintendence of the Governor-General's agent for Rajpootana, a town on the route from Jeypoor, by Rajgurb, to the town of Alwur, and 15 miles S. of the latter. The soil of the surrounding country is sandy, but not arid, fresh water being everywhere obtainable in shallow wells. Lat. 27° 23', long. 76° 42'.

MELLYPORE, in the British district of Bhagulpore, lieut.-gov. of Bengal, a town, the principal place of the pergunnah of the same name. It is situate pleasantly on the river Angjana, and contains 300 houses. Distant 28 miles S.W. of city of Monghyr. Lat. 25° 1', long. 86° 17'.

MELOUN, a river of the Amherst district of the Tenasserim provinces, presidency of Bengal, rises in lat. 17° 3', long. 93° 27', and, flowing in a circuitous but generally westerly direction forty-five miles, falls into the Gyein river, in lat. 16° 32', long. 97° 43'.

MELOWN.—A village in Burmah, situate on the left bank of the Irawady river. Here, on the 2nd January, 1826, were arranged the terms of a treaty between the British and the Burmese, which, on the part of the latter, were never intended to be confirmed. Upon the expiration of the armistice which had been agreed to, in view to the ratification of the treaty, Melown was taken by storm, and the document, which it was pretended had been transmitted to Ava, was found in the lines. Distant S.W. from Ava 105 miles, N. from Prome 148. Lat. 21°, long. 94° 39'.

MENBOO.—A town of Assam, in the British district of Sudiya, 30 miles N.W. of Sudiya. Lat. 28° 10', long. 95° 26'.

MENDAT.—A town of Eastern India, in the British district of Tavoy, province of Tenasserim, 119 miles N.N.W. of Tenasserim. Lat. 13° 43', long. 98° 28'.

MENDURDA.—A town in the peninsula of Kattywar, province of Guzerat, situate 72 miles S.S.W. from Rajkote, and 51 miles S.E. by E. from Poorbunder. Lat. 21° 20', long. 70° 30'.

MENIL.—A town in the British district of North Arcot, presidency of Madras, 50 miles W. of Madras. Lat. 13° 4', long. 79° 36'.

MEOPUR, in the district of Aldeman, territory of Oude, a village on the south-eastern frontier, towards the British district of Azimgurb, and 55 miles S.E. of the city of Oude. Lat. 26° 11', long. 82° 43'.

MEOREE, in the British district of Bareilly, lieut.-gov. of the N.W. Provinces, a village on the route from the town of Bareilly to Seetapoor, and nine miles S.E. of the former. Lat. 28° 21', long. 79° 35'.

MEPRAN.—A town of Eastern India, in the British district of Amherst, province of Tenasserim, situate 51 miles S.E. of Moulmein. Lat. 15° 55', long. 98° 13'.

MER and SER, in the north of the Punjab, two mountain-summits, which rise to great height and with sublime effect, fifty or sixty miles east of the eastern boundary of the valley of Cashmere. In their regular conical form they as closely resemble each other as though they had been cast in the same mould, but they differ in hue, one being completely white, the other as uniformly black. They seem to be situate close together; and if this be the case, they must be nearly of the same height. No explanation appears to have been given of the singular fact, that, being of the same height, and situate in the same latitude, one is covered with perpetual snow, the other quite bare. Hügel considers them identical with the Kantal Mountain of the early maps of Cashmere; but Vigne is of opinion that the Kantal is the lofty mountain south of the Buitul Pass. Hügel clearly viewed them at Vizirabad, in the plain of the Punjab, overtopping the Panjals of Cashmere, and many other intervening mountains, though the distance is not less than 140 miles. Mer and Ser may be considered situate about lat. 34° , long. $76^{\circ} 10'$.

MERGUI, a town, the capital of the British district of the same name, in the Tenasserim provinces of Bengal, is situate on the principal mouth of the Tenasserim river. It is built along an uneven hill about 200 feet in height, and has a fine commanding position. The town is about three miles in circuit, and inclosed by a stockade fourteen feet high, with bastions at each angle. The houses of the English residents are built at the top of the hill, and face the sea: here also are situate the barracks, hospital, and cantonments, as well as a few pagodas. The streets of the town are wide, but dirty and ill-drained: the houses are built chiefly of wood, and raised on piles from the ground. The bazar is always furnished with a plentiful supply of every necessary article of food and raiment. The soil near the town consists of a reddish loam, lying on a substratum of gravel, composed of quartz and pebble: argillaceous petrifications are found in the vicinity, and the clay contains lime. Specimens of tin-ore, discovered in the vicinity, have been pronounced to be of superior quality. Coal has been found, but serious objections appear to have been taken to its use. The harbour is spacious, secure, and easy of access and egress for ships of any size: the town is inaccessible for ships of large burthen, as there is a bank which obstructs the stream. Horsburgh, however, says that it commands a good inland navigation. Its exports are sapan-wood and sandal-wood, palm-leaves for roofing, ratans, yams, dried fish, ivory, tortoise-shell, Nipa-palm toddy, and edible birdsnests.

Notwithstanding that the vicinity of the town is low and damp, and the monsoon violent and protracted, the situation is exceedingly salubrious, probably from being exposed to the cool sea-breezes: there is always a bracing elasticity in the air. There is generally a

detachment of European soldiers here, and the paucity of deaths among them is striking: between the years 1829–1836, only two died from disease, out of a number of 226. The population of the town amounts to 8,000; consisting of English, Chinese, Burmese, Siamese, and Malays. The place was taken by the British during the war with the Burmese, after a feeble resistance, and confirmed to the conquerors, with other territory, by the treaty of Yandabboo, concluded in February, 1826. The district of which this town is the principal place will be found noticed under the article TENASSERIM PROVINCES. The town of Mergui is in lat. $12^{\circ} 27'$, long. $98^{\circ} 42'$.

MERGUI ARCHIPELAGO.—The Mergui Archipelago, consisting of a large cluster of islands, fronts the southern extremity of the coast of Tenasserim. They are generally high and mountainous, and, with the exception of those which are mere rock, covered from their summits to the water's edge with rich and varied foliage, presenting altogether a beautiful and pleasing variety of scenery. Their elevation in one or two instances exceeds 3,000 feet. Most of them appear to belong to the same formation, consisting of granite, which is occasionally intersected by veins of quartz. In some, black slate and sandstone prevail; in others, iron-ore is known to exist. The chief production is the edible birdsnest, found generally on the rocky islands, which are collected and sold by the inhabitants of some of the islands, as well as by the Malays and Chinese, who annually visit them for the purpose of procuring this article. Pearls are found on the coasts of many of them, and oysters abound in the numerous rocks about the Archipelago. The wild animals infesting the forests of the islands, are the tiger, elephant, rhinoceros, and deer. The feathered tribe is numerous, and consists of various kinds of pigeons, gulls, and cranes. The channels between some of the islands are dangerous and intricate, while others are very accessible, and have safe anchorage. The inhabitants are a roving race, having no fixed abode, but shifting from one island to another, in the rainy season preferring the inner, and during the fine weather the outer islands: they are uncivilized and ignorant, but timid and inoffensive. The men employ themselves in fishing, and the women in making a kind of mat, which is sold at Mergui: they are healthy and robust, but indolently disposed. The origin of these people has never been ascertained: they carry on a small bartering trade with the people of Mergui, getting in exchange for their mats, birdsnests, and pearls, divers articles of food and clothing. Among the principal islands in the Archipelago are the Great and Little Canister, King's Island, Cahossa, Bentinck, Donel, Kisseraing, Sullivan's, and St. Matthew's.

MERIAHDO.—A town in Bundelkund, 44 miles S. from Chatterpore, and 66 miles E.N.E. from Saugur. Lat. $24^{\circ} 17'$, long. $79^{\circ} 41'$.

MERKARA, in the British province of Coorg, a town the seat of the civil government of the district, and a military cantonment. It is situate at the south-east angle of an oblong table-land, the declivities from which on the north and east are gentle, but on the other sides dip precipitously to the lower country, to the extent of 500 or 600 feet. There are no morasses or lakes in the neighbourhood, but a small river rises near the town. Numerous springs also afford water, which is collected in large stone tanks. The fort of Merkara is situate on an isolated eminence, the summit of which has been levelled for the purpose. The lines for the native troops are on the south and south-west slopes of the hill, and are rather airy and clean, a stream of water running immediately below them. The fort is an irregular heptagon, having at each of six angles a round bastion, and at the other a gateway. The defences consist of a single strong wall of stone, twelve feet high and ten thick, with a parapet of masonry five feet high and four thick. There is no water within the fort, which is in other respects not tenable against an attack, being commanded by many points within breaching distance. Contiguous are a public bungalow or lodge for travellers, a jail, a revenue office, and, in a large handsome square building adjoining, are a catchery or court house and the office of the resident. The palace of the deposed rajah, at no great distance, is a large, substantial, castellated building, in a good style, with numerous windows in front. It is now occupied as a public treasury and storerooms, and as quarters for the officers. There is a separate barrack for the small detachment of European artillery of between twenty and thirty men: there is also an hospital. A church has been recently erected, the necessary funds being raised by private subscription, aided by a large contribution from the government. The population is chiefly composed of the British local authorities and military, with the numerous dependants and followers of both: to these must be added a few natives of Mysore, who are generally tradesmen and shopkeepers, brought to the place by the former. The climate is salubrious, and especially favourable to the European constitution. Merkara was built in 1773, by Hyder Ali, who, ill-instructed in fortification, chose a site which no works could render defensible against a regular attack. Given up to the rajah by the British, after it had been ceded by Tipoo Sultan, at the pacification of 1792, it was, on the contumacious conduct of the first-named prince, in 1834, occupied without resistance by a British force under Colonel Lindsay; and, the rajah being soon after deposed and deported to Benares, the present British establishments were formed. Elevation above the sea 4,506 feet. Distance from Cannanore, N.E., 47 miles; from Mangalore, S.E., 130; from Bangalore, S.W., 130; from Seringapatam, W., 64; from Madras, W., 315. Lat. 12° 24', long. 75° 48'.

MEROO, in Bussahir, a village of the district of Koonawar, is situate about a mile from the right bank of the Sutlej, near the confluence of a feeder called the Joola. The houses have flat roofs covered with clay. This locality is nearly the most southern limit of the maturity of the grape, which, lower down, cannot be successfully cultivated, on account of the periodical rains of summer. At the time of the visit of Jacquemont, in 1830, the rajah of Bussahir had formed a road from Rampoor to this place, at the instance of the East-India Company, who on that consideration had remitted a portion of his tribute. Elevation above the sea 8,580 feet. Lat. 31° 32', long. 78° 11'.

MERRIWALLEH, in the Daman division of the Punjab, a town situated on the right bank of the Indus, 74 miles S.W. of the town of Mooltan. Lat. 29° 23', long. 70° 40'.

METAMIO.—A town of Eastern India, in the British district of Tavoy, province of Tenasserim, 151 miles N.N.W. of Tenasserim. Lat. 14° 16', long. 98° 35'.

METCALF ISLAND, situate 50 miles off the coast of Tenasserim, among the group forming the Mergui Archipelago. Lat. 12° 18', long. 97° 53'.

METTOOR.—A town in the British district of North Arcot, presidency of Madras, 30 miles W.N.W. of Arcot. Lat. 13° 3', long. 79°.

METZA.—A town of Eastern India, in the British district of Amherst, province of Tenasserim, 32 miles N. of Moulmein. Lat. 16° 57', long. 97° 45'.

MEWASSEE, or **MOWASSEE**.—The chiefs subject to the jurisdiction and political superintendence of the Rewa Caunta agency, in the province of Guzerat, presidency of Bombay, and residing principally on the banks of the Nerbudda, are styled Mewassee. The district they inhabit, lies between lat. 21° 49' and 22° 5', long. 73° 30' and 74° 10'.

When the political control and superintendence over these chiefs became vested in the British government, the supremacy of the Guicowar over them ceased; and thus was abandoned the right of a ruinous interference in their affairs, which had been long cherished as the source of a large though indirect emolument to the superior state and its officers. In proportion, however, as the people betook themselves to cultivation, and waste land was resumed, there was reason to apprehend that boundary disputes would arise, and old dormant claims to land be revived. To meet these evils, the best provision practicable was made; and as, in such a country, crimes attended with violence were most to be apprehended, steps were taken for their suppression with a strong hand, and for the introduction of a regular-administered system of criminal justice, to which the country was previously a stranger. It was decided that

all persons charged with capital offences, such as gang-robbery or murder, within the territories of these chiefs, should be tried before a court of justice, to be styled the Rewa Caunta Criminal Court, in which the resident and three or four chiefs should sit as assessors. This was established in the year 1839; and it is said that the results have been found satisfactory.

MEWHOWN.—A town of Eastern India, in the British district of Amherst, province of Tenasserim, 89 miles S.E. of Moulmein. It is situate on the Zimme, a river which afterwards, under the name of Attaran, flows into the Bay of Bengal. Lat. $15^{\circ} 32'$, long. $98^{\circ} 37'$.

MEYHAR.—See MYTHI.

MEYSANA.—A town in Guzerat, or the dominions of the Guicowar, 105 miles N.N.W. from Baroda, and 42 miles N.N.W. from Ahmedabad. Lat. $23^{\circ} 35'$, long. $72^{\circ} 21'$.

MEYWAR.—See OODEYPOOR.

MEYWASA.—A town in the peninsula of Kattywar, province of Guzerat, situate three miles from the right bank of the Bhader river, and 32 miles S.W. from Rajkote. Lat. $21^{\circ} 51'$, long. $70^{\circ} 40'$.

MHAR, in the presidency of Bombay, a town at the west base of the Ghats, and on the small river Sawitri, navigable from the sea to this place, a distance of thirty miles. Distance from Bombay, S.E., by sea and by the river Sawitri, 100 miles; direct, 75. Lat. $18^{\circ} 6'$, long. $73^{\circ} 30'$.

MHENDAWUL, in the British district of Goruckpore, lieutenant-gov. of the N.W. Provinces, a small town three miles from the right bank of the river Raptée, two from the north shore of the Moti Jhil, or Pearl Lake, 20 miles N.W. of Goruckpore cantonment. Buchanan, writing forty years ago, assigns it 500 houses; and assuming six persons for each house, the population may consequently be estimated at 3,000. Lat. $26^{\circ} 57'$, long. $83^{\circ} 9'$.

MHENDDEGUNJ, in the district of Purbagurh, territory of Oude, a town three miles south of the right bank of the river Sae, 90 S.E. of Lucknow. It is a busy, thriving place, the population of which is estimated by Butter at 20,000. Lat. $25^{\circ} 53'$, long. 82° .

MHIDURGEE.—A town in the British province of Satara, presidency of Bombay, situate 152 miles E. of Sattara. Lat. $17^{\circ} 26'$, long. $76^{\circ} 21'$.

MHILOG, a small hill state under the superintendence of the Governor-General's agent for the Cis-Sutlej states, is bounded on the north by Hindoor; on the east by the rajah of Pateala's territory and by Kothar; on the south by Beja; and on the west by the Pinjor Doon and by Hindoor. It is about fifteen miles in length from north to south, and seven in breadth from east to west: its centre is in lat. 31° , long. $76^{\circ} 57'$. This territory is estimated to yield a revenue of 1,000*l.* per annum,

out of which it pays a tribute to the British government of 144*l.* The population in 1832 was estimated at 13,000. Mhilog is one of the petty states wrested from the Goorkhas by the results of the war of 1814, and assigned by British authority to the present family.

MHOOL.—A town of the Deccan, in the state of Nagpoor or Berar, situate 82 miles S.S.E. from Nagpoor, and 160 miles S.E. by E. from Ellichpoor. Lat. $20^{\circ} 5'$, long. $79^{\circ} 42'$.

MHOW, in the territory of Indore, a British cantonment 13 miles S.W. of the town of Indore, situate in a clayey tract resting on basalt. It has altogether the appearance of a European town, having a church with steeple on an eminence, a spacious lecture-room, and library well furnished with books, and a theatre. The cantonments are occupied by a considerable force, and the officers are sufficiently numerous to be enabled to form a society independent of external intercourse. The military force was stationed here in pursuance of Art. VII. of the treaty of Mundesor. The town of Mhow is situate on the Gumbir river, on an eminence one and a half mile north-west of the cantonments. Elevation of cantonments above the sea 2,019 feet. Distance S.E. from Neemuch 142 miles, S.E. from Nusseerabad by Neemuch 272, S. from Oojein 42, S.W. from Saugur 215, S.W. from Agra 375, S. from Delhi 435. Lat. $22^{\circ} 33'$, long. $75^{\circ} 46'$.

MHOW, in the British district of Azimgurh, lieutenant-gov. of the N.W. Provinces, a town situate on the eastern route from Ghazeepore to Goruckpore, 57 miles S. of the latter, 34 N. of the former. It is described by Garden as a large straggling town on the right bank of the Surjoo (North-Eastern Tons), which is crossed by a very good ford just below the town. Distance N.E. from Benares 55 miles. Lat. $25^{\circ} 54'$, long. $83^{\circ} 37'$.

MHOW, in the British district of Meerut, lieutenant-gov. of the N.W. Provinces, a village on the route from the town of Meerut to that of Moradabad, and 11 miles S.E. from the former place. It is situate in an open country, partially cultivated, but not to such a degree as to yield abundant supplies. Distant N.W. from Calcutta by Delhi 930 miles. Lat. $28^{\circ} 54'$, long. $77^{\circ} 54'$.

MHOW, in the British district of Allygurh, lieutenant-gov. of the N.W. Provinces, a town on the route from the cantonment of Allygurh to that of Etawah, and 27 miles S.E. of the former. It has a bazar and market, and is supplied with water from wells. The road in this part of the route is good; the country open, with a soil rather sandy, but well cultivated. Lat. $27^{\circ} 34'$, long. $78^{\circ} 16'$.

MHOW, or **MUH,** in the British district of Allahabad, lieutenant-gov. of the N.W. Provinces, the principal place of the pergunnah of the same name, a town on the route from Allahabad to Purbagurh, and 17 miles N.W. of the

former. It has a bazar, and supplies and water are abundant. The road in this part of the route is good, the country level and partially cultivated. Lat. 25° 39', long. 81° 52'.

MHOWLEE KHAS, in the British district of Goruckpoor, lieut.-gov. of the N.W. Provinces, a small town, yet the principal place of the pergunnah of Mohowli. Here is a residence of a native chief, built on a heap of brick-rubbish, the ruins of some great building of remoter date. There is also a rude native fort, consisting of a rampart inclosing a few buildings, and surrounded by dense wood. Lat. 26° 36', long. 83°.

MHUR.—A town in the British district of Poonah, presidency of Bombay, 59 miles N. of Poonah. Lat. 19° 21', long. 73° 50'.

MHUSLA.—A town in the native territory of the chief of Jinjeera, presidency of Bombay, situate 60 miles S. by E. from Bombay, and 80 miles N. from Rutnageriah. Lat. 18° 8', long. 73° 11'.

MHUSWUR.—A town in the British province of Sattara, presidency of Bombay, 51 miles E. of Sattara. Lat. 17° 39', long. 74° 51'.

MHYE.—See **MYHEE**.

MIANE, in Sirhind, a village on the left bank of the Sutlej, here crossed by a ferry affording communication with the Punjab. The river is here a noble piece of water, and continues so until broken by shoals several miles lower down. Distant N.W. from Calcutta 1,147 miles. Lat. 31° 4', long. 75° 18'.

MIANEE, in the Punjab, a small town on the right or west bank of the Ravee, which is here, when fullest, 513 yards wide and twelve feet deep. It is on the great route from Loodianah, by Amritsir, to Attock, and the Ravee is crossed at this place by a much-frequented ferry. In the cold season, when the river is lowest, it can be forded. Lat. 31° 49', long. 74° 32'.

MICHENKHEYL, in the Daman division of the Punjab, a town situated 20 miles W. from the right bank of the Indus, 111 miles S.S.W. of the town of Peshawur. Lat. 32° 31', long. 70° 58'.

MIDNAPORE, a British district within the lieut.-gov. of Bengal, named from its principal place. It is bounded on the north by the British districts of Paroolia, Bancoora, and Burdwan; on the north-east by that of Hoogly; on the south-east by the British district of Hijellee; on the south by the Balasore division of Cuttack; on the south-west by the Cuttack tributary nihal Mohurbunja; and on the west by Paroolia. It lies between lat. 21° 41'—22° 57', long. 86° 36'—87° 59', and has an area of 4,015 square miles. It is traversed by numerous rivers and torrents, all taking a direction south-east, thus indicating the declivity of the country towards that point, and ultimately discharging themselves into the

estuary of the Ganges, or the Bay of Bengal. The principal of these are the Soobunreeka and the Kosai or Cossya. These great streams inscuate with numerous others of less dimensions, and during the monsoons the country is overspread by a reticulation of torrents and watercourses. At the same season, jhils or small lakes abound, but they become contracted, or else totally disappear, during the dry season. On the sea-shore, salt is an important object of manufacture.

From its intertropical position and slight elevation, the climate of Midnapore is, in the latter part of the spring and early part of the summer, extremely hot, the thermometer ranging from 80° to 95° in the shade; and in that season the country seems a desert. The monsoon rains setting in at the close of June, lower the temperature, and cause luxuriant vegetation. The cool season lasts from October to February, during which interval the average temperature is about equal to that of midsummer in Central Europe. The population is given under the article **BENGAL**.

The principal routes are, 1. From north to south, from Bancoorah to Cuttack, through the town of Midnapore; 2. from east to west, from Calcutta to Nagpore: the other lines of communication appear to be merely tracks through wilds. The territory comprised in this district was acquired by the East-India Company in 1760, by sunnud or grant from Cossim Ali Khan, nawab of Bengal.

MIDNAPORE, a town, the principal place of the British district of the same name, is situate on the route from Calcutta to Cuttack, 68 miles W. of former, and 179 N.E. of the latter. Here is a good bazar, well supplied, especially with provisions, and the town being situate on the left bank of the river Kosai or Cossy, water is also abundant. The school established here is under the government of a local committee, composed of the chief official persons resident in the town. It is conducted by a head-master, who is a European, who has under him several assistant-masters. Midnapore is in lat. 22° 24', long. 87° 33'.

MIEMUMMAW.—A town of Eastern India, in the British district of Mergui, in the Tenasserim provinces, 55 miles N.N.W. of Tenasserim. Lat. 12° 50', long. 98° 47'.

MILAPOOR, or **ST. THOME**.—A town in the British district of Chingleput, presidency of Madras, four miles S. of Madras. Lat. 13° 1', long. 80° 20'.

MILCHIA.—A town in the native state of Nepal, 23 miles S. by E. from Khatmandoo, and 65 miles N.E. from Bettiah. Lat. 27° 23', long. 85° 22'.

MILLICK, in the jaghire of Rampoor, lieut.-gov. of the N.W. Provinces, a village on the route from Bareilly to Moradabad, and 26 miles N.W. of the former. The road in this part of the route is good; the country open, fertile, and highly cultivated. Lat. 28° 37', long. 79° 13'.

MIL—MIR.

MILUM, in the British district of Kumaon, lieutenant-gov. of the N.W. Provinces, a small town, the principal place of the Bhotia subdivision of Juhahir, on the route to Hiundes or Chinese Tartary, and 13 miles S. of the Juhahir Pass. Elevation above the sea, of temple, 11,706 feet; of town, 11,430; of bridge across the river Goree, 11,368. Lat. 30° 25', long. 80° 11'.

MINDAWAR, or **MANDOWR**, in the British district of Muttra, lieutenant-gov. of the N.W. Provinces, a town on the left bank of the Jumna, eight miles N. of the city of Agra. Lat. 27° 17', long. 78° 2'.

MINDPOORA.—A town of Malwa, in the native state of Dhar, 15 miles S. by W. from Dhar, and 152 miles W. from Hoosungabad. Lat. 22° 43', long. 75° 22'.

MIRCHA, in the British district of Goruckpore, lieutenant-gov. of the N.W. Provinces, a village on the route from Azingurh to Goruckpore cantonment, 38 miles N. of the former, 23 S. of the latter. It has a few shops, and some supplies may be collected from the surrounding country, though much overrun with jungle. Lat. 26° 28', long. 83° 14'.

MIREANEE, in the British district of Cawnpore, lieutenant-gov. of the N.W. Provinces, a village on the route from the cantonment of Futtehghurh to that of Cawnpore, and 17 miles N.W. of the latter. Lat. 26° 38', long. 80° 15'.

MIRGAHUN GHAT, in the British district of Muzuffurnugur, lieutenant-gov. of the N.W. Provinces, a station on the left bank of the Jumna, at a ferry on the route from Kurnool to the town of Meerut, and six miles south-east of the former. Lat. 29° 38', long. 77° 6'.

MIRGANJ, in the British district of Furruckabad, lieutenant-gov. of the N.W. Provinces, a station on the route from Cawnpore to Futtehghurh, and 40 miles S.E. of the latter. It is situate on the right bank of the Ganges, crossed here by a ferry, formerly much frequented, but now in a considerable degree superseded by that of Nananow, nine miles lower down the river. Lat. 27°, long. 80° 3'.

MIRHAKOOR, in the British district of Agra, a town on the route from the city of Agra to Jeypore, and 10 miles W. of the former. It has a small bazar. The road in this part of the route is good, the country well cultivated. Lat. 27° 9', long. 77° 55'.

MIROT, in the jaghire of Juhur, lieutenant-gov. of the N.W. Provinces, a village near the left bank of the Hansouti nulla, a torrent widely spreading during the rains. Lat. 28° 34', long. 76° 37'.

MIRPOOR, in the British district of Boolundshuhur, lieutenant-gov. of the N.W. Provinces, a village on the route from Allyghur cantonment to that of Delhi, and 26 miles N.W. of the former. The road in this part of the route is good: the country open, with a sandy

soil, scantily cultivated. Lat. 28° 12', long. 77° 57'.

MIRTA, in the Rajpoot state of Jodhpoor, a town on the route from the city of Jodhpoor to that of Ajmeer, and 76 miles N.E. of the former. It stands on high ground, and viewed from without, has a striking appearance. The wall which surrounds it, is on the western side built of mud, on the eastern of good masonry. There are several temples, and in the middle of the town a large and lofty mosque. There is a manufactory of felt here; and the bazar is well constructed, but has an impoverished look, this town having suffered much from the attacks of hostile troops; in consequence of which the number of houses has been seriously diminished. The present number of houses is 8,000, supplied with good water from three large tanks, the first at the north-west angle of the city, the second close to the east of Ajmeer gate, and the third about a quarter of a mile south-east of the second. The water from the wells is brackish. The population, according to Boileau, is 25,950. Lat. 26° 40', long. 74° 9'.

MIRUN KE SARAE, in the British district of Furruckabad, lieutenant-gov. of the N.W. Provinces, a town on the route from the cantonment of Cawnpore to that of Futtehghurh, and 33 miles S. of the latter. It has a very fine sarai, whence its name, and the tomb of the founder, in a garden on the opposite side of the road. There is a bazar, and water is abundant. Lat. 27° 1', long. 79° 59'.

MIRYAGUNJE.—A town in the British district of Backergunje, lieutenant-gov. of Bengal, 122 miles E. of Calcutta. Lat. 22° 22', long. 90° 19'.

MIRZA MOORAD, in the British district of Benares, lieutenant-gov. of the N.W. Provinces, a village on the route from Allahabad to the city of Benares, 61 miles E. of the former, 13 W. of the latter. The road in this part of the route is excellent; the country level, wooded, and cultivated. Lat. 25° 17', long. 82° 50'.

MIRZAPOOR.—A town in the British district of Cuttack, lieutenant-gov. of Bengal, 30 miles N.E. of Cuttack. Lat. 20° 43', long. 86° 17'.

MIRZAPOOR.—A town in the British district of Purneah, lieutenant-gov. of Bengal, two miles W. of Purneah. Lat. 25° 46', long. 87° 31'.

MIRZAPORE, within the limits of the lieutenant-gov. of the N.W. Provinces, a British district, named from its principal place, is bounded on the north by the British districts Jounpoor and Benares; on the east by the British districts of Shahabad, Behar, and Palamow; on the south by Sirgooja; and on the west by the territory of Rewa and the British district of Allahabad. It lies between lat. 23° 50'—25° 30', long. 82° 11'—83° 39', and has an area of 5,235 square miles. The

Ganges, when first touching the district, sweeps for about twelve miles round the north-western corner, in a direction first southerly, then easterly, when it passes into the district, through which it holds a sinuous but generally easterly course of about seventy miles, and flowing by the city of Mirzapore and the fort of Chunar, reaches the northern frontier, along which it pursues its course for about eight miles farther, and finally leaves the district six miles above the city of Benares. The average elevation of the waterway of the Ganges at the north-western corner of the district, where it is highest, is about 310 feet above the sea; close to Benares, where lowest, 272. Throughout the ninety miles of this part of its course it is navigable at all times, and probably for craft of fifty or sixty tons burthen. In the lower part, its depth, according to Jacquemont, who viewed it in midwinter, when lowest, is about fifty feet; its breadth he states to be great. At the town of Mirzapore, forty-five miles higher, he describes it, at the same season, as half a mile wide, of considerable depth in the middle, and at the margin two or three feet deep. The Sone, flowing from the Rewa territory, after passing the western frontier of the district, flows through it in a direction from west to east for about fifty-two miles, and then crosses the eastern frontier into the British district of Behar. It is described by Blunt as a considerable river even in the dry season, with a bed half a mile wide, and a rapid stream a hundred yards wide, with about three feet water in the deepest part. The Rehund river enters the district at the south-western corner, and flowing in a north-easterly direction for twenty-three miles, subsequently in a northerly direction for twenty-nine miles, finally falls into the Sone. The Kunlur enters the district at the opposite or south-eastern corner, and, flowing in a north-westerly direction for thirty-five miles, also falls into the Sone.

The northern portion of the district, being part of the lower valley of the Ganges, partakes of its alluvial character. There are some exceptions, however, as between the city of Mirzapore and Chunar is a range of rocky and uneven hills of sandstone, rising at the fort of Chunar into an abrupt rock of considerable height. These eminences are no doubt connected with the low sandstone range running nearly east and west, a few miles further south, and denominated by Franklin the Bindachal Range, from the town of Bindachal, at its northern base. This range is horizontally stratified, micaceous and schistose towards the base, finer-grained towards the summit, where it is of a light colour, and, being well suited for building, is extensively used at Mirzapore and Benares. Its elevation is about 500 feet above the sea, or 250 above the adjacent valley of the Ganges, the upper surface forming a sort of table-land, diversified by numerous small eminences. South of this the land rises, as a sort of huge terrace, into another table-

land, having an elevation of probably 800 or 900 feet, being part of the north-eastern extremity of the great Vindhya range, which overspreads the whole southern part of the district, and gives it a rugged, barren, and savage character.

In a country promising in a geological point of view, the mineral wealth does not appear considerable: the sandstone of Chunar and its vicinity is extensively quarried for building; the kunkar or calcareous conglomerate affords excellent lime; native soda is found at the Tara and Kutra passes; iron-ore at Lalganj, sixteen miles south-west of the city of Mirzapore; fine slate south of the Sone; and on the northern bank of that river coal-fields have been discovered.

Amidst the jungly hills and valleys of the southern part of the district, the air is represented to be, during the hot and rainy seasons, so pestilential as to prove inevitably fatal to Europeans and to many natives; yet, in the beginning of February, Blunt experienced a frost of six days, a consequence, without doubt, of the elevation of the country. Even in the city of Mirzapore, on the bank of the Ganges, fires are desirable during the mornings and evenings of the winter season. In the latter part of spring and the early part of summer, before the mitigating effects of the periodical rains have been felt, the heat is dreadful, especially in the vicinity of the rocks of Chunar. It is said that the station and the city of Mirzapore are rather unhealthy, from the circumstance of the land being high toward the bank of the river, and lower at some distance; by which much stagnant water is produced. It is also stated that the soil of the town of Mirzapore, and the land adjacent to it, is so strongly impregnated with saline particles, as materially to injure buildings composed of bricks and mortar.

Respecting the botanical character of the country, Jacquemont observes, "Doubtless the *Borassus flabelliformis* (species of palm), the palmyra-tree of Europeans, and the tar of the Hindoos, acquires maturity here, though I have not seen it in this tract; the mango predominates; next the tamarind and various sorts of *minosa*; oranges do not succeed well; the *Casuarina muricata* is occasionally met with in the gardens, but stunted, and distorted. There are various species of the *terebinthine* family, nearly devoid of leaves: they are probably *spondias*. The cotton cultivated in the vicinity of the city is probably the *Gossypium herbaceum*, with short coarse wool. The sugar-canes, which cover a vast extent of ground, are about the thickness of the finger, and a yard in length." The above description of the cotton grown here does not appear to correspond with that given at a more recent period, when it was stated that the cotton of this district is of good quality, strong, rather fine, of long staple, and making a durable cloth. The produce of the vicinity, however, forms but a small part of the cotton brought to

market at the town of Mirzapore, which is the greatest cotton-mart in India, and where the cottons of the Doab, Oude, Bundelcund, the Saugor and Nerbudda territory, and even of parts of Malwa and Nagpore, are collected for transmission to the lower provinces. Indigo is produced to some extent, and sugar is a very important article of cultivation, as this part of the valley of the Ganges is the principal sugar district of India. The principal alimentary crops are wheat, barley, bajra (*Holcus spicatus*), various sorts of millet, maize, pulse, oil-seeds of different kinds, ginger, turmeric, chillies, hemp (which is cultivated for its intoxicating property), melons, cucumbers, and other products. The usual esculent vegetables of Britain succeed well in the cool season, or that comprehending the close and commencement of the year.

The population is almost exclusively Hindoo, the Mahomedans being comparatively few. The latest census gives the total number at 1,104,315; of which 649,120 are enumerated as Hindoo and agricultural, 380,778 as Hindoo non-agricultural; while the Mahomedans and all others not being Hindoos amount only to 15,364 agricultural, and 59,053 non-agricultural. There are some native members of the English church, and a few descendants of native converts to the church of Rome. The principal places are Mirzapore, Chunar, and Lalganj. The chief military routes are—1. From north to south, from Jounpore to the city of Mirzapore, and continued southward to Agori. 2. From north-east to south-west, from Benares to the city of Mirzapore, and continued in the same direction to Rewa and Saugor. 3. From east to west, from Chunar to the city of Mirzapore, and continued in a north-westerly direction to Allahabad. This road, made under the inspection of engineer officers of the East-India Company's service, is represented to be such as would do credit to any country; and it turns the great thoroughfare by which the valuable products of Bundelcund and the Saugor and Nerbudda territories are conveyed to the banks of the Ganges for transport down the river.

The tract forming this district, probably at the remotest period of Hindoo history was part of the realm of Kasi, the capital of which was the neighbouring city of Varanasi or Benares. About the beginning of the eleventh century, it was subjugated by the sovereigns of Gour, from whom it was wrested at the close of the same century, by the sovereigns of Canouj; and on the overthrow of this last state by Muhammad of Ghor, in 1193, it became subject to the Mahomedan sovereigns of Delhi. In 1529 it was subjugated by Baber. On the dismemberment of the empire of Delhi, consequent on the invasion, in 1760, of Ahmed Shah Dooranee, it formed part of the spoil seized by Shujah-ud-daulah, nawaub vizier of Oude, by whom a part was ceded to the East-India Company under the treaty of 1775, and the remainder by the treaty of 1801.

MIRZAPORE, the principal place of the district of the same name, a town situate on a bank of kunkar, on the right side of the Ganges, here half a mile wide, and when lowest, deep in the middle, shallow towards the edges. The communication with the opposite bank is maintained by public ferry at the Naughat, over which troops and stores are passed free of charge. Its appearance to those passing it by water is imposing, from its great extent, numerous mosques and Hindoo temples, excellent houses of Europeans, and handsome ghats or flights of stairs leading to the water's edge. On closer examination, however, the aspect of the place does not improve: the houses of the Europeans, which are the best of the dwellings, occur only at considerable intervals; the native town is of great extent, but consists mainly of three long, wide, straight streets, along the sides of which are rows of trees and of wells. Those wells are surrounded by a circular platform, and have large mouths, so that many persons can draw water at once, without incommoding each other; and several are tasteful specimens of architecture. The houses for the most part are, however, built of mud or of unbaked brick, though the vicinity contains abundance of excellent building-stone: they are seldom more than two stories high. There is no appearance of grandeur or antiquity in this city, though much of business and bustle. Its manufactures of carpets and other strong woollens, of cottons and of silks, as well as some others of less importance, are considered to be on the decline, and it derives its present importance principally from the fact of its being the greatest cotton-mart in India. The city and its vicinity are said to abound with lawyers, drawn thither by the great amount of litigation, resulting from the active commerce of the place. The great wealth in transit and in store here likewise invites the presence of various classes of thieves. The civil establishment consists of a judge, a collector, a deputy-collector, a collector of customs, and other functionaries for the due administration of the public business. The population of this city is returned at 79,526. The military cantonment is situate three miles north-east of the city, in a sort of peninsula formed by the winding of the Ganges. In the distribution of the Bengal army, Mirzapore is included within the Benares division.

The importance, and perhaps the existence of this place seems to be of very recent date: it does not appear to be mentioned in the Ayeen Akbery. Tieffenthaler, who drew up his description of India between 1760 and 1770, mentions it under the name of Mirzapur the Greater, as a mart, and as having two ghats giving access to the Ganges. It is laid down in Rennell's Atlas, published in 1781, but not mentioned in the accounts of the march of the British army from Buxar to the vicinity of Allahabad, though the

route must have lain through or near it. Distant E. from Allahabad, keeping to the right of the Ganges, 61 miles; keeping to the left of that river, and crossing by the ferry opposite Mirzapore, 53 miles; from Benares cantonment, S.W., 27 miles; from Calcutta, N.W., by land 448 miles, by water 721 miles, or if by the Sunderbund passage, 898 miles. Lat. 25° 6', long. 82° 38'.

MIRZAPORE CHHOTA (THE LESS), in the British district of Mirzapore, a town on the route from Chunar to Dinapore, 10 miles N.E. of the former. Supplies and water are abundant here, the town being situated on the right bank of the Ganges, in a well-cultivated country, studded with groves of mangoes. Lat. 25° 12', long. 83° 4'.

MIRZI, or **MIRJAN**, in the British district of North Canara, presidency of Madras, a town on an inlet of the Arabian Sea, or North Indian Ocean. According to Horsburgh, "the entrance of the river is between two bluff points; that on the south side has the deepest water, close to which is the proper channel over the bar, where are two and three-quarters and three fathoms water between the point and sand-banks in the middle of the entrance, on which the sea generally breaks." But though the depth of water is sufficient for vessels of considerable burthen, the channel is so narrow as to admit only those of small size. Both the town, and a fort which formerly protected it, are now very ruinous, in consequence of the injuries it suffered in a siege by Hyder Ali, and subsequently from the oppressive government of Tippoo, his son. It was formerly called Midijay, corrupted by the Mussulmans into Mirzi and Mirjan. Distance from Mangalore, N., 115 miles; from Bombay, S., 325; Mangalore, N.W., 236; Madras, N.W., 408. Lat. 14° 30', long. 74° 29'.

MISREEKOTA.—A town in the British district of Dharwar, presidency of Bombay, 16 miles S.E. of Dharwar. Lat. 15° 16', long. 78° 8'.

MISREEPOOR, in the British district of Cawnpore, lieut.-gov. of the N.W. Provinces, a town on the route from Cawnpore to Jeetpoor, 38 miles S.W. of the former. Lat. 26° 5', long. 80°.

MISROWLI, in the British district of Benares, lieut.-gov. of the N.W. Provinces, a village on the left bank of the Ganges, 656 miles N.W. of Calcutta by water; 13 N.E., or farther down the stream, than Benares. Lat. 25° 24', long. 83° 15'.

MISSEERPOOR, in the territory of Oude, a village on the route from Banda to Purbagurb, 11 miles W. of the latter, 125 E. of the former. Lat. 25° 55', long. 81° 48'.

MISSIRPOORA, in the British district of Mirzapore, lieut.-gov. of the N.W. Provinces, a village on the right bank of the Ganges, 31 miles N.W. of the city of Mirzapore;

750 N.W. of Calcutta. Lat. 25° 16', long. 82° 20'.

MISSRIK.—A town in the territory of Oude, 47 miles N.W. by N. from Lucknow, and 68 miles N. by E. from Cawnpore. Lat. 27° 27', long. 80° 38'.

MITEEGOREM.—A town of the Deccan, in the state of Nagpoor or Berar, 167 miles S.S.E. from Nagpoor, and 210 miles N. by W. from Masulipatam. Lat. 19° 5', long. 80° 25'.

MITHA BEREER, a village in the British district of the Dehra Doon, and near the right bank of the Asun. It was a station of the series of small triangles in the great trigonometrical survey of the Himalaya. Elevation above the sea 2,189 feet. Lat. 30° 19', long. 78° 2'.

MITHUN KOTE, or **MITTUN KOTE**.—A town in Sinde, near the western bank of the Indus, close to the confluence of the Punjoud, or stream conveying into it the united waters of the Punjab. Burnes found the Indus here, at the latter end of May, before the swell attained its height, 2,000 yards wide. Later in the season, the adjacent country, to a great extent, is overflowed, and becomes one uninterrupted expanse of water, as the land is, for a considerable distance on each side of the river, on a low level. At this time of year the climate is unhealthy. Mithun Kote is admirably situated for commanding the trade of the Indus throughout its whole extent; and hence has by some been recommended as a convenient site for an annual fair, where the traders of Afghanistan and of Central Asia might be supplied with Indian and British goods; but its insalubrity is a great objection to such a selection. It is surrounded with flourishing date-groves. Elevation above the sea 220 feet. Population 4,000. It is 460 miles from the sea, in lat. 28° 57', long. 70° 29'.

MITPULLY.—A town in Hyderabad, or dominions of the Nizam, 109 miles N. from Hyderabad, and 174 miles S.E. from Ellichpoor. Lat. 18° 54', long. 78° 41'.

MITTAN TOWANAH, in the Sinde Sagur Doab division of the Punjab, a town situated 20 miles W. from the right bank of the Jhelum, 123 miles W.N.W. of the town of Lahore. Lat. 32° 20', long. 72° 15'.

MITTANEE, in the Daman division of the Punjab, a town situated 33 miles W. from the right bank of the Indus, 12 miles S.W. of the town of Peshawur. Lat. 33° 46', long. 71° 25'.

MITTEETOKUR.—A town in the territory of Oude, 33 miles W.S.W. from Lucknow, and 15 miles N.E. by N. from Cawnpore. Lat. 26° 40', long. 80° 30'.

MOBEE.—A town of Burmah, situate 142 miles S.S.E. from Ava, and 154 miles N.E. from Promé. Lat. 20° 5', long. 97°.

MODERAH, in the Rajpoot state of Jodhpore, a village on the route from Nusserabad

to Deesa, and 155 miles S.W. of the former. It is situate in a country occasionally studded with hills, but generally level, with a gravelly soil, free from jungle, and partially cultivated. Lat. 25° 18', long. 73° 10'.

MODHORAJPOORA.—A town in the Rajpoot state of Jeypoor, situate 27 miles S.S.W. from Jeypoor, and 66 miles E. from Ajmeer. Lat. 26° 34', long. 75° 45'.

MODIBENI.—A town in Nepal, situate on the left bank of one of the branches of the Gunduck, and 119 miles W. by N. from Khatmandoo. Lat. 28° 15', long. 83° 29'.

MODOOPOOR.—A town in the British district of Ramgur, lieutenant-gov. of Bengal, 52 miles E. of Hazareebagh. Lat. 23° 56', long. 86° 13'.

MODUL, in the Rajpoot state of Jodhpoor, a village on the route from Nusseerabad to Deesa, and 134 miles S.W. of the former. The road in this part of the route is firm and good, and passes through a gravelly country, partially cultivated. Lat. 25° 27', long. 73° 24'.

MOEYONG, one of the Coosya hill states, bounded on the north by that of Muriow; on the east by Osimlee; on the south by Mahran; and on the west by Nustung: it contains an area of 110 square miles, and its centre is in lat. 10° 20', long. 91° 27'.

MOGLOOR CHIKA (or THE LESS).—A town in the Mysore, near a tank, and close to the source of the Yagachi river, in the rough country forming the east declivity of the Western Ghats. Distance N.W. from Seringapatam 88 miles. Lat. 13° 18', long. 75° 51'.

MOGOUNG MYO.—A town of Burmah, situate 167 miles E. by N. from Muneepoor, and 190 miles S.S.E. from Sudiya. Lat. 25° 18', long. 96° 39'.

MOGRA, in the Rajpoot state of Jodhpoor, a village on the route from Neemuch to Jodhpoor, and 11 miles S. of the latter. Supplies are scarce, and must be previously collected. The water is brackish; both that supplied from wells, and that from a small rill. Lat. 26° 8', long. 73° 10'.

MOGULPOOR, in the British district of Moradabad, lieutenant-gov. of the N.W. Provinces, a village on the route from Hurdwar to the town of Moradabad, and seven miles N.W. of the latter. Lat. 28° 56', long. 78° 47'.

MOGULPOOR, or **MUGHALPOOR,** in the territory of Oude, a town on the right bank of the Chanka, here called the Ul, a stream tributary to the Ghaghra, 65 miles N. of Lucknow. Lat. 27° 45', long. 80° 55'.

MOGUL SERAI, in the British district of Benares, lieutenant-gov. of the N.W. Provinces, a town on the route from Hazaribagh to Benares, 177 miles N.W. of the former, 12 S.E. of the latter. It has a bazar. Lat. 25° 16', long. 83° 12'.

MOGUL SURYE.—A town of Malwa, in

the native state of Tonk, or territory of Ameer Khan, 11 miles N. from Sironj, and 78 miles W.N.W. from Saugur. Lat. 24° 16', long. 77° 40'.

MOHAN, in the territory of Oude, a town on the route from Futtehgurh, by Nanamau ghat or ferry, to Lucknow, 17 miles W. of the latter. It is situate on the left bank of the river Saeo, here crossed by a permanent bridge. Lord Valentia styles it a village, but observes that it had the appearance of having anciently been of more consequence, the soil being filled for a considerable distance with a mixture of brick and lime. Lat. 26° 46', long. 80° 45'.

MOHANA, a river in the district of Boghelkhand, territory of Rewa, rises near the village of Rypoor, and in lat. 24° 32', long. 81° 32'. The elevation above the sea, of its source, must exceed 900 feet, as at Keuti, twenty-five miles farther north, and the same distance lower down the stream, the elevation of the waterway is 923 feet. At that place, passing from the plateau of Rewa, over the brow of the Kutra ridge, to the more depressed country farther north, it is precipitated down a fall of 362 feet. It thence turns to the north-east, and is discharged into the Tons, on the right side, in lat. 24° 57', long. 81° 35', after a total course of thirty-eight miles.

MOHANAH.—A town in the British district of Panceput, lieutenant-gov. of the N.W. Provinces, situate on the route from the city of Delhi to Jheend, and 35 miles N.W. of the former. Lat. 29° 2', long. 76° 55'.

MOHANE.—See **PHALGU**.

MOHAREE.—A town of the Deccan, in Nagpoor or Berar, situate 39 miles E.N.E. from Nagpoor, and 130 miles S. from Jubhulpoor. Lat. 21° 19', long. 79° 43'.

MOHGAON.—A town of the Deccan, in Nagpoor or Berar, situate 43 miles N.W. from Nagpoor, and 54 miles E. by S. from Baitool. Lat. 21° 38', long. 78° 45'.

MOHNE, in Koonawur, a district of Busahir, is a fortress, with a celebrated Hindoo temple dedicated to Badrinath, and crowned by a ball of pure gold, said to weigh fifteen or twenty pounds. It is situate on the southern declivity of the great Ruldung Mountain, and in a pergunnah or division bearing the name of Kumroo. Lat. 31° 26', long. 78° 19'.

MOHODA.—A town in Nagpoor or Berar, situate 20 miles E. from Nagpoor, and 110 miles E.S.E. from Baitool. Lat. 21° 9', long. 79° 29'.

MOHOL.—A town in the British district of Sholapoor, presidency of Bombay, 19 miles W.N.W. of Sholapoor. Lat. 17° 48', long. 75° 42'.

MOHOLI, or **MAHOWLY,** in the territory of Oude, a small town on the route from Bareilly to Lucknow, 89 miles S.E. of the former, 67 N.W. of the latter. It has a bazar, and is well supplied with water. Lat. 27° 40', long. 80° 32'.

MOHON.—A river of Sirgoojah, on the south-west frontier of Bengal, rising in lat. 23° 11', long. 83° 18', and flowing for eighty-five miles first westerly, and then northerly, falls into the Rheru or Rehund, on the right side, in lat. 23° 50', long. 82° 51'.

MOHONA, or MAHONA, in the territory of Gwalior, or possessions of Scindia, a town on the route from Gwalior fort to Sironj, 30 miles S.W. of former, 130 N. of latter. Lat. 25° 54', long. 77° 45'.

MOHOUREE, or MOWAREE, in the British district of Allahabad, lieutenant-gov. of the N.W. Provinces, a village on the route from Allahabad cantonment to Rewah, and 10 miles S.E. of the former. Lat. 25° 21', long. 81° 58'.

MOHRA DHELA, in the British district of Moradabad, lieutenant-gov. of the N.W. Provinces, a village situate at the point where the small river Dhela flows to the south from the Sewalik range. It promises to be an important locality, containing numerous indications of coal, and many seams have been tried for specimens, which, however, as yet have not been obtained of good quality, as they contain much iron pyrites. N. of Moradabad 40 miles. Lat. 29° 24', long. 79° 4'.

MOHREE, in the British district Moradabad, lieutenant-gov. of the N.W. Provinces, a village on the route from Hurdwar to the town of Moradabad, and 16 miles N.W. of the latter. The road in this part of the route is good. Lat. 29° 4', long. 78° 42'.

MOHRENI, in the British district of Shahjehanpore, lieutenant-gov. of the N.W. Provinces, a village on the route from Bareilly to Seetapore, and 43 miles S.E. of the former. Lat. 28° 9', long. 80° 5'.

MOHUMDABAD, in the British district of Azimgurh, lieutenant-gov. of the N.W. Provinces, a town on the route from Azimgurh to Mozufferpore, 14 miles E. of the former. Lat. 26°, long. 83° 28'.

MOHUMDABAD, in the British district of Jaloun, lieutenant-gov. of the N.W. Provinces, a town on the route from Jaloun to Bandah, 17 miles S.E. by S. of the former. Lat. 25° 57', long. 79° 31'.

MOHUMDEE, in the territory of Oude, a town on the route from Bareilly to Lucknow, 61 miles S.E. of the former, 96 N.W. of the latter. It has a large bazar. Lat. 27° 58', long. 80° 19'.

MOHUN.—A town in Guzerat, or dominions of the Guicowar, situate eight miles N. from the right bank of the Nerbudda, and 52 miles E. by S. from Baroda. Lat. 22° 6', long. 74° 2'.

MOHUN CHOKI, in the British district of Suharunpore, lieutenant-gov. of the N.W. Provinces, is on the route from the town of Suharunpore to Dehra, and 26 miles N.E. of the former. It is situate at the south-western base of the Sewalik range, where the pass of

Lalldurwaza or Kheree, following the course of the Solani torrent, debouches on the plains of Hindoostan. Distant N.W. from Calcutta 1,030 miles. Lat. 30° 10', long. 77° 57'.

MOHUNEAA, in the British district Shahabad, lieutenant-gov. of Bengal, a town on the route from Hazaribagh to Benares, 147 miles N.W. of former, 42 S.E. of latter. It has a bazar. According to Buchanan, "it contains 200 houses, of which some are very large, being inns [caravanserais], with very numerous chambers, disposed in a long range." Lat. 25° 8', long. 88° 40'.

MOHUNGUNJE.—A town in the British district of Pubna, lieutenant-gov. of Bengal, 124 miles N.E. of Calcutta. Lat. 24°, long. 89° 40'.

MOHUNGURH, in the Rajpoot state of Jessulmer, a fort in the desert, and about 35 miles N.E. of the town of Jessulmer. Lat. 27° 13', long. 71° 22'.

MOHUN-KE-SURÁEE, in the British district of Benares, lieutenant-gov. of the N.W. Provinces, a village on the route from the city of Benares to that of Mirzapoor, seven miles S.W. of the former, 20 N.E. of the latter. Water is plentiful, and supplies may be collected in abundance. The road in this part of the route is excellent; the country level, wooded, and cultivated. Lat. 25° 16', long. 82° 55'.

MOHUN KOTE.—A town of Sind, in the British district of Kurrachee, presidency of Bombay, 92 miles N.E. of Kurrachee. Lat. 25° 52', long. 67° 57'.

MOHUNPOOR, in the territory of Gwalior, or possessions of Scindia's family, a considerable town 110 miles S. of Guwaler fort. Lat. 24° 47', long. 77° 43'.

MOHUNPOOR.—A town of Eastern India, in the British district of Southern Cachar, 11 miles S.E. of Silchar. Lat. 24° 41', long. 92° 58'.

MOHUNPOOR, in the British district of Muttra, lieutenant-gov. of the N.W. Provinces, a village on the route from the cantonment of Allygurh to that of Etawa, and 36 miles S.E. of the former. Lat. 27° 27', long. 78° 23'.

MOHUNPOOR, in the British district Bijnour, lieutenant-gov. of the N.W. Provinces, a village on the route from Moradabad to Hurdwar, and 23 miles S.E. of the latter. Lat. 29° 42', long. 78° 18'.

MOHUNPOORA, in the Rajpoot state of Jeypoor, a village on the route from Agra to Ajmeer, 128 miles W. of former, 100 E. of latter. Lat. 26° 52', long. 76° 10'.

MOHURBUNGE, the name of one of the Cuttack mehals, on the S.W. frontier of Bengal. It is bounded on the north-west by Singboom; on the north-east by the British districts Pooalia and Midnapoor; on the south-east by that of Ballasore and the Cuttack mahal Neelgurh; and on the south-west by that of Keunjur. It

extends from lat. $21^{\circ} 24'$ — $22^{\circ} 35'$, and from long. $85^{\circ} 38'$ — $87^{\circ} 14'$; is ninety-five miles in length from north-west to south-east, and seventy-five in breadth, and contains an area of 2,025 square miles, with a population of 91,125.

MOHURKAPOOR, in the British district of Cawnpore, lieut.-gov. of the N.W. Provinces, a village on the route from Calpee to Futteh-gurh, and 18 miles N. of the former. Lat. $26^{\circ} 20'$, long. $79^{\circ} 45'$.

MOHWAR.—A river of Bundelcund, rising in lat. $25^{\circ} 6'$, long. $78^{\circ} 5'$, and, flowing through Jhamee in a north-easterly direction for sixty miles, falls into the Sinde river, in lat. $25^{\circ} 47'$, long. $78^{\circ} 23'$.

MOIRA FORT.—See **ALMORA**.

MOJGURH, in Bhawalpoor, a town on the route from the city of Bhawalpoor to Jodhpoor, and 37 miles S.E. of the former. It is situate in the desert extending through the eastern part of the state of Bhawalpoor, which has generally a soil of hard tenacious earth, covered in most places with grassy jungle and stunted shrubs, but in some overspread with hills of loose shifting sand. The site of Mojgurh is of firm ground, with low sandy eminences on every side, but at such a distance that light guns cannot command it. The walls are built of brick; they are about fifty feet high (including the parapet, of about seven feet), and two and a half feet thick, with a terreplein four feet broad. On the north side they are in many places perforated with cannon-balls discharged during the siege carried on by the first klan of Bhawalpoor. The place is half a furlong square, with numerous bastions, and an outwork on the east side, to cover the entrance. A mosque conspicuously surmounts the gateway, and a little to the north is a Mahometan tomb, with a cupola profusely ornamented with coloured glazed tiles. There is a large tank outside the walls, and within are several wells, containing abundance of good water at the depth of fifty-eight cubits. Mojgurh is in lat. $29^{\circ} 1'$, long. $73^{\circ} 11'$.

MOJPOOR, in the Rajpoot territory of Alwur, a small town on the route from Nusserabad to Muttra, and 61 miles S.W. of the latter. Lat. $27^{\circ} 22'$, long. $76^{\circ} 52'$.

MOKAMEH.—A town in the British district of Patna, lieut.-gov. of Bengal, 44 miles E. by S. of Patna. Lat. $25^{\circ} 22'$, long. $85^{\circ} 56'$.

MOKAURA.—A town in the British district of Tannah, presidency of Bombay, 74 miles N.N.E. of Bombay. Lat. $19^{\circ} 54'$, long. $73^{\circ} 28'$.

MOKERIAN, in the Julinder doab of the Punjab, a town situated on the left bank of the Beas, 92 miles E.N.E. of the town of Lahore. Lat. $31^{\circ} 57'$, long. $75^{\circ} 39'$.

MOKHEIR.—A town in the British district of Ahmednuggar, presidency of Bombay, 120 miles N.E. of Bombay. Lat. 20° , long. $74^{\circ} 20'$.

MOKMAI.—A town of Burmah, 140 miles S.E. by S. from Ava, and 176 miles N.E. by E. from Promé. Lat. $20^{\circ} 17'$, long. $97^{\circ} 16'$.

MOKUMPAD.—A town in Hyderabad, or territory of the Nizam, 133 miles E. by N. from Hyderabad, and 94 miles N. from Guntoor. Lat. $17^{\circ} 40'$, long. $80^{\circ} 30'$.

MOKUNDURRA, in Rajpootana, a small town or village in the territory of Kota, on the route from Neemuch to Kota, 90 miles N.E. of the former, and 32 S.W. of the latter. It is situate in a long and narrow valley, formed by two parallel ridges of hills running north-west and south-east, between the Chumbul and the Kalee Sindh rivers. In proceeding from Kota towards the south-west, the road gradually ascends, amidst cliffs and rocks, to the brow of the elevated table-land of Malwa, towards which its extremity is guarded by a small fort. This defile is of great importance, being the only pass practicable for carriages for a considerable distance over the range extending from the Chumbul to the Kalee Sindh. It has been repeatedly the scene of obstinately-contested engagements, and formed the route of Colonel Monson's disastrous retreat before Jeswunt Row Holkar, in July, 1804. According to Tod, the pass was named from having been fortified by Mokund, who commenced his reign as rajah of Kota about the year 1630. Mokundarra has a bazar in a long narrow street, through which the main road passes. Distant N. from Oojein 115 miles, S.W. from Gwalior 165, S.W. from Agra 210. Lat. $24^{\circ} 50'$, long. $75^{\circ} 59'$.

MOLACALMOOROO, in the Mysore, a fort on the north-west frontier, towards the British district of Dharwar. It is situate on the western acclivity of a ridge of mountains three miles south of the right bank of the river Chinnna Hugri. Distant N.E. from Chitteldroog 40 miles, N.W. from Bangalore 140, N. from Seringapatam 165. Lat. $14^{\circ} 44'$, long. $76^{\circ} 48'$.

MOLAWUN, in the territory of Oude, a village on the route from Banda to Pertaubgurh, 22 miles W. of the latter, 114 E. of the former. It has water from tanks and wells, but supplies must be collected from the neighbourhood. Lat. $25^{\circ} 45'$, long. $81^{\circ} 40'$.

MOLLUNG.—A town in the British district of Rungpore, lieut.-gov. of Bengal, 10 miles S.W. by S. of Rungpore. Lat. $25^{\circ} 33'$, long. $89^{\circ} 10'$.

MOLOUR, a town in the pergunnah of the same name, is situate three miles N.E. of the left bank of the Jumna, 15 miles S.W. of the town of Futtehpoor. Lat. $25^{\circ} 45'$, long. $80^{\circ} 57'$.

MOMETL MYO.—A town of Burmah, situate 50 miles E. from the left bank of the Irawady, and 110 miles N.N.E. from Ava. Lat. $23^{\circ} 20'$, long. $96^{\circ} 47'$.

MOMINABAD, in Hyderabad, or territory of the Nizam, a town, one of the stations of the

British subsidiary force, usually denominated the Nizam's army. Distance from Hyderabad, N.W., 175 miles; Madras, N.W., 485; Bombay, E., 240. Lat. $18^{\circ} 44'$, long. $76^{\circ} 27'$.

MONAPALEYAM.—A town in the British district of North Arcot, presidency of Madras. It is situate on one of the islands of the Pulicat Lake, 55 miles N. by W. of Madras. Lat. $13^{\circ} 54'$, long. $80^{\circ} 16'$.

MONAS.—A river rising in lat. $28^{\circ} 20'$, long. $91^{\circ} 18'$, in the range of the Himalayas, and, flowing through Tibet in a southerly direction for forty miles, it passes through a gorge in the Himalayas into the native state of Bhotan, through which it flows south-westerly for 110 miles, receiving in this part of its course the Demree river, a stream of greater length than itself. It subsequently for twenty-five miles forms the boundary between Bhotan and the Assam district of Camroop, and for fourteen miles the boundary between Camroop and Goalpara, when it falls into the Brahmapootra, on the right side, in lat. $26^{\circ} 11'$, long. $90^{\circ} 41'$.

MONASSA, in the territory of Indore, or possessions of the Holkar family, a town on the route from Goona to Neemuch, 162 miles W. of former, 18 E. of latter. It is situate in a valley bounded on the north by the Chitor range of hills, has a bazar, in which a market is held, and is the principal place of a subdivision of the pergunnah of Rampoor. The town contains 1,030 houses and 4,100 inhabitants. Elevation above the sea 1,440 feet. Lat. $24^{\circ} 27'$, long. $75^{\circ} 13'$.

MONAY.—A town of Burmah, situate 138 miles S.E. by S. from Ava, and 190 miles N.E. by E. from Prome. Lat. $20^{\circ} 26'$, long. $97^{\circ} 24'$.

MONDA.—A town in the Rajpoot native state of Jodhpoor, situate 57 miles S.E. from Jodhpoor, and 74 miles S.W. from Ajmeer. Lat. $25^{\circ} 47'$, long. $73^{\circ} 50'$.

MONER, or **MANER**, in the British district Patna, lieut.-gov. of Bengal, a town on the right bank of the river Sone, four miles west, or above its confluence with the Ganges. It is estimated to contain 1,500 houses and about 7,000 inhabitants. Distant 20 miles W. of Patna. Lat. $25^{\circ} 37'$, long. $84^{\circ} 50'$.

MONFOO.—A town of Burmah, situate on the right bank of the Irawady river, and 193 miles N.N.W. from Ava. Lat. $24^{\circ} 23'$, long. $94^{\circ} 51'$.

MONGHYR.—A British district, denominated from its principal place, the town of the same name, and subject to the lieut.-gov. of Bengal. The extensive thannahs of Sheikpoorah and Dinnipore were, in 1817, transferred from Behar to this district. It is bounded on the north and east by the British district of Blaugulpore; on the south-west by the districts of Ramgurh and Behar; on the west by Behar and Patna; and on the north-west by Tirhoot. It lies between lat. $24^{\circ} 20'$

— $26^{\circ} 1'$, long. $85^{\circ} 40'$ — $86^{\circ} 50'$; is about 115 miles in length from north to south, and sixty in breadth. The area is 2,558 square miles. The principal rivers which skirt or intersect the district are the Ganges, the Sukri, the Kyul or Kewli, the Bhagmuttee, and the Gogaree.

The staple crops are rice and wheat; but barley, pulse, opium, oil-seeds, indigo, sugar, and tobacco are largely produced, mainly by artificial irrigation, by which water is distributed with great skill and perseverance over all parts of the surface.

The climate of the northern part of Monghyr, especially about the city bearing the same name, is considered so salubrious as to be a desirable residence for invalids, many of whom accordingly live here. The prevalent winds are either from the east, commencing usually in the middle of June and continuing to the middle of February, or from the west, which prevail during the remainder of the year; and when the wind changes, it does not usually blow from north or south, or any direction intermediate, but veers round at once from east to west, or west to east. The west winds are characterized by dryness, the east by moisture. The rainy season lasts from the middle of June to the middle of October; and in spring there are frequent squalls, with showers, and the fall of hailstones of great size. The air is considered drier here than in the districts farther eastward, and in the highlands drier than in the plains. The heat also is greater in the highlands than in the lower parts, the elevation not being sufficient to produce any sensible diminution of temperature, which, on the contrary, is heightened by the reflection of light and radiation of heat from the rocks. The winters are less severe than in the districts north and north-eastward, the thermometer scarcely ever falling to the freezing-point. The amount of population is given under the article **BENGAL**. The principal towns, Monghyr, the capital, Soorajpore, Ghiddore, and Shekhpore, are mentioned under their respective names in the alphabetical arrangement. The principal routes are—1. From east to west, from Berhampore to Benares, by Patna and Dinapore; and this is a very important one in a military point of view, being the only route by which the mountainous tract extending southward into the Ramgurbh district is avoided; and, from lying along the right bank of the Ganges, having the further advantage afforded by the extensive navigation of that great river; 2. from north to south, from the city of Monghyr to Sonah, and subsequently turning south-west, to Ramgurbh; 3. from east to west, from Soorajgurbh to Behar; 4. from south-east to north-west, from Sonah to Behar.

Monghyr was acquired by the East-India Company in 1765, by virtue of the firman of Shah Allum, emperor of Delhi, granting the dewanny of Bengal, Behar, and Orissa.

MONGHYR, the principal place of the British district of the same name, subject to

the lieut.-gov. of Bengal, is situate on the right bank of the Ganges, and on the route from Dinapore to Berhampore. The town comprises sixteen markets, scattered over a space a mile and a half long from north to south, and a mile wide. The houses are generally small: they have sloping roofs of red tiles, and gables ornamented with earthenware figures. It is a thriving place, having a great number of manufactories and shops for the fabrication and sale of hardware and firearms, but of execrable quality. The view of the town from the river is agreeable; it appears "ornamented with numerous gay Hindoo temples; and the effect of the whole is highly picturesque." The fort, built on a prominent rock, is partly washed by the Ganges, and where this is not the case, its rampart is defended on the outside by a wide deep ditch. The length of the fort from north to south is about 4,000 feet, the breadth 3,500: it contains three large tanks, and many residences and offices of the civil establishment: it is also a military station. It is a favourite place of residence for invalided military men and their families, being considered highly salubrious, and also very agreeable, from the beauty of the surrounding scenery. The rock jutting into the river is considered sacred by the Hindoos; and at certain seasons vast numbers of pilgrims enter the river, for the purpose of ritual ablution. Formerly there was directly above the bathing-place a handsome Brahminical temple, which was converted into a mosque by Shooja, son of Shahjehan. Within the fort is another mosque, beautifully built of black marble. The ruins of a splendid palace, built by Sultan Shooja, may still be traced; and contiguous is a vast well, always abundantly replenished, and believed to have a subterraneous communication with the Ganges.

Buchanan estimated the population, about forty years ago, at 30,000 persons, inhabiting 5,000 houses, and states the town to be a place of great antiquity, originally named Mudgalpur. It probably was at an early period a place of strength, but the construction of the present fort is generally attributed to Husain, styled by Buchanan the greatest of the kings of Bengal. It was repaired and enlarged, about 1660, by Shooja, son of Shahjehan, at the commencement of his unsuccessful struggle for empire and life against his brother Aurungzebe. It was subsequently repaired by Cossim Ali, when preparing for hostilities against the East-India Company. His precautions, however, availed not, as, after a feeble resistance of a few days' continuance, it was captured by the British. It was then considered a place of consequence as a stronghold in regard to its proximity to the north-west frontier; but the removal of that boundary to so great a distance has rendered it of no importance in such a point of view. Distant from Benares, E., by Dinapore, 265 miles; from Calcutta, N.W., by Berhampore, 304, by the Ganges 371. Lat. 25° 19', long. 86° 30'.

MONGULHAT, in the British district of Rungpoor, lieut.-gov. of Bengal, a town on the right or south-west bank of the river Durlah. Buchanan describes it as a place of considerable trade, containing 800 houses; which number, according to the usually-admitted ratio of inmates to dwellings, would assign it a population of about 4,000. Distant N.E. from the town of Rungpoor 22 miles. Lat. 25° 58', long. 89° 25'.

MONKHO, in the British district of Allygurh, lieut.-gov. of the N.W. Provinces, a village 10 miles S.W. of the cantonment of Allygurh, 42 miles N. of Agra. Lat. 27° 47', long. 78° 4'.

MONOHUR THANA. — A town in the Rajpoot state of Jhalawar, situate 44 miles E.S.E. from Jhalra Patun, and 129 miles W. by N. from Saugur. Lat. 24° 13', long. 76° 50'.

MONZE CAPE, or **RAS MOOAREE**, a sharply-projecting headland, forming the western extremity of the coast of Sind, is the termination seawards of the high lands known in different parts by the names of the Hala, Brahoic, and Pubb mountains. Pottinger states that "it springs abruptly to a conspicuous height and grandeur out of the sea;" but Horsburgh describes it as of moderate height; and in this he is borne out by the outline given in Dalrymple's charts of the coast of Sind. On the north-west of it is the island of Chilney or Churna, the channel of separation being four miles wide, and six or seven fathoms deep in the middle. Lat. 24° 50', long. 66° 43'.

MOO, a river of Burmah, rising in lat. 23° 33', long. 95° 27', and, flowing in a southerly direction for 125 miles, falls into the Irawady, about forty-two miles below Ava, in lat. 21° 56', long. 95° 24'.

MOOBAREKPOOR. — A town in the native state of Bhawalpoor, situate five miles from the left bank of the Sutlej, and 58 miles E.N.E. from Bhawalpoor. Lat. 29° 43', long. 72° 38'.

MOOCHURI, in the British district of Etawa, lieut.-gov. of the N.W. Provinces, a town on the route from Mynpoorie to Etawa cantonment, and 12 miles N. of the latter. Water is obtainable from wells. The road in this part of the route is good. Lat. 26° 57', long. 79° 1'.

MOOD BIDDREE. — A town in the British district of South Canara, presidency of Madras, 18 miles N.E. by N. of Mangalore. Lat. 13° 4', long. 75° 3'.

MOODEBEEHAL. — A town in the British district of Sholapoor, presidency of Bombay, 92 miles S. by E. of Sholapoor. Lat. 16° 20', long. 76° 12'.

MOODGUL. — A town in one of the recently sequestered districts of Hyderabad, or dominions of the Nizam, situate 68 miles N.W. by N. of Bellary. Lat. 16°, long. 76° 30'.

MOODHULL.—A town in the Southern Mahratta jaghire of Moodhull, situate 62 miles N.E. by E. from Belgaum, and 45 miles S.W. from Beejapoor. Lat. $16^{\circ} 20'$, long. $75^{\circ} 20'$.

MOODHULL.—A town in Hyderabad, or territory of the Nizam, situate nine miles from the left bank of the Godavery river, and 120 miles N.N.W. from Hyderabad. Lat. $18^{\circ} 59'$, long. $77^{\circ} 53'$.

MOODKEE.—A town twenty-six miles south of the left bank of the Sutlej, and within the jurisdiction of the commissioner and superintendent of the Cis-Sutlej states. It is chiefly remarkable on account of the action which took place in its vicinity on the 18th December, 1845, being the first in the war then in progress between the British government and that of the Sikhs. On this occasion, the Sikhs, whose numbers far exceeded those of the force opposed to them, were repulsed, and successively driven from position to position, with the loss of seventeen pieces of artillery. The victory, however, was not achieved without great loss on the side of the British, especially in European officers, more than fifty of whom were returned among the killed and wounded. Distant N.W. from Calcutta 1,140 miles. Lat. $30^{\circ} 48'$, long. $74^{\circ} 55'$.

MOODKHAID.—A town in Hyderabad, or territory of the Nizam, situate six miles from the left bank of the Godavery, and 140 miles N.N.W. from Hyderabad. Lat. $19^{\circ} 9'$, long. $77^{\circ} 33'$.

MOODNAIKANHULLY.—A town in the British district of Bellary, presidency of Madras, 49 miles S.E. by S. of Bellary. Lat. $14^{\circ} 33'$, long. $77^{\circ} 20'$.

MOODONG.—A town in the British district of Amherst, in the Tenasserim provinces, situate 16 miles S.S.E. of Moulmein. Lat. $16^{\circ} 16'$, long. $97^{\circ} 48'$.

MOOFTUNG.—A town of Eastern India, in the native state of Chirra, in the Cossey Hills, 50 miles S. from Gowhatty, and 31 miles N.W. from Jynteahpore. Lat. $25^{\circ} 26'$, long. $91^{\circ} 47'$.

MOOGETALA.—A town in Hyderabad, or territory of the Nizam, situate on the left bank of the Kistnah river, and 111 miles E.S.E. from Hyderabad. Lat. $16^{\circ} 50'$, long. $80^{\circ} 9'$.

MOOGLEMEERY.—A town in the Mysore, territory of Madras, situate 119 miles N.E. from Seringapatam, and 151 miles W. by N. from Madras. Lat. $13^{\circ} 29'$, long. $78^{\circ} 9'$.

MOOHUMDABAD. in the British district of Furruckabad, lieutenant-gov. of the N.W. Provinces, a town on the route from Futtelghurh to Mynpoory, 13 miles W. by S. of the former. Lat. $27^{\circ} 19'$, long. $79^{\circ} 30'$.

MOOJAUTHAPOORUM.—A town in Hyderabad, or territory of the Nizam, situate on the left bank of the Tandoor river, and 46 miles W.S.W. from Hyderabad. Lat. $17^{\circ} 4'$, long. $77^{\circ} 57'$.

MOOKHWAR, in the British district of Muttra, lieutenant-gov. of the N.W. Provinces, a town 14 miles N.E. of the city of Agra. Lat. $27^{\circ} 18'$, long. $78^{\circ} 14'$.

MOOKSI.—A town in one of the recently sequestered districts of Hyderabad, or dominions of the Nizam, situate 14 miles E. by S. of Moodgul. Lat. $15^{\circ} 58'$, long. $76^{\circ} 42'$.

MOOKUTPOOR, in the British district of Rangurh, territory of Saugur and Nerbudda, lieutenant-gov. of the N.W. Provinces, a town on the route from Sohagpoor to Nagpoor, 42 miles S.S.W. of the former. Lat. $22^{\circ} 47'$, long. $81^{\circ} 7'$.

MOOLA, a river rising in lat. $19^{\circ} 26'$, long. $73^{\circ} 53'$, on the eastern slope of the Western Ghats, and a few miles north of the Malaej Ghat, and, flowing in an easterly direction for 100 miles through the British districts of Poona and Ahmednuggur, falls into the Paira river, a tributary of the Godavery, in lat. $19^{\circ} 32'$, long. $74^{\circ} 51'$.

MOOLA MOOTA, the name of a feeder of the Bheema river, deriving its name from the junction near Poona, in the presidency of Bombay, of two streams, the Moola and the Moota, the former rising near the Bhore Ghaut, in lat. $18^{\circ} 44'$, long. $73^{\circ} 28'$, and the latter in lat. $18^{\circ} 25'$, long. $73^{\circ} 30'$. The united stream falls into the Bheema, in lat. $18^{\circ} 34'$, long. $74^{\circ} 23'$.

MOOLEIR.—A town in the British district of Candeish, presidency of Bombay, 35 miles W.N.W. of Malligaum. Lat. $20^{\circ} 44'$, long. 74° .

MOOLGOOND.—A town in the British district of Dharwar, presidency of Bombay, 38 miles E.S.E. of Dharwar. Lat. $15^{\circ} 17'$, long. $75^{\circ} 35'$.

MOOLKY, in the British district of Canara, presidency of Madras, a town on an inlet of the Arabian Sea, or North Indian Ocean, receiving a river descending from the Ghats, situate eastward. The estuary or inlet on which it is situate is too shallow to be navigated by large vessels, but serves as a place of shelter for coasting and fishing craft. Outside the mouth of the inlet is a group of rocky islets, known by the name of the Mulki or Premeira Rocks. Distant from Mangalore, N., 15 miles; from Madras, W., 370. Lat. $13^{\circ} 6'$, long. $74^{\circ} 51'$.

MOOLTAEE, in the British district of Baitool, territory of Saugur and Nerbudda, lieutenant-gov. of the N.W. Provinces, a town on the route from Baitool to Nagpoor, 22 miles E. by S. of the former. Lat. $21^{\circ} 47'$, long. $78^{\circ} 17'$.

MOOLTAN.—A town of Malwa, in the native state of Dhar, situate 35 miles N. from Dhar, and 99 miles S. by E. from Neemuch. Lat. $23^{\circ} 4'$, long. $75^{\circ} 14'$.

MOOLTAN, an ancient city, stated to be the largest in the Punjab after Lahore and Amritsir, is situate three miles E. of the Chenaub, the inundations of which reach it. Elphinstone, who saw this place in 1809,

before it had been stormed by the Sikhs, describes it as "surrounded with a fine wall between forty and fifty feet high." It is built on a mound of considerable height, formed of the ruins of more ancient cities. The bazars are extensive, and are well supplied with all articles of traffic and consumption, and the shops amount altogether in number to 4,600. Its principal manufactures are silks, cottons, shawls, loongees, brocades, tissues: its merchants are considered rich. Banking constitutes a large proportion of the business of Mooltan, in which it has in some measure supplanted Shikarpoor; and the prosperity of the town is in all respects considered on the increase.

The vicinity is covered with an amazing quantity of ruins of tombs, mosques, and shrines, which show the former extent and antiquity of the city. North of the place is the magnificent shrine of Sham Tabrezi, who, according to tradition, was flayed alive here as a martyr, and at whose prayer the sun descended from the heavens, and produced the intense heat from which Mooltan suffers, and for which it is proverbial. The adjacent country, watered by the inundations of the Chenaub, produces fruits, esculent vegetables, grain, and other crops, in great abundance and perfection. Mooltan is said by Burnes to be to this day styled "*Mallithan*," which he translates *the place of the Malli*; and thence infers it to have been that capital of the Malli taken by Alexander. But Arrian mentions several such cities; and his brevity, and the slender acquaintance which he had of the localities, must render any decision on such points at the present day hazardous and uncertain. Mooltan was taken by the Mahomedans, under Mahomed Ben Kasim, at the close of the eighth century; by Mahmood of Ghiznee, at the commencement of the eleventh; by Tamerlane, at the close of the fourteenth. It has always enjoyed the reputation of a place of great strength. After various fruitless attempts, extending over several years, it was, in 1818, captured by Runjeet Singh, who cut to pieces the Afghan garrison of 3,000, with the exception of a small number admitted to quarter. The booty on that occasion is said to have amounted to four million sterling. The army of the besiegers consisted of 25,000, of whom 19,000 were slain. Subsequently to the death of Runjeet Singh, and during the distracted times which ensued, this place again furnished an object of contention. The atrocious conduct of Dewan Moolraj, who in 1848 held the fortress of Mooltan, where two British officers were basely assassinated, demanded the renewal of hostilities, the earlier of which movements were rendered memorable by the extraordinary energy, enterprise, and judgment displayed by Major Herbert Edwardes, then a subaltern, "who had seen but one campaign," but whose military qualities would have been deemed worthy of distinction in a veteran soldier. The citadel of Mooltan at this time was

represented as being more regular in construction than probably any other place laid down in India by native engineers. It stood on a mound, and in form was an irregular hexagon, with its longest side, which measured 600 yards, to the north-west. The wall, substantially built of burnt brick, was about forty feet high outside, but only four or five feet from the ground inside, in consequence of the accumulation of the materials of older buildings. It was surmounted by thirty towers, and protected by a ditch faced with masonry. On the 2nd January, 1849, the city was captured by a British force under General Whish, after an obstinate and gallant defence on the part of the enemy. On the 22nd, practicable breaches having been effected, the British troops were about to storm the citadel, when Moolraj, with his whole garrison, surrendered unconditionally. The destruction of the fort, then commenced, was a few months later completed by the elements, when the most violent storm ever remembered occasioned the flooding of the rivers of the Punjaub. "On the 28th August, the celebrated fortress of Mooltan was converted by the rains and floods into a mass of ruins. Owing, it is supposed, to some neglect of the people in charge of the bund up the river, the floods broke through and deluged the neighbouring country, and the water which surrounds the fort forced its way through the counterscarp into the ditch. In a few hours the whole of the outer wall was flat; and the water undermining the towers, they and the guns on them were all hurled into the ditch. Next day the second principal wall fell in, the citadel wall and several of the domes having previously given way." It was not thought advisable to repair the fortress with a view to its being rendered defensible and occupied as a military post. A redoubt, or small fortification, in the rear of the cantonments, it was believed would suffice for all military purposes. An obelisk, erected in the town by order of government, preserves the memory of those who fell in the Sulej and Punjaub campaigns. The circumstances under which this part of the Sikh territory became a portion of the British dominions will be found detailed in the article PUNJAB. The population of Mooltan, including the suburbs and cantonment, is given at 80,966. Of this amount 40,140 belong to the suburbs, and 15,853 to the cantonment. Lat. 30° 12', long. 71° 30'.

MOOLWAGLE.—A town in the Mysore, presidency of Madras, situate 123 miles E.N.E. from Seringapatam, and 130 miles W. from Madras. Lat. 13° 9', long. 78° 25'.

MOONAGALAH.—A town in the British district of Masulipatam, presidency of Madras, situate 66 miles N.W. of Guntoor. Lat. 17° 3', long. 79° 53'.

MOONAGUL.—A town in Hyderabad, or territory of the Nizam, 29 miles W.N.W. from Hyderabad, and 143 miles E. from Sholapoor. Lat. 17° 29', long. 78° 10'.

MOO.

MOONDAAR, in Bussahir, a cave on the southern declivity of the Burenda Pass, from the crest of which it is distant two miles. It is important as affording shelter to travellers on their way to attempt that much-dreaded pass. Elevation above the sea 12,807 feet. Lat. $31^{\circ} 23'$, long. $73^{\circ} 12'$.

MOONDAGAM.—A town of the Deccan, in the territory of Nagpoor or Berar, situate 140 miles S.W. by S. from Sumbulpoor. Lat. $19^{\circ} 54'$, long. $82^{\circ} 40'$.

MOONDAGE.—A town in the hill zemindarry of Jeypoor, presidency of Madras, situate 34 miles E.N.E. from Jeypoor, and 109 miles N. by W. from Vizagapatam. Lat. $19^{\circ} 12'$, long. $82^{\circ} 55'$.

MOONDAGOOR.—A town in the British district of North Canara, presidency of Madras, 61 miles N.E. of Honahwar. Lat. $14^{\circ} 58'$, long. $75^{\circ} 8'$.

MOONDAL.—A town in the British district of Kaira, presidency of Bombay, 21 miles E. of Kaira. Lat. $22^{\circ} 47'$, long. $73^{\circ} 1'$.

MOONDEE.—A town in the native state of Gwalior, or territory of Scindia's family, situate nine miles W. from the Suktha river, and 88 miles W. by N. from Baitool. Lat. $22^{\circ} 2'$, long. $76^{\circ} 39'$.

MOONDKA, in the British district of Delhi, lieut.-gov. of the N.W. Provinces, a village on the route from Delhi to Hansae, and 12 miles W. of the former. The road in this part of the route is good. Lat. $28^{\circ} 40'$, long. $77^{\circ} 6'$.

MOONDLAPAUD.—A town in the British district of Cuddapah, presidency of Madras, 60 miles N. of Cuddapah. Lat. $15^{\circ} 20'$, long. $78^{\circ} 58'$.

MOONDRA.—A town in the native state of Cutch, presidency of Bombay, situate on the coast of the Gulf of Cutch, and 29 miles S. from Bhooj. Lat. $22^{\circ} 50'$, long. $69^{\circ} 49'$.

MOONDREE.—A town of Malwa, in the native state of Rutlam, situate four miles from the right bank of the Myhee river, and six miles S.S.E. from Rutlam. Lat. $23^{\circ} 11'$, long. $75^{\circ} 3'$.

MOONDURGEE.—A town in the British district of Dharwar, presidency of Bombay, 62 miles E. by S. of Dharwar. Lat. $15^{\circ} 13'$, long. $75^{\circ} 57'$.

MOONDWA, in the Rajpoot state of Jodhpoor, a village on the route from Nusseerabad to Nagor, and 11 miles S.E. of the latter town. It contains 200 houses, supplied with water from a tank. Lat. $27^{\circ} 3'$, long. $73^{\circ} 55'$.

MOONDYPOLLUM.—A town of Southern India, in the native state of Travancore, 29 miles N.E. from Quilon, and 64 miles N.W. by W. from Tinnevely. Lat. $9^{\circ} 11'$, long. $76^{\circ} 56'$.

MOONGEE.—A town in Hyderabad, or territory of the Nizam, situate on the right bank of the Godavery, and 41 miles S.W. from Jaulnah. Lat. $19^{\circ} 27'$, long. $75^{\circ} 30'$.

MOONGHOM.—A town of Burmah, 117 miles E. from Muneepoor, and 199 miles N. from Ava. Lat. $24^{\circ} 42'$, long. $95^{\circ} 52'$.

MOONGROOL.—A town in Hyderabad, or territory of the Nizam, 63 miles S. by W. from Ellichpoor, and 104 miles E.N.E. from Jaulnah. Lat. $20^{\circ} 17'$, long. $77^{\circ} 26'$.

MOONJPOOR.—A town in Guzerat, or the dominions of the Guicowar, 109 miles N.E. by N. from Rajkote, and 51 miles S.W. by S. from Deesa. Lat. $23^{\circ} 35'$, long. $71^{\circ} 43'$.

MOONUK, in Sirhind, or territory of the protected Sikh states, a village on the route from Delhi to Ferozepoor, 140 miles N.W. of the former place. Water is abundant, as the village is near the river Gagur. Distant N.W. from Calcutta, *via* Delhi, 1,027 miles. Lat. $29^{\circ} 49'$, long. $75^{\circ} 57'$.

MOORA.—A town in the British district of Sumbulpoor, on the south-west frontier of Bengal, situate 29 miles W.N.W. of Sumbulpoor. Lat. $21^{\circ} 38'$, long. $83^{\circ} 38'$.

MOORAUDABAD.—A town in the territory of Oude, nine miles E. from the left bank of the Ganges, and 45 miles W. by N. from Lucknow. Lat. $26^{\circ} 59'$, long. $80^{\circ} 17'$.

MOORBAUR.—A town in the British district of Tannah, presidency of Bombay, 46 miles E.N.E. of Bombay. Lat. $19^{\circ} 17'$, long. $73^{\circ} 30'$.

MOORGOOR.—A town in the native state of Kolapoor, territory of Bombay, situate 22 miles S. from Kolapoor, and 43 miles N.W. by N. from Belgaum. Lat. $16^{\circ} 23'$, long. $74^{\circ} 15'$.

MOORHUR, a river rising in lat. $24^{\circ} 8'$, long. $84^{\circ} 26'$, in the British district of Ramghur, lieut.-gov. of Bengal, and, flowing in a northerly direction for twenty-two miles through Ramghur, seventy-nine miles through Behar, and thirty miles through Patna, falls into the Ganges a few miles below the town of Patna, on the right side, in lat. $25^{\circ} 28'$, long. $85^{\circ} 23'$.

MOORIGOORUM.—A town in Hyderabad, or territory of the Nizam, situate on the left bank of the Godavery river, and 154 miles E.N.E. from Hyderabad. Lat. $18^{\circ} 14'$, long. $80^{\circ} 40'$.

MOORJAPETT.—A town in the territory of Nagpoor or Berar, situate on the left bank of the Wein Gunga river, and 91 miles S.E. from Nagpoor. Lat. $20^{\circ} 10'$, long. $80^{\circ} 2'$.

MOORLEE.—A town in Nepal, situate 53 miles S.S.W. from Khatmandoo, and 26 miles N.E. by E. from Bettiah. Lat. 27° , long. $84^{\circ} 56'$.

MOOROOMGAUM.—A town in the territory of Nagpoor or Berar, 110 miles S.E. by E. from Nagpoor, and 200 miles S. by E. from Jubbulpoor. Lat. $20^{\circ} 21'$, long. $80^{\circ} 36'$.

MOOROSAY, a river of Arracan, rising in lat. $21^{\circ} 20'$, long. $92^{\circ} 40'$, and, flowing in a south-westerly direction for thirty-five miles,

falls into an arm of the sea, near Tek-Naf Point, in lat. $20^{\circ} 47'$, long. $92^{\circ} 23'$.

MOORPILLY.—A town in Hyderabad, or territory of the Nizam, 73 miles N. from Hyderabad, and 208 miles S.S.E. from Ellichpoor. Lat. $18^{\circ} 24'$, long. $78^{\circ} 40'$.

MOORSHEDEBAD.—A British district within the jurisdiction of the governor of Bengal, deriving its name from its principal place. It is bounded on the north-east by the British districts Maldah and Rajeshahye, from which it is separated by the Ganges; on the east by the British district Rajeshahye; on the south-east, and part of the south, by the British district of Nuddea; on the remainder of the south by the British district Beerbhoom, which also bounds it on the west, with the exception of a very small portion bounded by Bhaugulpore. It lies between lat. $23^{\circ} 48'—24^{\circ} 47'$, long. $87^{\circ} 52'—88^{\circ} 41'$: the area is 1,856 square miles. The Ganges may be said to be the only principal stream of this district; for though there are others, they are offsets from that great river. The Ganges is nearly at its greatest size at the north-west corner, not having at that point sent off any of those great branches which, meandering through Eastern Bengal, find their way to the Sunderbunds. It touches on the district near Furruckabad, on the north-west angle, and, flowing south-east for twenty miles, sends off on the right side the Bhagruttee, a large branch, which, pursuing a sinuous course, but generally southerly, traverses the district for seventy miles to Burwa, where it crosses the south frontier, and forms the boundary between the British districts Nuddea and Beerbhoom. It is navigable during the greater part of the year for the largest craft which ply on the Ganges, and forms the principal channel of the route from Calcutta by water to the North-Western Provinces, a week being saved by proceeding through it instead of by the circuitous Sunderbund passage, farther eastward. During the three months of the dry season in spring, the navigation is nearly impracticable, admitting no craft of above a foot draught. Below the divergence, the main stream is denominated the Podda or the Ganges, and, proceeding in a direction south-east for sixty miles, to the town of Jellinghee, at the south-eastern angle of the district, it there sends off, on the right side, a large offset, denominated the river of Jellinghee, and continuing to flow south-easterly, leaves the district. The Jellinghee, following a very tortuous course, but generally south-west, forms the south-eastern boundary of the district for fifty miles, as far as Ballee, where it passes into the British district of Nuddea, and subsequently joins the Bhagruttee, the united stream being denominated the Hoogly. The Jellinghee, though less frequented than the Bhagruttee, in consequence of its being a less direct channel of communication with the North-Western Provinces, is superior in point of facility of navi-

gation, being at all seasons practicable for craft of about two feet draught.

The eastern part of the district is low, remarkably level, subject to extensive inundations during the rains of autumn, and abounding in jhils or small lakes, apparently portions of the beds of streams which have deserted their channels. There are also many tanks or artificial pieces of water. The town of Jellinghee, on the bank of the Podda, at the south-eastern corner of the district, and probably the lowest point in it, is estimated to have an elevation of seventy-five feet above the sea; and Furruckabad, on the bank of the same river, but at the north-western angle of the district, has probably an elevation of 101½ feet above the sea. In the western part of the district are many hills connected with the neighbouring highlands of Rajmahal and Beerbhoom, whence descend numerous torrents, which join the Ganges or its branches, and, besides the important purposes of irrigation, serve to float down the firewood, which is obtained abundantly from the jungles. This western division of the district, locally denominated Rarha, is nearly unproductive without manure, but, treated with that fertilizing aid and due irrigation, it yields moderate crops of rice, sugar-cane, oil-seeds, pulse, cucurbitaceous plants, indigo, and some other articles of less importance. The mulberry is rather extensively cultivated for feeding silkworms.

The climate, formerly regarded as salubrious, is considered to have latterly, from some unknown cause, deteriorated in that respect. The station of Berhampore is regarded as peculiarly unhealthy. According to one traveller, every breath of air which visits it, comes over swamps and marshy lands; it abounds with ditches and stagnant pools, those fruitful sources of malaria; and its too redundant vegetation is rank and noisome.

Before the commercial character of the East-India Company had ceased, this district was one of the principal seats of its silk manufacture, which was conducted principally at the town of Berhampore. The production and manufacture were subsequently carried on with spirit, and in some instances with profitable results, by private persons. In 1840, the quantity produced was estimated at 2,000 maunds, or 160,000 pounds. Indigo is the commercial crop next in importance. The principal silk manufacture is that of corahs. Of other manufactures, the following may be mentioned—Coarse cotton fabrics, works in brass and iron, blankets, carpets, paper, mats, toys, and carvings in wood and ivory. Berhampore, the seat of the civil establishment. Moorshebad, the ancient capital and largest town; Jeajanj, Jellinghee, Bogwangola, and Suti, are described under their respective names in the alphabetical arrangement. The principal military routes are—1. From south to north, from Calcutta, through Burwa, Berhampore, and the city of Moorshebad, subsequently diverging north-west to Rajmahal, and north-

east to Bogwangola. 2. From south-west to north-east, from Bancoora, by way of Sooree, through Berhampore, to Murcha and Rampore. The population of this district is given under the article BENGAL.

The tract comprised within this district, formed at a remote period part of the great realm of Magadha, and on its fall, at the close of the seventh century, became a province of the kingdom of Gaur. At the commencement of the thirteenth century, when the Patan Mussulmans, commanded by Bakhtyar Khilji, invaded this part of India, it was ruled by a rajah whose government was located at the city of Nuddea, and who fled without making resistance, leaving his dominions to the mercy of the enemy. It was immediately incorporated with the state which arose under the name of the kingdom of Bengal, and shared its various vicissitudes, until its final subjugation in 1584 by Acbar. In the desperate confusion and exterminating wars supervening on the death of Aurungzebe, when the remoter provinces of the kingdom of Delhi became impatient of the control of the paramount power, Moorsud Kuli Khan, appointed in 1701 by Aurungzebe, his dewan or chief financial officer, over the extensive and productive province of Bengal, fixed the seat of his government at the town of Makhsumabad, to which, after himself, he gave the name, still retained, of Moorshedabad. He exercised his sway more as a potentate tributary to a superior, than as a subordinate officer, until the period of his death in 1725, when he was succeeded in his dignity by his son-in-law Shujah-uddin. On the death of Shujah-uddin, in 1739, his power devolved on Serefrax Khan, son of the ruler last mentioned, and grandson of the founder of the state of Moorshedabad. He, after the enjoyment of government for a few months only, was attacked by Ali Verdi Khan, one of his officers, defeated in battle, and slain; whereupon the victor, without meeting any further resistance, took possession of the city of Moorshedabad, and all the treasures and dominions of the vanquished ruler. Ali Verdi struggled with great perseverance against the numerous armies of the Mahrattas, who repeatedly overran the country, and in 1742 partially plundered the city of Moorshedabad, and succeeded in extorting an agreement for the payment of chouth, or a fourth part of the revenue of the province, as black mail. His death took place in 1756, and he was succeeded by his grandson Suraja Dowlah, the rash and sanguinary prince who, in 1757, defeated at Plassy by the British army commanded by Clive, fled from the field, to meet death in a less glorious mode. Clive, immediately after the battle, pushed on to Moorshedabad, and declared as nawaub Muhammad Jaffier Khan. In 1760 this prince was deposed by the English, who raised Cossim Ali Khan to his place; but he, having engaged in war against the British, was in turn deposed, and Muhammad Jaffier Khan reinstated as nawaub. He

retained that position until his death in 1764, and was succeeded by his son Najmud-daulah. The dignity, long since become purely titular, is supported by the magnificent allowance of 160,000*l.* per annum. Of this allowance, the sum of between 50,000*l.* and 60,000*l.* per annum is placed at the disposal of the nawaub; from the remainder are paid the stipends of the collateral branches of the family, and the balance constitutes a deposit-fund, from which are defrayed the charges on account of the agency and of the college, together with other expenses incurred on account of the family. The district of Moorshedabad passed to the East-India Company by the grant of Shah Allum in 1765.

MOORSHEDABAD, a town, the principal place of a British district of the same name, lies on the route from Berhampore to Dinagpore, six miles N. of the former, and 100 S. of the latter. It is situate on the Bhagruttee, a great offset of the Ganges, flowing from north to south, and dividing it into two parts—Moorshedabad properly so called, situate on the left or east bank, and Mahinagar, situate on the west or right bank. The aggregate town extends from north to south for a distance of several miles, with an average breadth of four. It is a very indifferent place, consisting chiefly of a rude assemblage of mud buildings, lying confusedly together. The river, however, enlivens the scene, being for a great part of the year covered with boats, for the purposes of trade or amusement. The palace, constructed by Aliverdi Khan, principally of materials brought from the ruins of Gorr, is a gloomy, ruinous pile; but a new palace, which had been several years in course of erection, was completed in 1840. It is described by a traveller, who saw it while in progress, as “a fine building, in the European style, of dazzling whiteness, and rising in glittering splendour, amid stately groves of flourishing trees.” Its cost was enormous; and the extent and magnificence of the edifice is altogether disproportionate to the dependent position of the nawaub. Moorshedabad is a place of considerable commerce, lying on the most-frequented route by water between Calcutta and the North-Western Provinces. It is subject, however, to the disadvantage of being unapproachable by craft of above a foot draught during the dry months of spring. According to a census taken in 1829, the number of houses was 40,118; of which 14,281 belonged to Mussulmans, the rest to Brahminists: the number of permanent inhabitants was 146,176; of whom the Mussulmans were 56,090, and the Brahminists 90,086. To this number is to be added that of strangers and temporary residents, 787; making a total of 146,963. Whilst the capital of Bengal, Moorshedabad was a place of great trade and wealth; so great indeed as to lead Lord Clive to institute a comparison between it and the city of London. From want of drainage, the place is

said to be extremely unhealthy; but the present nawaub is stated to have manifested a strong desire for the improvement of its sanitary condition. A college was some years since founded here, at the expense of the native authority, to which subsequently an English professor was attached. Distance N. from Calcutta, by Berhampore, 124 miles. Lat. $24^{\circ} 12'$, long. $88^{\circ} 17'$.

MOORSUNGONG.—A town in the native state of Bhotan, 57 miles N. by E. from Durrung, and 74 miles N.W. by W. from Bishnath. Lat. $27^{\circ} 13'$, long. $92^{\circ} 11'$.

MOORTAUZPOOR.—A town in one of the recently sequestered districts of Hyderabad, or the dominions of the Nizam, situate 36 miles S. by W. of Ellichpoor. Lat. $20^{\circ} 41'$, long. $77^{\circ} 26'$.

MOORUD.—A town in the British district of Tannah, presidency of Bombay, 43 miles S. by E. of Bombay. Lat. $18^{\circ} 20'$, long. $73^{\circ} 2'$.

MOORVEE, in the peninsula of Kattywar, province of Guzerat, a town, the principal place of the division of Muchu Kanta. It is situate on the river Muchu, which, twenty-two miles farther north, falls into the Gulf of Cutch. The talook or subdivision annexed contains 110 towns and villages, having an estimated population of 24,000. It pays to the Guicowar an annual tribute of 6,000*l*. The thakoor or chief of Moorvee is a Jharegha Rajpoot. Tradition represents him as the descendant of the eldest son and lawful heir of the rao of Cutch, who, in the latter part of the seventeenth century, was murdered by a younger brother, and whose family thereupon fled to this place, then a dependency of Cutch; by the ruler of which their possession of Moorvee was subsequently sanctioned. Disputes still exist between the two rulers. Distant from Ahmedabad, W., 115 miles; Baroda, W., 155; Bombay, N.W., 300. Lat. $22^{\circ} 48'$, long. $70^{\circ} 50'$.

MOOSA KHAIL, in the Daman division of the Punjab, a town situated 41 miles W. from the right bank of the Indus, 129 miles S.W. by S. of the town of Peshawur. Lat. $32^{\circ} 25'$, long. $70^{\circ} 35'$.

MOOSERY.—A town in the British district of Trichinopoly, presidency of Madras, 20 miles W.N.W. of Trichinopoly. Lat. $10^{\circ} 57'$, long. $78^{\circ} 30'$.

MOOSIWALLEH, in the Sind Sagur Doab division of the Punjab, a town situated 10 miles from the left bank of the Indus, 123 miles S. by W. of the town of Peshawur. Lat. $32^{\circ} 16'$, long. $71^{\circ} 22'$.

MOOSLA.—A town in the native state of Indoor, or territory of Holkar, 24 miles S.E. from Indoor, and 107 miles W. by S. from Hoosungabad. Lat. $22^{\circ} 27'$, long. $76^{\circ} 8'$.

MOOSLEEMUDPOO.—A town in the British district of Kurnool, presidency of Madras, 28 miles E.N.E. of Kurnool. Lat. $15^{\circ} 59'$, long. $78^{\circ} 30'$.

MOOTA RIVER.—See MOOLA-MOOTA.

MOOTOURKHAS, in the British district of Futtehpoor, lieutenant-gov. of the N.W. Provinces, a town on the route from Futtehpoor to Bandah, 14 miles S.W. by W. of the former. Lat. $25^{\circ} 48'$, long. $80^{\circ} 43'$.

MOOTUPETTA.—A town in the British district of Madura, presidency of Madras, 66 miles S.E. of Madura. Lat. $9^{\circ} 17'$, long. $78^{\circ} 54'$.

MOOYANLAKHOOLEL.—A town of Eastern India, in the native state of Muneeppoor, 31 miles N.W. by N. from Muneeppoor, and 111 miles E. by N. from Jynteahpoor. Lat. $25^{\circ} 13'$, long. $93^{\circ} 50'$.

MOPEA.—A town of Eastern India, in the native state of Osimlee, in the Coswya Hills, 26 miles S. from Gowhaty, and 54 miles N.W. by N. from Jynteahpoor. Lat. $25^{\circ} 47'$, long. $91^{\circ} 40'$.

MOPLAHS.—See MALABAR.

MOPPOON.—A town in the British district of Amherst, in the Tenasserim provinces, three miles S. of Moulmein. Lat. $16^{\circ} 26'$, long. $97^{\circ} 42'$.

MOR.—A river rising in the British district of Bhagulpore, lieutenant-gov. of Bengal, in lat. $24^{\circ} 31'$, long. $87^{\circ} 1'$; it flows in a south-eastern direction for thirty miles through Bhagulpore, and for thirty-five miles through Beerboom, and then, turning easterly, it proceeds forty-five miles to its junction with the Dwarka river. The united stream holds a southerly course for twenty miles, when it falls into the Bhagruttee, in lat. $23^{\circ} 43'$, long. $88^{\circ} 10'$.

MORADABAD, a British district in the division of Rohilcund, under the lieutenant-gov. of the N.W. Provinces, is named from its principal place. It is bounded on the north-east by the British district Kumaon; on the east by the British district Bareilly and the jaghire of Rampoor; on the south by the British district Budaon; on the west by Boolundshuhur and Meerut; and on the north-west by Bijnour. It lies between lat. $28^{\circ} 15'$ — $29^{\circ} 27'$, long. $78^{\circ} 10'$ — $79^{\circ} 24'$: the area is 2,967 square miles. Its frontier on the north and north-east is marked by a range of hills of no great elevation, separating it from the Patlee Doon, a depressed tract, forming the southern part of the district of Kumaon. Chilkea, situate on the right bank of the Kosila, where it issues from the hills, is 1,076 feet above the sea. From that quarter, the surface of the country generally declines to the south, the streams flowing in that direction. The same inclination is proved by actual measurement; thus the town of Moradabad, forty miles south of Chilkea, is 403 feet below it. The north-eastern part of the territory, extending along the base of the hills, consisting of the Terai or marsh-land, is characterized by the prevalence of springs and streams, luxuriant vegetation, and deadly malaria, and overrun with gigantic grasses and rushes, jungle, and forest-trees. The country is in general level, though in some

places moderately undulating. The town of Moradabad is built on a ridge running from north-west to south-east, and rising between twenty and thirty feet above the level of the country. Adjacent to it is a tract of sand, from one to two miles in breadth, and forming the depression down which the Ramgunga flows. To the south-west, the land declines towards the left bank of the Ganges, and at length in some places becomes kadir or marsh, the soil having been deposited by that river, and remaining liable to its inundations. There are other alluvial tracts along the various streams, characterized by moisture and fertility, and under cultivation yielding luxuriant crops. In general, however, the country is well drained by its rivers, the Ramgunga, the Gunghun, and the Kosee or Kosila. The Ramgunga, which issues from the hills at some distance from this district, though rather small, is a rapid stream, receiving in its course various tributaries. From the town of Moradabad, on its way to the Ganges, into which it falls, it is navigable for about nine months in the year. It has been conjectured that the whole extent of the ridge upon which the town of Moradabad stands, was washed by the water of the Ramgunga at some former period. The Gunghun runs nearly parallel with the Ramgunga, flowing on the opposite side of the town of Moradabad, where the two rivers are at no great distance from each other: the former ultimately joins the Ramgunga about ten miles below the town. The Gunghun is not navigable, though a considerable stream, for the most part confined by steep banks. It is variable in depth, and in many places fordable, except during the rains. A scheme for improving the irrigation of the northern division of the district by means of this river was sanctioned by the home authorities in 1837. The water of these rivers, but especially that of the Ramgunga, is good, and by some Europeans is preferred for culinary purposes to that of the wells, though the quality of water procured from the latter source is also well reported of. The wells are numerous, and abundant in their supply, few failing even in the driest season. In the central tract, the average depth of the wells is twenty-two feet. The depth increases towards the hills in one direction, and towards the Ganges in the other. As the whole territory is alluvial, it contains no minerals. The climate of the cleared and dry tracts is more congenial and grateful to Europeans than that of almost any other part of India, and the average amount of disease and mortality amongst them is as low as at home. The prevailing winds are east and west: the former are perhaps more frequent here than on the western side of the Ganges. The atmosphere is remarkably dry and clear, fogs being rare. The cold weather may be said to commence about the middle of October; but from the 15th September the nights and mornings are cool and pleasant. The months of December and January sometimes produce

a degree of cold that is almost incredible; for instance, in January, 1836, the thermometer fell on two mornings to 22° at sunrise, and for some successive days it did not exceed 28° at that time: many pieces of water were covered with ice. The cool weather continues to the end of March, and often to the middle of April. The hot winds blow very irregularly, sometimes commencing about the 16th of April, at others not until the end of that month or the beginning of May: they are also generally unsteady, alternating with a less strong wind from the east. Severe north-westerly winds occur at short intervals from April to the commencement of the rains. The periodical rains set in irregularly from the 10th June to the early part of July, and cease in the end of August, or early in September: they are heavy, and during their continuance the temperature is moderate.

Elephants are numerous in the forests, and though the breed is less valued for domestication than those produced farther to the east, some are annually captured for that purpose. Tigers infest the jungly tracts. There are, besides, the leopard, bear, jackal, lynx, fox, wild dog, nylgau, spotted deer, antelope, hare, and squirrel. Among the feathered tribe are the peafowl, floriken or bustard, partridge, quail, pigeon, snipe, bittern, jungle-fowl, wild goose, and wild duck. Of reptiles, there are the boa-constrictor, the cobra de capello, and three other venomous sorts of serpents, water-snakes, and some harmless kinds. Scorpions and centipedes infest every building; but, though causing great suffering, seldom produce death. The streams abound with fish, some of which are delicious.

The agriculture of Moradabad is important and varied. The sugarcane succeeds well: it is of a large black kind, abounding in rich saccharine juice. Cotton also thrives. Rice, of very fine quality, is grown in the watered districts. Wheat is produced in great excellence, and in large quantity; but the food of the labouring classes is principally maize and millet. Fruits and esculent vegetables are abundant and excellent. The mango produces great quantities of large fine fruit, but requires to be carefully protected from the cold of winter. Peaches are large, juicy, and well-flavoured; nectarines scarcely ripen, and apricots are rare: neither apples nor pears are fine. There are custard-apples, figs, mulberries, guavas, and plums. Grapes are abundant and fine, but might be improved by better management; flowers and shrubs in great variety have been introduced from the Botanic Garden at Saharunpoor. Of the esculent vegetables usually grown in Europe, many succeed very well. There are peas, beans, cabbages, cauliflowers, turnips, potatoes, carrots, cucumbers, beetroot, celery, and a profusion of herbs. Under the last revenue settlement of the North-West Provinces, the government demand on the lands of this district has been fixed for a term of years, and is not liable

to augmentation until the year 1872. The population, according to official return, amounts to 1,138,461; of whom 502,331 are represented to be Hindoo agricultural, 263,663 Hindoo non-agricultural, 182,767 Mahomedans and others agricultural, and 189,700 of the like description non-agricultural. In comparison with the area, the returns show a population of about 422 to the square mile, a proportion which, to all persons familiar with statistical inquiries, will appear enormous. The British collector assigns various causes for the abundance of the population: the facility with which a family may be supported, and the consequent number of marriages; the temperate habits of the people, and their respect for the nuptial engagement, and their general indisposition to emigrate. That the country is for the most part thickly peopled, is indeed obvious, even to the passing traveller. From one end to the other, with here and there occasional exceptions, a broad expanse of rich cultivation meets the eye, broken by luxuriant mango and other groves, at short distances from each other, with generally a village to each. On entering these villages, the number of children playing in front of every door cannot fail to attract the attention of the most unobservant. Of course the forest-tract is an exception to this general rule. The district contains nine towns in which the number of inhabitants exceeds 5,000 but falls short of 10,000; four in which the number ranges between 10,000 and 50,000; and one in which the number exceeds 50,000.

A scheme for improving irrigation in the northern part of the district was sanctioned in 1837, at an estimated cost of 6,000*l.*; and from Major Colvin's report it would appear that the features of the country were peculiarly fitted to the project. The official description of the tract over which the proposed works were to be carried, the main ridges undulations of the land south, and falling off being nearly up to the rivers leading from the east and west. The sloping sides of these ridges mountains are stated to be intersected by minor water-courses with a strong southerly fall, and having generally a partial supply of water dependent on springs at their sources.

The principal routes through the district of Moradabad are,—1. from Allygurh, and through the town of Moradabad, northward to Almora, by Chilka; 2. from Moradabad to Almora, by Rampoor, a little east of the former route; 3. a route in a direction south-east and north-west, from Bareilly, through the town of Moradabad, by Nugiua, to Hurdwar; 4. a route from south to north, to Hurdwar, running nearly parallel to the last, but ten or twelve miles more to the west; 5. a route in a direction east and west, from Meerut to Rampoor, through the town of Moradabad. There are besides several routes of less importance.

Moradabad is part of the tract heretofore known by the name of Rohilkund; in conse-

quence of its colonization by Rohilla Afghans, who established themselves here early in the last century. In 1774, the power of the Rohillas was totally broken by a severe defeat which they received at Tessonah, near Kutterah, from a British force subsidized by the nawab of Oude, who, in consequence, became master of a large portion of their possessions. In 1801, the province, with some other districts, was ceded to the East-India Company, under a re-arrangement of the Company's relations with the nawab of Oude, rendered necessary by the improvidence and misgovernment of the latter.

MORADABAD, the principal place of the British district of the same name, is situate on a ridge of ground from twenty to thirty feet above the neighbouring country, and forming the right bank of the Ramgunga. Its appearance is not striking, it being very deficient in mosques, tanks, and all other public works. There is one street about a mile long, full of shops, and paved with vitrified bricks set edgewise. This used to be kept clean and in good repair, but the funds formerly employed for the purpose of so preserving it being no longer available, it is at present neglected. There is a spacious serai for the accommodation of travellers, and a market is daily held for the produce of the neighbourhood. The jail is sufficiently large to contain 1,800 native convicts, the ostensibly condemned to work in their labour roads. Mundy conjectures that the objects; "for might be directed to get, "through which we the roads," he, the last three days seem perfect have jolted the spade and pickaxe." The chief strength of the troops is to guard this great assemblage of convicts. Nearly west of the town, and separated from it by the jail, are the cantonments, agreeably situate amid luxuriant trees, and a parade containing forty acres of ground. Moradabad is a civil station, and the cutcherry, or residence of the collector, is a handsome house, surrounded by a mud rampart, with round bastions and a deep ditch. It was built by an official resident named Leicester, who, on the approach of a powerful Mahratta army under Hukar, manned it with such forces as he could collect, and, though a civilian, kept the enemy at bay until Lake advanced and raised the siege. Moradabad had formerly a mint, the rupees of which had a very extensive circulation. In 1835 and 1836, the mean of the thermometer at noon at this place was, for the month of October, 77°; November, 70°; December, 63°; January, 56°; February, 61°; March, 70°; April, 76°; May, 84°; June, 86°; July, 82°; August, 85°; September, 84°. In these years, however, it is stated that the temperature of the rainy months was much above the usual average. The population, according to the latest official return, is 57,414; the majority of which is Mahomedan, and mostly of Patan descent. Elevation above the sea 678 feet. Distance N.W. from Calcutta 338 miles. Lat. 28° 49', long. 78° 50'.

MORAD I MUNZIL, in the British district of Ajmeer, lieutenant-gov. of the N.W. Provinces, a town on the route from Nusseerabad to Boondie, 43 miles S.E. of the former. Lat. 25° 55', long. 75° 20'.

MORADNAGAR, in the British district of Meerut, lieutenant-gov. of the N.W. Provinces, a town on the route from Delhi to the town of Meerut, and 21 miles N.E. of the former. The road in this part of the route is good. Lat. 28° 47', long. 77° 34'.

MORALKAKANDA, in Bussahir, a lofty mountain-range, which stretches continuously, but with various height and breadth, in a south-westerly direction, from the Himalaya bounding Koonawar on the south, to Urki, in the state of Bhagul, or from between lat. 31° 29'—31° 10', and long. 77° 50' and 77°. It forms the south-eastern or left boundary of the valley of the Sutlej in this part of its course, that great river running along its base, and receiving numerous small feeders from its north-western declivity, whilst from its south-eastern side the streams flow into the Giree, Pabur, Tonse, and Jumna.

MORASSA.—A town in the British district of Kaira, presidency of Bombay, 66 miles N.E. of Kaira. Lat. 23° 27', long. 73° 21'.

MORDEE BAY, on the east coast of the island of Bombay. The site having been pointed out as an eligible locality for the terminus of the Bombay Railway, a project has been sanctioned for its reclamation from the sea. Lat. 18° 56', long. 72° 54'.

MORNEE.—A summit in a range of mountains of moderate elevation, stretching from Nahun, in a north-west direction, to the south-eastern extremity of the Pinjor Doon. It is surmounted by a fortress, which, though surrounded by the possessions of the Sikhs, is held by a Mahomedan chief, with a small adjacent territory. It was a secondary station in the great trigonometrical survey of the Himalayas. Elevation above the sea 2,413 feet. Lat. 30° 41', long. 77° 9'.

MOROOM.—A town in one of the recently sequestered districts of Hyderabad, or dominions of the Nizam, situate 38 miles E. by N. of Sholapoor. Lat. 17° 43', long. 76° 30'.

MORRISON BAY, formed by several islands composing the Mergui Archipelago, particularly the two larger ones of Domet and Kisserraingo, to the south. Its centre is about lat. 11° 53', long. 98° 29'.

MORUDEA, in the British district of Cawnpore, lieutenant-gov. of the N.W. Provinces, a village on the route from the cantonment of Etawa to that of Cawnpore, and 48 miles W. of the latter. The road in this part of the route is good, the country cultivated. Lat. 26° 22', long. 79° 42'.

MORVEE.—See **MOORVEE**.

MOSCOS.—A chain of islands on the coast of Tenasserim, known as Northern, Middle, and

Southern, extending, "parallel to the coast, from lat. 13° 47' to 14° 28', long. 97° 53', and distant from it three to four and five leagues, having a safe channel inside, between them and the coast, with soundings mostly from ten to fifteen fathoms, deepening generally near the islands, and shoaling to eight, seven, and six fathoms near the main."

MOSEH.—A town in the British district of Poona, presidency of Bombay, 60 miles S.E. of Bombay. Lat. 18° 26', long. 73° 36'.

MOSULUKUL.—A town in one of the recently sequestered districts of Hyderabad, or dominions of the Nizam, situate 26 miles W.N.W. of Raichoor. Lat. 16° 22', long. 77° 3'.

MOTE, in the British district of Jaloun, lieutenant-gov. of the N.W. Provinces, a town on the route from Calpee to Goonah, 64 miles S.W. of former, 121 N.E. of the latter. Lat. 25° 43', long. 79° 1'.

MOTEYE.—A town in the Rajpoot state of Jodhpoor, 72 miles N.N.W. from Jodhpoor, and 64 miles S.W. from Beekaneer. Lat. 27° 18', long. 72° 46'.

MOTOORA.—A town in the British district of Pubna, lieutenant-gov. of Bengal, 121 miles N.E. of Calcutta. Lat. 23° 55', long. 89° 40'.

MOUDHA, a town on the route from Banda to Calpee, 21 miles N.W. of the former, 47 S.W. of the latter. It has a population of 7,571 inhabitants, contains a bazar, and is well supplied with water. Lat. 25° 41', long. 80° 10'.

MOULMEIN, in the British district of Amherst, a town, the principal place of the Tenasserim provinces, is situate on a small peninsula, formed by the Salween, the Gyne, and the Attaran rivers, opposite to the town of Martaban, and 30 miles N. of Amherst. Upon its cession to the British, in 1826, the site was selected for a military station, and the town, which now bears all the marks of civilization, a few years back presented a very different scene; the accumulation of dirty and ill-ventilated alleys, of which it then consisted, having been converted into a fine seaport town, with open streets, quays, markets, churches, and schools. The main street runs parallel with the river, and communicates with different parts of the town by means of others joining it at right angles. The cantonment is considerably raised, well drained, and healthy, and its position is advantageous in a military point of view; but the facilities of communication now provided by means of steam navigation, for the rapid disposal of troops upon any particular point, may be regarded as sufficient to secure the defence of this portion of the British dominions. The population of the town is given as 42,000. The population of the neighbourhood, which, an inexhaustible supply of teak, and other advantages, has coupled with other local advantages, enabled Moulmein to form one of the Bay and other ports on the coast of the Company's of Bengal, in shipbuilding. 635

steamer *Tenasserim*, and her Majesty's steam-sloop *Malacca*, were built at this port. Like most eastern towns, Moulmein has suffered severely from the casualty of fire: in 1850 a conflagration occurred, entailing a loss of upwards of 60,000*l.* upon the principal European merchants. A newspaper, entitled the *Moulmein Guardian*, has been established in the town. Lat. 16° 30', long. 97° 42'.

MOUTNEE, in Sinde, is an offset on the left or eastern side of the great Sata branch of the Indus. Though once a large stream, it has now become a mere shallow rivulet, discharging its water into the sea by the unnavigable Kaheer mouth, in lat. 23° 51', long. 67° 38'.

MOUTTSHOBOMYO, or MONCHABOO.—A town of Burmah, situate 19 miles from the right bank of the Iradway, and 43 miles N.N.W. from Ava. The town is venerated as the birthplace of Alompra, the founder of the present dynasty, who selected it, on that account, as the seat of empire. Lat. 22° 25', long. 95° 46'.

MOUZIMPOOR, in the British district of Muttra, lieutenant-gov. of the N.W. Provinces, a village on the route from the cantonment of Allygurh to that of Etawa, and 39 miles S.E. of the former. Lat. 27° 26', long. 78° 24'.

MOW, in the British district of Allygurh, lieutenant-gov. of the N.W. Provinces, a town 20 miles S.E. of the cantonment of Allygurh. Lat. 27° 47', long. 78° 26'.

MOW.—A small town in the British district of Banda, lieutenant-gov. of the N.W. Provinces. It is situate on the right bank of the Jumna, and "is remarkable for two isolated hills upon the Doab side of the river, jutting into the middle of the stream. These hills are of red sandstone, which is quarried" for building, and abound in deep caverns and curious recesses. Distant 67 miles S.E. of the town of Banda, 30 S.W. of Allahabad. Lat. 25° 17', long. 81° 26'.

MOW, or MAO, in Bundelcund, in the British district of Jhansee, a town on the small river Supprar. It was one of the first conquests of Dewada Bir, who established the Boondela dominion in this part of India, and was the first post of Champat Rao, when, towards the close of the seventeenth century, he raised the standard of revolt against the court of Delhi. Sleeman styles it "the large commercial town of Mow," but gives no other information on the subject. Distant 70 miles S.W. of Calpee. Lat. 25° 15', long. 79° 12'.

MOW, or MAU, in the British district of Allahabad, lieutenant-gov. of the N.W. Provinces, a town on the route from Allahabad cantonment to that of Furtabaghur, in the Oude territory, 17 miles N. of the former, 1 S. of the latter. It has a bazar. Lat. 25° 42', long. 81° 56'.

MOWA, in the Rajpoot native state of Jeypoor, a town on the route from Agra to

Ajmere, 70 miles W. of former, 158 E. of latter. It has a tolerably good bazar, supplied with "cutlery, ornaments of gold and silver, and shawls, as well as the more usual rustic commodities of cotton, corn and flour, ghee, and coarse cloth." The town is surrounded by an earthen rampart with bastions, and has at its north-east angle a fort belonging to the Jeypoor rajah. The interior of the fort "is about ninety yards square, and the walls are very high, having a great command over the renee, the parapet of which appears itself to be from thirty-five or forty feet above the bottom of the ditch. The latter is broad as well as deep, the counterscarp being about twenty feet high, and it is protected by a covered way eight feet broad, to which the interior slope of the glacis furnishes a parapet six feet high, but without any banquette." Boileau states that it contains 2,000 houses, an amount which would assign it a population of about 10,000; but this appears to be an exaggerated estimate. Lat. 27° 3', long. 77°.

MOWA, in Guzerat, a town on the south-eastern coast of the peninsula of Kattywar, at the head of a small bay. It is, however, an indifferent port, the anchorage being without shelter towards the south, and with a sandy bottom at from seven to ten fathoms; and with the flood tide a vessel must lie with a reef of rocks right astern: it however has considerable traffic. Distance from Ahmedabad, S., 150 miles; Baroda, S.W., 130; Bombay, N.W., 160. Lat. 21° 3', long. 71° 43'.

MOWAH, in the British district of Tirhoot, lieutenant-gov. of Bengal, a town on the route from Dinapoor to Purneah, 30 miles N.E. of former, 176 W. of latter. Lat. 25° 46', long. 85° 29'.

MOWAH.—A town in the British district of Tirhoot, lieutenant-gov. of Bengal, 48 miles S.E. from Mozufferpoor. Lat. 25° 33', long. 85° 55'.

MOWAI, in the British district of Banda, lieutenant-gov. of the N.W. Provinces, a village on the route from Cawnpore, by Chila Tara ghat, to the town of Banda, four miles N. of the latter. Lat. 25° 32', long. 80° 24'.

MOWAI, in the British district of Futtehpore, lieutenant-gov. of the N.W. Provinces, a village on the left bank of the Jumna, 30 miles W. of the town of Futtehpore. Lat. 25° 55', long. 80° 22'.

MOWANUH, in the British district of Meerut, lieutenant-gov. of the N.W. Provinces, a village on the route from the town of Meerut to that of Bijnour, and 11 miles N.E. of the former. Population 6,486 inhabitants. Lat. 29° 6', long. 77° 55'.

MOWASI, in the territory of Oude, a village on the route from Cawnpore to Lucknow, five miles N.E. of the former, 48 S.W. of the latter. Lat. 26° 30', long. 80° 31'.

MOWGUNGE, or MAUGANJ, in the territory of Rewa or Boghelcund, a town on

the route, by the Kutra Pass, from Allahabad to Jubulpore, and 91 miles S.W. of the former. It is described by Jacquemont as a large village, but the dwellings are miserable mud-built thatched huts. It has a bazar, and is well supplied with water from a tank, a rivulet, and wells. Elevation above the sea about 1,200 feet. Lat. $24^{\circ} 40'$, long. $81^{\circ} 56'$.

MOWHAR, or MOHAR, in the British district of Futtehpore, lieutenant-gov. of the N.W. Provinces, a village situate on the right bank of the Ganges, on the route from Cawnpore to the town of Futtehpore, and 18 miles N.W. of the latter. Lat. $26^{\circ} 6'$, long. $80^{\circ} 40'$.

MOWKHAS, in the British district of Cawnpore, lieutenant-gov. of the N.W. Provinces, a village on the route from Allahabad to Etawa, and 64 miles S.E. of the latter. Lat. $26^{\circ} 13'$, long. $79^{\circ} 50'$.

MOYAAR, a river rising in the Neilgherries, in lat. $11^{\circ} 22'$, long. $76^{\circ} 35'$, at the foot of the mountain called Makurty Peak. It receives the drainage-waters of the Pichul and Pykara valleys, and descending the hills at the north-west angle, by a fall near Neddiwuttum, turns due east after reaching the plains, and flowing round the base of the Neilgherries, on the northern and eastern faces, joins in lat. $11^{\circ} 28'$, long. $77^{\circ} 10'$, near Danaikencotta, in Coimbatore, the Bowany. After a course of seventy miles, the united stream discharges itself into the Caverry. A bridge of masonry has been erected over the river at Tippacandra.

MOYUNDA, in the British district of Jaunsar, lieutenant-gov. of the N.W. Provinces, a village on a rocky and bare ridge, about two miles west of the right bank of the Jumna. Lat. $30^{\circ} 41'$, long. $78^{\circ} 6'$.

MOZABAD, or MAWZABAD, in the Rajpoot native state of Jeypoor, a town on the route from Agra to Ajmere, 180 miles W. of former, 48 E. of latter. Heber describes it as a "rather large town, with a ruined wall, mosque, some good gardens, and several temples." A fine temple belonging to the Jains is profusely adorned with elaborate sculptures, and surmounted by a richly-carved dome and three pyramids of sculptured stone. Lat. $26^{\circ} 40'$, long. $75^{\circ} 25'$.

MOZUFFERPORE, in the British district of Tirhoot, lieutenant-gov. of Bengal, a town on the route from Dinapore to Mulye, 50 miles N.E. of former, 50 S. of latter, situate on the Little Gunduck, a river so considerable as to be unfordable, and which must consequently be crossed by ferry. A government school has been established in the town, in which an Arabic and Persian teacher is maintained from the revenues of an estate assigned for that purpose by Mahomed Tuckhe Khan, a zemindar of Tirhoot. The population is estimated at 8,945. A destructive fire, attended with great loss of human life, occurred in this town in 1838. Distance N.E. from Benares, by Dina-

poor, 173 miles; N.W. from Calcutta, by Hazaribagh and Dinapore, 426. Lat. $26^{\circ} 6'$, long. $85^{\circ} 28'$.

MOZUFFURNUGGUR, a British district under the lieutenant-gov. of the N.W. Provinces, is bounded on the north by the British district Saharanpore; on the east by the British district Bijnour, from which it is separated by the Ganges; on the south by the British district Meerut; and on the west by the Jumna, dividing it from Paniput and Sirhind. It lies between lat. $29^{\circ} 10'$ — $29^{\circ} 50'$, long. $77^{\circ} 6'$ — $78^{\circ} 10'$; is sixty miles in length from east to west, and forty in breadth from north to south: its area is 1,617 square miles. The inclination of the surface is very gentle, and is from north to south, which is the direction of the course of the Ganges on the eastern frontier, the Jumna on the western, and of the intermediate streams, the Kalee Nuddee and the Hindon, as well as of the line of slope of the Doab Canal. The surface rises from the Ganges on the one side, and the Jumna on the other, to the interior of the Doab, where there is a prolonged elevation in some measure parallel to the rivers, and nearer the former than the latter. It is marked by a range of sandhills, not continuous, but disposed in small ridges, of which one for a short distance runs parallel to the next in succession, before it subsides to the level of the plain. The elevation of this range has been ascertained with considerable accuracy, its crest being selected as the line of the Ganges Canal, which is now in progress, and by means of which a portion of the main stream drawn off near Hurdwar will for the purposes of irrigation and navigation be conveyed down the middle of the Doab to Cawnpore, where any redundant water will be reunited to the parent river. Nusseerpoor, on this line, and close to the northern boundary, in lat. $29^{\circ} 45'$, long. $77^{\circ} 55'$, has an elevation of 974 feet; and probably neither sandhill, nor any other eminence throughout the district, is 100 feet above this place. At Kutowlee, close to the southern boundary, the elevation diminishes to 904 feet. A khadir, or low alluvial marshy tract, stretches in a few places along the left bank of the Jumna, and one much more extensive along the right bank of the Ganges. The Ganges khadir is for the most part very fertile, and admirably suited for rice-ground; but the damp, unwholesome air renders it ill suited for the residence of man. It is thinly peopled and ill cultivated; a portion is made serviceable for grazing, but this portion yields only the wild produce of the jungle. The chief products of the district of Mozuffurnuggur are sugarcane, cotton, tobacco, rice, wheat, barley, maize, millet, pulse of various kinds, oil-seeds, and esculent vegetables. The tract appears to be considerably infested with wolves. In 1840, the rate of rewards for the destruction of these animals was increased, and in 1841 it was found requisite to increase it still further. The value of money in India considered, the scale of

rewards seems high, being five rupees for a female wolf, four for a male, and two for a cub.

The population, from a recent census, appears as amounting to 672,861; of which number 241,246 are returned as Hindoos agricultural; 248,925 as Hindoos non-agricultural; 83,943 Mahomedans and others agricultural, and 98,747 under the same head non-agricultural. The proportion of persons to a square mile exceeds 331. The following is a classification of the towns and villages in the district :—

Number containing less than 1,000 inhabitants	717
Ditto more than 1,000 and less than 5,000	159
Ditto " 5,000 " 10,000	7
Ditto " 10,000	4
Total	887

Of the chief towns some notice is taken under their respective names in the alphabetical arrangement. The land assessment is fixed for a term of years, which will expire on the 1st July, 1861.

The tract forming the present British district of Mozuffurnuggur was wrested from the Mogul empire by the Mahrattas, and in 1803 was ceded to the East-India Company by Scindia, under the second article of the treaty of Serjee Anjengaum, which alienated all that chieftain's "forts, territories, and rights in the Doab." A considerable portion of the district was included in the jaghire of the female adventurer Zebulniss, more generally known as the Begum Sumroo, of whom some account is given in the article on the Meerut district. On her decease, in 1836, the jaghire lapsed to the Company.

MOZUFFURNUGGUR, the principal place of the British district of the same name, under the lieut.-gov. of the N.W. Provinces, is situate on the left bank of the West Kalee Nuddee. It is a large town, having a population of 9,646 inhabitants. Elevation above the sea about 900 feet. Distance N.W. from Calcutta, by Moradabad and Allyghur, 984 miles. Lat. 29° 28', long. 77° 45'.

MUBARAKPOOR.—A town in the British district of Bijnour, lieut.-gov. of the N.W. Provinces. Lat. 29° 19', long. 78° 12'.

MUBARAKPOOR, in the British district of Aldemau, territory of Oude, a town on the right bank of the Ghaghra, 35 miles S.E. of the city of Oude. Butter estimates the population at 3,000; half of which number are Mussulmans, generally employed in weaving. Lat. 26° 35', long. 82° 38'.

MUCHERHUTTA.—A town in the territory of Oude, 41 miles N.N.W. from Lucknow, and 58 miles S.E. by E. from Shahjehanpoor. Lat. 27° 24', long. 80° 45'.

MUCHKAUTA, in the peninsula of Kattywar, province of Guzerat, a prant or division named from the river Muchoo, which flows nearly through its centre, in a direction from south to north, and falls into the Gulf of Cutch. This division is bounded on the east and south-

east by that of Jhalawar; on the south-west and west by the division of Hallar; on the north-west by the Gulf of Cutch; on the north by the Runn or Great Salt Marsh; and lies between lat. 22° 30'—23° 6', long. 70° 34'—71° 3'. There is no accurate return of the area, which may probably be about 700 square miles. It is held by three thakoors or chiefs; and in the description of their respective territories, all that is known of the constituent parts of this division is stated.—See **MOORVEE**, **UDALA**, and **MALLIA**.

MUCHLEESHEHUR, in the British district of Jounpoor, lieut.-gov. of the N.W. Provinces, a town on the route from Allahabad to Jounpoor cantonment, 45 miles N.E. of the former, 21 S.W. of the latter. It has a large bazar. Lat. 25° 42', long. 82° 26'.

MUCKUNDGUNGE.—A town in the British district of Ramgur, lieut.-gov. of Bengal, 19 miles N.W. by N. of Ramgur. Lat. 23° 56', long. 85° 21'.

MUCKUNPOOR, in the territory of Rewa or Baghelcund, a town nine miles S. of the town of Rewa. It appears to be a place of some importance, as its name enters into the title of the ruler of the country, who is styled rajah of Rewa and Muckunpoor, or Mookunpoor, as it is spelled in the English copy of the treaty concluded with him. Lat. 24° 24', long. 81° 19'.

MUCKWANPORE, in the kingdom of Nepal, a village situate on the banks of the river Kurra, a feeder of the Raptée, whence the fort of Muckwanpoor bears about E. by N. The valley of Muckwanpoor, of which the ancient rajah was dispossessed by the Goorkhas, is of no great extent, but the soil is fertile, yielding rice in great abundance and variety. Lat. 27° 22', long. 85° 11'.

MUDBUNI, in the British district of Ghazeeport, lieut.-gov. of the N.W. Provinces, a village on the route from Ghazeeport cantonment to Chupra, 64 miles E. of the former, 18 W. of the latter. Lat. 25° 48', long. 84° 32'.

MUDEERA.—A town in Hyderabad, or dominions of the Nizam, 129 miles E. by S. from Hyderabad, and 76 miles N.W. from Masulipatam. Lat. 16° 57', long. 80° 26'.

MUDDOOR.—A town in the Mysore, 27 miles E.N.E. from Seringapatam, and 102 miles N.W. by W. from Salem. Lat. 12° 36', long. 77° 6'.

MUDDUCK SERA.—A town in the British district of Bellary, presidency of Madras, 86 miles S.S.E. of Bellary. Lat. 13° 57', long. 77° 20'.

MUDDUKRRAY.—A town in the British district of Coimbatore, presidency of Madras, eight miles S. Coimbatore. Lat. 10° 54', long. 77° 2'.

MUDDUM.—A town in the British district of Tinnevely, presidency of Madras, nine

MUD—MUG.

miles N.W. of Tinnevely. Lat. 8° 49', long. 77° 39'.

MUDDUMPULLY.—A town in the British district of Cuddapah, presidency of Madras, 126 miles W. by N. of Madras. Lat. 13° 33', long. 78° 34'.

MUDDUNPOOR.—A town in the native state of Calahandy, in Orissa, 51 miles N.E. by E. from Joonnagudda, and 78 miles W.N.W. from Goomsoor. Lat. 20° 19', long. 83° 37'.

MUDGERRY DROOG, in the Mysore, a hill-fort among the mountains on the north-east frontier, towards the British district Bellary. Approached from the east, its view is very fine, both the works and the vast rock on which they stand being very conspicuous and grand. On the destruction of the monarchy of Vijayanagar by a Mussulman confederacy, A.D. 1564, at the great battle of Talikot, it was seized by a poligar or chief of the country, and subsequently came into the possession of the rajahs of Mysore, one of whom replaced the mud fort with the present fortress of stone, and also built a palace and a large temple; and Hyder Ali, after he had become master of Mysore, extended and strengthened the fortifications. In A.D. 1772 it fell into the hands of the Mahrattas, but was recovered in the following year by Tippoo Sultan. From its long series of calamities, the town, once highly prosperous, is now merely a group of ruins. Distance from Bangalore, N.W., 56 miles; Seringapatam, N. 95. Lat. 13° 40', long. 77° 16'.

MUDH, in the Rajpoot state of Beekaneer, a village on the route from the town of Beekaneer to that of Jessulmere, and 30 miles S.W. of the former. Here, in 1835, Shah Shooja, the expelled monarch of Afghanistan, took refuge in a state of such distress, that he thankfully accepted some trays of dried fruit from the officers of the British mission in Rajpootana. Mudh is in lat. 27° 50', long. 73°.

MUDHARGARHI, in the British district of Agra, lieutenant-gov. of the N.W. Provinces, a village on the northern frontier, towards the district of Muttra, and on the route from Khasganj to the city of Agra, 14 miles N.E. of the latter. Lat. 27° 19', long. 78° 11'.

MUDHBUNEE.—A town in the British district of Sarun, lieutenant-gov. of Bengal, 28 miles W.N.W. of Bettiah. Lat. 26° 57', long. 84° 10'.

MUDHOOBUNEE.—A town in the British district of Tirhoot, lieutenant-gov. of Bengal, 82 miles N.E. by E. of Dinapoor. Lat. 26° 19', long. 86° 10'.

MUDHURI, in the British district of Bijnour, lieutenant-gov. of the N.W. Provinces, a village on the route by the course of the Ramgunga (Western), from Moradabad cantonment to Fort Almora, 48 miles N. of the former. Lat. 29° 29', long. 78° 42'.

MUDHUN, or **MANDUN**, in the British district of Mynpooree, lieutenant-gov. of the N.W. Provinces, a town on the route from the cantonment of Muttra to that of Mynpooree, and 10 miles W. of the latter. Lat. 27° 15', long. 78° 55'.

MUDIPOOR, in the British district of Delhi, lieutenant-gov. of the N.W. Provinces, a village on the route from Rhotuk to the city of Delhi, and six miles W. of the latter. Lat. 28° 40', long. 77° 11'.

MUDLI, in the Rajpoot state of Jodhpoor, a village on the route from Nusseerabad to Deesa, and 111 miles S.W. of the former. Lat. 25° 44', long. 73° 30'.

MUDMESUR, in the British district of Kumaon, lieutenant-gov. of the N.W. Provinces, a village with a Hindoo temple, situate at the southern base of Badrinath Mountain. The river Mudmesur, which flows below the temple, at a short distance to the south-east, has its origin among the snows of Badrinath, and taking a south-westerly course of about twenty-five miles, falls into the river Mandakini, on the left side, opposite Nalaputon, in lat. 30° 32', long. 79° 8'. The temple of Mudmesur is in lat. 30° 36', long. 79° 15'.

MUDNOOR.—A town in Hyderabad, or dominions of the Nizam, eight miles W. from the left bank of the Manjera river, and 97 miles N.W. from Hyderabad. Lat. 18° 30', long. 77° 40'.

MUDOOPORE.—A town in the British district of Mymensing, lieutenant-gov. of Bengal, 170 miles N.E. of Calcutta. Lat. 24° 37', long. 89° 59'.

MUDRA, or **MUNDURA**, in the British district of Allahabad, lieutenant-gov. of the N.W. Provinces, a village on the right bank of the Ganges, 772 miles N.W. of Calcutta by the river route, 36 S.E. of the city of Allahabad by the same. Lat. 25° 17', long. 82° 16'.

MUDSAN, in the British district of Allygurb, lieutenant-gov. of the N.W. Provinces, a town situate on the left bank of the Jumna, and 28 miles N. of Agra, 85 S.E. of Delhi. Lat. 27° 35', long. 77° 58'.

MUDURKOOTEE.—A town in the British district of Barasut, lieutenant-gov. of Bengal, 41 miles E.N.E. of Calcutta. Lat. 22° 47', long. 89° 2'.

MUFTIGANJ, in the British district of Jounpoor, lieutenant-gov. of the N.W. Provinces, a town on the route from Ghazepore to Jounpoor cantonment, 39 miles W. of the former, 11 S.E. of the latter. Lat. 25° 41', long. 82° 55'.

MUFTI KA PURWA, in the district of Allahabad, lieutenant-gov. of the N.W. Provinces, a village on the route from the town of Allahabad to that of Futtehpore, and 13 miles N.W. of the former. It has a few shops. Lat. 25° 28', long. 81° 44'.

MUGGUR TALAO (Alligator's Pool), in

Scinde, a collection of hot springs, eight miles N. of Kurrahee, and swarming with alligators. They belong to several fakirs, who have attached themselves to the tomb of a Mahometan considered by his countrymen to have been a character of peculiar sanctity. Hence is the name *Muggea Peer*, by which the place is popularly known among Europeans, being a corruption of *Magar Peer* or *Pir*, "the alligator's saint." These thermal springs are situated amidst rocky and very barren hills, and spring out of the bottom of a small fertile valley, thickly wooded with date-trees and acacias, over which the white dome of the shrine is visible. Adjacent to the shrine are a few highly-ornamented tombs, the architectural style of which resembles that of some English structures of the age of Elizabeth. Allen says, "The devices were principally scroll and diamond work; the carving, though not very bold, was elaborate in design and neatly executed." The principal spring issues from the rock on which the shrine is built, and has a temperature of about 98°, the water being perfectly clear, and of a sulphureous smell. Another spring, about half a mile distant, has a temperature of 180°. The water, received into tanks, forms a grateful retreat for the alligators. On occasion of a stranger's visit, the fakirs regale these animals with a carcase of a goat, and their struggles and contests to secure the prey constitute a scene at once ludicrous and disgusting. They are very tame, and never seek to injure human beings. It is remarkable that they are genuine alligators, and totally distinct from the *guyal*, or long-snouted crocodile, which abounds in the Indus, a short distance to the east. The fakirs live in a few mud huts, the only human habitations in this vicinity. Lat. 24° 58', long. 67° 5'.

MUGHS.—See **ARRACAN**.

MUGHUR, in the British district of Goruckpore, under the lieut.-gov. of the N.W. Provinces, a town in the pergunnah or subdivision of Hussainpur Mughur, situate on the route from Goruckpore cantonment to Lucknow, 18 miles W. of the former, and 148 E. of the latter. It is on the river Aumee, here passed by ford or temporary bridge. Buchanan's survey, made forty years ago, describes it as a poor scattered place, containing 370 houses; and consequently, if six persons be allowed to each, the population might be estimated at 2,220. Here is the reputed tomb of Kavir, a personage held in great account amongst religionists, but whose precise opinions seem to be matter of much doubt. It is under the charge of a Muhammedan disciple, whose ancestors, it is said, have held the office ever since the funeral of the saint or teacher, of whose remains the tomb is the supposed receptacle. Mughur is distant from Benares, N., 100 miles. Lat. 26° 42', long. 83° 11'.

MUGRA, in Gurhwal, a village amidst the mountains on the southern frontier, between

Surkanda and the ridge rising north-east of the Dehra Doon. A few miles to the south-west, on the route between this village and that of Nagal, is Sansar Dhara, or "the dripping rock." Mugra is in lat. 30° 24', long. 78° 16'.

MUGRIBEE.—A town in the British district of Hydrabad, province of Scinde, presidency of Bombay, 75 miles S. by W. of Hydrabad. Lat. 24° 20', long. 68° 17'.

MUGRIBEE, in Scinde, a town situated on the Piniaree, a branch of the Indus. Below the town a dam has been thrown across the Piniaree about fifty miles from its mouth. It is forty feet broad, and of proportionate height, but the water in the swell makes its way through numerous small openings to the channel below, called the Goongra, which is navigable to the sea, discharging itself by the Sir mouth. The Piniaree is also navigable from the town upwards to the Indus. The traffic is almost exclusively in rice, which, being produced abundantly in Scinde, is exported down this channel to Cutch. Population 5,000. Lat. 24° 10', long. 68° 17'.

MUGRONEE, or **MAGRAUNI**, in the territory of Gwalior, or possessions of Scindia's family, a small town with a fort, three miles north of the left bank of the river Sindh. Some iron-ore, raised in the neighbouring sandstone hills, is smelted here. Lat. 25° 42', long. 77° 56'.

MUGROR, or **MUNGRORE**.—A place which, with Kera, gives name to the pergunnah of Kera Mungrore, in the British district Mirzapoor. It is situate 25 miles S.E. of the city of Benares, in the mountainous tract in the south-east of the district of Mirzapoor, and 45 miles S.E. of the city of that name. Lat. 25° 1', long. 83° 20'.

MUHABUN, in the British district of Muttra, lieut.-gov. of the N.W. Provinces, a town on the route from Muttra to Etawah, and eight miles S.E. of the former. A short distance west of it, the Jumna is passable by a much-frequented ford, by which, in November, 1804, Jeswant Rao Holkar fled from the Doab, after his enormous body of cavalry had been surprised and dispersed with great slaughter by General Lake, at Furruckabad; and here also, in the early part of 1805, Ameer Khan, the Patan freebooter, crossed in his incursion into the Doab, and subsequently recrossed in his flight from the British army. It formerly was much more important than at present, as in the eleventh century it was held by a special rajah or monarch, who having been, in A.D. 1017, worsted by Mahmood of Ghuznee, slew his own wife and children, and then turned the point of the sword against himself. The place was then surrendered to the conqueror, who gained with it much treasure and other booty, including eighty elephants. Muhabun contains a population of 6,968 inhabitants, and is distant S.E. from Delhi 105 miles. Lat. 27° 25', long. 77° 49'.

MUHADEWAH.—A town in the territory of Oude, 15 miles N.N.W. from Oude, and 82 miles W. by N. from Goruckpoor. Lat. $26^{\circ} 59'$, long. $82^{\circ} 6'$.

MUHAIR.—A town in the British district of Behar, presidency of Bengal, 25 miles E.N.E. of Sherghotty. Lat. $24^{\circ} 43'$, long. $85^{\circ} 13'$.

MUHAISREE.—A town in the British district of Mongheer, lieutenant-gov. of Bengal, 49 miles S. by W. of Mongheer. Lat. $24^{\circ} 41'$, long. $86^{\circ} 18'$.

MUHAMMAD ALIPOOR, in the British district of Bijnour, lieutenant-gov. of the N.W. Provinces, a village on the route up the course of the Ramgunga (Western), from Moradabad cantonment to Fort Almora, 42 miles N. of the former. Lat. $29^{\circ} 25'$, long. $78^{\circ} 43'$.

MUHAMYAING.—A town of Burmah, situate 19 miles E. from the left bank of the Khyendwen river, and 122 miles N.W. by N. from Ava. Lat. $23^{\circ} 19'$, long. 95° .

MUHANWAN, or **MAHOWA,** in the British district of Allahabad, lieutenant-gov. of the N.W. Provinces, a village on the route by the Rajapoor ferry from the cantonment of Allahabad to Banda, and 37 miles W. of the former. Lat. $25^{\circ} 27'$, long. $81^{\circ} 25'$.

MUHAR, in the Reechna Doonab division of the Punjab, a town situated 10 miles E. from the left bank of the Chenaub, 112 miles W.S.W. of the town of Lahore. Lat. $31^{\circ} 9'$, long. $72^{\circ} 24'$.

MUHARI, in the British district of Etawa, lieutenant-gov. of the N.W. Provinces, a village on the route from Calpee to the cantonment of Etawa, and 23 miles S.E. of the latter. Lat. $26^{\circ} 35'$, long. $79^{\circ} 20'$.

MUHDEWA, or **MAHADEOPOOR,** in the British district of Allahabad, lieutenant-gov. of the N.W. Provinces, a village on the left bank of the Ganges, 770 miles N.W. of Calcutta by the river route, 38 S.E. of the city of Allahabad by the same. Lat. $25^{\circ} 14'$, long. $82^{\circ} 17'$.

MUHEEAIDENPOOR, or **MOHUDYPOOR,** in the British district of Allyghur, lieutenant-gov. of the N.W. Provinces, a village on the route from the city of Agra to Khasgunge cantonment, and 51 miles N.E. of the former. Lat. $27^{\circ} 40'$, long. $78^{\circ} 36'$.

MUHESPOOR, in the British district of Bareilly, lieutenant-gov. of the N.W. Provinces, a village on the route from the town of Bareilly to Moradabad, and five miles N.W. of the former. Lat. $28^{\circ} 23'$, long. $79^{\circ} 26'$.

MUHESUR, in the British district Moradabad, lieutenant-gov. of the N.W. Provinces, a village on the route from the town of Moradabad to Meerut, and 80 miles W. of the former. Lat. $28^{\circ} 52'$, long. $78^{\circ} 23'$.

MUHESUR, in the territory of Indore, or the possessions of the Holkar family, a town on the north or right bank of the Nerbudda. It has a fort, containing many houses within its inclosure, but it is in bad repair. The

river, which is here about 2,000 feet wide, has a rapid stream of blue water, rushing over a rocky bottom; the banks are sixty or eighty feet high in the dry season, yet even then the stream, though shallow, is still rapid. Access to the water is gained by a ghat or vast flight of stone stairs, which extends below the water at its lowest stage. Jacquemont, at the time of his visit in 1832, found above 1,000 workmen employed on a spacious palace then in the course of construction by order of Holkar. It is built of grey basalt, and is overcharged with sculptures of human beings, and of elephants, tigers, and other beasts. Muhesur was formerly the residence of the celebrated Ahalya Bai, relict of Kunda Rao, son of Maharajah Mulhar Rao. She appears to have been a woman of singular ability and munificent disposition, but deeply imbued with Hindoo superstition, which feeling she gratified by the erection of numerous and costly Brahminical temples and fanes, here and elsewhere. In 1820 this place contained 3,500 houses, which, at the usual average, would assign it a population of 17,500. Distance from Mhow, S.W., 28 miles; from Bombay, N.E., 280. Lat. $22^{\circ} 11'$, long. $75^{\circ} 39'$.

MUHILA.—A town in the British district of Tirhoot, presidency of Bengal, 71 miles N.N.E. of Dinapoor. Lat. $26^{\circ} 34'$, long. $85^{\circ} 32'$.

MUHLOG.—See **MHLG.**

MUHOOREE, in the British district of Benares, a town situate on the right bank of the Ganges, 15 miles to the N.E. of Benares. Lat. $25^{\circ} 24'$, long. $83^{\circ} 16'$.

MUHUDWANE, in the British district of Ramguri, territory of Saugor and Nerbudda, lieutenant-gov. of the N.W. Provinces, a town on the route from Ramguri to Jubbulpoor, 21 miles W.N.W. of the former. Lat. $22^{\circ} 56'$, long. $80^{\circ} 44'$.

MUHUL, in Sirhind, a village on the route from Lodiana to Hurreekes Ghat, and 48 miles W. of the former place. It is situate nine miles from the left bank of the Sutlej, in a level country, of no great fertility, scantily cultivated, and generally overrun with grassy jungle. Distant N.W. from Calcutta 1,137 miles. Lat. $31^{\circ} 5'$, long. $75^{\circ} 10'$.

MUI.—A river of Nepal, forming, together with the Ponna, the head-water of the Gonkor river.—See **GONKOR.**

MUICAL.—A town in the British district of Malabar, presidency of Madras, 49 miles S.E. of Cannanore. Lat. $11^{\circ} 24'$, long. $75^{\circ} 58'$.

MUIKELUNG.—A town in the British district of Amherst, in the Tenasserim provinces, presidency of Bengal, 35 miles E. of Moulmein. Lat. $16^{\circ} 30'$, long. $98^{\circ} 13'$.

MUIRRI.—A town in Guzerat, or dominions of the Guicowar, situate 111 miles W. by S. from Rajcote, and 64 miles N.W. by W. from Poorbunder. Lat. $22^{\circ} 6'$, long. $69^{\circ} 10'$.

MUJAHUN.—A town in the Rajpoot state

of Beekaneer, 60 miles N.E. by N. from Beekaneer, and 137 miles W. by S. from Hansi. Lat. 28° 43', long. 73° 54'.

MUJEERWAN, or **MUNJEEAWAN**, in the British district Behar, lieutenant-gov. of Bengal, a small town close to the south frontier, towards Ramguri, and the principal place of a thana or police division of the same name. The town of Mujeerwan is distant S.E. from Benares 85 miles. Lat. 24° 20', long. 83° 50'.

MUJERI, in the British district of Bijnour, lieutenant-gov. of the N.W. Provinces, a village on the route from Moradabad to Hurdwar, and 39 miles N.W. of the former. Lat. 29° 23', long. 78° 32'.

MUJGAON, in the British district of Furruckabad, lieutenant-gov. of the N.W. Provinces, a town on the right bank of the Esun, 25 miles S. of the city of Furruckabad. Lat. 27° 1', long. 79° 35'.

MUJHOWLEE, in the British district of Goruckpore, lieutenant-gov. of the N.W. Provinces, a small town on the left bank of the river termed the "Little Gunduck," connected with Selemoor, opposite to it, on the right. It contains 200 houses, and with Selemoor is usually considered one town, the former the Hindoo, the latter the Mahometan. Here is a brick-built residence belonging to the petty rajah of the country; but his family usually residing on his estates in the adjoining British district of Sarun, he has allowed it to become ruinous. Mujuhowlee is 45 miles S.E. of the cantonment of Goruckpore. Lat. 26° 17', long. 83° 58'.

MUJWAN, in the British district of Allahabad, lieutenant-gov. of the N.W. Provinces, a village on the route, by the Kutra Pass, from the cantonment of Allahabad to Rewa, and 18 miles S.E. of the former. Lat. 25° 17', long. 82° 4'.

MUJHWAR, in the British district of Benares, lieutenant-gov. of the N.W. Provinces, a town on the route from Benares to Sasseram, 19 miles E. of the former. Lat. 25° 14', long. 83° 22'.

MUJJUL.—A town in the Rajpoot state of Jodhpore, situate on the left bank of the Loonee river, and 41 miles S.W. from Jodhpore. Lat. 25° 51', long. 72° 45'.

MUKARARY, in the British district of Malabar, presidency of Madras, a town situate at the western base of the Western Ghats, on a river flowing from that range, and nine miles E. of Cananore. Lat. 11° 52', long. 75° 34'.

MUKDUPPOOR, in the British district of Moradabad, lieutenant-gov. of the N.W. Provinces, a village on the route from the town of Moradabad to that of Mozuffernuggur, and 24 miles N.W. of the former. Distant N.W. from Calcutta 872 miles. Lat. 28° 58', long. 78° 30'.

MUKEER.—A town in the British district

of Sarun, lieutenant-gov. of Bengal, 23 miles N.E. by E. of Chupra. Lat. 25° 56', long. 85° 6'.

MUKIMPOOR, in the British district of Shahjehanpore, lieutenant-gov. of the N.W. Provinces, a village on the route from Bareilly to Lucknow, 58 miles S.E. of the former, 98 N.W. of the latter. Lat. 28° 2', long. 80° 13'.

MUKIMPOOR, in the British district of Boolundshuhur, lieutenant-gov. of the N.W. Provinces, a village on the route from Khasganj to Meerut, and 46 miles S. of the latter. Lat. 28° 22', long. 77° 59'.

MUKKOO.—A town in the British division of the Cis-Sutlej territory, 33 miles E.N.E. of Ferozepore. Lat. 31° 6', long. 75° 5'.

MUKKUD, in the Sindie Sagur Doocah division of the Punjab, a town situated on the left bank of the Indus, 61 miles S. of the town of Peshawur. Lat. 33° 7', long. 71° 50'.

MUKREE, in Bundelcund, a town, the principal place of a jaghire or feudal possession of the same name, containing an area of ten square miles, with a population of 1,600 inhabitants. The town is distant 28 miles N.E. from Punnah, and 30 miles S. by E. from Bandah. Lat. 25° 2', long. 80° 33'.

MUKRUMGURH.—A town in the British province of Sattara, presidency of Bombay, 30 miles W.N.W. of Sattara. Lat. 17° 50', long. 73° 39'.

MUKSOODNUGGUR.—A town in the native state of Gwrlor, or territory of Scindia's family, situate 161 miles S.S.W. from Gwalior, and 101 miles W. by N. from Saugur. Lat. 24° 7', long. 77° 14'.

MUKTULL, in Hyderabad, or territory of the Nizam, a town near the southern frontier, towards the British district of Bellary. It is one of the stations of the British subsidiary force, generally denominated the Nizam's army. Distance from Hyderabad, S.W., direct, 90 miles; Madras, N.W., 305. Lat. 16° 29', long. 77° 31'.

MUKUNPOOR, in the British district of Mynpooree, lieutenant-gov. of the N.W. Provinces, a village on the route from the city of Agra to Etawah, and 39 miles N.W. of the latter. Lat. 27° 7', long. 78° 33'.

MUKUNPOOR, in the British district of Cawnpore, lieutenant-gov. of the N.W. Provinces, a town between the cantonments of Futteh-gurh and Cawnpore, and 34 miles N.W. of the latter. It is noted on account of a much-frequented annual pilgrimage to the tomb of Mudar, a reputed Mussulman saint, who, according to the legend, died at the age of 395 years. The tomb, covered with a canopy of cloth of gold, and situate in the middle of a square building, with four windows of fretwork, is from time to time perfumed with otto of roses. There is also a mosque, and

MUL.

in front of it a fountain. Lat. $26^{\circ} 54'$, long. $80^{\circ} 2'$.

MULAHUR, in the Rajpoot state of Jodhpoor, a village on the route from the town of Bikaner to that of Phulodi, and five miles N. of the latter. Lat. $27^{\circ} 13'$, long. $72^{\circ} 26'$.

MULAIR KOTLAH, in Sirhind, a town on the route from Patiala to Ferozepore, and 45 miles N.W. of the former town. It is the principal place of a district held by a Sikh chief, under the protection and control of the British government, and which is stated to have an area of 144 square miles, and a population of above 21,000. The town is distant N.W. from Calcutta, by Delhi and Hansee, 1,100 miles. Lat. $30^{\circ} 31'$, long. $75^{\circ} 59'$.

MULANUH, in the British district of Umballah, in the territory of Sirhind, a town on the route from Suharunpoor to Loodiana, and 41 miles N.W. of the former place. Like most of the towns of this country, it is walled round, and has a small fort. Distant N.W. from Calcutta, by Delhi and Kurnaul, 1,000 miles. Lat. $30^{\circ} 17'$, long. $77^{\circ} 7'$.

MULAREE, in the British district of Kumaon, lieut.-gov. of the N.W. Provinces, a village on the route from Joshimath to the Niti Pass, and 20 miles S. of the latter. The village contains about twenty houses, built of wood and stone intermixed, and cemented with mud. Some of the houses are two or three stories high; in which case, the lower story is used for housing cattle. Large stones are hung by means of ropes from the projecting beams of the roofs, to prevent them from being blown away by the violent storms common here. A wooden veranda projects from the upper story, and is ornamented with carvings of flowers, and of Ganesa and other Hindoo deities. There are no locks to the houses, which, in the absence of the owners, are secured from trespass merely by dogs tied to the doors. The inhabitants style themselves Rajpoots, but have no regard to the observances of caste, eating raw flesh seasoned with a little salt and pepper, and have no repugnance to it even in a tainted state. Their features denote a mixture of the Hindoo and Tartar races: their stature is low, but they are well made, active, and enduring of labour. The fleeces of their own flocks supply their dress, which is of coarse woollen cloth, in the manufacture of which the women are skilful and industrious. Their persons are excessively filthy, and swarm with vermin, and the state of their dwellings is equally disgusting. They inhabit this part of Kumaon only from about the 24th of May to the 23rd of September, when they migrate to less-elevated places. Their principal means of support is the trade which they drive between Tartary and the low country to the south, conveying the merchandise on the backs of goats and sheep. They also cultivate lal sag, a species of amaranth, used as a potherb, and also for the suet, which is ground into meal;

and besides this, they grow buckwheat, millet, barley, and other grains suited to an elevated and inclement climate. Batten found, in the beginning of October, the ground, at the elevation of 10,250 feet above the sea, covered with harvest sheaves, though the perennial snow-line was near, and only 3,000 feet higher. In the vicinity are mines of a galena ore, yielding a considerable proportion of silver. Lat. $30^{\circ} 41'$, long. $79^{\circ} 56'$.

MULARNEE.—See **DONGER MULARNEE**.

MULBA, in the Rajpoot state of Jodhpoor, a village on the route from Balotra to the city of Jodhpoor, and 37 miles N.E. of the former. Lat. $26^{\circ} 6'$, long. $72^{\circ} 50'$.

MULCAULGHERRY.—A town in the territory of Nagpore or Berar, situate 124 miles N. by E. from Masulipatam, and 71 miles N. by W. from Rajahmundry. Lat. $16^{\circ} 57'$, long. $80^{\circ} 35'$.

MULGHAT.—A town in the territory of Oude, situate 124 miles E.S.E. from Khatmandoo, and 90 miles N.N.W. from Purneah. Lat. 27° , long. $86^{\circ} 7'$.

MULGOON, in Bussahir, a large torrent of the district of Koonawur, rises about lat. $31^{\circ} 40'$, long. $78^{\circ} 12'$, on the south-eastern declivity of the Damuk Shu, a very lofty range dividing that territory from Ladakh. Gerard describes it as "a large stream descending at a considerable angle, rushing over rocks with rapid force, and forming a series of cascades." It is crossed by the route from Chini to Pungi, in a spot having an elevation of 8,170 feet above the sea, and where the stream, divided by a mass of rock, is traversed by two sangas or wooden bridges. After a course of about fifteen miles in a south-easterly direction, it falls into the Sutlej on the right side, in lat. $31^{\circ} 35'$, long. $78^{\circ} 21'$.

MULHARA, in the territory of Chutterpore, in Bundelcund, a small town on the route from Banda to Saugor, 60 miles S.W. of the former, 112 N.E. of the latter, is situate on the west of an extensive jhil or mere. It has a bazar. Lat. $25^{\circ} 2'$, long. $79^{\circ} 44'$.

MULHARGURH, in the territory of Indore, or possessions of Holkar's family, a town on the route from Neemuch to Mow, 10 miles S. of former, 141 N.W. of latter. It has a bazar, and is supplied with water from wells. The pergunnah of which it is the principal place, contains 49 villages, yields an annual revenue of 81,722 rupees, and is part of the jaghire or feudal grant of the nawaub of Joura, son of Ghufur Khan, the Patan chieftain, to whom they were assigned by the British government on the conclusion of hostilities with Holkar in 1817. Lat. $24^{\circ} 19'$, long. $74^{\circ} 58'$.

MULHEEBAD, in the territory of Oude, a town on the route from Lucknow to Shahjehanpoor, 12 miles N.W. of the former, situate on the small river Betta, a tributary of the Ghaghra. The inhabitants are principally Patans. Lat. $26^{\circ} 54'$, long. $80^{\circ} 49'$.

MUL.

MULHEPOOR, in the British district of Suharunpoor, lieut.-gov. of the N.W. Provinces, a town on the route from Suharunpoor to Muzufurnugur, five miles S. of the former. Lat. $29^{\circ} 54'$, long. $77^{\circ} 38'$.

MULHOOPOR, or **MULUPOOR**, in the British district of Agra, a village on the route from the city of Agra to Allygurh, and 11 miles north of the former. Lat. $27^{\circ} 17'$, long. $78^{\circ} 5'$.

MULIKPOOR, in the British district of Boohundshuhur, lieut.-gov. of the N.W. Provinces, a town on the route from Anoopshuhur to Khoorjuh, and five miles W. of the former. Lat. $28^{\circ} 20'$, long. $78^{\circ} 15'$.

MULINATH KA THAN, in the Rajpoot state of Jodhpoor, a town on the route from Palmer to the city of Jodhpoor, and 72 miles S. of the latter. It is situate on the right bank of the river Loonee, here a very rapid stream, a quarter of a mile wide during the rainy season. Here are the shrine and sanctuary of Mulinath, a reputed saint, whose memory is by superstition supplied with the usual assortment of Hindoo miracles. Lat. $25^{\circ} 53'$, long. $72^{\circ} 9'$.

MULIPOOR, in Sirhind, a village on the western route from Thanesur to the town of Sirhind, and 48 miles N.W. of the former. It is protected by a small fort, and is situated in a level, fertile, and pleasing country. Distant N.W. from Calcutta 1,036 miles. Lat. $30^{\circ} 29'$, long. $76^{\circ} 30'$.

MULKA, in the Baree Doab division of the Punjab, a town situated 19 miles N.W. from the right bank of the Sutlej, 105 miles S.W. by S. of the town of Lahore. Lat. $30^{\circ} 24'$, long. $73^{\circ} 17'$.

MULKAIR, in Hyderabad, or the territory of the Nizam, a town on a considerable tributary of the river Beema. Distance from the city of Hyderabad, W., 86 miles. Lat. $17^{\circ} 10'$, long. $77^{\circ} 19'$.

MULKAPOOR.—A town in Hyderabad, or dominions of the Nizam, situate on the left bank of the river Poorna, and 111 miles S.W. from Ellichpoor. Lat. $20^{\circ} 4'$, long. $76^{\circ} 22'$.

MULKAPOOR.—A town in the native state of Kolapoora, presidency of Bombay, 22 miles N.W. by W. from Kolapoora, and 55 miles S. from Sattara. Lat. $16^{\circ} 53'$, long. $74^{\circ} 1'$.

MULKAPOOR.—A town in one of the recently sequestered districts of Hyderabad, or dominions of the Nizam, situate in the valley of the Taptee, 12 miles S. of the left bank of that river, 92 miles W.S.W. of Ellichpoor. Lat. $20^{\circ} 51'$, long. $76^{\circ} 14'$.

MULL, in Sind, an offset on the left or eastern side of the Sata, or great eastern branch of the Indus. Though once a large stream, it has now become a shallow rivulet, discharging a scanty body of water through the Mulla mouth, in lat. $23^{\circ} 55'$, long. $67^{\circ} 44'$.

MULLANGOOR, in Hyderabad, or terri-

tory of the Nizam, a town 85 miles N.E. of the city of Hyderabad. Lat. $18^{\circ} 20'$, long. $79^{\circ} 23'$.

MULLAOW.—A town in Guzerat, or dominions of the Guicowar, 33 miles N.E. from Baroda, and 68 miles E.S.E. from Ahmedabad. Lat. $22^{\circ} 37'$, long. $73^{\circ} 32'$.

MULLAPOOR.—A town in the territory of Oude, on the right bank of the Ghogra, and 63 miles N.N.E. from Lucknow. Lat. $27^{\circ} 43'$, long. $81^{\circ} 20'$.

MULLICKBAG.—A town at the north-western extremity of the British district of Baraset, lieut.-gov. of Bengal, distant from Calcutta, N., 25 miles. Lat. $22^{\circ} 56'$, long. $88^{\circ} 24'$.

MULLUK HARHUR, in the British district of Allahabad, lieut.-gov. of the N.W. Provinces, a village on the route from the city of Allahabad to Lucknow, and six miles N.W. of the former. Lat. $25^{\circ} 32'$, long. $81^{\circ} 43'$.

MULLYE, in the British district of Sarun, lieut.-gov. of Bengal, a town and military cantonment on the north-east frontier, towards the British district Tirhoot. It is situate on the left or east bank of the river Bagmuttee, here crossed by a wooden bridge. Distant E. from Goruckpore 149 miles; from Dinapore, N., 85. Lat. $26^{\circ} 46'$, long. $85^{\circ} 29'$.

MULMULA.—A town in the native state of Nepal, 153 miles W. from Khatmandoo, and 82 miles N.W. by N. from Goruckpoor. Lat. $27^{\circ} 46'$, long. $82^{\circ} 50'$.

MULPURBA, a river rising on the eastern slope of the Western Ghats, in lat. $15^{\circ} 45'$, long. $74^{\circ} 19'$, and, flowing in an easterly direction through the British district of Belgaum for 160 miles, in the course of which it touches upon or traverses some of the Southern-Mahratta states situate in that district, falls into the Kistnah river on the right side, in lat. $16^{\circ} 12'$, long. $76^{\circ} 9'$.

MULSEI, in the British district of Allygurh, lieut.-gov. of the N.W. Provinces, a village on the route by Khasganj from Bareilly to Allygurh cantonment, and 28 miles S.E. of the latter, 53 N.E. of Agra. Lat. $27^{\circ} 51'$, long. $78^{\circ} 32'$.

MULTOWN, in the British territory of Saugor and Nerbudda, a town on the south declivity of the Narat Ghat or pass, to the crest of which the ascent is gentle. It has a fort which commands the pass. Lat. $24^{\circ} 18'$, long. $78^{\circ} 37'$.

MULUGI.—A town in the British district of Dharwar, presidency of Bombay, 50 miles S. by E. of Dharwar. Lat. $14^{\circ} 46'$, long. $75^{\circ} 13'$.

MULWAH, in the British district of Futtehpore, lieut.-gov. of the N.W. Provinces, a village on the route from Cawnpore to the town of Futtehpore, and 10 miles N.E. of the latter. Lat. $26^{\circ} 2'$, long. $80^{\circ} 46'$.

MUM—MUN.

MUMOREEBUSTEE, in the Baree Doab division of the Punjab, a town situated on the left bank of the Ravee, 105 miles S.W. of the town of Lahore. Lat. $30^{\circ} 43'$, long. $72^{\circ} 57'$.

MUNAHPAUD, in the British district of Tinnevely, presidency of Madras, a town on the seacoast, on the south-west side of the estuary of the river Naut. The point is low and sandy; the soundings are irregular round it; there is a shoal projecting four miles north-east of it; there are other dangerous shoals and rocks to the east, and it is altogether a hazardous place for shipping. It is distant from Cape Comorin, N.E., 41 miles. Lat. $8^{\circ} 23'$, long. $78^{\circ} 7'$.

MUNARA.—A town of Sind, in the British district of Kurachee, presidency of Bombay, 60 miles S.E. by S. of Kurachee. Lat. $24^{\circ} 11'$, long. $67^{\circ} 40'$.

MUNCHUR, in Sind, a lake formed by the expansion of the Narra, a branch proceeding from the Indus on the western side. The Narra flows into the lake on the north, the redundant water being discharged on the south-east by the river Arul, which has a course of about twelve miles, and, flowing by Sehwan, falls into the Indus about four miles below that town. The lake is nearly of a circular form when the water is low, and is then about ten miles in diameter. During the inundation, it expands so as to be twenty miles long, the breadth remaining much as before. The space left uncovered by the receding water is sown with grain, especially wheat, which yields very heavy crops. Though shallow at the sides, the lake has a considerable depth of water in the middle, and so great is the abundance of fine fish, according to Burnes, that 1,000 boats are employed in the fishery. They are taken by spearing, the great quantity of weeds preventing the employment of nets. In the season when the lotus is in blossom, the lake presents a very beautiful appearance, as its surface, farther than the eye can reach, is covered with an unbroken succession of bloom and leaves. Lat. $26^{\circ} 26'$, long. $67^{\circ} 43'$.

MUNCURRAY.—A town in the British district of Malabar, presidency of Madras, 106 miles S.E. of Cannanore. Lat. $10^{\circ} 47'$, long. $76^{\circ} 32'$.

MUNDAEE, in the Rajpoot state of Shekawuttee, a village situate 80 miles E.S.E. from Delhi. Lat. $28^{\circ} 13'$, long. $76^{\circ} 3'$.

MUNDAGNEE, or **MANDAKINI**, called also Kales, a feeder of the Aluknunda, rises on the boundary between Gurhwal and Kumaon, at the south-eastern base of Kedarnath Mountain, and in lat. $30^{\circ} 47'$, long. $79^{\circ} 8'$. It holds a course generally southerly, and in lat. $30^{\circ} 32'$, long. $79^{\circ} 9'$, receives the Jugaroo or Mudmesur on the left side. Continuing to flow in a southerly direction, it falls into the Aluknunda on the right side, at Roodurprag, in lat. $30^{\circ} 17'$, long. $79^{\circ} 1'$, after a total course of about forty-five miles, forming, for its whole

length, the boundary between the state of Gurhwal and the British province of Kumaon.

MUNDAHUL, in the British district of Rohtuk, lieutenant-gov. of the N.W. Provinces, a village on the route from Delhi to Hansee, and 15 miles S.E. of the latter. Lat. $29^{\circ} 1'$, long. $76^{\circ} 15'$.

MUNDAI, in the British district of Futtehpore, lieutenant-gov. of the N.W. Provinces, a village on the left bank of the Jumna, 26 miles S.E. of the town of Futtehpore. Lat. $25^{\circ} 33'$, long. $81^{\circ} 10'$.

MUNDAKE SERAE, in the British district of Futtehpore, lieutenant-gov. of the N.W. Provinces, a village on the route from Allahabad to the town of Futtehpore, and 13 miles S.E. of the latter. It has a few shops. Lat. $25^{\circ} 54'$, long. $81^{\circ} 4'$.

MUNDALIA, in the Rajpoot state of Jodhpore, a village on the route from the town of Jodhpore to that of Ajmeer, and 46 miles N.E. of the former. It is of considerable size, containing twenty shops. Lat. $26^{\circ} 26'$, long. $73^{\circ} 47'$.

MUNDALO, in the jaghire of Jujhur, lieutenant-gov. of the N.W. Provinces, a village on the route from Rohtuk to Narnol, and 35 miles S.W. of the former. Lat. $28^{\circ} 29'$, long. $76^{\circ} 18'$.

MUNDALOR, in Gwalior, or the possessions of Scindia, a town on the route from Nussarabad to Gwalior, by the town of Kerowly, 174 miles E. of the former, 67 W. of latter. It is situate on a round isolated hill, two miles north of the left or north bank of the river Chumbul, and is surrounded by a wall of masonry. Distant from Jeypoor, S.E., 98 miles; S. from Bhurtpoor 70; S.W. from Agra 80. Lat. $26^{\circ} 18'$, long. $77^{\circ} 14'$.

MUNDANA.—A town in the British district of Candeish, presidency of Bombay, 76 miles N. by E. of Malligaum. Lat. $21^{\circ} 37'$, long. $74^{\circ} 44'$.

MUNDAWUL.—A town of Malwa, in the native state of Jowra, situate on the right bank of the Chumbul river, and 38 miles N.W. from Oojein. Lat. $23^{\circ} 35'$, long. $75^{\circ} 24'$.

MUNDAWUR, in the British district of Bijnour, lieutenant-gov. of the N.W. Provinces, a town on the route from Bijnour to Hurdwar, nine miles N. of the former place. Mundawur has a population of 7,737 inhabitants. Lat. $29^{\circ} 28'$, long. $78^{\circ} 12'$.

MUNDESI, in the British district of Muttra, lieutenant-gov. of the N.W. Provinces, a town on the route from the cantonment of Muttra to Bhurtpoor, and 17 miles N.W. of the latter. Lat. $27^{\circ} 24'$, long. $77^{\circ} 42'$.

MUNDESOR, in the territory of Gwalior, or possessions of Scindia's family, a town situate on a tributary of the Chumbul. It is the principal place of a pergunnah assessed at the annual revenue of 18,20,000 rupees. It has a large and generally well-supplied bazar.

MUN.

Here, in January, 1818, was concluded the definitive treaty between the British government and Mulhar Rao Holkar. Distant S.W. from Gwalior fort 250 miles, N.W. from Oojein 80. Elevation above the sea 1,452 feet. Lat. 24° 4', long. 75° 9'.

MUNDEWATA.—A town in the native state of Gwalior, or territory of Scindia's family, situate 86 miles N.N.E. from Oojein, and 95 miles W.N.W. from Bhopal. Lat. 23° 39', long. 75° 58'.

MUNDHA, in the Rajpoot state of Jessulmere, a village on the route from the town of Jessulmere to that of Bahawalpore, and 32 miles N. of the former. It is situate at the eastern side of a fine and well-filled tank, and has besides a well 180 feet deep. Close to the village is a large bed of very fine fuller's earth. Lat. 27° 21', long. 71°.

MUNDHA, in the territory of Oude, a village on the route from Futtelgurh cantonment to that of Seetapoor, 56 miles N.E. of the former, 27 W. of the latter. Supplies may be had here. Distant 75 miles from Lucknow. Lat. 27° 35', long. 80° 24'.

MUNDI, in the Jullunder Doab of the Punjab, is a small territory, comprising several valleys, with their inclosing ridges, on the southern slope of the Himalaya, and containing an area of 759 square miles, with a population of 113,091. The capital, which is also called Mundi, is situate at the confluence of the Sukyt river with the Beas, which is here 200 yards wide, very deep, and crossed by a ferry. These rivers during summer have, every twenty-four hours, a periodical rise and fall, in consequence of the melting of snow by the heat of the sun, so that they rise towards evening, and continue to do so throughout the greater part of the night, decreasing towards morning and throughout the forenoon. The rajah's palace is an extensive building, with whitened walls, and covered with slate. It is surrounded by a beautiful garden, containing a profusion of the finest fruit-trees and flowers. The bazar is large and well stocked. Mundi seems to be peculiarly under the influence of Hindoo superstition; and the horrible rite of suttee, or burning the sati or widow with the corpse of her husband, was frightfully prevalent during the rule of the Seiks. In the vicinity are productive mines of iron and salt, and the greater part of the revenue of the prince is derived from these sources. The salt, however, is said to be of inferior description. Upon the conquest of the Punjab, Mundi became tributary to the British, and upon the death of the rajah, in 1851, and the succession of his infant son, arrangements were made for the government of this petty state. The town is in lat. 31° 43', long. 76° 58'.

MUNDI, in the British district of Allahabad, lieut.-gov. of the N.W. Provinces, a village on the route, by the Kutra Pass, from Allahabad to Rewa, and 32 miles S.E. of the former city. Lat. 25° 12', long. 82° 15'.

MUNDLA, in the Rajpoot state of Jodhpoor, a village on the route from Pokhurn to the town of Jodhpoor, and 20 miles E. of the former. It is supplied with water from four tanks, and five wells ninety feet deep. Lat. 26° 52', long. 72° 40'.

MUNDLAH, within the British territory of Saugor and Nerbudda, a town situate on the right bank of the river Nerbudda, the course of which here makes an acute angle opposite the mouth of a small tributary stream called the Bunjir. A ditch, communicating with the Nerbudda above and below the town, forms the base of the triangular spot on which it is situate. The fort occupies the apex of the triangle, the town the more expanded part towards the north, or next the open country. The side towards the north is, in addition to the ditch, fortified by a straight line of works, but these are of little strength, having only the common defences of round towers. This line can be taken in reverse from the opposite bank, both above and below the fort, as no works cover the town along the river. At present those fortifications, as well as the town itself, are in a ruinous state, probably in consequence mainly of the effects of the British attack during the Mahratta war having never been repaired. On the 25th of April, 1818, a British force under General Marshall opened batteries against the place, and in the afternoon of the next day the town was stormed, with the destruction of all the troops not within the fort, except about fifty, who were made prisoners; and on the following morning the fort was evacuated by the garrison, in number about 1,100. The loss of the enemy during the operations against the place was estimated at about 500, while that of the besiegers amounted to only three killed and fourteen wounded.

Mundlah in 1742 came into the hands of the Mahrattas, under Balaji Baji Rao, the Peishwa. It appears to have subsequently passed from under their yoke, as in 1799 it was surrendered to the rajah of Nagpore or Berar by the chief of Saugor. The British government, having previously obtained actual possession by the event of war, received a formal cession of it by the treaty of Nagpore, in 1818. Distant S.E. from Jubbulpore 50 miles; S.E. from Saugor 130; S.W. from Allahabad, by Jubbulpore, 245; N.E. from Nagpore 135; W. from Calcutta 510 miles; N.E. from Bombay, by Mow and Jubbulpore, 635. Lat. 22° 43', long. 80° 35'.

MUNDLAISIR, in the territory of Indore, or possessions of Holkar's family, a town on the route from the British cantonment of Mow to Asseergurh, 30 miles S. of former, 83 N.W. of latter. It is situate on the right or north bank of the Nerbudda, the bed of which is here about 500 yards wide, unfordable, and crossed by ferry during the greater part of the year, but fordable with difficulty in spring. The navigation of the

Nerbudda from this town extends seaward, or to the west, for eighty miles, and eastward, or up the stream, for fifty-three miles, to Dhadree. The town is surrounded by a mud wall, and has a small square well-built fort of masonry, and a bazar. It belongs to the British government, and there was formerly a cantonment of its troops on the north bank of the Nerbudda, close to the town. A body of the Nimar police, with cavalry attached, is posted in the town, for the protection of the establishment of the British functionary stationed here, and who is styled "principal assistant to the resident at Indore." This principal assistant has charge of the British possessions in Nimar, and of the possessions of Holkar under British management. Population about 2,000; elevation above the sea 696 feet. Distance N.E. from Bombay 334 miles; N.W. from Nagpoor, by Baitool and Mow, 327. Lat. 22° 12', long. 75° 47'.

MUNDOR, in the Rajpoot state of Jodhpoor, was its capital until A.D. 1459, when Joda removed the seat of government to the neighbouring city of Jodhpoor, which he had recently built. The ruined town of Mundor, still retaining a few inhabitants, is situate in a recess on the east side of the rocky range running south to the town of Jodhpoor, from which it is five miles distant. The greater part of the walls has been demolished, and the materials removed to build the new capital; but enough remains to show the massive style in which they were constructed. According to the description of those relics by Tod, "the immense blocks are piled upon and closely fitted to each other, without any cement, the characteristic of all the Etruscan cities termed Cyclopean. The walls, following the direction of the crest of the ridge, are irregular; and, having been constructed long before artillery was thought of, the Purihar or Pali engineer was satisfied with placing the palace on the most commanding eminence, about the centre of the fortress. The bastions or towers are singularly massive, and, like all the most antique, their form is square." The interior of this inclosure contains various ruins, replete with all the revolting monstrosities with which the imagination of Indian superstition is haunted. Tod disports himself in a scene so congenial to him:—"A short distance from the foot of the causeway an archway opens into an inclosed court or area, in the retired part of which, and touching the mountain, is an extensive saloon: the roof is supported by a triple row of columns of that light form peculiar to the Jains. Here are displayed, in all 'the pomp and circumstance of war,' the statues of the knights errant of the desert, armed *cap-a-pie*, bestriding steeds whose names are deathless as their riders, all in the costume of the times in which they lived. They are cut out of the rock, but entirely detached from it, and larger than life. Though more conspicuous for strength than symmetry, the grim

visages of these worthies, apparently frowning defiance, each attended by his pundoo or squire, have a *singularly pleasing effect*. Each chieftain is armed with lance, sword, and buckler, with quiver and arrows, and poniard in his girdle." Boileau states that those rude figures are formed of plaster. He thus describes the fantastic scene:—"The first objects introduced to our notice at Mundor, were the eighteen gigantic figures in bas-relief, representing the tutelar divinities of the Rahtor Rajpoots. These figures form one long line, facing the north, and are backed by a low rock of red sandstone; the three figures at the west end representing Gunes, the elephant-headed god of wisdom, between two effigies of Bhairon, being placed in an open temple, while the others are carefully protected from the weather by a flat roof of masonry, supported on pillars, with a screen-wall in front. The latter indeed require some such shelter, being finished with coloured cements, while the three figures already mentioned seem to be only daubed with red paint, and bedizened with gold-leaf." There are besides gigantic figures in plaster of the Brahminical deities Brahma, Surya, the monkey-god Hanuman, Rama and his consort Sita, Krisana, and Siva. Some ruins of more ancient date are attributed by Tod to the Buddhists or Jains. Amongst those of late date, the most important is the palace of Ajit Sinh, murdered, in 1724, by his son Abhay Sinh. It is neatly built of stone, and in perfect repair; now without human inhabitant, but swarming with bats. Every Monday there is at Mundor a considerable concourse of devotees, who come from Jodhpoor to pay their devotions at the various shrines. Lat. 26° 21', long. 73° 8'.

MUNDOTE, in Sirhind, a fort about two miles south of the left bank of the Sutlej, in its lowest state, though in time of inundation the water reaches to within half a mile of the walls. It is square, with a round tower at each corner, and one in the middle of each face, and has a gateway on the eastern, and another on the western side. The walls, which are of burned brick, are fifty feet high and ten thick. The earth excavated from the outward moat has been employed to raise the surface of the inclosed space to half the height of the walls. A dense population is crowded into this inclosure, as it is entirely occupied by houses arranged in very narrow streets. The surrounding country is flat, so that the view is very extensive from the towers surmounting the walls. This fort is of modern erection, being built to replace one constructed in the reign of Mahommed Shah III., king of Delhi. It was held by a Patan chief, whom it was found necessary to depose in consequence of the oppressive and tyrannical character of his government. The territory extending about fifty miles along the river, and having an area of about 780 miles, has been annexed

MUN.

to the British dominions. The population is believed to be upwards of 116,000. Mundote is distant from Calcutta, N.W., by way of Loodiana and Ferozepore, 1,180 miles. Lat. $30^{\circ} 53'$, long. $74^{\circ} 26'$.

MUNDOWI, in the British district of Kythul, in Sirhind, a village on the route from Hansee to Loodiana, and 51 miles N. of the former town. It is situate amidst thick jungle, on the left bank of the Gugur. The road in this part of the route is excellent. Distant N.W. from Calcutta 1,027 miles. Lat. $29^{\circ} 48'$, long. $76^{\circ} 3'$.

MUNDRELA.—A town in the Rajpoot state of Shekawuttee, 13 miles N. from Jhoonjhnoo, and 111 miles W.S.W. from Delhi. Lat. $28^{\circ} 8'$, long. $75^{\circ} 32'$.

MUNDROOP.—A town in the British district of Sholapoor, presidency of Bombay, 14 miles S.S.W. of Sholapoor. Lat. $17^{\circ} 28'$, long. $75^{\circ} 52'$.

MUNDSIR, in the Rajpoot state of Beekaneer, a considerable village on the route from Rutungurh to the town of Beekaneer, and 30 miles E. of the latter. It contains 200 houses, supplied with water from three wells 290 feet deep. The surrounding country has a scanty cultivation. Lat. $27^{\circ} 54'$, long. $73^{\circ} 43'$.

MUNDUL.—A town in the British district of Ahmedabad, presidency of Bombay, 51 miles W. by N. of Ahmedabad. Lat. $23^{\circ} 16'$, long. $71^{\circ} 50'$.

MUNDUL.—A town in the Rajpoot state of Oodeypoor, 76 miles N.E. from Oodeypoor, and 75 miles S. from Ajmeer. Lat. $25^{\circ} 25'$, long. $74^{\circ} 37'$.

MUNDUN, in the territory of Alwur, under the political management of the Governor-General's agent in Rajpootana, a town on the route from Rewari to Narnol, and 18 miles N.E. of the latter. Lat. $28^{\circ} 6'$, long. $76^{\circ} 27'$.

MUNEE, in the British district of Boolundshuhur, lieut.-gov. of the N.W. Provinces, a village on the route from Allygurh cantonment to that of Delhi, and 18 miles N.W. of the former. The road in this part of the route is good; the country open, with a sandy soil, partially cultivated. Lat. $28^{\circ} 7'$, long. $77^{\circ} 59'$.

MUNEEMAJRA, in Sirhind, a town on the route from Umballah to Ropur, on the Sutlej, and 25 miles N. of the former place. It is situate near the southern base of the Sub-Himalaya, in a fertile country, producing great quantities of indigo, which is exported to the Punjab and to Khorasan. There is a good bazar, and water and supplies are abundant. The road in this part of the route is good, over an undulating country. This town is the principal place of a small territory belonging to a Sikh sirdar, and comprising fifty-nine villages, having an area of eighty square miles, with a population of 16,720. The annual revenue is estimated at 4,700*l.* sterling. Muneemajra is distant N.W. from Calcutta 1,043 miles. Lat. $30^{\circ} 48'$, long. $76^{\circ} 54'$.

MUNEIPOOR, in Eastern India, a native state, bounded on the north-east, east, and south by the Burmese empire; on the west by the British district of Cachar and Toola Ram Senaputtee's country; and on the N.W. by Upper Assam. It extends from lat. $23^{\circ} 49'$ to $25^{\circ} 41'$, and from long. $92^{\circ} 5'$ to $94^{\circ} 32'$; is 125 miles in length from north to south, and ninety miles in breadth, and contains an area of 7,584 square miles. The territory is intersected by a good road in the direction of Cachar, constructed in 1840, at the joint expense of the British and Muneepoor governments.

Muneepoor consists principally of one extensive valley, situated in the heart of a difficult and mountainous country. The principality was taken under British protection previously to the breaking out of the first Burmese war; and under the treaty of Yandaboo, concluded in 1826, the king of Ava renounced all claim to the territory. It pays no tribute, but its connection with the British government was at one time deemed of importance, as affording an outpost against the Burmese; and to render it available for this purpose, its rulers were assisted in disciplining a body of troops. The views of the Indian government in regard to the utility of Muneepoor as a military station appear, however, to have subsequently undergone considerable change. Upon the lapse of Cachar to the paramount power, by the death of its rajah in 1830 without heirs, the British government manifested its friendly feeling towards the ruler of Muneepoor, by conferring upon him a portion of its new acquisition; and upon the death of this chief in 1834, his infant son, Kirtee Singh, was recognised as successor to the raj, and a regency appointed, of which the Senaputtee Nur Sing was the head. Nur Sing appears subsequently to have taken possession of the country for himself. He died in the year 1850, having nominated his brother, Deebindro Singh, as his successor, who was recognised by the British. But the ex-rajah, Kirtee Sing, invading Muneepoor, succeeded in regaining his throne, and drove Deebindro into exile. To put an end to these changes, which subjected the country to constant anarchy and insurrection, the British government made a public avowal of its determination to uphold the reigning rajah, and to punish any parties attempting to dispossess him. The ex-rajah Deebindro resides at Dacca.

MUNEIPOOR.—A town in the native state of Muneepoor, in Eastern India, on the right bank of the Nankatha Khyoung river, and 76 miles E. from Silchar. Lat. $24^{\circ} 49'$, long. $94^{\circ} 1'$.

MUNEER.—A town in the British district of Ghazepore, lieut.-gov. of the N.W. Provinces. The town of Muneer is situate in lat. $25^{\circ} 57'$, long. $84^{\circ} 19'$.

MUNEEREE.—A town in the native

MUN.

state of Sawuntwaree, presidency of Bombay, situate 16 miles S from Sawuntwaree, and 40 miles W. by S. from Belgaum. Lat. $15^{\circ} 42'$, long. $74^{\circ} 1'$.

MUNGAON, in the British district of Allahabad, lieutenant-gov. of the N.W. Provinces, a small town on the route from the cantonment of Allahabad to Futtehpore, and 18 miles N.W. of the former. Lat. $25^{\circ} 31'$, long. $81^{\circ} 40'$.

MUNGARA, in the Rajpoot state of Jodhpore, a village on the route from Balotra to the city of Jodhpore, and three miles N.E. of the former. Lat. $25^{\circ} 52'$, long. $72^{\circ} 21'$.

MUNGARI, in the British district of Allahabad, lieutenant-gov. of the N.W. Provinces, a small town on the route by the Kutra Pass from the cantonment of Allahabad to Rewa, and 15 miles S.E. of the former. Lat. $25^{\circ} 18'$, long. 82° .

MUNGDOO.—A town of Eastern India, in the British district of Aracan, 61 miles W. of Aracan. Lat. $20^{\circ} 46'$, long. $92^{\circ} 30'$.

MUNGLAH.—A town within the dominions of Gholab Singh, the ruler of Cashmere, situate on the left bank of the Jhelum river, and 113 miles N. by W. from Lahore. Lat. $33^{\circ} 7'$, long. $73^{\circ} 40'$.

MUNGLOOR.—A town in the British district of Suharunpore, lieutenant-gov. of the N.W. Provinces: it has a population of 5,959. Distance S.E. from Suharunpore 23 miles; from Hurdwar, S.W., 21 miles. Lat. $29^{\circ} 47'$, long. $77^{\circ} 56'$.

MUNGLOLA, in the British district of Mozuffurnuggur, lieutenant-gov. of the N.W. Provinces, a village on the route from Kurnal to Meerut, and 10 miles S.E. of the former. Lat. $29^{\circ} 36'$, long. $77^{\circ} 10'$.

MUNGOLAH, in the British district of Allygurh, lieutenant-gov. of the N.W. Provinces, a village on the route from Allygurh cantonment to that of Moradabad, and 10 miles N.E. of the former. Lat. $28^{\circ} 2'$, long. $78^{\circ} 11'$.

MUNGOWA, or **MAJGOWA**, in the tract of Boghelkhand, in the territory of Rewa, a small town on the route by the Kutra Pass from Mirzapoor to Jubbulpore, and 84 miles S.W. of the former. Jacquement styles it a populous village, the inhabitants of which are wretchedly indigent; and adds his doubts respecting the reported fertility of the country, which Garden describes as "undulating, highly cultivated, and well wooded." There is a large bazar, and water is plentiful. The road in this part of the route is excellent. Elevation above the sea about 1,550 feet. Lat. $24^{\circ} 40'$, long. $81^{\circ} 39'$.

MUNGROTUH, in the Daman division of the Punjab, a town situated 38 miles W. from the right bank of the Indus, 77 miles W.N.W. of the town of Mooltan. Lat. $30^{\circ} 36'$, long. $70^{\circ} 20'$.

MUNGROULEE.—A town in the native

state of Gwalior, or the territory of Scindia' family, situate on the left bank of the Betwa river, and 58 miles N.W. from Saugur. Lat. $24^{\circ} 24'$, long. $78^{\circ} 10'$.

MUNGULCOTE.—A town in the British district of Burdwan, lieutenant-gov. of Bengal, 71 miles N.N.W. of Calcutta. Lat. $23^{\circ} 30'$, long. $87^{\circ} 56'$.

MUNGULPOOR.—A town in the native territory of Dhenkanaul, one of the independent hill states of Orissa, situate 58 miles N.W. by W. from Cuttack, and 100 miles N. from Ganjam. Lat. $20^{\circ} 50'$, long. $85^{\circ} 10'$.

MUNGULPOOR, in the British district of Cawnpoor, lieutenant-gov. of the N.W. Provinces, a town on the route from Cawnpoor to Bhind, 40 miles W. of the former. Lat. $26^{\circ} 31'$, long. $79^{\circ} 46'$.

MUNGULVERA.—A town in the Southern Mahratta jaghire of Sanglee, 31 miles W.S.W. from Sholapoor, and 96 miles E. by S. from Sattara. Lat. $17^{\circ} 30'$, long. $75^{\circ} 30'$.

MUNHYA, in the British district of Allahabad, lieutenant-gov. of the N.W. Provinces, a village on the right bank of the Ganges, nine miles below the city of Allahabad by the river, 799 above Calcutta by the same way. Lat. $25^{\circ} 20'$, long. 82° .

MUNIAH, in the native territory of Dholpoor, a village on the route from Agra to Gwalior, 25 miles S. of former, 44 N. of latter. It has a bazar, and water from wells and from a tank. Lat. $26^{\circ} 50'$, long. $77^{\circ} 59'$.

MUNIKYALA, in the Punjab, a village remarkable on account of an antique monument or tope (as such objects are called by the natives), of great dimensions, said by the people of the neighbourhood to have been built by a prince of the name of Manik. Lat. $33^{\circ} 27'$, long. $73^{\circ} 17'$.

MUNJAISHWAR, in the southern part of the British district of Canara, presidency of Madras, a town on an inlet of the Arabian Sea, or North Indian Ocean, and at the mouth of a river descending from the Ghats. It is described as a large straggling town, containing many good houses. Distant from Mangalore, S., 11 miles; Madras, W., 360. Lat. $12^{\circ} 42'$, long. $74^{\circ} 57'$.

MUNJARY.—A town in the British district of Malabar, presidency of Madras, 72 miles S.E. of Cannanore. Lat. $11^{\circ} 7'$, long. $76^{\circ} 11'$.

MUNJERABAD, in the Mysore, a village with a fort on a hill in the mountainous tract on the south-west frontier, towards Coorg. It is surrounded by dense forests of luxuriant growth, abounding in the sago-palm, one of the largest and most beautiful of that tribe. The trunk consists of a thin ligneous coat, inclosing in the interior a pith, which, being pounded and macerated, and the water allowed to subside, yields the fine farina called sago, used as an article of diet. Like other jungly

MUN—MUR.

places, it is very unhealthy. A road from Mysore into Canara, by the Ghaut of Munjerabad, was some time since sanctioned by the home government. Distance from Seringapatam, N.W., 72 miles. Lat. $12^{\circ} 55'$, long. $75^{\circ} 50'$.

MUNJH, in the British district of Etawah, lieutenant-gov. of the N.W. Provinces, a small town on a mound, nearly a mile to the south-east of the route from the cantonment of Etawa to that of Futtehghurh, and 13 miles N.E. of the former. Lat. $26^{\circ} 55'$, long. $79^{\circ} 13'$.

MUNKAPOOR.—A town in the territory of Oude, 20 miles N. from Oude, and 77 miles W.N.W. from Goruckpoor. Lat. $27^{\circ} 3'$, long. $82^{\circ} 13'$.

MUNKOLAH, in the British district of Goorgaon, lieutenant-gov. of the N.W. Provinces, a village on the route from Hansee to Muttra, and 58 miles N.W. of the latter. Lat. $28^{\circ} 8'$, long. $77^{\circ} 14'$.

MUNNADA, a river of Hyderabad, or territory of the Nizam, rising in lat. $18^{\circ} 40'$, long. $76^{\circ} 45'$, and, flowing in an easterly direction for ninety-five miles, falls into the Manjera, on the left bank, in lat. $18^{\circ} 40'$, long. $77^{\circ} 47'$.

MUNNARGOODY.—A town in the British district of South Arcot, presidency of Madras, 134 miles S.S.W. of Madras. Lat. $11^{\circ} 19'$, long. $79^{\circ} 38'$.

MUNNEAREE.—A town in the British district of Purneah, lieutenant-gov. of Bengal, 34 miles S. by E. of Purneah. Lat. $25^{\circ} 18'$, long. $87^{\circ} 14'$.

MUNNIPORE.—See **MUNEEPPOOR**.

MUNNOOR.—A town in one of the recently sequestered districts of Hyderabad, or dominions of the Nizam, situate 27 miles S.E. by S. of Sholapoor. Lat. $17^{\circ} 19'$, long. $76^{\circ} 9'$.

MUNOHURPOOR, in the Rajpoot state of J-yypoor, a town on the route from Delhi to Mow, 132 miles S.W. of former, 375 N.E. of latter. Though much decayed, it has still a large bazar, and is adequately supplied with water from wells. Lat. $27^{\circ} 19'$, long. $76^{\circ} 1'$.

MUNOLEE.—A town in the British district of Belgaum, presidency of Bombay, 42 miles E. of Belgaum. Lat. $15^{\circ} 52'$, long. $75^{\circ} 12'$.

MUNORA.—A town in the British district of Behar, lieutenant-gov. of Bengal, 34 miles N.W. of Sherghotty. Lat. $24^{\circ} 53'$, long. $84^{\circ} 27'$.

MUNPOORA, or **MONCOORAH**.—One of the islands at the mouth of the Megna river. In September, 1822, this island, together with those adjacent, was overflowed, whereby many of the cattle and inhabitants perished. Lat. $22^{\circ} 20'$, long. $91^{\circ} 3'$.

MUNPORA.—A town of Baghelcund, in the native state of Rewah, 47 miles S. from

Rewah, and 39 miles N. from Sohagpoor. Lat. $23^{\circ} 50'$, long. $81^{\circ} 20'$.

MUNSEE DEBEE, in Sirhind, a Hindoo temple and village at the southern base of the low ridge bounding the Pinjor Doon on the south-west. Elevation above the sea 1,263 feet. Lat. $30^{\circ} 43'$, long. $76^{\circ} 56'$.

MUNSOORGUNJ, in the British district of Goruckpoor, lieutenant-gov. of the N.W. Provinces, a small market-town, which formerly gave name to a pergunnah or subdivision. Distant N.E. of Goruckpoor cantonment 20 miles. Lat. $26^{\circ} 52'$, long. $83^{\circ} 38'$.

MUNSORLA.—A town in Hyderabad, or dominions of the Nizam, situate on the left bank of the river Godavery, and 129 miles N.E. by N. from Hyderabad. Lat. $18^{\circ} 59'$, long. $79^{\circ} 30'$.

MUNSURPOOR.—A town in the native state of Narbuh, in Sirhind, or the Cis-Sutlej territory, 20 miles W. from Patialah, and 43 miles S.S.E. from Loodianah. Lat. $30^{\circ} 20'$, long. $76^{\circ} 9'$.

MUNTAREDDY.—A town in the British district of Ganjam, presidency of Madras, 24 miles S.W. by W. of Ganjam. Lat. $19^{\circ} 10'$, long. $84^{\circ} 50'$.

MUNTIM.—A town in Hyderabad, or dominions of the Nizam, situate on the right bank of the river Godavery, and 124 miles N.E. by N. from Hyderabad. Lat. $18^{\circ} 46'$, long. $79^{\circ} 43'$.

MURAMKHOOLEL.—A town in the native state of Muneeppoor, in Eastern India, 46 miles N. from Muneeppoor, and 132 miles E. by N. from Jynteahpore. Lat. $25^{\circ} 29'$, long. $94^{\circ} 9'$.

MURAMKHOORAO.—A town in the native state of Muneeppoor, in Eastern India, 34 miles N. from Muneeppoor, and 128 miles E. by N. from Jynteahpore. Lat. $25^{\circ} 19'$, long. $94^{\circ} 6'$.

MURANG, in Bussahir, a town of the district of Koonawur, is situate on the left bank of the Sutlej, near the confluence of the Tidung. The dell is encircled by lofty mountains at an angle of twenty-five degrees, on every side, except on the westward, where it is open to the Sutlej, on the bank of which there is a small fort. The situation is extremely fine, and the approach to it highly picturesque, leading along the bank of a canal, and through an avenue of apricot-trees. Elevation above the sea 8,500 feet. Lat. $31^{\circ} 36'$, long. $78^{\circ} 30'$.

MURANG.—A town in the native state of Bussahir, situate on the left bank of the Sutlej, and 93 miles N. by E. from Dehra. Lat. $31^{\circ} 35'$, long. $78^{\circ} 27'$.

MURAOON, in the British district of Futtehpoor, lieutenant-gov. of the N.W. Provinces, a village on the route from Allahabad to the town of Futtehpoor, and 11 miles S.E. of the latter. Lat. $25^{\circ} 55'$, long. 81° .

MUR.

MURATGANJ, in the British district of Allahabad, lieutenant-gov. of the N.W. Provinces, a village on the route from Allahabad cantonment to Futtehpoore, and 23 miles N.W. of the former. Lat. 25° 33', long. 81° 37'.

MURCHAGUNJE.—A town in the British district of Mymensing, lieutenant-gov. of Bengal, 197 miles N.E. of Calcutta. Lat. 24° 30', long. 90° 45'.

MURDANA.—A town of Central India, in the British district of Mundlaair, 135 miles W. of Baitool. Lat. 22° 10', long. 75° 55'.

MURDEE.—A town in one of the recently sequestered districts of Hyderabad, or dominions of the Nizam, situate 11 miles N. of Sholapoor. Lat. 17° 49', long. 75° 47'.

MURDLANDA, in the British district of Hurriana, lieutenant-gov. of the N.W. Provinces, a village on the route from Hansi to Loodiana, and 22 miles N. of the former town. Distant N.W. from Calcutta 998 miles. Lat. 29° 23', long. 76° 5'.

MUREAHOO, in the British district of Jounpore, lieutenant-gov. of the N.W. Province, a town, the principal place of the pergunnah of the same name, on the route from Jounpore to Mirzapoor, 32 miles N. of the latter, 12 S. of the former. Lat. 25° 34', long. 82° 41'.

MURELAH.—A village on the route from Nusseerabad to Beekaneer, and 51 miles N.W. of the former. It contains about thirty houses, supplied with water from two tanks. Lat. 26° 37', long. 74° 14'.

MURGAYA, in the British district of Hummerpore, lieutenant-gov. of the N.W. Provinces, a small decayed town on the route from the town of Banda to Calpee, 11 miles S. of the latter. It has a bazar, and the ruins of many brick-built houses prove it to have been formerly a place of some importance. Water is obtainable from wells and a jhil or pond. Lat. 25° 58', long. 79° 50'.

MURHARUH, in the British district of Allyghur, lieutenant-gov. of the N.W. Provinces, a town, the principal place of the pergunnah of the same name, is situate close to the north-west frontier of the district. Lat. 27° 45', long. 78° 38'.

MURIOW, in Eastern India, one of the Cossya hill states, bounded on the north by the British district of Camroop, in Lower Assam; on the east by the Cossya state of Osimlee; on the south by those of Moeyong and Nuotung; and on the west by that of Rimrye. It contains an area of 283 square miles, and its centre is about lat. 25° 37', long. 91° 23'.

MURJATTA.—The name of one of the mouths of the Ganges. The entrance to the river is wide, but shoals gradually from the land to three or three and a half fathoms outside. On an island four or five miles up the river, is a tank of fresh water. Lat. 21° 53', long. 89° 34'.

MURLIDUR KE SARAI, in the British district of Mynpoorie, lieutenant-gov. of the N.W. Provinces, a village on the route from the city of Agra to Etawah, and 24 miles N.W. of the latter. The road in this part of the route is good; the country is cultivated, and studded with small villages. Lat. 27° 2', long. 78° 47'.

MURMAGON, or **MARMAGOA BAY**.—A considerable inlet on the coast of Goa, where ships may find a good shelter from north-west winds. Its entrance is in lat. 15° 26', long. 73° 51'.

MUROWREE, in the British district of Bareilly, lieutenant-gov. of the N.W. Provinces, a town on the route from Bareilly to Oude, 36 miles E. by S. of the former. Lat. 28° 18', long. 80°.

MURPOOREH, in the British district of Furruckabad, lieutenant-gov. of the N.W. Provinces, a town on the right bank of the Esau, 30 miles S. of the city of Furruckabad. Lat. 26° 58', long. 79° 41'.

MURRAIE MUKAM, in Sind, a village on the route from Sehwan to Kurrachee, and 75 miles S. of the former place. Water is procurable at all times from pits in the bed of the Murraie river. The road in this part of the route is good. Lat. 25° 30', long. 67° 55'.

MURREE, in the Punjab, a sanatorium for troops, situate on a hill between the rivers Indus and Jhelum, and established in the year 1851. The place is already attracting a considerable population: barracks have been constructed, and houses are rising in every direction. Cherries, strawberries, raspberries, currants, apples, pears, and apricots are abundant; and every kind of European and tropical fruit, it is said, may be successfully cultivated here. Elevation of the station above the sea 7,330 feet. Lat. 33° 54', long. 73° 27'.

MURREI, in the British district of Agra, a village on the route from the city of Agra to Jeypore, and 25 miles W. of the former. Lat. 27° 3', long. 77° 42'.

MURROWNEE, in the territory of Gwalior, or possessions of Scindia's family, a small town, with fort, on the route from Tehree to Oojein, 12 miles S.W. of the former. Lat. 24° 35', long. 78° 43'.

MURRUNGAUPOONY.—A town in the British district of Madura, presidency of Madras, 44 miles N.N.E. of Madura. Lat. 10° 29', long. 78° 28'.

MURRURAI, in the British district of Allyghur, lieutenant-gov. of the N.W. Provinces, a village on the route from the city of Agra to Allyghur cantonment, and eight miles S. of the latter. Lat. 27° 48', long. 78° 9'.

MURRYVAMLA.—A town in the British district of Cuddapah, presidency of Madras, 131 miles N.N.E. of Cuddapah. Lat. 16° 15', long. 79° 38'.

MURTOLI, in the British district of Kumaon, lieutenant-gov. of the N.W. Provinces, a

considerable village in the Bhotia subdivision called Juwahir. It is situate on the route to Hiundes or Chinese Tartary, by the Juwahir Pass, from which it is distant 18 miles S., and is built on the right bank of the river Goree, the houses being constructed very low, and in hollows and ravines, with a view to protection against avalanches and the furious gales which continually blow from the south. With a similar view, the roofs are framed with a low pitch, and firmly overlaid with a coat of compact clay. The snows and other effects of winter set in here in October, when the whole population migrates to reside in the more southern and less-elevated parts of Kumaon, returning in the following June, to ply their trade with Hiundes. That lucrative occupation affords them subsistence, and even affluence, which reconcile them to residence in an inclement climate and barren soil. Elevation above the sea 11,352 feet. Lat. $30^{\circ} 21'$, long. $80^{\circ} 13'$.

MURU WURDWUN, in the north of the Punjab, a long, deep valley, with sides of gneiss and mica-slate. Down this valley a river of the same name flows, and joins the Chenaub at Kishtawar. The valley contains a village, also bearing the same name, opposite which the Nabog Nye Pass, 12,000 feet high, leads into Cashmere. Lat. $33^{\circ} 45'$, long. $75^{\circ} 45'$.

MURWUT.—An extensive, beautiful, and fertile valley, on the west side of the Indus, and south of the valley of Bannoo. It has on the west the lofty Suliman range, and on the north the snow-clad peaks of Sufaid Koh. Though exposed to the incursions of the marauders of the neighbouring mountains, it is so productive of grain and other necessities of life, that it is thickly peopled. The valley was formerly sometimes visited by an expedition of the Sikhs from the Derajat, who levied an enforced tribute from the inhabitants. Murwut, the chief place, is little more than a village. Lat. $33^{\circ} 10'$, long. $71^{\circ} 15'$.

MUSANAGAR, in the British district of Cawnpore, lieut.-gov. of the N.W. Provinces, a town near the left bank of the Jumna, on the route from Calpee to Purnabghur, and 16 miles E. of the former. It has a bazar. Lat. $26^{\circ} 10'$, long. $80^{\circ} 1'$.

MUSCAL ISLAND. — The largest of a group of islands off the coast of Chittagong, being 15 miles in length from N. to S., and seven in extreme breadth. It has some small elevations: the centre is in lat. $21^{\circ} 35'$, long. 92° .

MUSCLA, in the British district of Agra, lieut.-gov. of the N.W. Provinces, a town near the north-western frontier, towards the territory of Bhurtpoor, 18 miles N.W. of the city of Agra. Lat. $27^{\circ} 14'$, long. $77^{\circ} 42'$.

MUSOODA, in the British district of Ajmeer, lieut.-gov. of the N.W. Provinces, a town, the principal place of a pergunnah

containing 20,599 inhabitants. Distance S. of the city of Ajmeer 30 miles. Lat. $26^{\circ} 6'$, long. $74^{\circ} 35'$.

MUSOOR.—A town in the British province of Sattara, presidency of Bombay, 23 miles S.S.E. of Sattara. Lat. $17^{\circ} 23'$, long. $74^{\circ} 15'$.

MUSSOULEE, in the territory of Oude, a small town on the route from Lucknow cantonment to that of Sekrora, 28 miles N.E. of the former, and the same distance S.W. of the latter. It has a small bazar. Lat. $26^{\circ} 58'$, long. $81^{\circ} 24'$.

MUSSOUREE, on the northern frontier of the Dehra Doon, towards Gurhwal, is a sanatory station, established by the British to suspend, relieve, or remove the consequences prejudicial to health from the sultry climate of Hindoostan. It is approached from the south, and consequently from the Dehra Doon, by a road which, at Rajpur, situate at the base of the mountain, becomes very steep for three miles; thence, for two and a half miles, the ascent is more gradual, and for the remaining mile nearly level. The road is described by Mundy, in 1828, as difficult and perilous in the extreme: it "sometimes winds down the edge of rocks, sometimes zigzags up the face of the hill; plunges into the dark depths of a ravine, or creeps over the summit of a naked crag," but as no mention is made of those terrors by Garden, they have no doubt in a great measure disappeared before the labours of the engineer. Jacquemont indeed describes the road as excellent. The rugged ridge on which the station is situate, consists of beds of compact limestone, alternating with others of soft slate, and is analogous to that called the transition limestone of the north of Europe, the mountain limestone of England. It is black, grey, or greyish-white, cavernous and carboniferous, emitting a fetid smell, and appears to have suffered from the action of heat, inasmuch that its vesicular structure resembles that of grey lava. The slate, which alternates with the limestone, is wonderfully varied in its colours,—black, grey, green, brown, red, purple, and yellow. A few veins are so hard and fissile, as to serve for roofing-slate. In some places trap rock makes its appearance, composed in some parts principally of compact white felspar and green diallage, in others of hornblende. The slopes are steep, and, as is usual with such formations, covered with vegetation: in some places there are veins of quartz sandstone. On the adjacent height of Landour, the prevailing formation is quartz. This rugged tract was formerly thickly covered with forests of large timber-trees; but these have nearly all been felled for building purposes, or for burning lime and bricks. It is thought, however, that the injurious effect to the scenery has been more than compensated by increased salubrity, as the dense and luxuriant forests of Simla are considered at certain seasons to be productive of gloom and sickness. There is no level area of any extent at Mussouree; so that

the houses are built at considerable distances from each other, on sites which it has been necessary to level, on a ridge, a crag, or on the southern slope of the mountain. The eastern part has been longer settled, and there the houses are disposed more closely together than westward, in which direction the town is at present extending. In 1841 the number of private residences was about 100. The views are very beautiful, comprising on the north the Himalayas, clad in perennial snow; on the south the rich and varied expanse of the Dehra Doon, bounded by the Sewalik Hills; beyond which the prospect extends over the vast plain of Hindoostan, without any other limit than that of the powers of vision, or that caused by the imperfect transparency of the atmosphere. In the later part of midwinter, there are smart frosts, with occasional falls of snow; neither, however, occurring after March, when spring sets in. There are in that season showers of hail and rain, and thunder-storms occurring at intervals even as late as April. Then succeeds delightful weather until the middle of June, which ushers in the periodical rains. These, which are much heavier than in the neighbouring parts of the plains, cease about the middle of September; from which time to the middle of December, the weather is equable, becoming, however, cooler as the season advances, and terminating in sharp frosts. In 1834, for the latter half of May, the mean temperature at ten A.M. was found to be 76°; the highest temperature at any time of the day being 79°. At the same hour during June, the mean temperature was 69°; the highest temperature at any time 71°. July, for same hour, mean temperature, 67°; highest at any time, 69°. August, at same hour, mean temperature, 67°; highest at any hour, 69°. September, at same hour, mean, 66°; highest at any hour, 68°. October, at same hour, mean, 60°; highest at any hour, 62°. November, at same hour, mean, 55°; highest at any time, 57°. The mean of the mean temperatures, from the 15th of May to 21st of November, 66°. A breeze from the south, called on that account "the Doon breeze," sets in before ten o'clock A.M. and blows until late in the evening: at night there are generally light airs from the north. Mussoree is abundantly supplied from the bazar of the adjoining sanatory station of Landour, with wheat, barley, and other grain from the plains; the finest rice from the hill states; which last also furnish honey, turmeric, ginger, potatoes, onions, and other esculent vegetables. Butcher's meat is abundant and good, as are milk and butter, the hill pastures imparting great excellence to the produce of flocks and herds. The wines, liquors, and wares of Europe and Hindoostan are abundant, and of superior description, and, in consequence of the great competition between the native dealers, cheaper than in the plains. Christ Church, built by subscription, and finished in 1837, is a neat slated structure, with a turret. The

Himalaya Club had, in 1842, 155 members. The clubhouse contains accommodation for sixteen resident members, who each have a sitting-room, bed-room, and bath. There are besides a handsome ball-room, two billiard-rooms, a dining-room, and coffee-room, with all accommodation suitable for such an establishment. To these it was intended to add a reading-room, supplied with the best periodicals. In this flourishing little settlement there are two well-managed and successful schools for young ladies, and one for boys. Beer is brewed from native barley and English hops, and the result has been so encouraging, that a large brewery is in course of building. A bank was established in 1841, and has been very successful. An humble botanic garden, subsidiary to that of Suharunpoor, is managed here by natives, at the expense of 66 rupees (6l. 12s.) per month. Of the diseases contracted in the plains, the effects of a residence here are found favourable to fever of intermittent and remittent type, dyspepsia, dysentery, liver complaint, pulmonary consumption, rheumatism, general debility, or exhaustion of the constitution. Affections of the heart have had invariably a fatal result. Children thrive remarkably here, though there have been some instances of their being affected with bronchocele or goitre, which has, however, been cured by administering iodine. Mussoree is distant N.W. from Calcutta, by Lucknow, Bareilly, Hurdwar, and Dehra, 1,058 miles. Elevation above the sea 6,282 feet. Lat. 30° 27', long. 78° 5'.

MUSSOWRAH.—A town in the British district of Patna, lieut.-gov. of Bengal, 31 miles S.W. by W. of Patna. Lat. 25° 20', long. 84° 50'.

MUSTAFABAD, in the territory of Oude, a small town on the route from Allahabad to Lucknow, 52 miles N.W. of the former, 76 S.E. of the latter. It has a bazar. Lat. 25° 56', long. 81° 13'.

MUSTAFABAD, in Sirhind, a town on the route from Suharunpoor to Ludiana, and 33 miles N.W. of the former place. It is of moderate size, has a bazar, and is surrounded by a brick wall, like most of the towns in that part of the country. It has a citadel, built of burnt bricks, with curtains and round towers at the angles. This is the residence of the Sikh chief or rajah, whose possessions, under the grant of the British government in 1837, comprise thirty-one villages, and yield an annual revenue of 2,400l. sterling. The chief, though retaining his revenue, has been deprived of independent authority within his possessions. The surrounding country is fertile and well cultivated, and abounds in fine mango-groves. Water and supplies are abundant, but the road in this part of the route is rough and heavy, especially where it crosses the river Markunda. Mustafabad is distant N.W. from Calcutta 996 miles. Lat. 30° 12', long. 77° 13'.

MUSTGARH, in Bussahir, a fortress held

by the Goorkhas during their occupation of the country. It is situate on the crest of a lofty ridge, proceeding in a northerly direction from the Moral-ke-kanda, a great range extending south-westward from the Himalaya. The surface descends for three and a half miles steeply, to Nirt, on the left bank of the Sutlej, and having an elevation of 3,087 feet above the sea. The elevation of Musgarh is probably nearly 6,000 feet. Lat. $31^{\circ} 20'$, long. $77^{\circ} 39'$.

MUSTUFABAD, in the British district of Mynpoory, lieutenant-gov. of the N.W. Provinces, a town, the principal place of the pergunnah of the same name, is on the route from the cantonment of Muttra to that of Mynpoory, and 26 miles N.W. of the latter. Lat. $27^{\circ} 18'$, long. $78^{\circ} 38'$.

MUSWAH.—A town in the British district of Candesh, presidency of Bombay, 48 miles N.E. by E. of Malligaum. Lat. $20^{\circ} 53'$, long. $75^{\circ} 7'$.

MUTHEKARA.—A town in the territory of Oude, on the right bank of the Ghogra, and 87 miles N. by E. from Lucknow. Lat. $28^{\circ} 5'$, long. $81^{\circ} 15'$.

MUTIANA, in the petty chieftainship of Goond, tributary to the hill state of Keunthal, a small fort on the route from Simla to Kotgurb, and, by the winding mountain-road, 19 miles N.E. of the former station. Elevation above the sea 3,000 feet. Lat. $31^{\circ} 11'$, long. $77^{\circ} 27'$.

MUTKHANI, in the British district of Kumaon, lieutenant-gov. of the N.W. Provinces, a village on the route from Pethoragurb to Thakil Peak, two miles S.E. of the former. Lat. $29^{\circ} 34'$, long. $80^{\circ} 17'$.

MUTKOPA, in the British district of Goruckpoor, lieutenant-gov. of the N.W. Provinces, a town on the route from Goruckpoor to the territory of Nepal, 30 miles N.E. of the former. Lat. 27° , long. $83^{\circ} 43'$.

MUTLAH.—See **MUTWAL**.

MUTOWLI, in the British district of Cawnpore, lieutenant-gov. of the N.W. Provinces, a village on the route from Calpee to Etawa, and 44 miles S.E. of the latter. Lat. $26^{\circ} 24'$, long. $79^{\circ} 38'$.

MUTSEE, in the Baree Doab division of the Punjab, a town situated eight miles W. from the right bank of the Sutlej, 45 miles E.S.E. of the town of Mooltan. Lat. $29^{\circ} 49'$, long. $72^{\circ} 10'$.

MUTTEAREE.—A town in the British district of Purneah, lieutenant-gov. of Bengal, 36 miles N.N.W. of Purneah. Lat. $26^{\circ} 16'$, long. $87^{\circ} 23'$.

MUTTIA, in the British district of Futtehpore, lieutenant-gov. of the N.W. Provinces, a town three miles from the left bank of the Jumna, 16 miles S.W. of the town of Futtehpore. Lat. $25^{\circ} 42'$, long. $80^{\circ} 47'$.

MUTTOAD, in the Mysore, a town with a

fort, situate in a valley near a fine tank. Here are several manufactures of glass, made to be converted into bangles or rings for the arms and ankles; the siliceous rocks of the hills hereabouts, and the soda with which the neighbouring earth is impregnated, yielding abundant materials. Distance N.W. from Seringapatam 98 miles. Lat. $13^{\circ} 46'$, long. $76^{\circ} 28'$.

MUTTURA, in the Rajpoot state of Jodhpore, a village on the route *via* Nagor from Jessulmeer to Nuseerabad, and 157 miles N.W. of the latter. It is supplied with good water from one well 250 feet deep. Lat. $26^{\circ} 56'$, long. 73° .

MUTTOUNDH, in the British district of Banda, lieutenant-gov. of the N.W. Provinces, a town on the route from the town of Banda to Saugor, 13 miles W. of the former. It has a bazar. Lat. $25^{\circ} 26'$, long. $80^{\circ} 13'$.

MUTTRA, within the limits of the lieutenant-gov. of the N.W. Provinces, a British district named from its principal place. It is bounded on the north by the British districts Goorgawn and Allygurb; on the east by the British districts Allygurb and Mynpooree; on the south-west and south by the British district Agra; and on the west by the territory of Bhurtpore. It lies between lat. $27^{\circ} 14'$ — $27^{\circ} 58'$, long. $77^{\circ} 20'$ — $78^{\circ} 34'$, and includes an area of 1,607 square miles. The Jumna, crossing the northern frontier in lat. $27^{\circ} 55'$, long. $77^{\circ} 35'$, holds a tortuous course, but generally in a south-easterly direction, of about ninety-five miles, within, or bounding the district, until it passes from it in lat. $27^{\circ} 15'$, long. $78^{\circ} 2'$, having, while flowing through Muttra, divided it into two parts, one lying in the Doab, the other on the south-west side of the river. During the dry season, the volume of water in the channel of the river is inconsiderable. Hence at that season the river is not navigable, except for very small vessels, above the confluence of the Chumbul, about 100 miles lower down. The general inclination of the surface of the country is from N.W. to S.E., as is indicated by the descent of the course of the Jumna. A similar direction is also taken by the Karwan, a small river nearly parallel to the Jumna, and a few miles east of it; and by the Isun, still farther eastward. Actual measurement has ascertained the elevation of the town of Nuh, on the north-western frontier, to be 693 feet above the sea, and that of Kuraoi, near the south eastern, 648. On the left bank of the Jumna, in the north of the district, is the jhil or shallow lake of Nuh, caused by the overflow of that great river during the rains. The district is, with little exception, a plain, though there are a few hills on the western frontier towards Bhurtpore; and amongst them, that of Goverdhun, famous in Hindoo mythology as the scene of the amours, exploits, and pastoral avocations of Krishna. Though the district is situate some degrees outside the tropic, and its atmosphere is, during the summer months, cooled

MUT.

a little by the periodical rains, the heat in spring is excessive. In the beginning of March, Jacquemont found the heat so great as to preclude his travelling after nine in the forenoon, the air at the same time being remarkably dry. As the season advances, the temperature increases, becoming everywhere oppressive. The burning wind, "after passing over the great sandy desert, imparts to the atmosphere in these regions an intensity of heat scarcely to be conceived, even by those who have been seasoned to the fury of a vertical sun. In every direction where this pestiferous current has any influence, the effects are painful to those who have the misfortune of being exposed to it; but westward of the Jumna, the fiery blast is still more distressing, from the want of rivers and lakes to temper its severity, the nearest resemblance to which, perhaps, is the extreme glow of an iron-foundry in the height of summer." The water in the wells is for the most part brackish. The country lying west of the Jumna has generally a sandy soil, mixed with kunkur, or calcareous conglomerate; and though in a state of nature overrun with the *Capparis aphylla* and some species of *zizyphus*, yet, under proper cultivation, producing abundant crops of wheat. On the east or left bank of the river, the soil is rather light and bare, but improved towards the middle of the Doab, where it is good. The principal alimentary crops are wheat, barley, various kinds of millet, pulse, oil-seeds, cucurbitaceous plants, and sugar; the principal commercial crops, indigo, and some other plants yielding dyes, cotton, tobacco, and opium. Under the last revenue settlement of the N.W. Provinces, the government demand on the lands of this district has been fixed for a term of years, and is not liable to be increased until the year 1871. The chief towns are Muttra, Bindrabun, Muhabun, Juleisur, Rampore, and Koorsundah. These will be found in their proper places under the alphabetical arrangement.

The population, according to official return 1853, was 862,909. Of this number, 506,178 are returned as Hindoos agricultural; 286,781 Hindoos non-agricultural; 25,913 Mahomedans and others agricultural, and 44,037 of the like classes non-agricultural; showing an immense preponderance of the Hindoo population. The district contains seven towns having more than 5,000 inhabitants, but less than 10,000, and four containing upwards of 10,000. Of these latter, none at the period of the return exceeded 30,000, with the exception of Muttra, in which the number was nearly 66,000. The principal routes are,—1. The great one from Agra to Delhi, traversing the district from south-east to north-west; 2. from Muttra cantonment, in a westerly direction, to Alwar by Deeg; 3. from the town of Muttra, north-westerly, to Ferozepore by Kosi; 4. south-westerly, from Muttra to Bhurtpore; 5. south-easterly, from Muttra to Mynpooree; 6. north-easterly, from Muttra to Allypore. The

district is also traversed by the East-Indian Railway.

The tract comprised within this district fell early under the power of the Affghan Mussulmans, having been conquered in 1017 by Mahmood of Ghuzni. Liberated for a short time, on the fall of the Ghaznevide dynasty, it was, at the close of the twelfth century, subdued by the Ghorian Affghans, and remained subject to the various successive dynasties of that people, which ruled Delhi and its dependencies until conquered by the Mogul invader Baber in 1526. On the decline of the Timurian dynasty in the eighteenth century, it was overrun by the Jats, from whom it was wrested by Nujuf Khan, and embodied in his short-lived state. On his death, it was seized by Madhaje Scindia, the Mahratta chief, whose successor in 1803 ceded it to the East-India Company by the second article of the treaty of Serje Anjengam.

MUTTRA, a town, the principal place of the district of the same name, is situate on the right or western bank of the Jumna, which is here crossed in the height of the rains by ferry, and at other seasons by a bridge of boats. The town extends in the form of a crescent along the elevated bank of the river, and, with its great ruined fort, has a very picturesque appearance when viewed from the low ground on the opposite side. Of the lofty fortifications which once encircled the town, only a few fragments, including three gateways, now remain. The river being considered sacred by the Hindoos, its banks are every morning and evening crowded by devotees of both sexes and of all ages, to perform their devotions and religious exercises, access being obtained to the stream by numerous ghats, or extensive flights of stone steps, ornamented with little temples. The site of the town is much cut up by ravines, and the streets are described as steep, narrow, winding, and excessively filthy. Heber, however, speaks of it as a striking town, much resembling Benares, its houses being very high, with the same sort of ornaments as in that city. On an elevated site on the bank of the river is a large ruinous fortress, which formerly commanded the place; and in the middle of the town, the mosque of Aurungzebe, also in a ruinous state, its four lofty minarets, overlaid with glazed ware, being much decayed. The fort was built by the celebrated astronomer Jey Singh, or Jaya Sinha, the Rajpoot prince who succeeded to the sovereignty of Amber 1693, and was some years later high in favour with Muhammad, emperor of Delhi. On the roof of one of the apartments is a ruinous observatory, the work of that scientific prince, and containing an equinoctial dial, sundry amplitude-instruments, horizontal circle, with a gnomon, intended for some purpose as yet unascertained, a mural instrument facing westward, and consisting of a segment exceeding a semicircle, with the convex downwards, on the opposite wall to which is a segment with the convex

upwards. The population of the town in 1853, according to official report, was 65,749. Some of the traders are considered to be very wealthy.

The place is regarded as sacred in Hindoo mythology, from being the birthplace of the divinity Krishna, the Khrishnavatar or incarnation of Vishnu under that name. In honour of the monkey-god Hanuman, monkeys are here protected and fed, swarming in the ruins, sitting, running, or playing on the tops of the houses, and skipping from roof to roof across the streets, greatly annoying their Hindoo votaries, as well as strangers. There are also numbers of paroquets, peacocks, and sacred bulls at large without owners. In the central part of the town is a beautiful structure, built by the treasurer of the state of Gwalior, who was also the principal partner in a great native banking house. The building, intended to serve the purpose of a temple and a dwelling, is inclosed by a small but richly-carved gateway, with a flight of steps which leads from the street to a square court, cloistered round, and containing in the centre a building also square, supported by a triple row of pillars, all which, as well as the ceiling, are richly carved, painted, and gilt. Here is a military cantonment: the buildings, which are about a mile south of the town, and separated from it by a small space of broken ground, are very extensive.

Muttra, recommended to the Hindoos by associations connected with their mythology, appears, at an early period of their records, to have been much more important than at present; and its wealth and splendour pointed it out as an object for the attacks of the first Afghan invaders. Mahmood of Ghuznee, in his expedition against Kunnooj in the year 1017, "understanding that at some distance stood the rich city of Muttra, consecrated to Khrishna-Vas-dew, whom the Hindoos venerate as an emanation of God, directed his march thither, and entering it with little opposition from the troops of the rajah of Delhi, to whom it belonged, gave it up to plunder. He broke down or burned all the idols, and amassed a vast quantity of gold and silver, of which the idols were mostly composed. He would have destroyed the temples also, but he found the labour would have been excessive, while some say he was averted from his profane purpose by their admirable beauty. He certainly extravagantly extolled the magnificence of the buildings and city in a letter to the governor of Ghiznee, in which the following passage occurs:—"There are here 1,000 edifices, as firm as the faith of the faithful, most of them of marble; besides innumerable temples; nor is it likely this city has attained its present condition but at the expense of many millions of dinars; nor could such another be constructed under a period of two centuries." Among the temples at Muttra were found five golden idols, whose eyes were of rubies, valued at 50,000 dinars. On another idol was found a sapphire

weighing 400 miskals, and the image itself being melted down, produced 98,300 miskals of pure gold. Besides these images, there were about 100 idols of silver, which loaded as many camels. The king tarried in Muttra twenty days, in which time the city suffered greatly from fire, in addition to the damage which it sustained from being pillaged." After these calamities, it sank into obscurity, and does not appear to be mentioned by Baber in his detailed account of his campaigns in the vicinity. In 1757, it was subjected to pillage and massacre by the Afghan troops of Ahmed Shah Dooranee. Ahmed did not in person command the expedition, having intrusted its conduct to Sirdar Jehan Khan, called Zanus by the Jesuits. Tefenthaler states his army at 25,000 cavalry, and adds, "Muttra is a populous city, abounding in wealthy inhabitants. In this city, and in another town, called Bendroban [Bindraban], very famous throughout India, on account of the incarnation of Khrishna, the Afghans practised great cruelties, and displayed their hatred of idols and idolaters, burning houses, together with their inmates; slaughtering others with the sword and lance; hauling off into captivity maidens and youths, men and women. In the temples of the idols they slaughtered kine, regarded as sacred by the superstitious people, and smeared the images and pavement with the blood." Scindia, the Mahratta chief, who, after the death of Mufuf Khan, seized Muttra, conferred it on the French adventurer Perron, in jaghire, a grant made on condition of military service. In October, 1803, it was without resistance occupied by the British troops, and in the same year permanently ceded to the East-India Company by the treaty of Serjee Anjengaum. Distant N.W. from Calcutta 831 miles; from Agra, N.W., 35; from Delhi, S.E., 97. Lat. 27° 30', long. 77° 45'.

MUTTUCK, or MUTTRUCK.—See AS-SAM.

MUTTUNI, in the district of Peshawur, a division of the Punjab, a town situated on the road from Kohat to Peshawur, 14 miles S. of the latter. A fort is in course of construction at this town, with the view of obtaining an effectual command over the Kohat Pass. Lat. 33° 48', long. 71° 37'.

MUTWAL, or ROYMATLA.—The name of one of the rivers in the delta of the Ganges. It divaricates from the Ganges in lat. 22° 33', long. 88° 23', a few miles south of Calcutta, and, flowing in a southerly direction for ninety-four miles, falls into the Bay of Bengal, in lat. 21° 44', long. 88° 46'. It has never less water in it than three fathoms, and a ship of considerable burden could proceed to Tarda, a village close to the salt lake, near Calcutta. The Mutwal is about to be connected with Calcutta by means of a railway under the auspices of a new company, and thus become the successor of the Hooghly, should it be necessary to abandon the latter, from its ceasing to be

navigable, in consequence of the silting up of its channel.—See **HOOGLY RIVER**.

MUTWAUR.—A town of Malwa, in the native state of Aleerajpoor, 14 miles S. from Rajpoor, and 74 miles E. by S. from Baroda. Lat. $22^{\circ} 7'$, long. $74^{\circ} 23'$.

MUWAR, in the British district of Cawnpore, lieutenant-gov. of the N.W. Provinces, a village on the left bank of the river Singoor, and on the route from the cantonment of Cawnpore to that of Calpee, 18 miles N.E. of the latter. Lat. $26^{\circ} 18'$, long. $79^{\circ} 59'$.

MUXOODPORE.—A town in the British district of Dacca Jelalpoore, lieutenant-gov. of Bengal, 102 miles E.N.E. of Calcutta. Lat. $23^{\circ} 20'$, long. $89^{\circ} 50'$.

MUZUFURABAD, in the British district of Suharunpoor, lieutenant-gov. of the N.W. Provinces, a town on the route from Suharunpoor to Debra, 15 miles N.E. of the former. Lat. $30^{\circ} 8'$, long. $77^{\circ} 48'$.

MUZUFFURGURH, in the Sinde Sagur Doab division of the Punjab, a town situated on the right bank of the Chenaub, 19 miles W.S.W. of the town of Mooltan. Lat. $30^{\circ} 3'$, long. $71^{\circ} 14'$.

MUZUFFURNUGUR.—See **MOZUFFURNUGUR**.

MYACONDA, in the Mysore, a fort on the north-west frontier, towards the British district of Dharwar. "The situation of Myaconda is important, as being at the entrance of a pass from the north-westward into the valley of Chittel Droog." Though regarded as a strong place by native soldiers, it was in 1790 breached and stormed by the Mahrattas. Here, in 1749, was fought a battle between the forces of the ranees of Bednore and those of the polygar of Chittel Droog, in which the latter were defeated. Myaconda is distant from Chittel Droog 21 miles, Seringapatam 135. Lat. $14^{\circ} 17'$, long. $76^{\circ} 9'$.

MYADOUNG MYO.—A town of Burmah, situate on the left bank of the Irawady river, and 133 miles N. from Ava. Lat. $23^{\circ} 49'$, long. $96^{\circ} 8'$.

MYAPOOR, in Bundelcund, in the territory of Jhansee, a village on the route by Jhansee from Calpee to Goona, 146 miles S.W. of former, 59 N.E. of latter. About a mile S.W. of the village commences the ascent of the Majapoor Pass, short, stony, and of easy ascent. Lat. $25^{\circ} 8'$, long. $78^{\circ} 7'$.

MYAPOOR, in the British district of Saharunpoor, lieutenant-gov. of Agra, a village on the right bank of the Ganges, about two miles below Hurdwar. At this spot commences the artificial channel of the new Ganges Canal, to which the supply from the river is led by a natural branch. The masonry-works at this place consist of a dam thrown across the branch of the Ganges, and a regulating bridge across the canal bed. The dam is provided with gates and sluices to carry off the superfluous waters

of the Ganges during the floods. The supply of water for the canal at this place will be 6,750 cubic feet per second; the whole discharge of the river at Hurdwar being 8,000 cubic feet per second. Lat. $29^{\circ} 56'$, long. $78^{\circ} 12'$.

MYAVERAM.—A town in the British district of Tanjore, presidency of Madras, 41 miles N.E. by E. of Tanjore. Lat. $11^{\circ} 7'$, long. $79^{\circ} 42'$.

MYHEE, the name of two passes known as the Great and Little Myhee Pass, through which roads are carried over the Youmadoung range of mountains, separating Arracan from Burmah. The Myhee Great Pass is in lat. $19^{\circ} 14'$, long. $94^{\circ} 30'$; the Little Pass is a few miles further north.

MYHEE.—A village and police-station in the British district of Arracan. It is situate on a line of road from Sandoway over the Youmadoung Mountains into Burmah, and is 113 miles S.S.E. from Arracan. Lat. $19^{\circ} 17'$, long. $94^{\circ} 10'$.

MYHEE.—A river rising in the native state of Amjherra, in Malwa, in a small plain, in lat. $22^{\circ} 32'$, long. $75^{\circ} 5'$. It holds a course north-west for 145 miles, to lat. $23^{\circ} 48'$, long. $74^{\circ} 32'$, where the mountains of Marwar turn it to the westward for twenty-five miles; and subsequently south-west, which course it continues to hold 180 miles farther, to its fall into the Gulf of Cambay, a few miles below the town of Cambay, and in lat. $22^{\circ} 10'$, long. $72^{\circ} 30'$; its total length of course being about 350 miles. It does not appear to be navigable for more than fifteen miles from its mouth. Opposite the city of Cambay, seven or eight miles from the sea, the width is probably about three miles, and the water is so shallow from side to side, at low water spring tides, that the ground is left almost dry, and navigation is impracticable even for the smallest boats. Fifty miles from its source, and in lat. $23^{\circ} 9'$, long. $75^{\circ} 1'$, it is crossed by means of a ford on the route from Neemuch to Baroda, and is there described by Heber as shallow and broad, but not stagnant. Sixty miles farther down, or more north-west, it is again crossed on the route from Neemuch to Baroda, *vid* Pertabghur, at Boongra, where it has a "bed 400 yards wide, with a stream of 100, and a depth of one foot." About fifty miles above its mouth, it is crossed by the route from Neemuch to Baroda by Sulumbur. "Its bed is here 500 yards wide, stream 120, average depth a foot and a half." Heber, who crossed it at this place, describes it as a broad, bright stream, wandering in a wide bed of sand and gravel. About eight miles lower down, its breadth is above two miles; and when the tide is out, there is about a third of that width of water unfordable even at the ebb of spring tides. The elevation of the source is about 1,850 feet.

MYHEE CAUNTA.—A division of Guzerat, under the political supervision of the govern-

ment of Bombay. It lies between lat. 23° 14' and 24° 28', long. 72° 41' and 74° 5', and is bounded on the north by the mountainous Bheel districts of Mewar or Odeypore, and Serohee; on the south by the Guicowar's district of Balasinore and the British collectorate of Kaira; on the east by Dongurpore; on the south-east by the petty states of Saunte and Lunawara; and on the west by Pahlunpore, and by various pergunnahs belonging to the Guicowar. Its length from south-east to north-west is about 100 miles, and its breadth in the direction of the opposite angles measures about sixty: the area is 3,400 square miles.

The district comprises six zillahs: Nanee Marwar, in which are included the talooks of Edur and Ahmednuggur (which see), with their dependencies of Morassa, Hursale, and Byer; and those of Tintoee, Daunta, and Malpoor, together with the puttass of Pole, Pall, Posuna, Gudwarra, Wullasun, and Hurrole, all more or less subject to Edur. The remaining five zillahs are Rehwar, Sabur Caunta, Kuttoosun, Byal or Baweesa, and Watruck. The streams intersecting the country are seven in number: the Sabur Muttee, Haut Muttee, Karree, Meshwah, Majoom, Watruck, and Surruwuttee. The total amount of the revenue of the Myhee Caunta may be estimated at from 45,000*l.* to 50,000*l.* per annum. From this sum the Guicowar receives a yearly tribute of 9,340*l.*, under the head of Ghans Dana, and 4,500*l.* as revenue; making a total of 13,840*l.* No tribute is paid to the British government. A detachment of 1,000 horse from the Guicowar's contingent is placed under the orders of the political agent in this province. The military force at the disposal of the government of Edur is employed almost entirely for police purposes, and consists of about 2,000 horse and foot, inclusive of the quotas furnished by the feudal chiefs.

The political connection of the East-India Company with the Myhee Caunta dates from the year 1820. Among the possessions of the Peishwa which, in 1818, escheated to the British government, were included Ahmedabad and its dependencies. The occupation of these districts brought the British in immediate contact with the lawless tribes of the Myhee Caunta, and it became at once obvious that there could be no security for the preservation of public tranquillity, unless the differences continually arising between the Guicowar and his turbulent tributaries should be adjudicated by an efficient authority capable of enforcing its decisions. An arrangement was accordingly concluded, under which the Guicowar agreed to withdraw his troops, and to abstain from all further interference with the chieftains, while the British government undertook the management of the country, and guaranteed the payment of the Guicowar's tribute. The British government had no further interest in these arrangements than that which accrued to them in their character as conservators of the general peace. Never-

theless, in carrying them out, they have not failed to avail themselves of the opportunity thereby offered to confer important benefits upon the country. By their means, suttee has been abolished; infanticide and blarwuttie prohibited; and at their instigation a criminal court has been established for the trial of all serious offences, through the agency of the political resident, with native chiefs as assessors. The introduction of this tribunal has had a most salutary effect, and has proved a powerful auxiliary not only in the pacification, but in the civilization of this hitherto troubled region. The principal towns in the Myhee Caunta are Edur, Ahmednuggur, and Wurrulee, of which some notice will be found in their places under the alphabetical arrangement.

MYHIR, in the territory of Saugor and Nerbudda, a town, the principal place of the thakoorai or small state of the same name, situate on the route by Rewa from Allahabad to Jubbulpore, and 100 miles N.E. of the latter. According to Garden, it is a "large town and bazar, and the chief place in the district belonging to Thakoor Bishen Singh." Water is plentiful, a large jhil or mere being on the N.W., and another S.W. of the town. The thakoorai of Myhir was originally a grant from the rajah of Pauna, and in 1814 was confirmed to the thakoor by sunnud or grant from the British government. It contains an area of 1,026 square miles, and a population of 100,000. On the death of the thakoor in 1826, his two sons took arms and disputed the possession, but were tranquillized by the British authorities. Bishen Singh, who appears to have been remarkable for improvidence, voluntarily placed his estate under the management of the British government, for the purpose of liquidating his debts. The estate was continued under British management after the death of Bishen Singh, in view to paying off his debts. The home authorities at the same time suggested the propriety of issuing a proclamation announcing that the estates of thakoors will not be held responsible for debts beyond the life of the thakoor who shall contract them. The present chief is a minor, and arrangements have been made for his education at Agra under the direction of the British government. Myhir is in lat. 24° 16', long. 80° 49'.

MYHNATHEIR, in the British district of Moradabad, lieut.-gov. of the N.W. Provinces, a village on the route from Allygurh to the town of Moradabad, and 11 miles S.W. of the latter. Lat. 28° 42', long. 78° 46'.

MYHSEE.—A town in the British district of Sarun, lieut.-gov. of Bengal, 47 miles N. by E. of Chupra. Lat. 26° 20', long. 85° 11'.

MYITHIA KHYOUNG.—A river of Burmah, rising in lat. 21° 20', long. 94° 4', and, flowing in a northerly direction for 170 miles, falls into the Khyendwen river, in lat. 23° 11', long. 94° 41'.

MYKHINDA, in the native state of Gurlwal, a village on the route from Sireenuggur to Kedarnath Temple, and 12 miles S. of the latter. It is situate on the eastern declivity of a mountain of gneiss formation, and near the right bank of the Mundagnee river. Elevation above the sea 5,545 feet. Lat. $30^{\circ} 34'$, long. $79^{\circ} 5'$.

MYLE, in the British district of Goruckpoor, lieutenant-gov. of the N.W. Provinces, a town on the route from Goruckpoor to Chupra, 47 miles S.E. of the former. Lat. $26^{\circ} 12'$, long. $83^{\circ} 54'$.

MYMENSING.—A British district within the limits of the lieutenant-gov. of Bengal. It is bounded on the north by Goalpara, on the borders of Assam, and by the country of the wild Garro tribes; on the east by the British district of Sylhet; on the south by the British districts Tipperah, Dacca, and Furreedpore; on the south-west by the British district of Pubna; and on the west by the districts Bogra and Rungpoor. It lies between lat. $24^{\circ} 4'—25^{\circ} 41'$, long. $89^{\circ} 28'—91^{\circ} 13'$, and has an area, according to official return, of 4,712 square miles. In the northern part, towards Goalpara and the Garro highlands, there are many hills and irregular tracts densely covered with jungle, and in the south-western part, along the right bank of the Brahmapootra, the country is of a similar description. The rest of the district is in general level, rather depressed and marshy, traversed by numerous watercourses, and containing many jhils or shallow lakes. Of the rivers, the principal are the Brahmapootra and the Konaie. These two great streams communicate by means of the Jenaie, a large watercourse which connects them about twenty miles below their divarication. All three are navigable in their course through the district; but on the Brahmapootra, in consequence of the diminution of its volume of water for the supply of the Konaie, the larger class of native boats can only pass during the rainy season. Inferior streams and watercourses are very numerous, and contribute, together with the many jhils, to extensive inundations of the country during the rains. Most of the jhils become dry in the hot season, but every village, and even every dwelling inhabited by a family of superior class, has a tank yielding a perennial supply of water.

The climate is considered superior to that of the southern part of Bengal, as, though damp, the temperature is cooler. During March and the two succeeding months, when heat is most oppressive in general in India, the weather is here unsettled rather than sultry. Violent storms of wind and rain from the north-west are of frequent occurrence, and are accompanied by thunder and lightning, and frequently prove very destructive. The periodical rains commence in the beginning of June, and continue until the beginning of October, when the northerly winds set in, bringing cold weather,

during which fogs are very prevalent, when the sun is seldom visible until nine or ten o'clock in the forenoon. The population is given under the article **BENGAL**.

This district was included in the grant of the dewanny of Bengal, Behar, and Orissa, made by the king of Delhi to the East-India Company.

MYMUTGURH.—A town in the British district of Rutnageria, presidency of Bombay, 143 miles S.S.E. of Bombay. Lat. $17^{\circ} 4'$, long. $73^{\circ} 47'$.

MYNAH.—A town of Malwa, in the native state of Bhopal, 49 miles W. by S. from Bhopal, and 55 miles E. from Oojein. Lat. $23^{\circ} 9'$, long. $76^{\circ} 40'$.

MYNPOOREE.—A British district under the lieutenant-gov. of the N.W. Provinces, named from its principal place. It is bounded on the north by the British district of Budaon; on the north-east and west by the British district of Furruckabad; on the south by the British districts Etawah and Agra; and on the west by the British districts Agra, Muttra, and Allyghur. It lies between lat. $26^{\circ} 54'—27^{\circ} 50'$, long. $78^{\circ} 30'—79^{\circ} 30'$, and contains an area of about 2,009 square miles. It is a very level, and in general a well-watered tract, the Jumna forming for thirty-five miles its southern boundary, and the Kalee Nuddee (Eastern) first forming its western boundary for ten miles, then flowing through its northern part for sixteen miles, and subsequently becoming its north-eastern boundary for about fifty-five miles more. The country lying between those two rivers is traversed by four small streams,—the Esun, nearest the Kalee Nuddee and most to the north-eastward; next to that, towards the south-west, the Rind or Urrund; further to the south-west, the Seyngur; and the Sirsa next to the Jumna. Besides these watercourses, the projected line of the Ganges Canal, now in course of progress, passes by the town of Mynpooree, and will ultimately form a navigable channel to the Ganges at Cawn-pore. The courses of the two greater rivers, and of the four lesser and intermediate streams, are all in some degree parallel to each other, and all flow to the south-east; thus indicating the general slope of the country to be in that direction. The average elevation of the country above the level of the sea is between 600 and 700 feet; that of the town of Gihoor, a few miles west of Mynpooree, is 648 feet; that of Kerowly, near the northern frontier, 648 feet; that of the bed of the Kalee Nuddee (East), below that town, 614 feet. The general slope of the country is 1-138 feet in the mile. Previously to the mitigating effect of the periodical rains, which set in after midsummer, the heat in this district is very great; yet in winter the thermometer in this part of the Doab sometimes falls below the freezing-point. Rice is grown in the northern part of the district: the sugarcane is produced with little trouble, and in great abundance, though inferior both

in size and the yield of saccharine matter to that which is cultivated in rich upper lands. Here also indigo of superior quality grows wild, and, it was stated by an eminent authority, "might be grown at half its present cost, of quality very little inferior, and with the same facility that characterizes the cultivation of the sugarcane." Wheat, barley, millet, gram (*Cicer arietinum*), and some other pulse, are extensively cultivated; cotton and tobacco succeed well in the Boodh Gunga, as also along the course of the Kalee Nuddes. The soil in the middle parts, about the town of Mynpooree, is good. According to census made in 1853, the population amounted to 832,714; of whom are returned 619,659 as Hindoo agricultural; 161,422 Hindoo non-agricultural; 20,093 Mahomedans and others agricultural; and 31,540 of those various classes non-agricultural. It thus appears that the population is almost exclusively Hindoo. The prevalence among the Rajpoots of the horrible practice of female infanticide caused, some years since, the issue of an order, by a local magistrate, that the bodies of all deceased female Rajpoot children should be sent for the examination of the civil surgeon, with a view to ascertain in each case whether death had resulted from other than natural causes; but the order was withdrawn by direction of the government; and the home authorities approved of the withdrawal, deeming that the operation of the order might be offensive. Measures are in progress for putting a stop to the crime. Mynpooree contains no large town, and only one or two of tolerable size. The number of villages in the district is stated to be 1,353.

The district is traversed in its southern quarter by the East-Indian Railway. The other principal routes are—1. From north-west to south-east, from Allypore to the town of Mynpooree, and thence to Cawnpore; 2. from west to east, from Agra to Mynpooree, and thence to Futtehgurh; 3. from north-west to south-east, from Muttra to Mynpooree, and thence to Lucknow; 4. from south to north, from Etawah to Mynpooree, and thence to Aungghur; 5. from south-east to north-west, from Etawah to Agra. The tract of which this forms part, was included in the Mahomedan empire of the Afghans overthrown by Baber, and was conquered or overrun by that invader. On the dismemberment of the empire of Delhi, it became part of the transient realm of Nujuf Khan, in virtue of a treaty of partition between him and Shujaood-dowlah, the vizier of Oude. After the death of the former, it was seized by the Mahrattas, and in 1803 was ceded to the East-India Company by Dowlut Rao Sindia, under the second article of the treaty of Serjee Anjengaum.

MYNPOOREE, a town, the principal place of the district of the same name, is situate on the banks of the small river Esun, which is here crossed by a bridge of brick, near the

cantonment. Thorn, who saw this place in 1804, describes it as then "a walled town, of considerable size, and very populous." A few days previously, it had been attacked by the Mahrattas under Holkar, who plundered and burned part of it, but were repulsed from the jail and cantonments by the provincial militia in the service of the East-India Company, and fled precipitately on the approach of a relieving force. According to official report Mynpooree contains 20,921 inhabitants. Here is a Jain temple, with a Buddhistic idol. It is a favourable station for troops, as supplies and water are very abundant and good. Elevation above the sea about 620 feet. Distance N.W. from Calcutta, by Cawnpore, 727 miles; E. from Agra 714; S.E. from Delhi 165. Lat. 27° 14', long. 79° 4'.

MYNTUPPUL, in Sirhind, a village on the route from Suharunpoor to Nahun, and eight miles S.W. of the latter town. It is situate at the south-west base of the low prolongation of the Sewalik range. The road in the direction of Suharunpoor is level and very good, and in that of Nahun has a considerable acclivity, but is well made. Distant N.W. from Calcutta 1,008 miles. Lat. 30° 31', long. 77° 17'.

MYNWAR.—A town in the territory of Oude, 112 miles N. by E. from Lucknow, and 92 miles E. by S. from Pileebheet. Lat. 28° 27', long. 81° 21'.

MYRABPOOR.—A town in Scinde, situate in the patrimony enjoyed by Ali Moorad, 46 miles S.W. by S. from Bukkur, and 34 miles S.E. from Larkhanna. Lat. 27° 7', long. 68° 34'.

MYRWA.—A town in the British district of Sarun, lieut. gov. of Bengal, 49 miles N.W. by W. of Chupra. Lat. 26° 11', long. 84° 11'.

MYSORE, in Southern India, a raj or principality under the protection of the British government, by whom, indeed, the entire management of its affairs is at present exercised. This territory is bounded on the north-west by the British collectorate of Dharwar, in the presidency of Bombay, and on all other sides by various districts of the presidency of Madras; North Canara and Bellary bounding it on the north; the districts of Cuddapah, North Arcot, and Salem on the east; Coimbatore and Malabar on the south; Coorg and South Canara on the west. It is about 250 miles in length from north to south, and 238 in extreme breadth; the area is 30,886 square miles. The country is a table-land, considerably elevated; it is of triangular form, having its greatest width at the northern boundary. The eastern, western, and southern limits of the province are skirted by the Eastern and Western Ghauts, which, gradually converging from the north, form a junction at the southern extremity of Mysore, in the vicinity of the Neilgherry Hills. "The elevation of the country varies a good deal; thus,

Paidradurgum is 1,907; Baitmungalum, 2,519; Bangalore, 3,000; Mysore (town), 2,513; Seringapatam, 2,558; Serah, 2,223; Narsapore, 2,904; Colar, 2,800; Naikennary, 2,221; and Hurryhur, 1,831 feet above the level of the sea, according to barometrical observations." The Swagunga Mountains, twenty-five miles north-west of Bangalore, have an elevation of 4,600 feet above the sea, and the Bababudin, near Bednoi, upwards of 6,000. In the northern part of the territory, the Ghauts, receding from each other, leave the intervening country plain and open, and sloping gradually northwards, as indicated by the course of the rivers, which for the most part flow in that direction. A small portion of the surface, however, in the north-west of the country, slopes to the westward. The Ghauts there are lower than in any other part, and the river Sheravuty, rising in the table-land of Mysore, flows westward, and falls into the Arabian Sea, or North Indian Ocean, at Honahwar. In the south-east part of the territory also, the slope of the country varies from the general inclination, being towards the south-east. The drainage of this part is effected by the river Cauvery. The Lechman Teert and Kubbani, flowing from the south-west, fall into this river, which also receives the Hemavati, flowing from the north-west, and the Shimsha and Arkavati, flowing from the north; besides many other streams, which, during the monsoon rains, contribute to swell it into an enormous torrent, which rushes from the elevated table-land of Mysore to the low country extending south-east to the sea, by two falls, that of Gangana Chuki of 370, and that of Birra Chuki of 460 feet. The Toonga and Budra, rising in the north-west of the territory, unite at Halla Honur, and form the Toongabudra or Tumbudra, which, taking a direction north-east, finally falls into the great river Kistnah. The Hugry or Vedavati, rising in the south-west part of the territory, traverses the country in a direction north-east for about 125 miles, and, crossing the north-eastern frontier, falls finally into the Tumbudra or Toongabudra. The Northern Penna crosses the northern, and the southern Penna traverses the southern quarter of the province. There are a great number of smaller streams, but they are in general mere occasional torrents, devoid of water during the dry season. There do not appear to be any natural lakes in Mysore, but tanks or artificial lakes are numerous. Many of them are surrounded with stone embankments, and have regular sluices for letting off the redundant water. The water of the tanks and rivers is considered good, but that of many of the wells, though limpid, is brackish and unwholesome, tending to produce fevers and agues.

Among the most remarkable geological features are the Droogs, being huge isolated rocks, rising abruptly from the generally unbroken surface of the country to heights varying from 1,000 to 1,500 feet, with bases

seldom exceeding two miles in circumference, and chiefly composed of masses of granite, gneiss, and hornblende: most of them are surmounted by forts, nearly inaccessible, but which have been allowed to go to ruin since the establishment of British supremacy. Of those, the more remarkable are Nundydroog, having an elevation above the sea of 4,856 feet; Suwardroog, 4,004; Ubtaradroog and Chittledroog, the respective elevations of which do not appear to have been ascertained. The rocks of Mysore are in general of primitive formation,—granite, gneiss, quartz, sienite, and hornblende,—and in many places they are overlaid by laterite. Gold-dust is found, but there is no metal, except iron, in any degree of abundance. Garnets are frequently to be met with; common salt and carbonate of soda impregnate the soil in many places, and are extracted for domestic or manufacturing purposes. Between Bangalore and Seringapatam, kunker or calcareous tufa exists in considerable quantities.

As the average elevation of Mysore is not less than 2,000 feet above the level of the sea, the temperature is sensibly less than in the low tracts towards the coast. At Bangalore, about 3,000 feet above the sea, the thermometer has been found not to rise to above 82° in the shade; and the general annual average there at noon in the shade is 76°. "The nights are seldom hot, and the mornings and evenings are always cool, if not cold; and there is an elasticity in the air which is truly delightful," but the range of the thermometer amounting constantly to 40° from sunrise to noon, renders the highest degree of precaution necessary to avoid injurious consequences. After the end of January, the heat of the days fast increases, until the setting in of the Malabar or south-west monsoon, about the beginning of June; and this, in September, is followed by the Coromandel or north-east monsoon; and from the circumstance of the country being exposed to both, more rain falls than in most parts of India. The monsoon from the south-west is the more violent, filling the largest tanks in a few hours, lasting for several days without intermission, and being accompanied by dreadful thunder and lightning.

Among the more destructive wild beasts, the tiger may be mentioned: some villages have been almost depopulated by this animal. Leopards are numerous and destructive; and the cheta or hunting-leopard exists to a great extent. Elephants and bears are also to be classed among the wild animals of Mysore. The ursine sloth (*Bradypus ursinus*) is sometimes met with. The ravages of wild beasts are very destructive, 337 human beings having perished, thereby between January, 1835, and September, 1836. During the same period, the number of cattle destroyed by the wild beasts amounted to 6,769. The number of wild beasts killed within the time was,—elephants 29, tigers 349, leopards 129, chetas 350, bears 113.

The means of internal communication within the province are considerable. From Seringapatam, a road proceeds south-west, through Sidapoor to Coorg. A route proceeds from south to north, from Coimbatore, through the Gujjahati Pass, to Seringapatam; thence north-west to Dharwar, and ultimately to Bombay. A road from the British sanatory establishments in the Neilgherry group proceeds north through Gundlapetta to Seringapatam, but it is circuitous and difficult. There is a route leading north from Seringapatam by Nundydroog to Hyderabad, the capital of the Nizam's territory; and another proceeding from Nundydroog north-east to Cuddapa. The principal line of communication between Madras and the north-east part of Mysore is through the valley of Ambur, which admits of a tolerably easy ascent. Among the principal passes from Canara, over the Western Ghats, is that of Hyder Ghur or Angady, in the vicinity of Bednore; that of the Biali Ghat, nearly due east of Mangalore; and that of Munjerabad, a little to the south of the latter pass. In commenting upon an official report, dated in 1849, showing the nature and cost of the principal roads, bridges, and other public works constructed since the country has been under British management, the Court of Directors remark that the "document affords evidence of a great amount of public benefit produced by judicious expenditure." The territory of Mysore contains the following divisions:—1. Bangalore; 2. Mysore Proper, or Astragam; 3. Chitradroog; 4. Bednor. According to official report, the population was taken to be 3,460,696. Mysore, the principal place, as well as Bangalore, Bednor or Nuggur, Seringapatam, Chittledroog, Ooscotta, Nundydroog, and Kolar, are described under their respective names in the alphabetical arrangement.

The Mysoreans in physical constitution are a healthy, robust race of men; and, though not remarkably tall, are rather superior in size to the Indians on the opposite coast of Coromandel. Their features are regular, and their complexions are fairer than those of the natives of less-elevated tracts. The great majority are Brahmminists. The Mahommedans, much inferior in number, are for the most part idlers, and eager for a military life, though a few practise some easy handicrafts. The Mysoreans of all classes are characterized as a deceitful, inconstant, profligate race, yet courteous, contented, and patient under misfortunes. The majority fare hardly, their principal food being raghi (Eleusine coracana), a seed of inferior quality, but surprisingly prolific. The dress of the people is fuller than that of the natives below the Ghats. Both sexes wear a combi or woollen blanket wrapped round them, and the women in addition wear the chola, a kind of jacket covering the body and arms. The houses are for the most part built of mud, having low thatched or tiled roofs, and there are seldom any other openings for light or

air, except the doorways, which are so low as not to admit full-grown persons unless they stoop.

The ruinous misconduct of the kurtur or sovereign having compelled the British government to remove him from the actual administration of affairs, everything is now managed by a commission appointed by the government of India. The police establishment in the cantonment of Bangalore is under the same regulations as in the East-India Company's territory, but throughout the country the duties of police are discharged by peons or matchlock-men, of whom there are one or two in every village; and there are two distinct classes, one for the revenue, the other for the judicial department. A body of men called the Mysore irregular horse, or Silladars, are also maintained. They amount to 2,700, are commanded by a European officer, and receiving each twenty rupees a month, are bound to be at all times in readiness, with their horses and equipments complete. The Mysore infantry, also under the command of a European officer, form an efficient body of men, amounting to about 2,400. Seringapatam, formerly a British military station, has been abandoned for that purpose, on account of its pestilential atmosphere engendering deadly endemic fevers, which prevailed there for several years, and carried off great numbers both of Europeans and natives. At present the principal military stations are Bangalore, the headquarters of the force stationed in Mysore, Hurryhur, and the French Rocks, twenty miles north of Seringapatam. The annual revenue, when the country, on the fall of Tippoo, in 1799, was granted to the kurtur or descendant of the ancient rajahs, was estimated at 2,153,607 pagodas, or, estimating the pagoda at 2 rupees and 14 annas, 619,162*l*. The revenue subsequently to that period progressively increased, and for the year 1803-4 was 2,581,550 pagodas, or 742,195*l*. This was attributed to the good management of Purneah, the dewan or minister of finance. After his death, and the assumption of the powers of government by the kurtur or rajah, the reckless profligacy of that prince had ruinous effects on the finances, from which, even under British management, they have not yet quite recovered. It appears from a statement for fifteen years, ending 30th June, 1846, that the average annual revenue was 69,31,870 rupees; and that the average annual disbursements amounted to 66,25,393; leaving a balance of 3,06,477 rupees, applicable to the discharge of incumbances.

In the mythological period of India, Mysore is represented to have been the realm of Sugriva, who sent his general Hanuman to aid Rama in his expedition against Ravana, the gigantic tyrant of Lanka. In the earliest serious records of this country, it appears to have been part of the dominions of a dynasty bearing the name of Chalukia, which gave way to another called Cadumba. No explicit or

authentic history of the country, however, commences until its invasion, in 1310, by the Mussulmans commanded by Kafier, an officer of Alaaddin, padshah of Delhi. This invasion, which was transient and merely predatory, was, in 1326, succeeded by an expedition, sent by Muhamminad Toghluk III., which destroyed Dhursummuder, the capital, situate about 100 miles north-west of Seringapatam; and the seat of government was subsequently removed to Tonur, twelve miles north of that town. The remainder of the territory was subjugated and incorporated with the realm of Delhi; the affairs of which, however, soon afterwards falling into confusion, these conquests were lost. In 1336, Buka and Aka Harihar, fleeing from the Mussulman captors of Warangal, took their way southwards, and on the banks of the river Toongabudra or Tumbudra founded a city, which they called Vidanagar (the city of science), in compliment to the favourite pursuits of their minister and preceptor; an appellation afterwards changed into Vijayanagar or Bijayanagar—city of victory. This new state rapidly increased in power, and, besides its districts on the Tumbudra, comprised at an early period nearly the whole of Mysore, ultimately extending its dominions to the Comandul coast. Ram Rajah of Vijayanagar, having, by his arrogance and encroachments, provoked a confederacy of the Mussulman powers of the Deccan, the armies of the states of Beejapore, Ahmednuggur, Beeder, and Golconda, commanded by their respective kings, met Ram Rajah, in the year 1565, at Talikot, in the present British collectorate of Dharwar, where a great battle ensued, in which the Mussulmans were victorious. Ram Rajah perished; his capital was taken, rifled, with shocking circumstances of cruelty and excess, and in fact depopulated. On the defeat and death of Ram Rajah, at Talikot, the polygar or petty rajah of Mysore took advantage of the course of events to prosecute the views which he entertained in connection with his brother feudatories, and his successors pursued the like plans. Progressively extending their dominions and power, they continually encroached on the jurisdiction of the viceroy of the titular rajah of Vijayanagar; and in 1610, one of them, named Rajah Wadeyar, acquired the fort and island of Seringapatam, with its dependencies. The dynasty, continuing its career of aggression and aggrandizement, towards the close of the seventeenth century extended its sway over nearly the whole of the table-land of Mysore, by the purchase of Bangalore and its dependencies from Kasim Khan, the commandant of Aurengzebe. On the death of Kasim Khan, the rajah deputed a splendid embassy to Ahmednuggur, where Aurengzebe then sojourned. It was graciously received, and returned with a variety of presents, including a signet prepared by the emperor's directions, which, after being paraded through the city, and laid at the feet of the idol Snee Runga, in the great temple, were brought in similar state to the

palace. Chicki Deo Raj, the prince thus honoured, enjoyed a successful reign, which terminated in the year 1704. He was an assiduous and skilful financier, and drew from his flourishing territory an annual revenue, from which it is recorded that he never failed to lay by daily 2,000 pagodas, to accumulate untouched in his treasury. Those great treasures were exhausted in 1724 and 1726, through the imbecility and indolence of Dud Kishen Raj, grandson of Chicki Deo. Cham Rajah, who succeeded Dud Kishen, was deposed and destroyed by a minister whom he had disgraced, and who, in 1731, infringing the hereditary succession, raised up a pageant rajah but remotely connected with the family which had hitherto reigned. Deo Raj, the minister who made this change, was a man of talent and determination, and in 1737 defeated, and in a great measure destroyed, a numerous Mussulman force which had advanced into Mysore, attracted by the reputed great treasure still believed to be stored at Seringapatam. In 1749, Hyder Ali, subsequently a name of terror in that part of India, first appeared as a volunteer in the army of Mysore, being at that time twenty-seven years of age. In 1750, Hyder commenced his predatory career. In 1752 he held a command in the army of Mysore, and, notwithstanding some untoward events, continued to prosper until at length he succeeded in obtaining the appointment of foudjar or governor of Dindigul and its dependencies. Here Hyder commenced operations with his accustomed vigour, ability, and activity; subjugated or laid under contribution the great feudatories known in this part of India by the name of polygars; with far-sighted sagacity "obtained from Seringham, Trichinopoly, and Pondicherry, skilful artificers directed by French masters, and began to organize a regular artillery, arsenal, and laboratory." Fortune still continued to favour this aspiring leader, who received the fort of Bangalore with its valuable district and dependencies in jaghire. Shortly after, Nunjeraj, who had usurped all the powers of government, and held the pageant rajah in helpless and humiliating dependency, was driven into obscurity by Hyder Ali, who, under various pretences, obtained assignments of the revenues of territory, amounting at length to more than half the entire dominions of the rajah. In 1760, Hyder, virtually become sovereign of Mysore, at the instigation of the French commander Lally, entered into an alliance against the British, and despatched to Pondicherry a corps under his brother-in-law Mukhdroom Ali, who, falling in with a detachment of British troops, succeeded in putting it to rout with heavy loss. Soon afterwards, however, Hyder was obliged to fly precipitately from Seringapatam, in consequence of a well-concerted conspiracy formed against him. In a short time, however, he was again enabled to take the field. At first his success was fluctuating; but reverting to a course from which he never recoiled,—the employment of the

most unscrupulous stratagem, he spread dismay through the ranks of the army opposed to him, by exciting in the mind of the general suspicions of the fidelity of his officers, or rather conviction of their faithlessness; and thus leading him, under the influence of alarm, to provide for his personal safety by flight. Taking advantage of the confusion necessarily caused by the sudden desertion of their general, Hyder fell upon the bereaved army in front and rear, obtaining a complete and decisive victory, and capturing the whole of the enemy's guns, stores, and baggage. Having recruited his army and his finances, he in a short time advanced towards Seringapatam, and encamped on the south bank of the Cauvery, opposite to the centre of the island, whereon a large body of cavalry was encamped. There, under pretence of negotiating, he remained several days, every evening after sunset exercising his troops. At last these evolutions received a termination differing from that which had previously followed. Instead of dismissing the troops as usual, Hyder made a sudden dart across the river and carried destruction into the enemy's camp, capturing the whole of their heavy equipments, and most of their horses. From his newly-occupied ground he sent an insolent message to the rajah, who was compelled to make a professedly spontaneous offer to Hyder, which amounted virtually to a surrender of the government; the whole country being made over to the administration of Hyder, who was also made responsible for the public charges. From the operation of this general transfer of territorial power and revenue, certain districts were excepted, but to the amount of only four lacs; three of which were to provide for the personal expenses of the rajah, the remaining one being assigned to the support of the ex-minister, Hyder's former patron, and one on whom, in common with all who fell in his way, he had exercised his powers of dissimulation. Hyder's ambition and cupidity were only sharpened by his exaltation. From Basalut Jung, one of the various competitors for power in the Deccan, he received the title of Hyder Ali Khan Bahadur, and in consideration of a present of three lacs, the grant of the nabobship of Seror; although over the territory thus summarily bestowed, the grantor possessed neither right nor power. This defect of title, however, mattered not to Hyder: he proceeded to take possession of his newly-acquired territory, and was successful. In 1763 he engaged in the invasion of Bednore, at the head of a powerful army. His progress rarely met resistance, the cruelties with which he visited those who opposed him, deterring, by the influence of terror, from the repetition of such attempts. He penetrated to the interior of the country, took and sacked the capital, long unacquainted with the horrors of war, and which contained such accumulated wealth, that the booty, it is said, "may without risk of exaggeration, be estimated at twelve millions sterling;" all of which the captor appropriated

to his own use. Hyder had undertaken this conquest under the pretext of restoring an exiled prince to the throne. The claimant was an impostor, as Hyder well knew; but it suited his purpose to affect belief in the tale. The conquest achieved, the mask was thrown off, the pretender remitted a prisoner to a distant fortress, and the dominions of Bednore annexed to the possessions of Hyder Ali.

In 1766, died the titular rajah of Mysore, who had been allowed by Hyder to enjoy unmolested an annual income of 30,000*l.*, with the barren emblems of royalty devoid of power. Hyder, on hearing of the event while occupied in Malabar, sent orders with all the indifference attached to an affair of ordinary routine, to go through the usual formality of establishing as his successor the eldest son of the departed prince, a young man about eighteen years of age. In the early part of the year 1767, Hyder arrived at the capital, his presence there being rendered necessary by a variety of circumstances. From Poona, and from Hyderabad, troops were advancing, confederated, as was reported, against Mysore. On his arrival at Seringapatam, Hyder proceeded to make vigorous military preparations for the contest which seemed to be impending, and he embraced the opportunity of making a change in the relations which subsisted between the nominal head of the state of Mysore and the successful adventurer, who was its actual sovereign. The youth whom Hyder had placed on a mock throne, and who naturally looked upon himself as entitled to more substantial marks of royalty than he was permitted to enjoy, had manifested some discontent with his humiliating position. The exhibition of such a feeling Hyder determined to repress, probably on grounds both of revenge and precaution. He proceeded to take measures for this purpose with his accustomed coolness and decision. Districts, of the annual value of three lacs, as already mentioned, had been assigned for the rajah's support: these were now resumed; and this act of confiscation was consistently followed by plundering the palace of the unhappy prince of all the cash and valuables which it contained, with the single exception of the ornaments which the female inmates had actually on their persons at the time when the clearance was made. The expenses of the household were reduced to the lowest practicable scale, and none but Hyder's slaves permitted to remain within the palace.

Hyder now turned his attention to the defence of the dominions of which he had usurped the sovereignty. A combined attack by the Mahrattas and the Nizam, in which the British were to participate, was to be expected. The Mahrattas were actually approaching with the avowed object of entirely subverting the power of the usurper. By the treachery of Hyder Ali's brother-in-law, the first attempt made by the invaders upon a fortified place was successful. Hyder was now under the necessity of buying off the enemy, an object

which was effected at the cost of thirty-five lacs of rupees; and having thus relieved himself from the Mahrattas, Hyder Ali readily effected an arrangement with the Nizam, who united his arms with those of Hyder Ali against the late ally of the former, the British. The first attack made by the new confederates was to a certain extent successful; but a subsequent, and more important one, had a different result. The army of Hyder was estimated to consist of 13,000 cavalry and 18,000 infantry, with forty-nine guns; and that of the Nizam at 30,000 cavalry and 10,000 infantry, with sixty guns. This great force having, in the beginning of September of 1767, attacked, near Changama, a British detachment, consisting of 1,030 cavalry and 5,800 infantry, with sixteen guns, under the command of Colonel Smith, was defeated, with the loss of 2,000 killed; and towards the close of the same month received a severe and almost decisive discomfiture near Trinomalee, the loss amounting to about 4,000 men, sixty-four guns, and all the ammunition and stores of the combined forces. After a few more bootless efforts, the baffled confederates relinquished further attempts at action, Hyder, with his army, ascending the Ghats, the Nizam ostensibly separating himself from his ally, and entering into negotiation with the British commander. Hyder was now called to Malabar, where his occupation in other quarters had encouraged revolt from his authority. This movement was aided by a British expedition from Bombay, which succeeded with little effort in capturing Mangalore and some other places, but which retired with disgraceful precipitancy on the approach of Hyder, abandoning their sick as well as their stores and field-pieces. Having by the combined force of cruelty and cunning arranged his affairs in this part of his dominions, Hyder Ali retraced his steps, and invading the territories of the British and their allies in the Carnatic, fought his way in two campaigns almost to the gates of Madras, where he presented himself on the 29th March, 1769, and required that a British diplomatist, whom he himself named, should be sent to him to negotiate the terms of peace. His demand was complied with, and a treaty concluded, on the principle of the mutual restitution of all places taken during the war, except Caroor, which had long been in the possession of the nabob of the Carnatic, Mahomed Ali, but which, being an ancient dependency of Mysore, was now to be assigned permanently to the state to which it originally belonged. In the beginning of the year 1770, the greater part of Mysore was overrun by the Mahrattas, and Hyder was obliged to retreat to Seringapatam, where he was followed by the Mahratta leader, who besieged the city. The siege, though protracted, was conducted with little of either energy or ability; and in 1772 Hyder succeeded in negotiating a treaty, by which he ceded to the Mahrattas an extensive portion of the northern part of his dominions. The

titular rajah of Mysore having attempted, during the siege, to open communication with the Mahrattas, was strangled, by order of Hyder, who declared Cham Raj, brother of the murdered prince, his successor.

The death of Madhu Rao, the Peishwa, in 1773, gave rise, at Poona, to a long train of intrigues and dissensions, with their usual accompaniments in the East, of assassinations, executions, and massacres. The country became involved in wars, both intestine and foreign, and Hyder Ali, undaunted by his late disasters, took advantage of the opportunity to set about recovering and extending his dominion, and consolidating his power. His son Tippoo was detached to the northward, and Hyder himself assumed the direction of operations preparatory to the recovery of Malabar, where his power was still but imperfectly recognised. Without offering any justification of the attack, he marched into the raj or state of Coorg, a rugged tract on the south-west frontier of Mysore. The invasion was entirely unexpected, and the chief body of the Coorgs, without any previous arrangement, assembled on a woody hill, which Hyder encompassed with his troops. The apparent conquest was of little difficulty; the raja (Divaiia) betook himself to flight, and Hyder, whose chief object was to tranquillize the country, erected the fort of Mercara in the most central situation, and confirming the landholders in their possessions at a moderately increased revenue, returned to Seringapatam, whither the fugitive raja was soon afterwards brought, having been discovered in his place of concealment in the territory of Mysoor. A force was immediately afterwards detached, under Seyed Sahab and Sree Nowas Row Berkee, though Wynead, by the pass of Tambercherry, which descended at once on Calicut. The place soon fell into their hands: the Nair chiefs, who, during their short relief from foreign usurpation, had only increased their misery by intestine broils, were in a fit state to be acted on by the skilful application of political division; and in a short time the greater part of them arranged the terms of their future dependency on Hyder. This important acquisition having been achieved with a success more rapid than even Hyder had anticipated, he moved with his whole force to give efficiency to his son's operations in the north: his approach had its due effect, and before his junction Tippoo had reduced Sera, Mudgery, Chenroydroog, Goorumconda, and their dependencies, leaving nothing for Hyder in person to accomplish but the easy service of reducing Oosoota and Great Balipoor. Thus, in one short campaign, from September, 1773, till February, 1774, he not only completely reconquered every place that had been wrested from him by the Mahrattas, but recovered, with increased stability, the province of Malabar, which he had wisely abandoned, during the pressure of difficulties, in his former war with the English.

His good fortune was not, however, altogether

undisturbed. An insurrection in the newly-subdued territory of Coorg soon demanded his attention. The great mass of his army was at the capital, distant only thirty miles from the frontier of Coorg; and Hyder moved the whole infantry in several columns to penetrate at once into every portion of the territory, and suppress the rebellion at a single blow; the operation was successful, and as his intelligence was always excellent, he was enabled among his prisoners to distinguish the leaders; every man suspected as being above the class of an ordinary soldier was hanged; and for the purpose of overawing the natives, a series of block-houses was erected, pervading every part of the country, and connected with each other, and with the nearest posts in Mysoor. An event followed which must be given in the words of Colonel Wilks: "About this period, the pageant Raja Cham Raj died; Hyder had hitherto professed to hold Mysoor in behalf of the Hindoo house; and amused his subjects on every annual feast of the Dessera, by exhibiting the pageant, seated on his ivory throne, in the balcony of state; himself occupying the place of minister and commander-in-chief. This ceremonial, in most countries, would have excited feelings dangerous to the usurper; but the unhappy Hindoos saw their country everywhere sustaining the scourge of Mahomedan rule; the singular exception of the Mahratta state, a wide-spreading example of still more ruthless oppression, restrained their natural preference for rulers of their own persuasion; and they were soothed with the occasional condescension, which treated them, and their institutions, with a semblance of respect. Hyder saw and indulged the working of these reflections, and determined to have another pageant. The lineal male succession was extinct, and he ordered all the children to be collected from the different branches of the house, who, according to ancient precedent, were entitled to furnish a successor to the throne. The ceremonial observed on this occasion, however childish, was in perfect accordance with the feelings which he intended to delude, and sufficiently adapted to the superstition of the fatalist. The hall of audience was strewed round with fruits, sweetmeats, and flowers, playthings of various descriptions, arms, books, male and female ornaments, bags of money, and every varied object of puerile or manly pursuit; the children were introduced together, and were all invited to help themselves to whatever they liked best; the greater number were quickly engaged in a scramble for the fruits, sweetmeats, and toys; but one child was attracted by a brilliant little dagger, which he took up in his right hand, and soon afterwards a lime in his left. 'That is the raja,' exclaimed Hyder, 'his first care is military protection, his second to realize the produce of his dominions; bring him hither, and let me embrace him.' The assembly was in an universal murmur of applause; and he ordered

the child to be conducted to the Hindoo palace, and prepared for installation. He was of the same name as his predecessor, viz. *Cham Raj*, and was the father of the raja, who was placed by the English at the head of the Hindoo house of Mysoor, on the subversion of the Mahomedan dynasty in 1799." In 1775, Hyder attacked and put to flight Basalut Jung, engaged in the siege of Bellary; and, himself then urging the attack against the town, took and retained it, together with its valuable dependencies. He affected to compromise in the same way with Morari Row, the Mahratta commander (then occupying a fort called Gooty), by sending to demand a similar contribution from him, probably expecting that it would be refused. The intercourse was in imitation of the Mahratta style. On entering the territory, Hyder sent a complimentary message to Morari Row, intimating that he had arrived at the house of the latter; that they were ancient friends, and that he would be troublesome to him for gram and forage for his horses, the value of which he estimated at a lac of rupees. Morari Row perfectly understood the message, and replied to it in terms more distinct than had been employed by Hyder, that he also was a general, and was accustomed to levy contributions, not to pay them. The results are thus narrated by the able and intelligent historian of Mysore:—"On Hyder's nearer approach to Gooty, he repeated a message of similar import, with the same result. He therefore sat down regularly before the place; the guns which Monsieur Lally had employed against Bellary, were a convenient resource; and a battering train for this very purpose had also been ordered from Seringapatam. The fort of Gooty is composed of a number of strong works, occupying the summits of a circular cluster of rocky hills connected with each other, and inclosing a space of level ground forming the site of the town, which is approached from the plain, by two breaks or openings, forming fortified gateways to the south-west and north-west, and by two foot-paths across the lower hills communicating through small sallyports. An immense smooth rock rising from the northern limit of the circle, and fortified by gradations, surmounted through fourteen gateways, overlooks and commands the whole of the other works, and forms a citadel which famine or treachery can alone reduce. After a siege of about five weeks, the town and lower forts were carried by assault; and a large booty was found, consisting of 2,000 horses, a considerable number of the elephants of state, a vast amount of private property, and a very respectable equipment of garrison and field guns, and military stores. Hyder continued for two months longer the siege of the upper fort; and was repulsed in numerous attempts to establish himself in the lowest division of these works; but the improvident measure had been adopted of admitting within the walls of the citadel,

an immense number of followers, of horses, camels, and even horned cattle : and although, with ordinary precautions, the reservoirs of water were numerous and ample, the strange absurdity of the measure which we have noticed, had reduced the besieged to the utmost distress, and Morari Row found himself under the necessity of sending an envoy to Hyder to treat for peace. The conditions were settled after much discussion ; namely, the payment of twelve lacs of rupees, eight in cash or valuables, and a hostage for the payment of the remainder. The cash amounted to only one lac, and plate and jewels to the estimated value of the remaining seven were sent by the hands of the hostage, the son of Yoonas Khan, the former commander-in-chief, who had been mortally wounded in the affair near Ooscota, in 1768. Hyder received his hostage with great courtesy, and invited him to dinner ; the young man, considering hostilities to be at an end, was induced by the gracious manners of Hyder to be unreserved in his communications ; the conversation was purposely turned to the events of the siege, and Hyder took the opportunity of paying some appropriate compliments to the experience of Morari Row, and the conduct of his troops : not omitting to observe that he frequently noticed the exemplary gallantry of the young man himself. This of course induced some corresponding civilities ; and, in the warmth of discussing the past, he was so imprudent as to observe, that there was no want of troops or provisions, and nothing short of being reduced to three days' water could have induced Morari Row to agree to such hard conditions. Hyder heard all this with his accustomed command of countenance ; and after dinner referred the young man to the proper department for the delivery of his charge. The description of the valuables had been generally stated in the negotiation, and it was understood, that if, on a fair valuation, the amount should fall short of the seven lacs, Hyder would still receive it, and accept the hostage for the remainder. The period of inspection was designedly prolonged ; the appraisers on Hyder's part were duly instructed, he himself testified great impatience for the adjustment, and when the appraisers, accompanying the hostage, returned to report the total amount, including cash, to be only five lacs, Hyder affected the greatest disappointment and anger, said that Morari Row was trifling and deceiving him ; and ordered the hostage immediately to return with his paltry five lacs, and announce the negotiation to be at an end. He now fitted his operations to the circumstances of the siege, taking more care to prevent a single person from descending to hollows in the rock, which they had been accustomed to risk for a scanty supply of water, than to serve his batteries, or expedite his approaches ; and the besieged could not even execute the alternative which he had proposed, of prolonging his defence, by secretly dismissing the greater part of his

garrison. On the third day after this mode of warfare had been adopted, Morari Row could no longer restrain his men from exclaiming, even from the parapets, to the besiegers, that they were dying of thirst, and begged to capitulate. Hyder coolly directed them to be informed, that there was abundance of water below ; and if they desired to quench their thirst, they must all descend unarmed, with Morari Row at their head ; that he would fire at any flag of truce, and reject all advances, except in the form which he had prescribed. In the course of the day, Morari Row, accompanied by his son, and followed by his unarmed garrison, descended, and threw himself on Hyder's clemency. Every individual, before being passed, was separately searched, and plundered, for Hyder's sole benefit, of the trifling sum they possessed. His garrison then ascended the rock, accompanied by a deputation to take an account of all property public and private, and even the apartments, and persons, of the women were plundered of their remaining jewels and ornaments, to the amount of 5,000 rupees only. The official servants of revenue were placed in separate custody ; and Hyder, whose own experience enabled him to calculate the amount of embezzlement which each could conveniently spare, satisfied himself for the present with levying on them ten lacs of rupees. These operations being completed early in the month of April, he received the whole of the prisoners, civil and military (their chief alone excepted), into his gracious favour and service." Entering zealously into the wars consequent on the disputed Mahratta succession, Hyder extended his dominions in the Decan to the right or south bank of the great river Kistnah, in 1779. For many years Hyder had regarded the British with coldness, if not absolutely with aversion, in consequence of the latter declining to afford aid in his contests with the Mahrattas. In 1779, in concert with a French force, Hyder commenced hostilities against the British on the coast of Malabar ; and in the following year he invaded the British possessions in the Carnatic with an army of 83,000, of whom 28,000 were cavalry, 15,000 regular infantry, and the remainder infantry less rigidly disciplined, but having considerable efficiency for the purposes of Indian warfare ; besides a pioneer corps of 5,000 men, an admirably organized commissariat, and a small reserve of 6,000 horse and foot stationed at Kurpa. Hyder then advanced towards Madras, and so rapid was his progress that, with the exception of Madras and a few other places, the whole of the presidential territory north of the Cauvery was subjugated by him ; and with great superiority of force, and of military skill, he succeeded in surrounding, and totally destroying, a powerful British detachment, under the command of Colonel Baillie, marching southwards from Guntur to form a junction with an army under Sir Hector Munro at Conjeveram ; about thirteen miles from which

last-named place the disastrous event occurred. Hyder's victory was disgraced by acts of the most brutal atrocity. When all was lost, Colonel Baillie went forward waving his handkerchief as a demand for quarter; and, supposing his request complied with, he ordered his troops to lay down their arms; but the savage host arrayed against them continued long afterwards to slaughter their now unresisting foes. Hyder, however, met reverse in turn, receiving in the succeeding year a severe defeat at Porto Novo, on the seacoast, from a British army commanded by Sir Eyre Coote. This officer then effected a junction with a reinforcement despatched to his assistance, and captured Tripasore, a fortress of some importance. A few weeks afterwards, another severe battle between the Mysore army, under the personal command of Hyder, and that of the British under Sir Eyre Coote, took place. On this occasion, the English remained in possession of the field, but the result was not very decisive, each party claiming the victory. In a subsequent conflict between the same armies, under the same commanders, at Sholingarh, Hyder Ali received a very severe defeat, his loss being estimated at 5,000 men, while that of the English was reported not to exceed a hundred. In other quarters, the British were less fortunate, and a force in Tanjore, commanded by Colonel Braithwaite, notwithstanding the highest efforts of gallantry, skill, and perseverance, both in the commander and his troops, received a disastrous defeat. On the whole, however, the following summary of the circumstances of Hyder at this time, drawn by Colonel Wilks, may be regarded as a faithful picture of his situation and views. "Hyder, in reviewing his actual situation, felt himself foiled in every battle with Sir Eyre Coote. Disappointed, and, as he thought, deceived by the French; assailed in a vulnerable part of his western territories, where a detached army was destroyed, and farther reinforcements threatened more extensive operations; a general insurrection of the Nairs over the whole province of Malabar, aggravated by a rebellion in Bullum and Coorg, two districts on the summit of the hills which overlook that province, might be deemed overwhelming in the ordinary course of Indian warfare; but in addition to all these misfortunes, he was now openly threatened with the more embarrassing danger of a Mahratta invasion from the north. Deeply reflecting on this unprosperous aspect of affairs, he determined to concentrate his force, to abandon his scheme of conquest in Coromandel, and to direct his undivided efforts, first for the expulsion of the English from the western coast, and afterwards for the preservation of his dominions, and for watching the course of events. With these views, he commenced, in December, 1781, the destruction of most of the minor posts of Coromandel in his possession, mined the fortifications of Arcot, preparatory to its demolition; sent off by large convoys all the heavy guns and stores, and

compelled the population of the country, hitherto well protected, to emigrate, with their flocks and herds, to Mysore."

The projects of Hyder were, however, rapidly approaching to a termination. From the commencement of the year 1782, the health of the Mysorean disturber perceptibly declined, and towards its close the attacks of disease assumed a more alarming character: Hindoo, Mahomedan, and French physicians strove in vain to overcome the fatal visitation; and on the 7th December in that year, Hyder Ali Khan Behaudur, the fortunate adventurer, the energetic soldier, the accomplished dissembler, the unscrupulous usurper, the tyrant ruler, the ruthless invader, the rapacious and cruel extortioner, the achiever of so many conquests, the perpetrator of so many crimes, the author of such countless miseries, drew his last breath, in his camp near Arcot. It was suggested by one of the ablest of his servants, when the recovery of Hyder became improbable, that his death, whenever it might occur, should be concealed until the arrival of his son and successor Tippoo, who was absent in Malabar. The proposal was adopted, and the necessary measures concerted with those officers and domestics to whom the event must necessarily be known. Immediately after the stroke of death, the body was removed, in a chest filled with aromatics, and sent, under an escort, in the manner in which treasure was accustomed to be conveyed; the persons intrusted with the charge being directed to deposit it in the tomb of Hyder's father, at Colar. It was subsequently removed by Tippoo to the superb mausoleum at Seringapatam; and on that occasion 40,000 pagodas were distributed in alms, and in donations to the priesthood, for prayers offered up for the soul of the deceased, the number of whose villainies was almost equal to that of the acts of his life.

Tippoo assumed the government with extraordinary affectation of humility and grief. Hyder at his death had in the field armies numbering 88,000 men, and his treasury at Seringapatam contained cash to the amount of about three millions sterling, besides a great accumulation of jewels and other costly articles. The extent of the territory of which he had military occupation, though in some parts precarious and imperfect, comprehended 90,000 square miles, being nearly three times the area of the present territory of Mysore. The commencement of Tippoo's reign was marked by great success. General Matlews, despatched by the government of Bombay to invade Mysore, having landed at Kundapore, and forced the pass of Hyder Gurb, in the Western Ghats, succeeded in gaining possession of the town of Bednore or Hyder; but Tippoo, advancing with a greatly superior force, compelled the Bombay general to capitulate. Tippoo found no difficulty in discovering a pretext for violating the capitulation, and incarcerating the British garrison, many of whom he subsequently caused to be murdered. Success

produced in Tippoo Sultan its ordinary effects upon minds alike weak and malignant, inflaming him to a pitch of frenzied arrogance and cruelty, which might almost be regarded as indicating insanity. He caused gibbets to be erected for the ostensible purpose of putting to death some British diplomatic agents, who had arrived with the view of concluding a treaty of peace; but after "the submission of the English to nearly every form of derisive humiliation and contempt, and at a period when imagination could scarcely picture an additional insult, he condescended, on the 11th March, 1784, to sign the long-pending treaty." The most important provisions of this document were, that Tippoo Sultan should evacuate the Carnatic, and release the British prisoners, and that, reciprocally, the Mysorean prisoners should be released by the British authorities; that the British government should cause the evacuation of all places occupied by their forces in Canara and Malabar; that rajahs and zemindars, who had favoured the English, should not be molested on that account; that all commercial privileges given to the English by Hyder Ali should be renewed and confirmed. The few British prisoners who, not having been murdered, were released under the provisions of this treaty, gave an appalling account of the dreadful and wanton cruelties which they had endured.

In 1789, Tippoo Sultan, having marched to invade Travancore, attempted to force the military lines constructed by the rajah as a protection against any attack from the northward; but his troops, panic-struck by a sudden assault on their flank, though made by an inconsiderable body of men, fled precipitately, with the loss of 2,000 of their number. In such headlong disorder did the flight take place, that Tippoo was overthrown in the crowd, and sustained some personal injury; while his palanquin-bearers were actually trodden to death. From this invasion resulted a war between Tippoo and the British government, the latter aided by the Mahratta state of Poona and the Nizam. The British forces, commanded by General Medowes, in 1790 entered Coimbatore, and, having taken Dindigul and Palaghat, were opposed by Tippoo Sultan in person; but a busy and intricate campaign, harassing for both parties, terminated without any decisive result. In Malabar, however, the British were uniformly and completely successful; a body of troops under the command of Colonel Hartley defeated and destroyed a Mysorean army; and, subsequently, another under General Abercromby subjugated the whole province. At the opening of the campaign of 1791, the command of the British army was assumed by Lord Cornwallis, the Governor-General, in person; who, evading the defensive arrangements of his opponent by means of a demonstration to the southward, penetrated the Eastern Ghats by the Mugli Pass, considerably to the north of the usual route, and invested Bangalore, which, after a

siege of a fortnight, was, on March 21, taken by storm, under singularly trying circumstances. Lord Cornwallis subsequently advanced upon Seringapatam. On the march he defeated the Mysorean army commanded by Tippoo; but, having merely reconnoitred the fortress, the British commander destroyed his battering-train, marched back in the direction of Bangalore, and formed a junction with the Mahratta force sent by the government of Poona to co-operate in the war. The latter months of the year were employed in the reduction of various forts, some of which had previously been deemed impregnable. In the beginning of February, 1792, Lord Cornwallis, again leading his army to the capital of the country, defeated Tippoo Sultan on the north side of the Cauvery, and, sending a detachment across the river, lodged it in the island on which are situated the city and the fort of Seringapatam. General Abercromby having in the mean time advanced from Malabar to the west of the island and fort, no serious obstacle remained to the complete investment and blockade of the place, and its northern face was already partially breached by the British batteries. Tippoo Sultan, now considering successful resistance hopeless, on the 19th of February, 1792, consented to sign five articles of pacification, as follows:—First, that one-half of the dominions which Tippoo possessed previously to the war should be ceded to the allies from the countries adjacent to theirs; secondly, that Tippoo should pay three crores and 30 lacs (about 3,300,000*l.* sterling), one-half immediately, the remainder by instalments, at intervals not exceeding four months; thirdly, that all prisoners taken by the four powers, the English, the Nizam, the Mahrattas, and Tippoo, from the time of Hyder Ali, should be restored; fourthly, that two of Tippoo's sons should be delivered up as hostages for the due performance of the treaty; and fifthly, that when the hostages should have arrived in the camp, with articles under the seal of Tippoo, a counterpart should be sent from the allies, hostilities should cease, and the terms of a treaty of alliance and perpetual friendship should be agreed upon. Tippoo could not afford his seal to these articles without intense bitterness of feeling; and he manifested his discontent by dishonourably allowing the fire of his troops upon the British to be continued after the preliminaries had been formally accepted. Such conduct would have justified retribution, but Lord Cornwallis abstained, though the army, incensed by the atrocities of which Tippoo was known to have been guilty towards his prisoners, would to a man have rejoiced in the resumption of hostile operations. At length, however, the fire of the enemy ceased, and, on the 26th February, the fourth article of the preliminary was carried into effect, by the departure of the hostages for the British camp. The scene was witnessed with great interest. The elder of the princes was about ten years of age; his brother two years younger. Each

was mounted on an elephant richly caparisoned, and their dresses glittered with numerous and valuable jewels. They were attended by the Mysorean vakeels who had conducted the negotiation; several messengers mounted on camels, and seven standard-bearers, carrying small green flags suspended from rockets, preceded the princes; 100 pikemen, with spears inlaid with silver, immediately followed them; and a guard of 200 sepoy, with a party of horse, brought up the rear. Great crowds were collected to witness the scene, whether actuated by the desire of beholding an imposing spectacle, or by some higher motive. The sultan himself was on the rampart above the gateway through which his sons passed. They departed under a salute from the fort; and as they approached the British camp, twenty-one discharges from its park of artillery greeted their coming, while the part of the British line which they passed was turned out to receive them. On arriving at the tents prepared for their reception, they were met by the Governor-General's agent, Sir John Kenaway, and the vakeels of the Nizam and the Mahratta state. The Governor-General had proposed to meet them here; but, at the express desire of Tippoo, this mark of attention was omitted, and it was arranged that they should proceed to the British head-quarters. The procession accordingly advanced, with the addition which it had received from the accession of the diplomatic agents of the allies and their attendants, and was met by Lord Cornwallis, accompanied by his staff and some of the chief officers of the army, at the door of his lordship's principal tent. On the princes alighting, the Governor-General embraced them; and then, extending to each one of his hands, led them into the tent and seated them by his side. The duty of Tippoo's head vakeel, who had been placed in charge of the boys, was now at an end; and he signaled its conclusion by a graceful appeal to the feelings of Lord Cornwallis. "These children," said he, "were this morning the sons of the sultan, my master; their situation is now changed, and they must look up to your lordship as their father." The Governor-General made an appropriate reply, assuring the vakeel, and the princes themselves, that all possible care would be taken for the protection of their persons and the promotion of their happiness. The promise was religiously fulfilled; and the transfer of the paternal character announced by the vakeel "ceased," says Colonel Wilks, "to be an Oriental image, if determined by the test of paternal attentions." A strong interest for the captive youths was indeed prevalent throughout the British army; a feeling which, with regard to the younger, was increased by the affecting circumstance of his mother having recently died from fright, occasioned by the attack on Tippoo's lines. So fully was the sultan contented with the reception of his sons, that he ordered a royal salute to be fired in testimony of his satisfaction.

The arrangement of a definitive treaty was a work not unattended by difficulty. Eastern diplomatists are accustomed to fight every inch of ground where money or territory is in question: and in this case an obstacle to agreement of more than usual importance arose from a demand on the part of the English, that the Coorg territory, which had been conquered by Hyder Ali, should be included among the cessions to them. There were various reasons for demanding this; and among them the importance of Coorg as affording means for holding Tippoo in check, and the feelings of its then prince towards the two chief belligerents. Warmly attached to the English, and bitterly hostile to Tippoo, to leave him at the mercy of the latter would be to surrender him to certain destruction. On the other hand, Coorg could not be brought within the description of territory to which any of the allies could establish a claim without a strained interpretation of the terms of the treaty. Tippoo was frantic at the demand for the surrender of Coorg, and a recurrence to hostilities seemed inevitable. Such a result would at this time have been very ill suited to the circumstances of the besieging army. Their works had been suffered to go to decay, and materials for repairing or reconstructing them were not at hand. Sickness was rife, and little reliance could be placed on the continued fidelity of the allies with whom the British were associated. Happily a threat of the immediate recommencement of hostilities, if any delay occurred in acceding to the required terms, produced the desired effect. On the 1st of March, the treaty, duly ratified, arrived in the British camp, and on the following day it was presented to Lord Cornwallis by the interesting hostages for their father's fidelity. Relieved from the presence of his invaders, the attention of Tippoo was directed to the means of providing the large share of the contribution towards their expenses, which still remained to be defrayed. His will was of course the only rule, and he had determined that one crore and ten lacs should be furnished from the royal treasury: towards the remainder, the army were to contribute a *gift* of sixty lacs, and the civil officers and inhabitants a *gift* of one crore and sixty lacs. The amount of the military *benevolence* was readily secured by measures for appropriating to the purpose of defraying it a portion of the soldier's pay. The distribution of that part of the burden which fell on the non-military population was made by the heads of civil departments, and they, it is stated, were punctilious in determining and duly entering the respective amounts to be paid by themselves. The accounts manifested the most admirable precision and fairness; but it is believed that these qualities extended no further than the accounts. The collectors contrived to escape all personal contribution, though the demands of the state were enforced upon the inhabitants generally with rigorous exactness, the operation of obtaining payment being aided, when necessary,

by the horrible practice of torture. If current report is to be credited, the advantages of the high officials extended beyond mere immunity from contribution. It was generally believed that a much larger sum than the required amount was levied from the unfortunate inhabitants, though a much smaller one found its way into the treasury, a heavy balance having remained as a charge upon the country on behalf of the government, when, several years afterwards, the house of Tippoo ceased to reign.

In 1795, Cham Raj, the titular rajah of Mysore, who, since his elevation, had been detained a prisoner in his own palace, died of small-pox, and Tippoo Sultan, who had previously, once in the year at least, manifested some outward show of respect for his nominal lord, did not on this occasion go through even the formal ceremony which it required. The family of the rajah were expelled from the palace, robbed of all they possessed, down even to their few personal ornaments, and lodged in a wretched hovel. The rajah, a child two years old, cried bitterly when about to be deprived of his tiny golden bracelets, and it is alleged that the instruments of Tippoo's tyranny retained enough of human feeling to be affected by his infantine distress, and to allow him to retain his childish ornaments.

At an early period of Tippoo's political career, he had entered into correspondence with the court of France, but without gaining anything by the step. Subsequently, after revolution had swept over that country and its dependencies, he renewed the attempts through the government of Mauritius, but with no better success. He persevered, however; and, encouraged by the master of a French privateer, which put into Mangalore in 1797, he deputed two of his servants ambassadors to the government of Mauritius; at which island they arrived in January, 1798. The local government remitted the overtures of Tippoo to France, but being unable to afford any regular troops, and perhaps not very sanguine as to the success of projects so wildly conceived and prosecuted as were those of Tippoo, restricted their assistance to a proclamation, inviting volunteers to enlist under the flag of Mysore, to aid in driving the English out of India. The invitation was to a small extent responded to; but the volunteers were the mere refuse of the island. With these, however, the emissaries of Tippoo embarked; and though their master could not but feel disappointed with such a reinforcement, he received the adventurers with great cordiality, externally sympathized with their creed of "liberty, equality, and fraternity," and even became a member of a Jacobin club, where he was received and described as Citizen Tippoo. At this juncture, the Earl of Mornington, afterwards Marquess Wellesley, had arrived to succeed Lord Cornwallis as Governor-General. He perceived the dangers to be apprehended from Tippoo's designs, madly

as they were undertaken, and proceeded immediately to make preparations for defeating them. These, amid difficulties the most embarrassing, and impediments insurmountable, except by extraordinary genius and energy, were at length completed, and troops put in motion towards Mysore from different points. The force which Tippoo had to resist this invasion "may be stated in round numbers at 33,000 effective firelocks, including the garrison of Seringapatam, but no other garrison; exclusive of officers and a numerous artillery, which, with drivers and other establishments, amounted to 18,000 more, and about 15,000 cavalry and rocket-men; making an effective total, including officers, of about 50,000 fighting men; of which, at the commencement of hostilities, about 5,000 were detached, and eventually not available during the war." The main British army, called the Army of the Carnatic, which was commanded by General Harris, consisted of 2,635 cavalry, 884 of which were European, 608 European artillery-men, 15,076 infantry, of which 4,381 were Europeans, 1,483 gun lascars, and 1,000 pioneers; making a total of 20,802. This was increased by the British subsidiary force, draughted for this service from the territory of the Nizam, amounting to 6,536, and by the regular infantry of the Nizam, numbering 3,621; besides that prince's regular and irregular horse, of about 6,000. The artillery consisted of forty battering-guns, fifty-seven field-pieces, and seven howitzers, as well as the field-train belonging to the Nizam. Besides the force with General Harris, another (that of Bombay), under General Stuart, was advancing, about 6,420 strong. On the 6th of March, Tippoo Sultan, marching westward, at Sidasir, attacked almost simultaneously in front and rear a brigade of the Bombay army; but General Stuart, having effected a junction, the attack totally failed, after a long and obstinately-contested action; and the Mysorean army was hastily led back to defend the capital. On the 27th of March, the British army, under General Harris, was attacked by Tippoo at Malavili, not many miles distant from Seringapatam. The enemy were repulsed, with the loss of about 1,000; and the British general, without delay, crossed the river Cauvery, and encamped before the south-west face of Seringapatam. A few days afterwards, he was joined by the army of Bombay. After a succession of intricate and arduous measures of approach, the batteries, on the 2nd of May, began to form the breach; and so vigorous and skilful was the fire, that on the following day the breach was reported practicable, and the storming party of 4,376, led by General Baird, forded the river, under a heavy fire from the fortress, mounted the breach, and after a fierce and murderous conflict, in seven minutes reached the summit, and thence making their way amidst much desperate fighting, driving the defenders from the ramparts, forced the passage into the inner

citadel. During the progress of the siege, various attempts at negotiation had been made; but the haughty temper of Tippoo could not brook the terms, which were the only ones that could be granted. The position to which he had reduced himself seemed to have paralyzed him, and to have deprived him of the power of exercising the moderate share of intellect which he had received from nature. Throughout the operations of the besiegers, he appears to have forgotten that his was the chief command, and that through his military skill and judgment the loss of his capital was to be averted, if averted it could be. Forgetful of the higher duties imperatively demanded of him, he undertook the labour, and exposed himself to the dangers, of a common musketeer. Overwhelmed with despondency, he sought relief in all the miserable devices which superstition has devised to draw off men's reliance, in the hour of struggle, upon the only source of strength. When apprized that the besiegers were about to storm, he sat down to a repast, which was interrupted by the news that the operation had actually commenced. He then hastened to the northern rampart, placed himself before one of the traverses, fired on the assailants, and it is believed killed several of them. The flight of his troops before the victorious besiegers compelled him to retire. His mind was evidently unequal to the performance of his proper duties, but his personal courage did not desert him. Having received a slight wound, he mounted a horse, and made towards the gate of the interior work, apparently without aim or object. There he received a wound in the right side. He rode forward a few paces, when he was again wounded in the left breast, and at the same moment his horse was brought down. He was now placed by a follower in a palanquin under an arch. A grenadier entering, attempted to seize his sword-belt, which was very valuable; and, had he submitted to lose it, the man would probably have pushed on contented with his prize; but Tippoo, faint and helpless as he was, seized his sword, and with a feeble hand made a stroke at the soldier, who thereupon shot him through the head. Thus perished a man who possessed even more than an average amount of the vices of oriental tyrants, without any redeeming qualities; whose name is but a word to indicate the combination of perfidy and cruelty; who owed his place in history solely to his crimes, and whose death was as unlamented as his life had been detestable. His earthly remains were deposited in the mausoleum of his father, with all the pomp which could be bestowed. A storm, not an unsuitable accompaniment to the closing scene of such a man, raged with extraordinary violence on the evening of the ceremony.

With Tippoo terminated the short-lived, barbarous, and desolating dynasty established in Mysore by Hyder Ali Khan. The conquered country was divided into four parts,

three of which were allotted respectively to the Peishwa, the Nizam, and the East-India Company; the remainder was formed into a separate state, to the government of which the titular rajah, retained in captivity by Tippoo Sultan, was elevated. The Peishwa, however, withdrew from the treaty, and the territory assigned to him was divided between the East-India Company and the Nizam.

The sons of Tippoo were removed to Vellore, lodged in the fort there, and allotted an ample income, which, in 1806, in the vain hope of overthrowing the British government, and re-establishing the deposed dynasty, they abused, to the purpose of corrupting the native soldiers, who in consequence rose, and massacred the European troops stationed in the place. On the frustration of the attempt, the children of Tippoo Sultan, who were its instigators, were deported to Bengal, and their residence fixed at Russpuglah, where their descendants have so greatly multiplied, that it has been deemed desirable to hold out to them encouragement to engage in useful pursuits and blend with the general population. A proposal has been recently made by the Council of Education, to establish on the foundation of this school a boarding seminary for the junior members of the Mysore family.

The financial concerns of the newly-appointed rajah, while managed by Purneah, a Brahmin who had held a similar trust under Tippoo Sultan, were eminently prosperous; and on the rajah attaining a competent age for taking charge of the government, there was in the treasury an accumulation of 7,500,000 pagodas, or 2,812,500*l.*, which great sum, however, was dissipated, and the annual income so overstepped and anticipated, that, in 1832, confusion, insubordination, and finally open rebellion ensued, and the British government were compelled to undertake the entire administration of the territory and its revenues, managing them by a commission. The advantageous results have been generally adverted to. The Hindoo rite of suttee has been forbidden; the Mahomedan population have settled down steadily to agricultural pursuits; transit-duties no longer exist; and in regard to commercial relations with Great Britain, Mysore has been placed upon the footing of a British possession. In 1847 the rajah preferred a claim to be reinstated in his dominions; but it was deemed inadmissible, on the ground of his incompetency for the duties of government.

MYSOORE, a town, the principal place of the territory, and also of the subdivision of the same name, is situate on a declivity formed by two parallel ranges of elevated ground running north and south. The streets are laid out with considerable regularity, the principal one running north and south, and others at right angles to it. There are many good and substantial houses, of two and three stories high, generally tiled, though some of the best are terraced. The timber used in their construc-

tion is generally teak, of which a great quantity grows in the neighbourhood. The British residency and church belonging to it are in the north-east of the town. The main supply of water was once drawn from the river Cauvery by means of a canal made with great labour and expense, being in some places cut from fifty to sixty feet in the solid rock, and its length, measured along its sinuosities, being seventy-three miles; but it is at present useless, in consequence of its embankments in some places having been allowed to go to ruin. At present, water is obtained from tanks, which are liable to be exhausted during droughts, and then recourse must be had to wells yielding an impure supply, being much impregnated with soda, which causes fever and bowel complaints in such as use it. The town is surrounded by a rampart, and is further defended by the fort adjoining it on the north, west, and south sides. The fort is of a quadrangular ground-plan, three of the sides being about 450 yards in length, and the remaining, or north side, somewhat longer. The south-east side is washed by a tank, and on all other sides is a deep double ditch, within which is the rampart, built of stone, and having several bastions, and of the height of the buildings within, which have two stories. There is a sloping glacis, varying in breadth from 100 to nearly 200 yards, on every side except that washed by the tank. Within the fort is the palace of the titular rajah, an extensive building, forming three sides of a square, and the rest of the inclosed space is crowded with the dwellings of the retainers of the petty yet ostentatious court. Both the fort and town are situated on sloping ground, so that the filth is carried off by the common sewers during the rains, and at other times is removed by scavengers for manure; and hence the place is rather cleanly. In consequence of its elevation, the climate of Mysore, notwithstanding its intertropical latitude, is rather cool, the annual mean temperature in the shade being about 76°. In mid-winter, the winds are cold, disagreeable, and very dry, causing furniture to warp, crack, and split. The climate is not considered very healthy; fevers, dysenteries, rheumatism, being common. With the view, probably, of obliterating associations connected with the memory of the ancient dynasty, Tippoo Sultan, in A.D. 1787, destroyed the old city of Mysore, and used the materials for building on a neighbouring height a fortress, which he called Nezerbar. The population was compelled to remove to Seringapatam; but Tippoo Sultan was overthrown before Nezerbar was finished, and its materials were taken back to Mysore, and used in rebuilding the present fort. According to official report, the number of houses in the town of Mysore, including the fort, is 9,558, and the population is estimated at 54,729. Elevation above the sea 2,450 feet. Distant 10 miles S. by W. from Seringapatam, and 92 miles E. by N. from Cannanore. Lat. 12° 18', long. 76° 42'.

MYTEELA.—A town of Burmah, 70 miles E. from the left bank of the Irawady river, and 104 miles S. by W. from Ava. Lat. 20° 23', long. 95° 46'.

MYTHOWLEE, in the British district of Mynpooree, lieut.-gov. of the N.W. Provinces, a village on the route from the city of Agra to the cantonment of Mynpooree, and 11 miles W. of the latter. Lat. 27° 13', long. 78° 56'.

MYWA GOOLA.—A town in the native state of Nepal, situate on the right bank of the Tambur river, and 137 miles E. by S. from Khatmandoo. Lat. 27° 18', long. 87° 27'.

N.

NAAF RIVER, or rather an arm of the sea, extends in a northerly direction parallel with the coast of Arracan, from the island of Shahpooree, at its mouth, in lat. 20° 42', long. 92° 25', to Elephanta Point, and has a good depth of water; but its entrance is dangerous, from the number of shoals and banks. These banks in few places exhibit much cultivation, being for the most part covered with thick jungle; the villages are small and miserable, inhabited only by herdsmen and hunters, who gain their subsistence by entrapping and training the wild elephants which abound in the forests about these parts.

NABAH.—See **NARBAH**.

NABOGBUNJE.—A town in the British district of Dinajepore, lieut.-gov. of Bengal, 30 miles E.S.E. of Dinajepore. Lat. 25° 23', long. 89° 3'.

NABOGBUNJE.—A town in the British district of Dinajepore, lieut.-gov. of Bengal, 46 miles N. of Dinajepore. Lat. 26° 14', long. 88° 40'.

NABOGBUNJE.—A town in the British district of Rungpore, lieut.-gov. of Bengal, two miles N. of Rungpore. Lat. 25° 42', long. 89° 15'.

NABOGBUNJE.—A town in the British district of Rajeshaye, lieut.-gov. of Bengal, 137 miles N. of Calcutta. Lat. 24° 33', long. 88° 20'.

NABOGBUNJE.—A town in the British district of ~~Bengal~~ ^{Benares}, lieut.-gov. of Bengal, 138 miles N.E. by E. of Calcutta. Lat. 23° 43', long. 90° 10'.

NABOG N'VH, or **NABOG NYE**.—A pass over the mountain-range bounding Cashmere on the east, and dividing it from the valley of Muru Wurdwun. The range is formed of gneiss and mica-slate, and differs in structure from most of the mountains bounding Cashmere, which consist principally of basalt, trap, or other description of rock generally regarded as of volcanic origin. The height of the pass is 12,000 feet. Lat. 33° 43', long. 75° 34'.

NACHNA, in the Rajpoot state of Jessul-
673

meer, a small town in the desert, 65 miles N.E. of the city of Jessulmeer. Lat. $27^{\circ} 30'$, long. $71^{\circ} 45'$.

NADAMEYEE, in the British district of Mynpoorie, lieut.-gov. of the N.W. Provinces, a village on the left bank of the Kalee Nuddee (East), 34 miles N.W. of the town of Mynpoorie. Lat. $27^{\circ} 39'$, long. $78^{\circ} 49'$.

NADBAH.—A town in the British district of Purneah, lieut.-gov. of Bengal, 21 miles S.E. of Purneah. Lat. $25^{\circ} 31'$, long. $87^{\circ} 44'$.

NAGA HAUT.—A town of Assam, in the British district of Seebpoor, 36 miles E. by N. of Seebpoor. Lat. $27^{\circ} 5'$, long. $95^{\circ} 13'$.

NAGA TRIBES.—The country inhabited by these tribes is a wild unexplored tract, situate on the south-eastern borders of Upper Assam, from which it stretches to the mountain-range forming the north-western boundary of the Burman empire. The measures adopted by the British government to restrain the outrages committed by these tribes within British territory, have led to their submission. The centre of this tract is about lat. $26^{\circ} 30'$, long. 95° .

NAGAL, on the eastern boundary of the Dehra Doon, where it joins Gurwhal, a village situate on the western slope of a mountain rising above the Doon. The site is pleasant, on the banks of a small river fringed with willows and raspberry-bushes, and in many places cultivated with wheat and barley. The stream turns several mills of simple construction. An upright shaft, a few feet in length, passes through the middle of a horizontal fixed millstone, about eighteen inches in diameter and four in thickness, and is mortised into the middle of an upper one, which is rotatory, and of similar dimensions. The shaft carrying the upper stone is made to revolve by means of eight or ten broad flat radii set obliquely into the lower extremity, like the vanes of a smoke-jack, and motion is given by a stream of water falling nearly perpendicularly. Nagal is in lat. $30^{\circ} 23'$, long. $78^{\circ} 10'$.

NAGAEINPOLE.—A town in Hyderabad, or territory of the Nizams, situate on the right bank of the river Godavery, and 159 miles N.E. from Hyderabad. Lat. $17^{\circ} 40'$, long. $80^{\circ} 55'$.

NAGANOOR.—A town in the British district of North Canara, presidency of Madras, 17 miles N.E. of Soonda. Lat. $14^{\circ} 53'$, long. $75^{\circ} 5'$.

NAGAR.—A town in the Trans-Sutluj native territory of Kullu, situate 116 miles N.E. of Lodianah. Lat. $32^{\circ} 8'$, long. $77^{\circ} 10'$.

NAGAR, or **NAGYR**, north of the Punjab, a small town or village, the principal place of a petty state also called Nagar. This is situate N.W. of Baltistan and S. of Pamir: it consists chiefly of a valley of about three days' journey in length and six or eight miles broad; and is intersected and drained by a stream, which

falls into the Gilgit river. The female sex in this region are remarkable for their attractions. Vigne, who takes a great interest in such topics, adduces the following singular testimony to their charms:—"The women are famous for their beauty, and Nazim Khan used to assure me that their complexions were so fair, delicate, and transparent, that when they drank, the water was perceivable in their throats." The chief place, Nagar, stands on the banks of the river, and is defended by a fort. The name is generic, and signifies town, but, by no unusual appropriation of such terms, it is used in this instance to designate a particular place. Nagar lies in lat. $35^{\circ} 47'$, long. $74^{\circ} 22'$.

NAGARANOW, in the district of Bainswara, territory of Oude, a town 30 miles S. of Lucknow. Butter estimates the population at 6,000, including 100 Mussulmans. Lat. $26^{\circ} 34'$, long. $80^{\circ} 50'$.

NAGARIA, in the British district of Furruckabad, lieut.-gov. of the N.W. Provinces, a town near the right bank of the Ganges, and 18 miles N.W. of the city of Furruckabad. Lat. $27^{\circ} 38'$, long. $79^{\circ} 30'$.

NAGAWARAM.—A town in the British district of Rajahmundry, presidency of Madras, 35 miles N.W. by W. of Rajahmundry. Lat. $17^{\circ} 15'$, long. $81^{\circ} 23'$.

NAGGAR.—A considerable walled town in the plain of Bunnoo, westward of the Indus, and at the foot of the Salt or Kala Bagh range of mountains. It is a commercial place, and has a good bazar, but the walls have been allowed to fall into great decay. The surrounding country is fertile and well cultivated. Lat. $33^{\circ} 10'$, long. $71^{\circ} 5'$.

NAGGERY.—A town in the British district of North Arcot, presidency of Madras, 33 miles N.N.E. of Arcot. Lat. $13^{\circ} 19'$, long. $79^{\circ} 39'$.

NAGHEER.—A town of the Deccan, in the territory of Nagpoor or Berar, situate 54 miles S.E. from the city of Nagpoor, and 100 miles S. from Seuni. Lat. $20^{\circ} 36'$, long. $79^{\circ} 44'$.

NAGKUNDA, in the hill state of Komharsin, an elevated pass over a ridge proceeding westward from Wartu Peak. The ascent from the south is steep, but otherwise pleasant in the fine season, passing through noble woods of cedar (deodar) and oak, crossed by numerous rills of the purest water, and at many points presenting views of the finest mountain scenery. On the summit is a good house for the accommodation of travellers. Elevation above the sea 9,016 feet. Lat. $31^{\circ} 15'$, long. $77^{\circ} 31'$.

NAGMUNGLUM, in the Mysore, a town of square ground-plan, two miles in circumference, having in the middle a citadel also square. In the citadel are two large temples, and some other religious buildings in good repair, a public court of justice, and a mahal or palace of the former rajah. Nagmunglum

is the principal place of a talook or subdivision of the same name. It was acquired in the year 1630, by conquest, by Cham Raj, sovereign of Mysore. Distant from Seringapatam, N., 28 miles; Bangalore, W., 58. Lat. $12^{\circ} 48'$, long. $76^{\circ} 49'$.

NAGNI, in the hill state of Bulsun, a small fort, generally held by a Ghoorka garrison in the service of the East-India Company. It is built of loose stones, and has the shape of an irregular quadrangle, about fifty feet long, and of nearly equal breadth. Elevation above the sea 8,808 feet. Lat. $31^{\circ} 5'$, long. $77^{\circ} 31'$.

NAGODE.—See **NAGOUND**.

NAGOOLPAD.—A town in Hyderabad, or territory of the Nizam, 81 miles E.S.E. from Hyderabad, and 73 miles N.W. from Guntoor. Lat. 17° , long. $79^{\circ} 41'$.

NAGOR, in the district of Bainswara, territory of Oude, a village on the route from Cawnpoor to Pertaubgurh, 30 miles S.E. of the former, situate close to the left bank of the Ganges. Lat. $26^{\circ} 22'$, long. $80^{\circ} 33'$.

NAGOR.—See **NAGOUR**.

NAGORE, in the British district of Tanjore, presidency of Madras, a town on the Coromandel coast, on the estuary of a small outlet of the river Coleroon. "There are eight feet on the bar at high water during the springs; the rise of the tide about three feet. Several vessels of two or three hundred tons burthen belong to this place, and are navigated by natives, who conduct them to the coast of Sumatra, Acheen, Malacca Strait, and other parts on the east side of the Bay of Bengal, where they have a constant trade." The town is easily distinguished at sea by five pagodas, rendered more conspicuous by their white colour. It is a large populous place, with good bazars, in which considerable business is done in cotton goods and rice, and other country produce. Distance from Negapatam, N., five miles; Tranquebar, S., 13; Tanjore, E., 48; Madras, S., 160. Lat. $10^{\circ} 49'$, long. $79^{\circ} 54'$.

NAGORE, in the British district of Bhambhoom, lieut.-gov. of Bengal, a town 15 miles W. of Sooree, the seat of the civil establishment of the district. Lat. $23^{\circ} 56'$, long. $87^{\circ} 22'$.

NAGORE, a river rising in lat. $26^{\circ} 39'$, long. $88^{\circ} 24'$, in the British district of Dinajepoor, through which it flows southerly for twenty-five miles; then, for eighty miles forming the boundary between Dinajepoor and Purneah, it falls into the Mahananda, in lat. $25^{\circ} 26'$, long. $88^{\circ} 6'$.

NAGOTNA, or **NAGATHANA**, in the British collectorate of Tannah, presidency of Bombay, a town on the river Amba, which is navigable for boats of considerable burthen as far as this place, twenty miles from its mouth. From this cause, the town is a considerable thoroughfare for persons proceeding from Bom-

bay to the south-east part of the Deccan, as they can, by sailing across Bombay harbour and up the river, reach Nagotna by a single tide, and thence continue their journey by land. A road runs from this town to Mahabulshwar, a distance of seventy miles, but it is of no great width or solidity of construction, and is deficient in drains and bridges. Another road, running north-east, joins the Bombay and Poona road at the foot of the Bhore Ghaut. When the Concan belonged to the kings of Beejapoor, Nagotna marked the limit of the district to the north. Distance from Bombay, S.W., 40 miles. Lat. $18^{\circ} 33'$, long. $73^{\circ} 13'$.

NAGOUND, in the native state of Oocheyra, territory of Saugor and Nerbudda, a small town on the route, by Rewa, from Saugor to Allahabad, and the site of a cantonment for British troops. Here is a fort or castle, stated by Jacquemont to have been, at the time of his visit, the residence of a rajah, probably that of Oocheyra, who, in 1830, was deposed by the British authorities for the murder of his father. It is situate on the Umrin, a tributary of the Tons (South-eastern), and is consequently well provided with water; and supplies may be had from its bazar. Elevation above the sea 1,090 feet. Lat. $24^{\circ} 34'$, long. $80^{\circ} 39'$.

NAGOUR, in the Rajpoot state of Jodhpoor, a considerable town, is situate in a plain overrun with jungle, and is surrounded by a wall. It has four tanks and fifty wells. The kine reared in the surrounding country are fine, and in much request in the neighbouring parts of India. The town belongs to a feudatory of the maharaja of Jodhpoor; and the district of which it is the capital is stated by Tod to have paid to government, in the prosperous times of Jodhpoor, an annual income of 7,500*l.*, from the sayer or commercial imposts alone. Distant N.W. from Nusserabad 84 miles, S.W. from Delhi 250; from the town of Jodhpoor, N.E., 75. Lat. $27^{\circ} 10'$, long. $73^{\circ} 50'$.

NAGFOOR, in the British district of Gurhwal, lieut.-gov. of the N.W. Provinces, a town on the route from Almora to Kunawar, 56 miles N.W. by N. of the former. Lat. $30^{\circ} 20'$, long. $75^{\circ} 16'$.

NAGPORE.—A British province in Southern India, comprising a great part of Berar and Gondwana, as well as several extensive and nearly waste tracts to the south and east. It is bounded on the north by the British territory of Saugor and Nerbudda, and the native state of Korea; on the east by Sirgooja, the British districts of Sumbulpore and Odeipore, and the petty native states of Ryghur, Nowagudda, Cahahandy, and the hill zemindarry of Jey-poor; on the south-west by Hyderabad, or the territory of the Nizam; and on the west by Hyderabad and the Saugor and Nerbudda territory. It lies between lat. $17^{\circ} 50'$ — $23^{\circ} 5'$, long. $78^{\circ} 3'$ — $83^{\circ} 10'$; its extreme length from north to south has been stated to be 368 miles; its extreme breadth from east to west, 278.

Colonel Blacker conjectured that the area did not exceed 70,000 square miles; but by actual survey it appears to be 76,432. It is in general a tract of considerable elevation, the surface sloping from north-west to south-east, and the whole of the drainage being discharged into the Bay of Bengal, except a very small portion which finds its way, by the Taptee, into the Arabian Sea, and another, equally limited, discharged into the Nerbudda. The northern part of the territory, or Deogurh above the Ghats, comprises part of the great Vindhya range of mountains, and has considerable elevation; the highest part of the Mahadeo Mountains, as this part of the great range is called, being about 2,500 feet above the sea; and other summits having respectively elevations of 2,100, of 1,900, and of 1,641 feet above the sea. The surface, as it stretches southward, becomes less rugged, and finally sinks into an extensive plain. The general level of this plain is estimated at 1,050 feet above the sea. The northern portion of the division of Chutteesgurh, in the eastern part of the territory, has also considerable elevation, rising to the Vindhya Mountains, computed to have at Omerkuntuk an elevation of 3,463 feet; and southward from this locality extend the high lands called the Lanjhee Hills, from the town of the same name. The Lanjhee range is but imperfectly explored; but the summit Leela, lat. $21^{\circ} 55'$, long. $80^{\circ} 25'$, has been ascertained to have an elevation of 1,300 feet above the neighbouring plain country, and 2,300 above the sea; and another summit of the same hills, in lat. $21^{\circ} 40'$, long. $80^{\circ} 35'$, has an elevation of 2,400 above the sea. The Lanjhee divides the territory into two extensive basins, one lying to the north-east, the waters of which are discharged through the Mahanuddee into the Bay of Bengal; the other to the south-west, the drainage of which passes into the Godavery, by the Weingunga and Wurda; thus finding a way also into the Bay of Bengal. In the former basin, the elevations of several points have been ascertained; as Rypore, in lat. $21^{\circ} 12'$, long. $81^{\circ} 40'$, 1,747 feet; Rutanpoor, lat. $22^{\circ} 12'$, long. $82^{\circ} 8'$, 1,538 feet; Konkeir, the south, lat. $20^{\circ} 16'$, long. $81^{\circ} 33'$, 1,953 feet; Shawa, about lat. $20^{\circ} 30'$, long. $81^{\circ} 50'$, 2,117 feet; Dhunderoe, about lat. $21^{\circ} 25'$, long. 82° , 1,730 feet. The south-eastern part of the territory, comprising fully a third of the whole, and forming the raj or extensive zemindary of Busar, has not been explored by Europeans. Hence little is known of the country, but that it is both a woody and hilly tract, the valleys of which alone are cultivated, and partially cleared of jungle; and that there are a few roads, or even paths, practicable, except for the savage Gonds, the indigenous inhabitants of those wild parts. This state of the country results rather from the habits of the population than the nature of the soil.

The principal rivers of the territory are the Wyne Gunga, the Mahanuddee, the Wurda, the Kanhan, and the Sew. There are a great

number of rivers of less importance, for the country is for the most part very well watered. There are no natural lakes, but there are some tanks or artificial pieces of water of great extent. The most remarkable is the Nawagaon Bund, in lat. $20^{\circ} 55'$, long. $80^{\circ} 10'$, which is twenty-four miles in circuit, and is formed by the construction of two small embankments, which dam up, and cause the accumulation of the water flowing into an extensive natural depression. Another, the Seoni Bund, is six miles in circumference; and those of less dimensions are very numerous. The amount and distribution of the population in 1825 are thus given in an official statement:—

Deogarh below the Ghats	572,792
Wainganga	690,770
Chatisgarh	639,603
Chanda	306,996
Deogarh above the Ghats	145,363
City of Nagpore and suburbs ..	115,228

This result showed an increase of above 250,000 in five years. In 1842, a writer who had access to official sources, thought it probable that the population then amounted to 3,200,000, and more recently the number has been given at 4,650,000. Of the amount of population in 1825, it was calculated that 2,120,795 were Brahmimists, 58,368 Mussulmans, and 291,603 Gonds. Though the numbers are greatly increased, the proportions probably remain nearly the same.

The Gondee language, which is spoken throughout the whole territory, is a rude dialect, having no written character. In some districts, besides the Gondee, the peculiar dialect of the Cole tribe is used. In the northern part, the prevailing language is a mixture of Hindee, Mahratta, and Gondee; in the eastern part, the Ooriya is partially used, as in the southern the Telinga. Mahratta is the language of the city, as it was of the court and of all the functionaries of government throughout the realm; the Mahrattas being until lately the ruling race; the rajah being of that race, which furnished all the officers of state, and a large portion of the army and people. The Gonds appear to be the aboriginal inhabitants, and the relics of a widely-extended population, subjugated by Hindoo invaders. They are distinguishable by their features, having broad flat noses, thick lips, and curly hair. When reclaimed from the savage state, they are represented as being sincere, faithful, intelligent, and less mendacious than the Brahmimists or Mussulmans. The territories of Nagpore have been hitherto divided into the following soubahs or districts:—1. Sindwara, or Deogarh above the Ghats; 2. Nagpore, or Deogarh below the Ghats; 3. Bhandara or Wainganga; 4. Ralpoore or Chatisgarh; 5. Chanda or Chandarpur. The principal towns are Nagpore the capital, Chanda, Rypoor, Bundara, Sindwara, Oomrait, Hingunghat, Ramteak, Pohonee, Konkeir, Wairagarh, Bustar, and Kamptee. The principal routes through the territory are,—1. East

to west, from Calcutta, through Ryepoor to Kamptee, and thence to Nagpore; 2. east to west, from Cuttack to Ryepoor, where this route joins the former; 3. east to west, from Kamptee, through Nagpore, to Ellichpore, where, turning south-west, this route proceeds through Aurungabad to Bombay; 4. south to north, from Kamptee and Nagpore, to Saugor; 5. north-east to south-west, from Hazareebagh, through Ruttunpore, to Kamptee and Nagpore; 6. north to south, from Kamptee and Nagpore, to Secunderabad and Hydrabad.

The rajahs of Nagpore, sometimes called the rajahs of Berar, were the rulers of a state which was a branch of the great Mahratta confederation, and the heritage of a family distinguished by the appellation Bhoonsala. Its founder was a man named Parsojee, who, it is said, was originally a private horseman, but who rose to rank and power through the gratitude of Rajah Saho, son of Sevajee, whose standard he was among the first to join when that chief was liberated from the captivity in which he had been held by the Moguls. In consideration of his services, Parsojee was invested with the right of collecting the Mahratta demands in the province of Berar. Parsojee was succeeded by his cousin Ragojee, who was related to Saho by marriage, and who succeeded in raising his power apparently on the ruins of that of the Goond rajahs. He extended his encroachments farther, and repeatedly invaded Bengal. The soubahdar of that province being unequal to the task of defending himself, and disappointed in his attempt to obtain aid from the emperor, who was unable to afford any, bribed the Peishwa Balajee, by confirming to the Mahrattas the grant of Malwa, to undertake the expulsion of the intruder. This he effected; but Ragojee, taking advantage of his absence, entered into a confederacy against the Peishwa, and made a rapid march in the direction of Poona. From this confederacy he was detached by the Peishwa conceding to him the right of levying the Mahratta chout in all Bengal and Behar. This right Ragojee asserted with varied success. On one occasion, his troops were successful in the field, but their commander was seduced into an interview with the soubahdar and murdered. Subsequently, the treacherous ruler was compelled to make a cession of territory, and to consent to pay twelve lacs annually as the chout of that province. Ragojee dying in 1755, was succeeded by his eldest son Janojee. This prince, who died without issue in 1772, adopted his nephew Ragojee as his successor, appointing his widow regent during the youth's minority, assisted by one of his brothers, named Sabajee. This arrangement was very distasteful to another brother, named Madajee, who, though the father of the infant rajah, was thus excluded from all control over his affairs. Incessant dissensions and plots resulted, and at last the two brothers, Sabajee and Madajee, came to open hostilities, terminated by a battle, in which the former fell by a pistol-shot from the hand of the latter,

delivered under circumstances which amounted to assassination. Madajee thereupon assumed the regency. His administration was of a pacific character. In the struggle for the peishwaship he took no active part, but facilitated the march of a British detachment under Colonel Goodard through the dominions of the Bhoonsala rajah. Upon the death of Madajee, which took place in 1788, the Rajah Ragojee came into the uncontrolled exercise of power. His policy for many years was to avoid external war; but in an evil hour for himself, he, in 1803, joined Scindia in the war against the British government, consequent on the treaty of Bassein. The victories of Assaye and Argaum taught him the necessity for peace, and by a treaty concluded in 1804, he surrendered the province of Cuttack (which had been obtained many years before from the soubahdar of Bengal), as well as other portions of territory, to the British government and their allies. Two years afterwards, in the exercise of the policy of conciliation carried out by Sir George Barlow, part of the cessions were restored. Ragojee died in 1816, and his son, labouring under infirmities which rendered him incapable of governing, the administration of affairs was intrusted to the next in succession, a cousin of the reigning rajah, known in Indian history by the name of Appa Sahib, and who, on the death of his relation, succeeded to his title, being previously in possession of his authority. By him a subsidiary treaty was concluded with the British government. This, however, did not restrain him, a few years afterwards, from entering into intrigues with the Peishwa, with whom the British government was then actually at war; and the treachery was consummated on the 26th of November, 1817, by an open attack on the British troops. The disproportion of numbers was great; but the best dispositions which the suddenness of the attack allowed were promptly made, and the resident, Mr. Jenkins, with his first assistant Mr. Sotheby, repaired to the scene of action. The latter gentleman was left dead on the field; the former remained at the post he had chosen, exposed to all its dangers, till, after a contest of eighteen hours, the conflict terminated in favour of the British. The hill of Seetabuldee, the chief post of the victors, was thus rendered a memorable spot by the courage and perseverance of its defenders. After this, Appa Sahib was admitted to terms far more favourable than he had any right to expect; but no stipulations could bind him. Scarcely had he signed the new treaty, than he entered into fresh measures of hostility, and this being discovered, he was placed under arrest. While on the way to Allahabad, he however effected his escape, and never was retaken, though his life was prolonged for many years. He died at Joudpore in 1840. Subsequently to his deposition, it was discovered that he had caused the afflicted prince who preceded him, and for whom he was appointed to act as regent, to be strangled. The

NAG.

vacancy created by the expulsion of the blood-stained and perfidious Appa Sahib, was supplied by the elevation of a youth maternally descended from Ragojee. During his minority, the country was administered by British officers. In 1826, it was formally made over to the rajah, on the conditions mainly of the treaty concluded in 1816 with his predecessor. In 1848, an impostor, named Ragobartee Gossain, pretending to be Appa Sahib, collected troops, and made his appearance in Berar. A military force was despatched to oppose him, but though the insurgents were defeated, the capture of the pretender and the dispersion of his troops were not effected without considerable loss on the part of the victors. The latest engagement made with the late Rajah Ragojee was in 1829. He died on the 11th December, 1853, without issue, and, it is said, altogether without relations. According to the highest authority on the subject, the succession in the Bhoonsla family was "hereditary in the entire male line from the common ancestor, or first founder of the dynasty, to the exclusion of females or their issue." There was no one who could pretend to this qualification; and it would have been unwise for the British government to elevate a stranger to the musnud. Nagpore was therefore incorporated with the British dominions, and now forms a constituent part of them.

NAGPORE.—The principal place of the territory of the same name. It is situate in a low swampy hollow, which, though it has of late years been in some degree improved by the excavation of tanks and watercourses, is still very wet and muddy during the rains. The town is about seven miles in circumference, but very straggling and irregular in its shape. There is but one good street, the others being mean and narrow, and rendered very incommodious by innumerable channels and watercourses, often impassable during the rains. The place at a distance has the appearance of a forest, in consequence of the great number of trees interspersed among the houses, and which interrupt ventilation, and add to the unhealthiness of the site. The greater part of the houses are built of mud, some being thatched, others tiled; but there are a few of large size, built of brick and mortar, with flat terraced roofs. There is throughout the town no specimen of fine architecture; and even the palace of the late rajah, which is the most considerable building, is devoid of symmetry or beauty: it is merely a large pile of stone masonry, completely obscured by the encroachments of mean mud huts built against its walls. A considerable portion of the edifice itself has been allowed to remain unfinished. The only ornamental parts of the palace are the lofty pillars of carved wood which support the roof of the portico at the entrance, and also those of the principal courts. Close to the city on the west is the ridge of Seetabuldee, running from north to south, and having two sum-

mits, one at each extremity, the northern being the higher, but the southern the larger, and all parts commanding the city. The geological formation is basalt, surrounded on all sides by gneiss, or slaty granite. The Nag, a small river, flows along the southern side of the town, and falls into the Kanhan some miles to the eastward. Notwithstanding the situation of the city, which is distant in a direct line about 350 miles from the nearest part of the Bay of Bengal, and 420 from the nearest part of the Arabian Sea, the registered annual rainfall is very considerable. In 1826, the fall slightly exceeded sixty-five inches, of which sixty-two fell during the four months of the south-west monsoon,—June, July, August, September; and in 1831 the fall also slightly exceeded sixty-five inches, fifty-four of which fell during the four monsoon months. The greatest registered fall was seventy-two inches, and that was in 1809. The range of the thermometer in the shade is moderate. Prinsep concludes "that the mean temperature of Nagpore does not differ much from 80° Fahrenheit, which is nearly two degrees higher than that of Calcutta, and one and a half lower than that of Madras." The manufacturing industry is engaged in making cotton cloths, both coarse and fine; chintzes, turbans, silks, brocades, coarse blankets, and other coarse woollens; cotton tent-cloths, and also tent-cloths and sacks of hemp; utensils of copper and of brass, and of other alloys. Jenkins mentions that shawls, silks, muslins, and piece-goods were in one year imported into the city of Nagpore to the amount of 320,000 rupees, or 32,000*l*. The banking business is carried on with skill and much profit. This business, subsequently to the expulsion of Appa Sahib, largely increased; fifteen banking-houses, some of them very wealthy, having been established since 1818. According to the last census, the dwellings were,—matted huts 48, thatched huts of a better description 14,680, tiled houses 11,120, houses of baked brick and mortar 1,301; total 27,149, inhabited by a population amounting to 111,231; of whom about 2½ per cent. were Mussulmans, the rest Brahminists. Elevation above the sea 930 feet. Distance from Bombay, N.E., 440 miles; Poona, N.E., 390; Hyderabad, N., 265; Madras, N., 565; Calcutta, W., 605; Delhi, S., 530. Lat. 21° 10', long. 79° 10'.

NAGPORE CHOTA.—See **CHOTA NAGPORE**.

NAGROLAH, in the north-east of the Punjab, a village on the route from Chumba to Cashmere, by the Banihal Pass. It is situate thirty miles north-west of Chumba, in a rugged country between the upper course of the Ravee and that of the Chenaub. Lat. 32° 50', long. 75° 50'.

NAGULDINNY.—A town in the British district of Bellary, presidency of Madras, 70 miles N.E. of Bellary. Lat. 16° 55', long. 77° 38'.

NAGULPILLY.—A town in Hyderabad, or territory of the Nizam, 36 miles N. from Hyderabad, and 169 miles E. by N. from Sholapoor. Lat. $17^{\circ} 50'$, long. $78^{\circ} 29'$.

NAGURBUSSEE.—A town in the British district of Tirhoot, lieutenant-gov. of Bengal, 33 miles S.E. by E. of Mozufferpoor. Lat. $25^{\circ} 51'$, long. $85^{\circ} 54'$.

NAGURSOGA.—A town in one of the recently sequestrated districts of Hyderabad, or dominions of the Nizam, 143 miles W.N.W. of Hyderabad. Lat. $18^{\circ} 11'$, long. $76^{\circ} 35'$.

NAGWA, in the British district of Muzufurnugur, lieutenant-gov. of the N.W. Provinces, a village on the route from Kurnal to Meerut, and 52 miles S.E. of the former. It is situate on the right bank of the Hindun, here crossed by ford, having the water from two feet to two and a half feet deep, with a sandy bottom. Lat. $29^{\circ} 12'$, long. $77^{\circ} 34'$.

NAGWAN, in native Gurhwal, a village on the Budeear, a considerable feeder of the Jumna, and close to the confluence of the streams. It is remarkable for being surrounded by a profusion of fine orange-trees, which Jacquemont observes he has not elsewhere noticed in the Himalaya. The size of those trees, and the maturity of their fruit in this locality, is the more remarkable, as it has an elevation of 4,000 feet above the sea, and every winter heavy snows fall. The pomegranate is also produced here. An absurd Hindu fiction prevails, that the Ganges, by a subterranean course, reaches this village, and breaks out in a fine spring close to it. Lat. $30^{\circ} 50'$, long. $78^{\circ} 19'$.

NAHANY.—A town in the British district of Chota Nagpoor, lieutenant-gov. of Bengal, 23 miles S.W. of Lohadugga. Lat. $23^{\circ} 12'$, long. $84^{\circ} 30'$.

NAHAPARA.—A town in the British district of Beerbhoom, lieutenant-gov. of Bengal, 98 miles N. by W. of Calcutta. Lat. $23^{\circ} 54'$, long. $88^{\circ} 1'$.

NAHARGURH.—A town in the Rajpoot state of Kotah, situate eight miles N.E. from the right bank of the Parbutty river, and 66 miles E. by S. from Kotah. Lat. $24^{\circ} 56'$, long. $76^{\circ} 53'$.

NAHGUL, in the British district of Bijour, lieutenant-gov. of the N.W. Provinces, a village on the route from Moradabad to Hurdwar, and 22 miles S. of the latter. It is situate on the left bank of the Ganges, which, at a short distance from it, is crossed by ferry. Lat. $29^{\circ} 40'$, long. $78^{\circ} 15'$.

NAHNDEEA.—A town in the Rajpoot state of Serohee, situate on the right bank of the Bunnass river, and 54 miles W.N.W. from Oodeypoor. Lat. $24^{\circ} 51'$, long. 73° .

NAHRWALLEH.—A town in the native state of Bhawalpoor, 92 miles S. from Mooltan, and 71 miles S.W. from Bhawalpoor. Lat. $28^{\circ} 31'$, long. $70^{\circ} 40'$.

NAHUL, in the British district of Shah-jehanpoor, lieutenant-gov. of the N.W. Provinces, a town on the route from Bareilly to Setapoor, and 44 miles S.E. of the former. Lat. $28^{\circ} 8'$, long. $80^{\circ} 6'$.

NAHUN, in Sirmor, the residence of the rajah of that small state, and the only town of importance which it contains, is situate on a hill, principally of grauwacke formation, rising at the western extremity of the Kyarda Doon. It is described by Moorcroft as having a cleaner and handsomer appearance than the generality of Indian cities, and commands fine views of the mountains on the north and on the south of the plain of Sirhind, and of the streams which traverse it. The houses are small, built of stone cemented with lime, and having flat roofs of mud, tempered so as to be waterproof. They are arranged on the uneven crest of a rocky eminence, so that the streets are a sort of flights of stairs, the surface being in most places formed into steps by cutting the rock; and where not thus contrived, are well paved, and kept clean. The residence of the rajah, in the middle of the town, is a large edifice of stone; the Zenana is built of cut stone, in an antique Hindoo style, at once simple and beautiful. There are three Hindoo temples, remarkable rather for their fine sites than their architectural excellence. The bazar is large, populous, and well supplied. On the edge of a tank in the centre of the town is a monument to Lieutenant Thackeray and three other officers, killed at the siege of Jaituk. Nahun was occupied by the British in the Goorkha war, at the close of 1814, and restored by them to the rajah of Sirmor. It is on the route from Suharunpoor to Subathoo, and 54 miles S.E. of the latter place, in which direction there is a good road, made by the rajah of Sirmor. The climate is very fine, in consequence of the elevation, which is 3,207 feet above the sea. Distant N.W. from Calcutta 1,065 miles. Lat. $30^{\circ} 34'$, long. $77^{\circ} 21'$.

NAHUR, in the British district of Goorgaon, lieutenant-gov. of the N.W. Provinces, a town on the route from Rewaree to Hanseo, 20 miles N.W. of the former. Lat. $28^{\circ} 25'$, long. $76^{\circ} 29'$.

NAHUR, in the jaghire of Doojana, territory of Jujhur, lieutenant-gov. of the N.W. Provinces, a village on the route from Dadree to Rewaree, and 18 miles N.W. of the latter. Lat. $28^{\circ} 23'$, long. $76^{\circ} 29'$.

NAHURNUDEE, in the Rajpoot state of Jodhpoor, a village on the route from Balotra to Jodhpoor, and 12 miles S.W. of the latter. The city, citadel, and palaces of Jodhpoor form a striking prospect as seen from this place. It has a well and two tanks. Population 730. Lat. $26^{\circ} 12'$, long. 73° .

NAIKRAS (THE).—The country inhabited by this tribe is comprised within a circle of about sixty coss, or 120 miles; bounded on the north by the petty state of Barreeah, and

on the south by the Rewa Caunta district of Chota Odeypore. With the exception of a few partially-cultivated spots, the whole of the tract is covered with jungle; in the most impervious parts of which are situated the villages. The number of inhabitants is said to be about 3,000; but no trustworthy estimate can be formed, as the country is never visited but by travellers compelled to pass through it, and who avoid as much as possible the haunts of the freebooters by whom it is peopled. The huts of the lower class of Naikras are composed of the rudest materials; the principal men have habitations constructed in a more durable manner, generally situate in the valleys, at a short distance from each other. These persons are said to be possessed of much wealth, which is kept concealed in caves on the hills. Each chief has several wives, whose residences are scattered over the country: such is the state of suspicion in which they live, that no man of any consequence sleeps at the same place two nights consecutively. It is the usual custom to return to the hills at sunset, the ravines below which afford shelter on the approach of danger. The rude cultivation of this wild tribe is confined to a few fields of grain, their subsistence being generally derived from the produce of plunder. Cattle are the chief objects of their pursuit, on account of the facility with which they can be disposed of in the neighbouring villages; but articles of the most trifling value offer a sufficient inducement to rob, and even to murder. The latter crime indeed is generally the preliminary to the former. Of the cruelty of these people some idea may be formed from the circumstance of its being the general belief that the custom which obtained among the pirates of old, of sacrificing a human being over their secret haunts of treasure, is the general practice among them. When pushed to extremity, the Naikras subsist on the roots of plants. Opium and tobacco are their greatest luxuries; and in these they freely indulge whenever opportunity offers. A few coolies and small traders reside in their principal villages, and retail these articles, as also gunpowder; but they do not deal in grain. The face of the country is strong. The water is good; but the barbarous practice of poisoning the wells on the approach of a hostile force is always adopted. Matchlocks, swords, and bows and arrows, are the arms in general use.

The Naikras had been induced by the British government to enter into engagements binding them to desist from plundering, and these engagements they for some time faithfully observed; but at length they resumed their depredations, which the feeble chiefs to whom most of them were nominally subject, were utterly unable to control. In 1838, the principal offender, Kewul Naik, was prevailed upon to renew his engagement; but almost immediately violated the new settlement by plundering two villages belonging to Chota Odeypore. A large force was sent out against the Naikras,

and it succeeded in seizing all the leading men of the tribe. Among those taken was Kewul Naik, who resided in the village of Barre. Further excesses took place in about eighteen months afterwards; the rebels being headed by Nursing, the son of the last named personage, who went out in barwuttee, after murdering his uncle. This criminal and his associates were tried for the offence, and punished; and an example having been made of several others, the tribe have now been reduced to some degree of order. The principal district inhabited by this class, designated the zillah of Sagtalla, is under the immediate superintendence of a thanadar appointed by the British government, who collects the revenues. In the year 1826, a potdaree engagement was entered into between its rajah and Sulloobhay Khaosall Chund, with a view to arrange the financial embarrassment of the state, and redeem the pledges granted to certain creditors. These objects have been effected and the debts discharged. The revenue of the state amounts to 62,700 rupees. On the death of the last chief, Gungadass, claims were preferred to the guddee by the mother of Pritheerajee and two other widows. The result of the inquiry instituted on the occasion terminated in the recognition of Pritheerajee, the present ruler, who has since occupied the place thus attained.

NAIN, in the district of Salon, territory of Oude, a town 60 miles S.E. of Lucknow. Butter estimates its population at 10,000. Lat. 26° 4', long. 81° 20'.

NAIRS.—See **MALABAR**.

NAISREE.—A town of Bombay, in the native state of Kolapoor, 46 miles S. by E. from Kolapoor, and 19 miles N.W. from Belgaum. Lat. 16° 2', long. 74° 24'.

NAJAFGARH, in the British district of Delhi, lieutenant-gov. of the N.W. Provinces, a town on the west shore of the extensive jhil or lake formed by the overflow of the Hansouti torrent during the rainy season. Distance 15 miles S.W. from Delhi. Lat. 28° 36', long. 77° 2'.

NAJAFGURH, in the British district of Cawnpore, lieutenant-gov. of the N.W. Provinces, a small town or village on the right bank of the Ganges, nineteen miles by water below the cantonment of Cawnpore, and 16 miles S.E. of it by land. The principal building here is a residence built by General Martin, a French adventurer, who succeeded in accumulating immense wealth. "It is an Hindostanico-European house with small rooms, fortified as usual by strong doors and shutters." Indigo is much grown in the surrounding country, and here manufactured into a marketable state. Lat. 26° 18', long. 80° 36'.

NAJREH.—A town in the British province of Sattara, presidency of Bombay, 72 miles E.S.E. of Sattara. Lat. 17° 21', long. 75° 6'.

NAKARIKALLU.—A town in the British

district of Guntoor, presidency of Madras, 35 miles W. by N. of Guntoor. Lat. $16^{\circ} 23'$, long. 80° .

NAKO, in Bussahir, a village of Koonawur, and one of the largest of that district, is situate on the western declivity of the huge mountain of Purkyl, and about a mile from the left bank of the Lee or river of Spiti. It is a collection of thirty or forty small dirty huts, built partly of stone, partly of unbaked bricks, and covered with a roof of mud over-spreading a platform made of the trunks of junipers. "This," observes Gerard, "is the highest village that occurs to the traveller who traces round the frontier of Bussahir. Separate measurements, by excellent barometers and the boiling-point of water, indicate an elevation a little above 12,000 feet from the level of the sea; yet there are produced the most luxuriant crops of barley and wheat, rising by steps to nearly 700 feet higher, where there is a lama's residence, occupied throughout the year. The fields are supported and partitioned by dykes of granite. The other grains are phapur (buckwheat) and turnips." Beans are also cultivated, and though very small, ripen perfectly. In consequence of the extraordinary aridity of the atmosphere, the crops are produced by means of water flowing from the masses of ice and snow above. A little below the village is a small lake or pond, shaded with willows and poplars, which are the only trees, except junipers, found in this vicinity, furze alone being used for firewood; and the scarcity even of this adds to the privations to be endured in a climate so inclement. Yet yaks, kine, horses, and asses are reared here in great abundance. Elevation above the sea 11,850 feet. Lat. $31^{\circ} 52'$, long. $78^{\circ} 40'$.

NAKODUR, in the Julinder Doab of the Punjab, a town situated 11 miles N. from the right bank of the Sutlej, 70 miles S.E. by E. of the town of Lahore. Lat. $31^{\circ} 10'$, long. $75^{\circ} 28'$.

NAKUNAO.—A town in the British district of Coorg, presidency of Madras, 15 miles N.N.E. of Merkara. Lat. $12^{\circ} 15'$, long. $75^{\circ} 42'$.

NAL, in the Rajpoot state of Beekaneer, a village on the route from the town of Beekaneer to that of Jessulmeer, and eight miles W. of the former. It is a good village, containing 200 houses, thirty shops, and two wells 200 feet deep. Lat. $28^{\circ} 3'$, long. $73^{\circ} 16'$.

NALAGARH, a fort in the hill state of Hindoor, on the south-western declivity of the Sub-Himalaya. It was a place of considerable strength by its site and structure, but at the commencement of the Goorkha war, General Ochterlony having succeeded in bringing battering guns by the difficult road to it, the defences were demolished, and the Goorkha garrison compelled to surrender. It is the residence of the rajah of Hindoor, and considered the

capital of that small state. Distant N.W. from Calcutta 1,094 miles. Lat. $31^{\circ} 2'$, long. $76^{\circ} 47'$.

NALAHPUTUN, in the native territory of Gurwhal, a village with a Hindoo temple, on the route from Sireenuggur to Kedarnath temple, and 18 miles S. of the latter. It is situate about a mile from the right bank of the Mundagnee, a tributary of the Alukananda. Elevation above the sea 4,731 feet. Lat. $30^{\circ} 32'$, long. $79^{\circ} 8'$.

NALAPANI, or **KALUNGA**, in the Dehra Doon, on the western boundary of native Gurwhal, was a fort on the range forming the eastern boundary of the valley. The hill is about 600 feet higher than the lowland, and the table-land on the summit three-quarters of a mile in length, being of very difficult access, from the steepness of the ground. The fort, built on the southern and highest part, was, at the commencement of the war with the Goorkhas, garrisoned with between 300 and 400 of that nation, and on the 29th of October, 1814, invested by Major-General Gillespie, who, after a brief cannonade on the defences from two twelve-pounders, four six-pounders, and four five and a half inch howitzers, ordered an assault with 2,737 men. The assailants, however, encountered such a determined and skilful resistance, that they were compelled to retreat to their camp, having lost their general, who was shot through the heart whilst cheering on his men. Four other officers were killed, and fifteen wounded, and twenty-seven non-commissioned officers and privates killed, and 213 wounded. On the 24th of the succeeding November, the attack was renewed, and again repelled with still greater loss to the assailants, of whom three officers were killed, and eight wounded, and thirty-eight privates killed, and 440 wounded and missing. A few nights after, the garrison, reduced to seventy men, evacuated the fort, which was demolished by the British. This spot was, during the trigonometrical survey of the Himalayas, a station of the series of small triangles. It is more generally known by the name of Kalunga, which, however, according to Hodgson and Herbert, means generally a military post or cantonment. Distant N.W. from Calcutta, by Allyghur, Meerut, and Dehra, 1,000 miles. Elevation above the sea 3,286 feet. Lat. $30^{\circ} 20'$, long. $78^{\circ} 8'$.

NALCHA, in the territory of Dhar, in Malwa, a ruinous town on the route from Mow to Mando, 27 miles S.W. of former, six N. of latter. It has a bazar, and is abundantly supplied with water from tanks and wells. The site is beautiful, on the southern verge of the rich open table-land of Malwa, extending northwards. Jacquemont, by no means addicted to exaggeration, styles it, in 1832, a large town; so that it had rapidly improved under British protection, since, in 1820, a year after it was reoccupied, it contained but 144 houses. Close to it runs a small stream, according to Jacquemont a feeder of the Chumbul, but in the M.S. map of Malwa by

Malcolm, it falls into the Nerbudda. Nalcha contains many fine ruins of splendid edifices, raised principally by Mahmood Khilji, sovereign of Malwa, who reigned from 1435 to 1469. When Sir John Malcolm, some years ago, converted one of those palaces into a summer residence, a tigress and its cubs were driven away from one of the apartments, formerly the scene of regal splendour. Elevation above the sea 2,022 feet. Lat. 22° 25', long. 75° 27'.

NALGOON, in Bussahir, a pass over the range of the Himalaya bounding Koonawur to the south. It is perhaps the lowest pass over this range, being at the elevation of 14,891 feet above the sea, or 700 feet above the limit of perpetual snow in that region. A considerable stream, called also the Nalagoon, flows from the pass in a north-easterly direction, and after a course of about ten miles falls into the river Buspa. The pass of Nalagoon is in lat. 31° 19', long. 78° 17'.

NALING RIVER, a feeder of the Trisul-Gunga, rises in Nepal, in the great snowy range of the Himalayas, in lat. 28° 57', long. 83° 33', and flows through Nepal in a southerly direction for 110 miles, to its junction with the Trisul-Gunga, in lat. 27° 33', long. 84° 12'.

NALUTWAR.—A town in the British district of Sholapoor, presidency of Bombay, 101 miles S. by E. of Sholapoor. Lat. 16° 14', long. 76° 21'.

NALWAR.—A town in Hyderabad, or territory of the Nizam, situate on the left bank of the river Beemah, and 104 miles W.S.W. from Hyderabad. Lat. 16° 56', long. 77° 3'.

NAMCUL DROOG.—A town in the British district of Salem, presidency of Madras, 31 miles S. of Salem. Lat. 11° 14', long. 78° 14'.

NAMDING.—A town of Assam, in the British district of Sudiya, 39 miles S. of Sudiya. Lat. 27° 17', long. 95° 41'.

NAMGIA, in Bussahir, a village of Koonawur, and the most northern on the Sutlej, is situate on the left bank, about a mile above the remarkable confluence of the Lee or Spiti with that great river on the opposite side. The village is between 600 and 700 feet above the bed of the Sutlej, and at a short distance is surrounded by frightful barrenness and desolation; though close to the town, on the opposite bank of a small stream, are fields of barley, buckwheat, turnips, and a few vines and apricots. Namgia is at an elevation of 9,272 feet above the sea. Lat. 31° 48', long. 78° 42'.

NAMGOH.—A town in the native state of Sikhim, situate on the left bank of the Teesta river, and 40 miles N.E. by N. from Darjeeling. Lat. 27° 31', long. 88° 40'.

NAMJUNG.—A town in the native state of Nepal, situate on the left bank of the Kalee river, and 72 miles N.W. from Jemlah. Lat. 80° 3', long. 80° 53'.

NAMKIOO, or **MEREE KHO RIVER**, the name of one of the feeders of the Iravady river, rises in lat. 27° 51', long. 97° 28', and, after flowing southerly for 142 miles, joins another main source, in lat. 26°, long. 97° 19'.

NAMOOKEE.—A town in the native state of Bhawalpoor, situate on the left bank of the Sutlej, and 116 miles N.E. by E. from Bhawalpoor. Lat. 30° 14', long. 73° 23'.

NAMROOP, a river of Upper Assam, rises in lat. 27° 9', long. 96° 23', and, flowing north-west through Sudiya, falls into the Dehing river, in lat. 27° 23', long. 95° 58'.

NANAH.—A town in the Rajpoot state of Godwar, 91 miles S. from Jodhpoor, and 142 miles N.W. from Ajmeer. Lat. 25°, long. 73° 12'.

NANAMOW, in the British district of Cawnpore, lieut.-gov. of the N.W. Provinces, a village on the route from Futtehgurh to Lucknow, and 49 miles S.E. of the former. It has a small bazar, and is situate on the right bank of the Ganges, crossed by ferry between this place and Nowbutganj, in the territory of Oude. Lat. 26° 52', long. 80° 10'.

NAND, in the British district of Ajmere, a village containing 150 houses, on the north-west frontier, towards the Rajpoot state of Jodhpoor, on the route from the town of Jodhpoor to that of Ajmere, and five miles W. of the latter. It is situate at the eastern base of a low rocky range, and in a swampy tract, through which the road eastward towards Ajmere is so bad as to be scarcely passable. Lat. 26° 28', long. 74° 38'.

NANDA DEVI, in the British district of Kumaon, lieut.-gov. of the N.W. Provinces, a mountain, one of a very lofty Himalayan group, near the north-eastern frontier. The view drawn by Heber represents it as a spire of snow white, with sides forming angles of about 70°, and rising far above the similarly-formed snow-clad summits which surround it. The summit is altogether inaccessible; but a mile below it, a mela, or religious festival, is held every twelfth year, though access to the spot is so difficult that it is reached by scarcely fifty of the pilgrims who make the attempt. Further progress is impracticable, in consequence of the mural cliffs of ice which on every side encase the peak. The natives maintain that smoke is sometimes seen to issue from its summit, which they regard as the kitchen of the local deity; but there is no good evidence of volcanic action in the higher masses of the Himalaya, and the appearance probably results from the forms given by currents of air to clouds resting on the mountain. The elevation of Nanda Devi is 25,749 feet above the level of the sea. Lat. 30° 22', long. 80° 1'.

NANDAIR, in Hyderabad, or territory of the Nizam, a town on the left or north bank of the Godavery. It is a place of pilgrimage

for the Sikhs, who crowd to pay their devotions at the tomb of their guru, or spiritual pastor, Govind, who was assassinated here by a Pathan. Here is a college for the instruction of youths of that persuasion. Distance from the city of Hyderabad, N., 145 miles. Lat. 19° 9', long. 77° 23'.

NANDAN SAR, in Cashmere, a small lake, situate, with four others, on the northern side of the Pir Panjal mountain, and a little north of the pass of the same name, which also is sometimes called the Nandan Sar pass. The collective waters of these form the source of the Dumdum or Huripur river. According to Hügel, the Perhamgalla river flows from Nandan Sar to the south-west, and the Dumdum to the north-east; but this double efflux seems very improbable. Nandan Sar is held in high reverence by the Hindoos, and is visited by them in pilgrimage. Lat. 33° 37', long. 74° 40'.

NANDAOLI, in the British district of Allygurh, lieutenant-gov. of the N.W. Provinces, a town on the route from the city of Agra to Bareilly, and 43 miles N.E. of the former. It has a bazar and a market twice a week. Lat. 27° 35', long. 78° 33'.

NANDAPOOR.—A town in Hyderabad, or territory of the Nizam, situate on the right bank of the Peyne Gunga river, and 113 miles S.W. from Ellichpoor. Lat. 19° 35', long. 77° 17'.

NANDGAON.—A town in the British district of Tannah, presidency of Bombay, 40 miles S. by E. of Bombay. Lat. 18° 22', long. 73°.

NANDGAON.—A town in one of the recently sequestered districts of Hyderabad, or dominions of the Nizam, situate 30 miles S.E. by E. of Ellichpoor. Lat. 20° 56', long. 77° 57'.

NANDGAUM.—A town in one of the recently sequestered districts of Hyderabad, or dominions of the Nizam, situate 47 miles S.S.E. of Ellichpoor. Lat. 20° 35', long. 77° 53'.

NANDODRA.—A town in the British district of Ahmedabad, presidency of Bombay, 33 miles W.S.W. of Ahmedabad. Lat. 22° 48', long. 72° 10'.

NANDRA, in the Rajpoot state of Jodhpoor, a village on the route from the town of Jodhpoor to that of Ajmere, and five miles E. of the former. The road in this part of the route, though sandy, is good, as Boileau, on horseback, passed along it by moonlight at the rapid rate of ten miles an hour. Lat. 26° 18', long. 73° 14'.

NANDUH, in the British district of Goorxon, lieutenant-gov. of the N.W. Provinces, a village on the south-western frontier towards Alwur. Lat. 28° 10', long. 76° 28'.

NANDUN, in the British district of Agra, lieutenant-gov. of the N.W. Provinces, a town on the left bank of the Jumna, 20 miles E. of the city of Agra. Lat. 27° 7', long. 78° 24'.

NANDUNUJ.—A town in one of the recently sequestered districts of Hyderabad or dominions of the Nizam, situate 50 miles S.E. of Ahmednuggur. Lat. 18° 38', long. 75° 21'.

NANKATHA KHYOUNG RIVER, a considerable tributary of the Irawaddy, rises in lat. 25° 16', long. 94° 10', in the native state of Muneepoor, through which it flows southerly for 105 miles, and in the same direction for 110 miles through Burnah, and falls into the Myithia Khyoung, in lat. 22° 36', long. 94° 21'.

NANNING, a division of the British possessions on the Malay peninsula, bounded on the north by the Malay state of Rumbow; on the east by that of Johole; on the south-east and south by Segamet; and on the south-west by the Straits of Malacca. Its length from north to south is about forty miles, and its breadth ten; giving an area of 400 square miles. Its revenue and population are stated to be on the increase. The centre of the district is in lat. 2° 25', long. 102° 30'.

NANOON, in the British district of Meerut, lieutenant-gov. of the N.W. Provinces, a small town four miles from the left bank of the Jumna. Here, on 31st October, 1804, General Lake, preparing to pursue Holkar through the Doab, concentrated his forces, after fording the Jumna three miles above Delhi. Lat. 28° 49', long. 77° 20'.

NANOUTUH, in the British district of Suharunpoor, lieutenant-gov. of the N.W. Provinces, a town on the route from Suharunpoor to Paneeput, 20 miles S.S.W. of the former. Lat. 29° 42', long. 77° 30'.

NANOWN, in the British district of Allygurh, lieutenant-gov. of the N.W. Provinces, a village on the route from the cantonment of Allygurh to that of Mynpoorie, and 13 miles S.E. of the former. Lat. 27° 49', long. 78° 19'.

NANPARAH.—A town in the territory of Oude, 80 miles N.N.E. from Lucknow, and 100 miles E. from Shahjehanpoor. Lat. 27° 52', long. 81° 36'.

NANTHE.—A town of Burnah, situate five miles E. from the left bank of the Khyendwen river, and 141 miles N.W. by N. from Ava. Lat. 23° 30', long. 94° 47'.

NANTO, in the Rajpoot territory of Kota, a town on the north-west frontier, towards Boondee, on the route from the city of Kota to that of Boondee, five miles N.W. of former, 19 S.E. of latter. The palace of the late Zalim Singh, formerly protector of the state of Kota, is a fine specimen of a Rajpoot baronial residence, and has in front a spacious court, surrounded by cloisters, and ornamented with groves of orange-trees and other odoriferous growths, in the midst of which is a beautiful pavilion, with fountains; whence, by means of small canals, water is dispersed to the surrounding verdure. Lat. 25° 14', long. 75° 53'.

NANUKMUTHA, in the British district

of Bareilly, division of Pillibheet, lieutenant-gov. of the N.W. Provinces, a small town with temple dedicated to Nanuk, on the right bank of the river Gurra, 22 miles N. of the town of Pillibheet. Lat. 28° 57', long. 79° 53'.

NAPASIR, in the Rajpoot state of Beekaneer, a village on the route from Ratangurh to the town of Beekaneer, and 10 miles S.E. of the latter. It is situate in a level country, tolerably cultivated, and contains 100 houses and six shops. Lat. 27° 57', long. 73° 38'.

NAPUTA.—A town in the British province of Pegu, situate on the left bank of the Negrais river, and 101 miles S.W. from Rangoon. Lat. 16° 27', long. 94° 48'.

NARAEENGURH, in Sirhind, a village with a fortress built of mud, and surrounded by a large ditch, is situate on the route from Dehra to Subathoo, by Sidowra and Bahr, and 72 miles W. of Dehra. Here was a secondary station in the great trigonometrical survey of the Himalayas. Elevation above the sea 2,154 feet. Lat. 30° 29', long. 77° 11'.

NARAINGUNJE, in the British district of Dacca, lieutenant-gov. of Bengal, a town, the locality of a thana or police establishment. Distance from the city of Dacca, S.E., six miles; Calcutta, N.E., 155. Lat. 23° 38', long. 90° 30'.

NARAINGURH.—A town in the British district of Midnapoor, lieutenant-gov. of Bengal, 70 miles W.S.W. of Calcutta. Lat. 22° 10', long. 87° 27'.

NARAIKHAID.—A town in Hyderabad, or territory of the Nizam, situate seven miles from the left bank of the river Manjera, and 67 miles N.W. from Hyderabad. Lat. 18° 2', long. 77° 49'.

NARAJOLE.—A town in the British district of Midnapoor, lieutenant-gov. of Bengal, 49 miles W. of Calcutta. Lat. 22° 33', long. 87° 40'.

NARASARAVAPETA.—A town in the British district of Guntoor, presidency of Madras, 26 miles W. by S. of Guntoor. Lat. 16° 15', long. 80° 8'.

NARASINGABILLA.—A town in the British district of Vizagapatnam, presidency of Madras, 23 miles W. by S. of Vizagapatnam. Lat. 17° 36', long. 82° 57'.

NARAUL, in the district of Ahladganj, territory of Oude, a town 25 miles N. of Allahabad, 90 S.E. of Lucknow. It is nearly surrounded by the East-India Company's district of Allahabad, and pillars of brick or of stone, from five to ten feet high, mark the boundary. Butter estimates the population at 6,000, almost all Hindoos. Lat. 25° 43', long. 81° 40'.

NARBAH, in Sirhind, a town with a fort, the residence of a rajah whose possessions comprised 313 villages, with a population of 80,000 inhabitants, and yielded an annual revenue of 40,000*l.* sterling, but who was mulcted of one-fourth of his territory from non-performance of feudatory obligations during the Lahore war. His present possessions are bounded on the

north by the British district of Loodiana, and on all other sides by the native state of Patialah; they extend from lat. 30° 17' to 30° 41', and from long. 75° 51' to 76° 21', and are forty miles in length from north-east to south-west, and seventeen in breadth. This rajah, with those of Patialah, Jheend, and the former rajah of Khytul, were known by the designation of Maloa Sikhs, from the district of that name, which they occupy in the south of Sirhind; and thus are distinguished from the Manjha and other Sikhs of the Punjab, who settled in the country after their conquest of it. Narbah is distant N.W. from Calcutta 1,035 miles. Lat. 30° 23', long. 76° 15'.

NAREH, in Sind, a village on the route from Sehwan to Larkhana, and 53 miles N. of the former town. It is of considerable size, with houses built of burned brick. Its situation is in a level alluvial country, about a mile from the right bank of the Indus. Lat. 27° 3', long. 67° 57'.

NARGANHALLI, in the Mysore, a small town on the north-west frontier, towards the British district of Dharwar. Distance from Chitradurg, N.W., 22 miles; from Seringapatam, N., 145. Lat. 14° 20', long. 76° 9'.

NARGURH.—A town in the native state of Gwalior, or possessions of Scindia's family, situate 80 miles N.N.W. from Oojein, and 30 miles S.E. by E. from Neemuch. Lat. 24° 12', long. 75° 17'.

NARINJA, a river of Hyderabad, or the Nizam's territory, rises in lat. 17° 30', long. 77° 45', and, flowing north-west for seventy-five miles, falls into the Manjera river, in lat. 18° 6', long. 77° 7'.

NARKI, in the British district of Agra, lieutenant-gov. of the N.W. Provinces, a town 25 miles N.E. of the city of Agra. Lat. 27° 18', long. 78° 28'.

NARNAVERAM.—A town in the British district of North Arcot, presidency of Madras, 40 miles N.N.E. of Arcot. Lat. 13° 25', long. 79° 38'.

NARNOL, in the jaghire of Jujhur, lieutenant-gov. of the N.W. Provinces, a town on the route from Hansee to Neemuch, and 86 miles S. of the former. It has a large bazar, and supplies and water are abundant. The road in this part of the route is heavy. Narnol was acquired by surrender, by the adventurer George Thomas, and was one of the fortresses of his transient government. Lat. 28° 1', long. 76° 11'.

NARNOOND, in the British district of Hurreana, lieutenant-gov. of the N.W. Provinces, a town on the route from Hansee to Kurnal, and 66 miles S.W. of the latter place. It is situate near the right or north-western bank of the canal of Feroz Shah, and has a good supply of water. Distant N.W. of Calcutta, by Delhi and Hansee, 990 miles. Lat. 29° 13', long. 76° 13'.

NARONOE.—A town in Hyderabad, or

NAR.

territory of the Nizam, 116 miles W. from Hyderabad, and 58 miles E. by S. from Sholapur. Lat. $17^{\circ} 30'$, long. $76^{\circ} 49'$.

NAROO, a river of Sind, rising in lat. $27^{\circ} 42'$, long. $69^{\circ} 4'$, a few miles E. of the town of Roree. After a southerly course of 185 miles, the stream is lost in the desert, near the town of Omerkote, and about lat. $25^{\circ} 23'$, long. $69^{\circ} 34'$.

NARRA (EASTERN), in Sind, a large branch of the Indus, separating from the main stream on the eastern side, a few miles above Roree. Taking a southerly course, it passes by the ruins of Alore, where it is crossed by a bridge, and thence continues to flow in the same direction until its water, in the dry season, is absorbed or evaporated in the desert of Eastern Sind. In the lower part of its course, about lat. $25^{\circ} 55'$, long. $69^{\circ} 16'$, it is said to throw off during inundation a branch to the south-westward, bearing the name of Phuraun or Purani Deria, "the ancient river," and then, turning to the south-east, flows by the fort of Omerkote. Lower down it joins the united stream of the Purana and the Goonee or Fulaile, and falls into the sea by the Korie mouth, after a course of nearly 400 miles. When the inundation of the Indus is at its height, the Narra generally carries a very large body of water. In 1826 it overspread the desert to a great extent, swept away part of the fortress of Omerkote, though ninety miles from the main channel of the Indus, and forced its way to the sea by the Runn of Cutch, working for itself a passage through the Ullahbund, a mound thrown up across its channel by the great earthquake of 1819. But during the low season of the Indus, the Narra ceases to be a stream, and this defect is about to be remedied by the excavation of a new channel in the vicinity of Roree, whereby a constant flow of water will be insured during the period when a supply is indispensable for purposes of irrigation. The project is in course of execution, the cost of which has been estimated at 47,780*l*.

NARRA (WESTERN), in Sind, a great and important branch of the Indus. It separates from the western side of the river seven miles east of Larkhanna, in lat. $27^{\circ} 29'$, long. $68^{\circ} 17'$, and takes a southerly course, in a direction in a great measure parallel to the main stream. At its extremity, in lat. $26^{\circ} 28'$, long. $67^{\circ} 45'$, it expands into Lake Manchar. From the south-eastern part of this lake, the Arul, a navigable stream, flows, and discharges its water into the Indus. The direct distance from the place where the Narra divaricates from the Indus to the expansion into Lake Manchar is about seventy-six miles; but, measured along its very tortuous course, it will be found to be fully double that distance. The long narrow island, insulated by the Indus, the Narra, Lake Manchar, and the Arul, is one of the most fertile tracts in the world, very highly cultivated, and densely peopled. During

the season of inundation, the Western Narra is preferred to the main channel of the Indus for the purposes of navigation, in consequence of the current being less violent. The word *Narra* signifies a snake in the vernacular language; and the name has, without doubt, been bestowed in consequence of the convolutions of the stream.

NARRAINPOOR.—A town in Hyderabad, or territory of the Nizam, 30 miles E.S.E. from Hyderabad, and 120 miles W.N.W. from Guntoor. Lat. $17^{\circ} 10'$, long. $78^{\circ} 57'$.

NARRAINPOOR.—A town in the recently lapsed state of Nagpoor or Berar, situate 169 miles S.E. from Nagpoor, and 120 miles E. by S. from Chanda. Lat. $19^{\circ} 41'$, long. $81^{\circ} 13'$.

NARRAMPATNUM.—A town in the hill zemindarry of Jeypoor, 26 miles S.W. by S. from Ryaguddah, and 82 miles N. from Vizagapatam. Lat. $18^{\circ} 52'$, long. $83^{\circ} 15'$.

NARRAMSIR.—A town in the native state of Cutch, situate on the Korie mouth of the Great Western Runn of Cutch, and 81 miles W.N.W. from Bhooj. Lat. $23^{\circ} 40'$, long. $68^{\circ} 33'$.

NARRAYUNGAUM.—A town in the British district of Poonah, presidency of Bombay, 44 miles N. by E. of Poonah. Lat. $19^{\circ} 7'$, long. $74^{\circ} 2'$.

NARROOKOLE.—A town in Guzerat, or dominions of the Guicowar, 32 miles E. by N. from Baroda, and 86 miles S.E. by E. from Ahmedabad. Lat. $22^{\circ} 20'$, long. $73^{\circ} 43'$.

NARSINGAH.—A town in the territory occupied by the independent hill tribes of Orissa, situate on the left bank of a small tributary of the Braminy river, and 57 miles W.N.W. from Cuttack. Lat. $20^{\circ} 41'$, long. $85^{\circ} 5'$.

NARSINGNUGUR.—A town in the British district of Tipperah, lieut.-gov. of Bengal, 39 miles N. by E. of Tipperah. Lat. 24° , long. $91^{\circ} 17'$.

NARSINGUR.—A town in the British district of Pooralia, lieut.-gov. of Bengal, 120 miles W. of Calcutta. Lat. $22^{\circ} 34'$, long. $86^{\circ} 34'$.

NARSINGURH, in the British district of Dumoh, Saugor and Nerbudda territory, lieut.-gov. of the N.W. Provinces, a town on the route from Saugor to Rewah, 43 miles E.N.E. of the former. Elevation above the sea 1,314 feet. Lat. 24° , long. $79^{\circ} 27'$.

NARSIPOOR.—A town in the Mysore, 39 miles N.W. from Seringapatam, and 86 miles N.E. from Cannanore. Lat. $12^{\circ} 46'$, long. $76^{\circ} 17'$.

NARSIPOOR.—A town in the British district of Rajahmundry, presidency of Madras, 48 miles S. of Rajahmundry. Lat. $16^{\circ} 20'$, long. $81^{\circ} 47'$.

NARWAR, or **NERWAR**, in the territory

of Gwalior, or possessions of the Scindia family, a town on the route from Calpee to Kotah, 152 miles S.W. of former, 169 N.E. of latter, and situate on the right bank of the river Sindh. It has probably much decayed since it came under the power of Scindia, but Tieffenthaler, describing its condition a century ago, states that it then contained many handsome and substantially-built houses of stone. A broad flight of stone stairs, 360 in number, leads to the fort commanding the town. The ascending way passes through three successive gates to a platform, containing the palace and many other fine buildings of stone. This area, a mile and a half in circumference, is surrounded by a massive rampart, with battlements, all built of squared stone. Within the inclosure are numerous wells and a great tank of squared stone, which yield a supply of water sufficient for a numerous garrison. The hill and some others contiguous to it contain abundance of magnetic iron-ore, which is smelted to a considerable extent. The Sindh, here a rapid stream rushing over a rocky bed, overflows to a great extent during the periodical rains, and causes swamps, which swarm with alligators and other aquatic reptiles. According to Ferishta, the fort was constructed in the middle of the thirteenth century, by Rajah Jahir Dew, a Kachwaha Rajpoot, and a powerful prince; as, according to the exaggerated account of this historian, he led 5,000 horse and 200,000 foot against Nasiruddin, sovereign of Delhi, who, having defeated this immense host with great slaughter, took the place, after a few months' siege. Previously, however, Narwar had long been the seat of the Kachwahs, whose rajah, Nal, migrating from Ayodha or Oude, founded, in A.D. 295, Nishida, on the site of the present Narwar; and in the beginning of the ninth century, the Kachwahs of Narwar are mentioned as marching to the defence of Chitor. It again came into the hands of the Rajpoots at the commencement of the fifteenth century, probably during the troubles resulting from the invasion of Tamerlane; and was, in 1506, taken from them by blockade, by Sikandar Lodi, sovereign of Delhi. It is described as a vast city, fourteen or fifteen miles in circumference; and the captor employed six months in destroying idols and their fane and temples, and in erecting mosques; and ultimately surrounded the place with a rampart and other defences. Narwar appears to have again fallen into the hands of the Hindoos, as in A.D. 1792 it was in possession of a rajah infamous for rapine and bloodshed, who was soon after expelled by the Mahrattas. It appears to have been guaranteed to Doulut Rao Scindia by the treaty of Allahabad, in 1805. In 1844, Narwar, with its annexed territory, was assessed, by the government of Gwalior, at 2,25,000 rupees annually. Narwar is 44 miles S. of Gwalior, 108 S. of Agra, 210 S. of Delhi, 125 S.W. of Calpee, 800 N.W. of Calcutta, by Calpee. Lat. 25° 39', long. 77° 58'.

NASAIRAH, in the Reechna Doab division of the Punjab, a town situated 28 miles N.W. from the right bank of the Ravee, 32 miles N.W. by N. of the town of Lahore. Lat. 31° 55', long. 73° 58'.

NASSICK, in the British collectorate of Ahmednuggur, presidency of Bombay, a city of high celebrity, situate on the Bombay and Agra trunk road, and regarded by the Brahmins as the peculiar seat of piety and learning. It contains a great number of ancient Brahminical temples and establishments, very flourishing under the Peishwa's sway, and still enjoying great advantages under British rule, though the government has entirely withdrawn from interference with the affairs of the native religious institutions. Nassick is more revered than even Benares; yet it appears to have been once a locality of Bhuddism. "Near Nasik, the very seat of Brahminism in the Deccan, are extensive Bhuddist excavations. They are vulgarly called Dhermraj-lena. They run round a conical hill, five miles from the town, and about 100 yards or more from the base of the hill. They have every character of Bhuddist excavations, without any trace of Hindooism: the long vaulted cave and Dagop, the huge figures of the meditative curly-head Buddh, the inscriptions in the unknown character, the umbrella and snake-headed canopies, the benched halls and numerous cells."

The population of Nassick is estimated at about 25,000. Distance direct from Poona, N., 105 miles; from Bombay, N.W., 100. Lat. 20°, long. 73° 47'. The district, of which this town is the principal place, was formerly composed of certain subdivisions of the collectorate of Ahmednuggur, which in 1840 were consolidated into the sub-collectorate of Nassick.

NASSIRABAD, in the district of Salon, territory of Oude, a town 52 miles S.E. of Lucknow. Butter estimates the population at 3,000, three-fourths being Mussulmans. Lat. 26° 11', long. 81° 35'.

NASSREEDA.—A town in the Rajpoot state of Jeypoor, 71 miles S.S.W. from Jeypoor, and 60 miles S.E. by E. from Ajmeer. Lat. 26°, long. 75° 30'.

NASUMON, in the Northern Punjab, situate on the right or north bank of the Chenaub, and on the great route from India to Cashmere, through the Bainhal Pass. It is a small place, remarkable only for one of those bridges of rude ropes, called in the country *jhoolas*, by which travellers pass the Chenaub, here about seventy or eighty yards wide. Nasumon is in lat. 33° 14', long. 75° 5'.

NATCHENGUON.—A town in the recently lapsed dominions of Nagpore or Berar, situate on the left bank of the Wurda river, and 60 miles S.W. by W. from Nagpore. Lat. 20° 42', long. 78° 22'.

NATHDWARA.—A town in the Rajpoot state of Oodeypoor or Meywar, 21 miles N. from Oodeypoor, and 73 miles W.N.W. from Neemuch. Lat. 24° 53', long. 73° 51'.

NATHPORE, in the British district of Purnea, lieut.-gov. of Bengal, a town on the route from Dinapore to the town of Purnea, 152 miles S.E. of former, 50 N.W. of latter. It is situate on the right bank of the Kosee, here divided into three channels, each unfordable and crossed by ferry. There is considerable business here in the transit-trade from Nepal to Hindustan. The town consists of four market-places, having collectively about 1,600 houses, and, according to the usually admitted average of inmates, a population of 8,000 persons. Lat. 26° 18', long. 87° 10'.

NATOOPALWUN.—A town in the British district of Rutnageriah, presidency of Bombay, 63 miles N. of Rutnageriah. Lat. 17° 54', long. 73° 20'.

NATTORE, in the British district of Rajeshahye, lieut.-gov. of Bengal, a town on the route from Burhampoor to Jumalpoor, 78 miles N.E. of former, 105 S.W. of latter. It is situate on the river Nurud, an offset of the Ganges, communicating with the river Ataree. The situation is very low, unhealthy, and subject to inundation; and in consequence of those great disadvantages, the civil establishment of the district, formerly located here, was in 1822 removed to Bauleah. Distant N. from Calcutta, by Burhampoor, 196 miles. Lat. 24° 25', long. 89°.

NAUCHTEEGAON.—A town in the British district of Silhet, lieut.-gov. of Bengal, 36 miles W.S.W. of Silhet. Lat. 24° 44', long. 91° 20'.

NAUGAULAUNCHARY.—A town in the British district of Tinnevely, presidency of Madras, 18 miles S. of Tinnevely. Lat. 8° 28', long. 77° 42'.

NAUGULWARREE.—A town of Malwa, in the native state of Indore, or territory of Holkar, 72 miles S.S.W. from Indore, and 105 miles N.E. by N. from Malligaum. Lat. 21° 44', long. 75° 28'.

NAUGUMPILLY.—A town in the British district of Rajahmundry, presidency of Madras, 16 miles N. of Rajahmundry. Lat. 17° 13', long. 81° 49'.

NAUGUTWARA.—A town of Malwa, in the native state of Jowra, situate on the right bank of the Chumbul river, and 15 miles N.E. from Jowra. Lat. 23° 46', long. 75° 16'.

NAUN.—A town in the recently lapsed dominions of Nagpore or Berar, situate 35 miles S. by E. from Nagpore, and 118 miles E.S.E. from Ellichpoor. Lat. 20° 40', long. 79° 19'.

NAUNDODE, in Guzerat, or dominions of the Guicowar, a town near the south bank of the river Nerludda, at the northern base of the Rajpeela hills. The surrounding country is

rugged, wild, and ill cultivated, inhabited chiefly by Bheels and Coolies. Distance from Surat, N.E., 65 miles; Baroda, S.E., 35. Lat. 21° 52', long. 73° 27'.

NAUNGAON.—A town in the recently lapsed dominions of Nagpore or Berar, situate 125 miles E. from Nagpore, and 118 miles S. from Rangurh. Lat. 21° 8', long. 81° 6'.

NAUSHAHAR.—See NYA SHUHUR.

NAUTARAUPOLLIAM.—A town in the British district of Salem, presidency of Madras, 53 miles N.W. by N. of Salem. Lat. 12° 17', long. 77° 47'.

NAUTPOOR.—A town in the British district of Chota Nagpore, lieut.-gov. of Bengal, 39 miles S. of Lohadugga. Lat. 22° 52', long. 84° 47'.

NAVOYCOLUM.—A town in the native state of Travancore, 23 miles N.N.W. from Trivandrum, and 61 miles W. from Tinnevely. Lat. 8° 46', long. 76° 50'.

NAWABGANJ, in the British district of Allahabad, a town four miles from the left bank of the Ganges, on the route from Allahabad to Lucknow, and 12 miles N.W. of the former. It has water from wells. Lat. 25° 34', long. 81° 40'.

NAWABGUNJ, in the British district of Furruckabad, lieut.-gov. of the N.W. Provinces, a town on the route from the cantonment of Allygurh to that of Futtehgurh, and 16 miles N.W. of the latter. There is a bazar, and water is obtainable from wells. Lat. 27° 27', long. 79° 28'.

NAWADA, or **NOWABADA,** in the British district of Behar, lieut.-gov. of Bengal, a village, the principal place of a thana or police division of the same name. It is a very beautiful country, and in many parts fertile, but much neglected and uncultivated, yet contains 897 villages, and a population estimated at 157,038, of whom the Brahminists are fifteen to one to the Mussulmans. Nawada is an insignificant place, having about 105 houses and 550 inhabitants. Distant from town of Behar, S., 20 miles; town of Patna, S.E., 50. Lat. 24° 54', long. 85° 30'.

NAWAGARH, or **KOT,** in Bussahir, a fort on a ridge stretching in a south-easterly direction from the great range of Moral-kakanda. It is situate on a neck of land stretching from and under a high wooded and rocky peak which commands it. This post was, during the war with the Goorkhas, strengthened by two stockades on the side most easily accessible, and being garrisoned by a force of about 1,000 of that people, was their most important position in Bussahir. In the beginning of 1815, when the military operations of the British led the inhabitants of Bussahir to expect liberation from their Goorkha oppressors, Nawagarh was invested by the insurgent natives, and the garrison, under Kirti Rana, attempting to escape, was surrounded and

obliged to surrender. There is probably no great difference between its elevation and that of Baji, situate three or four miles' distance on the same ridge, and being, according to Lloyd, 9,105 feet above the sea. Nawagarh is in lat. $31^{\circ} 15'$, long. $77^{\circ} 40'$.

NAWAUBGUNGE, in the territory of Oude, a town on the route from Lucknow cantonment to that of Sekrora, 19 miles N.E. of the former, 37 S.E. of the latter. It has a bazar, and water is plentiful. The road in this part of the route is good. Lat. $26^{\circ} 57'$, long. $81^{\circ} 5'$.

NAWULA-JO-GOTE, in Sind, a village on the route from Sehwan to Larkhana, and 16 miles N. of the former town. It is inhabited by the cultivators of the adjacent fertile country. The road in this part of the route is straight and level, but not of easy transit for carriages, in consequence of neglect. Lat. $26^{\circ} 35'$, long. $67^{\circ} 55'$.

NAYAKOT.—A town in the native state of Nepal, situate on the right bank of the Naling river, and 78 miles W. by S. from Khatmandoo. Lat. $27^{\circ} 32'$, long. $84^{\circ} 3'$.

NAYAKOT.—A town in the native state of Nepal, 159 miles W. by N. from Khatmandoo, and 110 miles N.N.W. from Goruckpoor. Lat. $28^{\circ} 10'$, long. $82^{\circ} 48'$.

NEACOTE.—A town in the native state of Nepal, 33 miles S.S.W. from Jemlah, and 100 miles E. by N. from Pilleebheet. Lat. $28^{\circ} 50'$, long. $81^{\circ} 30'$.

• **NEALLA CONDAPULLY**.—A town in Hyderabad, or territory of the Nizam, 106 miles E. from Hyderabad, and 62 miles N.N.W. from Guntoor. Lat. $17^{\circ} 8'$, long. $80^{\circ} 8'$.

NEAUNGSHEWAY.—A town of Burma, 97 miles S.E. by S. from Ava, and 192 miles N.E. from Prome. Lat. $20^{\circ} 54'$, long. 97° .

NEBKHERA, in the British district of Boolundshuhur, lieutenant-gov. of the N.W. Provinces, a village on the route from Muttra to Meerut, and 47 miles S. of the latter. Lat. $28^{\circ} 22'$, long. $77^{\circ} 56'$.

NECKLEY.—A town in the British district of Mymensing, lieutenant-gov. of Bengal, 199 miles N.E. by E. of Calcutta. Lat. $24^{\circ} 19'$, long. $90^{\circ} 57'$.

NEECHBO.—A town in the Rajpoot state of Jeypoor, 72 miles N.W. from Jeypoor, and 78 miles N. by E. from Ajmeer. Lat. $27^{\circ} 34'$, long. $74^{\circ} 59'$.

NEEDAPUTTEE, in the British district of Allahabad, lieutenant-gov. of the N.W. Provinces, a village on the route from Allahabad cantonment to Futtehpore, and six miles W. of the former. Lat. $25^{\circ} 28'$, long. $81^{\circ} 50'$.

NEELGUDDIR.—A town in Hyderabad, or territory of the Nizam, situate on the right bank of the Godavery river, and 147 miles N.E. by E. from Hyderabad. Lat. $18^{\circ} 36'$, long. $80^{\circ} 10'$.

NEELGURH, in Orissa, one of the Cuttack mehals, is bounded on the north by the native state of Mohurbunge; on the east and south by the British district of Balasore; and on the west by the native state of Keunjur. It extends from lat. $21^{\circ} 12'$ — $21^{\circ} 40'$, long. $86^{\circ} 13'$ — $86^{\circ} 52'$; is 42 miles in length from north-east to south-west, and 22 in breadth. Neelgurh, the principal place, is 13 miles S.W. from Balasore. Lat. $21^{\circ} 29'$, long. $86^{\circ} 48'$.

NEELOO, in the Sind Sagur Doob division of the Punjab, a town situated six miles N.W. from the right bank of the Jhelum, 116 miles N.W. by W. of the town of Lahore. Lat. $32^{\circ} 34'$, long. $72^{\circ} 32'$.

NEELUNGA.—A town in one of the recently sequestered districts of Hyderabad, or territory of the Nizam, 126 miles W.N.W. from Hyderabad. Lat. $18^{\circ} 8'$, long. $76^{\circ} 50'$.

NEEMAJ.—A town in the Rajpoot state of Jodhpoor, 62 miles E. by S. from Jodhpoor, and 45 miles S.W. by W. from Ajmeer. Lat. $26^{\circ} 9'$, long. $74^{\circ} 7'$.

NEEMAWER.—See NEMAUR.

NEEMHERAH.—See NIMBERA.

NEEMRA, in Sind, a village on the route from Larkhana to Bagh, and 44 miles N. of the former place. It is situate in a barren country on the south-eastern border of the *Rann* or arid desert of Shikarpoor. Lat. $28^{\circ} 3'$, long. $58^{\circ} 14'$.

NEEMRANEE, in the district of Tjarra, territory of Alwar, under the political management of the Governor-General's agent for Rajpootana, a small town on the summit of a rocky range of hills. Distance S.W. from Delhi 76 miles. Lat. 28° , long. $76^{\circ} 19'$.

NEEMREE, in the Rajpoot state of Jodhpoor, a village on the route from Nusseerabad to Nagor, and 23 miles S.E. of the latter. It contains sixty houses, supplied with water from two wells. Lat. $26^{\circ} 57'$, long. $74^{\circ} 3'$.

NEEM SURAE, in the British district of Allahabad, lieutenant-gov. of the N.W. Provinces, a village on the route from the cantonment of Allahabad to Futtehpore, and seven miles N.W. of the former. Lat. $25^{\circ} 27'$, long. $81^{\circ} 49'$.

NEEMUCH, in the territory of Gwalior, or possessions of Scindia's family, a town with a British cantonment, on the north-western border of Malwa, and at a short distance from the boundary which separates that tract of country from Mewar. It has a good bazar. The British territory here was formerly limited to the site of the cantonments and some acres adjoining, and was sold very reluctantly by Dowlut Rao Scindia, as the space was required for stationing a force in 1817, according to the provisions of the treaty of Gwalior, concluded in that year. Consequently, however, on a later treaty, the country in the immediate vicinity, and some other districts, were annexed. Holcar describes the cantonment in his time as "a

stationary camp of thatched bungalows, and other buildings, open on all sides, and surrounded by a fine plain for the performance of military evolutions." Wallich, a later observer, gives the following account of it: "The cantonment extends on a slightly elevated ridge, running about north-west and south-east: its extreme length is two and a half miles, and extreme breadth one mile. The lines are placed in front, facing to the northward; the regimental officers' quarters behind these, and the Sudder Bazar and staff to the rear of all. Lines have at various periods been built, capable of containing one regiment of native cavalry, one troop of native horse-artillery, four regiments of native infantry, and a regiment of irregular horse." The bungalows or lodges of the officers are seventy or eighty in number, each surrounded by a garden; and as the soil, principally a disintegrated trap, is naturally fertile, it, by adequate irrigation, produces in abundance esculent vegetables, fruits, and flowers. There are here a small theatre, an assembly-room, and a spacious lecture-room. A small fort has been constructed by the British, as a place of refuge for the families of the military, when called to a distance on duty. It is at present used as a magazine. Here is a fine house, built by the late Sir David Ochterlony, whose principal quarters were for a considerable time here. It is now applied to purposes widely different from that for which it was erected. It furnishes a church, the medical storekeeper's office, and an executive engineer's godown. According to the opinion of Jacquemont, Neemuch is one of the healthiest places in the presidency of Bengal. This circumstance, if correctly ascertained, probably results from the nature of the surrounding country, a well-drained plain, studded with a few small stony hills. The winter is mildly cool; the hot winds, in the latter part of spring and early part of summer, moderate, as are the periodical rains succeeding them; and the average mortality is by no means considerable. An authority already quoted, gives, however, the following less favourable view:—"The climate of Neemuch is unquestionably an agreeable one, as far as sensible qualities are concerned. There exists neither the extreme of heat and cold experienced towards the north-western frontier; and the fall of temperature, following after sunset, is almost always sufficient to insure, relatively speaking, a cool night. In fact, the sultry and suffocating oppressiveness frequently felt in other parts of India, between sunset and sunrise, seldom occurs in this province. This is probably consequent on the influence of the sea-breeze extending higher from the Gulf of Cambay. Yet, notwithstanding these ostensible advantages, it cannot be deemed a really healthy climate. There are constitutions that do not suffer under its influence, and, of course, the proportion that these bear to the whole number subject to it is great; but there are many habits which it does affect, and that severely. It is to be remarked, that those on

whom it has produced any disagreeable consequences, are seldom such as have been heedless of undue exposure, or addicted to a free style in living. On the contrary, the most abstemious and careful seem to suffer most frequently and severely. These remarks, I would have it understood, refer chiefly to the effects of the climate on European constitutions." In the following passage, the same writer enters more minutely into the peculiarities of the climate:—"The cold weather usually sets in about the beginning of November, but long before that period the evenings and mornings have become bracingly cool. From the end of September till that of October, the relative temperatures of the days and nights are very similar, or, in other words, the difference, for instance, at noon of a day in September and one in October varies generally but by a few degrees. It is during this species of interregnum that the climate is most unhealthy, owing, no doubt, to the effects of vegetable decomposition being in greatest activity, and the salutary influence of the approaching cold season hitherto unappreciable. Intermittent fevers, rheumatic fevers, and other inflammatory attacks, are now most prevalent. Hoar-frost is seldom discernible, and the lowest temperature usually attends strong easterly winds. Fires are scarcely necessary for comfort's sake. The months of December and January are delightfully cold. By the middle of February, or beginning of March, the mid-day sun becomes again too powerful for outdoor exercise, and a few days, in which a sudden rise of temperature has taken place, usher in the hot winds. The hot winds blow steadily during the day, or rather from about eight A.M. until sunset, rarely, if ever, continuing later: their direction is from the south or north-west. So long as the luxuries of a house and tattie are procurable, the temperature within-doors can be rendered not only bearable, but pleasant: this season is, unquestionably, the most healthy of the whole year. A few of the sultry days again make their appearance betwixt the termination of the hot winds and the commencement of the rains, which show themselves generally in the middle of June, and last till the middle of September. About the end of May, an inch or two of rain usually falls, and produces a pleasant break at the hottest season. In no part of India is the genial effect of the rainy season felt more both by the animal and vegetable world than it is here. Before its advent, not a blade of grass was to be seen, but every leaf and branch appeared parched up and withered. A few hours have only to elapse, however, after the first shower, when the whole country around presents one uninterrupted expanse of the most brilliant green, and each bough is covered with the most luxurious foliage; nor do the insect tribes appear ignorant of the new-born blessing, for ere the first heavy drops have reached the ground, as if by magic, thousands of winged creatures burst

from their narrow tenements, and throng both earth and air. Thunderstorms and violent squalls from the north-east are frequent during the rains; in fact, the first fall is ushered in by a tremendous hurricane. Vegetation goes on increasing during the continuance of the wet weather, till, at last, every nook, and actually the very roads, become choked up with the excessive and dense herbage. The grass in the compounds springs up to the height of two or three feet, and requires to be cut down several times." The village of Nee-much occupies a rising ground, about three-quarters of a mile from the right of the cantonment: its population is roughly estimated at 4,000. It has no manufacture. Elevation above the sea 1,476 feet. Distant N.W. of Mow 155 miles; S.W. from Delhi 371; from A. 312; W. of Saugor 306; W. of Calcutta, by Allahabad and Saugor, 1,114. Lat. 24° 27', long. 74° 54'.

NEEPANEE.—A town in the British district of Belgaum, presidency of Bombay, 39 miles N. by W. of Belgaum. The jaghire of which this town is the principal place, lapsed to the British government in 1840, upon the demise of its native chief, and was annexed to the empire in 1842. In the following year, the fort was dismantled. Lat. 16° 23', long. 74° 28'.

NEERA.—A river rising in lat. 18° 20', long. 73° 36', on the eastern slope of the Western Ghats, and flowing in an easterly direction for 130 miles, during which it forms the boundary between the British collectorate of Poona, the Sattara jaghires of Bore and Phultun, and the British province of Sattara, falls into the Beemah river, on the right side, in lat. 17° 58', long. 75° 1'. A bridge has been thrown over the river in lat. 18° 6', long. 74° 16'.

NEEWUJ, or NEWAZ, called also **JAM-NEERI**, a river of Malwa, rises on the north side of the Vindhya range, and in lat. 22° 53', long. 76° 28'. It holds a course generally northerly of 190 miles, and falls into the Kali Sindh, on the right side, in lat. 25° 7', long. 76° 20'. At Bhopalpoor, about seventy miles from its source, and in lat. 23° 48', long. 76° 46', it is crossed, on the route from Nee-much to Saugor, by a ford, "which is 200 yards wide, rocky, and bad for cattle and carts; banks steep, and usual depth of water during the fair season one and a half feet."

NEGAPATAM, in the British district of Tanjore, presidency of Madras, a town on the western coast of the Bay of Bengal. Here is a diminutive estuary of the Cauvery, capable of receiving small coasting-vessels, which carry on a considerable trade, and measures have been recently authorized for the improvement of the harbour. It is situate on an open, level, sandy expanse, having a gentle slope to the sea, above which the town is elevated about three or four feet. There is a wide, open, and airy street in the east end of the town, and

another parallel to it in the west; and these are connected by a third, communicating with the other two in the centre of each street. From those principal streets, others branch off, which are mere narrow confined lanes, especially in the part occupied by the Portuguese. The bazar consists of four streets at the south-east side, where various kinds of grains, vegetables, drugs, and piece-goods are exposed for sale. The houses in the principal streets are generally of quadrangular ground-plan, large, well built of brick and lime-mortar, and roofed with tiles; and those of the more respectable classes are clean and well ventilated. Besides this native town, the houses occupied by European residents, and by respectable Dutch and Portuguese families, are in an open, airy situation, to the westward of the town, facing the Esplanade, which intervenes between them and the sea. The ruins of the old Dutch fort are surrounded by a ditch, filled up in many places, in consequence of the pestilential exhalations arising from its stagnant putrescent water. The barracks for the small detachment of native infantry stationed here is an old Dutch dwelling-house, situated to the north-west of the Esplanade, on a dry sandy piece of ground. The jail is an old family residence, but lofty, spacious, and commodious, built of brick and lime-mortar. The inhabitants are generally industrious; but the irresistible effects of British competition confine their manufacturing industry to making coarse cotton and silk fabrics, and some few others for country use, and drawing oil from cocoa-nuts and oil-seeds; and this branch of industry is lucrative and extensive. They also have considerable traffic with Ceylon, and the lands and islands lying eastward. It is "estimated to contain a population of 10,000 souls. A large proportion of these are the descendants of the original Dutch and Portuguese colonists, by whom this place was formerly occupied; the remainder is made up of Hindoos, Mussulmans, and Brahmins." A government school has been established in the town, and the last annual report of the progress of the pupils was considered highly satisfactory. A project for connecting this town with that of Trichinopoly, a distance of eighty miles, by means of a low-speed railway, is under consideration. Distance from Madras, N.E., 133 miles; Tanjore, E., 48; Madras, S., 160; Bangalore, S.E., 214. Lat. 10° 46', long. 79° 54'.

NEGAWAN.—See **NYGOWAN**.

NEGOHEE, in the British district of Shahjehanpoor, lieut.-gov. of the N.W. Provinces, a town on the route from Shahjehanpoor to Pilleebheet, 17 miles N. by W. of the former. Lat. 28° 8', long. 79° 55'.

NEGOOG.—A town in the British district of Ahmednuggur, presidency of Bombay, 32 miles W.S.W. of Ahmednuggur. Lat. 18° 59', long. 74° 19'.

NEGRAIS, in Eastern India, a British

island at the mouth of the Negrais or Bassein river, rendered conspicuous by a hill forming the easternmost high land on the coast. The circumference of the island is about eighteen miles, and its area ten square miles. Water is plentiful, found at the depth of three or four cubits, and of good quality. In 1836, the population consisted of about fifty families. Arrangements for founding a new city on this island are rapidly progressing. Lat. 15° 58', long. 94° 24'.

NEGRAIS CAPE, in Eastern India, the name given to the south-west extremity of the coast of Pegu. It is in contemplation to erect a lighthouse here, as a dangerous reef runs out four or five miles into the sea; and the furthest point of the reef will be its site. Lat. 16° 2', long. 94° 16'.

NEGRAIS RIVER.—The name of one of the mouths of the Irawady, which, in the upper part of its course, takes the name of the Bassein river, from a town of that name situate on its left bank. The mouth is in lat. 15° 55', long. 94° 25'.

NEHTOUR, in the British district of Bij-nour, lieutenant-gov. of the N.W. Provinces, a town on the route from Bijour to Pilleebheet, 15 miles E. by S. of the former. Nehtour has a population of 7,587 inhabitants. Lat. 29° 19', long. 78° 26'.

NEILGHERRIES.—A talook of the British collectorate of Coimbatore, presidency of Madras, deriving its name from the Neilgherry group of mountains. This remarkable range, situate between lat. 11° 10'—11° 35', long. 76° 30'—77° 10', is connected on its western side, where its summits bear the name of the Koondahs, with the Siadri branch of the Western Ghats, which here terminates in a southern face of lofty and nearly perpendicular precipices, forming the north side of the great Palghat valley or depression, which, extending east and west, with a breadth of about twenty miles, admits of an easy communication between the Carnatic and Malabar. The general outline of the Neilgherry group approaches to a scalene triangle, having the side which may be regarded as the base extending nearly from north to south, and facing Malabar; its north side extending east and west, facing Mysore; and the remaining side extending from north-east to south-west, towards the British district Coimbatore, of which it forms a subdivision. "Their greatest extent in an oblique direction from south-west to north-east is from thirty-eight to forty miles, and their extreme breadth fifteen. Taking into account the great undulation of the surface, and the circumstance of the breadth above stated being pretty constant throughout, their superficial extent may be fairly estimated at from 600 to 700 square miles." The north side, towards Mysore, rises about 3,500 feet above that table-land, with which it is connected by a neck about fifteen miles in width. The isolation of this mountain terri-

tory would be complete, but for this singular, sharp, and precipitous ridge of granite peaks, which projects from the base of a remarkable cone called Yellamullay, on the western crest of the range, and, taking a west by north course, towards the coast, unites itself with the Western Ghats. From Coimbatore the Neilgherries rise in a vast precipitous mass to the height of from 5,000 to 7,000 feet; and the aggregate of the group is popularly divided into three ranges,—the Neddimmulla on the north, the Koondah on the south-west, and the central or principal range, rising to the summit of Dodabetta, the highest in the group, and having an elevation of 8,760 feet above the sea, being the greatest at present ascertained in India south of the Himalaya. The drainage, which is in every variety of direction, indicates the surface of the group to be an undulating table-land, rising towards the middle, and attaining its maximum of elevation at Dodabetta. To the westward, the drainage is into the Indian Ocean, by the river of Beypoor; to the south and south-east, it is by numerous streams, feeders of the Bowany, a considerable river, which, flowing north-east, falls into the Cavery; to the north, it is by the Paikari and other feeders of the Mayar, which, flowing east down the great gorge separating this group from Mysore, unites itself, near Danaiencotta, with the Bowany, and ultimately falls into the Cavery.

The Neilgherries rise from a plain nearly as level as the Carnatic. The following are the principal elevations as yet ascertained:—Dodabetta, 8,760 feet; Kudiakad, 8,502; Bevoybeta, 8,488; Murkurti Peak, 8,402; Davursolabetta, 8,380; Kundah Peak, 8,353; Kundamoya, 7,816; Ootacamund, 7,361; Tamburbetta, 7,292; Hokulbeta, 7,267; Urbeta, 6,915; Kodanad, 6,815; Davebeta, 6,571; Kotagiri, 6,571; Kundabeta, 6,555; Dimhutty, 6,330; Coonoor, 5,886. There is no natural lake in the group, but advantage has been taken of the streams which flow from the hills in the vicinity of Ootacamund, to form there an artificial one of considerable dimensions.

The Neilgherries, for the most part, are by no means densely wooded, the forests occurring in distinct and singularly isolated patches, in hollows, on slopes, and sometimes on the very apex of a lofty hill, becoming luxuriant and extensive only when they approach the crests of the mountains, and run along the valleys into the plains below. This comparative absence of forest in a region in which, from its position between the tropics, from the abundance of moisture, and from the great depth and richness of the soil, the utmost luxuriance in this respect would be looked for, is very remarkable, and leads to the conclusion that vast tracts of primeval forest-land must at some period have been cleared to make room for cultivation.

Elephants are numerous in the jungles at the base of the hills, but are not to be met

with on the table-land, where probably the animal would find the climate too cool. The tiger infests the hills, but is less ferocious than in the plains. The cheta or hunting-leopard exists here, as well as the jackal, the wild dog, the marten, the polecat, the wild hog, the bear, the sambar, a sort of large deer; as do also the muntjak and a species of ibex (*Capra caucasica*). Hares are numerous, as are porcupines; otters infest the streams. Jungle-fowl, or wild gallinaceous poultry, are abundant, as likewise are quails; but partridges are rather rare. There are woodcocks, snipes, pigeons of several kinds, blackbirds, thrushes, wrens, larks, and kingfishers. Of predatory birds, there are found a large eagle, an enormous horned owl, a great number and variety of hawks, of which two kinds are peculiarly beautiful, one being milk-white, except on its back, where there is a large black mark between the wings; the other is cream-colour. Venomous snakes are not common, and scorpions and centipedes are altogether unknown. The area of the Neilgherry group, though circumscribed in extent, is inhabited by five distinct races, who, however, in the aggregate, are numerically insignificant. 1st. Erulars, living at the foot of the mountains, and for a short distance in the forests, which extend from the base into the plains; 2ndly, above them dwell the Kurumbars. People answering the general description of these two tribes are to be met with in other mountainous parts of the peninsula of India; but the Erulars of this vicinity differ from them in many particulars; and the Kurumbars, from their connection with the tribes who inhabit the more elevated parts of the mountains, are now quite distinct from the people bearing this name in other parts of the country. Both tribes are utterly unskilled in the arts of life, and little raised above the condition of savages. They speak a jargon compounded of the dialects of the people in their vicinity. The total number of each of these tribes does not exceed 1,000. 3. Kohatars. They are a strange race, have no distinction of caste, and differ as much from the other tribes of the mountains as they do from all other natives of India. They exercise the callings of goldsmiths, silversmiths, blacksmiths, potters, and other handicrafts; being the only persons who follow such pursuits in these mountains. Rejecting the Brahminical traditions, doctrines, and observances, they worship peculiar imaginary divinities, not represented by any visible objects. Their number is about 2,000. 4. Burghers; the most numerous, wealthy, and civilized of the natives of these mountains. They are Brahminists, and divided into eight classes, all worshippers of Siva, and principally using the Carnatic language. They support themselves mainly by agriculture, and are by far the most numerous of the mountaineers, being about 10,000. 5. The Todars, or, as they are more commonly denominated, Toruwars, who are divided into two branches, or two great families, one called Perkis or Terallis,

and who are competent to hold all sacred offices; the other, Kutas, who are competent only to hold minor ones within their own families, and who may be considered as the lay class. Until within a few years, the two classes never intermarried; but such connections between them are now of frequent occurrence. The petty tribe of Todars, not exceeding 600 in number, appear to have attracted the notice of European visitors in no ordinary degree. They are described as a well-made athletic race, generally above the middle stature, and displaying a bold, manly carriage. Their physiognomical characteristics are said to be a full expressive eye, a Roman nose, and a countenance habitually grave, but readily relaxing into cheerfulness. The dress of the men consists of a short under-garment girt round, and large upper mantle, or perhaps, to style it more properly, a sort of blanket, which envelops the person, except the head, legs, and right arm, and affords covering both by night and day. They wear no sandals nor other protection for the feet, and carry no weapons, merely bearing in the right hand a small stick, for driving cattle. They usually wear rings in the ears and on the fingers, and a gold chain round the neck. The women are of a stature proportionate to that of the men, and of fairer complexions, with regular features, and beautiful long black tresses flowing luxuriantly over their shoulders. Their demeanour is stated to be modest, but self-possessed, and free from servility. Their ornaments consist of armlets of brass, worn above the elbow, silver bracelets on the wrists, and rings of various kinds on the fingers and thumbs, a zone round the waist, of chain-work, either silver or brass; and necklaces of silver or braided hair, having cowry-shells suspended from them. Those remarkable people dwell in small hamlets, called morts, consisting of a few thatched cottages, in appearance somewhat resembling the tilt of a waggon.

Owing to the great elevation of the inhabited summits of the Neilgherries, and the consequent rarefaction of its atmosphere, aided, without doubt, in some degree by the beneficial influence of the luxuriant vegetation which clothes the land, the district, although distant only eleven degrees from the equator, enjoys a climate famed for its great salubrity and remarkable evenness of its seasons; the temperature, which falls in the coldest month of the year to the freezing-point, seldom, in the hottest, reaches 75° in the shade. The coldest period is during the months of December and January, and the hottest about April and May, though this latter season is not so certain, as it mainly depends upon the character of the south-west monsoon, and the time of its setting in. The hottest period of the day is from two to half-past two P.M., and the average of the extreme ranges of temperature from sunrise to that time is most commonly 16° throughout the year. The variation is the greatest in January and December, when the extreme

NEI.

radiation which goes on during clear nights produces excessive cold towards sunrise, after which the sun's rays, darting with great fierceness through the rarefied atmosphere, speedily restore heat to the earth, and the temperature of the air rises in proportion. Similar causes reversed in their action necessarily produce sudden and great cold after sunset. An observatory has been erected at Dodabetta. The following table shows the average temperature, fall of rain, and other particulars, throughout the year 1847, on the Neilgherry Hills:—

At OOTACAMUND, 7,300 feet above the level of the sea.

MONTH.	Mean Temperature.			Mean range of Therm.	Rain in Inches.
	At Sunrise.	At 2h. 40m. P.M.	At Sunset.		
January....	42°	63°	58°	21°	1"
February..	44	65	60	21	1
March.....	49	68	63	19	2

November..	54	67	61	13	2
December..	52	66	60	14	5
Total inches of rain					50

During the prevalence of the south-west monsoon, the atmosphere is almost continuously charged more or less with dense mist, enveloping chiefly the mountain-tops, but descending into the valleys as the warmth of the day passes, and spreading in heavy fog in all directions. When not under this influence, the atmosphere overhanging the mountains is brilliantly clear and cloudless, more especially

on the eastern side of the range. The great importance of this group is its adaptation for the establishment of sanatory stations for the re-establishment of health in those who have suffered from the heat of the climate in less-elevated regions. The principal of these stations is Ootacamund, the two minor ones Coonoor and Kotageri.

The number of sick visitors on the Neilgheries from 1840 to 1844 were as follows:—1840, 234; 1841, 391; 1842, 489; 1843, 742; 1844, 820. In the year 1845 it became reduced to 571; in 1846 it rose to 742. Among the whole number of visitors (1,313) in the two years (1845 and 1846), it is stated that only two deaths occurred; a very favourable rate of mortality, as compared with the year 1843, in which the deaths were in the proportion of 1½ per cent. upon the whole number, and favourable even as compared with 1844, when the proportion had diminished to one per cent. The Medical Board hereupon observe: "The climate of the Neilgheries may therefore be confidently pronounced to have maintained its character for salubrity in the case of Europeans suffering from the effects of a tropical climate, when disease has not occasioned organic lesion of any of the important viscera." The results of later years fully support the accuracy of this view.

The Neilgherry district communicates with the neighbouring provinces by means of six passes or ghauts, the roads in which have been cut and kept in repair at the public expense. The only one of these passes which is ascended throughout by wheeled conveyances, is that of "Seegoor," the modes of transit on the others being by bullocks, coolies, and, to a small extent, by asses. By the "Seegoor" Ghaut, however, cartloads of 1,000 pounds weight are brought up, an additional pair of bullocks being required to help the cart over the steepest part of the ascent. By this pass the communication is kept up with Bangalore, Madras, and all places to the northward. The pass from Neddiwuttum to Goodaloor forms the communication between the hills and Cannanore, Tellicherry, and the western coast towards Bombay, through the Wynnad country. Another pass is at Kotergherry, communicating with Matepolliem, in the low country, and thence to Coimbatore and the Salem road. A fourth, at Coonoor, leading down to Matepolliem, the lower half being well constructed, can be ascended by laden carts having an extra pair of bullocks. The Mailoor or Soondaputty Ghaut has gone out of general use, and the remaining one, the Sispara or Koondah Ghaut, forms the line of communication between Calicut and the hills. The delineation of the district having been inaccurately mapped, a re-survey has been authorized. This territory was transferred to the British on the overthrow of Tipoo Sultan.

NEIR.—A town in one of the recently sequestered districts of Hyderabad, or terri-

Bheel being seldom seen without bow and arrows. They are mongrel professors of Brahminism, seeking to propitiate the inferior Brahminical deities by sacrifices and offerings; but they neither construct nor frequent any temples, performing their simple rites under the shade of trees. The Barwars, a sort of pretenders to sorcery, appear to be the only persons among them regarded in any respect in the capacity of priests. Previously to the powerful coercion exercised by the British government, they were notorious plunderers, and many still lurk among the nearly impenetrable fastnesses, and subsist in a great degree on the cattle which they steal. They do not, however, appear to be irreclaimable, some having been trained to render good service in the capacity of police.

Nemaur is parcelled out among various possessors, whose respective tracts are in many instances so intermingled, that any attempt here to make their situation and relative position intelligible must be abortive. Beside the British possessions, it comprises territory belonging to Scindia, to Holkar, to the rajah of Dhar, and other chiefs of less importance. The confusion is increased by the fact of a portion of the native territory being under the management of the British government. The interests of that government are intrusted to the care of a political agent stationed at Mundlesir, who is subject to the authority of the resident at Indore.

NEMAU, or **NIMAWAR**.—A town situate on the right bank of the Nerbudda (here 1,000 yards wide), and on the route from Batool to Mhow, being distant 90 miles N.W. from the former, and 95 E. of the latter. It is the chief place of the pergunnah of the same name; and probably the district of Nemaur also derives from it the appellation by which it is known. It is stated by Malcolm to belong to the family of Holkar. Distant 365 miles N.E. of Bombay, 90 S.E. of Oojein. Lat. 22° 27', long. 76° 58'.

NENKUR, in Sind, a village on the route from Sehwan to Larkhana, and five miles N. of the former town. It is situate two miles west of a large offset from the Indus, and four miles west of the main channel. The surrounding country is level, alluvial, and fertile, but little cultivated. The neglect of cultivation is more especially remarkable towards the Indus, in which direction the land is, for the most part, overrun with jungle. Lat. 26° 27', long. 67° 54'.

NEO DHOORA or **GHAT**, in the British district of Kumaon, lieut.-gov. of the N.W. Provinces, a pass into Hiundes or South-western Tibet, at the head of the Dhouli river, in the mahall of Dharma. It is much frequented by the Bhotias of Dharma, who carry on a brisk trade with Hiundes by means of great flocks and herds of sheep and goats, which they drive before them, laden with grain from Lower Kumaon, broad-cloth, cottons, hardware, and

other goods from Hindustan; and bringing back in return culinary salt, gold-dust, borax, wool, and some other goods of less importance. Though the pass is among summits inferior in height to the main range of the Himalaya farther south, it still has considerable elevation, probably not less than 15,000 feet above the sea. Lat. 30° 29', long. 80° 37'.

NEPAUL, an independent kingdom of Northern India, bounded on the north by Thibet; on the east by Sikkim and the British territory of Darjeeling; on the south by the British districts of Purneah, Tirhoot, Sarun, and Goruckpore; on the south-west by Oude; and on the west by the British district of Kumaon. It extends from lat. 26° 25' to 30° 17', and from long. 80° 15' to 88° 15'; is 500 miles in length from east to west, and 160 in breadth, and contains an area of 54,500 square miles. The principal territorial divisions are Moorung, Chayanpoor, Muckwanee, Khatang, Nepaul, Gorkha, Khachi, and Malebum.

Throughout their southern border, from the river Kalee on the western frontier, to the banks of the Mahanunda on the eastern boundary, the territories of Nepaul are skirted by the Terai, a long narrow strip of land separating them from the Bengal provinces, and from Oude. Ten miles from the frontier commences the great forest of Nepaul, following the same direction as the Terai, possessing an average breadth of from eight to ten miles; and though much overrun in parts with underwood, yet containing a great variety of noble trees; among the chief of which may be enumerated the saul, sissoo, Phullamikh (iron-wood), kale-kaht (a sort of blackwood), the sajh, bhurra, sumni, and multa. The ebony is also found here. Beyond this, in a northerly direction, lies a hilly tract of country, which again is succeeded by two others of increasing elevation, the first of which may be denominated the mountainous, and the second the Alpine region of Nepaul, with its lofty peaks of Dhoulagiri, Gossainthan, Mount Everest, and Kinchin-junga. Full particulars of the nature and character of the Terai will be found under the article KUMAON. The hilly tract, the geological formation of which consists of limestone, hornstone, and conglomerate, rises gradually towards the north, and is traversed by many small rivers having their origin on the southern faces of the first lofty mountains, to which these hills gradually approach. Interposed, as already intimated, between the hills and the Alpine region (some notice of which latter appears in the article HIMALAYAS), is the mountainous region, having a breadth of from thirty to forty miles, consisting of one mountain heaped on another, and rising to a great height, so that when any fall happens in winter, their tops are for a short time covered with snow. The whole of this division is well watered by streams and springs, and the vegetable productions are of most remarkable stateliness, beauty, and

variety. It is diversified by several inhabited valleys, varying in elevation from 3,000 to 6,000 feet above the plains of Bengal, and contains Nepal proper, within which is situated the great valley of Nepal, with its towns of Khatmandoo, Patn, and Bhatgong. Khatmandoo, the capital, was built by the Ghoorkas, and is comparatively modern: the old Newar town (the Newars being the original inhabitants) is Patn. According to Kirkpatrick, the valley of Nepal, on all sides surrounded by hills, is "nearly of an oval figure; its greatest extent is from north to south, in which direction it may be computed at twelve horizontal miles. It stretches from east to west about nine miles, and its circuit is roughly estimated by the inhabitants at twenty-five coss, or from forty to fifty miles. It is bounded on the north and south by very stupendous mountains, near the foot of which rise several of those humbler eminences called collines in Switzerland; indeed the bottom of the valley, besides being in general extremely uneven and intersected by deep ravines, occasioned by autumnal inundations, is speckled throughout at various distances with similar little hills. To the east and west the inclosing mountains are much less lofty, the immediate head of the valley to the westward being defined principally by a low steep ridge covered with brushwood, and anciently called Maroor, but at present most commonly Naga-Arjoon, from the name of an idol for which it is famous. This ridge passes close behind Sumbhoo-Nath, and is itself backed by a more considerable one named Dhochoak. To the eastward, the most remarkable hills are those of Ranichoak and Mahabut, or Mahadeopukhra; but they by no means reach the elevation either of Phalchoak (which is the most towering of the summits that illustrate the southern confine of the valley), or of Sheepoori, which constitutes its principal barrier to the northward, and is unquestionably by far the highest of all the mountains that encircle it. The other chief links of this superb chain are Mount Kukunni, which stretches westerly from Sheepoori, being united to Naga-Arjoon by Mount Bheerbundy and Chumpabaidi, which, with one or two more inferior peaks, complete the girdle by joining Chandraghiri to Phalchoak." Viewed from Chanudraghiri, the scene is thus described by the same writer:—"From hence the eye not only expatiates on the waving valley of Nepal, beautifully and thickly dotted with villages, and abundantly chequered with rich fields, fertilized by numerous meandering streams, but also embraces on every side a wide expanse of charming and diversified country. It is the landscape in front, however, that most powerfully attracts the attention; the scenery in this direction rising to an amphitheatre, and exhibiting to the delighted view the cities and numberless temples of the valley below, and stupendous mountain of Sheepoori; the still supertowering Jib Jibe, clothed to its snow-capped peak with pendulous forests; and finally the gigantic

Himaleh, forming the majestic background to this wonderful and sublime picture."

Hindoo records describe the valley of Nepal as originally an immense lake, which in the progress of time gradually retired between the banks of the Bhagmutty. The statement would appear to be borne out by the physical aspect of the valley, the waving nature of the ground strongly resembling the bed of a large body of water, and the soil, which consists of a rich black mould, being evidently an alluvial deposit.

At the western head of the valley of Nepal stands the temple of Sumbhoo-nath, an ancient edifice occupying the summit of a hill having an elevation of about 300 feet above the sub-jacent plain, the ascent to which is gained by a flight of steps cut out of the rock. A colossal figure of the god Boudh, the lawgiver of the Bhootias, stands at the foot of the steps. The temple rises from the centre of a terrace, which completely occupies the summit of the hill, and is discernible at a great distance, from its gilded spires and turrets.

The principal rivers which traverse Nepal, are the Kurnalli, Gunduck, Trisul-Gunga, Bori-Gunduck, Coosy, and Bhagmutty; these are separately described under their respective heads in the alphabetical arrangement.

Notwithstanding its low latitude, Nepal, from its great elevation, which is about 4,000 feet above the level of the sea, enjoys a climate resembling in some degree that of southern Europe. Snow lies on the mountain-chain which surrounds the capital for days together in winter, and occasionally falls in the valley below, where hoar-frost is by no means unusual. In the same season ice sometimes covers the tanks and pools of standing water, but the rivers never freeze. During Kirkpatrick's stay in the valley of Nepal, from the 17th to the 25th of March, the thermometer at noon usually ranged between 81° and 84°: a little after sunrise it stood at from 50° to 54°, but was once so low as 47°; and at nine in the evening it fluctuated between 62° and 66°; upon one occasion within the seven days it rose to 87°; yet by ascending the sides and summits of the inclosing mountains, the heat of Bengal may be speedily exchanged for the cold of Russia. Nepal is characterized by seasons similar to those of Upper India, the rains commencing a little earlier, and setting in from the south-east. At the foot of the hills in the Terrai, the air is unwholesome from the middle of March to the middle of November, engendering putrid fever, of which those attacked by it, die in a few days.

Several mineral productions are obtainable in Nepal. A vague belief formerly prevailed, that the country contained gold-mines; but the search for their discovery, conducted under the authority of the native government, proved fruitless. The absence of gold is, however, compensated by the excellence of other metals. Copper and iron mines are worked, and the iron of Nepal is said to be not surpassed in

excellence by that of any other country. Its copper, though of superior quality, does not appear to enter into competition in the western markets with the copper of Europe; but this circumstance may be attributed partly to the expense of transportation through a mountainous country, and partly to the ignorance of the natives in the art of metallurgy. Ores of lead have been met with in several tracts, and the western parts of Nepal abound in arsenic and pyrites. Stone well adapted to building purposes abounds; but owing to the expense of its transportation, stone edifices are more uncommon than even in Bengal.

Among the wild animals are the rhinoceros and the tiger; herds of elephants also range in the great forest, and large numbers are annually caught on behalf of the government, who claim an exclusive right to them. The mode in which they are caught is not, as elsewhere, by driving the animals into a keddah or inclosure, but by nooses thrown over their necks by a hunter seated on a decoy elephant. Of domestic animals, it may be briefly noticed that the cattle of Nepal are little superior to those ordinarily met with in Bengal and the upper provinces; but within the last three or four years horned cattle and sheep have been imported from England, with the view of introducing the breed into Nepal.

Rice is the staple article of food; the other principal crops are wheat and pulse. Esculent vegetables are of inferior description; the potato degenerates rapidly, and can only be grown successfully by the annual importation of fresh roots from Patna and other localities. Among the indigenous fruits are the peach, raspberry, walnut, and mulberry.

The population, amounting to 1,940,000, consists of—1st. Ghoorkas, the conquerors of Nepal, who are Hindoos; 2nd. Newars, the aborigines, who are chiefly confined to Nepal proper, and furnish unequivocal signs of their Mongolian origin, in the flat nose, high cheek-bone, small eye, and copper-coloured complexion. Between these two races there subsists, as well in character, manners, and features, as in religious rites and language, the most marked differences. The Ghoorkas make the better soldiers, the Newars the more skilful artisans. Besides these, there are the Bhotias and the Dhanwars and Mhanjees, who are the cultivators and fishermen of the western districts.

Though the commerce of Nepal is not extensive, it carries on trade with Bengal, Thibet, and Oude. Among the principal exports are elephants, rice, timber, hides, ginger, honey, and fruit. The manufactures of the country consist in the fabrication of cutlery, ordnance, muskets, and other warlike instruments; of utensils of brass, copper, and iron, and the casting of bells. Coarse cottons are made up for home consumption, and the paper manufactured in the capital appears to be of superior quality. Nepal is likewise famous for the production of a beautiful flat brick used for the fronts of houses.

Little is known of the Ghoorkas prior to their conquest of Nepal, which appears to have been completed in 1768. In 1790 the Nepaules invaded Thibet, and pillaged its temples. The Lamas had recourse for aid to the emperor of China, who despatched a force of 70,000 men against the Ghoorkas. The latter were defeated and pursued to Noakote, near their capital, where terms dictated by the victors were accepted, and Nepal became a dependency of China. The submission, however, was merely temporary. On the 1st of March, 1792, a treaty of commerce was concluded between the British government and Nepal; and some years later political relations were established between the two governments by the treaty of Dinapoor, concluded in October, 1801. By a separate article of that treaty, the British government guaranteed the payment of the stipend of the ex-rajah of Nepal, who had been compelled to abdicate in favour of his son, and had retired to Benares. No security had been taken from the Nepal government for the repayment; and the omission resulted in loss and annoyance to the British government. At length the alliance between the two states was formally dissolved. This took place in 1804, and from that time till 1812 little intercourse seems to have taken place, beyond vain remonstrances on the part of the British against border invasions and encroachments. These at length occurred so frequently, and to such an increasing extent, that it became necessary for the British government to take some decisive mode of vindicating its rights. An attempt was made to settle the matters in dispute by the appointment of commissioners; but the endeavour ended unsatisfactorily, as such measures often do: the rights of the British were established, but the Nepaules evaded their recognition. Fresh outrages followed, and ultimately war becoming inevitable, preparations for carrying it on were commenced on a somewhat extensive scale. The force destined to act against Nepal, many thousands strong, and duly provided with ordnance and all other necessary implements of war, was distributed into four divisions, under four commanders, to each of whom was assigned a defined course of action. Various diplomatic arrangements were also made, with a view of assisting the military operations, and rendering the whole conducive to the establishment of the relations of peace. Of the attempts at negotiation, it is enough to say that they were generally defeated by the bad faith and chicanery which almost invariably characterize native diplomacy, and which pre-eminently mark that of Nepal. The commencement of military operations was also inauspicious. An unsuccessful attack upon the strong fortress of Kalunga was attended with frightful loss, including among the slain the gallant but ill-fated officer by whom it was conducted, General Gillespie. Another attempt, made under another officer, and with increased means of destruction, was equally unsuccessful; and

though subsequently the place fell into the hands of the assailants, through the abandonment of its garrison, the conquest must be regarded as dearly purchased. Other mischances also occurred. Some of the divisions of the invading army achieved nothing; and it is to the caution and military talent of Sir David Ochterlony, to whom happily one of the divisions had been intrusted, that the British cause was saved from utter defeat and disgrace. His success alarmed the enemy; and under the influence of such alarm negotiation recommenced, and a treaty was arranged, which was ratified as soon as received at Fort William. Its fate at Khatmandoo was widely different. The desire for war had been only checked, not extirpated; and the repudiation of the acts of its own accredited agents was of course not allowed by the Nepaulese government to act as an impediment to the indulgence of its hostile propensities: the treaty therefore was rejected. A renewal of the war was consequently inevitable, but its continuance was happily short. Sir David Ochterlony advanced through jungle and across mountains; and though the enemy at length found courage to attack him, it was without success. The fears of the court of Khatmandoo revived, and an emissary of that court proceeded to the British camp, with the required ratification of the treaty previously concluded, which thus became the rule of the political relations between the two powers. This took place in March, 1816.

Henceforward the history of Nepaul presents little that can excite interest in a European mind. Eternal intrigue, and occasional resort to rougher means, identify its character with that of most oriental courts. At times, however, events have occurred, which by their unusual atrocity relieve the tameness of the surrounding incidents. Such events have marked the career of Jung Bahadoor, whose name at least is pretty well known in England, which country he visited a few years since. Jung Bahadoor was the nephew of a man who had the good fortune (if such a term may be properly applied) to attain the office of prime minister of Nepaul. His youth was devoted to gambling, and his expertness in the avocation which he chose, repaired the financial dilapidation occasioned by his wild excesses. On his uncle becoming prime minister, Jung Bahadoor quitted the obscurity of an outpost for the capital, which he regarded as the only field for the development of genius like his own. There he was the subject of many remarkable adventures, and committed sundry acts not recognised as lawful by the moral codes of the western world. Among the latter was the murder of his uncle, which he undertook and perpetrated at the instigation of the queen, who had previously been the minister's patroness. A new ministry was formed, and Jung became commander-in-chief. The opportunity of slaughter on a larger scale soon awaited him. The new premier was assassinated, and the queen, with whom he was a

prime favourite, demanded vengeance. One of the colleagues of the murdered minister was suspected of being concerned in the crime. Jung proposed to another colleague of the unfortunate premier, that the suspected man should be put to death, and the government be administered by the sole survivor, he to whom the proposals were made. Hesitation on his part being displayed, Jung determined to place him in confinement till his object was effected, and gave a signal for his seizure. The son of the intended prisoner, apprehensive for the safety of his father, rushed forward to his rescue, but was forthwith cut down; the father sprang to avenge his son's death, but a bullet from the rifle of Jung Bahadoor laid the former by the side of the latter. This was, however, but the prelude to what was to follow. Fourteen hostile chiefs confronted Jung; but he was prepared to deal with them promptly. Backed by a small force, on which he could depend, he levelled his rifle fourteen times in succession, and at each discharge, excepting one, brought down his selected victim. The man who escaped his aim was he who had been accused of the murder of his colleague; but his reprieve was short; he reached the door, but there met from a sword the death which he had escaped from Jung's rifle. Massacre now raged throughout the palace; but the bodies of the slain were for Jung the stepping-stones to power. Before the dawn of the succeeding day, Jung Bahadoor was invested with the office of prime minister. His future course was not inconsistent with its commencement. A conspiracy was formed for his destruction; but Jung not only escaped, but seized and beheaded all the adherents of the chief conspirator. The queen was ordered to quit the country with her two sons: the king accompanied them, and the heir-apparent was raised to the throne. A feeble attempt was made by the monarch to regain his crown, but the information and energy of Jung baffled it, and the king was made prisoner. He still remains in captivity, but is sometimes, as an indulgence, allowed to occupy a seat on the throne next to his usurping son.

NERBUD.—A town in Guzerat, or the dominions of the Guicowar, situate 86 miles E.S.E. from Rajcote, and 79 miles W.S.W. from Baroda. Lat. 21° 52', long. 72° 7'.

NERBUDDA.—A river rising in the British district of Rangurh, presidency of Bengal, on the elevated plateau of Amarakantak or Ummurkuntuk, in the Vindhya Mountains, at an elevation of probably between 3,000 and 4,000 feet above the sea. Though that place is within the British frontier, little is known of it. According to the accounts collected by Tieffenthaler and Blunt, its remotest source is in an inexhaustible pond, inclosed by a wall of masonry, close to the temple of Amarakantak, in lat. 22° 39', long. 81° 49'. The nascent river is a yard wide at its exit from the pond, and flowing eastward a mile and a half, is pre-

ecipitated twenty-six yards from the brow of the table-land, and, changing its direction, flows westwards. In the upper part of its course, the declivity must be very rapid, as Jubbulpore, having an elevation above the sea of 1,458 feet, and situate on the right bank of the river, is, if the distance be measured along the channel, 190 miles below the source; and if the elevation of this last be assumed at 3,500 feet, the average descent of the waterway in that interval may be estimated at about ten feet in each mile. About Jubbulpore, it enters on what is generally called the valley of the Nerbudda, or the great depression bounded north by the Vindhya, on the south by the Satpoora Mountains; and the immediate drainage of this supplies nearly the whole volume of its water, as perhaps no river of the same magnitude and length of course receives so few important tributaries. About forty miles below Jubbulpore, and in lat. $23^{\circ} 4'$, long. $79^{\circ} 26'$, it, near Bairkaira, on the right side, receives the Herrun, a small river; and twenty miles lower down, on the left side, the Shair, still smaller. The formations along its banks, in the upper part of its course, appear for the most part to be trappean; lower down, at Jubbulpore, granitic. At Bhera Garh, below Jubbulpore, the channel is contracted between two high perpendicular cliffs of magnesian limestone, white as snow. The river, notwithstanding the great width of its bed in some parts of its upper course, appears to be scarcely anywhere continuously navigable for any considerable distance, in consequence of the innumerable basaltic rocks scattered over its channel; and these obstacles are the more seriously injurious, as at Chandgurb, near Poonassa, and Tendukhera, near Jubbulpore, are inexhaustible mines of iron-ore, of good quality, which, were the navigation available, would prove a most useful resource to that part of Hindustan. A recent report on the state of this river is officially described as "presenting an interesting, but not very encouraging narrative as respects its navigation for purposes of trade." Four or five miles above Hoshungabad, 360 miles from its source, and in lat. $22^{\circ} 45'$, long. $77^{\circ} 49'$, it, on the right side receives the Towah, perhaps the largest of its tributaries; and a little below the confluence it is 900 yards wide.

About fifty yards above the junction of the Towah river with the Nerbudda, there is a ledge of black limestone rock, which stretches the whole way across the Nerbudda, connecting the two banks by a causeway, as it were: a fine waterfall is the result, while immediately below it is an exceedingly deep hole, which is literally alive with immense alligators. The ascent, from its steepness and slippery nature, is impracticable to them, and they content themselves with sporting about the deep water at its base. Below Hoshungabad, for about eighty miles, as far as Jooga, in lat. $22^{\circ} 20'$, long. $76^{\circ} 46'$, and 445 miles from the source, the channel is rather free from obstacles; but

at that place there is a stony rapid, which, however, is, during the periodical rains, passable for boats of considerable burthen; and about ten miles below this rapid is the fall of Mundhar, of ten feet, causing an insuperable impediment to navigation. This stoppage of the navigation is in lat. $22^{\circ} 15'$, long. $76^{\circ} 48'$, below the source of the river 455 miles; above its mouth 346. Between Mundhar and Hoshungabad, the country on each side of the river is a very wild, woody tract, consisting of a succession of low hills, and deep ravines and watercourses, covered with dense and lofty forests, and scarcely capable of being traversed in most parts for seven or eight miles from the river by any but foot-passengers. Iron-ore abounds. Below Mundhar twenty-five miles, and in lat. $22^{\circ} 16'$, long. $76^{\circ} 28'$, are the falls of Dhardri, of forty feet descent, there being, during the season of low water, four or five channels, but during the periodical rains, an unbroken sheet of water, about a hundred feet in width from the cliff on the left to that on the right side; navigation being totally impracticable. Close below this fall is the rapid of Kal Bhyru, "in forty feet, three feet," the river being only 100 feet wide, and three feet water on the rapid; and here is a ford much frequented at seasons of low water. At the termination of the rapid is the rocky isle of Mundatta, the ruinous pagodas on which are annually much frequented, being sacred to Siva. The geological formations of the banks in this part of the river's course appear to be of slate of various sorts. Between the rapids at Mundatta and the British cantonment at Mundlesir, seventy miles lower down, several rapids occur, but none totally interrupting navigation. The estimated elevation of Mundlesir above the sea is 700 feet, or 760 below Jubbulpore, where the stream, descending from the table-land, enters the valley of the Nerbudda; and as the distance between those two towns is 360 miles, measured by the stream, the average descent in that interval is little more than two feet per mile.

Jacquemont describes the river as about 2,000 feet wide at Mundlesir in the season of low water, when it is fordable, though with difficulty, in consequence of the great rockiness of its bed. In the periodical rains, the water rises here from thirty to forty feet above its height in the shrunken state of the river. At Hiranpul, seventy miles below Mundlesir, the navigation is totally interrupted by a rapid, 100 feet in length, and having a fall of six feet. The channel, 150 feet in width, is studded with basaltic rocks, rising above the surface. In a late attempt made to try how far it might be navigated, a very strong canoe, guided by means of two ropes worked by several men on the bank, was several times upset or sunk, though at last hauled out by main strength. The Hiranpul rapid is in lat. $22^{\circ} 5'$, long. $74^{\circ} 43'$, 320 miles from the source, 181 from the mouth. A mile below this, "it [the Nerbudda] finds a single channel of forty

yards, bounded on either side by cliffs, into which the stream, 600 yards in width, contracts in volume as it rushes down the declivity of this gorge with extreme fury." From this place the river is unfit for navigation for seventy miles, to Soolpan Mahadeo, or Makri Fall, in lat. $21^{\circ} 47'$, long. $73^{\circ} 48'$, 691 miles from the source, 110 from the mouth. According to Dangerfield, in this part of its course "the stream finds its way, contracted to within half its usual breadth, between two hilly ranges, and its course being much impeded, so as to render navigation impracticable, by large masses and elevated ridges of rock." In one spot, the channel for this vast volume of water "was not ten yards in breadth, the water rushing through it with a slight fall and tremendous force." From Makri Fall to Tullukwara, a distance of twenty-five miles, the navigation is difficult; but, with much care and toil, practicable. From Tullukwara, in lat. $21^{\circ} 57'$, long. $73^{\circ} 32'$, to the sea, a distance of eighty-five miles, it is navigable for boats of considerable burthen. Flowing by the city of Broach, situate on its right or north bank, it falls into the Gulf of Cambay, in lat. $21^{\circ} 35'$, long. $72^{\circ} 35'$; its total length of course being 801 miles. The tide is perceptible only twenty-five miles above Broach, or fifty-five from the sea. Throughout the tidal part of its course, the breadth of the Nerbudda exceeds a mile. At Broach, about thirty miles from the mouth, it is a noble sheet of water two miles wide, even when the tide is out. Ships of burthen can proceed up the river to Broach; but skilful pilotage is necessary, as the navigation is very difficult, in consequence of a bar at the entrance of the river, and numerous sandbanks in its channel. The practicability of improving the navigation by artificial means has been considered; and several years since instructions were sent out for a survey by a competent officer, with a view to this end. An experienced geologist was at the same time directed to examine the coal-fields in the neighbourhood of Hoshungabad, for the purpose of ascertaining their capacity as a source of supply to Bombay, thereby relieving that port from its exclusive dependence upon Europe for coal. The latest results reported are of an encouraging character. Few rivers have a more direct course than that of the Nerbudda, which is nearly due east and west. It is considered to be the boundary between the Deccan and Hindostan.

NERBUDDA TERRITORY.—See SAUGOR AND NERBUDDA.

NERIAD, in the British district of Kaira, under the presidency of Bombay, a town on the route from Baroda to the city of Ahmedabad. Its streets are level, conveniently broad, and clean. It is the principal place of the extensive tobacco tract in that district, and is situate in a thriving, well-cultivated country, abounding in towns and prosperous villages. Population 40,000. Distance from Baroda,

N.W., 35 miles; from Ahmedabad, S.E., 30. Lat. $22^{\circ} 40'$, long. $72^{\circ} 55'$.

NEROWLEE.—A town in the Rajpoot state of Jeypoor, situate 69 miles S.E. from Jeypoor, and 130 miles E. from Ajmeer. Lat. $26^{\circ} 20'$, long. $76^{\circ} 48'$.

NEROWLEE, in the British district of Moradabad, lieut.-gov. of the N.W. Provinces, a town on the route from Moradabad to Coel, 25 miles S. by W. of the former. Lat. $28^{\circ} 29'$, long. $78^{\circ} 49'$.

NERRONA.—A town in the native state of Cutch, situate on the Great Western Runn of Cutch, and 12 miles N.N.W. from Bhooj. Lat. $23^{\circ} 23'$, long. $69^{\circ} 40'$.

NEVERDEEPOOR, in the district of Saloon, territory of Oude, a town on the right bank of the river Saece, 75 miles S.E. of Lucknow. Butter estimates the population at 3,000 Hindoos, including 100 Bhattas. Lat. $25^{\circ} 59'$, long. $81^{\circ} 38'$.

NEWA SHAHER, in the Julindur Doab division of the Punjab, a town situated 15 miles W. from the right bank of the Sutlej, 130 miles E. by S. of the town of Lahore. Lat. $31^{\circ} 12'$, long. $76^{\circ} 18'$.

NEW HALLA.—A town in the British district of Hyderabad, province of Scinde, presidency of Bombay, 30 miles N. of Hyderabad. Lat. $25^{\circ} 48'$, long. $68^{\circ} 29'$.

NEWSUR.—See Nowsur.

NEWTAH, in the British district of Dumoh, one of the divisions of the Saugor and Nerbudda territories, lieut.-gov. of the N.W. Provinces, a town on the route from Dumoh to Jubbulpore, 12 miles S.E. of the former. Lat. $23^{\circ} 40'$, long. $79^{\circ} 38'$.

NEWULGURH.—A town in the territory of Oudh, 60 miles N.N.E. from Oudh, and 81 miles N.W. from Goruckpoor. Lat. $27^{\circ} 35'$, long. $82^{\circ} 34'$.

NEYH.—A town in the native state of Cutch, 68 miles W.N.W. from Bhooj, and 96 miles S.E. by S. from Tatta. Lat. $23^{\circ} 30'$, long. $68^{\circ} 42'$.

NEYPAAR.—A town in the British district of Kaira, presidency of Bombay, 33 miles S.E. by E. of Kaira. Its streets are narrow and uneven. Lat. $22^{\circ} 28'$, long. $73^{\circ} 7'$.

NHOON, in the Sinde Sagur Doab division of the Punjab, a town situated on the left bank of the Indus, 135 miles S. by W. of the town of Peshawur. Lat. $32^{\circ} 7'$, long. $71^{\circ} 18'$.

NIBRUNG, in Bussahir, a pass across the elevated ridge forming the southern boundary of Koonawar. It has the appearance of a gateway, and lies between two perpendicular rocks, each thirty-five feet high. Gerard remarks that he had nowhere else observed so great a difference in the height of the thermometer exposed to the sun's rays and in the shade; in the former case being 104° , and in the latter $35\frac{1}{2}^{\circ}$. Three hundred yards to the south-east is the Goonas Pass, and a quarter of a

mile further, in the same direction, is the Ghushul Pass. Niblung is 16,035 feet above the sea. Lat. $31^{\circ} 22'$, long. $75^{\circ} 13'$.

NICHOUL, or NUHLAWALI, in the British district of Goruckpoor, lieutenant-gov. of the N.W. Provinces, a small town near the northern frontier towards Nepal. Buchanan, who surveyed it forty years ago, describes it as a very sorry place, having 200 huts: and if six persons be allowed to each, the population may be estimated at 1,200. Here is a ruinous mud fort, which formerly belonged to the petty rajah of Palpa, in Nepal. Distant N.E. from Goruckpoor cantonment 45 miles. Lat. $27^{\circ} 17'$, long. $83^{\circ} 47'$.

NICHOR, in Bussahir, a village of the district of Koonawar, is situated on the northern declivity of a mountain sloping down to the left bank of the Sutluj. Elevation above the sea 6,925 feet. Lat. $31^{\circ} 33'$, long. 78° .

NICKRYE.—A town in the British district of Cuttack, lieutenant-gov. of Bengal, 37 miles E. by N. of Cuttack. Lat. $20^{\circ} 34'$, long. $86^{\circ} 29'$.

NICOBARS.—A cluster of islands in the Indian Ocean, lying between lat. $6^{\circ} 40'—9^{\circ} 20'$, and long. $93^{\circ} 3'—94^{\circ} 13'$: they are inhabited by about 1,000 Malays. The Danes formed a settlement here in 1756, but abandoned it in 1768. At the latter end of the year 1840, the whaler *Pilot*, of London, was seized by pirates infesting the Nicobars. An English cruiser being despatched to these islands to exact reparation, a quantity of marine stores, not pertaining to the *Pilot*, were discovered, and a suspicion arose that some of the many vessels which had sailed in recent years for China or the Straits, and had never since been heard of, might have fallen victims to the pirates of the Nicobars or Andamans. At this period, the sovereignty of the Nicobars was claimed by the Danes. Evidence subsequently obtained, left little room for doubt that in several instances the crews of British vessels had been murdered, and the vessels scuttled and sunk by the islanders; and it further appeared that the murder of the crew had always been effected by surprise. Measures were taken to give notoriety to these circumstances, and commanders of trading vessels likely to touch at the Nicobars were recommended to employ, during their stay, a portion of the crew as an armed watch. In 1848, the Danish government came to the determination to abandon all claim to sovereignty over the Nicobars; and on the final removal of Danish authority, the chiefs of the island of Car Nicobar hoisted the British flag, and expressed their desire, through a British merchant of Moulmein, to acknowledge the supremacy of the British government. It was not, however, deemed expedient to recognise these proceedings. Some few years later, certain residents of Chittagong made a representation to the British government regarding two brigs which sailed for the Nicobars in 1852. Neither of

them had since been heard of, and the presumption was, that both had been cut off by savages. Captain Dicey, of the steamer *Tenasserim*, was thereupon despatched to the Nicobars for the purpose of inquiring into the fate of the missing vessels; and the report of this officer, the home authorities observe, "leaves no doubt that two vessels, one of them English, have recently been destroyed, and their crews murdered by the inhabitants of the Nicobar Islands; and there seems too much reason to fear that these atrocities have been preceded by many similar outrages." These and the adjacent islands termed the Andamans would, it has been suggested, answer admirably for a convict settlement.

NIDAON, or NADAUN, in the north of the Punjab, a small town on the Beas, here a deep, rapid, and clear stream, 150 yards wide, and running at the rate of three miles and a half an hour. The right bank is of sandstone, lofty and abrupt; the left of mould, lower and shelving. Here is a ferry much frequented, being on the route from British India to Cashmere. Nadaun was formerly a flourishing place, and was held by an independent rajah; but the prince was expelled by Runjeet Singh, and since that event the town has fallen into decay. Near Nadaun is Jewala Mukhi, a celebrated Hindoo temple, surmounted with a richly-gilded roof, and inclosing a fissure in the rock, from which issue jets of inflammable gas, which, when lighted, are considered the breath of the tutelary deity. The assessment of the land revenue, when payable to the Sikh government, was regulated by a curious contrivance, which, according to Moorcroft, "without diminishing the amount, was likely to be satisfactory to the peasantry. This was by a rough analysis of the soil. A given quantity of the earth was put into a fine muslin sieve, and washed with water until all the mould was carried through, and nothing but the sand left; and according to its proportion to the whole, a deduction was made from the assessment." The rate for rich soil was about five shillings an acre. The site of Nadaun is delightful; and during its prosperity it was celebrated for fine gardens, and various other attractions. Vigne mentions a popular proverb—"Who will come to Nadaun, and then leave it?" It is in lat. $31^{\circ} 46'$, long. $76^{\circ} 23'$.

NIDDAGOONDA.—A town in Hyderabad, or territory of the Nizam, 56 miles N.E. by E. from Hyderabad, and 127 miles N.W. from Guntoor. Lat. $17^{\circ} 48'$, long. $79^{\circ} 19'$.

NIDDAVOLE.—A town in the British district of Masulipatam, presidency of Madras, 63 miles N.E. by N. of Masulipatam. Lat. $16^{\circ} 55'$, long. $81^{\circ} 44'$.

NIDIGULL, in the Mysore, a fort and town on the north-east frontier, towards Bellary, garrisoned by Hyder Ali. It in the year 1770 was, after a desperate resistance, stormed by the troops of the poligar or chief of Chitradurg, auxiliary to the Mahrattas.

Distance from Chitradurg, E., 48 miles; Bangalore, N.W., 89. Lat. $14^{\circ} 10'$, long. $77^{\circ} 9'$.

NIDJIGUL.—A town in the Mysore, 67 miles N.E. by N. from Seringapatam, and 146 miles W. by N. from Arcot. Lat. $13^{\circ} 15'$, long. $77^{\circ} 15'$.

NIE SARAE, in the territory of Oude, a village on the route from Cawnpore to Lucknow, 28 miles N.E. of the former, 25 S.W. of the latter. Lat. $26^{\circ} 41'$, long. $80^{\circ} 42'$.

NILAB, in the Punjab, a small town on the left or eastern bank of the Indus, a short distance below Attock, and close to the confluence of the Hurroo river. The name signifies "blue water," and has been assigned to it from the deep blue colour of the water of the Indus at this place. The great river here is narrow, rapid, and 120 feet deep. There is a ferry, at which, according to Wood, Timur crossed on his invasion of India; but Rennell is of opinion that he crossed at or near Attock. Lat. $33^{\circ} 46'$, long. $72^{\circ} 15'$.

NILING, in Chinese Tartary, near the northern frontier of Gurwhal, is situated in the district of Chaprang, being distant south-west from the town of that name six days' journey, by a tolerably good track. It is situated on the right bank of the Jahnevi, a great confluent with the Bhageerettee, called lower down the Ganges. The houses are built very low, in consequence of the great violence of the wind. Besides the road to Chaprang, there is another to Koonawar by the Chungsakhago Pass, situate about lat. $31^{\circ} 14'$, long. $78^{\circ} 37'$. This is probably the most difficult pass in the Himalayas, as Gerard, who had crossed several above 18,000 feet high, could find no guide willing to accompany him across the Chungsakhago; and some years before his arrival in that tract, eighteen people perished in attempting the passage; since which time few loaded travellers venture on it. Elevation above the sea 11,127 feet. Lat. $31^{\circ} 6'$, long. $79^{\circ} 2'$.

NILLEHGAON.—A town in the British province of Sattara, presidency of Bombay, 20 miles E. from Sholapoor, and 69 miles N.N.E. from Beejapoor. Lat. $17^{\circ} 41'$, long. $76^{\circ} 15'$.

NIL NAG, "blue lake," in Cashmere, a great spring or piece of water, which gives rise to a stream falling into the Behut or Jhelum, in the vicinity of Baramula, in lat. $33^{\circ} 48'$, long. $74^{\circ} 47'$. Like most other sources of rivers, it is regarded with superstitious veneration by the Hindoos. It is situated on the north-eastern declivity of the Pir Panjal, and 21 miles S.W. of Serinagur.

NIMAR.—See NEMAUR.

NIMBEH.—A town in the British district of Ahmednuggur, presidency of Bombay, 11 miles N.N.W. of Ahmednuggur. Lat. $19^{\circ} 15'$, long. $74^{\circ} 41'$.

NIMBERA, in Rajpootana, the principal

place of a *pergunnah*, one of the possessions of the noted Patan freebooter Muhammed Ameer Khan, is situate on the route from Neemuch to Nusseerabad, 16 miles N.W. of the former, and 127 S. of the latter. It is surrounded by a rampart with towers, and has a small mosque, some small temples, and a neat cutchery or court of justice. There is a very beautiful baoli or well. It has a noble staircase, and a verandah of rich Saracenic arches round the wall about half-way down. The *pergunnah* contains 275 villages, and an area of 172 square miles. Of its separate population there is no return, but information on that of the whole of the dependencies of Ameer Khan will be found in the article on Tonk. It is estimated to yield an annual revenue of 1,40,000 rupees, or 14,000*l*. Though forming part of the jaghire of the noted Ameer Khan, its fiscal affairs and police have long been under the management of the East-India Company; an arrangement originating in a great outrage committed on some British subjects from Neemuch, who were attacked, stripped, and some of them killed. The proper British officer having applied to Ameer Khan for redress, that chieftain answered that he had no sufficient army to sustain his authority in so distant a possession, and that he wished that the English would take the district in farm, give him a fair rent, and govern it their own way; which offer was accepted. Tod, who passed through this place in 1820, and a few years before Heber's visit, states it to be a "considerable town, with an excellent stone circumvallation;" and adds that, "being on the high road between Malwa and Hindostan, it enjoys a good share of traffic." Lat. $24^{\circ} 36'$, long. $74^{\circ} 43'$.

NIMBSOR.—A town in the British province of Sattara, presidency of Bombay, 35 miles S.E. by E. of Sattara. Lat. $17^{\circ} 27'$, long. $74^{\circ} 31'$.

NIMKESARAE, in the British district of Muttra, lieut.-gov. of the N.W. Provinces, a village on the route from the city of Agra to Bareilly, and 22 miles N. of the former. Lat. $27^{\circ} 24'$, long. $78^{\circ} 17'$.

NIMKHAR, or **NIMKHAR-MISRIK**, in the district of Khairabad, territory of Oude, a town near the left bank of the Goomtee, is the principal place of the subdivision of the same name. On a high sand-hill on the bank of the river is a brick fort, of quadrangular ground-plan, half a mile in circuit, having four round towers, one at each angle, but fallen into ruin. Contiguous is a reservoir, regarded sacred by the Hindoos, of octagon outline, surrounded in its circuit of about 180 paces by a wall, sloping towards the water, with ten steps. The water is supplied from hidden springs; is clear, deep, of a sky-blue colour, and is used by the Hindoos as a bath for ritual ablutions. Similar tanks abound in the neighbourhood. This place is mentioned in the Ayeen Akbery as having a brick fort, and yielding an

annual revenue of 89,101 rupees. Lat. 27° 21', long. 80° 32'.

NINA DEVI, in the hill state of Kuhloor, a peaked mountain in the narrow peninsula formed by a remarkable flexure of the Sutlej, and about four miles from the left bank of that river. It rises about 3,000 feet above the town of Anandpoor, or 4,000 above the level of the sea. Its shape is singularly like the peaked turban worn by the Sikhs, which people hold the spot in great veneration, because Guru Govind Singh ascended to its summit, and there, surrounded by a few faithful followers, concerted measures for the propagation of their faith. A small well-constructed temple is situate on the summit, to which there is access by means of a flight of stone steps. Lat. 31° 18', long. 76° 37'.

NINGROO.—A town in the British district of Sudiya, Upper Assam, 34 miles S. of Sudiya. Lat. 27° 20', long. 95° 42'.

NIRMUL, in Hyderabad, or the territory of the Nizam, a town nine miles north of the left or north bank of the Godavery, in a country of granitic formation, overlaid with fossiliferous strata, on the route from Hyderabad to Nagpoor, 120 miles N. of former, 150 S.W. of latter. Lat. 19° 7', long. 78° 25'.

NIRT, in Bussahir, a village on the left bank of the Sutlej, belonging to Brahmins, who hold it rent free. Elevation above the sea 3,087 feet. Lat. 31° 23', long. 77° 37'.

NISHOWRA.—See **NASAIRAH**.

NISUNG, in Bussahir, a village of Koona-war, is situate near the left bank of the Tag-lakhar, a large stream which rises in Chinese Tartary, three or four days' journey to the eastward. The village lies at the northern base of the Tungrug Pass, from which it is accessible by a footpath of steep descent, passing through growths of juniper and thyme. The soil and climate are sufficiently genial to bring to maturity esculent vegetables and small fruit, such as gooseberries, though it has an elevation of 10,165 feet above the sea. Lat. 31° 39', long. 78° 34'.

NITI, in the British district of Kumaon, under the lieut.-gov. of the N.W. Provinces, a village near a celebrated pass of the same name, across the range or succession of mountains forming the boundary towards Hiundes or Chinese Tartary. The village, thirteen miles south of the pass, is situate on the left bank of the Doulee, and at the foot of a range of eminences, which, sweeping round, defends it on the north and north-west from tempests. The route from the village is up the course of the Doulee, which rises on the southern face, where, in the early part of October, not a speck of snow was to be seen. After the route diverges from the Doulee, the ascent becomes very steep, amidst crumbling crags of blue limestone. The pass opens at the top on the table land of Tartary, or rather on the slightly depressed basin of the Sutluj, the bed of which
